PICKLED VEGETABLES

Atchar
Atchar is a hot vegetable pickle eaten by many in Botswana. It is usually eaten with bread or rice. Atchar from vegetables, is made from carrots, onions and cabbage (sometimes sweet peppers and green beans) stored in vinegar and oil. The main flavour of atchar is usually cayenne pepper (chilli), with salt and other spices being added.

Recipe
Ingredients needed for 7-8 jars of mild vegetable atchar (400g jars/glass bottles like those used for peanut butter)

- 750g Carrots
- 600g Cabbage
- 450g Onions
- 750ml Sunflower oil
- 300ml Vinegar
- 72g Cayenne pepper
- 15g Ginger powder
- 40g Salt
- 30g Curry powder

Method
Wash all vegetables in cold water. Remove all rotten parts, skin, tops and tails, and discard them.

Grate the carrots using the large round holes on the grater.

Cut the onions and cabbage into thin pieces, approximately 5cm long. Do not use the core of the cabbage.

Wash the jars and lids and put them into a large saucepan. Fill the saucepan with water so that the jars and lids are covered and heat until the water boils. Let the water boil for about 5 minutes.

Put a little of the oil in a saucepan and add to this, the dry foods (cayenne pepper, salt, ginger powder and curry powder). Stir well and make sure that the oil does not burn. Keep stirring. If more oil is needed, add only from the amount you have measured out for the recipe.

Add the onions and heat quickly until they become soft (approximately 5 minutes).

Add the rest of the oil and vinegar. Stir well. You must have enough vinegar or the atchar will spoil.

Add the cabbage. Stir well. Heat for a further 5 minutes. Stir from time to time. Make sure the atchar does not burn.

Finally add the carrots and heat for a few minutes so that the carrots are slightly softened (about 5 minutes).

Fill the jars to 2cm from the top. Make sure that there is a layer of liquid from the atchar covering the vegetables, otherwise when the jar is opened, it will spoil.

Clean the outside of the rim of the jar and put on the lid. Close as tightly as possible.
Slowly turn the jar upside down, so that any bacteria on the lid or in the space at the top of the jar are killed. Leave the jar upside down until it is cold.

When the jars are cold, test each lid to make sure it has a good seal.

**Alternative recipes**

The above recipe is for mild vegetable atchar.

For hot vegetable atchar use 120g of cayenne pepper.

For curried vegetable atchar use 90g curry powder and only 48g of cayenne pepper (6 packets).

Making mild vegetable atchar without using scales (not to be done if atchar is meant for sale).

```
6 coke cans  Carrots
6 coke cans  Cabbage
3 coke cans  Onions
3 ¾ teacups  Sunflower oil
1 ½ teacups  Vinegar
6 level tbs  Hot curry powder
9 packets  Cayenne powder
3 level tbs  Ginger powder
3 level tbs  Salt
```  

tbs = tablespoon (next size up from a teaspoon or equal to three teaspoons)

For hot vegetable atchar follow the above recipe but use 15 packets of cayenne pepper.

For curried atchar follow the above recipe but use only 6 packets of cayenne pepper and 18 level tablespoons of curry powder.

**Equipment required**

- 2 large saucepans
- Fire or stove
- Grater
- Scales
- Large wooden spoon
- Knife
- Chopping board
- Measuring jug or cup
- Tablespoon
