While few, if any, anarchists would fail to recognise the importance of possession — which creates the necessary space all individuals need to be themselves — they all agree that private property corrupts this liberatory aspect of “property” by allowing relationships of domination and oppression to be built up on top of it. Because of this recognition, all anarchists have tried to equalise property and turn it back into possession.

Also, capitalist individualism actively builds barriers between people. Under capitalism, money rules and individuality is expressed via consumption choices (i.e. money). But money does not encourage an empathy with others. As Frank Stronach (chair of Magna International, a Canadian auto-parts maker that shifted its production to Mexico) put it, “[t]o be in business your first mandate is to make money, and money has no heart, no soul, conscience, homeland.” [cited by Doug Henwood, **Wall Street**, p. 113] And for those who study economics, it seems that this dehumanising effect also strikes them as well:

“Studying economics also seems to make you a nastier person. Psychological studies have shown that economics graduate students are more likely to ‘free ride’ — shirk contributions to an experimental ‘public goods’ account in the pursuit of higher private returns — than the general public. Economists also are less generous than other academics in charitable giving. Undergraduate economics majors are more likely to defect in the classic prisoner’s dilemma game than are other majors. And on other tests, students grow less honest — expressing less of a tendency, for example, to return found money — after studying economics, but not studying a control subject like astronomy.”

“This is no surprise, really. Mainstream economics is built entirely on a notion of self-interested individuals, rational self-maximisers who can order their wants and spend accordingly. There’s little room for sentiment, uncertainty, selflessness, and social institutions. Whether this is an accurate picture of the average human is open to question, but there’s no question that capitalism as a system and economics as a discipline both reward people who conform to the model.”
[Doug Henwood, **Op. Cit.**, p, 143]

Which, of course, highlights the problems within the “trader” model advocated by Ayn Rand. According to her, the trader is **the** example of moral behaviour — you have something I want, I have something you want, we trade and we both benefit and so our activity is self-interested and no-one sacrifices themselves for another. While this has **some** intuitive appeal it fails to note that in the real world it is a pure fantasy. The trader wants to get the best deal possible for themselves and if the bargaining positions are unequal then one person will gain at the expense of the other (if the “commodity” being traded is labour, the seller may not even have the option of not trading at all). The trader is only involved in economic exchange, and has no concern for the welfare of the person they are trading with. They are a bearer of things, **not** an individual with a wide range of interests, concerns, hopes and dreams. These are irrelevant, unless you can make money out of them of course! Thus the trader is often a manipulator and outside novels it most definitely is a case of “buyer beware!”

If the trader model is taken as the basis of interpersonal relationships, economic gain replaces respect and empathy for others. It replaces human relationships with relationships based on things — and such a mentality does not encompass how interpersonal relationships affect both you and the society you life in. In the end, it impoverishes society and individuality. Yes, any relationship must be based upon self-interest (mutual aid is, after all, something we do because we benefit from it in some way) but the trader model presents such a **narrow** self-interest that it is useless and actively impoverishes the very things it should be protecting — individuality and interpersonal relationships (see section I.7.4 on how capitalism does not protect individuality).

4.5 Does private property co-ordinate without hierarchy?

It is usually to find right-libertarians maintain that private property (i.e. capitalism) allows economic activity to be co-ordinated by non-hierarchical means. In other words, they maintain that capitalism is a system of large scale co-ordination without hierarchy. These claims follow the argument of noted right-wing, “free market” economist Milton Friedman who contrasts “*central planning involving the use of coercion — the technique of the army or the modern totalitarian state*” with “*voluntary co-operation between individuals — the technique of the marketplace*” as two distinct ways of co-ordinating the economic activity of large groups (“*millions*”) of people. [**Capitalism and Freedom**, p. 13].

However, this is just playing with words. As they themselves point out the internal structure of a corporation or capitalist company is **not** a “market” (i.e. non-hierarchical) structure, it is a “non-market” (hierarchical) structure of a market participant (see section 2.2). However “market participants” are

part of the market. In other words, capitalism is **not** a system of co-ordination without hierarchy because it does contain hierarchical organisations which **are an essential part of the system!**

Indeed, the capitalist company **is** a form of central planning and shares the same “technique” as the army. As the pro-capitalist writer Peter Drucker noted in his history of General Motors, “[t]here is a remarkably close parallel between General Motors’ scheme of organisation and those of the two institutions most renowned for administrative efficiency: that of the Catholic Church and that of the modern army . . .” [quoted by David Enger, **Apostles of Greed**, p. 66]. And so capitalism is marked by a series of totalitarian organisations — and since when was totalitarianism liberty enhancing? Indeed, many “anarcho”-capitalists actually celebrate the command economy of the capitalist firm as being more “efficient” than self-managed firms (usually because democracy stops action with debate). The same argument is applied by the Fascists to the political sphere. It does not change much — nor does it become less fascistic — when applied to economic structures. To state the obvious, such glorification of workplace dictatorship seems somewhat at odds with an ideology calling itself “libertarian” or “anarchist”. Is dictatorship more liberty enhancing to those subject to it than democracy? Anarchists doubt it (see section A.2.11 for details).

In order to claim that capitalism co-ordinates individual activity without hierarchy right-libertarians have to abstract from individuals and how they interact **within** companies and concentrate purely on relationships **between** companies. This is pure sophistry. Like markets, companies require at least two or more people to work — both are forms of social co-operation. If co-ordination within companies is hierarchical, then the system they work within is based upon hierarchy. To claim that capitalism co-ordinates without hierarchy is simply false — its based on hierarchy and authoritarianism. Capitalist companies are based upon denying workers self-government (i.e. freedom) during work hours. The boss tells workers what to do, when to do, how to do and for how long. This denial of freedom is discussed in greater depth in sections B.1 and B.4.

Because of the relations of power it creates, opposition to capitalist private property (and so wage labour) and the desire to see it ended is an essential aspect of anarchist theory. Due to its ideological blind spot with regards to apparently “voluntary” relations of domination and oppression created by the force of circumstances (see section 2 for details), “anarcho”-capitalism considers wage labour as a form of freedom and ignore its fascistic aspects (when not celebrating those aspects). Thus “anarcho”-capitalism is not anarchist. By concentrating on the moment the contract is signed, they ignore that freedom is restricted during the contract itself. While denouncing (correctly) the totalitarianism of the army, they ignore it in the workplace. But factory fascism is just as freedom destroying as the army or political fascism.

Due to this basic lack of concern for freedom, “anarcho”-capitalists cannot be considered as anarchists. Their total lack of concern about factory fascism (i.e. wage labour) places them totally outside the anarchist tradition. Real anarchists have always been aware of that private property and wage labour restriction freedom and desired to create a society in which people would be able to avoid it. In other words, where **all** relations are non-hierarchical and truly co-operative.

To conclude, to claim that private property eliminates hierarchy is false. Nor

does capitalism co-ordinate economic activities without hierarchical structures. For this reason anarchists support co-operative forms of production rather than capitalistic forms.

5 Will privatising “the commons” increase liberty?

“Anarcho”-capitalists aim for a situation in which “*no land areas, no square footage in the world shall remain ‘public,’*” in other words **everything** will be “*privatised.*” [Murray Rothbard, **Nations by Consent**, p. 84] They claim that privatising “the commons” (e.g. roads, parks, etc.) which are now freely available to all will increase liberty. Is this true? We have shown before why the claim that privatisation can protect the environment is highly implausible (see section E.2). Here we will concern ourselves with private ownership of commonly used “property” which we all take for granted and pay for with taxes.

Its clear from even a brief consideration of a hypothetical society based on “privatised” roads (as suggested by Murray Rothbard in **For a New Liberty**, pp. 202–203 and David Friedman in **The Machinery of Freedom**, pp. 98–101) that the only increase of liberty will be for the ruling elite. As “anarcho”-capitalism is based on paying for what one uses, privatisation of roads would require some method of tracking individuals to ensure that they pay for the roads they use. In the UK, for example, during the 1980s the British Tory government looked into the idea of toll-based motorways. Obviously having toll-booths on motorways would hinder their use and restrict “freedom,” and so they came up with the idea of tracking cars by satellite. Every vehicle would have a tracking device installed in it and a satellite would record where people went and which roads they used. They would then be sent a bill or have their bank balances debited based on this information (in the fascist city-state/company town of Singapore such a scheme **has** been introduced).

If we extrapolate from this example to a system of **fully** privatised “commons,” it would clearly require all individuals to have tracking devices on them so they could be properly billed for use of roads, pavements, etc. Obviously being tracked by private firms would be a serious threat to individual liberty. Another, less costly, option would be for private guards to randomly stop and question car-owners and individuals to make sure they had paid for the use of the road or pavement in question. “Parasites” would be arrested and fined or locked up. Again, however, being stopped and questioned by uniformed individuals has more in common with police states than liberty. Toll-boothing **every** street would be highly unfeasible due to the costs involved and difficulties for use that it implies. Thus the idea of privatising roads and charging drivers to gain access seems impractical at best and distinctly freedom endangering if implemented at worse.

Of course, the option of owners letting users have free access to the roads and pavements they construct and run would be difficult for a profit-based company. No one could make a profit in that case. If companies paid to construct roads for their customers/employees to use, they would be financially hindered in competition with other companies that did not, and thus would be unlikely to do so. If they restricted use purely to their own customers, the tracking problem

appears again.

Some may object that this picture of extensive surveillance of individuals would not occur or be impossible. However, Murray Rothbard (in a slightly different context) argued that technology would be available to collate information about individuals. He argued that “[i]t should be pointed out that modern technology makes even more feasible the collection and dissemination of information about people’s credit ratings and records of keeping or violating their contracts or arbitration agreements. Presumably, an anarchist [sic!] society would see the expansion of this sort of dissemination of data.” [“Society Without A State”, in **Nomos XIX**, Pennock and Chapman (eds.), p. 199] So, perhaps, with the total privatisation of society we would also see the rise of private Big Brothers, collecting information about individuals for use by property owners. The example of the **Economic League** (a British company who provided the “service” of tracking the political affiliations and activities of workers for employers) springs to mind.

And, of course, these privatisation suggestions ignore differences in income and market power. If, for example, variable pricing is used to discourage road use at times of peak demand (to eliminate traffic jams at rush-hour) as is suggested both by Murray Rothbard and David Friedman, then the rich will have far more “freedom” to travel than the rest of the population. And we may even see people having to go into debt just to get to work or move to look for work.

Which raises another problem with notion of total privatisation, the problem that it implies the end of freedom of travel. Unless you get permission or (and this seems more likely) pay for access, you will not be able to travel **anywhere**. As Rothbard **himself** makes clear, “anarcho”-capitalism means the end of the right to roam or even travel. He states that “it became clear to me that a totally privatised country would not have open borders at all. If every piece of land in a country were owned . . . no immigrant could enter there unless invited to enter and allowed to rent, or purchase, property.” [**Nations by Consent**, p. 84] What happens to those who cannot **afford** to pay for access is not addressed (perhaps, being unable to exit a given capitalist’s land they will become bonded labourers? Or be imprisoned and used to undercut workers’ wages via prison labour? Perhaps they will just be shot as trespassers? Who can tell?). Nor is it addressed how this situation actually **increases** freedom. For Rothbard, a “totally privatised country would be as closed as the particular inhabitants and property owners [**not** the same thing, we must point out] desire. It seems clear, then, that the regime of open borders that exists **de facto** in the US really amounts to a compulsory opening by the central state. . . and does not genuinely reflect the wishes of the proprietors.” [**Op. Cit.**, p. 85] Of course, the wishes of **non**-proprietors (the vast majority) do not matter in the slightest. Thus, it is clear, that with the privatisation of “the commons” the right to roam, to travel, would become a privilege, subject to the laws and rules of the property owners. This can hardly be said to **increase** freedom for anyone bar the capitalist class.

Rothbard acknowledges that “in a fully privatised world, access rights would obviously be a crucial part of land ownership.” [**Nations by Consent**, p. 86] Given that there is no free lunch, we can imagine we would have to pay for such “rights.” The implications of this are obviously unappealing and an obvious danger to individual freedom. The problem of access associated with the idea of privatising the roads can only be avoided by having a “right of passage” encoded into the “general libertarian law code.” This would mean that road owners would

be required, by law, to let anyone use them. But where are “absolute” property rights in this case? Are the owners of roads not to have the same rights as other owners? And if “right of passage” is enforced, what would this mean for road owners when people sue them for car-pollution related illnesses? (The right of those injured by pollution to sue polluters is the main way “anarcho”-capitalists propose to protect the environment. See sections E.2 and E.3). It is unlikely that those wishing to bring suit could find, never mind sue, the millions of individual car owners who could have potentially caused their illness. Hence the road-owners would be sued for letting polluting (or unsafe) cars onto “their” roads. The road-owners would therefore desire to restrict pollution levels by restricting the right to use their property, and so would resist the “right of passage” as an “attack” on their “absolute” property rights. If the road-owners got their way (which would be highly likely given the need for “absolute” property rights and is suggested by the variable pricing way to avoid traffic jams mentioned above) and were able to control who used their property, freedom to travel would be **very** restricted and limited to those whom the owner considered “desirable.” Indeed, Murray Rothbard supports such a regime (*“In the free [sic!] society, they [travellers] would, in the first instance, have the right to travel only on those streets whose owners agree to have them there”* [**The Ethics of Liberty**, p. 119]). The threat to liberty in such a system is obvious — to all but Rothbard and other right-libertarians, of course.

To take another example, let us consider the privatisation of parks, streets and other public areas. Currently, individuals can use these areas to hold political demonstrations, hand out leaflets, picket and so on. However, under “anarcho”-capitalism the owners of such property can restrict such liberties if they desire, calling such activities “initiation of force” (although they cannot explain how speaking your mind is an example of “force”). Therefore, freedom of speech, assembly and a host of other liberties we take for granted would be reduced (if not eliminated) under a right-“libertarian” regime. Or, taking the case of pickets and other forms of social struggle, it’s clear that privatising “the commons” would only benefit the bosses. Strikers or other activists picketing or handing out leaflets in shopping centres are quickly ejected by private security even today. Think about how much worse it would become under “anarcho”-capitalism when the whole world becomes a series of malls — it would be impossible to hold a picket when the owner of the pavement objects, for example (as Rothbard himself argues, **Op. Cit.**, p. 132) and if the owner of the pavement also happens to be the boss being picketed, then workers’ rights would be zero. Perhaps we could also see capitalists suing working class organisations for littering their property if they do hand out leaflets (so placing even greater stress on limited resources).

The I.W.W. went down in history for its rigorous defence of freedom of speech because of its rightly famous “free speech” fights in numerous American cities and towns. Repression was inflicted upon wobblies who joined the struggle by “private citizens,” but in the end the I.W.W. won. Consider the case under “anarcho”-capitalism. The wobblies would have been “criminal aggressors” as the owners of the streets have refused to allow “undesirables” to use them to argue their case. If they refused to acknowledge the decree of the property owners, private cops would have taken them away. Given that those who controlled city government in the historical example were the wealthiest citizens in town, it’s likely that the same people would have been involved in

the fictional (“anarcho”-capitalist) account. Is it a good thing that in the real account the wobblers are hailed as heroes of freedom but in the fictional one they are “criminal aggressors”? Does converting public spaces into private property **really** stop restrictions on free speech being a bad thing?

Of course, Rothbard (and other right-libertarians) are aware that privatisation will not remove restrictions on freedom of speech, association and so on (while, at the same time, trying to portray themselves as supporters of such liberties!). However, for right-libertarians such restrictions are of no consequence. As Rothbard argues, any “*prohibitions would not be state imposed, but would simply be requirements for residence or for use of some person’s or community’s land area.*” [**Nations by Consent**, p. 85] Thus we yet again see the blindness of right-libertarians to the commonality between private property and the state. The state also maintains that submitting to its authority is the requirement for taking up residence in its territory (see also section 2.3 for more on this). As Benjamin Tucker noted, the state can be defined as (in part) “*the assumption of sole authority over a given area and all within it.*” [**The Individualist Anarchists**, p. 24] If the property owners can determine “prohibitions” (i.e. laws and rules) for those who use the property then they are the “*sole authority over a given area and all within it,*” i.e. a state. Thus privatising “the commons” means subjecting the non-property owners to the rules and laws of the property owners — in effect, privatising the state and turning the world into a series of Monarchies and oligarchies without the pretence of democracy and democratic rights.

These examples can hardly be said to be increasing liberty for society as a whole, although “anarcho” capitalists seem to think they would. So far from **increasing** liberty for all, then, privatising the commons would only increase it for the ruling elite, by giving them yet another monopoly from which to collect income and exercise their power over. It would **reduce** freedom for everyone else. As Peter Marshall notes, “*[i]n the name of freedom, the anarcho-capitalists would like to turn public spaces into private property, but freedom does not flourish behind high fences protected by private companies but expands in the open air when it is enjoyed by all*” [**Demanding the Impossible**, p. 564].

Little wonder Proudhon argued that “*if the public highway is nothing but an accessory of private property; if the communal lands are converted into private property; if the public domain, in short, is guarded, exploited, leased, and sold like private property — what remains for the proletaire? Of what advantage is it to him that society has left the state of war to enter the regime of police?*” [**System of Economic Contradictions**, p. 371]

6 Is “anarcho”-capitalism against the state?

No. Due to its basis in private property, “anarcho”-capitalism implies a class division of society into bosses and workers. Any such division will require a state to maintain it. However, it need not be the same state as exists now. Regarding this point, “anarcho”-capitalism plainly advocates “defence associations” to protect property. For the “anarcho”-capitalist, however, these private companies are not states. For anarchists, they most definitely are.

According to Murray Rothbard [“*Society Without A State*”, in **Nomos XIX**,

Pennock and Chapman, eds., p. 192.], a state must have one or both of the following characteristics:

1. The ability to tax those who live within it.
2. It asserts and usually obtains a coerced monopoly of the provision of defence over a given area.

He makes the same point in **The Ethics of Liberty** [p. 171].

Instead of this, the “anarcho”-capitalist thinks that people should be able to select their own “defence companies” (which would provide the needed police) and courts from the free market in “defence” which would spring up after the state monopoly has been eliminated. These companies “*all... would have to abide by the basic law code*” [“*Society Without A State*”, p. 206]. Thus a “*general libertarian law code*” would govern the actions of these companies. This “law code” would prohibit coercive aggression at the very least, although to do so it would have to specify what counted as legitimate property, how said can be owned and what actually constitutes aggression. Thus the law code would be quite extensive.

How is this law code to be actually specified? Would these laws be democratically decided? Would they reflect common usage (i.e. custom)? “supply and demand”? “Natural law”? Given the strong dislike of democracy shown by “anarcho”-capitalists, we think we can safely say that some combination of the last two options would be used. Murray Rothbard, as noted in section 1.4, opposed the individualist anarchist principle that juries would judge both the facts and the law, suggesting instead that “*Libertarian lawyers and jurists*” would determine a “*rational and objective code of libertarian legal principles and procedures.*” The judges in his system would “*not [be] making the law but finding it on the basis of agreed-upon principles derived either from custom or reason.*” [“*Society without a State*”, **Op. Cit.**, p. 206] David Friedman, on the other hand, argues that different defence firms would sell their own laws. [The Machinery of Freedom, p. 116] It is sometimes acknowledged that non-libertarian laws may be demanded (and supplied) in such a market.

Around this system of “defence companies” is a free market in “arbitrators” and “appeal judges” to administer justice and the “basic law code.” Rothbard believes that such a system would see “*arbitrators with the best reputation for efficiency and probity... [being] chosen by the various parties in the market... [and] will come to be given an increasing amount of business.*” [Rothbard, **Op. Cit.**, p.199] Judges “*will prosper on the market in proportion to their reputation for efficiency and impartiality.*” [Op. Cit., p. 204]

Therefore, like any other company, arbitrators would strive for profits and wealth, with the most successful ones becoming “*prosperous.*” Of course, such wealth would have no impact on the decisions of the judges, and if it did, the population (in theory) are free to select any other judge (although, of course, they would also “*strive for profits and wealth*” — which means the choice of character may be somewhat limited! — and the laws which they were using to guide their judgements would be enforcing capitalist rights).

Whether or not this system would work as desired is discussed in the following sections. We think that it will not. Moreover, we will argue that “anarcho”-capitalist “defence companies” meet not only the criteria of statehood we out-

lined in section B.2, but also Rothbard's own criteria for the state, quoted above.

As regards the anarchist criterion, it is clear that “defence companies” exist to defend private property; that they are hierarchical (in that they are capitalist companies which defend the power of those who employ them); that they are professional coercive bodies; and that they exercise a monopoly of force over a given area (the area, initially, being the property of the person or company who is employing the “association”). If, as Ayn Rand noted (using a Weberian definition of the state) a government is an institution “*that holds the exclusive power to enforce certain rules of conduct in a given geographical area*” [**Capitalism: The Unknown Ideal**, p. 239] then these “defence companies” are the means by which the property owner (who exercises a monopoly to determine the rules governing their property) enforce their rules.

For this (and other reasons), we should call the “anarcho”-capitalist defence firms “private states” — that is what they are — and “anarcho”-capitalism “private state” capitalism.

Before discussing these points further, it is necessary to point out a relatively common fallacy of “anarcho”-capitalists. This is the idea that “defence” under the system they advocate means defending people, not territorial areas. This, for some, means that defence companies are not “states.” However, as people and their property and possessions do not exist merely in thought but on the Earth, it is obvious that these companies will be administering “justice” over a given area of the planet. It is also obvious, therefore, that these “defence associations” will operate over a (property-owner defined) area of land and enforce the property-owner's laws, rules and regulations. The deeply anti-libertarian, indeed fascist, aspects of this “arrangement” will be examined in the following sections.

6.1 What's wrong with this “free market” justice?

It does not take much imagination to figure out whose interests “*prosperous*” arbitrators, judges and defence companies would defend: their own, as well as those who pay their wages — which is to say, other members of the rich elite. As the law exists to defend property, then it (by definition) exists to defend the power of capitalists against their workers.

Rothbard argues that the “*judges*” would “*not [be] making the law but finding it on the basis of agreed-upon principles derived either from custom or reason*” [Rothbard, **Op. Cit.**, p. 206]. However, this begs the question: **whose** reason? **whose** customs? Do individuals in different classes share the same customs? The same ideas of right and wrong? Would rich and poor desire the same from a “*basic law code*”? Obviously not. The rich would only support a code which defended their power over the poor.

Although only “*finding*” the law, the arbitrators and judges still exert an influence in the “justice” process, an influence not impartial or neutral. As the arbitrators themselves would be part of a profession, with specific companies developing within the market, it does not take a genius to realise that when “interpreting” the “basic law code,” such companies would hardly act against their own interests as companies. In addition, if the “justice” system was based on “one dollar, one vote,” the “law” would best defend those with the most “votes” (the question of market forces will be discussed in section 6.3). Moreover, even if

“market forces” would ensure that “impartial” judges were dominant, all judges would be enforcing a **very** partial law code (namely one that defended **capitalist** property rights). Impartiality when enforcing partial laws hardly makes judgements less unfair.

Thus, due to these three pressures — the interests of arbitrators/judges, the influence of money and the nature of the law — the terms of “free agreements” under such a law system would be tilted in favour of lenders over debtors, landlords over tenants, employers over employees, and in general, the rich over the poor, just as we have today. This is what one would expect in a system based on “unrestricted” property rights and a (capitalist) free market. A similar tendency towards the standardisation of output in an industry in response to influences of wealth can be seen from the current media system (see section D.3 — How does wealth influence the mass media?)

Some “anarcho”-capitalists, however, claim that just as cheaper cars were developed to meet demand, so cheaper defence associations and “people’s arbitrators” would develop on the market for the working class. In this way impartiality will be ensured. This argument overlooks a few key points:

Firstly, the general “libertarian” law code would be applicable to **all** associations, so they would have to operate within a system determined by the power of money and of capital. The law code would reflect, therefore, property **not** labour and so “socialistic” law codes would be classed as “outlaw” ones. The options then facing working people is to select a firm which best enforced the **capitalist** law in their favour. And as noted above, the impartial enforcement of a biased law code will hardly ensure freedom or justice for all.

Secondly, in a race between a Jaguar and a Volkswagen Beetle, who is more likely to win? The rich would have “the best justice money can buy,” as they do now. Members of the capitalist class would be able to select the firms with the best lawyers, best private cops and most resources. Those without the financial clout to purchase quality “justice” would simply be out of luck — such is the “magic” of the marketplace.

Thirdly, because of the tendency toward concentration, centralisation, and oligopoly under capitalism (due to increasing capital costs for new firms entering the market, as discussed in section C.4), a few companies would soon dominate the market — with obvious implications for “justice.”

Different firms will have different resources. In other words, in a conflict between a small firm and a larger one, the smaller one is at a disadvantage in terms of resources. They may not be in a position to fight the larger company if it rejects arbitration and so may give in simply because, as the “anarcho”-capitalists so rightly point out, conflict and violence will push up a company’s costs and so they would have to be avoided by smaller companies. It is ironic that the “anarcho”-capitalist implicitly assumes that every “defence company” is approximately of the same size, with the same resources behind it. In real life, this would clearly **not** the case.

Fourthly, it is **very** likely that many companies would make subscription to a specific “defence” firm or court a requirement of employment. Just as today many (most?) workers have to sign no-union contracts (and face being fired if they change their minds), it does not take much imagination to see that the same could apply to “defence” firms and courts. This was/is the case in company towns (indeed, you can consider unions as a form of “defence” firm and these companies refused to recognise them). As the labour market is almost always a

buyer's market, it is not enough to argue that workers can find a new job without this condition. They may not and so have to put up with this situation. And if (as seems likely) the laws and rules of the property-owner will take precedence in any conflict, then workers and tenants will be at a disadvantage no matter how "impartial" the judges.

Ironically, some "anarcho"-capitalists point to current day company/union negotiations as an example of how different defence firms would work out their differences peacefully. Sadly for this argument, union rights under "actually existing capitalism" were created and enforced by the state in direct opposition to capitalist "freedom of contract." Before the law was changed, unions were often crushed by force — the companies were better armed, had more resources and had the law on their side. Today, with the "downsizing" of companies we can see what happens to "peaceful negotiation" and "co-operation" between unions and companies when it is no longer required (i.e. when the resources of both sides are unequal). The market power of companies far exceeds those of the unions and the law, by definition, favours the companies. As an example of how competing "protection agencies" will work in an "anarcho"-capitalist society, it is far more insightful than originally intended!

Now let us consider the "*basic law code*" itself. How the laws in the "*general libertarian law code*" would actually be selected is anyone's guess, although many "anarcho"-capitalists support the myth of "natural law," and this would suggest an unchangeable law code selected by those considered as "the voice of nature" (see section 11. for a discussion of its authoritarian implications). David Friedman argues that as well as a market in defence companies, there will also be a market in laws and rights. However, there will be extensive market pressure to unify these differing law codes into one standard one (imagine what would happen if ever CD manufacturer created a unique CD player, or every computer manufacturer different sized floppy-disk drivers — little wonder, then, that over time companies standardise their products). Friedman himself acknowledges that this process is likely (and uses the example of standard paper sizes to indicate such a process).

In any event, the laws would not be decided on the basis of "one person, one vote"; hence, as market forces worked their magic, the "general" law code would reflect vested interests and so be very hard to change. As rights and laws would be a commodity like everything else in capitalism, they would soon reflect the interests of the rich — particularly if those interpreting the law are wealthy professionals and companies with vested interests of their own. Little wonder that the individualist anarchists proposed "trial by jury" as the only basis for real justice in a free society. For, unlike professional "arbitrators," juries are ad hoc, made up of ordinary people and do not reflect power, authority, or the influence of wealth. And by being able to judge the law as well as a conflict, they can ensure a populist revision of laws as society progresses.

Thus a system of "defence" on the market will continue to reflect the influence and power of property owners and wealth and not be subject to popular control beyond choosing between companies to enforce the capitalist laws.

6.2 What are the social consequences of such a system?

The "anarcho" capitalist imagines that there will be police agencies, "defence associations," courts, and appeals courts all organised on a free-market basis

and available for hire. As David Weick points out, however, the major problem with such a system would not be the corruption of “private” courts and police forces (although, as suggested above, this could indeed be a problem):

“There is something more serious than the ‘Mafia danger’, and this other problem concerns the role of such ‘defence’ institutions in a given social and economic context.

*“[The] context. . . is one of a free-market economy with no restraints upon accumulation of property. Now, we had an American experience, roughly from the end of the Civil War to the 1930’s, in what were in effect private courts, private police, indeed private governments. We had the experience of the (private) Pinkerton police which, by its spies, by its **agents provocateurs**, and by methods that included violence and kidnapping, was one of the most powerful tools of large corporations and an instrument of oppression of working people. We had the experience as well of the police forces established to the same end, within corporations, by numerous companies. . . (The automobile companies drew upon additional covert instruments of a private nature, usually termed vigilante, such as the Black Legion). These were, in effect, private armies, and were sometimes described as such. The territories owned by coal companies, which frequently included entire towns and their environs, the stores the miners were obliged by economic coercion to patronise, the houses they lived in, were commonly policed by the private police of the United States Steel Corporation or whatever company owned the properties. The chief practical function of these police was, of course, to prevent labour organisation and preserve a certain balance of ‘bargaining.’*

“These complexes were a law unto themselves, powerful enough to ignore, when they did not purchase, the governments of various jurisdictions of the American federal system. This industrial system was, at the time, often characterised as feudalism. . . ” [“Anarchist Justice”, **Op. Cit.**, pp. 223–224]

For a description of the weaponry and activities of these private armies, the economic historian Maurice Dobbs presents an excellent summary in **Studies in Capitalist Development** [pp. 353–357]. According to a report on “*Private Police Systems*” cited by Dobbs, in a town dominated by Republican Steel, the “*civil liberties and the rights of labour were suppressed by company police. Union organisers were driven out of town.*” Company towns had their own (company-run) money, stores, houses and jails and many corporations had machine-guns and tear-gas along with the usual shot-guns, rifles and revolvers. The “*usurpation of police powers by privately paid ‘guards and ‘deputies’, often hired from detective agencies, many with criminal records*” was “*a general practice in many parts of the country.*”

The local (state-run) law enforcement agencies turned a blind-eye to what was going on (after all, the workers **had** broken their contracts and so were “criminal aggressors” against the companies) even when union members and strikers were beaten and killed. The workers own defence organisations were the only ones willing to help them, and if the workers seemed to be winning

then troops were called in to “restore the peace” (as happened in the Ludlow strike, when strikers originally cheered the troops as they thought they would defend their civil rights; needless to say, they were wrong).

Here we have a society which is claimed by many “anarcho”-capitalists as one of the closest examples to their “ideal,” with limited state intervention, free reign for property owners, etc. What happened? The rich reduced the working class to a serf-like existence, capitalist production undermined independent producers (much to the annoyance of individualist anarchists at the time), and the result was the emergence of the corporate America that “anarcho”-capitalists say they oppose.

Are we to expect that “anarcho”-capitalism will be different? That, unlike before, “defence” firms will intervene on behalf of strikers? Given that the “general libertarian law code” will be enforcing capitalist property rights, workers will be in exactly the same situation as they were then. Support of strikers violating property rights would be a violation of the “general libertarian law code” and be costly for profit making firms to do (if not dangerous as they could be “outlawed” by the rest). Thus “anarcho”-capitalism will extend extensive rights and powers to bosses, but few if any rights to rebellious workers. And this difference in power is enshrined within the fundamental institutions of the system.

In evaluating “anarcho”-capitalism’s claim to be a form of anarchism, Peter Marshall notes that *“private protection agencies would merely serve the interests of their paymasters.”* [**Demanding the Impossible**, p. 653] With the increase of private “defence associations” under “really existing capitalism” today (associations that many “anarcho”-capitalists point to as examples of their ideas), we see a vindication of Marshall’s claim. There have been many documented experiences of protesters being badly beaten by private security guards. As far as market theory goes, the companies are only supplying what the buyer is demanding. The rights of others are **not a factor** (yet more “externalities,” obviously). Even if the victims successfully sue the company, the message is clear — social activism can seriously damage your health. With a reversion to “a general libertarian law code” enforced by private companies, this form of “defence” of “absolute” property rights can only increase, perhaps to the levels previously attained in the heyday of US capitalism, as described above by Weick.

6.3 But surely market forces will stop abuses by the rich?

Unlikely. The rise of corporations within America indicates exactly how a “general libertarian law code” would reflect the interests of the rich and powerful. The laws recognising corporations as “legal persons” were **not** primarily a product of “the state” but of private lawyers hired by the rich — a result with which Rothbard would have no problem. As Howard Zinn notes:

“the American Bar Association, organised by lawyers accustomed to serving the wealthy, began a national campaign of education to reverse the [Supreme] Court decision [that companies could not be considered as a person]. . . By 1886. . . the Supreme Court had accepted the argument that corporations were ‘persons’ and their money was property protected by the process clause of the Fourteenth Amend-

ment. . . The justices of the Supreme Court were not simply interpreters of the Constitution. They were men of certain backgrounds, of certain [class] interests.” [A People’s History of the United States, p. 255]

Of course it will be argued that the Supreme Court is a monopoly and so our analysis is flawed. In “anarcho”-capitalism there is no monopoly. But the corporate laws came about because there was a demand for them. That demand would still have existed in “anarcho”-capitalism. Now, while there may be no Supreme Court, Rothbard does maintain that “*the basic Law Code . . . would have to be agreed upon by all the judicial agencies*” but he maintains that this “*would imply no unified legal system*”! Even though “[*a*]ny agencies that transgressed the basic libertarian law code would be open outlaws” and soon crushed this is **not**, apparently, a monopoly. [**The Ethics of Liberty**, p. 234] So, you either agree to the law code or you go out of business. And that is **not** a monopoly! Therefore, we think, our comments on the Supreme Court decision are valid.

If all the available defence firms enforce the same laws, then it can hardly be called “competitive”! And if this is the case (and it is) “*when private wealth is uncontrolled, then a police-judicial complex enjoying a clientele of wealthy corporations whose motto is self-interest is hardly an innocuous social force controllable by the possibility of forming or affiliating with competing ‘companies.’*” [Weick, **Op. Cit.**, p. 225]

This is particularly true if these companies are themselves Big Business and so have a large impact on the laws they are enforcing. If the law code recognises and protects capitalist power, property and wealth as fundamental **any** attempt to change this is “initiation of force” and so the power of the rich is written into the system from the start!

(And, we must add, if there is a general libertarian law code to which all must subscribe, where does that put customer demand? If people demand a non-libertarian law code, will defence firms refuse to supply it? If so, will not new firms, looking for profit, spring up that will supply what is being demanded? And will that not put them in direct conflict with the existing, pro-general law code ones? And will a market in law codes not just reflect economic power and wealth? David Friedman, who is for a market in law codes, argues that “[*i*]f almost everyone believes strongly that heroin addiction is so horrible that it should not be permitted anywhere under any circumstances anarcho-capitalist institutions will produce laws against heroin. Laws are being produced on the market, and that is what the market wants.” And he adds that “*market demands are in dollars, not votes. The legality of heroin will be determined, not by how many are for or against but how high a cost each side is willing to bear in order to get its way.*” [**The Machinery of Freedom**, p. 127] And, as the market is less than equal in terms of income and wealth, such a position will mean that the capitalist class will have a higher effective demand than the working class, and more resources to pay for any conflicts that arise. Thus any law codes that develop will tend to reflect the interests of the wealthy.)

Which brings us nicely on to the next problem regarding market forces.

As well as the obvious influence of economic interests and differences in wealth, another problem faces the “free market” justice of “anarcho”-capitalism. This is the “*general libertarian law code*” itself. Even if we assume that the

system actually works like it should in theory, the simple fact remains that these “defence companies” are enforcing laws which explicitly defend capitalist property (and so social relations). Capitalists own the means of production upon which they hire wage-labourers to work and this is an inequality established **prior** to any specific transaction in the labour market. This inequality reflects itself in terms of differences in power within (and outside) the company and in the “law code” of “anarcho”-capitalism which protects that power against the dispossessed.

In other words, the law code within which the defence companies work assumes that capitalist property is legitimate and that force can legitimately be used to defend it. This means that, in effect, “anarcho”-capitalism is based on a monopoly of law, a monopoly which explicitly exists to defend the power and capital of the wealthy. The major difference is that the agencies used to protect that wealth will be in a weaker position to act independently of their pay-masters. Unlike the state, the “defence” firm is not remotely accountable to the general population and cannot be used to equalise even slightly the power relationships between worker and capitalist.

And, needless to say, it is very likely that the private police forces **will** give preferential treatment to their wealthier customers (what business does not?) and that the law code will reflect the interests of the wealthier sectors of society (particularly if “*prosperous*” judges administer that code) in reality, even if not in theory. Since, in capitalist practice, “the customer is always right,” the best-paying customers will get their way in “anarcho”-capitalist society.

For example, in chapter 29 of **The Machinery of Freedom**, David Friedman presents an example of how a clash of different law codes could be resolved by a bargaining process (the law in question is the death penalty). This process would involve one defence firm giving a sum of money to the other for them accepting the appropriate (anti/pro capital punishment) court. Friedman claims that “[a]s in any good trade, everyone gains” but this is obviously not true. Assuming the anti-capital punishment defence firm pays the pro one to accept an anti-capital punishment court, then, yes, both defence firms have made money and so are happy, so are the anti-capital punishment consumers but the pro-death penalty customers have only (perhaps) received a cut in their bills. Their desire to see criminals hanged (for whatever reason) has been ignored (if they were not in favour of the death penalty, they would not have subscribed to that company). Friedman claims that the deal, by allowing the anti-death penalty firm to cut its costs, will ensure that it “*keep its customers and even get more*” but this is just an assumption. It is just as likely to lose customers to a defence firm that refuses to compromise (and has the resources to back it up). Friedman’s assumption that lower costs will automatically win over people’s passions is unfounded. As is the assumption that both firms have equal resources and bargaining power. If the pro-capital punishment firm demands more than the anti can provide and has larger weaponry and troops, then the anti defence firm may have to agree to let the pro one have its way.

So, all in all, it is **not** clear that “*everyone gains*” — there may be a sizeable percentage of those involved who do not “gain” as their desire for capital punishment is traded away by those who claimed they would enforce it.

In other words, a system of competing law codes and privatised rights does not ensure that **all** consumers interests are met. Given unequal resources within society, it is also clear that the “effective demand” of the parties involved

to see their law codes enforced is drastically different. The wealthy head of a transnational corporation will have far more resources available to him to pay for **his** laws to be enforced than one of his employees on the assembly line. Moreover, as we argue in sections 3.1 and 10.2, the labour market is usually skewed in favour of capitalists. This means that workers have to compromise to get work and such compromises may involve agreeing to join a specific “defence” firm or not join one at all (just as workers are often forced to sign non-union contracts today in order to get work). In other words, a privatised law system is very likely to skew the enforcement of laws in line with the skewing of income and wealth in society. At the very least, unlike every other market, the customer is **not** guaranteed to get exactly what they demand simply because the product they “consume” is dependent on other within the same market to ensure its supply. The unique workings of the law/defence market are such as to deny customer choice (we will discuss other aspects of this unique market shortly).

Weick sums up by saying “*any judicial system is going to exist in the context of economic institutions. If there are gross inequalities of power in the economic and social domains, one has to imagine society as strangely compartmentalised in order to believe that those inequalities will fail to reflect themselves in the judicial and legal domain, and that the economically powerful will be unable to manipulate the legal and judicial system to their advantage. To abstract from such influences of context, and then consider the merits of an abstract judicial system. . . is to follow a method that is not likely to take us far. This, by the way, is a criticism that applies. . . to any theory that relies on a rule of law to override the tendencies inherent in a given social and economic system*” [Weick, **Op. Cit.**, p. 225] (For a discussion of this problem as it would surface in attempts to protect the environment under “anarcho”-capitalism, see sections E.2 and E.3).

There is another reason why “market forces” will not stop abuse by the rich, or indeed stop the system from turning from private to public statism. This is due to the nature of the “defence” market (for a similar analysis of the “defence” market see Tyler Cowen’s “*Law as a Public Good: The Economics of Anarchy*” in **Economics and Philosophy**, no. 8 (1992), pp. 249–267 and “*Rejoinder to David Friedman on the Economics of Anarchy*” in **Economics and Philosophy**, no. 10 (1994), pp. 329–332). In “anarcho”-capitalist theory it is assumed that the competing “defence companies” have a vested interest in peacefully settling differences between themselves by means of arbitration. In order to be competitive on the market, companies will have to co-operate via contractual relations otherwise the higher price associated with conflict will make the company uncompetitive and it will go under. Those companies that ignore decisions made in arbitration would be outlawed by others, ostracised and their rulings ignored. By this process, it is argued, a system of competing “defence” companies will be stable and not turn into a civil war between agencies with each enforcing the interests of their clients against others by force.

However, there is a catch. Unlike every other market, the businesses in competition in the “defence” industry **must** co-operate with its fellows in order to provide its services for its customers. They need to be able to agree to courts and judges, agree to abide by decisions and law codes and so forth. In economics there are other, more accurate, terms to describe co-operative activity between companies: collusion and cartels. Collusion and cartels is where companies in a specific market agree to work together to restrict competition and reap the

benefits of monopoly power by working to achieve the same ends in partnership with each other. In other words this means that collusion is built into the system, with the necessary contractual relations between agencies in the “protection” market requiring that firms co-operate and, by so doing, to behave (effectively) as one large firm (and so, effectively, resemble the state even more than they already do). Quoting Adam Smith seems appropriate here: *“People of the same trade seldom meet together, even for merriment and diversion, but the conversation ends in a conspiracy against the public, or in some contrivance to raise prices.”* [**The Wealth of Nations**, p. 117]

For example, when buying food it does not matter whether the supermarkets I visit have good relations with each other. The goods I buy are independent of the relationships that exist between competing companies. However, in the case of private states, this is **not** the case. If a specific “defence” company has bad relationships with other companies in the market then it is against my self-interest to subscribe to it. Why join a private state if its judgements are ignored by the others and it has to resort to violence to be heard? This, as well as being potentially dangerous, will also push up the prices I have to pay. Arbitration is one of the most important services a defence firm can offer its customers and its market share is based upon being able to settle interagency disputes without risk of war or uncertainty that the final outcome will not be accepted by all parties.

Therefore, the market set-up within the “anarcho”-capitalist “defence” market is such that private states **have to co-operate** with the others (or go out of business fast) and this means collusion can take place. In other words, a system of private states will have to agree to work together in order to provide the service of “law enforcement” to their customers and the result of such co-operation is to create a cartel. However, unlike cartels in other industries, the “defence” cartel will be a stable body simply because its members **have** to work with their competitors in order to survive.

Let us look at what would happen after such a cartel is formed in a specific area and a new “defence company” desired to enter the market. This new company will have to work with the members of the cartel in order to provide its services to its customers (note that “anarcho”-capitalists already assume that they *“will have to”* subscribe to the same law code). If the new defence firm tries to under-cut the cartel’s monopoly prices, the other companies would refuse to work with it. Having to face constant conflict or the possibility of conflict, seeing its decisions being ignored by other agencies and being uncertain what the results of a dispute would be, few would patronise the new “defence company.” The new company’s prices would go up and so face either folding or joining the cartel. Unlike every other market, if a “defence company” does not have friendly, co-operative relations with other firms in the same industry then it will go out of business.

This means that the firms that are co-operating have but to agree not to deal with new firms which are attempting to undermine the cartel in order for them to fail. A “cartel busting” firm goes out of business in the same way an outlaw one does — the higher costs associated with having to solve all its conflicts by force, not arbitration, increases its production costs much higher than the competitors and the firm faces insurmountable difficulties selling its products at a profit (ignoring any drop of demand due to fears of conflict by actual and potential customers). Even if we assume that many people will happily join

the new firm in spite of the dangers to protect themselves against the cartel and its taxation (i.e. monopoly profits), enough will remain members of the cartel (perhaps they will be fired if they change, perhaps they dislike change and think the extra money is worth peace, perhaps they fear that by joining the new company their peace will be disrupted or the outcomes of their problems with others too unsure to be worth it, perhaps they are shareholders and want to maintain their income) so that co-operation will still be needed and conflict unprofitable and dangerous (and as the cartel will have more resources than the new firm, it could usually hold out longer than the new firm could). In effect, breaking the cartel may take the form of an armed revolution — as it would with any state.

The forces that break up cartels and monopolies in other industries (such as free entry — although, of course the “defence” market will be subject to oligopolistic tendencies as any other and this will create barriers to entry, see section C.4) do not work here and so new firms have to co-operate or lose market share and/or profits. This means that “defence companies” will reap monopoly profits and, more importantly, have a monopoly of force over a given area.

Hence a monopoly of private states will develop in addition to the existing monopoly of law and this is a de facto monopoly of force over a given area (i.e. some kind of public state run by share holders). New companies attempting to enter the “defence” industry will have to work with the existing cartel in order to provide the services it offers to its customers. The cartel is in a dominant position and new entries into the market either become part of it or fail. This is exactly the position with the state, with “private agencies” free to operate as long as they work to the state’s guidelines. As with the monopolist “general libertarian law code”, if you do not toe the line, you go out of business fast.

It is also likely that a multitude of cartels would develop, with a given cartel operating in a given locality. This is because law enforcement would be localised in given areas as most crime occurs where the criminal lives. Few criminals would live in New York and commit crimes in Portland. However, as defence companies have to co-operate to provide their services, so would the cartels. Few people live all their lives in one area and so firms from different cartels would come into contact, so forming a cartel of cartels.

A cartel of cartels may (perhaps) be less powerful than a local cartel, but it would still be required and for exactly the same reasons a local one is. Therefore “anarcho”-capitalism would, like “actually existing capitalism,” be marked by a series of public states covering given areas, co-ordinated by larger states at higher levels. Such a set up would parallel the United States in many ways except it would be run directly by wealthy shareholders without the sham of “democratic” elections. Moreover, as in the USA and other states there will still be a monopoly of rules and laws (the “general libertarian law code”).

Some “anarcho”-capitalists claim that this will not occur, but that the co-operation needed to provide the service of law enforcement will somehow **not** turn into collusion between companies. However, they are quick to argue that renegade “agencies” (for example, the so-called “Mafia problem” or those who reject judgements) will go out of business because of the higher costs associated with conflict and not arbitration. However, these higher costs are ensured because the firms in question do not co-operate with others. If other agencies boycott a firm but co-operate with all the others, then the boycotted firm will

be at the same disadvantage — regardless of whether it is a cartel buster or a renegade.

The “anarcho”-capitalist is trying to have it both ways. If the punishment of non-conforming firms cannot occur, then “anarcho”-capitalism will turn into a war of all against all or, at the very least, the service of social peace and law enforcement cannot be provided. If firms cannot deter others from disrupting the social peace (one service the firm provides) then “anarcho”-capitalism is not stable and will not remain orderly as agencies develop which favour the interests of their own customers and enforce their own law codes at the expense of others. If collusion cannot occur (or is too costly) then neither can the punishment of non-conforming firms and “anarcho”-capitalism will prove to be unstable.

So, to sum up, the “defence” market of private states has powerful forces within it to turn it into a monopoly of force over a given area. From a privately chosen monopoly of force over a specific (privately owned) area, the market of private states will turn into a monopoly of force over a general area. This is due to the need for peaceful relations between companies, relations which are required for a firm to secure market share. The unique market forces that exist within this market ensure collusion and monopoly.

In other words, the system of private states will become a cartel and so a public state — unaccountable to all but its shareholders, a state of the wealthy, by the wealthy, for the wealthy. In other words, fascism.

6.4 Why are these “defence associations” states?

It is clear that “anarcho”-capitalist defence associations meet the criteria of statehood outlined in section B.2 (“Why are anarchists against the state”). They defend property and preserve authority relationships, they practice coercion, and are hierarchical institutions which govern those under them on behalf of a “ruling elite,” i.e. those who employ both the governing forces and those they govern. Thus, from an anarchist perspective, these “defence associations” as most definitely states.

What is interesting, however, is that by their own definitions a very good case can be made that these “defence associations” as states in the “anarcho”-capitalist sense too. Capitalist apologists usually define a “government” (or state) as those who have a monopoly of force and coercion within a given area. Relative to the rest of the society, these defence associations would have a monopoly of force and coercion of a given piece of property; thus, by the “anarcho”-capitalists’ **own definition** of statehood, these associations would qualify!

If we look at Rothbard’s definition of statehood, which requires (a) the power to tax and/or (b) a *“coerced monopoly of the provision of defence over a given area”*, “anarcho”-capitalism runs into trouble.

In the first place, the costs of hiring defence associations will be deducted from the wealth created by those who use, but do not own, the property of capitalists and landlords. Let not forget that a capitalist will only employ a worker or rent out land and housing if they make a profit from so doing. Without the labour of the worker, there would be nothing to sell and no wages to pay for rent. Thus a company’s or landlord’s “defence” firm will be paid from the revenue gathered from the capitalists power to extract a tribute from those who use, but do not own, a property. In other words, workers would pay for the

agencies that enforce their employers' authority over them via the wage system and rent — taxation in a more insidious form.

In the second, under capitalism most people spend a large part of their day on other people's property — that is, they work for capitalists and/or live in rented accommodation. Hence if property owners select a "defence association" to protect their factories, farms, rental housing, etc., their employees and tenants will view it as a "*coerced monopoly of the provision of defence over a given area.*" For certainly the employees and tenants will not be able to hire their own defence companies to expropriate the capitalists and landlords. So, from the standpoint of the employees and tenants, the owners do have a monopoly of "defence" over the areas in question. Of course, the "anarcho"-capitalist will argue that the tenants and workers "consent" to **all** the rules and conditions of a contract when they sign it and so the property owner's monopoly is not "coerced." However, the "consent" argument is so weak in conditions of inequality as to be useless (see sections 2.4 and 3.1, for example) and, moreover, it can and has been used to justify the state. In other words, "consent" in and of itself does not ensure that a given regime is not statist (see section 2.3 for more on this). So an argument along these lines is deeply flawed and can be used to justify regimes which are little better than "industrial feudalism" (such as, as indicated in section B.4, company towns, for example — an institution which right-libertarianism has no problem with). Even the "*general libertarian law code,*" particularly if ordinary people have no real means of affecting the law code, either because it is market-driven and so is money-determined, or because it will be "natural" law and so unchangeable by mere mortals.

In other words, **if** the state "*arrogates to itself a monopoly of force, of ultimate decision-making power, over a given area territorial area*" [Rothbard, **The Ethics of Liberty**, p. 170] then it's pretty clear that the property owner shares this power. The owner is, after all, the "*ultimate decision-making power*" in their workplace or on their land. If the boss takes a dislike to you (for example, you do not follow their orders) then you get fired. If you cannot get a job or rent the land without agreeing to certain conditions (such as not joining a union or subscribing to the "defence firm" approved by your employer) then you either sign the contract or look for something else. Of course Rothbard fails to note that bosses have this monopoly of power and is instead referring to "*prohibiting the voluntary purchase and sale of defence and judicial services.*" [Op. Cit., p. 171] But just as surely as the law of contract allows the banning of unions from a property, it can just as surely ban the sale and purchase of defence and judicial services (it could be argued that market forces will stop this happening, but this is unlikely as bosses usually have the advantage on the labour market and workers have to compromise to get a job — see section 10.2 on why this is the case). After all, in the company towns, only company money was legal tender and company police the only law enforcers.

Therefore, it is obvious that the "anarcho"-capitalist system meets the Weberian criteria of a monopoly to enforce certain rules in a given area of land. The "*general libertarian law code*" is a monopoly and property owners determine the rules that apply to their property. Moreover, if the rules that property owners enforce are subject to rules contained in the monopolistic "*general libertarian law code*" (for example, that they cannot ban the sale and purchase of certain products — such as defence — on their own territory) then "anarcho"-

capitalism **definitely** meets the Weberian definition of the state (as described by Ayn Rand as an institution “*that holds the exclusive power to **enforce** certain rules of conduct in a given geographical area*” [**Capitalism: The Unknown Ideal**, p. 239]) as its “law code” overrides the desires of property owners to do what they like on their own property.

Therefore, no matter how you look at it, “anarcho”-capitalism and its “defence” market promotes a “*monopoly of ultimate decision making power*” over a “*given territorial area*”. It is obvious that for anarchists, the “anarcho”-capitalist system is a state system. As, as we note, a reasonable case can be made for it also being a state in “anarcho”-capitalist theory as well.

So, in effect, “anarcho”-capitalism has a **different** sort of state, one in which bosses hire and fire the policeman. As Peter Sabatini notes [in **Libertarianism: Bogus Anarchy**], “*[w]ithin Libertarianism, Rothbard represents a minority perspective that actually argues for the total elimination of the state. However Rothbard’s claim as an anarchist is quickly voided when it is shown that he only wants an end to the public state. In its place he allows countless private states, with each person supplying their own police force, army, and law, or else purchasing these services from capitalist vendors. . . Rothbard sees nothing at all wrong with the amassing of wealth, therefore those with more capital will inevitably have greater coercive force at their disposal, just as they do now.*”

Far from wanting to abolish the state, then, “anarcho”-capitalists only desire to privatise it — to make it solely accountable to capitalist wealth. Their “companies” perform the same services as the state, for the same people, in the same manner. However, there is one slight difference. Property owners would be able to select between competing companies for their “services.” Because such “companies” are employed by the boss, they would be used to reinforce the totalitarian nature of capitalist firms by ensuring that the police and the law they enforce are not even slightly accountable to ordinary people.

Looking beyond the “defence association” to the defence market itself (as we argued in the last section), this will become a cartel and so become some kind of public state. The very nature of the private state, its need to co-operate with others in the same industry, push it towards a monopoly network of firms and so a monopoly of force over a given area. Given the assumptions used to defend “anarcho”-capitalism, its system of private statism will develop into public statism — a state run by managers accountable only to the share-holding elite.

To quote Peter Marshall again, the “anarcho”-capitalists “*claim that all would benefit from a free exchange on the market, it is by no means certain; any unfettered market system would most likely sponsor a reversion to an unequal society with defence associations perpetuating exploitation and privilege.*” [**Demanding the Impossible**, p. 565] History, and current practice, prove this point.

In short, “anarcho”-capitalists are not anarchists at all, they are just capitalists who desire to see private states develop — states which are strictly accountable to their paymasters without even the sham of democracy we have today. Hence a far better name for “anarcho”-capitalism would be “private-state” capitalism. At least that way we get a fairer idea of what they are trying to sell us. As Bob Black writes in **The Libertarian as Conservative**, “*To my mind a right-wing anarchist is just a minarchist who’d abolish the state to his own satisfaction by calling it something else. . . They don’t denounce what*

the state does, they just object to who's doing it."

6.5 What other effects would “free market” justice have?

Such a system would be dangerous simply because of the power it places in the hands of companies. As Michael Taylor notes, “*whether the [protection] market is competitive or not, it must be remembered that the product is a peculiar one: when we buy cars or shoes or telephone services we do not give the firm power based on force, but armed protection agencies, like the state, make customers (their own and others’) vulnerable, and having given them power we cannot be sure that they will use it only for our protection.*” [**Community, Anarchy and Liberty**, p. 65]

As we argued above, there are many reasons to believe that a “protection” market will place most of society (bar the wealthy elite) in a “vulnerable” position. One such reason is the assumptions of the “anarcho”-capitalists themselves. As they note, capitalism is marked by an extreme division of labour. Instead of everyone having all the skills they need, these skills are distributed throughout society and all (so it is claimed) benefit.

This applies equally to the “defence” market. People subscribe to a “defence firm” because they either cannot or do not want the labour of having to protect their own property and person. The skills of defence, therefore, are concentrated in these companies and so these firms will have an advantage in terms of experience and mental state (they are trained to fight) as well as, as seems likely, weaponry. This means that most normal people will be somewhat at a disadvantage if a cartel of defence firms decides to act coercively. The division of labour society will discourage the spread of skills required for sustained warfare throughout society and so, perhaps, ensure that customers remain “vulnerable.” The price of liberty may be eternal vigilance, but are most people willing to include eternal preparation of war as well? For modern society, the answer seems to be no, they prefer to let others do that (namely the state and its armed forces). And, we should note, an armed society may be a polite one, but its politeness comes from fear, **not** mutual respect and so totally phoney and soul destroying.

If we look at inequality within society, this may produce a ghettoisation effect within “anarcho”-capitalism. As David Friedman notes, conflict between defence firms is bad for business. Conflict costs money both in terms of weaponry used and increased (“danger money”) wages. For this reason he thinks that peaceful co-operation will exist between firms. However, if we look at poor areas with high crime rates then its clear that such an area will be a dangerous place. In other words, it is very likely to be high in conflict. But conflict increases costs, and so prices. Does this mean that those areas which need police most will also have the highest prices for law enforcement? That is the case with insurance now, so perhaps we will see whole areas turning into Hobbesian anarchy simply because the high costs associated with dangerous areas will make the effective demand for their services approach zero.

In a system based on “private statism,” police and justice would be determined by “free market” forces. As indicated in section B.4.1, right-libertarians maintain that one would have few rights on other peoples’ property, and so the owner’s will would be the law (possibly restricted somewhat by a “general libertarian law code”, perhaps not — see last section). In this situation, those who

could not afford police protection would become victims of roving bandits and rampant crime, resulting in a society where the wealthy are securely protected in their bastions by their own armed forces, with a bunch of poor crowded around them for protection. This would be very similar to feudal Europe.

The competing police forces would also be attempting to execute the laws of their sponsors in areas that may not be theirs to begin with, which would lead to conflicts unless everyone agreed to follow a “general libertarian law code” (as Rothbard, for one, wants). If there were competing law codes, the problem of whose “laws” to select and enforce would arise, with each of the wealthy security sponsors desiring that their law control all of the land. And, as noted earlier, if there were **one** “libertarian law code,” this would be a “*monopoly of government*” over a given area, and therefore statist.

In addition, it should be noted that the right-libertarian claim that under their system anarchistic associations would be allowed as long as they are formed voluntarily just reflects their usual vacuous concept of freedom. This is because such associations would exist within and be subject to the “general libertarian law code” of “anarcho”-capitalist society. These laws would reflect and protect the interests and power of those with capitalist property, meaning that unless these owners agree, trying to live an anarchist life would be nearly impossible (its all fine and well to say that those with property can do what they like, if you do not have property then experimentation could prove difficult — not to mention, of course, few areas are completely self-sufficient meaning that anarchistic associations will be subject to market forces, market forces which stress and reward the opposite of the values these communes were set up to create). Thus we must **buy** the right to be free!

If, as anarchists desire, most people refuse to recognise or defend the rights of private property and freely associate accordingly to organise their own lives and ignore their bosses, this would still be classed as “initiation of force” under “anarcho”-capitalism, and thus repressed. In other words, like any authoritarian system, the “rules” within “anarcho”-capitalism do not evolve with society and its changing concepts (this can be seen from the popularity of “natural law” with right-libertarians, the authoritarian nature of which is discussed in section 11).

Therefore, in “anarcho”-capitalism you are free to follow the (capitalist) laws and to act within the limits of these laws. It is only within this context that you can experiment (if you can afford to). If you act outside these laws, then you will be subject to coercion. The amount of coercion required to prevent such actions depends on how willing people are to respect the laws. Hence it is not the case that an “anarcho”-capitalist society is particularly conducive to social experimentation and free evolution, as its advocates like to claim. Indeed, the opposite may be the case, as any capitalist system will have vast differences of wealth and power within it, thus ensuring that the ability to experiment is limited to those who can afford it. As Jonathan Wolff points out, the “*image of people freely moving from one utopia to another until they find their heaven, ignores the thought that certain choices may be irreversible. . . This thought may lead to speculation about whether a law of evolution would apply to the plural utopias. Perhaps, in the long run, we may find the framework regulated by the law of survival of the economically most fit, and so we would expect to see a development not of diversity but of homogeneity. Those communities with great market power would eventually soak up all but the most resistant of those*

communities around them.” [Robert Nozick: **Property, Justice and the Minimal State**, p. 135]

And if the initial distribution of resources is similar to that already existing then the “*economically most fit*” will be capitalistic (as argued in section J.5.12, the capitalist market actively selects against co-operatives even though they are more productive). Given the head start provided by statism, it seems likely that explicitly capitalist utopias would remain the dominant type (particularly as the rights framework is such as to protect capitalist property rights). Moreover, we doubt that most “anarcho”-capitalists would embrace the ideology if it was more than likely that non-capitalist utopias would overcome the capitalist ones (after all, they **are** self-proclaimed capitalists).

So, given that “anarcho”-capitalists who follow Murray Rothbard’s ideas and minimal-statist right-libertarians agree that **all** must follow the basic “*general libertarian law code*” which defends capitalist property rights, we can safely say that the economically “*most fit*” would be capitalist ones. Hardly surprising if the law code reflects capitalist ideas of right and wrong. In addition, as George Reitzer has argued (see **The McDonaldization of Society**), capitalism is driven towards standardisation and conformity by its own logic. This suggests that plurality of communities would soon be replaced by a series of “communities” which share the same features of hierarchy and ruling elites. (“Anarcho”-capitalists who follow David Friedman’s ideas consider it possible, perhaps likely, that a free market in laws will result in one standard law code and so this also applies to that school as well)

So, in the end, the “anarcho” capitalists argue that in their system you are free to follow the (capitalist) law and work in the (capitalist) economy, and if you are lucky, take part in a “commune” as a collective capitalist. How **very** generous of them! Of course, any attempt to change said rules or economy are illegal and would be stopped by private states.

As well as indicating the falsity of “anarcho”-capitalist claims to support “experimentation,” this discussion has also indicated that coercion would not be absent from “anarcho”-capitalism. This would be the case only if everyone voluntarily respected private property rights and abided by the law (i.e. acted in a capitalist-approved way). As long as you follow the law, you will be fine — which is exactly the same as under public statism. Moreover, if the citizens of a society do not want a capitalist order, it may require a lot of coercion to impose it. This can be seen from the experiences of the Italian factory occupations in 1920 (see section A.5.5), in which workers refused to accept capitalist property or authority as valid and ignored it. In response to this change of thought within a large part of society, the capitalists backed fascism in order to stop the evolutionary process within society.

The socialist economic historian Maurice Dobbs, after reviewing the private armies in 1920s and 1930s America made much the same point:

“When business policy takes the step of financing and arming a mass political movement to capture the machinery of government, to outlaw opposing forms of organisation and suppress hostile opinions we have merely a further and more logical stage beyond [private armies]”
[Op, Cit., p. 357]

(Noted Austrian Economist Ludwig von Mises whose extreme free market liberal political and economic ideas inspired right-libertarianism in many ways

had this to say about fascism: “*It cannot be denied that Fascism and similar movements aiming at the establishment of dictatorships are full of the best intentions and that their intervention has, for the moment, saved European civilisation. The merit that Fascism has thereby won for itself will live eternally in history.*” [**Liberalism**, p. 51])

This example illustrates the fact that capitalism **per se** is essentially authoritarian, because it is necessarily based on coercion and hierarchy, which explains why capitalists have resorted to the most extreme forms of authoritarianism — including totalitarian dictatorship — during crises that threatened the fundamental rules of the system itself. There is no reason to think that “anarcho”-capitalism would be any different.

Since “anarcho”-capitalism, with its private states, does not actually want to get rid of hierarchical forms of authority, the need for one government to unify the enforcement activities of the various defence companies becomes apparent. In the end, that is what “anarcho”-capitalism recognises with its “general libertarian law code” (based either on market forces or “natural law”). Thus it appears that one government/hierarchy over a given territory is inevitable under any form of capitalism. That being the case, it is obvious that a democratic form of statism, with its checks and balances, is preferable to a dictatorship that imposes “absolute” property rights and so “absolute” power.

Of course, we do have another option than either private or public statism. This is anarchism, the end of hierarchical authority and its replacement by the “natural” authority of communal and workplace self-management.

7 How does the history of “anarcho”-capitalism show that it is not anarchist?

Of course, “anarcho”-capitalism does have historic precedents and “anarcho”-capitalists spend considerable time trying to co-opt various individuals into their self-proclaimed tradition of “anti-statist” liberalism. That, in itself, should be enough to show that anarchism and “anarcho”-capitalism have little in common as anarchism developed in opposition to liberalism and its defence of capitalism. Unsurprisingly, these “anti-state” liberals tended to, at best, refuse to call themselves anarchists or, at worse, explicitly deny they were anarchists.

One “anarcho”-capitalist overview of their tradition is presented by David M. Hart. His perspective on anarchism is typical of the school, noting that in his essay anarchism or anarchist “*are used in the sense of a political theory which advocates the maximum amount of individual liberty, a necessary condition of which is the elimination of governmental or other organised force.*” [David M. Hart, “*Gustave de Molinari and the Anti-statist Liberal Tradition: Part I*”, pp. 263–290, **Journal of Libertarian Studies**, vol. V, no. 3, p. 284] Yet anarchism has **never** been solely concerned with abolishing the state. Rather, anarchists have always raised economic and social demands and goals along with their opposition to the state. As such, anti-statism may be a necessary condition to be an anarchist, but not a sufficient one to count a specific individual or theory as anarchist.

Specifically, anarchists have turned their analysis onto private property noting that the hierarchical social relationships created by inequality of wealth (for

example, wage labour) restricts individual freedom. This means that if we do seek “*the maximum of individual liberty*” then our analysis cannot be limited to just the state or government. Consequently, to limit anarchism as Hart does requires substantial rewriting of history, as can be seen from his account of William Godwin.

Hart tries to co-opt of William Godwin into the ranks of “anti-state” liberalism, arguing that he “*defended individualism and the right to property.*” [Op. Cit., p. 265] He, of course, quotes from Godwin to support his claim yet strangely truncates Godwin’s argument to exclude his conclusion that “*[w]hen the laws of morality shall be clearly understood, their excellence universally apprehended, and themselves seen to be coincident with each man’s private advantage, the idea of property in this sense will remain, but no man will have the least desire, for purposes of ostentation or luxury, to possess more than his neighbours.*” [An Enquiry into Political Justice, p. 199] In other words, personal property (possession) would still exist but not private property in the sense of capital or inequality of wealth.

This analysis is confirmed in book 8 of Godwin’s classic work entitled “*On Property.*” Needless to say, Hart fails to mention this analysis, unsurprising as it was later reprinted as a socialist pamphlet. Godwin thought that the “*subject of property is the key-stone that completes the fabric of political justice.*” Like Proudhon, Godwin subjects property as well as the state to an anarchist analysis. For Godwin, there were “*three degrees*” of property. The first is possession of things you need to live. The second is “*the empire to which every man is entitled over the produce of his own industry.*” The third is “*that which occupies the most vigilant attention in the civilised states of Europe. It is a system, in whatever manner established, by which one man enters into the faculty of disposing of the produce of another man’s industry.*” He notes that it is “*clear therefore that the third species of property is in direct contradiction to the second.*” [Op. Cit., p. 701 and p. 710–2]

Godwin, unlike classical liberals, saw the need to “*point out the evils of accumulated property,*” arguing that the “*spirit of oppression, the spirit of servility, and the spirit of fraud . . . are the immediate growth of the established administration of property. They are alike hostile to intellectual and moral improvement.*” Like the socialists he inspired, Godwin argued that “*it is to be considered that this injustice, the unequal distribution of property, the grasping and selfish spirit of individuals, is to be regarded as one of the original sources of government, and, as it rises in its excesses, is continually demanding and necessitating new injustice, new penalties and new slavery.*” He stressed, “*let it never be forgotten that accumulated property is usurpation.*” [Op. Cit., p. 732, pp. 717–8, and p. 718]

Godwin argued against the current system of property and in favour of “*the justice of an equal distribution of the good things of life.*” This would be based on “*[e]quality of conditions, or, in other words, an equal admission to the means of improvement and pleasure*” as this “*is a law rigorously enjoined upon mankind by the voice of justice.*” [Op. Cit., p. 725 and p. 736] Thus his anarchist ideas were applied to private property, noting like subsequent anarchists that economic inequality resulted in the loss of liberty for the many and, consequently, an anarchist society would see a radical change in property and property rights. As Kropotkin noted, Godwin “*stated in 1793 in a quite definite form the political and economic principle of Anarchism.*” Little wonder

he, like so many others, argued that Godwin was “*the first theoriser of Socialism without government — that is to say, of Anarchism.*” [**Environment and Evolution**, p. 62 and p. 26] For Kropotkin, anarchism was by definition not restricted to purely political issues but also attacked economic hierarchy, inequality and injustice. As Peter Marshall confirms, “*Godwin’s economics, like his politics, are an extension of his ethics.*” [**Demanding the Impossible**, p. 210]

Godwin’s theory of property is significant because it reflected what was to become standard nineteenth century socialist thought on the matter. In Britain, his ideas influenced Robert Owen and, as a result, the early socialist movement in that country. His analysis of property, as noted, predated Proudhon’s classic anarchist analysis. As such, to state, as Hart did, that Godwin simply “*concluded that the state was an evil which had to be reduced in power if not eliminated completely*” while not noting his analysis of property gives a radically false presentation of his ideas. [Hart, **Op. Cit.**, p. 265] However, it does fit into his flawed assertion that anarchism is purely concerned with the state. Any evidence to the contrary is simply ignored.

7.1 Are competing governments anarchism?

No, of course not. Yet according to “anarcho”-capitalism, it is. This can be seen from the ideas of Gustave de Molinari.

Hart is on firmer ground when he argues that the 19th century French economist Gustave de Molinari is the true founder of “anarcho”-capitalism. With Molinari, he argues, “*the two different currents of anarchist thought converged: he combined the political anarchism of Burke and Godwin with the nascent economic anarchism of Adam Smith and Say to create a new forms of anarchism*” that has been called “*anarcho-capitalism, or free market anarchism.*” [**Op. Cit.**, p. 269] Of course, Godwin (like other anarchists) did not limit his anarchism purely to “political” issues and so he discussed “*economic anarchism*” as well in his critique of private property (as Proudhon also did later). As such, to artificially split anarchism into political and economic spheres is both historically and logically flawed. While some dictionaries limit “anarchism” to opposition to the state, anarchists did and do not.

The key problem for Hart is that Molinari refused to call himself an anarchist. He did not even oppose government, as Hart himself notes Molinari proposed a system of insurance companies to provide defence of property and “*called these insurance companies ‘governments’ even though they did not have a monopoly within a given geographical area.*” As Hart notes, Molinari was the sole defender of such free-market justice at the time in France. [David M. Hart, “*Gustave de Molinari and the Anti-statist Liberal Tradition: Part II*”, pp. 399–434, **Journal of Libertarian Studies**, vol. V, no. 4, p. 415 and p. 411] Molinari was clear that he wanted “*a regime of free government,*” counterpoising “*monopolist or communist governments*” to “*free governments.*” This would lead to “*freedom of government*” rather than its abolition (not freedom **from** government). For Molinarie the future would not bring “*the suppression of the state which is the dream of the anarchists . . . It will bring the diffusion of the state within society. That is . . . ‘a free state in a free society.’*” [quoted by Hart, **Op. Cit.**, p. 429, p. 411 and p. 422] As such, Molinari can hardly be considered an anarchist, even if “anarchist” is limited to purely being against government.

Moreover, in another sense Molinari was in favour of the state. As we discuss in section 6, these companies would have a monopoly within a given geographical area — they have to in order to enforce the property owner’s power over those who use, but do not own, the property in question. The key contradiction can be seen in Molinari’s advocating of company towns, privately owned communities (his term was a “*proprietary company*”). Instead of taxes, people would pay rent and the “*administration of the community would be either left in the hands of the company itself or handled special organisations set up for this purpose.*” Within such a regime “*those with the most property had proportionally the greater say in matters which affected the community.*” If the poor objected then they could simply leave. [Op. Cit., pp. 421–2 and p. 422]

Given this, the idea that Molinari was an anarchist in any form can be dismissed. His system was based on privatising government, not abolishing it (as he himself admitted). This would be different from the current system, of course, as landlords and capitalists would be hiring force directly to enforce their decisions rather than relying on a state which they control indirectly. This system, as we proved in section 6, would not be anarchist as can be seen from American history. There capitalists and landlords created their own private police forces and armies, which regularly attacked and murdered union organisers and strikers. As an example, there is Henry Ford’s Service Department (private police force):

“In 1932 a hunger march of the unemployed was planned to march up to the gates of the Ford plant at Dearborn. . . The machine guns of the Dearborn police and the Ford Motor Company’s Service Department killed [four] and wounded over a score of others. . . Ford was fundamentally and entirely opposed to trade unions. The idea of working men questioning his prerogatives as an owner was outrageous. . . [T]he River Rouge plant. . . was dominated by the autocratic regime of Bennett’s service men. Bennett . . . organise[d] and train[ed] the three and a half thousand private policemen employed by Ford. His task was to maintain discipline amongst the work force, protect Ford’s property [and power], and prevent unionisation. . . Frank Murphy, the mayor of Detroit, claimed that ‘Henry Ford employs some of the worst gangsters in our city.’ The claim was well based. Ford’s Service Department policed the gates of his plants, infiltrated emergent groups of union activists, posed as workers to spy on men on the line. . . Under this tyranny the Ford worker had no security, no rights. So much so that any information about the state of things within the plant could only be freely obtained from ex-Ford workers.” [Huw Beynon, **Working for Ford**, pp. 29–30]

The private police attacked women workers handing out pro-union handbills and gave them “*a severe beating.*” At Kansas and Dallas “*similar beatings were handed out to the union men.*” This use of private police to control the work force was not unique. General Motors “*spent one million dollars on espionage, employing fourteen detective agencies and two hundred spies at one time [between 1933 and 1936]. The Pinkerton Detective Agency found anti-unionism its most lucrative activity.*” [Op. Cit., p. 34 and p. 32] We must also note that the Pinkerton’s had been selling their private police services for decades before

the 1930s. For over 60 years the Pinkerton Detective Agency had “specialised in providing spies, agent provocateurs, and private armed forces for employers combating labour organisations.” By 1892 it “had provided its services for management in seventy major labour disputes, and its 2 000 active agents and 30 000 reserves totalled more than the standing army of the nation.” [Jeremy Brecher, **Strike!**, p. 55] With this force available, little wonder unions found it so hard to survive in the USA.

Only an “anarcho”-capitalist would deny that this is a private government, employing private police to enforce private power. Given that unions could be considered as “defence” agencies for workers, this suggests a picture of how “anarcho”-capitalism may work in practice radically different from the pictures painted by its advocates. The reason is simple, it does not ignore inequality and subjects economics to an anarchist analysis. Little wonder, then, that Proudhon stressed that it “becomes necessary for the workers to form themselves into democratic societies, with equal conditions for all members, on pain of a relapse into feudalism.” Anarchism, in other words, would see “[c]apitalistic and proprietary exploitation stopped everywhere, the wage system abolished” and so “the economic organisation [would] replac[e] the governmental and military system.” [**The General Idea of the Revolution**, p. 227 and p. 281] Clearly, the idea that Proudhon shared the same political goal as Molinari is a joke. He would have dismissed such a system as little more than an updated form of feudalism in which the property owner is sovereign and the workers subjects (see section B.4 for more details).

Unsurprisingly, Molinari (unlike the individualist anarchists) attacked the jury system, arguing that its obliged people to “perform the duties of judges. This is pure communism.” People would “judge according to the colour of their opinions, than according to justice.” [quoted by Hart, **Op. Cit.**, p. 409] As the jury system used amateurs (i.e. ordinary people) rather than full-time professionals it could not be relied upon to defend the power and property rights of the rich. As we noted in section 1.4, Rothbard criticised the individualist anarchists for supporting juries for essentially the same reasons.

But, as is clear from Hart’s account, Molinari had little concern that working class people should have a say in their own lives beyond consuming goods. His perspective can be seen from his lament about those “colonies where slavery has been abolished without the compulsory labour being replaced with an equivalent quantity of free [sic!] labour [i.e., wage labour], there has occurred the opposite of what happens everyday before our eyes. Simple workers have been seen to exploit in their turn the industrial **entrepreneurs**, demanding from them wages which bear absolutely no relation to the legitimate share in the product which they ought to receive. The planters were unable to obtain for their sugar a sufficient price to cover the increase in wages, and were obliged to furnish the extra amount, at first out of their profits, and then out of their very capital. A considerable number of planters have been ruined as a result . . . It is doubtless better that these accumulations of capital should be destroyed than that generations of men should perish [Marx: ‘how generous of M. Molinari’] but would it not be better if both survived?” [quoted by Karl Marx, **Capital**, vol. 1, p. 937f]

So workers exploiting capital is the “opposite of what happens everyday before our eyes”? In other words, it is normal that entrepreneurs “exploit” workers under capitalism? Similarly, what is a “legitimate share” which workers “ought to receive”? Surely that is determined by the eternal laws of supply and demand

and not what the capitalists (or Molinari) thinks is right? And those poor former slave drivers, they really do deserve our sympathy. What horrors they face from the impositions subjected upon them by their ex-chattels — they had to reduce their profits! How dare their ex-slaves refuse to obey them in return for what their ex-owners think was their “*legitimate share in the produce*”! How “*simple*” these workers are, not understanding the sacrifices their former masters suffer nor appreciating how much more difficult it is for their ex-masters to create “*the product*” without the whip and the branding iron to aid them! As Marx so rightly comments: “*And what, if you please, is this ‘legitimate share’, which, according to [Molinari’s] own admission, the capitalist in Europe daily neglects to pay? Over yonder, in the colonies, where the workers are so ‘simple’ as to ‘exploit’ the capitalist, M. Molinari feels a powerful itch to use police methods to set on the right road that law of supply and demand which works automatically everywhere else.*” [Op. Cit., p. 937f]

An added difficulty in arguing that Molinari was an anarchist is that he was a contemporary of Proudhon, the first self-declared anarchist, and lived in a country with a vigorous anarchist movement. Surely if he was really an anarchist, he would have proclaimed his kinship with Proudhon and joined in the wider movement. He did not, as Hart notes as regards Proudhon:

“their differences in economic theory were considerable, and it is probably for this reason that Molinari refused to call himself an anarchist in spite of their many similarities in political theory. Molinari refused to accept the socialist economic ideas of Proudhon . . . in Molinari’s mind, the term ‘anarchist’ was intimately linked with socialist and statist economic views.” [Op. Cit., p. 415]

Yet Proudhon’s economic views, like Godwin’s, flowed from his anarchist analysis and principles. They cannot be arbitrarily separated as Hart suggests. So while arguing that “*Molinari was just as much an anarchist as Proudhon,*” Hart forgets the key issue. Proudhon was aware that private property ensured that the proletariat did not exercise “*self-government*” during working hours, i.e. was not a self-governing individual. As for Hart claiming that Proudhon had “*statist economic views*” it simply shows how far an “anarcho”-capitalist perspective is from genuine anarchism. Proudhon’s economic analysis, his critique of private property and capitalism, flowed from his anarchism and was an integral aspect of it.

To restrict anarchism purely to opposition to the state, Hart is impoverishing anarchist theory and denying its history. Given that anarchism was born from a critique of private property as well as government, this shows the false nature of Hart’s claim that “*Molinari was the first to develop a theory of free-market, proprietary anarchism that extended the laws of the market and a rigorous defence of property to its logical extreme.*” [Op. Cit., p. 415 and p. 416] Hart shows how far from anarchism Molinari was as Proudhon had turned his anarchist analysis to property, showing that “*defence of property*” lead to the oppression of the many by the few in social relationships identical to those which mark the state. Moreover, Proudhon, argued the state would always be required to defend such social relations. Privatising it would hardly be a step forward.

Unsurprisingly, Proudhon dismissed the idea that the laissez faire capitalists shared his goals. “*The school of Say,*” Proudhon argued, was “*the chief focus*

of counter-revolution next to the Jesuits” and “has for ten years past seemed to exist only to protect and applaud the execrable work of the monopolists of money and necessities, deepening more and more the obscurity of a science naturally difficult and full of complications.” Much the same can be said of “anarcho”-capitalists, incidentally. For Proudhon, “the disciples of Malthus and of Say, who oppose with all their might any intervention of the State in matters commercial or industrial, do not fail to avail themselves of this seemingly liberal attitude, and to show themselves more revolutionary than the Revolution. More than one honest searcher has been deceived thereby.” However, this apparent “anti-statist” attitude of supporters of capitalism is false as pure free market capitalism cannot solve the social question, which arises because of capitalism itself. As such, it was impossible to abolish the state under capitalism. Thus “this inaction of Power in economic matters was the foundation of government. What need should we have of a political organisation, if Power once permitted us to enjoy economic order?” Instead of capitalism, Proudhon advocated the “constitution of Value,” the “organisation of credit,” the elimination of interest, the “establishment of workingmen’s associations” and “the use of a just price.” [The General Idea of the Revolution, p. 225, p. 226 and p. 233]

Clearly, then, the claims that Molinari was an anarchist fail as he, unlike his followers, were aware of what anarchism actually stood for. Hart, in his own way, acknowledges this:

“In spite of his protestations to the contrary, Molinari should be considered an anarchist thinker. His attack on the state’s monopoly of defence must surely warrant the description of anarchism. His reluctance to accept this label stemmed from the fact that the socialists had used it first to describe a form of non-statist society which Molinari definitely opposed. Like many original thinkers, Molinari had to use the concepts developed by others to describe his theories. In his case, he had come to the same political conclusions as the communist anarchists although he had been working within the liberal tradition, and it is therefore not surprising that the terms used by the two schools were not compatible. It would not be until the latter half of the twentieth century that radical, free-trade liberals would use the word ‘anarchist’ to describe their beliefs.” [Op. Cit., p. 416]

It should be noted that Proudhon was **not** a communist-anarchist, but the point remains. The aims of anarchism were recognised by Molinari as being inconsistent with his ideology. Consequently, he (rightly) refused the label. If only his self-proclaimed followers in the “latter half of the twentieth century” did the same anarchists would not have to bother with them!

As such, it seems ironic that the founder of “anarcho”-capitalism should have come to the same conclusion as modern day anarchists on the subject of whether his ideas are a form of anarchism or not!

7.2 Is government compatible with anarchism?

Of course not, but ironically this is the conclusion arrived at by Hart’s analyst of the British “voluntaryists,” particularly Auberon Herbert. Voluntaryism was a fringe part of the right-wing individualist movement inspired by Herbert Spencer, a spokesman for free market capitalism in the later half of the

nineteenth century. As with Molinari, there is a problem with presenting this ideology as anarchist, namely that its leading light, Herbert, explicitly rejected the label “anarchist.”

Herbert was clearly aware of individualist anarchism and distanced himself from it. He argued that such a system would be “*pandemonium*.” He thought that people should “*not direct our attacks — as the anarchists do — against all government, against government in itself*” but “*only against the overgrown, the exaggerated, the insolent, unreasonable and indefensible forms of government, which are found everywhere today.*” Government should be “*strictly limited to its legitimate duties in defence of self-ownership and individual rights.*” He stressed that “*we are governmentalists . . . formally constituted by the nation, employing in this matter of force the majority method.*” Moreover, Herbert knew of, and rejected, individualist anarchism, considering it to be “*founded on a fatal mistake.*” [Essay X: The Principles Of Voluntarism And Free Life] As such, claims that he was an anarchist or “anarcho”-capitalist cannot be justified.

Hart is aware of this slight problem, quoting Herbert’s claim that he aimed for “*regularly constituted government, generally accepted by all citizens for the protection of the individual.*” [quoted by Hart, *Op. Cit.*, p. 86] Like Molinari, Herbert was aware that anarchism was a form of socialism and that the political aims could not be artificially separated from its economic and social aims. As such, he was right **not** to call his ideas anarchism as it would result in confusion (particularly as anarchism was a much larger movement than his). As Hart acknowledges, “*Herbert faced the same problems that Molinari had with labelling his philosophy. Like Molinari, he rejected the term ‘anarchism,’ which he associated with the socialism of Proudhon and . . . terrorism.*” While “*quite tolerant*” of individualist anarchism, he thought they “*were mistaken in their rejections of ‘government.’*” However, Hart knows better than Herbert about his own ideas, arguing that his ideology “*is in fact a new form of anarchism, since the most important aspect of the modern state, the monopoly of the use of force in a given area, is rejected in no uncertain terms by both men.*” [Op. Cit., p. 86] He does mention that Benjamin Tucker called Herbert a “*true anarchist in everything but name,*” but Tucker denied that Kropotkin was an anarchist suggesting that he was hardly a reliable guide. [quoted by Hart, *Op. Cit.*, p. 87] As it stands, it seems that Tucker was mistaken in his evaluation of Herbert’s politics.

Economically, Herbert was not an anarchist, arguing that the state should protect Lockean property rights. Of course, Hart may argue that these economic differences are not relevant to the issue of Herbert’s anarchism but that is simply to repeat the claim that anarchism is simply concerned with government, a claim which is hard to support. This position cannot be maintained, given that both Herbert and Molinari defended the right of capitalists and landlords to force their employees and tenants to follow their orders. Their “governments” existed to defend the capitalist from rebellious workers, to break unions, strikes and occupations. In other words, they were a monopoly of the use of force in a given area to enforce the monopoly of power in a given area (namely, the wishes of the property owner). While they may have argued that this was “defence of liberty,” in reality it is defence of power and authority.

What about if we just look at the political aspects of his ideas? Did Herbert actually advocate anarchism? No, far from it. He clearly demanded a minimal state based on voluntary taxation. The state would not use force of any kind,

“except for purposes of restraining force.” He argued that in his system, while “the state should compel no services and exact no payments by force,” it “should be free to conduct many useful undertakings . . . in competition with all voluntary agencies . . . in dependence on voluntary payments.” [Herbert, **Op. Cit.**] As such, “the state” would remain and unless he is using the term “state” in some highly unusual way, it is clear that he means a system where individuals live under a single elected government as their common law maker, judge and defender within a given territory.

This becomes clearer once we look at how the state would be organised. In his essay “*A Politician in Sight of Haven*,” Herbert does discuss the franchise, stating it would be limited to those who paid a voluntary “income tax,” anyone “paying it would have the right to vote; those who did not pay it would be — as is just — without the franchise. There would be no other tax.” The law would be strictly limited, of course, and the “government . . . must confine itself simply to the defense of life and property, whether as regards internal or external defense.” In other words, Herbert was a minimal statist, with his government elected by a majority of those who choose to pay their income tax and funded by that (and by any other voluntary taxes they decided to pay). Whether individuals and companies could hire their own private police in such a regime is irrelevant in determining whether it is an anarchy.

This can be best seen by comparing Herbert with Ayn Rand. No one would ever claim Rand was an anarchist, yet her ideas were extremely similar to Herbert’s. Like Herbert, Rand supported laissez-faire capitalism and was against the “initiation of force.” Like Herbert, she extended this principle to favour a government funded by voluntary means [“*Government Financing in a Free Society*,” **The Virtue of Selfishness**, pp. 116–20] Moreover, like Herbert, she explicitly denied being an anarchist and, again like Herbert, thought the idea of competing defence agencies (“governments”) would result in chaos. The similarities with Herbert are clear, yet no “anarcho”-capitalist would claim that Rand was an anarchist, yet they do claim that Herbert was.

This position is, of course, deeply illogical and flows from the non-anarchist nature of “anarcho”-capitalism. Perhaps unsurprisingly, when Rothbard discusses the ideas of the “voluntaryists” he fails to address the key issue of who determines the laws being enforced in society. For Rothbard, the key issue is **who** is enforcing the law, not where that law comes from (as long, of course, as it is a law code he approves of). The implications of this is significant, as it implies that “anarchism” need not be opposed to either the state nor government! This can be clearly seen from Rothbard’s analysis of voluntary taxation.

Rothbard, correctly, notes that Herbert advocated voluntary taxation as the means of funding a state whose basic role was to enforce Lockean property rights. For Rothbard, the key issue was **not** who determines the law but who enforces it. For Rothbard, it should be privatised police and courts and he suggests that the “voluntary taxationists have never attempted to answer this problem; they have rather stubbornly assumed that no one would set up a competing defence agency within a State’s territorial limits.” If the state **did** bar such firms, then that system is not a genuine free market. However, “if the government **did** permit free competition in defence service, there would soon no longer be a central government over the territory. Defence agencies, police and judicial, would compete with one another in the same uncoerced manner as the producers of any other service on the market.” [**Power and Market**, p. 122 and p. 123]

However, this misses the point totally. The key issue that Rothbard ignores is who determines the laws which these private “defence” agencies would enforce. If the laws are determined by a central government, then the fact that citizen’s can hire private police and attend private courts does not stop the regime being statist. We can safely assume Rand, for example, would have had no problem with companies providing private security guards or the hiring of private detectives within the context of her minimal state. Ironically, Rothbard stresses the need for such a monopoly legal system:

“While ‘the government’ would cease to exist, the same cannot be said for a constitution or a rule of law, which, in fact, would take on in the free society a far more important function than at present. For the freely competing judicial agencies would have to be guided by a body of absolute law to enable them to distinguish objectively between defence and invasion. This law, embodying elaborations upon the basic injunction to defend person and property from acts of invasion, would be codified in the basic legal code. Failure to establish such a code of law would tend to break down the free market, for then defence against invasion could not be adequately achieved.” [Op. Cit., p. 123–4]

So if you violate the “absolute law” defending (absolute) property rights then you would be in trouble. The problem now lies in determining who sets that law. Rothbard is silent on how his system of monopoly laws are determined or specified. The “voluntaryists” did propose a solution, namely a central government elected by the majority of those who voluntarily decided to pay an income tax. In the words of Herbert:

“We agree that there must be a central agency to deal with crime — an agency that defends the liberty of all men, and employs force against the uses of force; but my central agency rests upon voluntary support, whilst Mr. Levy’s central agency rests on compulsory support.” [quoted by Carl Watner, “The English Individualists As They Appear In Liberty,” pp. 191–211, **Benjamin R. Tucker and the Champions of Liberty**, p. 194]

And all Rothbard is concerned over private cops would exist or not! This lack of concern over the existence of the state and government flows from the strange fact that “anarcho”-capitalists commonly use the term “anarchism” to refer to any philosophy that opposes all forms of initiatory coercion. Notice that government does not play a part in this definition, thus Rothbard can analyse Herbert’s politics without commenting on who determines the law his private “defence” agencies enforce. For Rothbard, “an anarchist society” is defined “as one where there is no legal possibility for coercive aggression against the person and property of any individual.” He then moved onto the state, defining that as an “institution which possesses one or both (almost always both) of the following properties: (1) it acquires its income by the physical coercion known as ‘taxation’; and (2) it acquires and usually obtains a coerced monopoly of the provision of defence service (police and courts) over a given territorial area.” [“Society without a State”, in **Nomos XIX**, Pennock and Chapman (eds.), p. 192]

This is highly unusual definition of “anarchism,” given that it utterly fails to mention or define government. This, perhaps, is understandable as any attempt to define it in terms of “*monopoly of decision-making power*” results in showing that capitalism is statist (see section 1 for a summary). The key issue here is the term “*legal possibility*.” That suggests a system of laws which determine what is “*coercive aggression*” and what constitutes what is and what is not legitimate “property.” Herbert is considered by “anarcho”-capitalists as one of them. Which brings us to a strange conclusion, that for “anarcho”-capitalists you can have a system of “anarchism” in which there is a government and state — as long as the state does not impose taxation nor stop private police forces from operating!

As Rothbard argues “*if a government based on voluntary taxation permits free competition, the result will be the purely free-market system . . . The previous government would now simply be one competing defence agency among many on the market.*” [Power and Market, p. 124] That the government is specifying what is and is not legal does not seem to bother him or even cross his mind. Why should it, when the existence of government is irrelevant to his definition of anarchism and the state? That private police are enforcing a monopoly law determined by the government seems hardly a step in the right direction nor can it be considered as anarchism. Perhaps this is unsurprising, for under his system there would be “*a basic, common Law Code*” which “*all would have to abide by*” as well as “*some way of resolving disputes that will gain a majority consensus in society . . . whose decision will be accepted by the great majority of the public.*” [“Society without a State,” Op. Cit., p. 205]

At least Herbert is clear that this would be a government system, unlike Rothbard who assumes a monopoly law but seems to think that this is not a government or a state. As David Wieck argued, this is illogical for according to Rothbard “*all ‘would have to’ conform to the same legal code*” and this can only be achieved by means of “*the forceful action of adherents to the code against those who flout it*” and so “*in his system there would stand over against every individual the legal authority of all the others. An individual who did not recognise private property as legitimate would surely perceive this as a tyranny of law, a tyranny of the majority or of the most powerful — in short, a hydra-headed state. If the law code is itself unitary, then this multiple state might be said to have properly a single head — the law . . . But it looks as though one might still call this ‘a state,’ under Rothbard’s definition, by satisfying de facto one of his pair of sufficient conditions: ‘It asserts and usually obtains a coerced monopoly of provision of defence service (police and courts) over a given territorial area’ . . . Hobbes’s individual sovereign would seem to have become many sovereigns — with but one law, however, and in truth, therefore, a single sovereign in Hobbes’s more important sense of the latter term. One might better, and less confusingly, call this a libertarian state than an anarchy.*” [“Anarchist Justice”, in Nomos XIX, Pennock and Chapman (eds.), pp. 216–7]

The obvious recipients of the coercion of the new state would be those who rejected the authority of their bosses and landlords, those who reject the Lockean property rights Rothbard and Herbert hold dear. In such cases, the rebels and any “defence agency” (like, say, a union) which defended them would be driven out of business as it violated the law of the land. How this is different from a state banning competing agencies is hard to determine. This is a “difficulty” argues Wieck, which “*results from the attachment of a principle of*

private property, and of unrestricted accumulation of wealth, to the principle of individual liberty. This increases sharply the possibility that many reasonable people who respect their fellow men and women will find themselves outside the law because of dissent from a property interpretation of liberty.” Similarly, there is the economic results of capitalism. “One can imagine,” Wieck continues, “that those who lose out badly in the free competition of Rothbard’s economic system, perhaps a considerable number, might regard the legal authority as an alien power, state for them, based on violence, and might be quite unmoved by the fact that, just as under nineteenth century capitalism, a principle of liberty was the justification for it all.” [Op. Cit., p. 217 and pp. 217–8]

7.3 Can there be a “right-wing” anarchism?

Hart, of course, mentions the individualist anarchists, calling Tucker’s ideas “*laissez faire liberalism*.” [Op. Cit., p. 87] However, Tucker called his ideas “*socialism*” and presented a left-wing critique of most aspects of liberalism, particularly its Lockean based private property rights. Tucker based much of his ideas on property on Proudhon, so if Hart dismisses the latter as a socialist then this must apply to the former. Given that he notes that there are “*two main kinds of anarchist thought*,” namely “*communist anarchism which denies the right of an individual to seek profit, charge rent or interest and to own property*” and a “*‘right-wing’ proprietary anarchism, which vigorously defends these rights*” then Tucker, like Godwin, would have to be placed in the “*left-wing*” camp. [“*Gustave de Molinari and the Anti-statist Liberal Tradition: Part II*”, Op. Cit., p. 427] Tucker, after all, argued that he aimed for the end of profit, interest and rent and attacked private property in land and housing beyond “*occupancy and use*.”

As can be seen, Hart’s account of the history of “*anti-state*” liberalism is flawed. Godwin is included only by ignoring his views on property, views which in many ways reflects the later “*socialist*” (i.e. anarchist) analysis of Proudhon. He then discusses a few individuals who were alone in their opinions even within extreme free market right and all of whom knew of anarchism and explicitly rejected the name for their respective ideologies. In fact, they preferred the term “*government*” to describe their systems which, on the face of it, would be hard to reconcile with the usual “*anarcho*”-capitalist definition of anarchism as being “*no government*.” Hart’s discussion of individualist anarchism is equally flawed, failing to discuss their economic views (just as well, as its links to “*left-wing*” anarchism would be obvious).

However, the similarities of Molinari’s views with what later became known as “*anarcho*”-capitalism are clear. Hart notes that with Molinari’s death in 1912, “*liberal anti-statism virtually disappeared until it was rediscovered by the economist Murray Rothbard in the late 1950’s*” [“*Gustave de Molinari and the Anti-statist Liberal Tradition: Part III*”, Op. Cit., p. 88] While this fringe is somewhat bigger than previously, the fact remains that the ideas expounded by Rothbard are just as alien to the anarchist tradition as Molinari’s. It is a shame that Rothbard, like his predecessors, did not call his ideology something other than anarchism. Not only would it have been more accurate, it would also have lead to much less confusion and no need to write this section of the FAQ! As it stands, the only reason why “*anarcho*”-capitalism is considered a form of “*anarchism*” by some is because one person (Rothbard) decided to steal

the name of a well established and widespread political and social theory and movement and apply it to an ideology with little, if anything, in common with it.

As Hart inadvertently shows, it is not a firm base to build a claim. That anyone can consider “anarcho”-capitalism as anarchist simply flows from a lack of knowledge about anarchism. As numerous anarchists have argued. For example, “*Rothbard’s conjunction of anarchism with capitalism,*” according to David Wieck, “*results in a conception that is entirely outside the mainstream of anarchist theoretical writings or social movements . . . this conjunction is a self-contradiction.*” He stressed that “*the main traditions of anarchism are entirely different. These traditions, and theoretical writings associated with them, express the perspectives and the aspirations, and also, sometimes, the rage, of the oppressed people in human society: not only those economically oppressed, although the major anarchist movements have been mainly movements of workers and peasants, but also those oppressed by power in all those social dimensions . . . including of course that of political power expressed in the state.*” In other words, “*anarchism represents . . . a moral commitment (Rothbard’s anarchism I take to be diametrically opposite).*” [“*Anarchist Justice*”, in **Nomos XIX**, Pennock and Chapman (eds.), p. 215, p. 229 and p. 234]

It is a shame that some academics consider only the word Rothbard uses as relevant rather than the content and its relation to anarchist theory and history. If they did, they would soon realise that the expressed opposition of so many anarchists to “anarcho”-capitalism is something which cannot be ignored or dismissed. In other words, a “right-wing” anarchist cannot and does not exist, no matter how often they use that word to describe their ideology. As Bob Black put it, “*a right-wing anarchist is just a minarchist who’d abolish the state to his own satisfaction by calling it something else . . . They don’t denounce what the state does, they just object to who’s doing it.*” [**Libertarian as Conservative**]

The reason is simple. Anarchist economics and politics cannot be artificially separated, they are linked. Godwin and Proudhon did not stop their analysis at the state. They extended it the social relationships produced by inequality of wealth, i.e. economic power as well as political power. To see why, we need only consult Rothbard’s work. As noted in the last section, for Rothbard the key issue with the “voluntary taxationists” was not who determined the “*body of absolute law*” but rather who enforced it. In his discussion, he argued that a democratic “defence agency” is at a disadvantage in his “free market” system. As he put it:

“It would, in fact, be competing at a severe disadvantage, having been established on the principle of ‘democratic voting.’ Looked at as a market phenomenon, ‘democratic voting’ (one vote per person) is simply the method of the consumer ‘co-operative.’ Empirically, it has been demonstrated time and again that co-operatives cannot compete successfully against stock-owned companies, especially when both are equal before the law. There is no reason to believe that co-operatives for defence would be any more efficient. Hence, we may expect the old co-operative government to ‘wither away’ through loss of customers on the market, while joint-stock (i.e., corporate) defence agencies would become the prevailing market form.”

Notice how he assumes that both a co-operative and corporation would be

“equal before the law.” But who determines that law? Obviously **not** a democratically elected government, as the idea of “one person, one vote” in determining the common law all are subject to is “*inefficient.*” Nor does he think, like the individualist anarchists, that the law would be judged by juries along with the facts. As we note in section 1.4, he rejects that in favour of it being determined by “*Libertarian lawyers and jurists.*” Thus the law is unchangeable by ordinary people and enforced by private defence agencies hired to protect the liberty and property of the owning class. In the case of a capitalist economy, this means defending the power of landlords and capitalists against rebel tenants and workers.

This means that Rothbard’s “*common Law Code*” will be determined, interpreted, enforced and amended by corporations based on the will of the majority of shareholders, i.e. the rich. That hardly seems likely to produce equality before the law. As he argues in a footnote:

*“There is a strong **a priori** reason for believing that corporations will be superior to co-operatives in any given situation. For if each owner receives only one vote regardless of how much money he has invested in a project (and earnings are divided in the same way), there is no incentive to invest more than the next man; in fact, every incentive is the other way. This hampering of investment militates strongly against the co-operative form.”*

So **if** the law is determined by the defence agencies and courts then it will be determined by those who have invested most in these companies. As it is unlikely that the rich will invest in defence firms which do not support their property rights, power, profits and definition of property rights, it is clear that agencies which favour the wealthy will survive on the market. The idea that market demand will counter this class rule seems unlikely, given Rothbard’s own argument. After all, in order to compete successfully you need more than demand, you need source of investment. If co-operative defence agencies do form, they will be at a market disadvantage due to lack of investment. As argued in section J.5.12, even though co-operatives are more efficient than capitalist firms lack of investment (caused by the lack of control by capitalists Rothbard notes) stops them replacing wage slavery. Thus capitalist wealth and power inhibits the spread of freedom in production. If we apply his own argument to Rothbard’s system, we suggest that the market in “defence” will also stop the spread of more libertarian associations thanks to capitalist power and wealth. In other words, like any market, Rothbard’s “defence” market will simply reflect the interests of the elite, not the masses.

Moreover, we can expect any democratic defence agency (like a union) to support, say, striking workers or squatting tenants, to be crushed. This is because, as Rothbard stresses, **all** “defence” firms would be expected to apply the “*common*” law, as written by “*Libertarian lawyers and jurists.*” If they did not they would quickly be labelled “outlaw” agencies and crushed by the others. Ironically, Tucker would join Bakunin and Kropotkin in an “anarchist” court accused to violating “anarchist” law by practising and advocating “occupancy and use” rather than the approved Rothbardian property rights. Even if these democratic “defence” agencies could survive and not be driven out of the market by a combination of lack of investment and violence due to their “outlaw” status,

there is another problem. As we discussed in section 1, landlords and capitalists have a monopoly of decision making power over their property. As such, they can simply refuse to recognise any democratic agency as a legitimate defence association and use the same tactics perfected against unions to ensure that it does not gain a foothold in their domain (see section 6 for more details).

Clearly, then, a “right-wing” anarchism is impossible as any system based on capitalist property rights will simply be an oligarchy run by and for the wealthy. As Rothbard notes, any defence agency based on democratic principles will not survive in the “market” for defence simply because it does not allow the wealthy to control it and its decisions. Little wonder Proudhon argued that laissez-faire capitalism meant “*the victory of the strong over the weak, of those who own property over those who own nothing.*” [quoted by Peter Marshall, **Demanding the Impossible**, p. 259]

8 What role did the state take in the creation of capitalism?

If the “anarcho”-capitalist is to claim with any plausibility that “real” capitalism is non-statist or that it can exist without a state, it must be shown that capitalism evolved naturally, in opposition to state intervention. However, in reality, the opposite is the case. Capitalism was born from state intervention and, in the words of Kropotkin, “*the State . . . and capitalism . . . developed side by side, mutually supporting and re-enforcing each other.*” [**Kropotkin’s Revolutionary Pamphlets**, p. 181]

Numerous writers have made this point. For example, in Karl Polanyi’s flawed masterpiece **The Great Transformation** we read that “*the road to the free market was opened and kept open by an enormous increase in continuous, centrally organised and controlled interventionism*” by the state [p. 140]. This intervention took many forms — for example, state support during “mercantilism,” which allowed the “manufactures” (i.e. industry) to survive and develop, enclosures of common land, and so forth. In addition, the slave trade, the invasion and brutal conquest of the Americas and other “primitive” nations, and the looting of gold, slaves, and raw materials from abroad also enriched the European economy, giving the development of capitalism an added boost. Thus Kropotkin:

“The history of the genesis of capital has already been told by socialists many times. They have described how it was born of war and pillage, of slavery and serfdom, of modern fraud and exploitation. They have shown how it is nourished by the blood of the worker, and how little by little it has conquered the whole world.” [Op. Cit., p. 207]

Or, if Kropotkin seems too committed to be fair, we have John Stuart Mill’s statement that:

“The social arrangements of modern Europe commenced from a distribution of property which was the result, not of just partition, or acquisition by industry, but of conquest and violence. . . .” [**Principles of Political Economy**, p. 15]

Therefore, when supporters of “libertarian” capitalism say they are against the “initiation of force,” they mean only **new** initiations of force; for the system they support was born from numerous initiations of force in the past. And, as can be seen from the history of the last 100 years, it also requires state intervention to keep it going (section D.1, “Why does state intervention occur?,” addresses this point in some detail). Indeed, many thinkers have argued that it was precisely this state support and coercion (particularly the separation of people from the land) that played the **key** role in allowing capitalism to develop rather than the theory that “*previous savings*” did so. As the noted German thinker Franz Oppenheimer argued, “*the concept of a ‘primitive accumulation,’ or an original store of wealth, in land and in movable property, brought about by means of purely economic forces*” while “*seem[ing] quite plausible*” is in fact “*utterly mistaken; it is a ‘fairly tale,’ or it is a class theory used to justify the privileges of the upper classes.*” [**The State**, pp. 5–6]

This thesis will be discussed in the following sections. It is, of course, ironic to hear right-wing libertarians sing the praises of a capitalism that never existed and urge its adoption by all nations, in spite of the historical evidence suggesting that only state intervention made capitalist economies viable — even in that Mecca of “free enterprise,” the United States. As Noam Chomsky argues, “*who but a lunatic could have opposed the development of a textile industry in New England in the early nineteenth century, when British textile production was so much more efficient that half the New England industrial sector would have gone bankrupt without very high protective tariffs, thus terminating industrial development in the United States? Or the high tariffs that radically undermined economic efficiency to allow the United States to develop steel and other manufacturing capacities? Or the gross distortions of the market that created modern electronics?*” [**World Orders, Old and New**, p. 168]. To claim, therefore, that “mercantilism” is not capitalism makes little sense. Without mercantilism, “proper” capitalism would never have developed, and any attempt to divorce a social system from its roots is ahistoric and makes a mockery of critical thought.

Similarly, it is somewhat ironic when “anarcho”-capitalists and right libertarians claim that they support the freedom of individuals to choose how to live. After all, the working class was not given **that** particular choice when capitalism was developing. Indeed, their right to choose their own way of life was constantly violated and denied. So to claim that **now** (after capitalism has been created) we get the chance to try and live as we like is insulting in the extreme. The available options we have are not independent of the society we live in and are decisively shaped by the past. To claim we are “free” to live as we like (within the laws of capitalism) is basically to argue that we are able to “buy” the freedom that every individual is due from those who have stolen it from us in the first place!

Needless to say, some right-libertarians recognise that the state played a massive role in encouraging industrialisation (more correct to say “proletarianisation” as it created a working class which did not own the tools they used, although we stress that this process started on the land and not in industry). So they contrast “bad” business people (who took state aid) and “good” ones. Thus Rothbard’s comment that Marxists have “*made no particular distinction between ‘bourgeoisie’ who made use of the state, and bourgeoisie who acted on the free market.*” [**The Ethics of Liberty**, p. 72]

But such an argument is nonsense as it ignores the fact that the “free market”

is a network (and defined by the state by the property rights it enforces). For example, the owners of the American steel and other companies who grew rich and their companies big behind protectionist walls are obviously “bad” bourgeoisie. But are the bourgeoisie who supplied the steel companies with coal, machinery, food, “defence” and so on not also benefiting from state action? And the suppliers of the luxury goods to the wealthy steel company owners, did they not benefit from state action? Or the suppliers of commodities to the workers that laboured in the steel factories that the tariffs made possible, did they not benefit? And the suppliers to these suppliers? And the suppliers to these suppliers? Did not the users of technology first introduced into industry by companies protected by state orders also not benefit? Did not the capitalists who had a large and landless working class to select from benefit from the “land monopoly” even though they may not have, unlike other capitalists, directly advocated it? It increased the pool of wage labour for **all** capitalists and increased their bargaining position/power in the labour market at the expense of the working class. In other words, such a policy helped maintain capitalist market power, irrespective of whether individual capitalists encouraged politicians to vote to create/maintain it. And, similarly, **all** capitalists benefited from the changes in common law to recognise and protect capitalist private property and rights that the state enforced during the 19th century (see section B.2.5).

It appears that, for Rothbard, the collusion between state and business is the fault, not of capitalism, but of particular capitalists. The system is pure; only individuals are corrupt. But, for anarchists, the origins of the modern state-capitalist system lies not in the individual qualities of capitalists as such but in the dynamic and evolution of capitalism itself — a complex interaction of class interest, class struggle, social defence against the destructive actions of the market, individual qualities and so forth. In other words, Rothbard’s claims are flawed — they fail to understand capitalism as a **system** and its dynamic nature.

Indeed, if we look at the role of the state in creating capitalism we could be tempted to rename “anarcho”-capitalism “marxian-capitalism”. This is because, given the historical evidence, a political theory can be developed by which the “dictatorship of the bourgeoisie” is created and that this capitalist state “wither away” into anarchy. That this means rejecting the economic and social ideas of Marxism and their replacement by their direct opposite should not mean that we should reject the idea (after all, that is what “anarcho”-capitalism has done to Individualist Anarchism!). But we doubt that many “anarcho”-capitalists will accept such a name change (even though this would reflect their politics far better; after all they do not object to past initiations of force, just current ones and many do seem to think that the modern state **will** wither away due to market forces).

But this is beside the point. The fact remains that state action was required to create and maintain capitalism. Without state support it is doubtful that capitalism would have developed at all.

So, when the right suggests that “we” be “left alone,” what they mean by “we” comes into clear focus when we consider how capitalism developed. Artisans and peasants were only “left alone” to starve, and the working classes of industrial capitalism were only “left alone” outside work and for only as long as they respected the rules of their “betters.” As for the other side of the class divide, they desire to be “left alone” to exercise their power over others,

as we will see. That modern “capitalism” is, in effect, a kind of “corporate mercantilism,” with states providing the conditions that allow corporations to flourish (e.g. tax breaks, subsidies, bailouts, anti-labour laws, etc.) says more about the statist roots of capitalism than the ideologically correct definition of capitalism used by its supporters.

8.1 What social forces lay behind the rise of capitalism?

Capitalist society is a relatively recent development. As Murray Bookchin points out, for a “long era, perhaps spanning more than five centuries,” capitalism “co-existed with feudal and simple commodity relationships” in Europe. He argues that this period “simply cannot be treated as ‘transitional’ without reading back the present into the past.” [From **Urbanisation to Cities**, p. 179] In other words, capitalism was not an inevitable outcome of “history” or social evolution.

He goes on to note that capitalism existed “with growing significance in the mixed economy of the West from the fourteenth century up to the seventeenth” but that it “literally exploded into being in Europe, particularly England, during the eighteenth and especially nineteenth centuries.” [Op. Cit., p. 181] The question arises, what lay behind this “growing significance”? Did capitalism “explode” due to its inherently more efficient nature or were there other, non-economic, forces at work? As we will show, it was most definitely the later one — capitalism was born not from economic forces but from the political actions of the social elites which its usury enriched. Unlike artisan (simple commodity) production, wage labour generates inequalities and wealth for the few and so will be selected, protected and encouraged by those who control the state in their own economic and social interests.

The development of capitalism in Europe was favoured by two social elites, the rising capitalist class within the degenerating medieval cities and the absolutist state. The medieval city was “thoroughly changed by the gradual increase in the power of commercial capital, due primarily to foreign trade. . . By this the inner unity of the commune was loosened, giving place to a growing caste system and leading necessarily to a progressive inequality of social interests. The privileged minorities pressed ever more definitely towards a centralisation of the political forces of the community. . . Mercantilism in the perishing city republics led logically to a demand for larger economic units [i.e. to nationalise the market]; and by this the desire for stronger political forms was greatly strengthened. . . Thus the city gradually became a small state, paving the way for the coming national state.” [Rudolf Rocker, **Nationalism and Culture**, p. 94]

The rising economic power of the proto-capitalists conflicted with that of the feudal lords, which meant that the former required help to consolidate their position. That aid came in the form of the monarchical state. With the force of absolutism behind it, capital could start the process of increasing its power and influence by expanding the “market” through state action.

As far as the absolutist state was concerned, it “was dependent upon the help of these new economic forces, and vice versa. . .” “The absolutist state,” Rocker argues, “whose coffers the expansion of commerce filled . . . , at first furthered the plans of commercial capital. Its armies and fleets . . . contributed to the expansion of industrial production because they demanded a number of things for whose large-scale production the shops of small tradesmen were no longer adapted. Thus gradually arose the so-called manufactures, the forerunners of

the later large industries.” [Op. Cit., p. 117–8]

Some of the most important state actions from the standpoint of early industry were the so-called Enclosure Acts, by which the “commons” — the free farmland shared communally by the peasants in most rural villages — was “enclosed” or incorporated into the estates of various landlords as private property (see section 8.3). This ensured a pool of landless workers who had no option but to sell their labour to capitalists. Indeed, the widespread independence caused by the possession of the majority of households of land caused the rising class of merchants to complain “*that men who should work as wage-labourers cling to the soil, and in the naughtiness of their hearts prefer independence as squatters to employment by a master.*” [R.H Tawney, cited by Allan Elgar in **The Apostles of Greed**, p. 12]

In addition, other forms of state aid ensured that capitalist firms got a head start, so ensuring their dominance over other forms of work (such as co-operatives). A major way of creating a pool of resources that could be used for investment was the use of mercantilist policies which used protectionist measures to enrich capitalists and landlords at the expense of consumers and their workers. For example, one of most common complaints of early capitalists was that workers could not turn up to work regularly. Once they had worked a few days, they disappeared as they had earned enough money to live on. With higher prices for food, caused by protectionist measures, workers had to work longer and harder and so became accustomed to factory labour. In addition, mercantilism allowed native industry to develop by barring foreign competition and so allowed industrialists to reap excess profits which they could then use to increase their investments. In the words of Marian-socialist economic historian Maurice Dobbs:

“In short, the Mercantile System was a system of State-regulated exploitation through trade which played a highly important rule in the adolescence of capitalist industry: it was essentially the economic policy of an age of primitive accumulation.” [**Studies in Capitalism Development**, p. 209]

As Rocker summarises, “*when absolutism had victoriously overcome all opposition to national unification, but its furthering of mercantilism and economic monopoly it gave the whole social evolution a direction which could only lead to capitalism.*” [Op. Cit., pp. 116–7]

This process of state aid in capitalist development was also seen in the United States of America. As Edward Herman points out, the “*level of government involvement in business in the United States from the late eighteenth century to the present has followed a U-shaped pattern: There was extensive government intervention in the pre-Civil War period (major subsidies, joint ventures with active government participation and direct government production), then a quasi-laissez faire period between the Civil War and the end of the nineteenth century [a period marked by “the aggressive use of tariff protection” and state supported railway construction, a key factor in capitalist expansion in the USA], followed by a gradual upswing of government intervention in the twentieth century, which accelerated after 1930.*” [**Corporate Control, Corporate Power**, p. 162]

Such intervention ensured that income was transferred from workers to capitalists. Under state protection, America industrialised by forcing the consumer

to enrich the capitalists and increase their capital stock. “According to one study, of the tariff had been removed in the 1830s ‘about half the industrial sector of New England would have been bankrupted’ . . . the tariff became a near-permanent political institution representing government assistance to manufacturing. It kept price levels from being driven down by foreign competition and thereby shifted the distribution of income in favour of owners of industrial property to the disadvantage of workers and customers.” [Richard B. Du Boff, **Accumulation and Power**, p. 56]

This protection was essential, for as Du Boff notes, the “end of the European wars in 1814 . . . reopened the United States to a flood of British imports that drove many American competitors out of business. Large portions of the newly expanded manufacturing base were wiped out, bringing a decade of near-stagnation.” Unsurprisingly, the “era of protectionism began in 1816, with northern agitation for higher tariffs. . . .” [**Op. Cit.**, p. 14, p. 55]

Combined with ready repression of the labour movement and government “homesteading” acts (see section 8.5), tariffs were the American equivalent of mercantilism (which, after all, was above all else a policy of protectionism, i.e. the use of government to stimulate the growth of native industry). Only once America was at the top of the economic pile did it renounce state intervention (just as Britain did, we must note).

This is **not** to suggest that government aid was limited to tariffs. The state played a key role in the development of industry and manufacturing. As John Zerzan notes, the “role of the State is tellingly reflected by the fact that the ‘armoury system’ now rivals the older ‘American system of manufactures’ term as the more accurate to describe the new system of production methods” developed in the early 1800s. [**Elements of Refusal**, p. 100] Moreover, the “lead in technological innovation [during the US Industrial Revolution] came in armaments where assured government orders justified high fixed-cost investments in special-purview machinery and managerial personnel. Indeed, some of the pioneering effects occurred in government-owned armouries.” [William Lazonick, **Competitive Advantage on the Shop Floor**, p. 218] The government also “actively furthered this process [of “commercial revolution”] with public works in transportation and communication.” [Richard B. Du Boff, **Op. Cit.**, p. 15]

In addition to this “physical” aid, “state government provided critical help, with devices like the chartered corporation” [**Ibid.**] and, as we noted in section B.2.5, changes in the legal system which favoured capitalist interests over the rest of society.

Interestingly, there was increasing inequality between 1840 and 1860 in the USA This coincided with the victory of wage labour and industrial capitalism — the 1820s “constituted a watershed in U.S. life. By the end of that decade . . . industrialism assured its decisive American victory, by the end of the 1830s all of its cardinal features were definitely present.” [John Zerzan, **Op. Cit.**, p. 99] This is unsurprising, for as we have argued many times, the capitalist market tends to increase, not reduce, inequalities between individuals and classes. Little wonder the Individualist Anarchists at the time denounced the way that property had been transformed into “a power [with which] to accumulate an income” (to use the words of J.K. Ingalls).

Over all, as Paul Ormerod puts it, the “advice to follow pure free-market polices seems . . . to be contrary to the lessons of virtually the whole of economic history since the Industrial Revolution . . . every country which has moved into

...strong sustained growth ...has done so in outright violation of pure, free-market principles.” “The model of entrepreneurial activity in the product market, with judicious state support plus repression in the labour market, seems to be a good model of economic development.” [The Death of Economics, p. 63]

Thus the social forces at work creating capitalism was a combination of capitalist activity and state action. But without the support of the state, it is doubtful that capitalist activity would have been enough to generate the initial accumulation required to start the economic ball rolling. Hence the necessity of Mercantilism in Europe and its modified cousin of state aid, tariffs and “home-stead acts” in America.

8.2 What was the social context of the statement “laissez-faire?”

The honeymoon of interests between the early capitalists and autocratic kings did not last long. “This selfsame monarchy, which for weighty reasons sought to further the aims of commercial capital and was... itself aided in its development by capital, grew at last into a crippling obstacle to any further development of European industry.” [Rudolf Rocker, **Nationalism and Culture**, p. 117]

This is the social context of the expression “laissez-faire” — a system which has outgrown the supports that protected it in its early stages of growth. Just as children eventually rebel against the protection and rules of their parents, so the capitalists rebelled against the over-bearing support of the absolutist state. Mercantilist policies favoured some industries and harmed the growth of industrial capitalism in others. The rules and regulations imposed upon those it did favour reduced the flexibility of capitalists to changing environments. As Rocker argues, “no matter how the absolutist state strove, in its own interest, to meety the demands of commerce, it still put on industry countless fetters which became gradually more and more oppressive ... [it] became an unbearable burden ... which paralysed all economic and social life.” [Op. Cit., p. 119] All in all, mercantilism became more of a hindrance than a help and so had to be replaced. With the growth of economic and social power by the capitalist class, this replacement was made easier.

Errico Malatesta notes, “[t]he development of production, the vast expansion of commerce, the immeasurable power assumed by money ... have guaranteed this supremacy [of economic power over the political power] to the capitalist class which, no longer content with enjoying the support of the government, demanded that government arise from its own ranks. A government which owed its origin to the right of conquest ... though subject by existing circumstances to the capitalist class, went on maintaining a proud and contemptuous attitude towards its now wealthy former slaves, and had pretensions to independence of domination. That government was indeed the defender, the property owners’ gendarme, but the kind of gendarmes who think they are somebody, and behave in an arrogant manner towards the people they have to escort and defend, when they don’t rob or kill them at the next street corner; and the capitalist class got rid of it ... [and replaced it] by a government [and state] ... at all times under its control and specifically organised to defend that class against any possible demands by the disinherited.” [Anarchy, pp. 19–20]

Malatesta here indicates the true meaning of “leave us alone,” or “laissez-faire.” The **absolutist** state (not “the state” per se) began to interfere with

capitalists' profit-making activities and authority, so they determined that it had to go — as happened, for example, in the English, French and American revolutions. However, in other ways, state intervention in society was encouraged and applauded by capitalists. “*It is ironic that the main protagonists of the State, in its political and administrative authority, were the middle-class Utilitarians, on the other side of whose Statist banner were inscribed the doctrines of economic Laissez Faire*” [E.P. Thompson, **The Making of the English Working Class**, p. 90]. Capitalists simply wanted **capitalist** states to replace monarchical states, so that heads of government would follow state economic policies regarded by capitalists as beneficial to their class as a whole. And as development economist Lance Taylor argues:

“In the long run, there are no laissez-faire transitions to modern economic growth. The state has always intervened to create a capitalist class, and then it has to regulate the capitalist class, and then the state has to worry about being taken over by the capitalist class, but the state has always been there.” [quoted by Noam Chomsky, **Year 501**, p. 104]

In order to attack mercantilism, the early capitalists had to ignore the successful impact of its policies in developing industry and a “store of wealth” for future economic activity. As William Lazonick points out, “*the political purpose of [Adam Smith’s] the **Wealth of Nations** was to attack the mercantilist institutions that the British economy had built up over the previous two hundred years. . . . In his attack on these institutions, Smith might have asked why the extent of the world market available to Britain in the late eighteenth century was **so uniquely under British control**. If Smith had asked this ‘big question,’ he might have been forced to grant credit for [it] . . . to the very mercantilist institutions he was attacking . . .*” Moreover, he “*might have recognised the integral relation between economic and political power in the rise of Britain to international dominance.*” Overall, “[w]hat the British advocates of laissez-faire neglected to talk about was the role that a system of national power had played in creating conditions for Britain to embark on its dynamic development path . . . They did not bother to ask how Britain had attained th[e] position [of ‘workshop of the world’], while they conveniently ignored the on going system of national power — the British Empire — that . . . continued to support Britain’s position.” [**Business Organisation and the Myth of the Market Economy**, p. 2, p. 3, p.5]

Similar comments are applicable to American supporters of laissez faire who fail to notice that the “traditional” American support for world-wide free trade is quite a recent phenomenon. It started only at the end of the Second World War (although, of course, **within** America military Keynesian policies were utilised). While American industry was developing, the country had no time for laissez-faire. After it had grown strong, the United States began preaching laissez-faire to the rest of the world — and began to kid itself about its own history, believing its slogans about laissez-faire as the secret of its success. In addition to the tariff, nineteenth-century America went in heavily for industrial planning — occasionally under that name but more often in the name of national defence. The military was the excuse for what is today termed rebuilding infrastructure, picking winners, promoting research, and co-ordinating industrial growth (as it still is, we should add).

As Richard B. Du Boff points out, the “anti-state” backlash of the 1840s onwards in America was highly selective, as the general opinion was that “[h]enceforth, if governments wished to subsidise private business operations, there would be no objection. But if public power were to be used to control business actions or if the public sector were to undertake economic initiatives on its own, it would run up against the determined opposition of private capital.” [**Accumulation and Power**, p. 26] In other words, the state could aid capitalists indirectly (via tariffs, land policy, repression of the labour movement, infrastructure subsidy and so on) and it would “leave them alone” to oppress and exploit workers, exploit consumers, build their industrial empires and so forth.

So, the expression “laissez-faire” dates from the period when capitalists were objecting to the restrictions that helped create them in the first place. It has little to do with freedom as such and far more to do with the needs of capitalist power and profits (as Murray Bookchin argues, it is an error to depict this “revolutionary era and its democratic aspirations as ‘bourgeois,’ an imagery that makes capitalism a system more committed to freedom, or even ordinary civil liberties, than it was historically” [**From Urbanisation to Cities**, p. 180f]). Takis Fotopoulos, in his essay “*The Nation-state and the Market*”, indicates that the social forces at work in “freeing” the market did not represent a “natural” evolution towards freedom:

“Contrary to what liberals and Marxists assert, marketisation of the economy was not just an evolutionary process, following the expansion of trade under mercantilism . . . modern [i.e. capitalist] markets did not evolve out of local markets and/or markets for foreign goods . . . the nation-state, which was just emerging at the end of the Middle Ages, played a crucial role creating the conditions for the ‘nationalisation’ of the market . . . and . . . by freeing the market [i.e. the rich and proto-capitalists] from effective social control.” [**Society and Nature**, Vol. 3, pp. 44–45]

The “freeing” of the market thus means freeing those who “own” most of the market (i.e. the wealthy elite) from “effective social control,” but the rest of society was not as lucky. Peter Kropotkin makes a similar point in **Modern Science and Anarchism**, “[w]hile giving the capitalist any degree of free scope to amass his wealth at the expense of the helpless labourers, the government has *nowhere* and *never*. . . afforded the labourers the opportunity ‘to do as they pleased.’” [**Kropotkin’s Revolutionary Pamphlets**, p. 182]

The one essential form of support the “Libertarian” right wants the state (or “defence” firms) to provide capitalism is the enforcement of property rights — the right of property owners to “do as they like” on their own property, which can have obvious and extensive social impacts. What “libertarian” capitalists object to is attempts by others — workers, society as a whole, the state, etc. — to interfere with the authority of bosses. That this is just the defence of privilege and power (and **not** freedom) has been discussed in section B and elsewhere in section F, so we will not repeat ourselves here.

Samuel Johnson once observed that “we hear the loudest *yelps* for liberty among the drivers of Negroes.” Our modern “libertarian” capitalist drivers of wage-slaves are yelping for exactly the same kind of “liberty.” [Johnson quoted in Noam Chomsky, **Year 501**, p. 141]

8.3 What other forms did state intervention in creating capitalism take?

Beyond being a paymaster for new forms of production and social relations and defending the owners' power, the state intervened economically in other ways as well. As we noted in section B.2.5, the state played a key role in transforming the law codes of society in a capitalistic fashion, ignoring custom and common law to do so. Similarly, the use of tariffs and the granting of monopolies to companies played an important role in accumulating capital at the expense of working people, as did the breaking of unions and strikes by force.

However, one of the most blatant of these acts was the enclosure of common land. In Britain, by means of the Enclosure Acts, land that had been freely used by poor peasants for farming their small family plots was claimed by large landlords as private property. As E.P. Thompson notes, "*Parliament and law imposed capitalist definitions to exclusive property in land*" [**Customs in Common**, p. 163]. Property rights, which exclusively favoured the rich, replaced the use rights and free agreement that had governed peasant's use of the commons. Unlike use rights, which rest in the individual, property rights require state intervention to create and maintain.

This stealing of the land should not be under estimated. Without land, you cannot live and have to sell your liberty to others. This places those with capital at an advantage, which will tend to increase, rather than decrease, the inequalities in society (and so place the landless workers at an increasing disadvantage over time). This process can be seen from early stages of capitalism. With the enclosure of the land, an agricultural workforce was created which had to travel where the work was. This influx of landless ex-peasants into the towns ensured that the traditional guild system crumbled and was transformed into capitalistic industry with bosses and wage slaves rather than master craftsmen and their journeymen. Hence the enclosure of land played a key role, for "*it is clear that economic inequalities are unlikely to create a division of society into an employing master class and a subject wage-earning class, unless access to the mans of production, including land, is by some means or another barred to a substantial section of the community.*" [Maurice Dobbs, **Studies in Capitalist Development**, p. 253]

The importance of access to land is summarised by this limerick by the followers of Henry George (a 19th century writer who argued for a "*single tax*" and the nationalisation of land). The Georgites got their basic argument on the importance of land down these few, excellent lines:

*A college economist planned
To live without access to land
He would have succeeded
But found that he needed
Food, shelter and somewhere to stand.*

Thus the Individualist (and other) anarchists' concern over the "*land monopoly*" of which the Enclosure Acts were but one part. The land monopoly, to use Tucker's words, "*consists in the enforcement by government of land titles which do not rest upon personal occupancy and cultivation.*" [**The Anarchist Reader**, p. 150] It is important to remember that wage labour first developed on the land and it was the protection of land titles of landlords and nobility, combined with enclosure, that meant people could not just work their own land.

In other words, the circumstances so created by enclosing the land and enforcing property rights to large estates ensured that capitalists did not have to point a gun at workers head to get them to work long hours in authoritarian, dehumanising conditions. In such circumstances, when the majority are dispossessed and face the threat of starvation, poverty, homelessness and so on, “initiation of force” is **not required**. But guns **were** required to enforce the system of private property that created the labour market in the first place, to enforce the enclosure of common land and protect the estates of the nobility and wealthy.

In addition to increasing the availability of land on the market, the enclosures also had the effect of destroying working-class independence. Through these Acts, innumerable peasants were excluded from access to their former means of livelihood, forcing them to migrate to the cities to seek work in the newly emerging factories of the budding capitalist class, who were thus provided with a ready source of cheap labour. The capitalists, of course, did not describe the results this way, but attempted to obfuscate the issue with their usual rhetoric about civilisation and progress. Thus John Bellers, a 17th-century supporter of enclosures, claimed that commons were “*a hindrance to Industry, and . . . Nurseries of Idleness and Insolence.*” The “*forests and great Commons make the Poor that are upon them too much like the **indians.***” [quoted by Thompson, **Op. Cit.**, p. 163] Elsewhere Thompson argues that the commons “*were now seen as a dangerous centre of indiscipline . . . Ideology was added to self-interest. It became a matter of public-spirited policy for gentlemen to remove cottagers from the commons, reduce his labourers to dependence . . .*” [**The Making of the English Working Class**, pp. 242-3]

The commons gave working-class people a degree of independence which allowed them to be “insolent” to their betters. This had to be stopped, as it undermined to the very roots of authority relationships within society. The commons **increased** freedom for ordinary people and made them less willing to follow orders and accept wage labour. The reference to “Indians” is important, as the independence and freedom of Native Americans is well documented. The common feature of both cultures was communal ownership of the means of production and free access to it (usufruct). This is discussed further in section I.7 (Won’t Libertarian Socialism destroy individuality?)

As the early American economist Edward Wakefield noted in 1833, “*where land is cheap and all are free, where every one who so pleases can easily obtain a piece of land for himself, not only is labour dear, as respects the labourer’s share of the product, but the difficulty is to obtain combined labour at any price.*” [**England and America**, quoted by Jeremy Brecher and Tim Costello, **Commonsense for Hard Times**, p. 24]

The enclosure of the commons (in whatever form it took — see section 8.5 for the US equivalent) solved both problems — the high cost of labour, and the freedom and dignity of the worker. The enclosures perfectly illustrate the principle that capitalism requires a state to ensure that the majority of people do not have free access to any means of livelihood and so must sell themselves to capitalists in order to survive. There is no doubt that if the state had “left alone” the European peasantry, allowing them to continue their collective farming practices (“collective farming” because, as Kropotkin shows in **Mutual Aid**, the peasants not only shared the land but much of the farm labour as well), capitalism could not have taken hold (see **Mutual Aid**, pp. 184–

189, for more on the European enclosures). As Kropotkin notes, “[i]nstances of commoners themselves dividing their lands were rare, everywhere the State coerced them to enforce the division, or simply favoured the private appropriation of their lands” by the nobles and wealthy. [**Mutual Aid**, p. 188]

Thus Kropotkin’s statement that “to speak of the natural death of the village community [or the commons] in virtue of economical law is as grim a joke as to speak of the natural death of soldiers slaughtered on a battlefield.” [**Op. Cit.**, p. 189]

Like the more recent case of fascist Chile, “free market” capitalism was imposed on the majority of society by an elite using the authoritarian state. This was recognised by Adam Smith when he opposed state intervention in **The Wealth of Nations**. In Smith’s day, the government was openly and unashamedly an instrument of wealth owners. Less than 10 per cent of British men (and no women) had the right to vote. When Smith opposed state interference, he was opposing the imposition of wealth owners’ interests on everybody else (and, of course, how “liberal”, nevermind “libertarian”, is a political system in which the many follow the rules and laws set-down in the so-called interests of all by the few? As history shows, any minority given, or who take, such power **will** abuse it in their own interests). Today, the situation is reversed, with neo-liberals and right libertarians opposing state interference in the economy (e.g. regulation of Big Business) so as to prevent the public from having even a minor impact on the power or interests of the elite.

The fact that “free market” capitalism always requires introduction by an authoritarian state should make all honest “Libertarians” ask: How “free” is the “free market”? And why, when it is introduced, do the rich get richer and the poor poorer? This was the case in Chile (see Section C.11). For the poverty associated with the rise of capitalism in England 200 years ago, E.P. Thompson’s **The Making of the English Working Class** provides a detailed discussion. Howard Zinn’s **A People’s History of the United States** describes the poverty associated with 19th-century US capitalism.

8.4 Aren’t the enclosures a socialist myth?

The short answer is no, they are not. While a lot of historical analysis has been spent in trying to deny the extent and impact of the enclosures, the simple fact is (in the words of noted historian E.P. Thompson) enclosure “*was a plain enough case of class robbery, played according to the fair rules of property and law laid down by a parliament of property-owners and lawyers.*” [**The Making of the English Working Class**, pp. 237–8]

The enclosures were one of the ways that the “*land monopoly*” was created. The land monopoly was used to refer to capitalist property rights and ownership of land by (among others) the Individualist Anarchists. Instead of an “*occupancy and use*” regime advocated by anarchists, the land monopoly allowed a few to bar the many from the land — so creating a class of people with nothing to sell but their labour. While this monopoly is less important these days in developed nations (few people know how to farm) it was essential as a means of consolidating capitalism. Given the choice, most people preferred to become independent farmers rather than wage workers (see next section).

However, the importance of the enclosure movement is downplayed by supporters of capitalism. Little wonder, for it is something of an embarrassment

for them to acknowledge that the creation of capitalism was somewhat less than “immaculate” — after all, capitalism is portrayed as an almost ideal society of freedom. To find out that an idol has feet of clay and that we are still living with the impact of its origins is something pro-capitalists must deny. So **is** the enclosures a socialist myth? Most claims that it is flow from the work of the historian J.D. Chambers’ famous essay “*Enclosures and the Labour Supply in the Industrial Revolution.*” [**Economic History Review**, 2nd series, no. 5, August 1953] In this essay, Chambers attempts to refute Karl Marx’s account of the enclosures and the role it played in what Marx called “*primitive accumulation.*”

We cannot be expected to provide an extensive account of the debate that has raged over this issue. All we can do is provide a summary of the work of William Lazonick who presented an excellent reply to those who claim that the enclosures were an unimportant historical event. We are drawing upon his summary of his excellent essay “*Karl Marx and Enclosures in England*” [**Review of Radical Political Economy**, no. 6, Summer, 1974] which can be found in his books **Competitive Advantage on the Shop Floor** and **Business Organisation and the Myth of the Market Economy**. There are three main claims against the socialist account of the enclosures. We will cover each in turn.

Firstly, it is often claimed that the enclosures drove the uprooted cottager and small peasant into industry. However, this was never claimed. It is correct that the agricultural revolution associated with the enclosures **increased** the demand for farm labour as claimed by Chambers and others. And this is the whole point — enclosures created a pool of dispossessed labourers who had to sell their time/liberty to survive. The “*critical transformation was not the level of agricultural employment before and after enclosure but the changes in employment relations caused by the reorganisation of landholdings and the reallocation of access to land.*” [**Competitive Advantage on the Shop Floor**, p. 30] Thus the key feature of the enclosures was that it created a supply for farm labour, a supply that had no choice but to work for another. This would drive down wages and increase demand. Moreover, freed from the land, these workers could later move to the towns in search for better work.

Secondly, it is argued that the number of small farm owners increased, or at least did not greatly decline, and so the enclosure movement was unimportant. Again, this misses the point. Small farm owners can still employ wage workers (i.e. become capitalist farmers as opposed to “yeomen” — independent peasant proprietor). As Lazonick notes, “[i]t is true that after 1750 some petty proprietors continued to occupy and work their own land. But in a world of capitalist agriculture, the yeomanry no longer played an important role in determining the course of capitalist agriculture. As a social class that could influence the evolution of British economy society, the yeomanry had disappeared.” [**Op. Cit.**, p. 32]

Thirdly, it is often claimed that it was population growth, rather than enclosures, that caused the supply of wage workers. So was population growth more important than enclosures? Maurice Dobbs argues that “*the centuries in which a proletariat was most rapidly recruited were apt to be those of slow rather than of rapid natural increase of population, and the paucity or plenitude of a labour reserve in different countries was not correlated with comparable difference in their rates of population-growth.*” [**Studies in Capitalist Development**, p.

223] Moreover, the population argument ignores the question of whether the changes in society caused by enclosures and the rise of capitalism have an impact on the observed trends towards earlier marriage and larger families after 1750. Lazonick argues that “[t]here is reason to believe that they did.” [Op. Cit., p. 33] Also, of course, the use of child labour in the factories created an economic incentive to have more children, an incentive created by the developing capitalist system. Overall, Lazonick notes that “[t]o argue that population growth created the industrial labour supply is to ignore these momentous social transformations” associated with the rise of capitalism [Business Organisation and the Myth of the Market Economy, p. 273].

In other words, there is good reason to think that the enclosures, far from being some kind of socialist myth, in fact played a key role in the development of capitalism. As Lazonick himself notes, “Chambers misunderstood” “the argument concerning the ‘institutional creation’ of a proletarianised (i.e. landless) workforce. Indeed, Chamber’s own evidence and logic tend to support the Marxian [and anarchist!] argument, when it is properly understood.” [Op. Cit., p. 273]

8.5 What about the lack of enclosures in the Americas?

The enclosure movement was but one way of creating the “land monopoly” which ensured the creation of a working class. The circumstances facing the ruling class in the Americas were distinctly different than in the Old World and so the “land monopoly” took a different form there. In the Americas, enclosures were unimportant as customary land rights did not really exist. Here the problem was that (after the original users of the land were eliminated, of course) there were vast tracts of land available for people to use.

Unsurprisingly, there was a movement towards independent farming and this pushed up the price of labour, by reducing the supply. Capitalists found it difficult to find workers willing to work for them at wages low enough to provide them with sufficient profits. It was due the difficulty in finding cheap enough labour that capitalists in America turned to slavery. All things being equal, wage labour is more productive than slavery. But in early America all things were **not** equal. Having access to cheap (indeed, free) land meant that working people had a choice, and few desired to become wage slaves. Because of this, capitalists turned to slavery in the South and the “land monopoly” in the North and West.

This was because, in the words of Maurice Dobbs, it “became clear to those who wished to reproduce capitalist relations of production in the new country that the foundation-stone of their endeavour must be the restriction of land-ownership to a minority and the exclusion of the majority from any share in [productive] property.” [Studies in Capitalist Development, pp. 221–2] As one radical historian puts it, “[w]hen land is ‘free’ or ‘cheap’ as it was in different regions of the United States before the 1830s, there was no compulsion for farmers to introduce labour-saving technology. As a result, ‘independent household production’ . . . hindered the development of capitalism . . . [by] allowing large portions of the population to escape wage labour.” [Charlie Post, “The ‘Agricultural Revolution’ in the United States”, pp. 216–228, Science and Society, vol. 61, no. 2, p. 221]

It was precisely this option (i.e. of independent production) that had to be

destroyed in order for capitalist industry to develop. The state had to violate the holy laws of “supply and demand” by controlling the access to land in order to ensure the normal workings of “supply and demand” in the labour market (i.e. that the bargaining position on the labour market favoured employer over employee). Once this situation became the typical one (i.e. when the option of self-employment was effectively eliminated) a (protectionist based) “laissez-faire” approach could be adopted and state action used only to protect private property from the actions of the dispossessed.

So how was this transformation of land ownership achieved?

Instead of allowing settlers to appropriate their own farms as was the case before the 1830s, the state stepped in once the army had cleared out the original users. Its first major role was to enforce legal rights of property on unused land. Land stolen from the Native Americans was sold at auction to the highest bidders, namely speculators, who then sold it on to farmers. This process started right “*after the revolution, [when] huge sections of land were bought up by rich speculators*” and their claims supported by the law [Howard Zinn, **A People’s History of the United States**, p. 125] Thus land which should have been free was sold to land-hungry farmers and the few enriched themselves at the expense of the many. Not only did this increase inequality within society, it also encouraged the development of wage labour — having to pay for land would have ensured that many immigrants remained on the East Coast until they had enough money. Thus a pool of people with little option but to sell their labour was increased due to state protection of unoccupied land. That the land usually ended up in the hands of farmers did not (could not) countermand the shift in class forces that this policy created.

This was also the essential role of the various “Homesteading Acts” and, in general, the “*Federal land law in the 19th century provided for the sale of most of the public domain at public auction to the higher bidder . . . Actual settlers were forced to buy land from speculators, at prices considerably above the federal minimal price*” (which few people could afford anyway) [Charlie Post, **Op. Cit.**, p. 222]. Little wonder the Individualist Anarchists supported an “*occupancy and use*” system of land ownership as a key way of stopping capitalist and landlord usury as well as the development of capitalism itself.

This change in the appropriation of land had significant effects on agriculture and the desirability of taking up farming for immigrants. As Post notes, “*[w]hen the social conditions for obtaining and maintaining possession of land change, as they did in the midwest between 1830 and 1840, pursuing the goal of preserving [family ownership and control] . . . produced very different results. In order to pay growing mortgages, debts and taxes, family farmers were compelled to specialise production toward cash crops and to market more and more of their output.*” [**Op. Cit.**, p. 221–2]

So, in order to pay for land which was formerly free, farmers got themselves into debt and increasingly turned to the market to pay it off. Thus, the “*Federal land system, by transforming land into a commodity and stimulating land speculation, made the midwestern farmers dependent upon markets for the continual possession of their farms.*” [Charlie Post, **Op. Cit.**, p. 223] Once on the market, farmers had to invest in new machinery and this also got them into debt. In the face of a bad harvest or market glut, they could not repay their loans and their farms had to be sold to do so. By 1880, 25% of all farms were rented by tenants, and the numbers kept rising.

This means that Murray Rothbard's comment that "*once the land was purchased by the settler, the injustice disappeared*" is nonsense — the injustice was transmitted to other parts of society and this, along with the legacy of the original injustice, lived on and helped transform society towards capitalism [**The Ethics of Liberty**, p. 73]. In addition, his comments about "*the establishment in North America of a truly libertarian land system*" would be one the Individualist Anarchists would have seriously disagreed with! [**Ibid.**]

Thus state action, in restricting free access to the land, ensured that workers were dependent on wage labour. In addition, the "*transformation of social property relations in northern agriculture set the stage for the 'agricultural revolution' of the 1840s and 1850s . . . [R]ising debts and taxes forced midwestern family farmers to compete as commodity producers in order to maintain their land-holding . . . The transformation . . . was the central precondition for the development of industrial capitalism in the United States.*" [Charlie Post, **Ibid.**, p. 226]

In addition to seizing the land and distributing it in such a way as to benefit capitalist industry, the "*government played its part in helping the bankers and hurting the farmers; it kept the amount of money — based in the gold supply — steady while the population rose, so there was less and less money in circulation. The farmer had to pay off his debts in dollars that were harder to get. The bankers, getting loans back, were getting dollars worth more than when they loaned them out — a kind of interest on top of interest. That was why . . . farmers' movements [like the Individualist Anarchists, we must add] . . . [talked about] putting more money in circulation.*" [Howard Zinn, **Op. Cit.**, p. 278]

Overall, therefore, state action ensured the transformation of America from a society of independent workers to a capitalist one. By creating and enforcing the "land monopoly" (of which state ownership of unoccupied land and its enforcement of landlord rights were the most important) the state ensured that the balance of class forces tipped in favour of the capitalist class. By removing the option of farming your own land, the US government created its own form of enclosure and the creation of a landless workforce with little option but to sell its liberty on the "free market". This, combined with protectionism, ensured the transformation of American society from a pre-capitalist one into a capitalist one. They was nothing "natural" about it.

Little wonder the Individualist Anarchist J.K. Ingalls attacked the "land monopoly" in the following words:

"The earth, with its vast resources of mineral wealth, its spontaneous productions and its fertile soil, the free gift of God and the common patrimony of mankind, has for long centuries been held in the grasp of one set of oppressors by right of conquest or right of discovery; and it is now held by another, through the right of purchase from them. All of man's natural possessions . . . have been claimed as property; nor has man himself escaped the insatiate jaws of greed. The invasion of his rights and possessions has resulted . . . in clothing property with a power to accumulate an income." [quoted by James Martin, **Men Against the State**, p. 142]

8.6 How did working people view the rise of capitalism?

The best example of how hated capitalism was can be seen by the rise and spread of the socialist movement, in all its many forms, across the world. It is no coincidence that the development of capitalism also saw the rise of socialist theories. However, in order to fully understand how different capitalism was from previous economic systems, we will consider early capitalism in the US, which for many “Libertarians” is **the** example of the “capitalism-equals-freedom” argument.

Early America was pervaded by artisan production — individual ownership of the means of production. Unlike capitalism, this system is **not** marked by the separation of the worker from the means of life. Most people did not have to work for another, and so did not. As Jeremy Brecher notes, in 1831 the “*great majority of Americans were farmers working their own land, primarily for their own needs. Most of the rest were self-employed artisans, merchants, traders, and professionals. Other classes — employees and industrialists in the North, slaves and planters in the South — were relatively small. The great majority of Americans were independent and free from anybody’s command.*” [Strike!, p. xxi] These conditions created the high cost of combined (wage) labour which ensured the practice of slavery existed.

However, toward the middle of the 19th century the economy began to change. Capitalism began to be imported into American society as the infrastructure was improved, which allowed markets for manufactured goods to grow. Soon, due to (state-supported) capitalist competition, artisan production was replaced by wage labour. Thus “evolved” modern capitalism. Many workers understood, resented, and opposed their increasing subjugation to their employers (“*the masters*”, to use Adam Smith’s expression), which could not be reconciled with the principles of freedom and economic independence that had marked American life and sunk deeply into mass consciousness during the days of the early economy. In 1854, for example, a group of skilled piano makers wrote that “*the day is far distant when they [wage earners] will so far forget what is due to manhood as to glory in a system forced upon them by their necessity and in opposition to their feelings of independence and self-respect. May the piano trade be spared such exhibitions of the degrading power of the day [wage] system.*” [quoted by Brecher and Costello, **Common Sense for Hard Times**, p. 26]

Clearly the working class did not consider working for a daily wage, in contrast to working for themselves and selling their own product, to be a step forward for liberty or individual dignity. The difference between selling the product of one’s labour and selling one’s labour (i.e. oneself) was seen and condemned (“*[w]hen the producer . . . sold his product, he retained himself. But when he came to sell his labour, he sold himself . . . the extension [of wage labour] to the skilled worker was regarded by him as a symbol of a deeper change*” [Norman Ware, **The Industrial Worker, 1840–1860**, p. xiv]). Indeed, one group of workers argued that they were “*slaves in the strictest sense of the word*” as they had “*to toil from the rising of the sun to the going down of the same for our masters — aye, masters, and for our daily bread*” [Quoted by Ware, **Op. Cit.**, p. 42] and another argued that “*the factory system contains in itself the elements of slavery, we think no sound reasoning can deny, and everyday continues to add power to its incorporate sovereignty, while the sovereignty of the working people decreases in the same degree.*” [quoted by Brecher and Costello,

Op. Cit., p. 29]

Almost as soon as there were wage workers, there were strikes, machine breaking, riots, unions and many other forms of resistance. John Zerzan's argument that there was a "*relentless assault on the worker's historical rights to free time, self-education, craftsmanship, and play was at the heart of the rise of the factory system*" is extremely accurate [**Elements of Refusal**, p. 105]. And it was an assault that workers resisted with all their might. In response to being subjected to the "law of value," workers rebelled and tried to organise themselves to fight the powers that be and to replace the system with a co-operative one. As the printer's union argued, "[we] regard such an organisation [a union] not only as an agent of immediate relief, but also as an essential to the ultimate destruction of those unnatural relations at present subsisting between the interests of the employing and the employed classes. . . [W]hen labour determines to sell itself no longer to speculators, but to become its own employer, to own and enjoy itself and the fruit thereof, the necessity for scales of prices will have passed away and labour will be forever rescued from the control of the capitalist." [quoted by Brecher and Costello, **Op. Cit.**, pp. 27–28]

Little wonder, then, why wage labourers considered capitalism as a form of "slavery" and why the term "*wage slavery*" became so popular in the anarchist movement. It was just reflecting the feelings of those who experienced the wages system at first hand and joined the socialist and anarchist movements. As labour historian Norman Ware notes, the "*term 'wage slave' had a much better standing in the forties [of the 19th century] than it has today. It was not then regarded as an empty shibboleth of the soap-box orator. This would suggest that it has suffered only the normal degradation of language, has become a cliché, not that it is a grossly misleading characterisation.*" [**Op. Cit.**, p. xvf]

These responses of workers to the experience of wage labour is important to show that capitalism is by no means "natural." The fact is the first generation of workers tried to avoid wage labour is at all possible as they hated the restrictions of freedom it imposed upon them. They were perfectly aware that wage labour was wage slavery — that they were decidedly **unfree** during working hours and subjected to the will of another. While many working people now are accustomed to wage labour (while often hating their job) the actual process of resistance to the development of capitalism indicates well its inherently authoritarian nature. Only once other options were closed off and capitalists given an edge in the "free" market by state action did people accept and become accustomed to wage labour.

Opposition to wage labour and factory fascism was/is widespread and seems to occur wherever it is encountered. "*Research has shown*", summarises William Lazonick, "*that the 'free-born Englishman' of the eighteenth century — even those who, by force of circumstance, had to submit to agricultural wage labour — tenaciously resisted entry into the capitalist workshop.*" [**Business Organisation and the Myth of the Market Economy**, p. 37] British workers shared the dislike of wage labour of their American cousins. A "*Member of the Builders' Union*" in the 1830s argued that the trade unions "*will not only strike for less work, and more wages, but will ultimately abolish wages, become their own masters and work for each other; labour and capital will no longer be separate but will be indissolubly joined together in the hands of workmen and work-women.*" [quoted by Geoffrey Ostergaard, **The Tradition of Workers'**

Control, p. 133] This is unsurprising, for as Ostergaard notes, “*the workers then, who had not been swallowed up whole by the industrial revolution, could make critical comparisons between the factory system and what preceded it.*” [Op. Cit., p. 134] While wage slavery may seem “natural” today, the first generation of wage labourers saw the transformation of the social relationships they experienced in work, from a situation in which they controlled their own work (and so themselves) to one in which **others** controlled them, and they did not like it. However, while many modern workers instinctively hate wage labour and having bosses, without the awareness of some other method of working, many put up with it as “inevitable.” The first generation of wage labourers had the awareness of something else (although, of course, a flawed something else) and this gave them a deep insight into the nature of capitalism and produced a deeply radical response to it and its authoritarian structures.

Far from being a “natural” development, then, capitalism was imposed on a society of free and independent people by state action. Those workers alive at the time viewed it as “*unnatural relations*” and organised to overcome it. These feelings and hopes still exist, and will continue to exist until such time as we organise and “*abolish the wage system*” (to quote the IWW preamble) and the state that supports it.

8.7 Why is the history of capitalism important?

Simply because it provides us with an understanding of whether that system is “natural” and whether it can be considered as just and free. If the system was created by violence, state action and other unjust means then the apparent “freedom” which we currently face within it is a fraud, a fraud masking unnecessary and harmful relations of domination, oppression and exploitation. Moreover, by seeing how capitalist relationships were viewed by the first generation of wage slaves reminds us that just because many people have adjusted to this regime and consider it as normal (or even natural) it is nothing of the kind.

Murray Rothbard is well aware of the importance of history. He considered the “*moral indignation*” of socialism arises from the argument “*that the capitalists have stolen the rightful property of the workers, and therefore that existing titles to accumulated capital are unjust.*” He argues that given “*this hypothesis, the remainder of the impetus for both Marxism and anarchosyndicalism follow quote logically.*” [**The Ethics of Liberty**, p. 52]

So some right-libertarians are aware that the current property owners have benefited extensively from violence and state action in the past. Murray Rothbard argues (in **The Ethics of Liberty**, p. 57) that if the just owners cannot be found for a property, then the property simply becomes again unowned and will belong to the first person to appropriate and utilise it. If the current owners are not the actual criminals then there is no reason at all to dispossess them of their property; if the just owners cannot be found then they may keep the property as the first people to use it (of course, those who own capital and those who use it are usually different people, but we will ignore this obvious point).

Thus, since all original owners and the originally dispossessed are long dead nearly all current title owners are in just possession of their property except for recently stolen property. The principle is simple, dispossess the criminals, restore property to the dispossessed if they can be found otherwise leave titles

where they are (as Native American tribes owned the land **collectively** this could have an interesting effect on such a policy in the USA. Obviously tribes that were wiped out need not apply, but would such right-libertarian policy recognise such collective, non-capitalist ownership claims? We doubt it, but we could be wrong — the Libertarian Party Manifesto states that their “just” property rights will be restored. And who defines “just”? And given that unclaimed federal land will be given to Native Americans, it seems pretty likely that the **original** land will be left alone).

Of course, that this instantly gives an advantage to the wealthy on the new “pure” market is not mentioned. The large corporations that, via state protection and support, built their empires and industrial base will still be in an excellent position to continue to dominate the market. Wealthy land owners, benefiting from the effects of state taxation and rents caused by the “land monopoly” on farmstead failures, will keep their property. The rich will have a great initial advantage and this may be more than enough to maintain them in their place. After all, exchanges between worker and owner tend to reinforce existing inequalities, **not** reduce them (and as the owners can move their capital elsewhere or import new, lower waged, workers from across the world, it's likely to stay that way).

So Rothbard's “solution” to the problem of past force seems to be (essentially) a justification of existing property titles and not a serious attempt to understand or correct past initiations of force that have shaped society into a capitalist one and still shape it today. The end result of his theory is to leave things pretty much as they are, for the past criminals are dead and so are their victims.

However, what Rothbard fails to note is that the **results** of this state action and coercion are still with us. He totally fails to consider that the theft of productive wealth has a greater impact on society than the theft itself. The theft of **productive** wealth shapes society in so many ways that **all** suffer from it (including current generations). This (the externalities generated by theft) cannot be easily undone by individualistic “solutions”.

Let us take an example somewhat more useful than the one Rothbard uses (namely, a stolen watch). A watch cannot really be used to generate wealth (although if I steal a watch, sell it and buy a winning lottery ticket, does that mean I can keep the prize after returning the money value of your watch to you? Without the initial theft, I would not have won the prize but obviously the prize money far exceeds the amount stolen. Is the prize money mine?). Let us take a tool of production rather than a watch.

Let us assume a ship sinks and 50 people get washed ashore on an island. One woman has foresight to take a knife from the ship and falls unconscious on the beach. A man comes along and steals her knife. When the woman awakes she cannot remember if she had managed to bring the knife ashore with her or not. The man maintains that he brought it with him and no one else saw anything. The survivors decide to split the island equally between them and work it separately, exchanging goods via barter.

However, the man with the knife has the advantage and soon carves himself a house and fields from the wilderness. Seeing that they need the knife and the tools created by the knife to go beyond mere existing, some of the other survivors hire themselves to the knife owner. Soon he is running a surplus of goods, including houses and equipment which he decides to hire out to others.

This surplus is then used to tempt more and more of the other islanders to work for him, exchanging their land in return for the goods he provides. Soon he owns the whole island and never has to work again. His hut is well stocked and extremely luxurious. His workers face the option of following his orders or being fired (i.e. expelled from the island and so back into the water and certain death). Later, he dies and leaves his knife to his son. The woman whose knife it originally was had died long before, childless.

Note that the theft did not involve taking any land. All had equal access to it. It was the initial theft of the knife which provided the man with market power, an edge which allowed him to offer the others a choice between working by themselves or working for him. By working for him they did “benefit” in terms of increased material wealth (and also made the thief better off) but the accumulative impact of unequal exchanges turned them into the effective slaves of the thief.

Now, would it **really** be enough to turn the knife over to the whoever happened to be using it once the theft was discovered (perhaps the thief made a death-bed confession). Even if the woman who had originally taken it from the ship been alive, would the return of the knife **really** make up for the years of work the survivors had put in enriching the thief or the “voluntary exchanges” which had resulted in the thief owning all the island? The equipment people use, the houses they live in and the food they eat are all the product of many hours of collective work. Does this mean that the transformation of nature which the knife allowed remain in the hands of the descendants of the thief or become the collective property of all? Would dividing it equally between all be fair? Not everyone worked equally hard to produce it. So we have a problem — the result of the initial theft is far greater than the theft considered in isolation due to the productive nature of what was stolen.

In other words, what Rothbard ignores in his attempt to undermine anarchist use of history is that when the property stolen is of a productive nature, the accumulative effect of its use is such as to affect all of society. Productive assets produce **new** property, **new** values, create a **new** balance of class forces, **new** income and wealth inequalities and so on. This is because of the **dynamic** nature of production and human life. When the theft is such that it creates accumulative effects after the initial act, it is hardly enough to say that it does not really matter any more. If a nobleman invests in a capitalist firm with the tribute he extracted from his peasants, then (once the firm starts doing well) sells the land to the peasants and uses that money to expand his capitalist holdings, does that **really** make everything all right? Does not the crime transmit with the cash? After all, the factory would not exist without the prior exploitation of the peasants.

In the case of actually existing capitalism, born as it was of extensive coercive acts, the resultant of these acts have come to shape the **whole** society. For example, the theft of common land (plus the enforcement of property rights — the land monopoly — to vast estates owned by the aristocracy) ensured that working people had no option to sell their labour to the capitalists (rural or urban). The terms of these contracts reflected the weak position of the workers and so capitalists extracted surplus value from workers and used it to consolidate their market position and economic power. Similarly, the effect of mercantilist policies (and protectionism) was to enrich the capitalists at the expense of workers and allow them to build industrial empires.

The accumulative effect of these acts of violation of a “free” market was to create a class society wherein most people “consent” to be wage slaves and enrich the few. While those who suffered the impositions are long gone and the results of the specific acts have multiplied and magnified well beyond their initial form. And we are still living with them. In other words, the initial acts of coercion have been transmitted and transformed by collective activity (wage labour) into society-wide affects.

Rothbard argues in the situation where the descendants (or others) of those who initially tilled the soil and their aggressors (“*or those who purchased their claims*”) still extract “tribute from the modern tillers” that this is a case of “*continuing aggression against the true owners*”. This means that “*the land titles should be transferred to the peasants, without compensation to the monopoly landlords.*” [Op. Cit., p. 65] But what he fails to note is that the extracted “tribute” could have been used to invest in industry and transform society. Why ignore what the “tribute” has been used for? Does stolen property not remain stolen property after it has been transferred to another? And if the stolen property is used to create a society in which one class has to sell their liberty to another, then surely any surplus coming from those exchanges are also stolen (as it was generated directly and indirectly by the theft).

Yes, anarchist agree with Rothbard — peasants should take the land they use but which is owned by another. But this logic can equally be applied to capitalism. Workers are still living with the effects of past initiations of force and capitalists still extract “tribute” from workers due to the unequal bargaining powers within the labour market that this has created. The labour market, after all, was created by state action (directly or indirectly) and is maintained by state action (to protect property rights and new initiations of force by working people). The accumulative effects of stealing productive resources as been to increase the economic power of one class compared to another. As the victims of these past abuses are long gone and attempts to find their descendants meaningless (because of the generalised effects the thefts in question), anarchists feel we are justified in demanding the “*expropriation of the expropriators*”.

Due to Rothbard’s failure to understand the dynamic and generalising effects that result from the theft of productive resources (i.e. externalities that occur from coercion of one person against a specific set of others) and the creation of a labour market, his attempt to refute anarchist analysis of the history of “actually existing capitalism” also fails. Society is the product of collective activity and should belong to us all (although whether and how we divide it up is another question).

9 Is Medieval Iceland an example of “anarcho”-capitalism working in practice?

Ironically, medieval Iceland is a good example of why “anarcho”-capitalism will **not** work, degenerating into de facto rule by the rich. It should be pointed out first that Iceland, nearly 1,000 years ago, was not a capitalistic system. In fact, like most cultures claimed by “anarcho”-capitalists as examples of their “utopia,” it was a communal, not individualistic, society, based on artisan production, with extensive communal institutions as well as individual “ownership”

(i.e. use) and a form of social self-administration, the **thing** — both local and Iceland-wide — which can be considered a “primitive” form of the anarchist communal assembly.

As William Ian Miller points out “[p]eople of a communitarian nature. . . have reason to be attracted [to Medieval Iceland]. . . the limited role of lordship, the active participation of large numbers of free people . . . in decision making within and without the homestead. The economy barely knew the existence of markets. Social relations preceded economic relations. The nexus of household, kin, Thing, even enmity, more than the nexus of cash, bound people to each other. The lack of extensive economic differentiation supported a weakly differentiated class system . . . [and material] deprivations were more evenly distributed than they would be once state institutions also had to be maintained.” [Bloodtaking and Peacemaking: Feud, Law and Society in Saga Iceland, p. 306]

At this time Iceland “remained entirely rural. There were no towns, not even villages, and early Iceland participated only marginally in the active trade of Viking Age Scandinavia.” There was a “diminished level of stratification, which emerged from the first phase of social and economic development, lent an appearance of egalitarianism — social stratification was restrained and political hierarchy limited.” [Jesse Byock, **Viking Age Iceland**, p. 2] That such a society could be classed as “capitalist” or even considered a model for an advanced industrial society is staggering.

Kropotkin in **Mutual Aid** indicates that Norse society, from which the settlers in Iceland came, had various “mutual aid” institutions, including communal land ownership (based around what he called the “village community”) and the **thing** (see also Kropotkin’s **The State: Its Historic Role** for a discussion of the “village community”). It is reasonable to think that the first settlers in Iceland would have brought such institutions with them and Iceland did indeed have its equivalent of the commune or “village community,” the **Hreppar**, which developed early in the country’s history. Like the early local assemblies, it is not much discussed in the Sagas but is mentioned in the law book, the Grágás, and was composed of a minimum of twenty farms and had a five member commission. The Hreppar was self-governing and, among other things, was responsible for seeing that orphans and the poor within the area were fed and housed. The Hreppar also served as a property insurance agency and assisted in case of fire and losses due to diseased livestock.

In addition, as in most pre-capitalist societies, there were “commons”, common land available for use by all. During the summer, “common lands and pastures in the highlands, often called **almennning**, were used by the region’s farmers for grazing.” This increased the independence of the population from the wealthy as these “public lands offered opportunities for enterprising individuals to increase their store of provisions and to find saleable merchandise.” [Jesse Byock, **Op. Cit.**, p. 47 and p. 48]

Thus Icelandic society had a network of solidarity, based upon communal life:

*“The status of farmers as free agents was reinforced by the presence of communal units called **hreppar** (sing. **hreppr**) . . . these [were] geographically defined associations of landowners. . . the **hreppr** were self-governing . . . [and] guided by a five-member steering committee . . . As early as the 900s, the whole country seems to have been di-*

vided into *hreppar* . . . *Hreppar* provided a blanket of local security, allowing the landowning farmers a measure of independence to participate in the choices of political life . . .

“Through copoperation among their members, *hreppar* organised and controlled summer grazing lands, organised communal labour, and provided an immediate local forum for settling disputes. Crucially, they provided fire and livestock insurance for local farmers. . . [They also] saw to the feeding and housing of local orphans, and administered poor relief to people who were recognised as inhabitants of their area. People who could not provide for themselves were assigned to member farms, which took turns in providing for them.” [Byock, *Op. Cit.*, pp. 137–8]

In practice this meant that “each commune was a mutual insurance company, or a miniature welfare state. And membership in the commune was not voluntary. Each farmer had to belong to the commune in which his farm was located and to contribute to its needs.” [Gissurason quoted by Birgit T. Runolfsson Solvason, *Ordered Anarchy, State and Rent-Seeking: The Icelandic Commonwealth, 930–1262*] The Icelandic Commonwealth did not allow farmers **not** to join its communes and “[o]nce attached to the local *hreppr*, a farm’s affiliation could not be changed.” However, they did play a key role in keeping the society free as the *hreppr* “was essentially non-political and addressed subsistence and economic security needs. Its presence freed farmers from depending on an overclass to provide comparable services or corresponding security measures.” [Byock, *Op. Cit.*, p. 138]

Therefore, the Icelandic Commonwealth can hardly be claimed in any significant way as an example of “anarcho”-capitalism in practice. This can also be seen from the early economy, where prices were subject to popular judgement at the *skuldaping* (“payment-thing”) **not** supply and demand. [Kirsten Hastrup, *Culture and History in Medieval Iceland*, p. 125] Indeed, with its communal price setting system in local assemblies, the early Icelandic commonwealth was more similar to Guild Socialism (which was based upon guild’s negotiating “just prices” for goods and services) than capitalism. Therefore Miller correctly argues that it would be wrong to impose capitalist ideas and assumptions onto Icelandic society:

“Inevitably the attempt was made to add early Iceland to the number of regions that socialised people in nuclear families within simple households. . . what the sources tell us about the shape of Icelandic householding must compel a different conclusion.” [*Op. Cit.*, p. 112]

In other words, Kropotkin’s analysis of communal society is far closer to the reality of Medieval Iceland than “anarcho”-capitalist attempts to turn it into a some kind of capitalist utopia.

However, the communal nature of Icelandic society also co-existed (as in most such cultures) with hierarchical institutions, including some with capitalistic elements, namely private property and “private states” around the local *godar*. The *godar* were local chiefs who also took the role of religious leaders. As the *Encyclopaedia Britannica* explains, “a kind of local government was

evolved [in Iceland] by which the people of a district who had most dealings together formed groups under the leadership of the most important or influential man in the district" (the godi). The godi "acted as judge and mediator" and "took a lead in communal activities" such as building places of worship. These "local assemblies... are heard of before the establishment of the althing" (the national thing). This althing led to co-operation between the local assemblies.

Thus Icelandic society had different elements, one based on the local chiefs and communal organisations. Society was marked by inequalities as "[a]mong the landed there were differences in wealth and prominence. Distinct cleavages existed between landowners and landless people and between free men and slaves." This meant it was "marked by aspects of statelessness and egalitarianism as well as elements of social hierarchy... Although Iceland was not a democratic system, proto-democratic tendencies existed." [Byock, **Op. Cit.**, p. 64 and p. 65] The Icelandic social system was designed to reduce the power of the wealthy by enhancing communal institutions:

"The society... was based on a system of decentralised self-government... The Viking Age settlers began by establishing local things, or assemblies, which had been the major forum for meetings of freemen and aristocrats in the old Scandinavian and Germanic social order... They [the Icelanders] excluded overlords with coercive power and expended the mandate of the assembly to fill the full spectrum of the interests of the landed free farmers. The changes transformed a Scandinavian decision-making body that mediated between freemen and overlords into an Icelandic self-contained governmental system without overlords. At the core of Icelandic government was the Althing, a national assembly of freemen." [Byock, **Op. Cit.**, p. 75]

Therefore we see communal self-management in a basic form, **plus** co-operation between communities as well. These communistic, mutual-aid features exist in many non-capitalist cultures and are often essential for ensuring the people's continued freedom within those cultures (section B.2.5 on why the wealthy undermine these popular "folk-motes" in favour of centralisation). Usually, the existence of private property (and so inequality) soon led to the destruction of communal forms of self-management (with participation by all male members of the community as in Iceland), which are replaced by the rule of the rich.

While such developments are a commonplace in most "primitive" cultures, the Icelandic case has an unusual feature which explains the interest it provokes in "anarcho"-capitalist circles. This feature was that individuals could seek protection from any godi. As the **Encyclopaedia Britannica** puts it, "the extent of the godord [chieftancy] was not fixed by territorial boundaries. Those who were dissatisfied with their chief could attach themselves to another godi... As a result rivalry arose between the godar [chiefs]; as may be seen from the Icelandic Sagas." This was because, while there were "a central legislature and uniform, country-wide judicial and legal systems," people would seek the protection of any godi, providing payment in return. [Byock, **Op. Cit.**, p. 2] These godi, in effect, would be subject to "market forces," as dissatisfied individuals could affiliate themselves to other godi. This system, however, had an obvious (and fatal) flaw. As the **Encyclopaedia Britannica** points out:

“The position of the godi could be bought and sold, as well as inherited; consequently, with the passing of time, the godord for large areas of the country became concentrated in the hands of one man or a few men. This was the principal weakness of the old form of government: it led to a struggle of power and was the chief reason for the ending of the commonwealth and for the country’s submission to the King of Norway.”

It was the existence of these hierarchical elements in Icelandic society that explain its fall from anarchistic to statist society. As Kropotkin argued “*from chieftainship sprang on the one hand the State and on the other private property.*” [Act for Yourselves, p. 85] Kropotkin’s insight that chieftainship is a transitional system has been confirmed by anthropologists studying “primitive” societies. They have come to the conclusion that societies made up of chieftainships or chiefdoms are not states: “*Chiefdoms are neither stateless nor state societies in the fullest sense of either term: they are on the borderline between the two. Having emerged out of stateless systems, they give the impression of being on their way to centralised states and exhibit characteristics of both.*” [Y. Cohen quoted by Birgit T. Runolfsson Solvason, **Op. Cit.**] Since the Commonwealth was made up of chiefdoms, this explains the contradictory nature of the society — it was in the process of transition, from anarchy to statism, from a communal economy to one based on private property.

The **political** transition within Icelandic society went hand in hand with an **economic** transition (both tendencies being mutually reinforcing). Initially, when Iceland was settled, large-scale farming based on extended households with kinsmen was the dominant economic mode. This semi-communal mode of production changed as the land was divided up (mostly through inheritance claims) between the 10th and 11th centuries. This new economic system based upon individual **possession** and artisan production was then slowly displaced by tenant farming, in which the farmer worked for a landlord, starting in the late 11th century. This economic system (based on tenant farming, i.e. capitalistic production) ensured that “*great variants of property and power emerged.*” [Kirsten Hastrup, **Culture and History in Medieval Iceland**, pp. 172–173]

So significant changes in society started to occur in the eleventh century, as “*slavery all but ceased. Tenant farming . . . took [its] place.*” Iceland was moving from an economy based on **possession** to one based on **private property** and so “*the renting of land was a widely established practice by the late eleventh century . . . the status of the godar must have been connected with landownership and rents.*” This led to increasing oligarchy and so the mid- to late-twelfth century was “*characterised by the appearance of a new elite, the big chieftains who are called storgodar . . . [who] struggled from the 1220s to the 1260s to win what had earlier been unobtainable for Icelandic leaders, the prize of overlordship or centralised executive authority.*” [Byock, **Op. Cit.**, p. 269 and pp. 3–4]

During this evolution in ownership patterns and the concentration of wealth and power into the hands of a few, we should note that the godi’s and wealthy landowners’ attitude to profit making also changed, with market values starting to replace those associated with honour, kin, and so on. Social relations became replaced by economic relations and the nexus of household, kin and Thing was replaced by the nexus of cash and profit. The rise of capitalistic social relationships in production and values within society was also reflected

in exchange, with the local marketplace, with its pricing “*subject to popular judgement*” being “*subsumed under central markets.*” [Hastrup, **Op. Cit.**, p. 225]

With a form of wage labour (tenant farming) being dominant within society, it is not surprising that great differences in wealth started to appear. Also, as protection did not come free, it is not surprising that a godi tended to become rich also (in Kropotkin’s words, “*the individual accumulation of wealth and power*”). Powerful godi would be useful for wealthy landowners when disputes over land and rent appeared, and wealthy landowners would be useful for a godi looking for income. Concentrations of wealth, in other words, produce concentrations of social and political power (and vice versa) — “*power always follows wealth.*” [Kropotkin, **Mutual Aid**, p. 131]

The transformation of **possession** into **property** and the resulting rise of hired labour was a **key** element in the accumulation of wealth and power, and the corresponding decline in liberty among the farmers. Moreover, with hired labour springs dependency — the worker is now dependent on good relations with their landlord in order to have access to the land they need. With such reductions in the independence of part of Icelandic society, the undermining of self-management in the various Things was also likely as labourers could not vote freely as they could be subject to sanctions from their landlord for voting the “wrong” way (“*The courts were less likely to base judgements on the evidence than to adjust decisions to satisfy the honour and resources of powerful individuals.*” [Byock, **Op. Cit.**, p. 185]). . . Thus hierarchy within the economy would spread into the rest of society, and in particular its social institutions, reinforcing the effects of the accumulation of wealth and power.

The resulting classification of Icelandic society played a key role in its move from relative equality and anarchy to a class society and statism. As Millar points out:

“as long as the social organisation of the economy did not allow for people to maintain retinues, the basic egalitarian assumptions of the honour system. . . were reflected reasonably well in reality. . . the mentality of hierarchy never fully extricated itself from the egalitarian ethos of a frontier society created and recreated by juridically equal farmers. Much of the egalitarian ethic maintained itself even though it accorded less and less with economic realities. . . by the end of the commonwealth period certain assumptions about class privilege and expectations of deference were already well enough established to have become part of the lexicon of self-congratulation and self-justification.” [**Op. Cit.**, pp. 33–4]

This process in turn accelerated the destruction of communal life and the emergence of statism, focused around the godord. In effect, the godi and wealthy farmers became rulers of the country. Political changes simply reflected economic changes from a communalistic, anarchistic society to a statist, proprietarian one. Ironically, this process was a natural aspect of the system of competing chiefs recommended by “anarcho”-capitalists:

“In the twelfth and thirteenth centuries Icelandic society experienced changes in the balance of power. As part of the evolution to a more stratified social order, the number of chieftains diminished and the

power of the remaining leaders grew. By the thirteenth century six large families had come to monopolise the control and ownership of many of the original chieftaincies. [Byock, **Op. Cit.**, p. 341]

These families were called **storgodar** and they “gained control over whole regions.” This process was not imposed, as “the rise in social complexity was evolutionary rather than revolutionary . . . they simply moved up the ladder.” This political change reflected economic processes, for “[a]t the same time other social transformations were at work. In conjunction with the development of the **storgadar** elite, the most successful among the **baendr** [farmers] also moved up a rung on the social ladder, being ‘big farmers’ or **Storbaendr**” [Op. Cit., p. 342] Unsurprisingly, it was the rich farmers who initiated the final step towards normal statism and by the 1250s the **storbaendr** and their followers had grown weary of the **storgodar** and their quarrels. In the end they accepted the King of Norway’s offer to become part of his kingdom.

The obvious conclusion is that as long as Iceland was not capitalistic, it was anarchic and as it became more capitalistic, it became more statist.

This process, wherein the concentration of wealth leads to the destruction of communal life and so the anarchistic aspects of a given society, can be seen elsewhere, for example, in the history of the United States after the Revolution or in the degeneration of the free cities of Medieval Europe. Peter Kropotkin, in his classic work **Mutual Aid**, documents this process in some detail, in many cultures and time periods. However, that this process occurred in a society which is used by “anarcho”-capitalists as an example of their system in action reinforces the anarchist analysis of the statist nature of “anarcho”-capitalism and the deep flaws in its theory, as discussed in section 6.

As Miller argues, “[i]t is not the have-nots, after all, who invented the state. The first steps toward state formation in Iceland were made by churchmen. . . and by the big men content with imitating Norwegian royal style. Early state formation, I would guess, tended to involve redistributions, not from rich to poor, but from poor to rich, from weak to strong.” [Op. Cit., p. 306]

The “anarcho”-capitalist argument that Iceland was an example of their ideology working in practice is derived from the work of David Friedman. Friedman is less gun-ho than many of his followers, arguing in **The Machinery of Freedom**, that Iceland only had some features of an “anarcho”-capitalist society and these provide some evidence in support of his ideology. How a pre-capitalist society can provide any evidence to support an ideology aimed at an advanced industrial and urban economy is hard to say as the institutions of that society cannot be artificially separated from its social base. Ironically, though, it does present some evidence against “anarcho”-capitalism precisely because of the rise of capitalistic elements within it.

Friedman is aware of how the Icelandic Republic degenerated and its causes. He states in a footnote in his 1979 essay “*Private Creation and Enforcement of Law: A Historical Case*” that the “question of why the system eventually broke down is both interesting and difficult. I believe that two of the proximate causes were increased concentration of wealth, and hence power, and the introduction into Iceland of a foreign ideology — kingship. The former meant that in many areas all or most of the godord were held by one family and the latter that by the end of the Sturlung period the chieftains were no longer fighting over the traditional quarrels of who owed what to whom, but over who should eventually

rule Iceland. The ultimate reasons for those changes are beyond the scope of this paper.”

However, from an anarchist point of view, the “foreign” ideology of kingship would be the **product** of changing socio-economic conditions that were expressed in the increasing concentration of wealth and not its cause. After all, the settlers of Iceland were well aware of the “ideology” of kingship for the 300 years during which the Republic existed. As Byock notes, Iceland “*inherited the tradition and the vocabulary of statehood from its European origins . . . On the mainland, kings were enlarging their authority at the expense of the traditional rights of free farmers. The emigrants to Iceland were well aware of this process . . . available evidence does suggest that the early Icelanders knew quite well what they did not want. In particular they were collectively opposed to the centralising aspects of a state.*” [Op. Cit., p. 64-6] Unless some kind of collective and cultural amnesia occurred, the notion of a “foreign ideology” causing the degeneration is hard to accept. Moreover, only the concentration of wealth allowed would-be Kings the opportunity to develop and act and the creation of boss-worker social relationships on the land made the poor subject to, and familiar with, the concept of authority. Such familiarity would spread into all aspects of life and, combined with the existence of “prosperous” (and so powerful) godi to enforce the appropriate servile responses, ensured the end of the relative equality that fostered Iceland’s anarchistic tendencies in the first place.

In addition, as private property is a monopoly of rulership over a given area, the conflict between chieftains for power was, at its most basic, a conflict of who would **own** Iceland, and so rule it. The attempt to ignore the facts that private property creates rulership (i.e. a monopoly of government over a given area) and that monarchies are privately owned states does Friedman’s case no good. In other words, the system of private property has a built in tendency to produce both the ideology and fact of Kingship — the power structures implied by Kingship are reflected in the social relations which are produced by private property.

Friedman is also aware that an “*objection [to his system] is that the rich (or powerful) could commit crimes with impunity, since nobody would be able to enforce judgement against them. Where power is sufficiently concentrated this might be true; this was one of the problems which led to the eventual breakdown of the Icelandic legal system in the thirteenth century. But so long as power was reasonably dispersed, as it seem to have been for the first two centuries after the system was established, this was a less serious problem.*” [Op. Cit.]

Which is quite ironic. Firstly, because the first two centuries of Icelandic society was marked by **non-capitalist** economic relations (communal pricing and family/individual possession of land). Only when capitalistic social relationships developed (hired labour and property replacing possession and market values replacing social ones) in the 12th century did power become concentrated, leading to the breakdown of the system in the 13th century. Secondly, because Friedman is claiming that “anarcho”-capitalism will only work if there is an approximate equality within society! But this state of affairs is one most “anarcho”-capitalists claim is impossible and undesirable!

They claim there will **always** be rich and poor. But inequality in wealth will also become inequality of power. When “actually existing” capitalism has become more free market the rich have got richer and the poor poorer. Apparently, according to the “anarcho”-capitalists, in an even “purer” capitalism

this process will be reversed! It is ironic that an ideology that denounces egalitarianism as a revolt against nature implicitly requires an egalitarian society in order to work.

In reality, wealth concentration is a fact of life in **any** system based upon hierarchy and private property. Friedman is aware of the reasons why “anarcho”-capitalism will become rule by the rich but prefers to believe that “pure” capitalism will produce an egalitarian society! In the case of the commonwealth of Iceland this did not happen — the rise in private property was accompanied by a rise in inequality and this led to the breakdown of the Republic into statism.

In short, Medieval Iceland nicely illustrates David Weick’s comments (as quoted in section 6.3) that *“when private wealth is uncontrolled, then a police-judicial complex enjoying a clientele of wealthy corporations whose motto is self-interest is hardly an innocuous social force controllable by the possibility of forming or affiliating with competing ‘companies.’”* This is to say that “free market” justice soon results in rule by the rich, and being able to affiliate with “competing” “defence companies” is insufficient to stop or change that process.

This is simply because any defence-judicial system does not exist in a social vacuum. The concentration of wealth — a natural process under the “free market” (particularly one marked by private property and wage labour) — has an impact on the surrounding society. Private property, i.e. monopolisation of the means of production, allows the monopolists to become a ruling elite by exploiting, and so accumulating vastly more wealth than, the workers. This elite then uses its wealth to control the coercive mechanisms of society (military, police, “private security forces,” etc.), which it employs to protect its monopoly and thus its ability to accumulate ever more wealth and power. Thus, private property, far from increasing the freedom of the individual, has always been the necessary precondition for the rise of the state and rule by the rich. Medieval Iceland is a classic example of this process at work.

10 Would laissez-faire capitalism be stable?

Unsurprisingly, right-libertarians combine their support for “absolute property rights” with a whole-hearted support for laissez-faire capitalism. In such a system (which they maintain, to quote Ayn Rand, is an *“unknown ideal”*) everything would be private property and there would be few (if any) restrictions on “voluntary exchanges.” “Anarcho”-capitalists are the most extreme of defenders of pure capitalism, urging that the state itself be privatised and no voluntary exchange made illegal (for example, children would be considered the property of their parents and it would be morally right to turn them into child prostitutes — the child has the option of leaving home if they object).

As there have been no example of “pure” capitalism it is difficult to say whether their claims about are true (for a discussion of a close approximation see the section 10.3). This section of the FAQ is an attempt to discover whether such a system would be stable or whether it would be subject to the usual booms and slumps. Before starting we should note that there is some disagreement within the right-libertarian camp itself on this subject (although instead of stability they usually refer to “equilibrium” — which is an economics term meaning that all of a societies resources are fully utilised).

In general terms, most right-Libertarians’ reject the concept of equilibrium

as such and instead stress that the economy is inherently a dynamic (this is a key aspect of the Austrian school of economics). Such a position is correct, of course, as such noted socialists as Karl Marx and Michal Kalecki and capitalist economists as Keynes recognised long ago. There seems to be two main schools of thought on the nature of disequilibrium. One, inspired by von Mises, maintains that the actions of the entrepreneur/capitalist results in the market co-ordinating supply and demand and another, inspired by Joseph Schumpeter, who question whether markets co-ordinate because entrepreneurs are constantly innovating and creating new markets, products and techniques.

Of course both actions happen and we suspect that the differences in the two approaches are not important. The important thing to remember is that “anarcho”-capitalists and right-libertarians in general reject the notion of equilibrium — but when discussing their utopia they do not actually indicate this! For example, most “anarcho”-capitalists will maintain that the existence of government (and/or unions) causes unemployment by either stopping capitalists investing in new lines of industry or forcing up the price of labour above its market clearing level (by, perhaps, restricting immigration, minimum wages, taxing profits). Thus, we are assured, the worker will be better off in “pure” capitalism because of the unprecedented demand for labour it will create. However, full employment of labour is an equilibrium in economic terms and that, remember, is impossible due to the dynamic nature of the system. When pressed, they will usually admit there will be periods of unemployment as the market adjusts or that full unemployment actually means under a certain percentage of unemployment. Thus, if you (rightly) reject the notion of equilibrium you also reject the idea of full employment and so the labour market becomes a buyers market and labour is at a massive disadvantage.

The right-libertarian case is based upon logical deduction, and the premises required to show that laissez-faire will be stable are somewhat incredible. If banks do not set the wrong interest rate, if companies do not extend too much trade credit, if workers are willing to accept (real wage related) pay cuts, if workers altruistically do not abuse their market power in a fully employed society, if interest rates provide the correct information, if capitalists predict the future relatively well, if banks and companies do not suffer from isolation paradoxes, then, perhaps, laissez-faire will be stable.

So, will laissez-faire capitalism be stable? Let us see by analysing the assumptions of right-libertarianism — namely that there will be full employment and that a system of private banks will stop the business cycle. We will start on the banking system first (in section 10.1) followed by the effects of the labour market on economic stability (in section 10.2). Then we will indicate, using the example of 19th century America, that actually existing (“impure”) laissez-faire was very unstable.

Explaining booms and busts by state action plays an ideological convenience as it exonerates market processes as the source of instability within capitalism. We hope to indicate in the next two sections why the business cycle is inherent in the system (see also sections C.7, C.8 and C.9).

10.1 Would privatising banking make capitalism stable?

It is claimed that the existence of the state (or, for minimal statist, government policy) is the cause of the business cycle (recurring economic booms and slumps).

This is because the government either sets interest rates too low or expands the money supply (usually by easing credit restrictions and lending rates, sometimes by just printing fiat money). This artificially increases investment as capitalists take advantage of the artificially low interest rates. The real balance between savings and investment is broken, leading to over-investment, a drop in the rate of profit and so a slump (which is quite socialist in a way, as many socialists also see over-investment as the key to understanding the business cycle, although they obviously attribute the slump to different causes — namely the nature of capitalist production, not that the credit system does not play its part — see section C.7).

In the words of Austrian Economist W. Duncan Reekie, “[t]he business cycle is generated by monetary expansion and contraction . . . When new money is printed it appears as if the supply of savings has increased. Interest rates fall and businessmen are misled into borrowing additional funds to finance extra investment activity . . . This would be of no consequence if it had been the outcome of [genuine saving] . . . -but the change was government induced. The new money reaches factor owners in the form of wages, rent and interest . . . the factor owners will then spend the higher money incomes in their existing consumption: investment proportions . . . Capital goods industries will find their expansion has been in error and malinvestments have been incurred.” [Markets, Entrepreneurs and Liberty, pp. 68–9]

In other words, there has been “wasteful mis-investment due to government interference with the market.” [Op. Cit., p. 69] In response to this (negative) influence in the workings of the market, it is suggested by right-libertarians that a system of private banks should be used and that interest rates are set by them, via market forces. In this way an interest rate that matches the demand and supply for savings will be reached and the business cycle will be no more. By truly privatising the credit market, it is hoped by the business cycle will finally stop.

Unsurprisingly, this particular argument has its weak points and in this section of the FAQ we will try to show exactly why this theory is wrong.

Let us start with Reekie’s starting point. He states that the “main problem” of the slump is “why is there suddenly a ‘cluster’ of business errors? Businessmen and entrepreneurs are market experts (otherwise they would not survive) and why should they all make mistakes simultaneously?” [Op. Cit., p. 68] It is this “cluster” of mistakes that the Austrians’ take as evidence that the business cycle comes from outside the workings of the market (i.e. is exogenous in nature). Reekie argues that an “error cluster only occurs when all entrepreneurs have received the wrong signals on potential profitability, and all have received the signals simultaneously through government interference with the money supply.” [Op. Cit., p. 74] But is this **really** the case?

The simple fact is that groups of (rational) individuals can act in the same way based on the same information and this can lead to a collective problem. For example, we do not consider it irrational that everyone in a building leaves it when the fire alarm goes off and that the flow of people can cause hold-ups at exits. Neither do we think that it is unusual that traffic jams occur, after all those involved are all trying to get to work (i.e. they are reacting to the same desire). Now, is it so strange to think that capitalists who all see the same opportunity for profit in a specific market decide to invest in it? Or that the aggregate outcome of these individually rational decisions may be irrational (i.e.

cause a glut in the market)?

In other words, a “cluster” of business failures may come about because a group of capitalists, acting in isolation, over-invest in a given market. They react to the same information (namely super profits in market X), arrange loans, invest and produce commodities to meet demand in that market. However, the aggregate result of these individually rational actions is that the aggregate supply far exceeds demand, causing a slump in that market and, perhaps, business failures. The slump in this market (and the potential failure of some firms) has an impact on the companies that supplied them, the companies that are dependent on their employees wages/demand, the banks that supplied the credit and so forth. The accumulative impact of this slump (or failures) on the chain of financial commitments of which they are but one link can be large and, perhaps, push an economy into general depression. Thus the claim that it is something external to the system that causes depression is flawed.

It could be claimed the interest rate is the problem, that it does not accurately reflect the demand for investment or relate it to the supply of savings. But, as we argued in section C.8, it is not at all clear that the interest rate provides the necessary information to capitalists. They need investment information for their specific industry, but the interest rate is cross-industry. Thus capitalists in market X do not know if the investment in market X is increasing and so this lack of information can easily cause “mal-investment” as over-investment (and so over-production) occurs. As they have no way of knowing what the investment decisions of their competitors are or how these decisions will affect an already unknown future, capitalists may over-invest in certain markets and the net effects of this aggregate mistake can expand throughout the whole economy and cause a general slump. In other words, a cluster of business failures can be accounted for by the workings of the market itself and **not** the (existence of) government.

This is **one** possible reason for an internally generated business cycle but that is not the only one. Another is the role of class struggle which we discuss in the next section and yet another is the endogenous nature of the money supply itself. This account of money (proposed strongly by, among others, the post-Keynesian school) argues that the money supply is a function of the demand for credit, which itself is a function of the level of economic activity. In other words, the banking system creates as much money as people need and any attempt to control that creation will cause economic problems and, perhaps, crisis (interestingly, this analysis has strong parallels with mutualist and individualist anarchist theories on the causes of capitalist exploitation and the business cycle). Money, in other words, emerges from **within** the system and so the right-libertarian attempt to “blame the state” is simply wrong.

Thus what is termed “credit money” (created by banks) is an essential part of capitalism and would exist without a system of central banks. This is because money is created from within the system, in response to the needs of capitalists. In a word, money is endogenous and credit money an essential part of capitalism.

Right-libertarians do not agree. Reekie argues that “[o]nce fractional reserve banking is introduced, however, the supply of money substitutes will include fiduciary media. The ingenuity of bankers, other financial intermediaries and the endorsement and **guaranteeing of their activities by governments and central banks** has ensured that the quantity of fiat money is immense.” [Op. Cit., p. 73]

Therefore, what “anarcho”-capitalists and other right-libertarians seem to be actually complaining about when they argue that “state action” creates the business cycle by creating excess money is that the state **allows** bankers to meet the demand for credit by creating it. This makes sense, for the first fallacy of this sort of claim is how could the state **force** bankers to expand credit by loaning more money than they have savings. And this seems to be the normal case within capitalism — the central banks accommodate bankers activity, they do not force them to do it. Alan Holmes, a senior vice president at the New York Federal Reserve, stated that:

“In the real world, banks extend credit, creating deposits in the process, and look for the reserves later. The question then becomes one of whether and how the Federal Reserve will accommodate the demand for reserves. In the very short run, the Federal Reserve has little or no choice about accommodating that demand, over time, its influence can obviously be felt.” [quoted by Doug Henwood, **Wall Street**, p. 220]

(Although we must stress that central banks are **not** passive and do have many tools for affecting the supply of money. For example, central banks can operate “tight” money policies which can have significant impact on an economy and, via creating high enough interest rates, the demand for money.)

It could be argued that because central banks exist, the state creates an “environment” which bankers take advantage off. By not being subject to “free market” pressures, bankers could be tempted to make more loans than they would otherwise in a “pure” capitalist system (i.e. create credit money). The question arises, would “pure” capitalism generate sufficient market controls to stop banks loaning in excess of available savings (i.e. eliminate the creation of credit money/fiduciary media).

It is to this question we now turn.

As noted above, the demand for credit is generated from **within** the system and the comments by Holmes reinforce this. Capitalists seek credit in order to make money and banks create it precisely because they are also seeking profit. What right-libertarians actually object to is the government (via the central bank) **accommodating** this creation of credit. If only the banks could be forced to maintain a savings to loans ration of one, then the business cycle would stop. But is this likely? Could market forces ensure that bankers pursue such a policy? We think not — simply because the banks are profit making institutions. As post-Keynesianist Hyman Minsky argues, “[b]ecause bankers live in the same expectational climate as businessmen, profit-seeking bankers will find ways of accommodating their customers. . . . Banks and bankers are not passive managers of money to lend or to invest; they are in business to maximise profits. . . .” [quoted by L. Randall Wray, **Money and Credit in Capitalist Economies**, p. 85]

This is recognised by Reekie, in passing at least (he notes that “*fiduciary media could still exist if bankers offered them and clients accepted them*” [**Op. Cit.**, p. 73]). Bankers will tend to try and accommodate their customers and earn as much money as possible. Thus Charles P. Kindleberger comments that monetary expansion “*is systematic and endogenous rather than random and exogenous*” seem to fit far better the reality of capitalism than the Austrian and

right-libertarian viewpoint [**Manias, Panics, and Crashes**, p. 59] and post-Keynesian L. Randall Wray argues that “*the money supply . . . is more obviously endogenous in the monetary systems which predate the development of a central bank.*” [**Op. Cit.**, p. 150]

In other words, the money supply cannot be directly controlled by the central bank since it is determined by private decisions to enter into debt commitments to finance spending. Given that money is generated from **within** the system, can market forces ensure the non-expansion of credit (i.e. that the demand for loans equals the supply of savings)? To begin to answer this question we must note that investment is “*essentially determined by expected profitability.*” [Philip Arestis, **The Post-Keynesian Approach to Economics**, p. 103] This means that the actions of the banks cannot be taken in isolation from the rest of the economy. Money, credit and banks are an essential part of the capitalist system and they cannot be artificially isolated from the expectations, pressures and influences of that system.

Let us assume that the banks desire to maintain a loans to savings ratio of one and try to adjust their interest rates accordingly. Firstly, changes in the rate of interest “*produce only a very small, if any, movement in business investment*” according to empirical evidence [**Op. Cit.**, pp. 82–83] and that “*the demand for credit is extremely inelastic with respect to interest rates.*” [L. Randall Wray, **Op. Cit.**, p. 245] Thus, to keep the supply of savings in line with the demand for loans, interest rates would have to increase greatly (indeed, trying to control the money supply by controlling the monetary bases in this way will only lead to very big fluctuations in interest rates). And increasing interest rates has a couple of paradoxical effects.

According to economists Joseph Stiglitz and Andrew Weiss (in “*Credit Rationing in Markets with Imperfect Knowledge*”, **American Economic Review**, no. 71, pp. 393–410) interest rates are subject to what is called the “*lemons problem*” (asymmetrical information between buyer and seller). Stiglitz and Weiss applied the “lemons problem” to the credit market and argued (and unknowingly repeated Adam Smith) that at a given interest rate, lenders will earn lower return by lending to bad borrowers (because of defaults) than to good ones. If lenders try to increase interest rates to compensate for this risk, they may chase away good borrowers, who are unwilling to pay a higher rate, while perversely not chasing away incompetent, criminal, or malignantly optimistic borrowers. This means that an increase in interest rates may actually increase the possibilities of crisis, as more loans may end up in the hands of defaulters.

This gives banks a strong incentive to keep interest rates lower than they otherwise could be. Moreover, “*increases in interest rates make it more difficult for economic agents to meet their debt repayments*” [Philip Arestis, **Op. Cit.**, pp. 237–8] which means when interest rates **are** raised, defaults will increase and place pressures on the banking system. At high enough short-term interest rates, firms find it hard to pay their interest bills, which cause/increase cash flow problems and so “[s]harp increases in short term interest rates . . . leads to a fall in the present value of gross profits after taxes (quasi-rents) that capital assets are expected to earn.” [Hyman Minsky, **Post-Keynesian Economic Theory**, p. 45]

In addition, “*production of most investment goods is undertaken on order and requires time for completion. A rise in interest rates is not likely to cause firms to abandon projects in the process of production . . . This does not mean*

... that investment is completely unresponsive to interest rates. A large increase in interest rates causes a 'present value reversal', forcing the marginal efficiency of capital to fall below the interest rate. If the long term interest rate is also pushed above the marginal efficiency of capital, the project may be abandoned." [Wray, **Op. Cit.**, pp. 172–3] In other words, investment takes **time** and there is a lag between investment decisions and actual fixed capital investment. So if interest rates vary during this lag period, initially profitable investments may become white elephants.

As Michal Kalecki argued, the rate of interest must be lower than the rate of profit otherwise investment becomes pointless. The incentive for a firm to own and operate capital is dependent on the prospective rate of profit on that capital relative to the rate of interest at which the firm can borrow at. The higher the interest rate, the less promising investment becomes.

If investment is unresponsive to all but very high interest rates (as we indicated above), then a privatised banking system will be under intense pressure to keep rates low enough to maintain a boom (by, perhaps, creating credit above the amount available as savings). And if it does this, over-investment and crisis is the eventual outcome. If it does not do this and increases interest rates then consumption and investment will dry up as interest rates rise and the defaulters (honest and dishonest) increase and a crisis will eventually occur.

This is because increasing interest rates may increase savings **but** it also reduce consumption (*"high interest rates also deter both consumers and companies from spending, so that the domestic economy is weakened and unemployment rises"* [Paul Ormerod, **The Death of Economics**, p. 70]). This means that firms can face a drop off in demand, causing them problems and (perhaps) leading to a lack of profits, debt repayment problems and failure. An increase in interest rates also reduces demand for investment goods, which also can cause firms problems, increase unemployment and so on. So an increase in interest rates (particularly a sharp rise) could reduce consumption and investment (i.e. reduce aggregate demand) and have a ripple effect throughout the economy which could cause a slump to occur.

In other words, interest rates and the supply and demand of savings/loans they are meant to reflect may not necessarily move an economy towards equilibrium (if such a concept is useful). Indeed, the workings of a "pure" banking system without credit money may increase unemployment as demand falls in both investment and consumption in response to high interest rates and a general shortage of money due to lack of (credit) money resulting from the "tight" money regime implied by such a regime (i.e. the business cycle would still exist). This was the case of the failed Monetarist experiments on the early 1980s when central banks in America and Britain tried to pursue a "tight" money policy. The "tight" money policy did not, in fact, control the money supply. All it did do was increase interest rates and lead to a serious financial crisis and a deep recession (as Wray notes, *"the central bank uses tight money policies to raise interest rates"* [**Op. Cit.**, p. 262]). This recession, we must note, also broke the backbone of working class resistance and the unions in both countries due to the high levels of unemployment it generated. As intended, we are sure.

Such an outcome would not surprise anarchists, as this was a key feature of the Individualist and Mutualist Anarchists' arguments against the "money monopoly" associated with specie money. They argued that the "money monopoly" created a "tight" money regime which reduced the demand for labour by restrict-

ing money and credit and so allowed the exploitation of labour (i.e. encouraged wage labour) and stopped the development of non-capitalist forms of production. Thus Lysander Spooner's comments that workers need "*money capital to enable them to buy the raw materials upon which to bestow their labour, the implements and machinery with which to labour . . . Unless they get this capital, they must all either work at a disadvantage, or not work at all. A very large portion of them, to save themselves from starvation, have no alternative but to sell their labour to others . . .*" [A Letter to Grover Cleveland, p. 39] It is interesting to note that workers **did** do well during the 1950s and 1960s under a "liberal" money regime than they did under the "tighter" regimes of the 1980s and 1990s.

We should also note that an extended period of boom will encourage banks to make loans more freely. According to Minsky's "*financial instability model*" crisis (see "*The Financial Instability Hypothesis*" in **Post-Keynesian Economic Theory** for example) is essentially caused by risky financial practices during periods of financial tranquillity. In other words, "*stability is destabilising.*" In a period of boom, banks are happy and the increased profits from companies are flowing into their vaults. Over time, bankers note that they can use a reserve system to increase their income and, due to the general upward swing of the economy, consider it safe to do so (and given that they are in competition with other banks, they may provide loans simply because they are afraid of losing customers to more flexible competitors). This increases the instability within the system (as firms increase their debts due to the flexibility of the banks) and produces the possibility of crisis if interest rates are increased (because the ability of business to fulfil their financial commitments embedded in debts deteriorates).

Even if we assume that interest rates **do** work as predicted in theory, it is false to maintain that there is one interest rate. This is not the case. "*Concentration of capital leads to unequal access to investment funds, which obstructs further the possibility of smooth transitions in industrial activity. Because of their past record of profitability, large enterprises have higher credit ratings and easier access to credit facilities, and they are able to put up larger collateral for a loan.*" [Michael A. Bernstein, **The Great Depression**, p. 106] As we noted in section C.5.1, the larger the firm, the lower the interest rate they have to pay. Thus banks routinely lower their interest rates to their best clients even though the future is uncertain and past performance cannot and does not indicate future returns. Therefore it seems a bit strange to maintain that the interest rate will bring savings and loans into line if there are different rates being offered.

And, of course, private banks cannot affect the underlying fundamentals that drive the economy — like productivity, working class power and political stability — any more than central banks (although central banks can influence the speed and gentleness of adjustment to a crisis).

Indeed, given a period of full employment a system of private banks may actually speed up the coming of a slump. As we argue in the next section, full employment results in a profits squeeze as firms face a tight labour market (which drives up costs) and, therefore, increased workers' power at the point of production and in their power of exit. In a central bank system, capitalists can pass on these increasing costs to consumers and so maintain their profit margins for longer. This option is restricted in a private banking system as banks would be less inclined to devalue their money. This means that firms

will face a profits squeeze sooner rather than later, which will cause a slump as firms cannot make ends meet. As Reekie notes, inflation “*can temporarily reduce employment by postponing the time when misdirected labour will be laid off*” but as Austrian’s (like Monetarists) think “*inflation is a monetary phenomenon*” he does not understand the real causes of inflation and what they imply for a “pure” capitalist system [Op. Cit., p. 67, p. 74]. As Paul Ormerod points out “*the claim that inflation is always and everywhere purely caused by increases in the money supply, and that there the rate of inflation bears a stable, predictable relationship to increases in the money supply is ridiculous.*” And he notes that “[i]ncreases in the rate of inflation tend to be linked to falls in unemployment, and vice versa” which indicates its real causes — namely in the balance of class power and in the class struggle. [The Death of Economics, p. 96, p. 131]

Moreover, if we do take the Austrian theory of the business cycle at face value we are drawn to conclusion that in order to finance investment savings must be increased. But to maintain or increase the stock of loanable savings, inequality must be increased. This is because, unsurprisingly, rich people save a larger proportion of their income than poor people and the proportion of profits saved are higher than the proportion of wages. But increasing inequality (as we argued in section 3.1) makes a mockery of right-libertarian claims that their system is based on freedom or justice.

This means that the preferred banking system of “anarcho”-capitalism implies increasing, not decreasing, inequality within society. Moreover, most firms (as we indicated in section C.5.1) fund their investments with their own savings which would make it hard for banks to loan these savings out as they could be withdrawn at any time. This could have serious implications for the economy, as banks refuse to fund new investment simply because of the uncertainty they face when accessing if their available savings can be loaned to others (after all, they can hardly loan out the savings of a customer who is likely to demand them at any time). And by refusing to fund new investment, a boom could falter and turn to slump as firms do not find the necessary orders to keep going.

So, would market forces create “sound banking”? The answer is probably not. The pressures on banks to make profits come into conflict with the need to maintain their savings to loans ration (and so the confidence of their customers). As Wray argues, “*as banks are profit seeking firms, they find ways to increase their liabilities which don’t entail increases in reserve requirements*” and “[i]f banks share the profit expectations of prospective borrowers, they can create credit to allow [projects/investments] to proceed.” [Op. Cit., p. 295, p. 283] This can be seen from the historical record. As Kindleberger notes, “*the market will create new forms of money in periods of boom to get around the limit*” imposed on the money supply [Op. Cit., p. 63]. Trade credit is one way, for example. Under the Monetarist experiments of 1980s, there was “*deregulation and central bank constraints raised interest rates and created a moral hazard — banks made increasingly risky loans to cover rising costs of issuing liabilities. Rising competition from nonbanks and tight money policy forced banks to lower standards and increase rates of growth in an attempt to ‘grow their way to profitability’*” [Op. Cit., p. 293]

Thus credit money (“fiduciary media”) is an attempt to overcome the scarcity of money within capitalism, particularly the scarcity of specie money. The pressures that banks face within “actually existing” capitalism would still be faced under “pure” capitalism. It is likely (as Reekie acknowledges) that credit money

would still be created in response to the demands of business people (although not at the same level as is currently the case, we imagine). The banks, seeking profits themselves and in competition for customers, would be caught between maintaining the value of their business (i.e. their money) and the needs to maximise profits. As a boom develops, banks would be tempted to introduce credit money to maintain it as increasing the interest rate would be difficult and potentially dangerous (for reasons we noted above). Thus, if credit money is not forthcoming (i.e. the banks stick to the Austrian claims that loans must equal savings) then the rise in interest rates required will generate a slump. If it is forthcoming, then the danger of over-investment becomes increasingly likely. All in all, the business cycle is part of capitalism and **not** caused by “external” factors like the existence of government.

As Reekie notes, to Austrians “*ignorance of the future is endemic*” [Op. Cit., p. 117] but you would be forgiven for thinking that this is not the case when it comes to investment. An individual firm cannot know whether its investment project will generate the stream of returns necessary to meet the stream of payment commitments undertaken to finance the project. And neither can the banks who fund those projects. Even **if** a bank does not get tempted into providing credit money in excess of savings, it cannot predict whether other banks will do the same or whether the projects it funds will be successful. Firms, looking for credit, may turn to more flexible competitors (who practice reserve banking to some degree) and the inflexible bank may see its market share and profits decrease. After all, commercial banks “*typically establish relations with customers to reduce the uncertainty involved in making loans. Once a bank has entered into a relationship with a customer, it has strong incentives to meet the demands of that customer.*” [Wray, Op. Cit., p. 85]

There are example of fully privatised banks. For example, in the United States (“*which was without a central bank after 1837*”) “*the major banks in New York were in a bind between their roles as profit seekers, which made them contributors to the instability of credit, and as possessors of country deposits against whose instability they had to guard.*” [Kindleberger, Op. Cit., p. 85]

In Scotland, the banks were unregulated between 1772 and 1845 but “*the leading commercial banks accumulated the notes of lesser ones, as the Second Bank of the United States did contemporaneously in [the USA], ready to convert them to specie if they thought they were getting out of line. They served, that is, as an informal controller of the money supply. For the rest, as so often, historical evidence runs against strong theory, as demonstrated by the country banks in England from 1745 to 1835, wildcat banking in Michigan in the 1830s, and the latest experience with bank deregulation in Latin America.*” [Op. Cit., p. 82] And we should note there were a few banking “wars” during the period of deregulation in Scotland which forced a few of the smaller banks to fail as the bigger ones refused their money and that there was a major bank failure in the Ayr Bank.

Kindleberger argues that central banking “*arose to impose control on the instability of credit*” and did not cause the instability which right-libertarians maintain it does. And as we note in section 10.3, the USA suffered massive economic instability during its period without central banking. Thus, **if** credit money **is** the cause of the business cycle, it is likely that a “pure” capitalism will still suffer from it just as much as “actually existing” capitalism (either due to high interest rates or over-investment).

In general, as the failed Monetarist experiments of the 1980s prove, trying to control the money supply is impossible. The demand for money is dependent on the needs of the economy and any attempt to control it will fail (and cause a deep depression, usually via high interest rates). The business cycle, therefore, is an endogenous phenomenon caused by the normal functioning of the capitalist economic system. Austrian and right-libertarian claims that “*slump flows boom, but for a totally unnecessary reason: government inspired mal-investment*” [Reekie, **Op. Cit.**, p. 74] are simply wrong. Over-investment **does** occur, but it is **not** “*inspired*” by the government. It is “*inspired*” by the banks need to make profits from loans and from businesses need for investment funds which the banks accommodate. In other words, by the nature of the capitalist system.

10.2 How does the labour market effect capitalism?

In many ways, the labour market is the one that affects capitalism the most. The right-libertarian assumption (like that of mainstream economics) is that markets clear and, therefore, the labour market will also clear. As this assumption has rarely been proven to be true in actuality (i.e. periods of full employment within capitalism are few and far between), this leaves its supporters with a problem — reality contradicts the theory.

The theory predicts full employment but reality shows that this is not the case. Since we are dealing with logical deductions from assumptions, obviously the theory cannot be wrong and so we must identify external factors which cause the business cycle (and so unemployment). In this way attention is diverted away from the market and its workings — after all, it is assumed that the capitalist market works — and onto something else. This “something else” has been quite a few different things (most ridiculously, sun spots in the case of one of the founders of marginalist economics, William Stanley Jevons). However, these days most pro-free market capitalist economists and right-libertarians have now decided it is the state.

In this section of the FAQ we will present a case that maintains that the assumption that markets clear is false at least for one, unique, market — namely, the market for labour. As the fundamental assumption underlying “free market” capitalism is false, the logically consistent superstructure built upon comes crashing down. Part of the reason why capitalism is unstable is due to the commodification of labour (i.e. people) and the problems this creates. The state itself can have positive and negative impacts on the economy, but removing it or its influence will not solve the business cycle.

Why is this? Simply due to the nature of the labour market.

Anarchists have long realised that the capitalist market is based upon inequalities and changes in power. Proudhon argued that “[t]he manufacturer says to the labourer, ‘You are as free to go elsewhere with your services as I am to receive them. I offer you so much.’ The merchant says to the customer, ‘Take it or leave it; you are master of your money, as I am of my goods. I want so much.’ Who will yield? The weaker.” He, like all anarchists, saw that domination, oppression and exploitation flow from inequalities of market/economic power and that the “*power of invasion lies in superior strength.*” [**What is Property?**, p. 216, p. 215]

This applies with greatest force to the labour market. While mainstream

economics and right-libertarian variations of it refuse to acknowledge that the capitalist market is based upon hierarchy and power, anarchists (and other socialists) do not share this opinion. And because they do not share this understanding with anarchists, right-libertarians will never be able to understand capitalism or its dynamics and development. Thus, when it comes to the labour market, it is essential to remember that the balance of power within it is the key to understanding the business cycle. Thus the economy must be understood as a system of power.

So how does the labour market effect capitalism? Let us consider a growing economy, one that is coming out of a recession. Such a growing economy stimulates demand for employment and as unemployment falls, the costs of finding workers increase and wage and condition demands of existing workers intensify. As the economy is growing and labour is scarce, the threat associated with the hardship of unemployment is weakened. The share of profits is squeezed and in reaction to this companies begin to cut costs (by reducing inventories, postponing investment plans and laying off workers). As a result, the economy moves into a downturn. Unemployment rises and wage demands are moderated. Eventually, this enables the share of profits first of all to stabilise, and then rise. Such an “*interplay between profits and unemployment as the key determinant of business cycles*” is “*observed in the empirical data.*” [Paul Ormerod, **The Death of Economics**, p. 188]

Thus, as an economy approaches full employment the balance of power on the labour market changes. The sack is no longer that great a threat as people see that they can get a job elsewhere easily. Thus wages and working conditions increase as companies try to get new (and keep) existing employees and output is harder to maintain. In the words of economist Williamazonick, labour “*that is able to command a higher price than previously because of the appearance of tighter labour markets is, by definition, labour that is highly mobile via the market. And labour that is highly mobile via the market is labour whose supply of effort is difficult for managers to control in the production process. Hence, the advent of tight labour markets generally results in more rapidly rising average costs . . . as well as upward shifts in the average cost curve. . .*” [**Business Organisation and the Myth of the Market Economy**, p. 106]

In other words, under conditions of full-employment “*employers are in danger of losing the upper hand.*” [Juliet B. Schor, **The Overworked American**, p. 75] Schor argues that “*employers have a structural advantage in the labour market, because there are typically more candidates ready and willing to endure this work marathon [of long hours] than jobs for them to fill.*” [p. 71] Thus the labour market is usually a buyers market, and so the sellers have to compromise. In the end, workers adapt to this inequality of power and instead of getting what they want, they want what they get.

But under full employment this changes. As we argued in section B.4.4 and section C.7, in such a situation it is the bosses who have to start compromising. And they do not like it. As Schor notes, America “*has never experienced a sustained period of full employment. The closest we have gotten is the late 1960s, when the overall unemployment rate was under 4 percent for four years. But that experience does more to prove the point than any other example. The trauma caused to business by those years of a tight labour market was considerable. Since then, there has been a powerful consensus that the nation cannot withstand such a low rate of unemployment.*” [**Op. Cit.**, pp. 75–76]

So, in other words, full employment is not good for the capitalist system due to the power full employment provides workers. Thus unemployment is a necessary requirement for a successful capitalist economy and not some kind of aberration in an otherwise healthy system. Thus “anarcho”-capitalist claims that “pure” capitalism will soon result in permanent full employment are false. Any moves towards full employment will result in a slump as capitalists see their profits squeezed from below by either collective class struggle or by individual mobility in the labour market.

This was recognised by Individualist Anarchists like Benjamin Tucker, who argued that mutual banking would “*give an unheard of impetus to business, and consequently create an unprecedented demand for labour, — a demand which would always be in excess of the supply, directly contrary of the present condition of the labour market.*” [**The Anarchist Reader**, pp. 149–150] In other words, full employment would end capitalist exploitation, drive non-labour income to zero and ensure the worker the full value of her labour — in other words, end capitalism. Thus, for most (if not all) anarchists the exploitation of labour is only possible when unemployment exists and the supply of labour exceeds the demand for it. Any move towards unemployment will result in a profits squeeze and either the end of capitalism or an economic slump.

Indeed, as we argued in the last section, the extended periods of (approximately) full employment until the 1960s had the advantage that any profit squeeze could (in the short run anyway) be passed onto working class people in the shape of inflation. As prices rise, labour is made cheaper and profits margins supported. This option is restricted under a “pure” capitalism (for reasons we discussed in the last section) and so “pure” capitalism will be affected by full employment faster than “impure” capitalism.

As an economy approaches full employment, “*hiring new workers suddenly becomes much more difficult. They are harder to find, cost more, and are less experienced. Such shortages are extremely costly for a firm.*” [Schor, **Op. Cit.**, p. 75] This encourages a firm to pass on these rises to society in the form of price rises, so creating inflation. Workers, in turn, try to maintain their standard of living. “*Every general increase in labour costs in recent years,*” note J. Brecher and J. Costello in the late 1970s, “*has followed, rather than preceded, an increase in consumer prices. Wage increases have been the result of workers’ efforts to catch up after their incomes have already been eroded by inflation. Nor could it easily be otherwise. All a businessman has to do to raise a price . . . [is to] make an announcement. . . Wage rates . . . are primarily determined by contracts*” and so cannot be easily adjusted in the short term. [**Common Sense for Bad Times**, p, 120]

These full employment pressures will still exist with “pure” capitalism (and due to the nature of the banking system will not have the safety valve of inflation). This means that periodic profit squeezes will occur, due to the nature of a tight labour market and the increased power of workers this generates. This in turn means that a “pure” capitalism will be subject to periods of unemployment (as we argued in section C.9) and so still have a business cycle. This is usually acknowledged by right-libertarians in passing, although they seem to think that this is purely a “short-term” problem (it seems a strange “short-term” problem that continually occurs).

But such an analysis is denied by right-libertarians. For them government action, combined with the habit of many labour unions to obtain higher than

market wage rates for their members, creates and exacerbates mass unemployment. This flows from the deductive logic of much capitalist economics. The basic assumption of capitalism is that markets clear. So if unemployment exists then it can only be because the price of labour (wages) is too high (Austrian Economist W. Duncan Reekie argues that unemployment will “*disappear provided real wages are not artificially high*” [**Markets, Entrepreneurs and Liberty**, p. 72]).

Thus the assumption provokes the conclusion — unemployment is caused by an uncleared market as markets always clear. And the cause for this is either the state or unions. But what if the labour market **cannot** clear without seriously damaging the power and profits of capitalists? What if unemployment is required to maximise profits by weakening labours’ bargaining position on the market and so maximising the capitalists power? In that case unemployment is caused by capitalism, not by forces external to it.

However, let us assume that the right-libertarian theory is correct. Let us assume that unemployment is all the fault of the selfish unions and that a job-seeker “*who does not want to wait will always get a job in the unhampered market economy.*” [von Mises, **Human Action**, p. 595]

Would crushing the unions reduce unemployment? Let us assume that the unions have been crushed and government has been abolished (or, at the very least, become a minimum state). The aim of the capitalist class is to maximise their profits and to do this they invest in labour saving machinery and otherwise attempt to increase productivity. But increasing productivity means that the prices of goods fall and falling prices mean increasing real wages. It is high real wages that, according to right-libertarians, that cause unemployment. So as a reward for increasing productivity, workers will have to have their money wages cut in order to stop unemployment occurring! For this reason some employers might refrain from cutting wages in order to avoid damage to morale — potentially an important concern.

Moreover, wage contracts involve **time** — a contract will usually agree a certain wage for a certain period. This builds in rigidity into the market, wages cannot be adjusted as quickly as other commodity prices. Of course, it could be argued that reducing the period of the contract and/or allowing the wage to be adjusted could overcome this problem. However, if we reduce the period of the contract then workers are at a suffer disadvantage as they will not know if they have a job tomorrow and so they will not be able to easily plan their future (an evil situation for anyone to be in). Moreover, even without formal contracts, wage renegotiation can be expensive. After all, it takes time to bargain (and time is money under capitalism) and wage cutting can involve the risk of the loss of mutual good will between employer and employee. And would **you** give your boss the power to “adjust” your wages as he/she thought was necessary? To do so would imply an altruistic trust in others not to abuse their power.

Thus a “pure” capitalism would be constantly seeing employment increase and decrease as productivity levels change. There exist important reasons why the labour market need not clear which revolve around the avoidance/delaying of wage cuts by the actions of capitalists themselves. Thus, given a choice between cutting wages for all workers and laying off some workers without cutting the wages of the remaining employees, it is unsurprising that capitalists usually go for the later. After all, the sack is an important disciplining device and firing workers can make the remaining employees more inclined to work harder and

be more obedient.

And, of course, many employers are not inclined to hire over-qualified workers. This is because, once the economy picks up again, their worker has a tendency to move elsewhere and so it can cost them time and money finding a replacement and training them. This means that involuntary unemployment can easily occur, so reducing tendencies towards full employment even more. In addition, one of the assumptions of the standard marginalist economic model is one of decreasing returns to scale. This means that as employment increases, costs rise and so prices also rise (and so real wages fall). But in reality many industries have **increasing** returns to scale, which means that as production increases unit costs fall, prices fall and so real wages rise. Thus in such an economy unemployment would increase simply because of the nature of the production process!

Moreover, as we argued in-depth in section C.9, a cut in money wages is not a neutral act. A cut in money wages means a reduction in demand for certain industries, which may have to reduce the wages of its employees (or fire them) to make ends meet. This could produce an accumulative effect and actually **increase** unemployment rather than reduce it.

In addition, there are no “self-correcting” forces at work in the labour market which will quickly bring employment back to full levels. This is for a few reasons. Firstly, the supply of labour cannot be reduced by cutting back production as in other markets. All we can do is move to other areas and hope to find work there. Secondly, the supply of labour can sometimes adjust to wage decreases in the wrong direction. Low wages might drive workers to offer a greater amount of labour (i.e. longer hours) to make up for any short fall (or to keep their job). This is usually termed the “*efficiency wage*” effect. Similarly, another family member may seek employment in order to maintain a given standard of living. Falling wages may cause the number of workers seeking employment to **increase**, causing a full further fall in wages and so on (and this is ignoring the effects of lowering wages on demand discussed in section C.9).

The paradox of piece work is an important example of this effect. As Schor argues, “*piece-rate workers were caught in a viscous downward spiral of poverty and overwork. . . . When rates were low, they found themselves compelled to make up in extra output what they were losing on each piece. But the extra output produced glutted the market and drove rates down further.*” [Juliet C. Schor, **The Overworked American**, p, 58]

Thus, in the face of reducing wages, the labour market may see an accumulative move away from (rather than towards) full employment. The right-libertarian argument is that unemployment is caused by real wages being too high which in turn flows from the assumption that markets clear. If there is unemployment, then the price of the commodity labour is too high — otherwise supply and demand would meet and the market clear. But if, as we argued above, unemployment is essential to discipline workers then the labour market **cannot** clear except for short periods. If the labour market clears, profits are squeezed. Thus the claim that unemployment is caused by “too high” real wages is false (and as we argue in section C.9, cutting these wages will result in deepening any slump and making recovery longer to come about).

In other words, the assumption that the labour market must clear is false, as is any assumption that reducing wages will tend to push the economy quickly back to full employment. The nature of wage labour and the “commodity” being

sold (i.e. human labour/time/liberty) ensure that it can never be the same as others. This has important implications for economic theory and the claims of right-libertarians, implications that they fail to see due to their vision of labour as a commodity like any other.

The question arises, of course, of whether, during periods of full employment, workers could not take advantage of their market power and gain increased workers' control, create co-operatives and so reform away capitalism. This was the argument of the Mutualist and Individualist anarchists and it does have its merits. However, it is clear (see section J.5.12) that bosses hate to have their authority reduced and so combat workers' control whenever they can. The logic is simple, if workers increase their control within the workplace the manager and bosses may soon be out of a job and (more importantly) they may start to control the allocation of profits. Any increase in working class militancy may provoke capitalists to stop/reduce investment and credit and so create the economic environment (i.e. increasing unemployment) necessary to undercut working class power.

In other words, a period of full unemployment is not sufficient to reform capitalism away. Full employment (nevermind any struggle over workers' control) will reduce profits and if profits are reduced then firms find it hard to repay debts, fund investment and provide profits for shareholders. This profits squeeze would be enough to force capitalism into a slump and any attempts at gaining workers' self-management in periods of high employment will help push it over the edge (after all, workers' control without control over the allocation of any surplus is distinctly phoney). Moreover, even if we ignore the effects of full employment may not last due to problems associated with over-investment (see section C.7.2), credit and interest rate problems (see section 10.1) and realisation/aggregate demand disjoints. Full employment adds to the problems associated with the capitalist business cycle and so, if class struggle and workers power did not exist or cost problem, capitalism would still not be stable.

If equilibrium is a myth, then so is full employment. It seems somewhat ironic that “anarcho”-capitalists and other right-libertarians maintain that there will be equilibrium (full employment) in the one market within capitalism it can never actually exist in! This is usually quietly acknowledged by most right-libertarians, who mention in passing that some “temporary” unemployment **will** exist in their system — but “temporary” unemployment is not full employment. Of course, you could maintain that all unemployment is “voluntary” and get round the problem by denying it, but that will not get us very far.

So it is all fine and well saying that “libertarian” capitalism would be based upon the maxim “*From each as they choose, to each as they are chosen.*” [Robert Nozick, **Anarchy, State, and Utopia**, p. 160] But if the labour market is such that workers have little option about what they “choose” to give and fear that they will **not** be chosen, then they are at a disadvantage when compared to their bosses and so “consent” to being treated as a resource from the capitalist can make a profit from. And so this will result in any “free” contract on the labour market favouring one party at the expense of the other — as can be seen from “actually existing capitalism”.

Thus any “free exchange” on the labour market will usually **not** reflect the true desires of working people (and who will make all the “adjusting” and end up wanting what they get). Only when the economy is approaching full employment will the labour market start to reflect the true desires of working people and

their wage start to approach its full product. And when this happens, profits are squeezed and capitalism goes into slump and the resulting unemployment disciplines the working class and restores profit margins. Thus full employment will be the exception rather than the rule within capitalism (and that is a conclusion which the historical record indicates).

In other words, in a normally working capitalist economy any labour contracts will not create relationships based upon freedom due to the inequalities in power between workers and capitalists. Instead, any contracts will be based upon domination, **not** freedom. Which prompts the question, how is libertarian capitalism **libertarian** if it erodes the liberty of a large class of people?

10.3 Was laissez-faire capitalism stable?

Firstly, we must state that a pure laissez-faire capitalist system has not existed. This means that any evidence we present in this section can be dismissed by right-libertarians for precisely this fact — it was not “pure” enough. Of course, if they were consistent, you would expect them to shun all historical and current examples of capitalism or activity within capitalism, but this they do not. The logic is simple — if X is good, then it is permissible to use it. If X is bad, the system is not pure enough.

However, as right-libertarians **do** use historical examples so shall we. According to Murray Rothbard, there was “*quasi-laissez-faire industrialisation [in] the nineteenth century*” [**The Ethics of Liberty**, p. 264] and so we will use the example of nineteenth century America — as this is usually taken as being the closest to pure laissez-faire — in order to see if laissez-faire is stable or not.

Yes, we are well aware that 19th century USA was far from laissez-faire — there was a state, protectionism, government economic activity and so on — but as this example has been often used by right-Libertarians’ themselves (for example, Ayn Rand) we think that we can gain a lot from looking at this imperfect approximation of “pure” capitalism (and as we argued in section 8, it is the “quasi” aspects of the system that counted in industrialisation, **not** the laissez-faire ones).

So, was 19th century America stable? No, it most definitely was not.

Firstly, throughout that century there were a continual economic booms and slumps. The last third of the 19th century (often considered as a heyday of private enterprise) was a period of profound instability and anxiety. Between 1867 and 1900 there were 8 complete business cycles. Over these 396 months, the economy expanded during 199 months and contracted during 197. Hardly a sign of great stability (since the end of world war II, only about a fifth of the time has spent in periods of recession or depression, by way of comparison). Overall, the economy went into a slump, panic or crisis in 1807, 1817, 1828, 1834, 1837, 1854, 1857, 1873, 1882, and 1893 (in addition, 1903 and 1907 were also crisis years).

Part of this instability came from the eras banking system. “*Lack of a central banking system,*” writes Richard Du Boff, “*until the Federal Reserve act of 1913 made financial panics worse and business cycle swings more severe*” [**Accumulation and Power**, p. 177] It was in response to this instability that the Federal Reserve system was created; and as Doug Henwood notes “*the campaign for a more rational system of money and credit was not a movement of Wall Street vs. industry or regional finance, but a broad movement of elite*

bankers and the managers of the new corporations as well as academics and business journalists. The emergence of the Fed was the culmination of attempts to define a standard of value that began in the 1890s with the emergence of the modern professionally managed corporation owned not by its managers but dispersed public shareholders.” [Wall Street, p. 93] Indeed, the Bank of England was often forced to act as lender of last resort to the US, which had no central bank.

In the decentralised banking system of the 19th century, during panics thousands of banks would hoard resources, so starving the system for liquidity precisely at the moment it was most badly needed. The creation of trusts was one way in which capitalists tried to manage the system’s instabilities (at the expense of consumers) and the corporation was a response to the outlawing of trusts. *“By internalising lots of the competitive system’s gaps — by bring more transactions within the same institutional walls — corporations greatly stabilised the economy.” [Henwood, Op. Cit., p. 94]*

All during the hey-day of laissez faire we also find popular protests against the money system used, namely specie (in particular gold), which was considered as a hindrance to economic activity and expansion (as well as being a tool for the rich). The Individualist Anarchists, for example, considered the money monopoly (which included the use of specie as money) as the means by which capitalists ensured that *“the labourers ... [are] kept in the condition of wage labourers,”* and reduced *“to the conditions of servants; and subject to all such extortions as their employers ... may choose to practice upon them”*, indeed they became the *“mere tools and machines in the hands of their employers”*. With the end of this monopoly, *“[t]he amount of money, capable of being furnished ... [would assure that all would] be under no necessity to act as a servant, or sell his or her labour to others.”* [Lysander Spooner, **A Letter to Grover Cleveland**, p. 47, p. 39, p. 50, p. 41] In other words, a specie based system (as desired by many “anarcho”-capitalists) was considered a key way of maintaining wage labour and exploitation.

Interestingly, since the end of the era of the Gold Standard (and so commodity money) popular debate, protest and concern about money has disappeared. The debate and protest was in response to the **effects** of commodity money on the economy — with many people correctly viewing the seriously restrictive monetary regime of the time responsible for economic problems and crisis as well as increasing inequalities. Instead radicals across the political spectrum urged a more flexible regime, one that did not cause wage slavery and crisis by reducing the amount of money in circulation when it could be used to expand production and reduce the impact of slumps. Needless to say, the Federal Reserve system in the USA was far from the institution these populists wanted (after all, it is run by and for the elite interests who desired its creation).

That the laissez-faire system was so volatile and panic-ridden suggests that “anarcho”-capitalist dreams of privatising everything, including banking, and everything will be fine are very optimistic at best (and, ironically, it was members of the capitalist class who lead the movement towards state-managed capitalism in the name of “sound money”).

11 What is the myth of “Natural Law”?

Natural Law, and the related concept of Natural Rights, play an important part in Libertarian and “anarcho”-capitalist ideology. Right-libertarians are not alone in claiming that their particular ideology is based on the “law of nature”. Hitler, for one, claimed the same thing for Nazi ideology. So do numerous other demagogues, religious fanatics, and political philosophers. However, each likes to claim that only **their** “natural law” is the “real” one, all the others being subjective impositions. We will ignore these assertions (they are not arguments) and concentrate on explaining why natural law, in all its forms, is a myth. In addition, we will indicate its authoritarian implications.

Instead of such myths anarchists urge people to “work it out for themselves” and realise that any ethical code is subjective and not a law of nature. If its a good “code”, then others will become convinced of it by your arguments and their intellect. There is no need to claim its a function of “man’s nature”!

The following books discuss the subject of “Natural Law” in greater depth and are recommended for a fuller discussion of the issues raised in this section:

Robert Anton Wilson, **Natural Law** and L.A. Rollins, **The Myth of Natural Law**.

We should note that these books are written by people associated, to some degree, with right-libertarianism and, of course, we should point out that not all right-libertarians subscribe to “natural law” theories (David Friedman, for example, does not). However, such a position seems to be the minority in right-Libertarianism (Ayn Rand, Robert Nozick and Murray Rothbard, among others, did subscribe to it). We should also point out that the Individualist Anarchist Lysander Spooner also subscribed to “natural laws” (which shows that, as we noted above, the concept is not limited to one particular theory or ideology). We present a short critique of Spooner’s ideas on this subject in section G.7.

Lastly, it could be maintained that it is a common “straw man” to maintain that supporters of Natural Law argue that their Laws are like the laws of physics (and so are capable of stopping people’s actions just as the law of gravity automatically stops people flying from the Earth). But that is the whole point — using the term “Natural Law” implies that the moral rights and laws that its supporters argue for are to be considered just like the law of gravity (although they acknowledge, of course, that unlike gravity, **their “natural laws” can be violated in nature**). Far from saying that the rights they support are just that (i.e. rights **they** think are good) they try to associate them with universal facts. For example, Lysander Spooner (who, we must stress, used the concept of “Natural law” to **oppose** the transformation of America into a capitalist society, unlike Rand, Nozick and Rothbard who use it to defend capitalism) stated that:

“the true definition of law is, that it is a fixed, immutable, natural principle; and not anything that man ever made, or can make, unmake, or alter. Thus we speak of the laws of matter, and the laws of mind; of the laws of gravitation, the laws of light, heat, and electricity. . . etc., etc. . . The law of justice is just as supreme and universal in the moral world, as these others are in the mental or physical world; and is as unalterable as are these by any human power. And it is just as false and absurd to talk of anybody’s having the power

to abolish the law of justice, and set up their own in its stead, as it would be to talk of their having the power to abolish the law of gravitation, or any other natural laws of the universe, and set up their own will in the place of them.” [A Letter to Grover Cleveland, p. 88]

Rothbard and other capitalist supporters of “Natural Law” make the same sort of claims (as we will see). Now, why, if they are aware of the fact that unlike gravity their “Natural Laws” can be violated, do they use the term at all? Benjamin Tucker said that “Natural Law” was a “*religious*” concept — and this provides a clue. To say “Do not violate these rights, otherwise I will get cross” does not have **quite** the same power as “Do not violate these rights, they are facts of natural and you are violating nature” (compare to “Do not violate these laws, or you will go to hell”). So to point out that “Natural Law” is **not** the same as the law of gravity (because it has to be enforced by humans) is not attacking some kind of “straw man” — it is exposing the fact that these “Natural Laws” are just the personal prejudices of those who hold them. If they do not want then to be exposed as such then they should call their laws what they are — personal ethical laws — rather than compare them to the facts of nature.

11.1 Why the term “Natural Law” in the first place?

Murray Rothbard claims that “*Natural Law theory rests on the insight... that each entity has distinct and specific properties, a distinct ‘nature,’ which can be investigated by man’s reason*” [**For a New Liberty**, p. 25] and that “*man has rights because they are **natural** rights. They are grounded in the nature of man.*” [**The Ethics of Liberty**, p. 155]

To put it bluntly, this form of “analysis” was originated by Aristotle and has not been used by science for centuries. Science investigates by proposing theories and hypotheses to explain empirical observations, testing and refining them by experiment. In stark contrast, Rothbard **invents** definitions (“*distinct*” “*natures*”) and then draws conclusions from them. Such a method was last used by the medieval Church and is devoid of any scientific method. It is, of course, a fiction. It attempts to deduce the nature of a “natural” society from *a priori* considerations of the “innate” nature of human beings, which just means that the assumptions necessary to reach the desired conclusions have been built into the definition of “human nature.” In other words, Rothbard defines humans as having the “distinct and specific properties” that, given his assumptions, will allow his dogma (private state capitalism) to be inferred as the “natural” society for humans.

Rothbard claims that “*if A, B, C, etc., have differing attributes, it follows that they have different **natures**.*” [**The Ethics of Liberty**, p. 9] Does this mean that as every individual is unique (have different attributes), they have different natures? Skin and hair colour are different attributes, does this mean that red haired people have different natures than blondes? That black people have different natures than white (and such a “theory” of “natural law” was used to justify slavery — yes, slaves **are** human but they have “different natures” than their masters and so slavery is okay). Of course Rothbard aggregates “attributes” to species level, but why not higher? Humans are primates, does

that mean we have the same natures are monkeys or gorillas? We are also mammals as well, we share many of the same attributes as whales and dogs. Do we have similar natures?

But this is by the way. To continue we find that after defining certain “natures,” Rothbard attempts to derive “*Natural Rights and Laws*” from them. However, these “*Natural Laws*” are quite strange, as they can be violated in nature! Real natural laws (like the law of gravity) **cannot** be violated and therefore do not need to be enforced. The “Natural Laws” the “Libertarian” desires to foist upon us are not like this. They need to be enforced by humans and the institutions they create. Hence, Libertarian “Natural Laws” are more akin to moral prescriptions or juridical laws. However, this does not stop Rothbard explicitly “*plac[ing]*” his “*Natural Laws*” “*alongside physical or ‘scientific’ natural laws.*” [The Ethics of Liberty, p. 42]

So why do so many Libertarians use the term “Natural Law?” Simply, it gives them the means by which to elevate their opinions, dogmas, and prejudices to a metaphysical level where nobody will dare to criticise or even think about them. The term smacks of religion, where “Natural Law” has replaced “God’s Law.” The latter fiction gave the priest power over believers. “Natural Law” is designed to give the Libertarian ideologist power over the people that he or she wants to rule.

How can one be against a “Natural Law” or a “Natural Right”? It is impossible. How can one argue against gravity? If private property, for example, is elevated to such a level, who would dare argue against it? Ayn Rand listed having landlords and employers along with “*the laws of nature.*” They are **not** similar: the first two are social relationships which have to be imposed by the state; the “*laws of nature*” (like gravity, needing food, etc.) are **facts** which do not need to be imposed. Rothbard claims that “*the natural fact is that labour service is indeed a commodity.*” [Op. Cit., p. 40] However, this is complete nonsense — labour service as a commodity is a **social** fact, dependent on the distribution of property within society, its social customs and so forth. It is only “natural” in the sense that it exists within a given society (the state is also “natural” as it also exists within nature at a given time). But neither wage slavery or the state is “natural” in the sense that gravity is natural or a human having two arms is. Indeed, workers at the dawn of capitalism, faced with selling their labour services to another, considered it as decidedly “unnatural” and used the term “wage slavery” to describe it!

Thus, where and when a “fact” appears is essential. For example, Rothbard claims that “*[a]n apple, let fall, will drop to the ground; this we all observe and acknowledge to be in the nature of the apple.*” [The Ethics of Liberty, p. 9] Actually, we do not “acknowledge” anything of the kind. We acknowledge that the apple was subject to the force of gravity and that is why it fell. The same apple, “let fall” in a space ship would **not** drop to the floor. Has the “nature” of the apple changed? No, but the situation it is in has. Thus any attempt to generate abstract “natures” requires you to ignore reality in favour of ideals.

Because of the confusion its usage creates, we are tempted to think that the use of “Natural Law” dogma is an attempt to **stop** thinking, to restrict analysis, to force certain aspects of society off the political agenda by giving them a divine, everlasting quality.

Moreover, such an “individualist” account of the origins of rights will always turn on a muddled distinction between individual rationality and some vague

notion of rationality associated with membership of the human species. How are we to determine what is rational for an individual **as and individual** and what is rational for that same individual **as a human being**? It is hard to see that we can make such a distinction for “[i]f I violently interfere with Murray Rothbard’s freedom, this may violate the ‘natural law’ of Murray Rothbard’s needs, but it doesn’t violate the ‘natural law’ of **my** needs.” [L.A. Rollins, **The Myth of Natural Rights**, p. 28] Both parties, after all, are human and if such interference is, as Rothbard claims, “antihuman” then why? “If it helps me, a human, to advance my life, then how can it be unequivocally ‘antihuman’?” [L. A. Rollins, **Op. Cit.**, p. 27] Thus “natural law” is contradictory as it is well within the bounds of human nature to violate it.

This means that in order to support the dogma of “Natural Law,” the cultists **must** ignore reality. Ayn Rand claims that “the source of man’s rights is... the law of identity. A is A — and Man is Man.” But Rand (like Rothbard) **defines** “Man” as an “entity of a specific kind — a rational being” [**The Virtue of Selfishness**, pp. 94–95]. Therefore she cannot account for **irrational** human behaviours (such as those that violate “Natural Laws”), which are also products of our “nature.” To assert that such behaviours are not human is to assert that A can be not-A, thus contradicting the law of identity. Her ideology cannot even meet its own test.

11.2 But “Natural Law” provides protection for individual rights from violation by the State. Those who are against Natural Law desire total rule by the state.

The second statement represents a common “Libertarian” tactic. Instead of addressing the issues, they accuse an opponent of being a “totalitarian” (or the less sinister “statist”). In this way, they hope to distract attention from, and so avoid discussing, the issue at hand (while at the same time smearing their opponent). We can therefore ignore the second statement.

Regarding the first, “Natural Law” has **never** stopped the rights of individuals from being violated by the state. Such “laws” are as much use as a chocolate fire-guard. If “Natural Rights” could protect one from the power of the state, the Nazis would not have been able to murder six million Jews. The only thing that stops the state from attacking people’s rights is individual (and social) power — the ability and desire to protect oneself and what one considers to be right and fair. As the anarchist Rudolf Rocker pointed out:

“Political [or individual] rights do not exist because they have been legally set down on a piece of paper, but only when they have become the ingrown habit of a people, and when any attempt to impair them will be met with the violent resistance of the populace... One compels respect from others when he knows how to defend his dignity as a human being... The people owe all the political rights and privileges which we enjoy today, in greater or lesser measure, not to the good will of their governments, but to their own strength.”
[**Anarcho-Syndicalism**, p. 64]

Of course, if there are no “Natural Rights,” then the state has no “right” to murder you or otherwise take away what are commonly regarded as human rights. One can object to state power without believing in “Natural Law.”

11.3 Why is “Natural Law” authoritarian?

Rights, far from being fixed, are the product of social evolution and human action, thought and emotions. What is acceptable now may become unacceptable in the future. Slavery, for example, was long considered “natural.” In fact, John Locke, the “father” of “Natural Rights,” was heavily involved in the slave trade. He made a fortune in violating what is today regarded as a basic human right: not to be enslaved. Many in Locke’s day claimed that slavery was a “Natural Law.” Few would say so now.

Thomas Jefferson indicates exactly why “Natural Law” is authoritarian when he wrote “[s]ome men look at constitutions with sanctimonious reverence, and deem them like the ark of the Covenant, too sacred to be touched. They ascribe to the men of the preceding age a wisdom more than human, and suppose what they did to be beyond amendment. . . laws and institutions must go hand in hand with the progress of the human mind. . . as that becomes more developed, more enlightened, as new discoveries are made, institutions must advance also, to keep pace with the times. . . We might as well require a man to wear still the coat which fitted him when a boy as civilised society to remain forever under the regimen of their barbarous ancestors.”

The “Natural Law” cult desires to stop the evolutionary process by which new rights are recognised. Instead they wish to fix social life into what **they** think is good and right, using a form of argument that tries to raise their ideology above critique or thought. Such a wish is opposed to the fundamental feature of liberty: the ability to think for oneself. Michael Bakunin writes “*the liberty of man consists solely in this: that he obeys natural laws because he has **himself** recognised them as such, and not because they have been externally imposed upon him by any extrinsic will whatever, divine or human, collective or individual.*” [Bakunin on Anarchism, p. 227]

Thus anarchism, in contrast to the “natural law” cult, recognises that “natural laws” (like society) are the product of individual evaluation of reality and social life and are, therefore, subject to change in the light of new information and ideas (Society “*progresses slowly through the moving power of individual initiative*” [Bakunin, **The Political Philosophy of Bakunin**, p. 166] and so, obviously, do social rights and customs). Ethical or moral “laws” (which is what the “Natural Law” cult is actually about) is not a product of “human nature” or abstract individuals. Rather, it is a **social** fact, a creation of society and human interaction. In Bakunin’s words, “*moral law is not an individual but a social fact, a creation of society*” and any “*natural laws*” are “*inherent in the social body*” (and so, we must add, not floating abstractions existing in “man’s nature”). [Ibid., p. 125, p. 166]

The case for liberty and a free society is based on the argument that, since every individual is unique, everyone can contribute something that no one else has noticed or thought about. It is the free interaction of individuals which allows them, along with society and its customs and rights, to evolve, change and develop. “Natural Law,” like the state, tries to arrest this evolution. It replaces creative inquiry with dogma, making people subject to yet another god, destroying critical thought with a new rule book.

In addition, if these “Natural Laws” are really what they are claimed to be, they are necessarily applicable to **all** of humanity (Rothbard explicitly acknowledges this when he wrote that “*one of the notable attributes of natural law*” is

“its applicability to all men, regardless of time or place” [**The Ethics of Liberty**, p. 42]). In other words, every other law code **must** (by definition) be “against nature” and there exists **one** way of life (the “natural” one). The authoritarian implications of such arrogance is clear. That the Dogma of Natural Law was only invented a few hundred years ago, in one part of the planet, does not seem to bother its advocates. Nor does the fact that for the vast majority of human existence, people have lived in societies which violated almost **all** of their so-called “Natural Laws” To take one example, before the late Neolithic, most societies were based on usufruct, or free access to communally held land and other resources [see Murray Bookchin, **The Ecology of Freedom**]. Thus for millennia, all human beings lived in violation of the supposed “Natural Law” of private property — perhaps the chief “law” in the “Libertarian” universe.

If “Natural Law” did exist, then all people would have discovered these “true” laws years ago. To the contrary, however, the debate is still going on, with (for example) fascists and “Libertarians” each claiming “the laws of nature” (and socio-biology) as their own.

11.4 Does “Natural Law” actually provides protection for individual liberty?

But, it seems fair to ask, does “natural law” actually respect individuals and their rights (i.e. liberty)? We think not. Why?

According to Rothbard, *“the natural law ethic states that for man, goodness or badness can be determined by what fulfils or thwarts what is best for man’s nature.”* [**The Ethics of Liberty**, p. 10] But, of course, what may be “good” for “man” may be decidedly **bad** for men (and women). If we take the example of the sole oasis in a desert (see section 4.2) then, according to Rothbard, the property owner having the power of life and death over others is “good” while, if the dispossessed revolt and refuse to recognise his “property”, this is “bad”! In other words, Rothbard’s “natural law” is good for **some** people (namely property owners) while it can be bad for others (namely the working class). In more general terms, this means that a system which results in extensive hierarchy (i.e. **archy**, power) is “good” (even though it restricts liberty for the many) while attempts to **remove** power (such as revolution and the democratisation of property rights) is “bad”. Somewhat strange logic, we feel.

However such a position fails to understand **why** we consider coercion to be wrong/unethical. Coercion is wrong because it subjects an individual to the will of another. It is clear that the victim of coercion is lacking the freedom that the philosopher Isaiah Berlin describes in the following terms:

“I wish my life and decisions to depend on myself, not on external forces of whatever kind. I wish to be an instrument of my own, not of other men’s, acts of will. I wish to be a subject, not an object; to be moved by reasons, by conscious purposes, which are my own, not by causes which affect me, as it were, from outside. I wish to be somebody, not nobody; a doer — deciding, not being decided for, self-directed and not acted upon by external nature or by other means as if I were a thing, or an animal, or a slave incapable of playing a human role, that is, of conceiving goals and policies of my own and realising them.” [**Four Essays on Liberty**, p. 131]

Or, as Alan Haworth points out, “*we have to view coercion as a violation of what Berlin calls **positive** freedom.*” [**Anti-Libertarianism**, p. 48]

Thus, if a system results in the violation of (positive) liberty by its very nature — namely, subject a class of people to the will of another class (the worker is subject to the will of their boss and is turned into an order-taker) — then it is justified to end that system. Yes, it is “coercion” is dispossess the property owner — but “coercion” exists only for as long as they desire to exercise power over others. In other words, it is not domination to remove domination! And remember it is the domination that exists in coercion which fuels our hatred of it, thus “coercion” to free ourselves from domination is a necessary evil in order to stop far greater evils occurring (as, for example, in the clear-cut case of the oasis monopoliser).

Perhaps it will be argued that domination is only bad when it is involuntary, which means that it is only the involuntary nature of coercion that makes it bad, not the domination it involves. By this argument wage slavery is not domination as workers voluntarily agree to work for a capitalist (after all, no one puts a gun to their heads) and any attempt to overthrow capitalist domination is coercion and so wrong. However, this argument ignores that fact that **circumstances** force workers to sell their liberty and so violence on behalf of property owners is not (usually) required — market forces ensure that physical force is purely “defensive” in nature. And as we argued in section 2.2, even Rothbard recognised that the economic power associated with one class of people being dispossessed and another empowered by this fact results in relations of domination which cannot be considered “voluntary” by any stretch of the imagination (although, of course, Rothbard refuses to see the economic power associated with capitalism — when its capitalism, he cannot see the wood for the trees — and we are ignoring the fact that capitalism was created by extensive use of coercion and violence — see section 8).

Thus, “Natural law” and attempts to protect individuals rights/liberty and see a world in which people are free to shape their own lives are fatally flawed if they do not recognise that private property is incompatible with these goals. This is because the existence of capitalist property smuggles in power and so domination (the restriction of liberty, the conversion of some into order-givers and the many into order-takers) and so Natural Law does not fulfil its promise that each person is free to pursue their own goals. The unqualified right of property will lead to the domination and degradation of large numbers of people (as the oasis monopoliser so graphically illustrates).

And we stress that anarchists have no desire to harm individuals, only to change institutions. If a workplace is taken over by its workers, the owners are not harmed physically. If the oasis is taken from the monopoliser, the ex-monopoliser becomes like other users of the oasis (although probably **disliked** by others). Thus anarchists desire to treat people as fairly as possible and not replace one form of coercion and domination with another — individuals must **never** be treated as abstractions (if they have power over you, destroy what creates the relation of domination, **not** the individual, in other words! And if this power can be removed without resorting to force, so much the better — a point which social and individualist anarchists disagree on, namely whether capitalism can be reformed away or not comes directly from this. As the Individualists think it can, they oppose the use of force. Most social anarchists think it cannot, and so support revolution).

This argument may be considered as “utilitarian” (the greatest good for the greatest number) and so treats people not as “ends in themselves” but as “means to an end”. Thus, it could be argued, “natural law” is required to ensure that **all** (as opposed to some, or many, or the majority of) individuals are free and have their rights protected.

However, it is clear that “natural law” can easily result in a minority having their freedom and rights respected, while the majority are forced by circumstances (created by the rights/laws produced by applying “natural law” we must note) to sell their liberty and rights in order to survive. If it is wrong to treat anyone as a “means to an end”, then it is equally wrong to support a theory or economic system that results in people having to negate themselves in order to live. A respect for persons — to treat them as ends and never as means — is not compatible with private property.

The simple fact is that **there are no easy answers** — we need to weight up our options and act on what we think is best. Yes, such subjectivism lacks the “elegance” and simplicity of “natural law” but it reflects real life and freedom far better. All in all, we must always remember that what is “good” for man need not be good for people. “Natural law” fails to do this and stands condemned.

11.5 But Natural Law was discovered, not invented!

This statement truly shows the religious nature of the Natural Law cult. To see why its notion of “discovery” is confused, let us consider the Law of Gravity. Newton did not “discover” the law of gravity, he invented a theory which explained certain observed phenomena in the physical world. Later Einstein updated Newton’s theories in ways that allowed for a better explanation of physical reality. Thus, unlike “Natural Law,” scientific laws can be updated and changed as our knowledge changes and grows. As we have already noted, however, “Natural Laws” cannot be updated because they are derived from fixed definitions (Rothbard is pretty clear on this, he states that it is “[v]ery true” that natural law is “*universal, fixed and immutable*” and so are “*‘absolute’ principles of justice*” and that they are “*independent of time and place*” [**The Ethics of Liberty**, p. 19]). However, what he fails to understand is that what the “Natural Law” cultists are “discovering” are simply the implications of their own definitions, which in turn simply reflect their own prejudices and preferences.

Since “Natural Laws” are thus “unchanging” and are said to have been “discovered” centuries ago, it’s no wonder that many of its followers look for support in socio-biology, claiming that their “laws” are part of the genetic structure of humanity. But socio-biology has dubious scientific credentials for many of its claims. Also, it has authoritarian implications **exactly** like Natural Law. Murray Bookchin rightly characterises socio-biology as “*suffocatingly rigid; it not only impedes action with the autocracy of a genetic tyrant but it closes the door to any action that is not biochemically defined by its own configuration. When freedom is nothing more than the recognition of necessity. . . we discover the gene’s tyranny over the greater totality of life. . . when knowledge becomes dogma (and few movements are more dogmatic than socio-biology) freedom is ultimately denied.*” [“*Socio-biology or Social Ecology*”, in **Which way for the Ecology Movement?** pp. 49 — 75, p. 60]

In conclusion the doctrine of Natural Law, far from supporting individual freedom, is one of its greatest enemies. By locating individual rights within

“Man’s Nature,” it becomes an unchanging set of dogmas. Do we really know enough about humanity to say what are “Natural” and universal Laws, applicable forever? Is it not a rejection of critical thinking and thus individual freedom to do so?

11.6 Why is the notion of “discovery” contradictory?

Ayn Rand indicates the illogical and contradictory nature of the concepts of “discovering” “natural law” and the “natural rights” this “discovery” argument creates when she stated that her theory was “*objective*.” Her “Objectivist” political theory “*holds that good is neither an attribute of ‘things in themselves’ nor man’s emotional state, but an evaluation of the facts of reality by man’s consciousness according to a rational standard of value. . . The objective theory holds that the good is an aspect of reality in relation to man — and that it must be discovered, not invented, by man.*” [**Capitalism: The Unknown Ideal**, p. 22]

However, this is playing with words. If something is “discovered” then it has always been there and so is an intrinsic part of it. If “good” is “discovered” by “man” then “good” exists independently of people — it is waiting to be “discovered.” In other words, “good” is an attribute of “*man as man*,” of “*things in themselves*” (in addition, such a theory also implies that there is just **one** possible interpretation of what is “good” for all humanity). This can be seen when Rand talks about her system of “objective” values and rights.

When discussing the difference between “*subjective*,” “*intrinsic*” and “*objective*” values Rand noted that “*intrinsic*” and “*subjective*” theories “*make it possible for a man to believe what is good is independent of man’s mind and can be achieved by physical force.*” [**Op. Cit.**, p. 22] In other words, intrinsic and subjective values justify tyranny. However, her “*objective*” values are placed squarely in “*Man’s Nature*” — she states that “[*i*]ndividual rights are the means of subordinating society to moral law” and that “*the source of man’s rights is man’s nature.*” [**Op. Cit.**, p. 320, p. 322]

She argues that the “*intrinsic theory holds that the good is inherent in certain things or actions, as such, regardless of their context and consequences, regardless of any benefit or injury they may cause to the actors and subjects involved.*” [**Op. Cit.**, p. 21] According to the **Concise Oxford Dictionary**, “*intrinsic*” is defined as “*inherent*,” “*essential*,” “*belonging naturally*” and defines “*nature*” as “*a thing’s, or person’s, innate or essential qualities or character.*” In other words, if, as Rand maintains, man’s rights **are** the product of “*man’s nature*” then such rights are **intrinsic**! And if, as Rand maintains, such rights are the “*extension of morality into the social system*” then morality itself is also intrinsic.

Again, her ideology fails to meet its own tests — and opens the way for tyranny. This can be seen by her whole hearted support for wage slavery and her total lack of concern how it, and concentrations of wealth and power, affect the individuals subjected to them. For, after all, what is “good” is “inherent” in capitalism, regardless of the context, consequences, benefits or injuries it may cause to the actors and subjects involved.

The key to understanding her contradictory and illogical ideology lies in her contradictory use of the word “man.” Sometimes she uses it to describe individuals but usually it is used to describe the human race collectively (“*man’s*

nature,” “man’s consciousness”). But “Man” does not have a consciousness, only individuals do. Man is an abstraction, it is individuals who live and think, not “Man.” Such “Man worship” — like Natural Law — has all the markings of a religion.

As Max Stirner argues “*liberalism is a religion because it separates my essence from me and sets it above me, because it exalts ‘Man’ to the same extent as any other religion does to God. . . it sets me beneath Man.*” [The Ego and Its Own, p. 176] Indeed, he “*who is infatuated with **Man** leaves persons out of account so far as that infatuation extends, and floats in an ideal, sacred interest. **Man**, you see, is not a person, but an ideal, a spook.*” [Op. Cit., p.79]

Rand argues that we must evaluate “*the facts of reality by man’s consciousness according to a rational standard of value*” but who determines that value? She states that “[v]alues are not determined by fiat nor by majority vote” [p. 24] but, however, neither can they be determined by “man” or “man’s consciousness” because “man” does not exist. Individuals exist and have consciousness and because they are unique have different values (but as we argued in section A.2.19, being social creatures these values are generalised across individuals into social, i.e. objective, values). So, the abstraction “man” does not exist and because of this we see the healthy sight of different individuals convincing others of their ideas and theories by discussion, presenting facts and rational debate. This can be best seen in scientific debate.

The aim of the scientific method is to invent theories that explain facts, the theories are not part of the facts but created by the individual’s mind in order to explain those facts. Such scientific “laws” can and do change in light of new information and new thought. In other words, the scientific method is the creation of subjective theories that explain the objective facts. Rand’s method is the opposite — she assumes “man’s nature,” “discovers” what is “good” from those assumptions and draws her theories by deduction from that. This is the **exact** opposite of the scientific method and, as we noted above, comes to us straight from the Roman Catholic church.

It is the subjective revolt by individuals against what is considered “objective” fact or “common sense” which creates progress and develops ethics (what is considered “good” and “right”) and society. This, in turn, becomes “accepted fact” until the next free thinker comes along and changes how we view the world by presenting **new** evidence, re-evaluating old ideas and facts or exposing the evil effects associated with certain ideas (and the social relationships they reflect) by argument, fact and passion. Attempts to impose “*an evaluation of the facts of reality by man’s consciousness*” would be a death blow to this process of critical thought, development and evaluation of the facts of reality by individual’s consciousness. Human thought would be subsumed by dogma.

Appendix: The Symbols of Anarchy

Introduction

Anarchism has always stood deliberately for a broad, and at times vague, political platform. The reasoning is sound; blueprints create rigid dogma and stifle the creative spirit of revolt. Along the same lines and resulting in the same problems, Anarchists have rejected the “disciplined” leadership that is found in many other political groupings on the Left. The reasoning for this is also sound; leadership based on authority is inherently hierarchical.

It seems to follow logically that since Anarchists have shied away from anything static, that we would also shy away from the importance of symbols and icons. Yet the fact is Anarchists have used symbolism in our revolt against the State and Capital, the most famous of which are the circled-A, the black flag and the red-and-black flag. This appendix tries to show the history of these three iconic symbols and indicate why they were taken up by anarchists to represent our ideas and movement.

Ironically enough, one of the original anarchist symbols was the **red** flag. As anarchist Commune Louise Michel put it, “*Lyon, Marseille, Narbonne, all had their own Communes, and like ours [in Paris], theirs too were drowned in the blood of revolutionaries. That is why our flags are red. Why are our red banners so terribly frightening to those persons who have caused them to be stained that colour?*” [The Red Virgin: Memoirs of Louise Michel, p. 65] March 18th, 1877, saw Kropotkin participate in a protest march in Berne which involved the anarchists “*carrying the red flag in honour of the Paris Commune*” for “*in Switzerland federal law prohibited public display of the red flag.*” [Martin A. Miller, **Kropotkin**, p. 137] Anarchist historians Nicolas Walter and Heiner Becker note that “*Kropotkin always preferred the red flag.*” [Peter Kropotkin, **Act for Yourselves**, p. 128] On Labour Day in 1899, Emma Goldman gave lectures to miners in Spring Valley, Illinois, which ended in a demonstration which she headed “*carrying a large red flag.*” [Living My Life, vol. 1, p. 245] According to historian Caroline Waldron Merithew, the 300 marchers “*defied police orders to haul down the ‘red flag of anarchy.’*” [Anarchist Motherhood, p. 236]

This should be unsurprising as anarchism is a form of socialism and came out of the general socialist and labour movements. Common roots would imply common imagery. However, as mainstream socialism developed in the nineteenth century into either reformist social democracy or the state socialism of the revolutionary Marxists, anarchists developed their own images of revolt based upon those raised by working class people in struggle. As will be shown, they come from the revolutionary anarchism most directly associated with the wider labour and socialist movements, i.e., the dominant, mainstream social anarchist tradition. As Nicholas Walter put it:

“[The] serious study of anarchism should be based on fact rather than fantasy, and concentrate on people and movements that actually used the word. However old and wide the ideas of anarchism may be . . . no one called himself an anarchist before [Proudhon in] 1840, and no movement called itself anarchist before the 1870s . . . The actual anarchist movement was founded . . . by the anti-authoritarian sections of the First International . . . This was certainly the first anarchist movement, and this movement was certainly based on a

libertarian version of the concept of the class struggle.” [The Anarchist Past and other essays, pp. 60–1]

Unsurprisingly, the first anarchist symbols reflected the origins and ideas of this class struggle movement. Both the black and red-and-black flags were first used by revolutionary anarchists. The black flag was popularised in the 1880s by Louise Michel, a leading French communist-anarchist militant. From Europe it spread to America when the communist-anarchists of the **International Working People’s Association** raised it in their struggle against capitalism before being taken up by other revolutionary class struggle anarchists across the globe. The red-and-black flag was first used by the Italian section of the First International and this had been the first to move from collectivist to communist-anarchism in October 1876. [Nunzio Pernicone, **Italian Anarchism, 1864–1892**, p. 111] From there, it spread to Mexico and was used by anarchist labour militants there before being re-invented by the Spanish anarcho-sindicalists in the 1930s. Like anarchism itself, the anarchist flags are a product of the social struggle against capitalism and statism.

We would like to point out that this appendix is partly based on Jason Wehling’s 1995 essay **Anarchism and the History of the Black Flag**. Needless to say, this appendix does not cover all anarchists symbols. For example, recently the red-and-black flag has become complemented by the green-and-black flag of eco-anarchism (the symbolism of the green should need no explanation). Other libertarian popular symbols include the IWW inspired “**Wildcat**” (representing, of course, the spontaneity, direct action, solidarity and militancy of a wildcat strike), the “**Black Rose**” (inspired, no doubt, by the demand of striking IWW women workers in Lawrence, 1912, for not only bread, but for roses too) and the ironic “**little black bomb**” (among others). Here we concentrate on the three most famous ones.

1 What is the history of the Black Flag?

As is well known, the black flag is the symbol of anarchism. Howard Ehrlich has a great passage in his book **Reinventing Anarchy, Again** on why anarchists use it. It is worth quoting at length:

“Why is our flag black? Black is a shade of negation. The black flag is the negation of all flags. It is a negation of nationhood which puts the human race against itself and denies the unity of all humankind. Black is a mood of anger and outrage at all the hideous crimes against humanity perpetrated in the name of allegiance to one state or another. It is anger and outrage at the insult to human intelligence implied in the pretences, hypocrisies, and cheap chicaneries of governments . . . Black is also a colour of mourning; the black flag which cancels out the nation also mourns its victims the countless millions murdered in wars, external and internal, to the greater glory and stability of some bloody state. It mourns for those whose labour is robbed (taxed) to pay for the slaughter and oppression of other human beings. It mourns not only the death of the body but the crippling of the spirit under authoritarian and hierarchic systems; it mourns the millions of brain cells blacked out with never a chance to light up the world. It is a colour of inconsolable grief.

“But black is also beautiful. It is a colour of determination, of resolve, of strength, a colour by which all others are clarified and defined. Black is the mysterious surrounding of germination, of fertility, the breeding ground of new life which always evolves, renews, refreshes, and reproduces itself in darkness. The seed hidden in the earth, the strange journey of the sperm, the secret growth of the embryo in the womb all these the blackness surrounds and protects.

*“So black is negation, is anger, is outrage, is mourning, is beauty, is hope, is the fostering and sheltering of new forms of human life and relationship on and with this earth. The black flag means all these things. We are proud to carry it, sorry we have to, and look forward to the day when such a symbol will no longer be necessary.” [“Why the Black Flag?”, Howard Ehrlich (ed.), **Reinventing Anarchy, Again**, pp. 31–2]*

Here we discuss when and why anarchists first took up the black flag as our symbol.

There are ample accounts of the use of black flags by anarchists. Probably the most famous was Nestor Makhno's partisans during the Russia Revolution. Under the black banner, his army routed a dozen armies and kept a large portion of the Ukraine free from concentrated power for a good couple of years. On the black flag was embroidered "*Liberty or Death*" and "*The Land to the Peasant, The Factories to the Workers.*" [Voline, **The Unknown Revolution**, pp. 607–10] In 1925, the Japanese anarchists formed the **Black Youth League** and, in 1945, when the anarchist federation reformed, their journal was named **Kurohata (Black Flag)**. [Peter Marshall, **Demanding the Impossible**, pp. 525–6] In 1968, students carried black (and red) flags during the street fighting and General Strike in France, bringing the resurgence of anarchism in the 1960s into the view of the general public. The same year saw the Black Flag being raised at the American **Students for a Democratic Society** national convention. Two years later the British based magazine **Black Flag** was started and is still going strong. At the turn of the 21st century, the Black Flag was at the front of the so-called anti-globalisation protests. Today, if you go to any sizeable demonstration you will usually see the Black Flag raised by the anarchists present.

However, the anarchists' black flag originated much earlier than this. Louise Michel, famous participant in the Paris Commune of 1871, was instrumental in popularising the use of the Black Flag in anarchist circles. At a March 18th public meeting in 1882 to commemorate the Paris Commune she proclaimed that the "*red flag was no longer appropriate; [the anarchists] should raise the black flag of misery.*" [Edith Thomas, **Louise Michel**, p. 191] The following year she put her words into action. According to anarchist historian George Woodcock, Michel flew the black flag on March 9, 1883, during demonstration of the unemployed in Paris, France. An open air meeting of the unemployed was broken up by the police and around 500 demonstrators, with Michel at the front carrying a black flag and shouting "*Bread, work, or lead!*" marched off towards the Boulevard Saint-Germain. The crowd pillaged three baker's shops before the police attacked. Michel was arrested and sentenced to six years solitary confinement. Public pressure soon forced the granting of an amnesty. [**Anarchism**, pp. 251–2] August the same year saw the publication of the anarchist paper **Le Drapeau Noir (The Black Flag)** in Lyon which suggests that it had become a popular symbol within anarchist circles. ["*Sur la Symbolique anarchiste*", **Bulletin du CIRA**, no. 62, p. 2] However, anarchists had been using red-and-black flags a number of years previously (see next section) so Michel's use of the colour black was not totally without precedence.

Not long after, the black flag made its way to America. Paul Avrich reports that on November 27, 1884, it was displayed in Chicago at an anarchist demonstration. According to Avrich, August Spies, one of the Haymarket martyrs, "*noted that this was the first occasion on which [the black flag] had been unfurled on American soil.*" By January the following year, "*[s]treet parades and mass outdoor demonstrations, with red and black banners . . . were the most dramatic form of advertisement*" for the revolutionary anarchist movement in America. April 1885 saw Lucy Parsons and Lizzie Holmes at the head of a protest march "*each bearing a flag, one black, the other red.*" [**The Haymarket Tragedy**, p. 145, pp. 81–2 and p. 147] The Black Flag continued to be used by anarchists in America, with one being seized by police at an anarchist organised demonstration for the unemployed in 1893 at which Emma Goldman

spoke. [Emma Goldman: A Documentary History of the American Years, vol. 1, p. 144] Twenty one years later, Alexander Berkman reported on another anarchist inspired unemployed march in New York which raised the black flag in “menacing defiance in the face of parasitic contentment and self-righteous arrogance” of the “exploiters and well-fed idlers.” [“The Movement of the Unemployed”, Anarchy! An Anthology of Emma Goldman’s Mother Earth, p. 341]

It seems that black flags did not appear in Russia until the founding of the **Chernoie Znamia** (“**black banner**”) movement in 1905. With the defeat of that year’s revolution, anarchism went underground again. The Black Flag, like anarchism in general, re-emerged during the 1917 revolution. Anarchists in Petrograd took part in the February demonstrations which brought down Tsarism carrying black flags with “*Down with authority and capitalism!*” on them. As part of their activity, anarchists organised armed detachments in most towns and cities called “*Black Guards*” to defend themselves against counter-revolutionary attempts by the provisional government. As noted above, the Makhnovists fought Bolshevik and White dictatorship under Black Flags. On a more dreary note, February 1921 saw the end of black flags in Soviet Russia. That month saw Peter Kropotkin’s funeral take place in Moscow. Twenty thousand people marched in his honour, carrying black banners that read: “*Where there is authority there is no freedom.*” [Paul Avrich, **The Russian Anarchists**, p. 44, p. 124, p. 183 and p. 227] Only two weeks after Kropotkin’s funeral march, the Kronstadt rebellion broke out and anarchism was erased from Soviet Russia for good. With the end of Stalinism, anarchism with its Black Flag re-emerged all across Eastern Europe, including Russia.

While the events above are fairly well known, as has been related, the exact origin of the black flag is not. What is known is that a large number of Anarchist groups in the early 1880s adopted titles associated with black. In July of 1881, the Black International was founded in London. This was an attempt to reorganise the Anarchist wing of the recently dissolved First International. In October 1881, a meeting in Chicago led to the **International Working People’s Association** being formed in North America. This organisation, also known as the **Black International**, affiliated to the London organisation. [Woodcock, **Op. Cit.**, pp. 212–4 and p. 393] These two conferences are immediately followed by Michel’s demonstration (1883) and the black flags in Chicago (1884).

Thus it was around the early 1880s that anarchism and the Black Flag became inseparably linked. Avrich, for example, states that in 1884, the black flag “*was the new anarchist emblem.*” [**The Haymarket Tragedy**, p. 144] In agreement, Murray Bookchin reports that “*in later years, the Anarchists were to adopt the black flag*” when speaking of the Spanish Anarchist movement in 1870. [**The Spanish Anarchists**, p. 57] Walter and Heiner also note that “*it was adopted by the anarchist movement during the 1880s.*” [Kropotkin, **Act for Yourselves**, p. 128]

Now the question becomes why, exactly, black was chosen. The Chicago “*Alarm*” stated that the black flag is “*the fearful symbol of hunger, misery and death.*” [quoted by Avrich, **Op. Cit.**, p. 144] Bookchin asserts that anarchists were “*to adopt the black flag as a symbol of the workers misery and as an expression of their anger and bitterness.*” [**Op. Cit.**, p. 57] Historian Bruce C. Nelson also notes that the Black Flag was considered “*the emblem of hunger*”

when it was unfurled in Chicago in 1884. [**Beyond the Martyrs**, p. 141 and p. 150] While it “*was interpreted in anarchist circles as the symbol of death, hunger and misery*” it was “*also said to be the ‘emblem of retribution’*” and in a labour procession in Cincinnati in January 1885, “*it was further acknowledged to be the banner of working-class intransigence, as demonstrated by the words ‘No Quarter’ inscribed on it.*” [Donald C. Hodges, **Sandino’s Communism**, p. 21] For Berkman, it was the “*symbol of starvation and desperate misery.*” [**Op. Cit.**, p. 341] Louise Michel stated that the “*black flag is the flag of strikes and the flag of those who are hungry.*” [**Op. Cit.**, p. 168]

Along these lines, Albert Meltzer maintains that the association between the black flag and working class revolt “*originated in Rheims [France] in 1831 (‘Work or Death’) in an unemployed demonstration.*” [**The Anarcho-Quiz Book**, p. 49] He went on to assert that it was Michel’s action in 1883 that solidified the association. The links from revolts in France to anarchism are even stronger. As Murray Bookchin records, in Lyon “*[i]n 1831, the silk-weaving artisans . . . rose in armed conflict to gain a better **tarif**, or contract, from the merchants. For a brief period they actually took control of the city, under red and black flags — which made their insurrection a memorable event in the history of revolutionary symbols. Their use of the word **mutuelisme** to denote the associative disposition of society that they preferred made their insurrection a memorable event in the history of anarchist thought as well, since Proudhon appears to have picked up the word from them during his brief stay in the city in 1843–4.*” [**The Third Revolution**, vol. 2, p. 157] Sharif Gemie confirms this, noting that a police report sent to the Lyon prefect that said: “*The silk-weavers of the Croix-Rousse have decided that tomorrow they will go down to Lyon, carrying a black flag, calling for work or death.*” The revolt saw the Black Flag raised:

“*At eleven a.m. the silk-weavers’ columns descended the slopes of the Croix-Rousse. Some carried black flags, the colour of mourning and a reminder of their economic distress. Others pushed loaves of bread on the bayonets of their guns and held them aloft. The symbolic force of this action was reinforced by a repeatedly-shouted slogan: ‘bread or lead!’: in other words, if they were not given bread which they could afford, then they were prepared to face bullets. At some point during the rebellion, a more eloquent expression was devised: ‘**Vivre en travaillant ou mourir en combattant!**’ — ‘Live working or die by fighting!’ Some witnesses report seeing this painted on a black flag.*” [Sharif Gemie, **French Revolutions, 1815–1914**, pp. 52–53]

Kropotkin himself states that its use continued in the French labour movement after this uprising. He notes that the Paris Workers “*raised in June [1848] their black flag of ‘Bread or Labour’*” [**Act for Yourselves**, p. 100] Black flags were also hung from windows in Paris on the 1st of March, 1871, in defiance of the Prussians marching through the city after their victory in the Franco-Prussian War. [Stewart Edwards, **The Communards of Paris, 1871**, p. 25]

The use of the black flag by anarchists, therefore, is an expression of their roots and activity in the labour movement in Europe, particularly in France. The anarchist adoption of the Black Flag by the movement in the 1880s reflects

its use as “the traditional symbol of hunger, poverty and despair” and that it was “raised during popular risings in Europe as a sign of no surrender and no quarter.” [Walter and Becker, **Act for Yourselves**, p. 128] This is confirmed by the first anarchist journal to be called **Black Flag**: “On the heights of the city [of Lyon] in la Croix-Rousse and Vaise, workers, pushed by hunger, raised for the first time this sign of mourning and revenge [the black flag], and made therefore of it the emblem of workers’ demands.” [**Le Drapeau Noir**, no. 1, 12th August 1883] This was echoed by Louise Michel:

“How many wrathful people, young people, will be with us when the red and black banners wave in the wind of anger! What a tidal wave it will be when the red and black banners rise around the old wreck!

“The red banner, which has always stood for liberty, frightens the executioners because it is so red with our blood. The black flag, with layers of blood upon it from those who wanted to live by working or die by fighting, frightens those who want to live off the work of others. Those red and black banners wave over us mourning our dead and wave over our hopes for the dawn that is breaking.” [**The Red Virgin: Memoirs of Louise Michel**, pp. 193–4]

The mass slaughter of Communards by the French ruling class after the fall of the Paris Commune of 1871 could also explain the use of the Black Flag by anarchists at this time. Black “is the colour of mourning [at least in Western cultures], it symbolises our mourning for dead comrades, those whose lives were taken by war, on the battlefield (between states) or in the streets and on the picket lines (between classes).” [Chico, “letters”, **Freedom**, vol. 48, No. 12, p. 10] Given the 25 000 dead in the Commune, many of them anarchists and libertarian socialists, the use of the Black Flag by anarchists afterwards would make sense. Sandino, the Nicaraguan libertarian socialist (whose use of the red-and-black colours we discuss below) also said that black stood for mourning (“Red for liberty; black for mourning; and the skull for a struggle to the death” [Donald C. Hodges, **Sandino’s Communism**, p. 24]).

Regardless of other meanings, it is clear that anarchists took up the black flag in the 1880s because it was, like the red flag, a recognised symbol of working class resistance to capitalism. This is unsurprising given the nature of anarchist politics. Just as anarchists base our ideas on actual working class practice, we would also base our symbols on those created by that self-activity. For example, Proudhon as well as taking the term “mutualism” from radical workers also argued that co-operative “labour associations” had “spontaneously, without prompting and without capital been formed in Paris and in Lyon. . . the proof of it [mutualism, the organisation of credit and labour] . . . lies in current practice, revolutionary practice.” [**No Gods, No Masters**, vol. 1, pp. 59–60] He considered his ideas, in other words, to be an expression of working class self-activity. Indeed, according to K. Steven Vincent, there was “close similarity between the associational ideal of Proudhon . . . and the program of the Lyon Mutualists” and that there was “a remarkable convergence [between the ideas], and it is likely that Proudhon was able to articulate his positive program more coherently because of the example of the silk workers of Lyon. The socialist ideal that he championed was already being realised, to a certain extent, by such workers.” [**Pierre-Joseph Proudhon and the Rise of French Re-**

publican Socialism, p. 164] Other anarchists have made similar arguments concerning anarchism being the expression of tendencies within working class struggle against oppression and exploitation and so the using of a traditional workers symbol would be a natural expression of this aspect of anarchism.

Similarly, perhaps it is Louise Michel's comment that the Black Flag was the "*flag of strikes*" which could explain the naming of the **Black International** founded in 1881 (and so the increasing use of the Black Flag in anarchist circles in the early 1880s). Around the time of its founding congress Kropotkin was formulating the idea that this organisation would be a "*Strikers' International*" (**Internationale Greviste**) — it would be "*an organisation of resistance, of strikes.*" [quoted by Martin A. Miller, **Kropotkin**, p. 147] In December 1881 he discussed the revival of the International Workers Association as a **Strikers' International** for to "*be able to make the revolution, the mass of workers will have to organise themselves. Resistance and strikes are excellent methods of organisation for doing this.*" He stressed that the "*strike develops the sentiment of solidarity*" and argued that the First International "*was born of strikes; it was fundamentally a strikers' organisation.*" [quoted by Caroline Cahm, **Kropotkin and the Rise of Revolutionary Anarchism, 1872–1886**, p. 255 and p. 256]

A "*Strikers International*" would need the strikers flag and so, perhaps, the **Black International** got its name. This, of course, fits perfectly with the use of the Black Flag as a symbol of workers' resistance by anarchism, a political expression of that resistance.

However, the black flag did not instantly replace the red flag as the main anarchist symbol. The use of the red flag continued for some decades in anarchist circles. Thus we find Kropotkin writing in the early 1880s of "*anarchist groups . . . rais[ing] the red flag of revolution.*" As Woodcock noted, the "*black flag was not universally accepted by anarchists at this time. Many, like Kropotkin, still thought of themselves as socialists and of the red flag as theirs also.*" [**Words of a Rebel**, p. 75 and p. 225] In addition, we find the Chicago anarchists using both black and red flags all through the 1880s. French Anarchists carried three red flags at the funeral of Louise Michel's mother in 1885 as well as at her own funeral in January 1905. [Louise Michel, **Op. Cit.**, p. 183 and p. 201] Anarchist in Japan, for example, demonstrated under red flags bearing the slogans "*Anarchy*" and "*Anarchist Communism*" in June, 1908. [John Crump, **Hatta Shuzo and Pure Anarchism in Interwar Japan**, p. 25] Three years later, the Mexican anarchists declared that they had "*hoisted the Red Flag on Mexico's fields of action*" as part of their "*war against Authority, war against Capital, and war against the Church.*" They were "*fighting under the Red Flag to the famous cry of 'Land and Liberty.'*" [Ricardo Flores Magon, **Land and Liberty**, p. 98 and p. 100]

So for a considerable period of time anarchists used red as well as black flags as their symbol. The general drift away from the red flag towards the black must be placed in the historical context. During the 1880s the socialist movement was changing. Marxist social democracy was becoming the dominant socialist trend, with libertarian socialism going into relative decline in many areas. Thus the red flag was increasingly associated with the authoritarian and statist (and increasingly reformist) side of the socialist movement. In order to distinguish themselves from other socialists, the use of the black flag makes perfect sense as it was it an accepted symbol of working class revolt like the red flag.

After the Russian Revolution and its slide into dictatorship (first under Lenin, then Stalin) anarchist use of the red flag decreased as it no longer “stood for liberty.” Instead, it had become associated, at worse, with the Communist Parties or, at best, bureaucratic, reformist and authoritarian social democracy. This change can be seen from the Japanese movement. As noted above, before the First World War anarchists there had happily raised the red flag but in the 1920s they unfurled the black flag. Organised in the **Kokushoku Seinen Renmei** (Black Youth League), they published **Kokushoku Seinen** (Black Youth). By 1930, the anarchist theoretical magazine **Kotushoku Sensen** (Black Battlefront) had been replaced by two journals called **Kurohata** (Black Flag) and **Kuhusen** (Black Struggle). [John Crump, **Op. Cit.**, pp. 69–71 and p. 88]

According to historian Candace Falk, “[t]hough black has been associated with anarchism in France since 1883, the colour red was the predominant symbol of anarchism throughout this period; only after the First World War was the colour black widely adopted.” [**Emma Goldman: A Documentary History of the American Years**, vol. 1, p. 208fn] As this change did not occur overnight, it seems safe to conclude that while anarchism and the black flag had been linked, at the latest, from the early 1880s, it did not become the definitive anarchist symbol until the 1920s (Carlo Tresca in America was still talking of standing “beneath the red flag that is the immaculate flag of the anarchist idea” in 1925. [quoted by Nunzio Pernicone, **Carlo Tresca: Portrait of a Rebel**, p. 161]). Before then, anarchists used both it and the red flag as their symbols of choice. After the Russian Revolution, anarchists would still use red in their flags, but only when combined with black. In this way they would not associate themselves with the tyranny of the USSR or the reformism and statism of the mainstream socialist movement.

2 Why the red-and-black flag?

The red-and-black flag has been associated with anarchism for some time. Murray Bookchin placed the creation of this flag in Spain:

“The presence of black flags together with red ones became a feature of Anarchist demonstrations throughout Europe and the Americas. With the establishment of the CNT, a single flag on which black and red were separated diagonally, was adopted and used mainly in Spain.” [**The Spanish Anarchists**, p. 57]

George Woodcock also stressed the Spanish origin of the flag:

“The anarcho-syndicalist flag in Spain was black and red, divided diagonally. In the days of the [First] International the anarchists, like other socialist sects, carried the red flag, but later they tended to substitute for it the black flag. The black-and-red flag symbolised an attempt to unite the spirit of later anarchism with the mass appeal of the International.” [**Anarchism**, p. 325fn]

According to Abel Paz, anarchist historian and CNT militant in the 1930s, the 1st of May, 1931, was *“the first time in history [that] the red and black flag flew over a CNT-FAI rally.”* This was the outcome of an important meeting of CNT militants and anarchist groups to plan the May Day demonstrations in Barcelona. One of the issues to be resolved was *“under what flag to march.”* One group was termed the *“Red Flag”* anarchists (who *“put greater emphasis on labour issues”*), the other *“Black Flag”* anarchists (who were *“more distant (at the time) from economic questions”*). However, with the newly proclaimed Republic there were *“tremendous opportunities for mass mobilisations”* which made disagreements on how much emphasis to place on labour issues *“meaningless.”* This allowed an accord to be reached with its *“material expression”* being *“making the two flags into one: the black and red flag.”* [**Durruti in the Spanish Revolution**, p. 206]

However, the red-and-black flag was used by anarchists long before 1931, indeed decades before the CNT was even formed. In fact, it, rather than the black flag, may well have been the first specifically anarchist flag.

The earliest recorded use of the red-and-black colours was during the attempted Bologna insurrection of August 1874 where participants were *“sporting the anarchists’ red and black cockade.”* [Nunzio Pernicone, **Italian Anarchism**,

1864–1892, p. 93] In April 1877, a similar attempt at provoking rebellion saw anarchists enter the small Italian town of Letino “wearing red and black cockades” and carrying a “red and black banner.” These actions helped to “captur[e] national attention” and “draw considerable notice to the International and its socialist programme.” [Nunzio Pernicone, **Op. Cit.**, pp. 124–5 and pp. 126–7] Significantly, another historian notes that the insurgents in 1874 were “decked out in the red and black emblem of the International” while three years later they were “prominently displaying the red and black anarchist flag.” [T. R. Ravindranathan, **Bakunin and the Italians**, p. 208 and p. 228] Thus the black-and-red flag, like the black flag, was a recognised symbol of the labour movement (in this case, the Italian section of the First International) before becoming linked to anarchism.

The red-and-black flag was used by anarchists a few years later in Mexico. At an anarchist protest meeting on December 14th, 1879, at Columbus Park in Mexico City “[s]ome five thousand persons gathered replete with numerous red-and-black flags, some of which bore the inscription ‘La Social, Liga Internacional del Jura.’ A large black banner bearing the inscription ‘La Social, Gran Liga Internacional’ covered the front of the speaker’s platform.” The links between the Mexican and European anarchist movements were strong, as the “nineteenth-century Mexican urban labour-movement maintained direct contact with the Jura branch of the . . . European-based First International Workingmen’s Association and at one stage openly affiliated with it.” [John M. Hart, **Anarchism and the Mexican Working Class, 1860–1931**, p. 58 and p. 17] One year after it was founded, the anarchist influenced **Casa del Obrero Mundial** organised Mexico’s first May Day demonstration in 1913 and “between twenty and twenty-five thousand workers gathered behind red and black flags” in Mexico City. [John Lear, **Workers, Neighbors, and Citizens**, p. 236]

Augusto Sandino, the radical Nicaraguan national liberation fighter was so inspired by the example of the Mexican anarcho-syndicalists that he based his movement’s flag on their red-and-black ones (the Sandinista’s flag is divided horizontally, rather than diagonally). As historian Donald C. Hodges notes, Sandino’s “red and black flag had an anarcho-syndicalist origin, having been introduced into Mexico by Spanish immigrants.” Unsurprisingly, his flag was considered a “workers’ flag symbolising their struggle for liberation.” (Hodges refers to Sandino’s “peculiar brand of anarcho-communism” suggesting that his appropriation of the flag indicated a strong libertarian theme to his politics). [**Intellectual Foundations of the Nicaraguan Revolution**, p. 49, p. 137 and p. 19]

This suggests that the red-and-black flag was rediscovered by the Spanish Anarchists in 1931 rather than being invented by them. However, the CNT-FAI seem to have been the first to bisect their flags diagonally black and red (but other divisions, such as horizontally, were also used). In the English speaking world, though, the use of the red-and-black flag by anarchists seems to spring from the world-wide publicity generated by the Spanish Revolution in 1936. With CNT-FAI related information spreading across the world, the use of the CNT inspired diagonally split red-and-black flag also spread until it became a common anarchist and anarcho-syndicalist symbol in all countries.

For some, the red-and-black flag is associated with anarcho-syndicalism more than anarchism. As Albert Meltzer put it, “[t]he flag of the labour movement (not necessarily only of socialism) is red. The CNT of Spain originated the

red-and-black of anarchosyndicalism (anarchism plus the labour movement)." [**Anarcho-Quiz Book**, p. 50] Donald C. Hodges makes a similar point, when he states that "[o]n the insignia of the Mexico's House of the World Worker [the Mexican anarcho-syndicalist union], the red band stood for the economic struggle of workers against the proprietary classes, and the black for their insurrectionary struggle." [**Sandino's Communism**, p. 22]

This does not contradict its earliest uses in Italy and Mexico as those anarchists took it for granted that they should work within the labour movement to spread libertarian ideas. Therefore, it is not surprising we find movements in Mexico and Italy using the same flags. Both were involved in the First International and its anti-authoritarian off-spring. Both, like the Jura Federation in Switzerland, were heavily involved in union organising and strikes. Given the clear links and similarities between the collectivist anarchism of the First International (the most famous advocate of which was Bakunin) and anarcho-syndicalism, it is not surprising that they used similar symbols. As Kropotkin argued, "*Syndicalism is nothing other than the rebirth of the International — federalist, worker, Latin.*" [quoted by Martin A. Miller, **Kropotkin**, p. 176] So a rebirth of symbols would not be a co-incidence.

Thus the red-and-black flag comes from the experience of anarchists in the labour movement and is particularly, but not exclusively, associated with anarcho-syndicalism. The black represents libertarian ideas and strikes (i.e. direct action), the red represents the labour movement. Over time association with anarcho-syndicalism has become less noted, with many non-syndicalist anarchists happy to use the red-and-black flag (many anarcho-communists use it, for example). It would be a good generalisation to state that social anarchists are more inclined to use the red-and-black flag than individualist anarchists just as social anarchists are usually more willing to align themselves with the wider socialist and labour movements than individualists (in modern times at least). However, both the red and black flags have their roots in the labour movement and working class struggle which suggests that the combination of both flags into one was a logical development. Given that the black **and** red flags were associated with the Lyon uprising of 1831, perhaps the development of the red-and-black flag is not too unusual. Similarly, given that the Black Flag was the "*flag of strikes*" (to quote Louise Michel — see above) its use with the red flag of the labour movement seems a natural development for a movement like anarchism and anarcho-syndicalism which bases itself on direct action and the importance of strikes in the class struggle.

So while associated with anarcho-syndicalism, the red-and-black flag has become a standard anarchist symbol as the years have gone by, with the black still representing anarchy and the red, social co-operation or solidarity. Thus the red-and-black flag more than any one symbol symbolises the aim of anarchism ("*Liberty of the individual and social co-operation of the whole community*" [Peter Kropotkin, **Act for Yourselves**, p. 102]) as well as its means ("*[t]o make the revolution, the mass of workers will have to organise themselves. Resistance and the strike are excellent means of organisation for doing this*" and "*the strike develops the sentiment of solidarity.*" [Kropotkin, quoted by Caroline Cahm, **Kropotkin and the Rise of Revolutionary Anarchism: 1872–1186**, p. 255 and p. 256]).

3 Where does the circled-A come from?

The circled-A is, perhaps, even more famous than the Black and Red-and-Black flags as an anarchist symbol (probably because it lends itself so well to graffiti). According to Peter Marshall the “*circled-A*” represents Proudhon’s maxim “*Anarchy is Order.*” [**Demanding the Impossible** p. 558] Peter Peterson also adds that the circle is “*a symbol of unity and determination*” which “*lends support to the off-proclaimed idea of international anarchist solidarity.*” [“*Flag, Torch, and Fist: The Symbols of Anarchism*”, **Freedom**, vol. 48, No. 11, pp. 8]

However, the origin of the “circled-A” as an anarchist symbol is less clear. Many think that it started in the 1970s punk movement, but it goes back to a much earlier period. According to Peter Marshall, “[i]n 1964 a French group, **Jeunesse Libertaire**, gave new impetus to Proudhon’s slogan ‘Anarchy is Order’ by creating the circled-A a symbol which quickly proliferated throughout the world.” [**Op. Cit.**, p. 445] This is not the earliest sighting of this symbol. On November 25 1956, at its foundation in Brussels, the **Alliance Ouvriere Anarchiste** (AOA) adopted this symbol. Going even further, a BBC documentary on the Spanish Civil War shows an anarchist militia member with a “circled-A” clearly on the back of his helmet. Other than this, there is little know about the “circled-A”’s origin.

Today the circled-A is one of the most successful images in the whole field of political symbolising. Its “*incredible simplicity and directness led [it] to become the accepted symbol of the restrengthened anarchist movement after the revolt of 1968*” particularly as in many, if not most, of the world’s languages the word for anarchy begins with the letter A. [Peter Peterson, **Op. Cit.**, p. 8]

Appendix: Anarchism and Marxism

This appendix exists to refute some of the many anti-anarchist diatribes produced by Marxists. While we have covered why anarchists oppose Marxism in section H, we thought it would be useful to reply to Marxist webpages and books whose content is not explicitly covered in that section. In this way we hope to indicate that Marxism is a flawed theory, flawed even to the extent of not being able to present a honest critique of anarchism. This consistent attempt to smear anarchism and distort its history and ideas is no co-incidence — rather it is required in order to present Marxism as the only viable form of socialism and, more importantly, to hide the fact that much of the populist Marxist rhetoric was, in fact, said by anarchists first and latter stolen by Marxists to hide the authoritarian basis of their politics.

One last point. We are aware that we repeat many of our arguments in these appendices. That, unfortunately, is avoidable for two reasons. Firstly, Marxists usually repeat the same false assertions against anarchism and so we have to answer them each time they appear. Marxists seem to subscribe to the point of view that repeating an error often enough makes it true. Secondly, we have tried to make each appendix as self-contained as possible and that meant repeating certain material and arguments to achieve this. We hope the reader understands.

Reply to errors and distortions in David McNally's pamphlet "*Socialism from Below*"

Since this appendix was first written, David McNally has distanced himself from his pamphlet's critique of anarchism. In an end-note in his book **Another World Is Possible: Globalization & Anti-Capitalism** he wrote:

*"I dissent from Draper's one-sided critique of anarchism . . . Draper is not fair to some of the currents within social anarchism. I also reject my own restatement of Draper's interpretation in the first edition of my booklet **Socialism from Below**"* [David McNally, **Another World Is Possible**, p. 393]

While it seems unlikely this was in response to reading our critique, it does show that it was correct. Unfortunately it took McNally over 20 years to acknowledge that his 1980 essay gave a distinctly distorted account of anarchism. Perhaps significantly, McNally no longer seems to be associated with the sister organisations of the British **Socialist Workers Party** (a group whose distortions of anarchism are infamous).

McNally now argues that "*it may be more helpful to try and defend a common political vision — such as socialism from below or libertarian socialism — as a point of reference*" rather than fixate over labels like "Marxism" or "anarchism." [**Op. Cit.**, p. 347] As we noted in our critique of his 1980 pamphlet, the term "*socialism from below*" has a distinctly anarchist feel to it, a feel distinctly at odds with Leninist ideology and practice. Moreover, as shown below, Lenin explicitly denounced "*from below*" as an anarchist idea — and his practice once in power showed that "*from above*" is part and parcel of Leninism in action.

AFAQ Blog has a posting on this issue. In addition, many of the issues discussed in this appendix are also explored in section H of the FAQ and that should also be consulted. This is particularly the case as that section has been completed and revised after this appendix was completed.

1. Introduction

In chapter three of his pamphlet *Socialism from Below*, David McNally decides to expose (what he calls) “*The Myth Of Anarchist Libertarianism.*” In reality, his account is so distorted and, indeed, dishonest that all it proves is that Marxists will go to extreme lengths to attack anarchist ideas. As Brain Morris points out, defending the Leninist tradition and ideology “*implies . . . a compulsive need to rubbish anarchism.*” [Ecology & Anarchism, p. 128] McNally’s pamphlet is a classic example of this. As we will prove, his “case” is a mish-mash of illogical assertions, lies and, when facts do appear, their use is simply a means of painting a false picture of reality.

He begins by noting that “*Anarchism is often considered to represent [a] current of radical thought that is truly democratic and libertarian. It is hailed in some quarters as the only true political philosophy [of] freedom.*” Needless to say, he thinks that the “*reality is quite different.*” He argues that “[f]rom its inception anarchism has been a profoundly anti-democratic doctrine. Indeed the two most important founders of anarchism, Pierre-Joseph Proudhon and Michael Bakunin, developed theories that were elitist and authoritarian to the core.” We will discover the truth of this assertion later. However, we must note that McNally uses the typical Marxist approach to attacking anarchism — namely to attack anarchists rather than anarchism as such. Indeed, he lamely notes that “[w]hile later anarchists may have abandoned some of the excesses of their founding fathers their philosophy remains hostile to ideas of mass democracy and workers’ power.” Thus, we have the acknowledgement that not all anarchists share the same ideas and that anarchist theory has developed since 1876 (the year of Bakunin’s death). This is to be expected as anarchists are not Proudhonists or Bakuninists — we do not name ourselves after one person, rather we take what is useful from libertarian writers and ignore the rubbish. In Malatesta’s words, “[w]e follow ideas and not men, and rebel against this habit of embodying a principle in a man.” [Life and Ideas, p. 199] However, this is beside the point as McNally’s account of the anarchism of Proudhon and Bakunin is simply false — indeed, so false as to make you wonder if he is simply incompetent as a scholar or seeks to present a patchwork of lies as fact and “theory.”

2. Is anarchism the politics of the “*small property owner*”?

McNally does start out by acknowledging that “*anarchism developed in opposition to the growth of capitalist society. What’s more, anarchist hostility to capitalism centred on defence of the liberty of the individual.*” However, he then distorts this actual historical development by arguing that “*the liberty defended by the anarchists was not the freedom of the working class to make collectively a new society. Rather, anarchism defended the freedom of the small property owner — the shopkeeper, artisan and tradesman — against the encroachments of large-scale capitalist enterprise.*”

Such a position is, to say the least, a total distortion of the facts of the situation. Proudhon, for example, addressed himself to both the peasant/artisan and the proletariat. He argued in **What is Property?** that he “*preach[ed]*

emancipation to the proletaires; association to the labourers.” [p. 137] Thus Proudhon addressed himself to both the peasant/artisan and the “working class” (i.e. wage slaves). This is to be expected from a **libertarian** form of socialism as, at the time of his writing, the majority of working people **were** peasants and artisans . Indeed, this predominance of artisan/peasant workers in the French economy lasted until the turn of the century. Not to take into account the artisan/peasant would have meant the dictatorship of a minority of working people over the rest of them. Given that in chapter 4 of his pamphlet McNally states that Marxism aims for a “*democratic and collective society . . . based upon the fullest possible political democracy*” his attack on Proudhon’s concern for the artisan and peasant is doubly strange. Either you support the “*fullest possible political democracy*” (and so your theory must take into account artisans and peasants) or you restrict political democracy and replace it with rule by the few.

Thus Proudhon **did** support the “*the freedom of the working class to make collectively a new society.*” His ideas were aimed at both artisan/peasant and proletarian. Moreover, this position was a distinctly sensible and radical position to take:

“While Marx was correct in predicting the eventual predominance of the industrial proletariat vis-à-vis skilled workers, such predominance was neither obvious nor a foregone conclusion in France during the nineteenth century. The absolute number of small industries even increased during most of the century. . .

Nor does Marx seem to have been correct concerning the revolutionary nature of the industrial proletariat. It has become a cliché of French labour history that during the nineteenth century artisans were much oftener radical than industrial workers. Some of the most militant action of workers in late nineteenth century France seems to have emerged from the co-operation of skilled, urbanised artisanal workers with less highly skilled and less urbanised industrial workers.” [K. Steven Vincent, **Pierre-Joseph Proudhon and the Rise of French Republican Socialism**, pp. 282–3]

The fruits of this union included the Paris Commune (an event both McNally and Marx praise — see section 12 for more discussion on this). In addition, as we will see, Proudhon’s proposals for a mutualist society included workers self-management and collective ownership of large scale workplaces as well as artisan and peasant production. This proposal existed **explicitly** for the proletariat, for wage slaves, and **explicitly** aimed to end wage labour and replace it by association and self-management (Proudhon stated that he aimed for “*the complete emancipation of the worker . . . the abolition of the wage worker.*” [quoted by Vincent, **Op. Cit.**, p. 222]). Thus, rather than being backward looking and aimed at the artisan/peasant, Proudhon’s ideas looked to the present (and so the future) and to both the artisan/peasant **and** proletariat (i.e. to the **whole** of the working class in France at the time).

In the words of Gustav Landauer, Proudhon’s “*socialism . . . of the years 1848 to 1851 was the socialism of the French people in the years 1848 to 1851. It was the socialism that was possible and necessary at that moment. Proudhon was not a Utopian and a prophet; not a Fourier and not a Marx. He was a man of action and realisation.*” [**For Socialism**, p. 108] Vincent makes

the same point, arguing that Proudhon's "social theories may not be reduced to a socialism for only the peasant class, nor was it a socialism only for the petite bourgeois; it was a socialism of and for French workers. And in the mid-nineteenth century . . . most French workers were still artisans. . . French labour ideology largely resulted from the real social experiences and aspirations of skilled workers . . . Proudhon's thought was rooted in the same fundamental reality, and therefore understandably shared many of the same hopes and ideals." [Op. Cit., pp. 5–6] It is no coincidence, therefore, that when he was elected to the French Parliament in 1848 most of the votes cast for him were from "working class districts of Paris — a fact which stands in contrast to the claims of some Murrists, who have said he was representative only of the petite bourgeoisie." [Robert L. Hoffman, quoted by Robert Graham, "Introduction", P-J Proudhon, **General Idea of the Revolution**, p. xv]

Given that his proposals were aimed at the whole working class, it is unsurprising that Proudhon saw social change as coming from "below" by the collective action of the working class:

"If you possess social science, you know that the problem of association consists in organising . . . the producers, and by this organisation subjecting capital and subordinating power. Such is the war that you have to sustain: a war of labour against capital; a war of liberty against authority; a war of the producer against the non-producer; a war of equality against privilege . . . to conduct the war to a successful conclusion, . . . it is of no use to change the holders of power or introduce some variation into its workings: an agricultural and industrial combination must be found by means of which power, today the ruler of society, shall become its slave." [System of Economical Contradictions, pp. 397–8]

In the same work he continues his discussion of proletarian self-organisation as the means of social change:

"Thus power [i.e. the state] . . . finds itself inevitably enchained to capital and directed against the proletariat. . . The problem before the labouring classes, then, consists, not in capturing, but in subduing both power and monopoly, — that is, in generating from the bowels of the people, from the depths of labour, a greater authority, a more potent fact, which shall envelop capital and the State and subjugate them. Every proposition of reform which does not satisfy this condition is simply one scourge more . . . which threatens the proletariat." [Op. Cit., p. 399]

Little wonder Proudhon saw the validity of his mutualist vision from the self-activity of French workers (see section A.1.5 for details). Where Proudhon differs from later anarchists like Bakunin, Kropotkin, Malatesta and Goldman is that this self-activity is reformist in nature, that is seeking alternatives to capitalism which can reform it away rather than alternatives that can fight and destroy it. Thus Proudhon places his ideas firmly in the actions of working people resisting wage slavery (i.e. the proletariat, **not** the "small property owner").

Similarly with Bakunin. He argued that "revolution is only sincere, honest and real in the hands of the masses" and so socialism can be achieved "by

the development and organisation, not of the political but of the social (and, by consequence, anti-political) power of the working masses . . . organise[d] and federate[d] spontaneously, freely, from the bottom up, by their own momentum according to their real interest, but never according to any plan laid down in advance and imposed upon the ignorant masses by some superior intellects." Such a socialist society would be based on *"the collective ownership of producers' associations, freely organised and federated in the communes, and by the equally spontaneous federation of these communes."* Thus *"the land, the instruments of work and all other capital [will] become the collective property of the whole of society and be utilised only by the workers, in other words by the agricultural and industrial associations."* And the means to this socialist society? Trade unionism (*"the complete solidarity of individuals, sections and federations in the economic struggle of the workers of all countries against their exploiters."*) [Michael Bakunin: Selected Writings, p. 237, pp. 197–8, p. 197, p. 174 and p. 177] Indeed, he considered trade unions (organised from the bottom up, of course) as *"the natural organisation of the masses"* and thought that *"workers' solidarity in their struggle against the bosses . . . [by] trades-unions, organisation, and the federation of resistance funds"* was the means by which workers could emancipate itself *"through practical action."* [The Basic Bakunin, p. 139 and p. 103]

And McNally asserts that *"the liberty defended by the anarchists was not the freedom of the working class to make collectively a new society"*! Only someone ignorant of anarchist theory or with a desire to deceive could make such an assertion.

Needless to say, McNally's claim that anarchism is the politics of the *"small property owner"* would be even harder to justify if he mentioned Kropotkin's **communist** anarchism. However, like Proudhon's and Bakunin's support for collective ownership by workers associations it goes unmentioned — for obvious reasons.

3. Does anarchism *"glorify values from the past"*?

McNally continues. He asserts, regardless of the facts, that anarchism *"represented the anguished cry of the small property owner against the inevitable advance of capitalism. For that reason, it glorified values from the past: individual property, the patriarchal family, racism."*

Firstly, we should note that unlike Marx, anarchists did not think that capitalism was inevitable or an essential phase society had to go through before we could reach a free society. They did not share Marx's viewpoint that socialism (and the struggle for socialism) had to be postponed until capitalism had developed sufficiently so that the *"centralisation of the means of production and the socialisation [sic!] of labour reach a point at which they become incompatible with their capitalist integument."* [Karl Marx, **Capital**, vol. 1, p. 929] As McNally states, socialism was once the *"banner under which millions of working people resisted the horrors of the factory system and demanded a new society of equality, justice, freedom and prosperity."* Unfortunately, the Marxist tradition viewed such horrors as essential, unavoidable and inevitable and any form of working class struggle — such as the Luddites — which resisted the development of capitalism was denounced. So much for Marxism being in

favour of working class “*self-emancipation*” — if working class resistance to oppression and exploitation which does not fit into its scheme for “working class self-emancipation” then it is the product of ignorance or non-working class influences.

Thus, rather than representing “*the anguished cry of the small property owner against the inevitable advance of capitalism*” anarchism is rather the cry of the oppressed against capitalism and the desire to create a free society in the here and now and not some time in the future. To quote Landauer again:

“*Karl Marx and his successors thought they could make no worse accusation against the greatest of all socialists, Proudhon, than to call him a petit-bourgeois and petit-peasant socialist, which was neither incorrect nor insulting, since Proudhon showed splendidly to the people of his nation and his time, predominately small farmers and craftsmen, how they could achieve socialism immediately without waiting for the tidy process of big capitalism.*” [Op. Cit., p. 61]

Thus McNally confuses a desire to achieve socialism with backward looking opposition to capitalism. As we will see, Proudhon looked at the current state of society, not backwards, as McNally suggests, and his theory reflected both artisan/peasant interests and those of wage slaves — as would be expected from a socialist aiming to transform his society to a free one. The disastrous results of Bolshevik rule in Russia should indicate the dangers of ignoring the vast bulk of a nation (i.e. the peasants) when trying to create a revolutionary change in society.

Secondly, it is not really true that Proudhon or Bakunin “glorified” “individual property” as such. Proudhon argued that “*property is theft*” and that “*property is despotism.*” He was well aware of the negative side effects of individual property. Rather he wanted to abolish property and replace it with possession. We doubt that McNally wants to socialise **all** “*property*” (including individual possessions and such like). We are sure that he, like Marx and Engels, wants to retain individual possessions in a socialist society. Thus they state that the “*distinguishing feature of Communism is not the abolition of property generally, but the abolition of bourgeois property*” and that “*Communism deprives no man of the power to appropriate the products of society; all that it does is to deprive him of the power to subjugate the labour of others by means of such appropriation.*” [The Manifesto of the Communist Party, p.47 and p. 49] Later Marx argued that the Paris Commune “*wanted to make individual property a truth by transforming the means of production, land and capital . . . into mere instruments of free and associated labour.*” [Selected Writings, pp. 290–1]

Thus support for “*individual property*” is not confined to Proudhon (and we must note that Proudhon desired to turn capital over to associated labour as well — see section A.5.1 for Proudhon’s influence in the economic measures made during the Commune to create co-operatives).

Indeed, initially Marx had nothing but praise for Proudhon’s critique of Property contained in his classic work **What is Property?**:

“*Not only does Proudhon write in the interest of the proletarians he is himself a proletarian, an ouvrier. His work is a scientific man-*

ifesto of the French proletariat.” [quoted by Rudolf Rocker, **Marx and Anarchism**]

As Rocker argues, Marx changed his tune simply to “*conceal from everyone just what he owed to Proudhon and any means to that end was admissible.*” This can be seen from the comments we quote above which clearly show a Proudhonian influence in their recognition that possession replaces property in a socialist society and that associated labour is its economic basis. However, it is still significant that Proudhon’s analysis initially provoked such praise by Marx — an analysis which McNally obviously does not understand.

It is true that Proudhon did oppose the socialisation of artisan and peasant workplaces. He considered having control over the means of production, housing, etc. by those who use it as a key means of maintaining freedom and independence. However, Proudhon also called for “*democratically organised workers’ associations*” to run large-scale industry in his 1848 Election Manifesto. [**No Gods, No Masters**, vol. 1, p. 62] This aspect of his ideas is continual throughout his political works and played a central role in his social theory. Thus to say that Proudhon “glorified” “individual property” distorts his position. And as the experience of workers under Lenin indicates, collective ownership by the state does not end wage labour, exploitation and oppression. Proudhon’s arguments in favour of possession and against capitalist **and** state ownership were proven right by Bolshevik Russia — state ownership did lead to “*more wage slavery.*” [**Ibid.**] As the forced collectivisation of the peasantry under Stalin shows, Proudhon’s respect for artisan/peasant possessions was a very sensible and humane position to take. Unless McNally supports the forced collectivisation of peasants and artisans, Proudhon’s solution is one of the few positions a socialist can take.

Moving on from Proudhon, we discover even less support for “individual property.” Bakunin, for example, was totally in favour of collective property and opposed individual property in the means of life. As he put it, “*the land, the instruments of work and all other capital [will] become the collective property of society and by utilised only by the workers, in other words by the agricultural and industrial associations.*” [**Michael Bakunin: Selected Writings**, p. 174] With regards to peasants and artisans Bakunin desired **voluntary** collectivisation. “*In a free community,*” he argued, “*collectivism can only come about through the pressure of circumstances, not by imposition from above but by a free spontaneous movement from below.*” [**Bakunin on Anarchism**, p. 200]). Thus, rather than being a defender of “individual property” Bakunin was in fact a supporter of **collective** property (as organised in workers’ associations and communes) and supported peasant and artisan property only in the sense of being against forced collectivisation (which would result in “*propelling [the peasants] into the camp of reaction.*” [**Op. Cit.**, p. 197]).

Hence Daniel Guerin’s comments:

“Proudhon and Bakunin were ‘collectivists,’ which is to say they declared themselves without equivocation in favour of the common exploitation, not by the State but by associated workers of the large-scale means of production and of the public services. Proudhon has been quite wrongly presented as an exclusive enthusiast of private property. . . At the Bale congress [of the First International] in 1869,

Bakunin . . . all[ied] himself with the statist Marxists . . . to ensure the triumph of the principle of collective property. [“From Proudhon to Bakunin”, **The Radical Papers**, Dimitrios I. Roussopoulos (ed.), p.32]

Similarly, while it is true that Proudhon **did** glorify the patriarchal family, the same cannot be said of Bakunin. Unlike Proudhon, Bakunin argued that “[e]qual rights must belong to both men and women,” that women must “become independent and free to forge their own way of life” and that “[o]nly when private property and the State will have been abolished will the authoritarian juridical family disappear.” He opposed the “absolute domination of the man” in marriage, urged “the full sexual freedom of women” and argued that the cause of women’s liberation was “indissolubly tied to the common cause of all the exploited workers — men and women.” [**Bakunin on Anarchism**, pp. 396–7] Hardly what would be considered as the glorification of the patriarchal family — and a position shared by Kropotkin, Malatesta, Berkman, Goldman, Chomsky and Ward. Thus to state that “anarchism” glorifies the patriarchal family simply staggers belief. Only someone ignorant of both logic and anarchist theory could make such an assertion. We could make similar remarks with regards to the glorification of racism (as Robert Graham points out “anti-semitism formed no part of Proudhon’s revolutionary programme.” [**Op. Cit.**, p. xxxvi] The same can be said of Bakunin).

4. Why are McNally’s comments on Proudhon a distortion of his ideas?

McNally now attempts to provide some evidence for his remarks. He turns to Pierre-Joseph Proudhon, “widely proclaimed ‘the father of anarchism.’” As he correctly notes, he was a “printer by vocation” and that he “strongly opposed the emergence of capitalism in France.” However, McNally claims that Proudhon’s “opposition to capitalism was largely backward-looking in character” as he “did not look forward to a new society founded upon communal property which would utilise the greatest inventions of the industrial revolution. Instead, Proudhon considered small, private property the basis of his utopia. His was a doctrine designed not for the emerging working class, but for the disappearing petit bourgeoisie of craftsmen, small traders and rich peasants.” Unfortunately McNally has got his facts wrong. It is well known that this was not the case (which is why McNally used the words “largely backward-looking” — he is aware of facts but instead downplays them).

If you look at Proudhon’s writings, rather than what Marx and Engels **claimed** he wrote, it will soon be discovered that Proudhon in fact **favoured** collective ownership of large scale industry by workers’ associations. He argued for “the mines, canals, railways handed over to democratically organised workers’ associations . . . We want these associations to be models for agriculture, industry and trade, the pioneering core of that vast federation of companies and societies woven into the common cloth of the democratic social Republic.” [**No Gods, No Masters**, vol. 1, p. 62] Three years later he stressed that “[e]very industry, operation or enterprise which by its nature requires the employment of a large number of workmen of different specialities, is destined to become a soci-

ety or company of workers.” [The General Idea of the Revolution, p. 216] This argument for workers’ self-management and collective ownership follows on from his earlier comment in 1840 that “leaders” within industry “must be chosen from the labourers by the labourers themselves.” [What is Property?, p. 414]

Rather than base his utopia on “small, private property” Proudhon based it on the actual state of the French economy — one marked by both artisan and large-scale production. The later he desired to see transformed into the collective property of workers’ associations and placed under workers’ self-management. The former, as it did not involve wage-labour, he supported as being non-capitalist. Thus his ideas were aimed at both the artisan and the appearing class of wage slaves. Moreover, rather than dismiss the idea of large-scale industry in favour of “small, private property” Proudhon argued that “[l]arge industry . . . come to us by big monopoly and big property: it is necessary in the future to make them rise from the [labour] association.” [quoted by K. Steven Vincent, Proudhon and the Rise of French Republican Socialism, p. 156] As Vincent correctly summarises:

“On this issue, it is necessary to emphasise that, contrary to the general image given on the secondary literature, Proudhon was not hostile to large industry. Clearly, he objected to many aspects of what these large enterprises had introduced into society. For example, Proudhon strenuously opposed the degrading character of . . . work which required an individual to repeat one minor function continuously. But he was not opposed in principle to large-scale production. What he desired was to humanise such production, to socialise it so that the worker would not be the mere appendage to a machine. Such a humanisation of large industries would result, according to Proudhon, from the introduction of strong workers’ associations. These associations would enable the workers to determine jointly by election how the enterprise was to be directed and operated on a day-to-day basis.” [Op. Cit., p. 156]

As can be seen, McNally distorts Proudhon’s ideas on this question.

McNally correctly states that Proudhon “oppose[d] trade unions.” While it is true that Proudhon opposed strikes as counter-productive as well as trade unions, this cannot be said of Bakunin, Kropotkin, Goldman, and so on. Bakunin, for example, considered trade unions as truest means of expressing the power of the working class and strikes as a sign of their “collective strength.” [The Basic Bakunin, pp. 149–50] Why should Proudhon (the odd man out in anarchist theory with regards to this issue) be taken as defining that theory? Such an argument is simply dishonest and presents a false picture of anarchist theory.

Next McNally states that Proudhon “violently opposed democracy” and presents a series of non-referenced quotes to prove his case. Such a technique is useful for McNally as it allows him quote Proudhon without regard to when and where Proudhon made these comments and the context in which they were made. It is well known, for example, that Proudhon went through a reactionary phase roughly between 1852 and 1862 and so any quotes from this period would be at odds with his anarchist works. As Daniel Guerin notes:

“Many of these masters were not anarchists throughout their lives

and their complete works include passages which have nothing to do with anarchism.

“To take an example: in the second part of his career Proudhon’s thinking took a conservative turn.” [**Anarchism**, p. 6]

Similarly, McNally fails to quote the many statements Proudhon made in favour of democracy. Why should the anti-democratic quotes represent anarchism and not the pro-democratic ones? Which ones are more in line with anarchist theory and practice? Surely the pro-democratic ones. Hence we find Proudhon arguing that “[i]n democratising us, revolution has launched us on the path of industrial democracy” and that his People’s Bank “embodies the financial and economic aspects of modern democracy, that is, the sovereignty of the People, and of the republican motto, **Liberty, Equality, Fraternity**.” We have already mentioned Proudhon’s support for workers’ self-management of production and his People’s Bank was also democratic in nature — “A committee of thirty representatives shall be set up to see to the management of the Bank . . . They will be chosen by the General Meeting . . . [which] shall consist of not more than one thousand nominees of the general body of associates and subscribers . . . elected according to industrial categories and in proportion to the number of subscribers and representatives there are in each category.” [**Selected Writings of Pierre-Joseph Proudhon**, p. 63, p. 75 and p. 79] Thus, instead of bourgeois democracy Proudhon proposes industrial and communal democracy:

“In place of laws, we will put contracts [i.e. free agreement]. — No more laws voted by a majority, nor even unanimously; each citizen, each town, each industrial union, makes its own laws.” [**The General Idea of the Revolution**, pp. 245–6]

“If political right is inherent in man and citizen, consequently if suffrage ought to be direct, the same right is inherent as well, so much the more so, for each corporation [i.e. self-managed industry], for each commune or city, and the suffrage in each of these groups, ought to be equally direct.” [quoted by K. Steven Vincent, **Op. Cit.**, p. 219]

“In order that the association may be real, he who participates in it must do so . . . as an active factor; he must have a deliberative voice in the council . . . everything regarding him, in short, should be regulated in accordance with equality. But these conditions are precisely those of the organisation of labour.” [quoted by K. Steven Vincent, **Op. Cit.**, pp. 155–6]

Do these quotes suggest a man “violently opposed [to] democracy”? Of course not. Nor does McNally quote Proudhon when he stated that “[b]esides universal suffrage and as a consequence of universal suffrage, we want implementation of the binding mandate. Politicians balk at it! Which means that in their eyes, the people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy.” He also supported freedom of association, assembly, religion, of the press and of thought and speech. [**No Gods, No Masters**, vol. 1, p. 63] Nor does McNally note Proudhon’s aim of (and use of the term) “industrial democracy”

which would be “*a reorganisation of industry, under the jurisdiction of all those who compose it.*” [quoted by Vincent, **Op. Cit.**, p. 225] As can be seen, Proudhon’s position on democracy is not quite what McNally suggests.

Thus McNally presents a distorted picture of Proudhon’s ideas and thus leads the reader to conclusions about anarchism violently at odds with its real nature. It is somewhat ironic that McNally attacks Proudhon for being anti-democratic. After all, as we indicate in section 8 below, the Leninist tradition in which he places himself has a distinct contempt for democracy and, in practice, destroyed it in favour of party dictatorship.

Lastly, McNally states that Proudhon “*opposed emancipation for the American blacks and backed the cause of the southern slave owners during the American Civil War.*” In fact, the American Civil War had very little to do with slavery and far more to do with conflicts within the US ruling class. Proudhon opposed the North simply because he feared the centralisation that such a victory would create. He did not “*tolerate*” slavery. As he wrote in **The Principle of Federation** “*the enslavement of part of a nation denies the federal principle itself.*” [p. 42f] Moreover, what are we to draw from Proudhon’s position with regards the American Civil War about anarchism? Bakunin supported the North (a fact unmentioned by McNally). Why is Proudhon’s position an example of anarchism in practice and not Bakunin’s? Could it be that rather than attack anarchism, McNally attacks anarchists?

Also, it is somewhat ironic that McNally mentions Proudhon’s “support” for the South as the Leninist tradition he places his own politics is renown for supporting various dictatorships during wars. For example, during the Vietnam war the various Leninist groups called for victory to North Vietnam, a Stalinist dictatorship. During the Gulf War, they called for victory to Iraq, another dictatorship. In other words, they “tolerated” and “supported” anti-working class regimes, dictatorships and repression of democracy. They stress that they do not politically support these regimes, rather they wish these states to win in order to defeat the greater evil of imperialism. In practice, of course, such a division is hard to defend — for a state to win a war it must repress its own working class and so, in calling for a victory for a dictatorship, they must support the repression and actions that state requires to win the war. After all, an explosion of resistance, class struggle and revolt in the “lesser imperialist power” will undermine its war machine and so lead to its defeat. Hence the notion that such calls do not mean support for the regime is false. Hence McNally’s comments against Proudhon smack of hypocrisy — his political tradition have done similar things and sided with repressive dictatorships during wars in the name of political aims and theory. In contrast, anarchists have consistently raised the idea of “*No war but the class war*” in such conflicts (see section A.3.4).

5. Why are McNally’s comments on Bakunin a distortion of his ideas?

McNally then moves on to Bakunin whom he states “*shared most of Proudhon’s views.*” The truth is somewhat different. Unlike Proudhon, Bakunin supported trade unions and strikes, equality for women, revolution and far more extensive

collectivisation of property. In fact, rather than share most of his views, Bakunin disagreed with Proudhon on many subjects. He did share Proudhon's support for industrial self-management, self-organisation in self-managed workers' associations from below, his hatred of capitalism and his vision of a decentralised, libertarian socialist society. It is true that, as McNally notes, "*Bakunin shared [Proudhon's] anti-semitism*" but he fails to mention Marx and Engels' many racist remarks against Slavs and other peoples. Also it is not true that Bakunin "*was a Great Russian chauvinist convinced that the Russians were ordained to lead humanity into anarchist utopia.*" Rather, Bakunin (being Russian) hoped Russia would have a libertarian revolution, but he also hoped the same for France, Spain, Italy and all countries in Europe (indeed, the world). Rather than being a "*Great Russian chauvinist*" Bakunin opposed the Russian Empire (he wished "*the destruction of the Empire of All the Russias*") [**The Basic Bakunin**, p. 162]) and supported national liberation struggles of nationalities oppressed by Russia (and any other imperialist nation).

McNally moves on to Bakunin's on revolutionary organisation methods, stating that they "*were overwhelmingly elitist and authoritarian.*" We have discussed this question in some detail in section J.3.7 (Doesn't Bakunin's "*Invisible Dictatorship*" prove that anarchists are secret authoritarians?) and so will not do so here. However, we should point out that Bakunin's viewpoints on the organisational methods of mass working class organisations and those of political groupings were somewhat different.

The aim of the political grouping was to exercise a "*natural influence*" on the members of working class unions and associations, seeking to convince them of the validity of anarchist ideas. The political group did not aim to seize political power (unlike Marxists) and so it "*rule[d] out any idea of dictatorship and custodial control.*" Rather the "*revolution would be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations ... organised from below upwards by means of revolutionary delegation.*" All the political group could do was to "*assist the birth of the revolution by sowing ideas corresponding to the instincts of the masses ... [and act] as intermediaries between the revolutionary idea and the popular instinct.*" The political group thus "*help[s] the people towards self-determination on the lines of the most complete equality and the fullest freedom in every direction, without the least interference from any sort of domination.*" [**Michael Bakunin: Selected Writings**, p. 172 and p. 191]

As regards the forms of popular organisations Bakunin favoured, he was clear it would be based on "*factory, artisan, and agrarian sections*" and their federations [**Statism and Anarchy**, p. 51]. In other words, trade unions organised from the bottom up and based upon self-management in "*general membership meetings ... [i.e.] popular assemblies ... [where] the items on the agenda were amply discussed and the most progressive opinion prevailed.*" The "*federative alliance of all the workers' associations ... will constitute the commune ... [with] deputies invested with imperative, always responsible, and always revocable mandates.*" [**Bakunin on Anarchism**, p. 247 and p. 153]

Given McNally's praise of the Paris Commune and the Russian soviets, it seems strange that Bakunin's comments with regards to revolutionary social organisation with its obvious parallels to both should not be mentioned by McNally. Perhaps because to do so would totally undermine his case? Thus rather than being "*overwhelmingly elitist and authoritarian*" Bakunin's ideas

on a future society far marked similarities to the actual structures created by working people in struggle and are marked by libertarian and self-managed visions and concepts — as anyone familiar with Bakunin’s work would know.

McNally then quotes “*one historian*” on Bakunin (not even providing a name makes evaluating the accuracy of the historian’s work impossible and so leaves the reader in the dark as to whether the historian does provide a valid account of Bakunin’s ideas). The unnamed author states that:

“The International Brotherhood he founded in Naples in 1865–66 was as conspiratorial and dictatorial as he could make it, for Bakunin’s libertarianism stopped short of the notion of permitting anyone to contradict him. The Brotherhood was conceived on the Masonic model, with elaborate rituals, a hierarchy, and a self-appointed directory consisting of Bakunin and a few associates.”

However, as we argue in section J.3.7, this description of Bakunin’s secret societies is so distorted as to be useless. To point to just **two** examples, the historian T.R. Ravindranathan indicates that after the Alliance was founded “*Bakunin wanted the Alliance to become a branch of the International [Worker’s Association] and at the same time preserve it as a secret society. The Italian and some French members wanted the Alliance to be totally independent of the IWA and objected to Bakunin’s secrecy. Bakunin’s view prevailed on the first question as he succeeded in convincing the majority of the harmful effects of a rivalry between the Alliance and the International. On the question of secrecy, he gave way to his opponents. . .*” [**Bakunin and the Italians**, p. 83] Moreover, the Spanish section of the Alliance “*survived Bakunin . . . yet with few exceptions it continued to function in much the same way as it had done during Bakunin’s lifetime.*” [George R. Esenwein, **Anarchist Ideology and the Working Class Movement in Spain**, p. 43] Hardly what you would expect if McNally’s vision was accurate.

In summary, McNally’s comments are a distortion of Bakunin’s ideas and activities. McNally represents a distorted picture of one aspect of Bakunin’s ideas while ignoring those aspects which support working class self-organisation and self-management.

6. Are the “*quirks of personality*” of Proudhon and Bakunin listed by McNally actually rooted “*in the very nature of anarchist doctrine*”?

After chronicling the failings and distorting the facts of two individuals, McNally tries to generalise. “*These characteristics of Bakunin and Proudhon,*” he argues, “*were not mere quirks of personality. Their elitism, authoritarianism and support for backward-looking and narrow-minded causes are rooted in the very nature of anarchist doctrine.*” Thus McNally claims that these failings of Proudhon and Bakunin are not personal failings but rather political. They represent the reactionary core of anarchist politics. However, his position leaves something to be desired. For example, the question remains, however, why, say, Proudhon’s support of the South during the American Civil War is an example of “*anarchist doctrine*” while Bakunin’s support of the North is

not. Or why Proudhon's opposition to trade unions and strikes is an example of "anarchist doctrine" while Bakunin's (and Kropotkin's, Malatesta's, Berkman's, Goldman's, etc) support for strikes and union organisation is not. Or why Proudhon's sexism is another example but Bakunin's, Kropotkin's, Goldman's, Malatesta's, et al support for women's equality is not. Indeed, rather than take examples which are common to anarchist theorists McNally takes only those positions held by one, at most two, major anarchist thinkers (positions tangential to the core of their ideas and, indeed, directly opposed to them). From this minority of examples he generalises a theory — and so violates the basic principles of the scientific method!

These examples in themselves prove the weakness of McNally's claims and the low levels of scholarship which lay behind them. Indeed, it is amazing that the SWP/ISO printed this diatribe — it obviously shows their contempt for facts, history and the intelligence of their desired audience.

7. Are anarchists against democracy?

McNally goes onto assert the following:

“Originating in the revolt of small property owners against the centralising and collectivising trends in capitalist development (the tendency to concentrate production in fewer and fewer large workplaces), anarchism has always been rooted in a hostility to democratic and collectivist practices. The early anarchists feared the organised power of the modern working class.”

We have already refuted the claim that the “*early anarchists feared the organised power of the modern working class.*” We will now indicate why McNally is wrong to claim that anarchists express “*hostility to democratic and collectivist practices.*”

As indicated above Proudhon supported collective ownership and management of large-scale workplaces (i.e. those which employ wage-slaves under capitalism). Thus he clearly was in favour of economic direct democracy and collective decision making by groups of workers. Similarly, Bakunin also supported workers' productive associations like co-operatives and envisioned a free society as being based on workers' collective ownership and the self-management of production by the workers themselves. In addition, he supported trade unions and saw the future society as being based on federations of workers' associations. To claim that anarchists are hostile to democratic and collectivist practices is simply not true. As would be clear to anyone reading their works.

McNally then asserts that “[t]o this day, most anarchists defend the ‘liberty’ of the private individual against the democratically made decisions of collective groups.” Here McNally takes a grain of truth to create a lie. Yes, anarchists **do** defend the liberty of individuals to rebel against the decisions of collective groups (we should point out that Marxists usually use such expressions as a euphemism for the state, but here we will take it at face value). Why? For two reasons. Firstly, the majority is not always right. Secondly, simply because progress is guaranteed by individual liberty — by **dissent**. That is what McNally is attacking here — the right of individuals and groups to dissent, to express themselves and live their own lives.

As we argue in section A.2.11, most anarchists are in favour of direct democracy in free associations. However, we agree with Carole Pateman when she argues:

“The essence of liberal social contract theory is that individuals ought to promise to, or enter an agreement to, obey representatives, to whom they have alienated their right to make political decisions . . . Promising . . . is an expression of individual freedom and equality, yet commits individuals for the future. Promising also implies that individuals are capable of independent judgement and rational deliberation, and of evaluating and changing their own actions and relationships; promises may sometimes justifiably be broken. However, to promise to obey is to deny or limit, to a greater or lesser degree, individuals’ freedom and equality and their ability to exercise these capacities. To promise to obey is to state that, in certain areas, the person making the promise is no longer free to exercise her capacities and decide upon her own actions, and is no longer equal, but subordinate.” [**The Problem of Political Obligation**, p. 19]

Thus, for anarchists, a democracy which does not involve individual rights to dissent, to disagree and to practice civil disobedience would violate freedom and equality, the very values McNally claims to be at the heart of Marxism. He is essentially arguing that the minority becomes the slave of the majority — with no right of dissent when the majority is wrong. In effect, he wishes the minority to be subordinate, not equal, to the majority. Anarchists, in contrast, because they support self-management also recognise the importance of dissent and individuality — in essence, because they are in favour of self-management (“democracy” does not do the concept justice) they also favour the individual freedom that is its rationale. We support the liberty of private individuals because we believe in self-management (“democracy”) so passionately.

Simply put, Marxism (as McNally presents it here) flies in the face of how societies change and develop. New ideas start with individuals and minorities and spread by argument and by force of example. McNally is urging the end of free expression of individuality. For example, who would seriously defend a society that “democratically” decided that, say, homosexuals should not be allowed the freedom to associate freely? Or that inter-racial marriage was against “Natural Law”? Or that socialists were dangerous subversives and should be banned? He would, we hope (like all sane people), recognise the rights of individuals to rebel against the majority when the majority violate the spirit of association, the spirit of freedom and equality which should give democracy its rationale.

Indeed, McNally fails to understand the rationale for democratic decision making — it is not based on the idea that the majority is always right but that individual freedom requires democracy to express and defend itself. By placing the collective above the individual, McNally undermines democracy and replaces it with little more than tyranny by the majority (or, more likely, those who claim to represent the majority).

If we take McNally’s comments seriously then we must conclude that those members of the German (and other) Social Democratic Party who opposed their party’s role in supporting the First World War were acting in inappropriately. Rather than express their opposition to the war and act to stop it, according

to McNally’s “logic” they should have remained in their party (after all, **leaving** the party meant ignoring the democratic decision of a collective group!), accepted the democratic decision of collective groups and supported the Imperialist slaughter in the name of democracy. Of course, McNally would reject such a position — in **this** case the rights of minorities take precedence over the “*democratic decisions of collectives.*” This is because the majority is not always right and it is only through the dissent of individuals and minorities that the opinion of the majority can be moved towards the right one. Thus his comments are fallacious.

Progress is determined by those who dissent and rebel against the status quo and the decisions of the majority. That is why anarchists support the right of dissent in self-managed groups — in fact, as we argue in section A.2.11, dissent, refusal, revolt by individuals and minorities is a key aspect of self-management. Given that Leninists do not support self-management (rather they, at best, support the Lockean notion of electing a government as being “democracy”) it is hardly surprising they, like Locke, views dissent as a danger and something to denounce. Anarchists, on the other hand, recognising that self-management’s (i.e. direct democracy) rationale and base is in individual freedom, recognise and support the rights of individuals to rebel against what they consider as unjust impositions. As history shows, the anarchist position is the correct one — without rebellion, numerous minorities would never have improved their position. Indeed, McNally’s comments is just a reflection of the standard capitalist diatribe against strikers and protestors — they don’t need to protest, for they live in a “democracy.”

So, yes, anarchists do support individual freedom to resist even democratically made decisions simply because democracy **has to be** based on individual liberty. Without the right of dissent, democracy becomes a joke and little more than a numerical justification for tyranny. Thus McNally’s latter claim that the “*challenge is to restore to socialism its democratic essence, its passionate concern with human freedom*” seems farcical — after all, he has just admitted that Marxism aims to eliminate individual freedom in favour of “*collective groups*” (i.e. the government). Unless of course he means freedom for the abstraction “humanity” rather than concrete freedom of the individual to govern themselves as individuals and as part of freely joined self-managed associations? For those who really seek to restore to socialism its passionate concern for freedom the way it clear — anarchism. Hence Murray Bookchin’s comments:

*“Marxism[’s] . . . perspectives are orientated not towards concrete, existential freedom, but towards an abstract freedom — freedom for ‘Society’, for the ‘Proletariat’, for **categories** rather than for people.”* [Post Scarcity Anarchism, pp. 225–6]

Anarchism, on the other hand, favours freedom for people and that implies two things — individual freedom and self-management (direct democracy) in free associations. Any form of “democracy” not based on individual freedom would be so contradictory as to be useless as a means to human freedom (and vice versa, any form of “individual freedom” — such a liberalism — which denies self-management would be little more than a justification for minority rule and a denial of human freedom).

Ultimately, McNally’s attack on anarchism fails simply because the majority is not always right and dissent a key to progress. That he forgets these basic

facts of life indicates the depths to which Marxists will sink to distort the truth about anarchism.

Not that those in the Bolshevik tradition have any problem with individuals ignoring the democratic decisions of collective groups. The Bolsheviks were very happy to let individuals ignore and revoke the democratic decisions of collective groups — **as long as the individuals in question were the leaders of the Bolshevik Party**. As the examples we provide later (in section 8) indicate, leading lights in the Leninist tradition happily placed the rights of the party before the rights of working people to decide their own fate.

Thus McNally comments are strange in the extreme. Both anarchists and Leninists share a belief that individuals can and should have the right to ignore decisions made by groups. However, Leninists seem to think only the government and leadership of the Party should have that right while anarchists think **all** should. Unlike the egalitarian support for freedom and dissent for all anarchists favour, Leninists have an elitist support for the right of those in power to ignore the wishes of those they govern. Thus the history of Marxist parties in power expose McNally as a hypocrite. As we argue in section 14, Marxist ideology provides the rationale for such action.

Moreover, in spite of McNally's claim that the Leninist tradition is democratic we find Lenin arguing that the *"irrefutable experience of history has shown that . . . the dictatorship of individual persons was often the vehicle, the channel of the dictatorship of the revolutionary classes."* [quoted by Maurice Brinton, **The Bolsheviks and Workers Control**, p. 40] Such a comment is not an isolated one, as we indicate in section 8 and indicates well the anti-democratic nature of the tradition McNally places himself in. Thus McNally's attempt to portray anarchism as "anti-democratic" is somewhat ironic.

And we must note, as well as refuting McNally's claim that Leninism is a democratic tradition, Lenin's comments display a distinct confusion over the nature of a **social** revolution (rather than a political one). Yes, **previous** revolutions may have utilised the dictatorship of individuals but these revolutions have been revolutions from one class system to another. The "revolutionary" classes in question were **minority** classes and so elite rule would not in any way undermine their class nature. Not so with a **socialist** revolution which must be based on mass participation (in every aspect of society, economic, political, social) if it is to achieve its goals — namely a classless society. Little wonder, with such theoretical confusion, that the Russian revolution ended in Stalinism — the means used determined the ends (see sections 13 and 14 for more discussion of this point).

McNally then states that anarchists *"oppose even the most democratic forms of collective organisation of social life. As the Canadian anarchist writer George Woodcock explains: 'Even were democracy possible, the anarchist would still not support it . . . Anarchists do not advocate political freedom. What they advocate is freedom from politics . . . ' That is to say, anarchists reject any decision-making process in which the majority of people democratically determine the policies they will support."*

First, we must point out a slight irony in McNally's claim. The irony is that Marxists usually claim that they seek a society similar to that anarchists seek. In the words of Marx:

"What all socialists understand by anarchy is this: once the aim of

the proletarian movement, the abolition of classes, has been attained, the power of the State . . . disappears, and the functions of government are transformed into simple administrative functions." [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 76]

So, Marxists and anarchists seek the same society, one of individual freedom. Hence McNally's comments about anarchism also apply (once the state "withers away", which it never will) to Marxism. But, of course, McNally fails to mention this aspect of Marxism and its conflict with anarchism.

However, our comments above equally apply here. Anarchists are not opposed to people in free associations democratically determining the policies they will support (see section A.2.11 for more details on this). What we **do** oppose is the assumption that the majority is always right and that minorities should submit to the decisions of the majority no matter how wrong they are. We feel that history is on our side on this one — it is only by the freedom to dissent, by the direct action of minorities to defend and extend their freedoms that society progresses. Moreover, we feel that theory is on our side — majority rule without individual and minority rights is a violation of the principle of freedom and equality which democracy is said to be built on.

Democracy should be an expression of individual liberty but in McNally's hands it is turned into bourgeois liberalism. Little wonder Marxism has continually failed to produce a free society. It has no conception of the relationship of individual freedom to democracy and vice versa.

8. Are Leninists in favour of democracy?

McNally's attack on Proudhon (and anarchism in general) for being "anti-democratic" is somewhat ironic. After all, the Leninist tradition he places himself in did destroy democracy in the workers' soviets and replaced it with party dictatorship. Thus his attack on anarchism can be turned back on his politics, with much more justification and evidence.

For example, in response to the "*great Bolshevik losses in the soviet elections*" during the spring and summer of 1918 "*Bolshevik armed force usually overthrew the results of these provincial elections . . . [In] the city of Izhevsk [for example] . . . in the May election [to the soviet] the Mensheviks and SRs won a majority . . . In June, these two parties also won a majority of the executive committee of the soviet. At this point, the local Bolshevik leadership refused to give up power . . . [and by use of the military] abrogated the results of the May and June elections and arrested the SR and Menshevik members of the soviet and its executive committee.*" In addition, "*the government continually postponed the new general elections to the Petrograd Soviet, the term of which had ended in March 1918. Apparently, the government feared that the opposition parties would show gains.*" [Samuel Farber, **Before Stalinism**, pp. 23–4 and p. 22]

In the workplace, the Bolsheviks replaced workers' economic democracy with "*one-man management*" selected from above, by the state ("*The elective principle must now be replaced by the principle of selection*" — Lenin). Trotsky did not consider this a result of the Civil War — "*I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the*

path of one-man management in the sphere of economic administration much sooner and much less painfully.” [quoted by M. Brinton, **The Bolsheviks and Workers’ Control**, p. 63 and pp. 66–7] He pushed the ideas of “*militarisation of labour*” as well as abolishing democratic forms of organisation in the military (this later policy occurred **before** the start of the Civil War — as Trotsky put it, the “*elective basis is politically pointless and technically inexpedient and has already been set aside by decree*” [quoted by Brinton, **Op. Cit.**, pp.37–8]).

In May 1921, the All-Russian Congress of the Metalworkers’ Union met. The “*Central Committee of the [Communist] Party handed down to the Party faction in the union a list of recommended candidates for **union** (sic!) leadership. The metalworkers’ delegates voted down the list, as did the Party faction in the union . . . The Central Committee of the Party disregarded every one of the votes and appointed a Metalworkers’ Committee of its own. So much for ‘elected and revocable delegates.’ Elected by the union rank and file and revocable by the Party leadership!*” [M. Brinton, **Op. Cit.**, p. 83]

These are a few examples of Trotsky’s argument that you cannot place “*the workers’ right to elect representatives above the party. As if the Party were not entitled to assert its dictatorship even if that dictatorship clashed with the passing moods of the workers’ democracy!*” He continued by stating the “*Party is obliged to maintain its dictatorship . . . regardless of temporary vacillations even in the working class . . . The dictatorship does not base itself at every moment on the formal principle of a workers’ democracy.*” [quoted by Brinton, **Op. Cit.**, p. 78]

Thus, **when in power**, Trotsky did not “*insist against all odds that socialism was rooted in the struggle for human freedom*” as McNally claims he did in the 1920s and 1930s (as we discuss in section 15, Trotsky did not do it then either). Rather, he thought that the “*very principle of compulsory labour is for the Communist quite unquestionable . . . the only solution to economic difficulties from the point of view of both principle and of practice is to treat the population of the whole country as the reservoir of the necessary labour power . . . and to introduce strict order into the work of its registration, mobilisation and utilisation.*” Can human freedom be compatible with the “*introduction of compulsory labour service [which] is unthinkable without the application . . . of the methods of militarisation of labour*”? Or when the “*working class cannot be left wandering round all over Russia. They must be thrown here and there, appointed, commanded, just like soldiers.*” [**Op. Cit.**, p. 66 and p. 61]

Of course McNally tries to blame the destruction of democracy in Russia on the Civil War but, as indicated above, the undermining of democracy started **before** the civil war started and continued after it had finished. The claim that the “working class” had been destroyed by the war cannot justify the fact that attempts by working class people to express themselves were systematically undermined by the Bolshevik party. Nor does the notion of an “*exhausted*” or “*disappeared*” working class make much sense when “*in the early part of 1921, a spontaneous strike movement . . . took place in the industrial centres of European Russia*” and strikes involving around 43 000 per year took place between 1921 and 1925. [Samuel Farber, **Op. Cit.**, p. 188 and p. 88] While it is undeniable that the working class was reduced in numbers because of the civil war, it cannot be said to have been totally “exhausted” and, obviously, did survive the war and was more than capable of collective action and decision making. Strikes, as Bakunin argued, “*indicate a certain collective strength*” and so rather

than there being objective reasons for the lack of democracy under Lenin we can suggest **political** reasons — the awareness that, given the choice, the Russian working class would have preferred someone else in power!

Also, we must point out a certain ingenuity in McNally's comments that Stalinism can be explained purely by the terrible civil war Russia experienced. After all, Lenin himself stated that every "*revolution . . . , in its development, would give rise to exceptionally complicated circumstances*" and "[r]evolution is the sharpest, most furious, desperate class war and civil war. Not a single great revolution in history has escaped civil war. No one who does not live in a shell could imagine that civil war is conceivable without exceptionally complicated circumstances." [**Will the Bolsheviks Maintain Power?**, p. 80 and p. 81] Thus McNally's assertion that for "*the germ cell of socialism to grow [in Russia], it required several essential ingredients. One was peace. The new workers' state could not establish a thriving democracy so long as it was forced to raise an army and wage war to defend itself*" is simply incredible. It also raises an important question with regards Leninist ideas. If the Bolshevik political and organisational form cannot survive during a period of disruption and complicated circumstances then it is clearly a theory to be avoided at all costs.

Therefore, in practice, Leninism has proven to be profoundly anti-democratic. As we argue in sections 13 and 14 this is due to their politics — the creation of a "*strong government and centralism*" will inevitably lead to a new class system being created [Lenin, **Will the Bolsheviks Maintain Power?**, p. 75] This is not necessarily because Leninists seek dictatorship for themselves. Rather it is because of the nature of the state machine. In the words of Murray Bookchin:

"Anarchist critics of Marx pointed out with considerable effect that any system of representation would become a statist interest in its own right, one that at best would work against the interests of the working classes (including the peasantry), and that at worst would be a dictatorial power as vicious as the worst bourgeois state machines. Indeed, with political power reinforced by economic power in the form of a nationalised economy, a 'workers' republic' might well prove to be a despotism (to use one of Bakunin's more favourite terms) of unparalleled oppression."

He continues:

"Republican institutions, however much they are intended to express the interests of the workers, necessarily place policy-making in the hands of deputies and categorically do not constitute a 'proletariat organised as a ruling class.' If public policy, as distinguished from administrative activities, is not made by the people mobilised into assemblies and confederally co-ordinated by agents on a local, regional, and national basis, then a democracy in the precise sense of the term does not exist. The powers that people enjoy under such circumstances can be usurped without difficulty. . . [I]f the people are to acquire real power over their lives and society, they must establish — and in the past they have, for brief periods of time established — well-ordered institutions in which they themselves directly formulate the policies of their communities and, in the case of their regions, elect confederal functionaries, revocable and strictly controllable, who

will execute them. Only in this sense can a class, especially one committed to the abolition of classes, be mobilised as a class to manage society. [The Communist Manifesto: Insights and Problems]

This is why anarchists stress direct democracy (self-management) in free federations of free associations. It is the only way to ensure that power remains in the hands of the people and is not turned into an alien power above them. Thus Marxist support for statist forms of organisation will inevitably undermine the liberatory nature of the revolution. Moreover, as indicated in section 14, their idea of the party being the “vanguard” of the working class, combined with its desire for centralised power, makes the dictatorship of the party over the proletariat inevitable.

9. Why is McNally wrong on the relation of syndicalism to anarchism?

After slandering anarchism, McNally turns towards another form of libertarian socialism, namely syndicalism. It is worth quoting him in full as his comments are truly ridiculous. He states that there is “another trend which is sometimes associated with anarchism. This is syndicalism. The syndicalist outlook does believe in collective working class action to change society. Syndicalists look to trade union action — such as general strikes — to overthrow capitalism. Although some syndicalist viewpoints share a superficial similarity with anarchism — particularly with its hostility to politics and political action — syndicalism is not truly a form of anarchism. By accepting the need for mass, collective action and decision-making, syndicalism is much superior to classical anarchism.”

What is ridiculous about McNally’s comments is that all serious historians who study the links between anarchism and syndicalism agree that **Bakunin** (for want of a better expression) is the father of syndicalism (see section J.3.8 — indeed, many writers point to syndicalist aspects in Proudhon’s ideas as well but here we concentrate on Bakunin)! Bakunin looked to trade union action (including the general strike) as the means of overthrowing capitalism and the state. Thus Arthur Lehning’s comment that “*Bakunin’s collectivist anarchism . . . ultimately formed the ideological and theoretical basis of anarcho-syndicalism*” is totally true and indicative. [“Introduction”, **Michael Bakunin: Selected Writings**, p. 29] As is Rudolf Rocker’s:

“Modern Anarcho-syndicalism is a direct continuation of those social aspirations which took shape in the bosom of the First International and which were best understood and most strongly held by the libertarian wing of the great workers’ alliance.” [Anarcho-Syndicalism, p. 49]

Little wonder, then, we discover Caroline Cahm pointing out “*the basic syndicalist ideas of Bakunin*” and that he “*argued that trade union organisation and activity in the International [Working Men’s Association] were important in the building of working-class power in the struggle against capital . . . He also declared that trade union based organisation of the International would not only*

guide the revolution but also provide the basis for the organisation of the society of the future.” Indeed, he “believed that trade unions had an essential part to play in the developing of revolutionary capacities of the workers as well as building up the organisation of the masses for revolution.” [Kropotkin and the Rise of Revolutionary Anarchism, p. 219, p. 215 and p. 216] Cahm quotes Bakunin on the role of the general strike:

“When strikes spread by contagion, it is because they are close to becoming a general strike, and a general strike in view of the ideas of emancipation which hold sway over the proletariat, can only lead to a cataclysm which would make society start a new life after shedding its old skin.” [Op. Cit., p. 217]

Or George R. Esenwein’s comment that syndicalism “had deep roots in the Spanish libertarian tradition. It can be traced to Bakunin’s revolutionary collectivism.” He also notes that the class struggle was “central to Bakunin’s theory.” [Op. Cit., p. 209 and p. 20]

Perhaps, in the face of such evidence (and the writings of Bakunin himself), Marxists like McNally could claim that the sources we quote are either anarchists or “sympathetic” to anarchism. To counter this we will quote Marx and Engels. According to Marx Bakunin’s theory consisted of urging the working class to “only organise themselves by trades-unions” and “not occupy itself with *politics*.” Engels asserted that in the “Bakuninist programme a general strike is the lever employed by which the social revolution is started” and that they admitted “this required a well-formed organisation of the working class” (i.e. a trade union federation). [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 48, p. 132 and p. 133] Ignoring the misrepresentations of Marx and Engels about the theories of their enemies, we can state that they got the basic point of Bakunin’s ideas — the centrality of trade union organisation and struggle as well as the use of strikes and the general strike.

(As an aside, ironically enough, Engels distorted diatribe against Bakunin and the general strike was later used against more radical Marxists like Rosa Luxemburg — usually claimed by Leninists as part of their tradition — by the reformists in Social Democratic Parties. For orthodox Marxists, the mass strike was linked to anarchism and Engels had proven that only political action — i.e. electioneering — could lead to working class emancipation.)

Thus, according to McNally, “*syndicalism*” (i.e. Bakunin’s ideas) is “*much superior to classical anarchism*” (i.e. Bakunin’s ideas)! How spurious McNally’s argument actually is can be seen from his comments about syndicalism and its relation to anarchism.

10. Do syndicalists reject working class political action?

His last argument against syndicalism is equally flawed. He states that “*by rejecting the idea of working class political action, syndicalism has never been able to give real direction to attempts by workers to change society.*” However, syndicalists (like all anarchists) are clear what kind of politics they reject — bourgeois politics (i.e. the running of candidates in elections). It is worth quoting Rudolf Rocker at length on McNally’s claim:

“It has often been charged against Anarcho-Syndicalism that it has no interest in the political structure of the different countries, and consequently no interest in the political struggles of the time, and confines its activities to the fight for purely economic demands. This idea is altogether erroneous and springs either from outright ignorance or wilful distortion of the facts. It is not the political struggle as such which distinguishes the Anarcho-Syndicalists from the modern labour parties, both in principle and in tactics, but the form of this struggle and the aims which it has in view. . .

“The attitude of Anarcho-Syndicalism toward the political power of the present-day state is exactly the same as it takes toward the system of capitalist exploitation. . . [and so] Anarcho-Syndicalists pursue the same tactics in their fight against that political power which finds its expression in the state. . .

“For just as the worker cannot be indifferent to the economic conditions of his life in existing society, so he cannot remain indifferent to the political structure of his country. . . It is, therefore, utterly absurd to assert that the Anarcho-Syndicalists take no interest in the political struggles of the time. . . But the point of attack in the political struggle lies, not in the legislative bodies, but in the people. . . If they, nevertheless, reject any participation in the work of bourgeois parliaments, it is not because they have no sympathy with political struggles in general, but because they are firmly convinced that parliamentary activity is for the workers the very weakest and the most hopeless form of the political struggle. . .

“But, most important of all, practical experience has shown that the participation of the workers in parliamentary activity cripples their power of resistance and dooms to futility their warfare against the existing system. . .

“Anarcho-Syndicalists, then, are not in any way opposed to the political struggle, but in their opinion this struggle, too, must take the form of direct action, in which the instruments of economic power which the working class has at its command are the most effective. . .

“The focal point of the political struggle lies, then, not in the political parties, but in the economic fighting organisations of the workers. It is the recognition of this which impelled the Anarcho-Syndicalists to centre all their activity on the Socialist education of the masses and on the utilisation of their economic and social power. Their method is that of direct action in both the economic and the political struggles of the time. That is the only method which has been able to achieve anything at all in every decisive moment in history.” [Op. Cit., pp. 63–66]

Rocker’s work, **Anarcho-Syndicalism**, was written in 1938 and is considered the standard introduction to that theory. McNally wrote his pamphlet in the 1980s and did not bother to consult the classic introduction to the ideas he claims to be refuting. That in itself indicates the worth of his pamphlet and any claims it has for being remotely accurate with respect to anarchism and syndicalism.

Thus syndicalists **do** reject working class “*political action*” only if you think “political action” means simply bourgeois politics — that is, electioneering, standing candidates for Parliament, local town councils and so on. It does not reject “political action” in the sense of direct action to effect political changes and reforms. As syndicalists Ford and Foster argue, syndicalists use “*the term ‘political action’ . . . in its ordinary and correct sense. Parliamentary action resulting from the exercise of the franchise is political action. Parliamentary action caused by the influence of direct action tactics . . . is not political action. It is simply a registration of direct action.*” They also note that syndicalists “*have proven time and again that they can solve the many so-called political questions by direct action.*” [Earl C. Ford and William Z. Foster, **Syndicalism**, p. 19f and p. 23]

A historian of the British syndicalist movement reiterates this point:

“Nor did syndicalists neglect politics and the state. Revolutionary industrial movements were on the contrary highly ‘political’ in that they sought to understand, challenge and destroy the structure of capitalist power in society. They quite clearly perceived the oppressive role of the state whose periodic intervention in industrial unrest could hardly have been missed.” [Bob Holton, **British Syndicalism: 1900–1914**, pp. 21–2]

As we argued in section J.2.10, anarchist support for direct action and opposition to taking part in elections does not mean we are “apolitical” or reject political action. Anarchists have always been clear — we reject “political action” which is bourgeois in nature in favour of “political action” based on the organisations, action and solidarity of working class people. This is because electioneering corrupts those who take part, watering down their radical ideas and making them part of the system they were meant to change.

And history has proven the validity of our anti-electioneering ideas. For example, as we argue in section J.2.6, the net result of the Marxists use of electioneering (“political action”) was the de-radicalising of their movement and theory and its becoming yet another barrier to working class self-liberation. Rather than syndicalism not giving “*real direction to attempts by workers to change society*” it was Marxism in the shape of Social Democracy which did that. Indeed, at the turn of twentieth century more and more radicals turned to Syndicalism and Industrial Unionism as the means of by-passing the dead-weight of Social Democracy (i.e. orthodox Marxism), its reformism, opportunism and its bureaucracy. As Lenin once put it, anarchism “*was not infrequently a kind of penalty for the opportunist sins of the working-class movement.*” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 305]

Lenin’s claim that anarchist and syndicalist support in the working class is the result of the opportunist nature of the Social Democratic Parties has an element of truth. Obviously militants sick to death of the reformist, corrupt and bureaucratic “working class” parties will seek a revolutionary alternative and find libertarian socialism.

However, Lenin seeks to explain the symptoms (opportunism) and not the disease itself (Parliamentarianism) . Nowhere does Lenin see the rise of “opportunist” tendencies in the Marxist parties as the result of the tactics and organisational struggles they used. Indeed, Lenin desired the new Communist

Parties to practice electioneering (“political action”) and work within the trade unions to capture their leadership positions. Anarchists rather point out that given the nature of the means, the ends surely follow. Working in a bourgeois environment (Parliament) will result in bourgeoisifying and de-radicalising the party. Working in a centralised environment will empower the leaders of the party over the members and lead to bureaucratic tendencies.

In other words, as Bakunin predicted, using bourgeois institutions will corrupt “revolutionary” and radical parties and tie the working class to the current system. Lenin’s analysis of anarchist influence as being the off-spring of opportunist tendencies in mainstream parties may be right, but if so its a natural development as the tactics supported by Marxists inevitably lead to opportunist tendencies developing. Thus, what Lenin could not comprehend was that opportunism was the symptom and electioneering was the disease — using the same means (electioneering) with different parties/individuals (“Communists” instead of “Social Democrats”) and thinking that opportunism would not return was idealistic nonsense in the extreme.

11. Why is McNally’s claim that Leninism supports working class self-emancipation wrong?

McNally claims that Marx “*was the first major socialist thinker to make the principle of self-emancipation — the principle that socialism could only be brought into being by the self-mobilisation and self-organisation of the working class — a fundamental aspect of the socialist project.*” This is not entirely true. Proudhon in 1848 had argued that “*the proletariat must emancipate itself without the help of the government.*” [quoted by George Woodcock, **Pierre-Joseph Proudhon: A Biography**, p. 125] This was because the state “*finds itself inevitably enchained to capital and directed against the proletariat.*” [Proudhon, **System of Economical Contradictions**, p. 399] Thus, working class people must organise themselves for their own liberation:

“it is of no use to change the holders of power or introduce some variation into its workings: an agricultural and industrial combination must be found by means of which power, today the ruler of society, shall become its slave.” [Op. Cit., p. 398]

While Proudhon placed his hopes in reformist tendencies (such as workers’ co-operatives and mutual banks) he clearly argued that “*the proletariat must emancipate itself.*” Marx’s use of the famous expression — “*the emancipation of the working class is the task of the working class itself*” — dates from 1865, 17 years after Proudhon’s comment that “*the proletariat must emancipate itself.*” As K. Steven Vincent correctly summarises:

“Proudhon insisted that the revolution could only come from below, through the action of the workers themselves.” [Pierre-Joseph Proudhon and the Rise of French Republican Socialism, p. 157]

Indeed, as Libertarian Marxist Paul Mattick points out, Marx was not even the first person to use the expression “*the emancipation of the working class*”

is the task of the working class itself.” Flora Tristan used it in 1843. [Marx and Keynes, p. 333] Thus a case could be made that Marx was, in fact, the **third** “major socialist thinker to make the principle of self-emancipation — the principle that socialism could only be brought into being by the self-mobilisation and self-organisation of the working class — a fundamental aspect of the socialist project.”

Similarly, Bakunin continually quoted Marx’s (and so Tristan’s) words from the Preamble to the General Rules of the First International — “*That the emancipation of the workers must be accomplished by the workers themselves.*” [The Basic Bakunin, p. 92] Far more than Marx, Bakunin argued that workers’ can only free themselves by a “single path, that of **emancipation through practical action**” namely “workers’ solidarity in their struggle against the bosses” by trades unions and solidarity. The “collective experience” workers gain in the International combined with the “collective struggle of the workers against the bosses” will ensure workers “will necessarily come to realise that there is an irreconcilable antagonism between the henchmen of reaction and [their] own dearest human concerns. Having reached this point, [they] will recognise [themselves] to be a revolutionary socialist.” [Op. Cit., p. 103] In contrast Marx placed his hopes for working class self-emancipation on a political party which would conquer “political power.” As history soon proved, Marx was mistaken — “political power” can only be seized by a minority (i.e. the party, **not** the class it claims to represent) and if the few have the power, the rest are no longer free (i.e. they no longer govern themselves). That the many elect the few who issue them orders does **not** signify emancipation!

However, this is beside the point. McNally proudly places his ideas in the Leninist tradition. It is thus somewhat ironic that McNally claims that Marxism is based on self-emancipation of the working class while claiming Leninism as a form of Marxism. This is because Lenin explicitly stated the opposite, namely that the working class **could not** liberate itself by its own actions. In **What is to be Done?** Lenin argued that “*the working class, exclusively by their own effort, is able to develop only trade union consciousness . . . The theory of socialism [i.e. Marxism], however, grew out of the philosophic, historical and economic theories that were elaborated by the educated representatives of the propertied classes, the intellectuals . . . the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas among the revolutionary socialist intelligentsia.*” This meant that “*Social Democratic [i.e. socialist] consciousness . . . could only be brought to them from without.*” [Essential Works of Lenin, pp. 74–5]

Thus, rather than believe in working class self-emancipation, Lenin thought the opposite. Without the radical bourgeois to provide the working class with “socialist” ideas, a socialist movement, let alone society, was impossible. Hardly what you would consider self-emancipation. Nor is this notion of working class passivity confined to the “early” Lenin of **What is to Be Done?** infamy. It can be found in his apparently more “libertarian” work **The State and Revolution**.

In that work he argues “*we do not indulge in ‘dreams’ of dispensing at once . . . with all subordination; these anarchist dreams . . . are totally alien to Marxism . . . we want the socialist revolution with human nature as it is now, with human nature that cannot dispense with subordination, control and ‘managers’*” [Op.

Cit., p. 307] No where is the notion that working class people, during the process of mass struggle, direct action and revolution, **revolutionises themselves** (see sections A.2.7 and J.7.2, for example). Instead, we find a vision of people as they are under capitalism (“*human nature as it is now*”) and no vision of self-emancipation of the working class and the resulting changes that implies for those who are transforming society by their own action.

Perhaps it will be argued that Lenin sees “*subordination*” as being “*to the armed vanguard of all the exploited . . . i.e., to the proletariat*” [**Ibid.**] and so there is no contradiction. However, this is not the case as he confuses the role of the party with the rule of the class. As he states “[*w*]e cannot imagine democracy, not even proletarian democracy, without representative institutions.” [**Op. Cit.**, p. 306] Thus “*subordination*” is **not** to the working class itself (i.e. direct democracy or self-management). Rather it is the “*subordination*” of the majority to the minority, of the working class to “its” representatives. Thus we have a vision of a “socialist” society in which the majority have not revolutionised themselves and are subordinated to their representatives. Such a subordination, however, ensures that a socialist consciousness **cannot** develop as only the **process** of self-management generates the abilities required for self-management (as Malatesta put it, “[*o*]nly freedom or the struggle for freedom can be the school for freedom.” [**Life and Ideas**, p. 59]).

Therefore McNally’s comments that Leninism is a valid expression of Marx’s idea of proletarian self-emancipation is false. In reality, Lenin rejected the idea that working class people can emancipate themselves and, therefore, any claim that this tradition stands for proletarian self-emancipation is false. Rather Leninism, for all its rhetoric, has no vision of working class self-activity leading to self-liberation — it denies it can happen and that is why it stresses the role of the party and its need to take centralised power into its own hands (of course, it never entered Lenin’s mind that if bourgeois ideology imposes itself onto the working class it also imposes itself on the party as well — more so as they are bourgeois intellectuals in the first place).

While anarchists are aware of the need for groups of like minded individuals to influence the class struggle and spread anarchist ideas, we reject the idea that such ideas have to be “injected” into the working class from outside. Rather, as we argued in section J.3, anarchist ideas are developed within the class struggle by working people themselves. Anarchist groups exist because we are aware that there is an uneven development of ideas within our class and to aid the spreading of libertarian ideas it is useful for those with those ideas to work together. However, being aware that our ideas are the product of working class life and struggle we are also aware that we have to learn from that struggle. It is because of this that anarchists stress self-management of working class struggle and organisation from below. Anarchists are (to use Bakunin’s words) “*convinced that revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction.*” [**Michael Bakunin: Selected Writings**, p. 237] Only when this happens can new ways of life be created and truly develop freely. It also explains anarchist opposition to political groups seizing power — that will only result in old dogmas crushing the initiative of people in struggle and the new forms of life they create. That is why anarchists stress the importance of revolutionaries using “*natural influence*” (i.e. arguing their ideas in popular organisations and convincing by reason) — doing so allows

new developments and ideas to be expressed and enriched by existing ones and vice versa.

One last point. It could be argued that Lenin's arguments were predated by Marx and Engels and so Marxism **as such** rather than just Leninism does not believe in proletarian self-emancipation. This is because they wrote in **The Communist Manifesto** that "*a portion of the bourgeois goes over to the proletariat, and in particular, a portion of the bourgeois ideologists, who have raised themselves to the level of comprehending theoretically the historical movement as a whole.*" They also note that the Communists are "*the most advanced and resolute section of the working-class parties . . . [and] they have over the great mass of the proletariat the advantage of clearly understanding the line of march, the conditions, and the general results of the proletarian movement.*" [**Selected Works**, p. 44 and p. 46] Thus a portion of the bourgeois comprehend "*the historical movement as a whole*" and this is also the "*advantage*" of the Communist Party over "*the great mass of the proletariat.*" Perhaps Lenin's comments are not so alien to the Marxist tradition after all.

12. Why is Marxist "class analysis" of anarchism contradictory?

Another ironic aspect of McNally's pamphlet is his praise for the Paris Commune and the Russian Soviets. This is because key aspects of both revolutionary forms were predicted by Proudhon and Bakunin.

For example, McNally's and Marx's praise for revocable mandates in the Commune was advocated by Proudhon in 1840s and Bakunin in 1860s (see sections 4 and 5). Similarly, the Russian Soviets (a federation of delegates from workplaces) showed a marked similarity with Bakunin's discussions of revolutionary change and the importance of industrial associations being the basis of the future socialist commune (as he put it, the "*future organisation must be made solely from the bottom upwards, by free association or free federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal.*" [**Michael Bakunin: Selected Writings**, p. 206]).

Indeed, the Paris Commune (in both its economic and political aspects) showed a clear inspiration from Proudhon's works. In the words of George Woodcock, there are "*demands in the Commune's Manifesto to the French People of the 19th April, 1871, that might have been written by Proudhon himself.*" [**Pierre-Joseph Proudhon: A Biography**, p. 276] K. Steven Vincent also points out that the declaration "*is strongly federalist in tone [one of Proudhon's favourite ideas], and it has a marked proudhonian flavour.*" [**Pierre-Joseph Proudhon and the Rise of French Republican Socialism**, p. 232] Moreover, the desire to replace wage labour with associated labour by the creation of co-operatives expressed during the Commune clearly showed the influence of Proudhon (see section A.5.1 for more details). As Marx mentions the "*rough sketch of national organisation*" produced by the Commune it is useful to quote the Commune's declaration in order to show clearly its anarchist roots and tendencies:

"The absolute autonomy of the Commune extended to all districts of

France . . . to every Frenchman the full exercise of his faculties and aptitudes, as man, citizen, and worker.

“The autonomy of the Commune shall have no limits other than the right of autonomy equally enjoyed by all other communes adhering to the contract, and by whose association together French Unity will be preserved. . . Selection by ballot . . . with the responsibility and permanent right of control and dismissal of magistrates and all communal civil servants of all grades . . . Permanent intervention of citizens in communal affairs by the free expression of their ideas. Organisation of urban defence and of the National Guard, which elects its leaders . . . the large central administration delegated by the federation of communes shall adopt and put into practice these same principles.

“The Unity which has been imposed on us up to now . . . is nothing but despotic centralisation . . . The Political Unity which Paris desires is the voluntary association of all local initiatives . . .

“The Communal Revolution . . . spells the end of the old world with its governments and its clerics, militarism, officialdom, exploitation, stock-jobbing, monopolies, and privileges, to which the proletariat owes its servitude, the country its ills and its disasters.” [“Declaration to the French People”, contained in David Thomson (ed.), **France: Empire and Republic, 1850–1940**, pp. 186–7]

The links with Proudhon’s ideas cannot be clearer. Both Proudhon and the Commune stressed the importance of decentralisation of power, federalism, the end of both government and exploitation and so on. Moreover, in his letter to Albert Richard, Bakunin predicted many aspects of the Paris Commune and its declaration (see **Bakunin on Anarchism**, pp. 177–182).

Little wonder few Marxists (nor Marx himself) directly quote from this declaration. It would be difficult to attack anarchism (as “petty-bourgeois”) while proclaiming the Paris Commune as the first example of “*the dictatorship of the Proletariat.*” The decentralised, federalist nature of the Commune cannot be squared with the usual Marxist instance on centralisation and the claim that federalism “*as a principle follows logically from the petty-bourgeois views of anarchism. Marx was a centralist.*” [Lenin, “*The State and Revolution*”, Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 273]

Given that Marx described the Commune as “*essentially a working-class government*” and as “*the political form, at last discovered, under which to work out the economic emancipation of labour,*” it is strange that McNally terms Proudhon’s and Bakunin’s ideas as those of the past. [**Selected Writings**, p. 290] In actuality, as can be seen from the Paris Commune and the soviets, they were the ideas **of the future** — and of working class self-liberation and self-organisation. And ones that Marx and his followers paid lip service to.

(We say lip service for Lenin quoted Marx’s statement that the future proletarian state, like the Paris Commune, would abolish the distinction between executive and administrative powers but did not honour it. Immediately after the October Revolution the Bolsheviks established an executive power **above** the soviets, namely the Council of People’s Commissars. Those who quote Lenin’s **State and Revolution** as proof of his democratic nature usually fail

to mention this little fact. In practice that work was little more than an election manifesto to be broken as required.)

Perhaps it could be argued that, in fact, the Paris Commune was the work of artisans. This does have an element of truth in it. Marx stated in 1866 that the French workers were “*corrupted*” by “*Proudhonist*” ideas, “*particularly those of Paris, who as workers in luxury trades are strongly attached, without knowing it [!], to the old rubbish.*” [Marx, Engels and Lenin, **Anarchism and Anarcho-syndicalism**, pp. 45–6] Five years later, these workers (still obviously influenced by “*the old rubbish*”) created “*the political form*” of “*the economic emancipation of labour.*” How can the Paris Commune be the “*Dictatorship of the Proletariat*” (as Engels claimed [**Selected Writings**, p. 259]) when 35 members of the Commune’s council were artisans and only 4 or 5 were industrial workers (i.e. proletarians)?

Can the fact that artisans were, according to McNally and Marx, social strata of the past, were backward looking, etc. be reconciled with the claim that the Paris Commune was the political form of proletarian emancipation? No, not from a Marxist class analysis. Hence Marxists ignoring the real nature of the Parisian working class when discussing the commune. However, from an anarchist perspective — which sees the artisan, peasant and proletariat forming a common class of working people — the development of the Paris Commune is no surprise. It is the work of people seeking to end wage labour and the threat of wage labour **now** rather than sometime in the future once capitalism has fully developed. Thus McNally’s (and Marx’s) support for the Commune makes a mockery of his attacks on anarchism as the theory of the artisans and peasants for it was the artisans who created the first model of their “*proletarian*” state!

As indicated, McNally’s arguments do not hold water. Ironically, if anarchism was the death-cry of the artisan and peasant then it is strange, to say the least, that this theory so influenced the Paris Commune which McNally praises so much. We therefore suggest that rather than being a backward-looking cry of despair for those disappearing under the wheels of rising capitalism, anarchism was in fact a theory developed from the struggles and self-activity of those currently suffering capitalist and state oppression — namely the artisans, peasants **and** industrial proletariat (i.e. the working class as a whole). In other words, it is a philosophy and theory for the future, not of the past. This can be seen from the libertarian aspects of the Paris Commune, aspects Marx immediately tried to appropriate for his own theories (which, unfortunately, were swamped by the authoritarian elements that existing already).

And one last point, McNally claims that Marx “*immediately rallied to the cause of the Paris Commune.*” This is not true. As John Zerzan points out “*[d]ays after the successful insurrection began he failed to applaud its audacity, and satisfied himself with grumbling that ‘it had no chance of success.’ Though he finally recognised the fact of the Commune (and was thereby forced to revise his reformist ideas regarding proletarian use of existing state machinery), his lack of sympathy is amply reflected by the fact that throughout the Commune’s two-month existence, the General Council of the International spoke not a single word about it . . . his **Civil War in France** constitutes an obituary.*” [**Elements of Refusal**, p. 126] Perhaps the delay was due to Marx wondering how Parisian artisans had become the vanguard of the proletariat overnight and how he could support a Commune created by the forces of the past?

In addition the “*old rubbish*” the Parisian workers supported was very much

ahead of its time. In 1869 the delegate of the Parisian Construction Workers' Trade Union argued that "[a]ssociation of the different corporations [labour unions] on the basis of town or country . . . leads to the commune of the future . . . Government is replaced by the assembled councils of the trade bodies, and by a committee of their respective delegates." In addition, "a local grouping which allows the workers in the same area to liaise on a day to day basis" and "a linking up of the various localities, fields, regions, etc." (i.e. international trade or industrial union federations) would ensure that "labour organises for present and future by doing away with wage slavery." [No Gods, No Masters, vol. 1, p. 184] Such a vision of workers' councils and associated labour has obvious similarities with the spontaneously created soviets of the 1905 Russian Revolution. These, too, were based on assembled councils of workers' delegates. Of course they were differences but the basic idea and vision are identical.

Therefore to claim that anarchism represents the past presents Marxists with a few problems given the nature of the Paris Commune and its obvious libertarian nature. If it is claimed that the Parisian artisans defended "not their present, but their future interests" and so "desert[ed] their own standpoint to place themselves at that of the proletariat" (the class they are being "transfer[ed]" into by the rise of capitalism) then, clearly, anarchist ideas are "future," proletarian, ideas as it is that class interest artisans serve "[i]f by chance they are revolutionary." [Marx and Engels, **The Communist Manifesto**, p. 44]

Whichever way you look at it, McNally's claims on the class nature of anarchism do not stand up to close analysis. Proudhon addressed both artisan/peasant and wage slave in his works. He addressed both the past and the present working class. Bakunin did likewise (although with a stronger emphasis on wage slaves). Therefore it is not surprising that Proudhon and Bakunin predicted aspects of the Paris Commune — they were expressing the politics of the future. As is clear from their writings, which still remain fresh today.

This confusion associated with Marxist "class analysis" of anarchism was also present in Lenin. Given that anarchism is apparently associated with the petty-bourgeois we find a strange contradiction in Lenin's work. On the one hand Lenin argued that Russia "despite the more petty-bourgeois composition of her population as compared with the other European countries" had, in fact, "negligible" anarchist influence during the two revolutions of 1905 and 1917. He claimed that this was due to Bolshevism's having "waged a most ruthless and uncompromising struggle against opportunism." [Marx, Engels and Lenin, **Op. Cit.**, p. 305]

On the other he admitted that, in the developed capitalist nations, anarchists and syndicalists were "quite revolutionary and connected with the masses" and that it is "the duty of all Communists to do everything to help all proletarian mass elements to abandon anarchism . . . the measure in which genuinely Communist parties succeed in winning mass proletarian elements . . . away from anarchism, is a criterion of the success of those Parties." [Op. Cit., pp. 317–8]

Thus, in the most capitalist nations, ones with a more widespread and developed proletariat, the anarchist and syndicalist movements were more firmly developed and had closer connections with the masses than in Russia. Moreover, these movements were also quite revolutionary as well and should be won to Bolshevism. But anarchism is the politics of the petit-bourgeois and so should have been non-existent in Western countries but widespread in Russia. The opposite was the case, thus suggesting that Lenin's analysis is wrong.

We can point to another explanation of these facts. Rather than the Bolsheviks “*struggle against opportunism*” being the reason why anarchism was “*negligible*” in 1917–18 in Russia (it was not, in fact) but had mass appeal in Western Europe perhaps it was the fact that anarchism was a product of working class struggle in advanced capitalist countries while Bolshevism was a product of **bourgeois** struggle (for Parliament, a liberal republic, etc.) in Tsarist Russia?

Similarly, perhaps the reason why Bolshevism did not develop opportunist tendencies was because it did not work in an environment which encouraged them. After all, unlike the German Social Democrats, the Bolsheviks were illegal for long periods of time and worked in an absolutist monarchy. The influences that corrupted the German SPD were not at work in the Tsarist regime. Thus, Bolshevism, perhaps at best, was applicable to Tsarist conditions and anarchism to Western ones.

However, as noted and contrary to Lenin, Russian anarchism was far from “*negligible*” during 1917–18 and was growing which was why the Bolsheviks suppressed them **before** the start of the civil war. As Emma Goldman noted, a claim such as Lenin’s “*does not tally with the incessant persecution of Anarchists which began in [April] 1918, when Leon Trotsky liquidated the Anarchist headquarters in Moscow with machine guns. At that time the process of elimination of the Anarchists began.*” [**Trotsky Protests Too Much**] This fact of anarchist influence during the revolution does not contradict our earlier analysis. This is because the Russian anarchists, rather than appealing to the petit-bourgeois, were influencing exactly the same workers, sailors and soldiers the Bolsheviks were. Indeed, the Bolsheviks often had to radicalise their activities and rhetoric to counter anarchist influence. As Alexander Rabinowitch (in his study of the July uprising of 1917) notes:

“At the rank-and-file level, particularly within the [Petrograd] garrison and at the Kronstadt naval base, there was in fact very little to distinguish Bolshevik from Anarchist. . . The Anarchist-Communists and the Bolsheviks competed for the support of the same uneducated, depressed, and dissatisfied elements of the population, and the fact is that in the summer of 1917, the Anarchist-Communists, with the support they enjoyed in a few important factories and regiments, possessed an undeniable capacity to influence the course of events. Indeed, the Anarchist appeal was great enough in some factories and military units to influence the actions of the Bolsheviks themselves.”
[**Prelude to Revolution**, p. 64]

This is hardly what would be expected if anarchism was “petit-bourgeois” as Marxists assert.

It could, in fact, be argued that the Bolsheviks gained the support of so many working class people (wage slaves) during the summer of 1917 **because they sounded and acted like anarchists** and **not** like Marxists. At the time many considered the Bolsheviks as anarchists and one fellow Marxist (an ex-Bolshevik turned Menshevik) thought Lenin had “*made himself a candidate for one European throne that has been vacant for thirty years — the throne of Bakunin!*” [quoted by Alexander Rabinowitch, **Op. Cit.**, p. 40] As Alexander Berkman argues, the “*Anarchist mottoes proclaimed by the Bolsheviks did not*

fail to bring results. The masses relied to their flag.” [**What is Communist Anarchism**, p. 101]

Moreover, this stealing of anarchist slogans and tactics was **forced** upon the Bolsheviks by the working class. On Lenin’s own admission, the masses of peasants and workers were “*a hundred times further to the left*” than the Bolsheviks. Trotsky himself notes that the Bolsheviks “*lagged behind the revolutionary dynamic . . . The masses at the turning point were a hundred times to the left of the extreme left party.*” [**History of the Russian Revolution**, Vol. 1, p. 403f] Indeed, one leading Bolshevik stated in June, 1917 (in response to a rise in anarchist influence), “[*b*]y *fencing ourselves off from the Anarchists, we may fence ourselves off from the masses.*” [quoted by Alexander Rabinowitch, **Op. Cit.**, p. 102] That, in itself, indicates the weakness of Lenin’s class analysis of anarchism.

Rather than seeing the Russian experience refute the claim that anarchism is a working class theory, it reinforces it — the Bolsheviks would not have succeeded if they had used traditional Marxist slogans and tactics. Instead, much to the dismay of their more orthodox comrades, the Bolsheviks embraced traditional anarchist ideas and tactics and thereby gained increased influence in the working class. After the Bolshevik seizure of power in the name of the soviets, anarchist influence increased (see section A.5.4) as more working people recognised that what the Bolsheviks meant by their slogans was different than what working people thought they meant!

Thus the experience of the Russian Revolution re-enforces the fact that Marxist “class analysis” of anarchism fails to convince. Far from proving that libertarian socialism is non-proletariat, that Revolution proved that it was (just as confirmed the prophetic correctness of the views of the founders of anarchism and, in particular, their critique of Marxism).

The usual Marxist “class analysis” of anarchism is somewhat confused. On the one hand, it claims that anarchism is backward looking and the politics of the petit-bourgeois being destroyed by the rise and development of capitalism. On the other hand Marxists point to events and organisations created in working class struggle which were predicted and/or influenced by **anarchist** ideas and ideals, **not** Marxist ones. That indicates better than any other argument that Marxists are wrong about anarchism and their “class analysis” nothing more than distortions and bigotry.

Based on the evidence and the contradictions it provokes in Marxist ideology, we have to argue that McNally is simply wrong. Rather than being an ideology of the petit-bourgeois anarchism is, in fact, a political theory of the working class (both artisans and proletariat). Rather than a backward looking theory, anarchism is a theory of the present and future — it has a concrete and radical critique of current society and a vision of the future and a theory how to get there which appeals to working people in struggle. Such is obviously the case when reading anarchist theory.

13. If Marxism is “*socialism from below*,” why do anarchists reject it?

McNally claims that Marxism is “*socialism from below*.” In his text he indicates support for the Paris Commune and the soviets of the Russian Revolution. He states that the “*democratic and socialist restructuring of society remains . . . the most pressing task confronting humanity. And such a reordering of society can only take place on the basis of the principles of socialism from below. Now more than ever, the liberation of humanity depends upon the self-emancipation of the world working class. . . The challenge is to restore to socialism its democratic essence, its passionate concern with human freedom.*”

So, if this is the case, why the hostility between anarchists and Marxists? Surely it is a question of semantics? No, for while Marxists pay lip-service to such developments of working class self-activity and self-organisation as workers’ councils (soviets), factory committees, workers’ control, revocable and mandated delegates they do so in order to ensure the election of their party into positions of power (i.e. the government). Rather than see such developments as working people’s **direct** management of their own destinies (as anarchists do) and as a means of creating a self-managed (i.e. free) society, Marxists see them as a means for their party to take over state power. Nor do they see them as a framework by which working class people can take back control of their own lives. Rather, they see them, at best, as typical bourgeois forms — namely the means by which working people can delegate their power to a new group of leaders, i.e. as a means to elect a socialist government into power.

This attitude can be seen from Lenin’s perspectives on the Russian soviets. Rather than seeing them as a means of working class self-government, he saw them purely as a means of gaining influence for his party. In his own words:

“the Party . . . has never renounced its intention of utilising certain non-party organisations, such as the Soviets of Workers’ Deputies . . . to extend Social-Democratic influence among the working class and to strengthen the Social-Democratic labour movement . . . the incipient revival creates the opportunity to organise or utilise non-party working-class institutions, such as Soviets . . . for the purpose of developing the Social-Democratic movement; at the same time the Social-Democratic Party organisations must bear in mind if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actually become superfluous.” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, pp. 209–10]

Such a perspective indicates well the difference between anarchism and Leninism. Anarchists do not seek power for their own organisations. Rather they see self-managed organisation created by working class people in struggle as a means of eliminating hierarchy within society, of directly involving the mass of people in the decisions that affect them. In other words, as a means of creating the organisations through which people can change both themselves and the world by their own direct action and the managing of their own struggles, lives, communities and workplaces. For Leninists, view working class self-organisation as a means of gaining power for their own party (which they identify with the

power of the working class). Mass organisations, which could be schools for self-management and freedom, are instead subjected to an elitist leadership of intellectual ideologues. The party soon substitutes itself for the mass movement, and the party leadership substitutes itself the party.

Despite its radical language, Leninism is totally opposed to the nature of revolt, rebellion and revolution. It seeks to undermine what makes these organisations and activities revolutionary (their tendencies towards self-management, decentralisation, solidarity, direct action, free activity and co-operation) by using them to build their party and, ultimately, a centralised, hierarchical state structure on the corpse of these once revolutionary forms of working class self-organisation and self-activity.

Lenin's view of the soviets was instrumental: he regarded them merely as a means for educating the working class (i.e. of getting them to support the Bolshevik Party) and enlisting them in the service of his party. Indeed, he constantly confused soviet power with party power, seeing the former as the means to the latter and the latter as the key to creating socialism. What is missing from his vision is the idea of socialism as being based on working class self-activity, self-management and self-government (*"Lenin believed that the transition to socialism was guaranteed ultimately, not by the self-activity of workers, but by the 'proletarian' character of state power."* [A. S. Smith, **Red Petrograd**, pp. 261–2] And the 'proletarian' character of the state was determined by the party in government). And this gap in his politics, this confusion of party with class, which helped undermine the revolution and create the dictatorship of the bureaucracy. Little wonder that by the end of 1918, the Bolsheviks ruled the newly established soviet state entirely alone and had turned the soviets into docile instruments of their party apparatus rather than forms of working class self-government.

For Lenin and other Bolsheviks the party of the proletariat, that is, **their** party, must strive to monopolise political power, if only to safeguard the proletarian character of the revolution. This follows naturally from Lenin's vanguardist politics (see section 11). As the working class people cannot achieve anything bar a trade union consciousness by their own efforts, it would be insane for the Party to let them govern directly. In the words of Lenin:

"Syndicalism hands over to the mass of non-Party workers . . . the management of their industries . . . thereby making the Party superfluous. . . Why have a Party, if industrial management is to be appointed . . . by trade unions nine-tenths of whose members are non-Party workers?" [Op. Cit., pp. 319–20]

"Does every worker know how to run the state? . . . this is not true . . . If we say that it is not the Party but the trade unions that put up the candidates and administrate, it may sound very democratic . . . It will be fatal for the dictatorship of the proletariat." [Op. Cit. p. 322]

"To govern you need an army of steeled revolutionary Communists. We have it, and it is called the Party. All this syndicalist nonsense about mandatory nominations of producers must go into the wastepaper basket. To proceed on those lines would mean thrusting the Party aside and making the dictatorship of the proletariat . . . impossible." [Op. Cit., p. 323]

In other words, giving the proletariat the power to elect their own managers means to destroy the “*dictatorship*” of the proletariat! Lenin clearly places the power of the party above the ability of working people to elect their own representatives and managers. And McNally claims that his tradition aims at “*workers’ power*” and a “*direct and active democracy*”!

Lenin’s belief that working class people could not liberate themselves (see section 11) explains his continual emphasis on **representative** democracy and centralism — simply put, the party must have power **over** the working class as that class could not be trusted to make the right decisions (i.e. know what its “real” interests were). At best they would be allowed to vote for the government, but even this right could be removed if they voted for the wrong people (see section 8). For Leninists, revolutionary consciousness is not generated by working class self-activity in the class struggle, but is embodied in the party (“*Since there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement **the only choice is: either bourgeois or socialist ideology***” [Lenin, **The Essential Works of Lenin**, 82]). The important issues facing the working class are to be determined not by the workers ourselves, but by the leadership of the party, who are the (self appointed) “*vanguard of the proletariat*”. The nature of the relationship between the party and the working class is clear, however, we remain incapable of achieving revolutionary consciousness and have to be led by the vanguard.

Russia, Lenin once said, “*was accustomed to being ruled by 150 000 land owners. Why can 240 000 Bolsheviks not take over the task?*” [**Collected Works**, Vol. 21, p. 336] The idea of socialism as working class self-management and self-government was lost on him — and the possibility **real** socialism was soon lost to the Russian working class when the Tsar was replaced by the autocratic the rule of the Bolshevik Party. “*Workers’ power*” cannot be identified or equated with the power of the Party — as it repeatedly was by the Bolsheviks (and Social Democrats before them).

Thus Malatesta’s comments:

“The important, fundamental dissension [between anarchists and Marxists] is [that] ... [Marxist] socialists are authoritarians, anarchists are libertarians.

“Socialists want power ... and once in power wish to impose their programme on the people... Anarchists instead maintain, that government cannot be other than harmful, and by its very nature it defends either an existing privileged class or creates a new one.” [**Life and Ideas**, p. 142]

Anarchists seek to influence people by the power of our ideas within popular organisations. We see such organisations as the means by which working people can take control of their own lives and start to create a free, libertarian socialist society. A self-managed society can only be created by self-management, in short, and any tendencies to undermine popular self-management in favour of hierarchical power of a party will subvert a revolution and create an end drastically at odds with the ideals of those who take part in it.

Similarly, anarchists reject the Leninist idea of highly centralised “vanguard” parties. As the anarchists of Trotsch explain, such a party leaves much to be desired:

“In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly ‘revolutionary’ organisation: between leaders and led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class.” [Carry on Recruiting!, p. 41]

Such an organisation can never create a socialist society. In contrast, anarchists argue that socialist organisations should reflect as much as possible the future society we are aiming to create. To build organisations which are statist/capitalistic in structure cannot do other than reproduce the very problems of capitalism/statism into them and so undermine their liberatory potential. As Murray Bookchin puts it:

*“The ‘glorious party,’ when there is one, almost invariably lags behind the events . . . In the beginning . . . it tends to have an inhibitory function, not a ‘vanguard’ role. Where it exercises influence, it tends to slow down the flow of events, not ‘co-ordinate’ the revolutionary forced. This is not accidental. The party is structured along hierarchical lines **that reflect the very society it professes to oppose** . . . Its membership is schooled in obedience . . . The party’s leadership, in turn, is schooled in habits born of command, authority, manipulation . . . Its leaders . . . lose contact with the living situation below. The local groups, which know their own immediate situation better than any remote leaders, are obliged to subordinate their insights to directives from above. The leadership, lacking any direct knowledge of local problems, responds sluggishly and prudently. . .*

“The party becomes less efficient from a revolutionary point of view the more it seeks efficiency by means of hierarchy, cadres and centralisation. Although everyone marches in step, the orders are usually wrong, especially when events begin to move rapidly and take unexpected turns — as they do in all revolutions. The party is efficient in only one respect — in moulding society in its own hierarchical imagine if the revolution is successful. It recreates bureaucracy, centralisation and the state. It fosters the bureaucracy, centralisation and the state. It fosters the very social conditions which justify this kind of society. Hence, instead of ‘withering away,’ the state controlled by the ‘glorious party’ preserves the very conditions which ‘necessitate’ the existence of a state — and a party to ‘guard’ it.” [Post-Scarcity Anarchism, pp. 194–198]

As we argue in section J.3, anarchists do not reject the need for political organisations (anarchist groups, federations and so on) to work in mass movements and in revolutionary situations. However, we do reject the Leninist idea of a vanguard party as being totally inappropriate for the needs of a social revolution — a revolution that aims to create a free society.

In addition to this difference in the **political** nature of a socialist society, the role of organisations created in, by and for the class struggle and the nature of socialist organisation, anarchists and Marxists disagree with the **economic** nature of the future society.

McNally claims that in Russia “[c]ontrol of the factories was taken over by the workers” but this is a total distortion of what actually happened. Throughout 1917, it was the workers themselves, **not** the Bolshevik Party, which raised the issue of workers’ self-management and control. As S.A. Smith puts it, the “factory committees launched the slogan of workers’ control of production quite independently of the Bolshevik party. It was not until May that the party began to take it up.” [Red Petrograd, p. 154] Given that the defining aspect of capitalism is wage labour, the Russian workers’ raised a clearly socialist demand that entailed its abolition. It was the Bolshevik party, we must note, who failed to raise above a “trade union conscious” in this and so many other cases.

In reality, the Bolsheviks themselves hindered the movement of workers trying to control, and then manage, the factories they worked in. As Maurice Brinton correctly argued, “it is ridiculous to claim — as so many do today — that in 1917 the Bolsheviks really stood for the full, total and direct control by working people of the factories, mines, building sites or other enterprises in which they worked, i.e. that they stood for workers’ self-management.” [The Bolsheviks and Workers’ Control, p. 27] Rather, Lenin identified “workers’ control” as something totally different:

“When we speak of ‘workers control,’ always placing this cry side by side with the dictatorship of the proletariat . . . we make clear thereby what State we have in mind . . . if we have in mind a proletarian State — that is, the dictatorship of the proletariat — then the workers’ control can become a national, all-embracing, universally realisable, most exact and most conscientious regulating of the production and distribution of goods.” [Can the Bolsheviks Maintain State Power?, pp. 46–7]

By “regulation” Lenin meant the “power” to oversee the books, to check the implementation of decisions made by others, rather than fundamental decision making. As he argued, “the economists, engineers, agricultural experts and so on . . . [will] work out plans under the control of the workers’ organisations . . . We are in favour of centralisation.” [Op. Cit., pp. 78–9] Thus others would determine the plans, not the workers themselves. As Brinton states, “[n]owhere in Lenin’s writings is workers’ control ever equated with fundamental decision-taking (i.e. with the **initiation** of decisions) relating to production . . . He envisioned a period during which, in a workers state, the bourgeois would still retain the formal ownership and effective management of most of the productive apparatus . . . capitalists would be coerced into co-operation. ‘Workers’ control’ was seen as the instrument of this coercion.” [Op. Cit., pp. 12–13] In Lenin’s own words, “[t]here is no other way . . . than . . . organisation of really democratic control, i.e. control ‘from below,’ of the workers and poorest peasants **over the capitalists.**” [The Threatening Catastrophe and how to avoid it, p. 33]

Thus the capitalists would remain and wage slavery would continue but workers could “control” those who had the real power and gave the orders (the capitalists were later replaced by state bureaucrats though the lack of effective control remained). In other words, no vision of workers’ self-management in production (and so real socialism) and the reduction of “socialism” to a warmed up variation of state capitalism with (in theory, but not in practice) a dash of

liberal democracy in the form of “control” of those with the real power by those under them in the hierarchy.

S.A. Smith correctly argues that Lenin’s “proposals . . . [were] thoroughly statist and centralist in character” and that he used “the term [‘workers’ control’] in a very different sense from that of the factory committees.” [Op. Cit., p. 154] That is, he used the same slogans as many workers’ but meant something radically different by it. Leninists follow this tradition today, as can be seen from McNally’s use of the words “[c]ontrol of the factories was taken over by the workers” to refer to situation drastically different from the workers’ self-management it implies to most readers.

Given Lenin’s lack of concern about the revolutionising of the relations of production (a lack not shared by the Russian workers, we must note) it is hardly surprising that Lenin considered the first task of the Bolshevik revolution was to build state capitalism. “State capitalism,” he wrote, “is a complete material preparation for socialism, the threshold of socialism, a rung on the ladder of history between which and the rung called socialism there are no gaps.” [Collected Works, vol. 24, p. 259] Hence his support for centralisation and his full support for “one-man management” — working class power **in production** is never mentioned as a necessary condition for socialism.

Little wonder Soviet Russia never progressed beyond state capitalism — it could not as the fundamental aspect of capitalism, wage labour, was never replaced by workers’ self-management of production.

Lenin took the viewpoint that socialism “is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly **made to benefit the whole people**; by this token it ceases to be capitalist monopoly.” [The Threatening Catastrophe and how to avoid it, p. 37] He had no real notion of workers’ self-management of production nor of the impossibilities of combining the centralised state capitalist system with its big banks, monopolies, big business with genuine rank and file control, never mind self-management. As Alexander Berkman correctly argued:

“The role of industrial decentralisation in the revolution is unfortunately too little appreciated. . . Most people are still in the thrall of the Marxian dogma that centralisation is ‘more efficient and economical.’ They close their eyes to the fact that the alleged ‘economy’ is achieved at the cost of the workers’ limb and life, that the ‘efficiency’ degrades him to a mere industrial cog, deadens his soul, kills his body. Furthermore, in a system of centralisation the administration of industry becomes constantly merged in fewer hands, producing a powerful bureaucracy of industrial overlords. It would indeed be the sheerest irony if the revolution were to aim at such a result. It would mean the creation of a new master class.” [The ABC of Anarchism, pp. 80–1]

However, this is what Lenin aimed at. The Leninist “vision” of the future socialist economy is one of a highly centralised organisation, modelled on capitalism, in which, at best, workers can supervise the decisions made by others and “control” those in power. It is a vision of a more democratic corporate structure, with the workers replacing the shareholders. In practice, it would be a new bureaucracy exploiting and oppressing those who do the actual work

— as in private capitalism — simply because capitalist economic structures are designed to empower the few over the many. Like the capitalist state, they cannot be used by the working class to achieve their liberation (they are not created for the mass participation that real socialism requires, quite the reverse in fact!).

In contrast, anarchists view the socialist economy as being based on workers' self-management of production and the workplace turned into an association of equals. Above the individual workplace, federations of factory committees would co-ordinate activities and ensure wide scale co-operation is achieved. Thus anarchists see a **new** form of economic structure developing, one based on workers' organisations created in the process of struggle **against** capitalism.

In other words, rather than embrace bourgeois notions of “democracy” (i.e. the election of leaders into positions of power) like Marxists do, anarchists dissolve hierarchical power by promoting workers' self-management and association. While Marxism ends up as state capitalism pure and simple (as can be seen by the experience of Russia under Lenin and then Stalin) anarchism destroys the fundamental social relation of capitalism — wage labour — via association and workers' self-management of production.

Thus while both Leninists and anarchists claim to support factory committees and “workers' control” we have decidedly different notions of what we mean by this. The Leninists see them as a means of workers' to supervise those who have the real power in the economy (and so perpetuate wage slavery with the state replacing the boss). Anarchists, in contrast, see them as a means of expressing workers self-organisation, self-management and self-government — as a means of abolishing wage slavery and so capitalism by eliminating hierarchical authority, in other words. The difference could not be more striking. Indeed, it would be correct to state that the Leninist tradition is not, in fact, socialist as it identifies socialism as the natural development of capitalism and **not** as a new form of economy which will develop **away** from capitalism by means of associated labour and workers' self-management of production.

In short, anarchists reject both the means and the ends Leninists aim for and so our disagreements with that tradition is far more than semantics.

This does not mean that all members of Leninist parties do not support workers' self-management in society and production, favour workers' democracy, actually do believe in working class self-emancipation and so on. Many do, unaware that the tradition they have joined does not actually share those values. It could, therefore, be argued that such values can be “added” to the core Leninist ideas. However, such a viewpoint is optimistic in the extreme. Leninist positions on workers' self-management, etc., do not “just happen” nor are they the product of ignorance. Rather they are the natural result of those “core” ideas. To add other values to Leninism would be like adding extensions to a house built on sand — the foundations are unsuitable and any additions would soon fall down. This was what happened during the Russian Revolution — movements from below which had a different vision of socialism came to grief on the rocks of Bolshevik power.

The issue is clear — either you aim for a socialist society and use socialist methods to get there or you do not. Those who do seek a **real** socialism (as opposed to warmed up state capitalism) would be advised to consider anarchism which is truly “*socialism from below*” (see next section).

14. Why is McNally's use of the term "*socialism from below*" dishonest?

McNally argues that Marxism can be considered as "*socialism from below*." Indeed, that is the name of his pamphlet. However, his use of the term is somewhat ironic for two reasons.

Firstly, this is because the expression "*from below*" was constantly on the lips of Bakunin and Proudhon. For example, in 1848, Proudhon was talking about being a "*revolutionary from below*" and that every "*serious and lasting Revolution*" was "*made from below, by the people*." A "*Revolution from above*" was "*pure governmentalism,*" "*the negation of collective activity, of popular spontaneity*" and is "*the oppression of the wills of those below*." [quoted by George Woodcock, **Pierre-Joseph Proudhon**, p. 143] Similarly, Bakunin saw an anarchist revolution as coming "*from below*." As he put it, "*liberty can be created only by liberty, by an insurrection of all the people and the voluntary organisation of the workers from below upward*." [**Statism and Anarchy**, p. 179] Elsewhere he writes that "*future social organisation must be made solely from the bottom upwards, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal*." [**Michael Bakunin: Selected Writings**, p. 206]

No such idea is present in Marx. Rather, he saw a revolution as consisting of the election of a socialist party into government. Therefore, the idea of "*socialism from below*" is a distinctly anarchist notion, one found in the works of Proudhon and Bakunin, **not** Marx. It is ironic, given his distorted account of Proudhon and Bakunin that McNally uses their words to describe Marxism!

Secondly, and far more serious for McNally, Lenin dismissed the idea of "*from below*" as not Marxist. As he wrote in 1905 (and using Engels as an authority to back him up) "*the principle, 'only from below' is an anarchist principle*." [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 192] In this he followed Marx, who commented that Bakunin's expression "*the free organisation of the working masses from below upwards*" was "*nonsense*." [**Op. Cit.**, p. 153] For Lenin, Marxists must be in favour of "*From above as well as from below*" and "*renunciation of pressure also from above is anarchism*" [**Op. Cit.**, p. 196, p. 189] McNally does not mention "*from above*" in his pamphlet and so gives his account of Marxism a distinctly anarchist feel (while denouncing it in a most deceitful way). Why is this? Because, according to Lenin, "*[p]ressure from below is pressure by the citizens on the revolutionary government. Pressure from above is pressure by the revolutionary government on the citizens*." [**Op. Cit.**, pp. 189–90]

In other words, Marxism is based on idea that the government pressuring the citizens is acceptable. Given that Marx and Engels had argued in **The Holy Family** that the "*question is not what this or that proletarian, or even the whole of the proletariat at the moment considers as its aim. The question is what the proletariat is, and what, consequent on that being, it will be compelled to do*" the idea of "*from above*" takes on frightening overtones. [quoted by Murray Bookchin, **The Spanish Anarchists**, p. 280] As Murray Bookchin argues:

"These lines and others like them in Marx's writings were to provide the rationale for asserting the authority of Marxist parties and their

armed detachments over and even against the proletariat. Claiming a deeper and more informed comprehension of the situation than ‘even the whole of the proletariat at the given moment,’ Marxist parties went on to dissolve such revolutionary forms of proletarian organisation as factory committees and ultimately to totally regiment the proletariat according to lines established by the party leadership.” [Op. Cit., p. 289]

A given ideological premise will led to certain conclusions in practice — conclusions Lenin and Trotsky were not shy in explicitly stating.

Little wonder McNally fails to mention Lenin’s support for revolutionary action “*from above.*” As we proved above (in section 8), in practice Leninism substitutes the dictatorship of the party for that of the working class as a whole. This is unsurprising, given its confusion of working class power and party power. For example, Lenin once wrote “*the power of the Bolsheviks — that is, the power of the proletariat*” while, obviously, these two things **are** different. [Will the **Bolsheviks Maintain Power?**, p. 102] Trotsky makes the same identification of party dictatorship with popular self-government:

“We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of our party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the clarity of its theoretical vision and its strong revolutionary organisation that the party has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class. It is quite natural that, in the period in which history brings up those interests . . . the Communists have become the recognised representatives of the working class as a whole.” [Terrorism and Communism, p. 109]

In this confusion, we must note, they follow Engels who argued that “*each political party sets out to establish its rule in the state, so the German Social-Democratic Workers’ Party is striving to establish its rule, the rule of the working class.*” [Marx, Engels and Lenin, **Anarchism and Anarcho-syndicalism**, p. 94]

Such confusion is deadly to a true “*revolution from below*” and justifies the use of repression against the working class — they do not understand their own “*fundamental interests,*” only the party does. Anarchists recognise that parties and classes are different and only self-management in popular organisations from below upwards can ensure that a social revolution remains in the hands of all and not a source of power for the few. Thus “*All Power to the Soviets,*” for anarchists, means **exactly** that — not a euphemism for “*All Power to the Party.*” As Voline made clear:

“[F]or, the anarchists declared, if ‘power’ really should belong to the soviets, it could not belong to the Bolshevik Party, and if it should

belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets.” [The Unknown Revolution, p. 213]

Marxist confusion of the difference between working class power and party power, combined with the nature of centralised power and an ideology which claims to “comprehend” the “real” interests of the people cannot help but lead to the rise of a ruling bureaucracy, pursuing “from above” their own power and privileges.

“All political power inevitably creates a privileged situation for the men who exercise it,” argued Voline. *“Thus is violated, from the beginning, the equalitarian principle and strikes at the heart of the Social Revolution . . . [and] becomes the source of other privileges . . . power is compelled to create a bureaucratic and coercive apparatus indispensable to all authority . . . Thus it forms a new privileged caste, at first politically and later economically.”* [Op. Cit., p. 249]

Thus the concept of revolution “from above” is one that inevitably leads to a new form of class rule — rule by bureaucracy. This is not because the Bolsheviks were “bad people” — rather it is to do with the nature of centralised power (which by its very nature can only be exercised by the few). As the anarchist Sergven argued in 1918:

“The proletariat is being gradually enserfed by the state. The people are being transformed into servants over whom there has arisen a new class of administrators — a new class born mainly from the womb of the so-called intelligentsia . . . We do not mean to say . . . that the Bolshevik party set out to create a new class system. But we do say that even the best intentions and aspirations must inevitably be smashed against the evils inherent in any system of centralised power. The separation of management from labour, the division between administrators and workers flows logically from centralisation. It cannot be otherwise.” [The Anarchists in the Russian Revolution, pp. 123–4]

Thus McNally’s use of the term “from below” is dishonest on two levels. Firstly, it is of anarchist origin and, secondly, it was repudiated by Lenin himself (who urged revolution “from below” and “from above”, thus laying the groundwork for a new class system based around the Party). It goes without saying that either McNally is ignorant of his subject (and if so, why write a pamphlet on it) or he knew these facts and decided to suppress them.

Either way it shows the bankruptcy of Marxism — it uses libertarian rhetoric for non-libertarian ends while distorting the real source of those ideas. That Lenin dismissed this rhetoric and the ideas behind them as “anarchist” says it all. McNally’s (and the SWP/ISO’s) use of this rhetoric and imagery is therefore deeply dishonest.

15. Did Trotsky keep alive Leninism’s “democratic essence”?

McNally argues that “[d]uring the terrible decades of the 1920s and 1940s . . . the lone voice of Leon Trotsky kept alive some of the basic elements of socialism from

below.” He suggests that it “*was Trotsky’s great virtue to insist against all odds that socialism was rooted in the struggle for human freedom.*”

There is one slight flaw with this argument, namely that it is not actually true. All through the 1920s and 1930s Trotsky, rather than argue for “*socialism’s democratic essence*”, continually argued for party dictatorship. That McNally asserts the exact opposite suggests that the ideas of anarchism are not the only ones he is ignorant of. To prove our argument, we simply need to provide a chronological account of Trotsky’s actual ideas.

We shall begin in 1920 when we discover Trotsky arguing that:

“We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the . . . party . . . [that] the Soviets . . . [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class.” [Terrorism and Communism, p. 109]

Of course, this was written during the Civil War and may be excused in terms of the circumstances in which it was written. Sadly for this kind of argument, Trotsky continued to argue for party dictatorship after its end. In 1921, he argued again for Party dictatorship at the Tenth Party Congress. His comments made there against the **Workers’ Opposition** within the Communist Party make his position clear:

“The Workers’ Opposition has come out with dangerous slogans, making a fetish of democratic principles! They place the workers’ right to elect representatives — above the Party, as if the party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the workers’ democracy. It is necessary to create amongst us the awareness of the revolutionary birthright of the party. which is obliged to maintain its dictatorship, regardless of temporary wavering even in the working classes. This awareness is for us the indispensable element. The dictatorship does not base itself at every given moment on the formal principle of a workers’ democracy.” [quoted by Samuel Farber, **Before Stalinism**, p. 209]

He repeated this call again. In 1922 he stated plainly that “*we maintain the dictatorship of our party!*” [The First Five Years of the Communist International, vol. 2, p. 255] Writing in 1923, he argued that “*[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party, and its leadership in all spheres of our work.*” He stressed that “*[o]ur party is the ruling party . . . To allow any changes whatever in this field, to allow the idea of a partial . . . curtailment of the leading role of our party would mean to bring into question all the achievements of the revolution and its*

future.” He indicated the fate of those who **did** question the party’s “leading role”: “Whoever makes an attempt on the party’s leading role will, I hope, be unanimously dumped by all of us on the other side of the barricade.” [Leon Trotsky Speaks, p. 158 and p. 160]

Which, of course, was exactly what the Bolsheviks had done to other socialists (anarchists and others) and working class militants and strikers after they had taken power.

At this point, it will be argued that this was before the rise of Stalinism and the defeat of the Left Opposition. With the rise of Stalin, many will argue that Trotsky finally rejected the idea of party dictatorship and re-embraced what McNally terms the “democratic essence” of socialism. Unfortunately, yet again, this argument suffers from the flaw that it is totally untrue.

Let us start with the so-called “New Course” of December 1923, in which Trotsky stated that “[w]e are the only party in the country and, in the period of the dictatorship, it could not be otherwise” and the Party was “obliged to monopolise the direction of political life.” Although, of course, it was “incontestable that fractions are a scourge in the present situation” and not to be tolerated. Of course, there was talk of “workers’ democracy” but the “New Course Resolution” was clear that that term in fact meant only internal party democracy: “Workers’ democracy means the liberty of frank discussion of the most important questions of party life by all members, and the election of all leading party functionaries and commissions”. To confirm this, it explicitly stated that “there can be no toleration of the formation of groupings whose ideological content is directed . . . against the dictatorship of the proletariat, as for instance the Workers’ Truth and Workers’ Group.” [The challenge of the Left Opposition (1923–25), p. 87, p. 89 and p. 460] Both these groups explicitly aimed for genuine workers’ democracy and opposed party dictatorship.

Moving on to Left Opposition proper, we see Trotsky opining in 1926 that the “dictatorship of the party does not contradict the dictatorship of the class either theoretically or practically; but is the expression of it, if the regime of workers’ democracy is constantly developed more and more.” [The Challenge of the Left Opposition (1926–27), p. 76] The obvious contradictions and absurdities of this assertion are all too plain. Needless to say, when defending the concept of “the dictatorship of the party” he linked it to Lenin (and so to Leninist orthodoxy):

“Of course, the foundation of our regime is the dictatorship of a class. But this in turn assumes . . . it is class that has come to self-consciousness through its vanguard, which is to say, through the party. Without this, the dictatorship could not exist . . . Dictatorship is the most highly concentrated function of function of a class, and therefore the basic instrument of a dictatorship is a party. In the most fundamental aspects a class realises its dictatorship through a party. That is why Lenin spoke not only of the dictatorship of the class but also the dictatorship of the party and, in a certain sense, made them identical.” [Op. Cit., pp. 75–6]

1927 saw Trotsky state that “[w]ith us the dictatorship of the party (quite falsely disputed theoretically by Stalin) is the expression of the socialist dictatorship of the proletariat . . . The dictatorship of a party is a part of the socialist revolution”? [Leon Trotsky on China, p. 251]

The same year saw the publication of the **Platform of the Opposition**, in which it will soon be discovered that Trotsky **still** did not question the issue of Party dictatorship. Indeed, it is actually stressed in that document. While it urged a “*consistent development of a workers’ democracy in the party, the trade unions, and the soviets*” and to “*convert the urban soviets into real institutions of proletarian power*” it contradicted itself by, ironically, attacking Stalin for weakening the party’s dictatorship. In its words, the “*growing replacement of the party by its own apparatus is promoted by a ‘theory’ of Stalin’s which denies the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.*” Of course it did not bother to explain how workers’ democracy **could** develop within a party dictatorship nor how soviets could become institutions of power when real power would, obviously, lie with the party. But, then, it did not have to as by “*workers’ democracy*” the Platform meant inter-party democracy, as can be seen when its authors “*affirm*” the “*New Course Resolution*” definition quoted above. [**The Challenge of the Left Opposition (1926–7)**, p. 384, p. 395 and p. 402]

It repeated this “*principle*” by arguing that “*the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry.*” It stressed that “[*n*]*obody who sincerely defends the line of Lenin can entertain the idea of ‘two parties’ or play with the suggestion of a split. Only those who desire to replace Lenin’s course with some other can advocate a split or a movement along the two-party road.*” As such: “*We will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a single party.*” [**Op. Cit.**, p. 439 and p. 441]

Trotsky did not change from this perspective even after the horrors of Stalinism which McNally correctly documents. Writing in 1937, ten years after the Platform was published, this point is reiterated in his essay, “*Bolshevism and Stalinism*” (written in 1937) when argued quite explicitly that “*the proletariat can take power only through its vanguard*” and that “*the necessity for state power arises from an insufficient cultural level of the masses and their heterogeneity.*” Only with “*support of the vanguard by the class*” can there be the “*conquest of power*” and it was in “*this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard.*” Thus, rather than the working class as a whole seizing power, it is the “*vanguard*” which takes power — “*a revolutionary party, even after seizing power . . . is still by no means the sovereign ruler of society.*” Note, the party is “*the sovereign ruler of society,*” **not** the working class. Nor can it be said that he was not clear who held power in his system: state power is required to **govern the masses**, who cannot exercise power themselves. As Trotsky put it, “[*t*]*hose who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the Bolshevik leadership were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.*” [**Writings 1936–37**, p. 490, p. 488 and p. 495] Later that same year he repeated this position:

“*The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle,*

the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history. . . The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution . . . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the 'dictatorship' of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses." [Op. Cit., pp. 513-4]

Which was, let us not forget, his argument in 1920! Such remarkable consistency on this point over a 17 year period and one which cannot be overlooked if you seek to present an accurate account of Trotsky's ideas during this period. Significantly, this was the year after his apparent (and much belated) embrace of soviet democracy in **The Revolution Betrayed**. His advice on what to do during the Spanish Revolution followed this pattern: "*Because the leaders of the CNT renounced dictatorship for themselves they left the place open for the Stalinist dictatorship.*" [our emphasis, **Op. Cit.**, p. 514] So much for workers' power!

Two years later, Trotsky repeats the same dictatorial ideas. Writing in 1939, he indicates yet again that he viewed democracy as a threat to the revolution and saw the need for party power over workers' freedom (a position, incidentally, which echoes his comments from 1921):

*"The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralised organisation of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves . . . if the dictatorship of the proletariat means anything at all, then it means that the vanguard of the proletariat is armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself." ["The Moralists and Sycophants against Marxism", pp. 53-66, **Their Morals and Ours**, p. 59]*

Needless to say, **by definition** everyone is "*backward*" when compared to the "*vanguard of the proletariat.*" Moreover, as it is this "*vanguard*" which is "*armed with the resources of the state*" and **not** the proletariat as a whole we are left with one obvious conclusion, namely party dictatorship rather than working class freedom. This is because such a position means denying exactly what workers' democracy is meant to be all about — namely that working people can recall and replace their delegates when those delegates do not follow the wishes and mandates of the electors. If the governors determine what is and what is not in the "real" interests of the masses and "overcome" (i.e. repress) the governed, then we have dictatorship, not democracy. Clearly Trotsky is, yet again, arguing for party dictatorship and his comments are hardly in the spirit

of individual/social freedom or democracy. Rather they mean the promotion of party power over workers' power — a position which Trotsky had argued consistently throughout the 1920s and 1930s.

As “Left Oppositionist” Victor Serge pointed out, “*the greatest reach of boldness of the Left Opposition in the Bolshevik Party was to demand the restoration of inner-Party democracy, and it never dared dispute the theory of single-party government — by this time, it was too late.*” [**The Serge-Trotsky Papers**, p. 181] Even in the prison camps in the late 1920s and early 1930s, “*almost all the Trotskyists continued to consider that ‘freedom of party’ would be ‘the end of the revolution.’ ‘Freedom to choose one’s party — that is Menshevism,’ was the Trotskyists’ final verdict.*” [Ante Ciliga, **The Russian Enigma**, p. 280] As can be seen, they were simply following their leader — and Bolshevik orthodoxy!

As can be seen, McNally does not present a remotely accurate account of Trotsky's ideas. All of which makes McNally's comments deeply ironic. McNally argues that “*Stalin had returned to an ideology resembling authoritarian pre-Marxian socialism. Gone was socialism's democratic essence. Stalin's ‘Marxism’ was a variant of socialism from above*” Clearly, Trotsky's “Marxism” was also a variant of “*socialism from above*” and without “*socialism's democratic essence*” (unless you think that party dictatorship can somehow be reconciled with democracy or expresses one of the “*basic elements of socialism from below*”). For Trotsky, as for Stalin, the dictatorship of the party was a fundamental principle of Bolshevism and one which was above democracy (which, by its very nature, expresses the “*vacillation of the masses*”).

Ironically, McNally argues that “[t]hroughout the 1920s and until his death . . . Trotsky fought desperately to build a revolutionary socialist movement based on the principles of Marx and Lenin.” Leaving Marx to one side for the moment, McNally's comments are correct. In his support for party power and dictatorship (for a “*socialism from above,*” to use McNally's term) Trotsky was indeed following Lenin's principles. As noted in the last section, Lenin had been arguing from a “socialism” based on “*above*” and “*below*” since at least 1905. The reality of Bolshevik rule (as indicated in section 8) showed, pressure “*from above*” by a “revolutionary” government easily crushes pressure “*from below.*” Nor was Lenin shy in arguing for Party dictatorship. As he put it in 1920:

“the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts . . . that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard . . . Such is the basic mechanism of the dictatorship of the dictatorship of the proletariat, and the essentials of transitions from capitalism to communism . . . for the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation.” [**Collected Works**, vol. 32, p. 21]

To stress the point, Lenin is clearly arguing for party power, **not** workers' power, and that party dictatorship is inevitable in **every** revolution. This position is **not** put in terms of the extreme problems facing the Russian Revolution but rather is expressed in universal terms. As such, in **this** sense, McNally is

right — by defending the dictatorship of the party Trotsky was following the “principles” laid down by Lenin.

Despite Lenin and Trotsky’s dismissal of democracy, McNally argues that democracy is the core need of socialism:

“A workers’ state, according to Marx and Lenin, is a state based upon workers’ control of society. It depends upon the existence of democratic organisation that can control society from below. A workers’ state presupposes that workers are running the state. To talk of a workers’ state is necessarily to talk of workers’ power and workers’ democracy.”

Which, as far as it goes, is correct (for anarchists, of course, the idea that a state can be run from below is utopian — it is not designed for that and no state has ever been). Sadly for his argument, both Lenin and Trotsky argued against the idea of workers’ democracy and, in stark contrast, argued that the dictatorship of the party was essential for a successful revolution. Indeed, they both explicitly argued against the idea that a mass, democratic organisation could run society during a revolution. The need for party power was raised explicitly to combat the fact that the workers’ could change their minds and vote against the vanguard party. As such, the founding fathers of the SWP/ISO political tradition explicitly argued that a workers’ state had to reject workers power and democracy in order to ensure the victory of the revolution. Clearly, according to McNally’s own argument, Bolshevism cannot be considered as “socialism from below” as it explicitly argued that a workers’ state did not “necessarily” mean workers’ power or democracy.

As indicated above, for the period McNally **himself** selects (the 1920s and 1930s), Trotsky consistently argued that the Bolshevik tradition the SWP/ISO places itself was based on the “principle” of party dictatorship. For McNally to talk about Trotsky keeping “*socialism from below*” alive is, therefore, truly amazing. It either indicates a lack of awareness of Trotsky’s ideas or a desire to deceive.

For anarchists, we stress, the Bolshevik substitution of party power for workers power did not come as a surprise. The state is the delegation of **power** — as such, it means that the idea of a “workers’ state” expressing “workers’ power” is a logical impossibility. If workers **are** running society then power rests in their hands. If a state exists then power rests in the hands of the handful of people at the top, **not** in the hands of all. The state was designed for minority rule. No state can be an organ of working class (i.e. majority) self-management due to its basic nature, structure and design.

For this reason anarchists from Bakunin onwards have argued for a bottom-up federation of workers’ councils as the agent of revolution and the means of managing society after capitalism and the state have been abolished. If these organs of workers’ self-management are co-opted into a state structure (as happened in Russia) then their power will be handed over to the **real** power in any state — the government (in this case, the Council of People’s Commissars). They will quickly become mere rubberstamps of the organisation which holds the reigns of power, the vanguard party and its central committee.

McNally rewrites history by arguing that it was “*Stalin’s counter-revolution*” which saw “*communist militants . . . executed, peasants slaughtered, the last ves-*

tiges of democracy eliminated.” The SWP/ISO usually date this “counter-revolution” to around 1927/8. However, by this date there was no “*vestiges*” of meaningful democracy left — as Trotsky himself made clear in his comments in favour of party dictatorship in 1921 and 1923. Indeed, Trotsky had supported the repression of the Kronstadt revolt which had called for soviet democracy (see the appendix on “What was the Kronstadt Rebellion?” for details). He argues that Trotsky “*acknowledged that the soviets had been destroyed, that union democracy had disappeared, that the Bolshevik party had been stripped of its revolutionary character*” under Stalinism. Yet, as we noted in section 8, the Bolsheviks had already destroyed soviet democracy, undermined union democracy and repressed all revolutionary elements outside of the party (the anarchists being first in April 1918). Moreover, as we discussed in section 13, Lenin had argued for the introduction of state capitalism in April 1918 and the appointment of “one-man management.” Clearly, by the start of the Russian Civil War in late May 1918, the Bolsheviks had introduced much of which McNally denounces as “Stalinism.” By 1921, the repression of the Kronstadt revolt and the major strike wave that inspired it had made Stalinism inevitable (see the appendix on “What was the Kronstadt Rebellion?”). Clearly, to draw a sharp distinction between Stalinism and Bolshevism under Lenin is difficult, if not impossible, to make based on McNally’s own criteria.

During his analysis of the Trotskyist movements, McNally states that after the second world war “*the Trotskyist movement greeted*” the various new Stalinist regimes in Eastern Europe and elsewhere “*as workers’ states*” in spite of being “*brutally undemocratic state capitalist tyrannies.*” Given that the SWP/ISO and a host of other Leninist groups still argue that Lenin’s brutally undemocratic state capitalist tyranny was some kind of “workers’ state” McNally’s comments seem deeply ironic given the history of Leninism in power. As such, Trotsky’s defence of Stalinism as a “*degenerated workers’ state*” is not as surprising as McNally tries to claim. If, as he argues, “[*t*]o talk of a workers’ state is necessarily to talk of workers’ power and workers’ democracy” then Lenin’s regime had ceased to be a “workers’ state” (if such a thing could exist) by the spring of 1918 at the latest. For anarchists (and libertarian Marxists) the similarities are all too clear between the regime under Lenin and that under Stalin. That McNally cannot see the obvious similarities suggests a lack of objectivity.

He sums up his account of the post-Second War World Trotskyists by arguing that “the movement Trotsky had created fell victim to the ideology of socialism from above.” Unfortunately for his claims, this is not the case. As proven above, Trotsky had consistently argued for the dictatorship of the party for 20 years and so Trotskyism had always been based on “*the ideology of socialism from above.*” Trotsky had argued for party dictatorship simply because democratic mass organisations would allow the working class to express their “*wavering*” and “*vacillations.*” Given that, according to those who follow Bolshevik ideas, the working class is meant to run the so-called “workers’ state” Trotsky’s arguments are extremely significant. He explicitly acknowledged that under Bolshevism the working class does **not** actually manage their own fates but rather the vanguard party does. This is cannot be anything **but** “*socialism from above.*” If, as McNally argues, Trotsky’s “*fatal error*” in not recognising that Stalinism was state capitalism came from “*violating the principles of socialism from below,*” then this “fatal error” is at the heart of the Leninist tradition.

As such, its roots can be traced further back than the rise of Stalin. Its real roots lie with the idea of a “workers’ state” and so with the ideas of Marx and Engels. As Bakunin argued at the time (and anarchists have repeated since) the state is, by its nature, a centralised and top-down machine. By creating a “revolutionary” government, power is automatically transferred from the working class into the hands of a few people at the top. As they have the real, **de facto**, power in the state, it is inevitable that they will implement “socialism from above” as that is how the state is structured. As Bakunin argued, “every state . . . are in essence only machines governing the masses from above” by a “privileged minority, allegedly knowing the genuine interests of the people better than the people themselves.” The idea of a state being run “from below” makes as much sense as “dry rain.” Little wonder Bakunin argued for a “federal organisation, from the bottom upward, of workers’ associations, groups, city and village communes, and finally of regions and peoples” as “the sole condition of a real and not fictitious liberty.” In other words, “[w]here all rule, there are no more ruled, and there is no State.” [**The Political Philosophy of Bakunin**, p. 211, p. 210 and p. 223] Only this, the destruction of every state and its replacement by a system of workers’ councils, can ensure a real “**socialism from below.**”

Therefore, rather than signifying the working class running society directly, the “workers’ state” actually signifies the opposite — namely, that the working class has delegated that power and responsibility to **others**, namely the government. As Leninism supports the idea of a “workers’ state” then it is inevitably and logically tied to the idea of “socialism from below.” Given that Lenin himself argued that “only from below” was an anarchist principle (see last section), we can easily see what the “fatal error” of Trotsky **actually** was. By rejecting anarchism he automatically rejected **real “socialism from below.”**

Sadly for McNally, Trotsky did not, as he asserts, embrace the “*democratic essence*” of socialism in the 1920s or 30s. Rather, as is clear from Trotsky’s writings, he embraced party dictatorship (i.e. “*socialism from above*”) and considered this as quite compatible (indeed, an essential aspect) of his Leninist ideology. That McNally fails to indicate this and, indeed, asserts the exact opposite of the facts shows that it is not only anarchism he is ignorant about.

Marxists and Spanish Anarchism

In this appendix of our FAQ we discuss and reply to various analyses of Spanish anarchism put forward by Marxists, particularly Marxist-Leninists of various shades. The history and politics of Spanish Anarchism is not well known in many circles, particularly Marxist ones, and the various misrepresentations and distortions that Marxists have spread about that history and politics are many. This appendix is an attempt to put the record straight with regards the Spanish Anarchist movement and point out the errors associated with the standard Marxist accounts of that movement, its politics and its history.

Hopefully this appendix will go some way towards making Marxists (and others) investigate the actual facts of anarchism and Spanish anarchist history rather than depending on inaccurate secondary material (usually written by their comrades).

Part of this essay is based on the article "*Trotskyist Lies on Anarchism*" which appeared in **Black Flag** issue no. 211 and Tom Wetzels article **Workers' Power and the Spanish Revolution**.

1. Were the Spanish Anarchists "*Primitive Rebels*"?

The thesis that the Spanish Anarchists were "*primitive rebels*," with a primitive understanding of the nature of revolution is a common one amongst Marxists. One of the main sources for this kind of argument is Eric Hobsbawm's **Primitive Rebels**, who was a member of the British Communist Party at the time. While the obvious Stalinist nature of the author may be thought enough to alert the intelligent of its political biases, its basic thesis is repeated by many Marxists.

Before discussing Hobsbawm in more detail, it would be useful to refute some of the more silly things so-called serious historians have asserted about Spanish Anarchism. Indeed, it would be hard to find another social or political movement which has been more misrepresented or its ideas and activities so distorted by historians whose attitudes seem more supported by ideological conviction rather than history or investigation of social life.

One of the most common descriptions of Spanish anarchism is that it was "*religious*" or "*millenarium*" in nature. Hobsbawm himself accepts this conceptualisation, along with historians and commentators like Gerald Brenan and Franz Brokenau (who, in fact, did state "*Anarchism is a religious movement*"). Such use of religion was largely due to the influence of Juan Diaz del Moral,

a lawyer and historian who was also a landowner. As Jerome R. Mintz points out, “according to Diaz del Moral, the moral and passionate obreros conscientes [conscious workers — i.e. workers who considered themselves to be anarchists] absorbed in their pamphlets and newspapers were akin to frenzied believers in a new religion.” [The Anarchists of Casas Viejas, p. 5f] However, such a perspective was formed by his class position and privileges which could not help but reflect them:

“Diaz del Moral ascribed to the campesinos [of Andalusia] racial and cultural stereotypes that were common saws of his class. The sole cause for the waves of rural unrest, Diaz del Moral asserted, could be found in the psychology of the campesinos . . . He believed that the Andalusian field workers had inherited a Moorish tendency toward ecstasy and millenarianism that accounted for their attraction to anarchist teaching. Diaz del Moral was mystified by expressions of animosity directed toward him, but the workers considered him to be a *senorito*, a landowner who does not labour . . . Although he was both scholarly and sympathetic, Diaz del Moral could not comprehend the hunger and the desperation of the campesinos around him . . . To Diaz del Moral, campesino ignorance, passion, ecstasy, illusion, and depression, not having a legitimate basis in reality, could be found only in the roots of their racial heritage.” [Op. Cit., pp. 5–6]

Hence the “religious” nature of anarchism — it was one of the ways an uncomprehending member of the middle-class could explain working class discontent and rebellion. Unfortunately, this “*explanation*” has become common place in history books (partly reflected academics class interest too and lack of understanding of working class interests, needs and hopes).

As Mintz argues, “at first glance the religious model seems to make anarchism easier to understand, particularly in the absence of detailed observation and intimate contact. The model was, however, also used to serve the political ends of anarchism’s opponents. Here the use of the terms ‘religious’ and ‘millenarium’ stamp anarchist goals as unrealistic and unattainable. Anarchism is thus dismissed as a viable solution to social ills.” He continues by arguing that the “oversimplifications posited became serious distortions of anarchist belief and practice” (as we shall see). [Op. Cit., p. 5 and p. 6]

Temma Kaplan’s critique of the “religious” view is also worth mentioning. She argues that “the millenarium theory is too mechanistic to explain the complex pattern of Andalusian anarchist activity. The millenarian argument, in portraying the Andalusian anarchists as fundamentally religious, overlooks their clear comprehension of the social sources of their oppression.” She concludes that “the degree of organisation, not the religiosity of workers and the community, accounts for mass mobilisations carried on by the Andalusian anarchists at the end of the nineteenth century.” She also notes that the “[i]n a secular age, the taint of religion is the taint of irrationality.” [Anarchists of Andalusia: 1868–1903, pp. 210–12 and p. 211] Thus, the Andalusian anarchists had a clear idea who their enemies were, namely the ruling class of the region. She also points out that, for all their revolutionary elan, the anarchists developed a rational strategy of revolution, channelling their energies into organising a trade union movement that could be used as a vehicle for social and economic

change. Moreover, as well as a clear idea of how to change society they had a clear vision of what sort of society they desired — one built around collective ownership and federations of workers' associations and communes.

Therefore the idea that anarchism can be explained in “*religious*” terms is fundamentally flawed. It basically assumes that the Spanish workers were fundamentally irrational, unable to comprehend the sources of their unhappiness nor able to define their own political goals and tactics and instead looked to naive theories which reinforced their irrationalities. In actuality, like most people, they were sensible, intelligent human beings who believed in a better life and were willing to apply their ideas in their everyday life. That historians apply patronising attitudes towards them says more about the historians than the campesinos.

This uncomprehending attitude to historians can be seen from some of the more strange assertions they make against the Spanish Anarchists. Gerald Brennan, Eric Hobsbawm and Raymond Carr, for example, all maintained that there was a connection between anarchist strikes and sexual practices. Carr's description gives a flavour:

“Austere puritans, they sought to impose vegetarianism, sexual abstinence, and atheism on one of the most backward peasantries of Europe . . . Thus strikes were moments of exaltation as well as demands for better conditions; spontaneous and often disconnected they would bring, not only the abolition of piece-work, but ‘the day,’ so near at hand that sexual intercourse and alcohol were abandoned by enthusiasts till it should dawn.” [Spain: 1808–1975, p. 444]

Mintz, an American anthropologist who actually stayed with the campesino's for a number of years after 1965, actually asked them about such claims. As he put it, the “*level-headed anarchists were astonished by such descriptions of supposed Spanish puritanism by over-enthusiastic historians.*” [Op. Cit., p. 6] As one anarchist put it, “[o]f course, without any work the husband couldn't provide any food at dinnertime, and so they were angry at each other, and she wouldn't have anything to do with him. In that sense, yes, there were no sexual relations.” [quoted, Op. Cit., p. 7]

Mintz traces the citations which allowed the historians to arrive at such ridiculous views to a French social historian, Angel Maraud, who observed that during the general strike of 1902 in Moron, marriages were postponed to after the promised division of the lands. As Mintz points out, “*as a Frenchman, Maraud undoubtedly assumed that everyone knew a formal wedding ceremony did not necessarily govern the sexual relations of courting couples.*” [Op. Cit., p. 6f]

As for abstinence and puritanism, nothing could be further from the truth. As Mintz argues, the anarchists considered alcoholism as being “*responsible for much of the social malaise among many workers . . . Excessive drinking robbed the worker of his senses and deprived his family of food. Anarchist newspapers and pamphlets hammered out the evil of this vice.*” However, “[p]roscriptions were not of a puritanical order” (and so there was no desire to “impose” such things on people) and quotes an anarchist who stated that “*coffee and tobacco were not prohibited, but one was advised against using them. Men were warned against going to a brothel. It was not a matter of morality but of hygiene.*” As

for vegetarianism, it “*attracted few adherents, even among the obreros conscientes.*” [Op. Cit., pp. 86–7 and p. 88]

Moreover, academic mockery of anarchist attempts to combat alcoholism (and **not** alcohol as such) forgets the social context. Being academics they may not have experienced wage labour directly and so do not realise the misery it can cause. People turn to drink simply because their jobs are so bad and seek escape from the drudgery of their everyday lives. As Bakunin argued, “*confined in their life like a prisoner in his prison, without horizon, without outlet . . . the people would have the singularly narrow souls and blunted instincts of the bourgeois if they did not feel a desire to escape; but of escape there are but three methods — two chimerical and a third real. The first two are the dram-shop and the church, debauchery of the body or debauchery of the mind; the third is social revolution.*” [God and the State, p. 16] So to combat alcoholism was particularly important as many workers turned to alcohol as a means of escaping the misery of life under capitalism. Thus Bookchin:

“[T]o abstain from smoking, to live by high moral standards, and to especially adjure the consumption of alcohol was very important at the time. Spain was going through her own belated industrial revolution during the period of anarchist ascendancy with all its demoralising features. The collapse of morale among the proletariat, with rampant drunkenness, venereal disease, and the collapse of sanitary facilities, was the foremost problem which Spanish revolutionaries had to deal with . . . On this score, the Spanish anarchists were eminently successful. Few CNT workers, much less a committed anarchist, would have dared show up drunk at meetings or misbehave overtly with their comrades. If one considers the terrible working and living conditions of the period, alcoholism was not as serious a problem in Spain as it was in England during the industrial revolution.” [“Introductory Essay”, The Anarchist Collectives, Sam Dolgoff (ed.), pp. xix-xxf]

Mintz sums up by stating “*[c]ontrary to exaggerated accounts of anarchist zeal, most thoughtful obreros conscientes believed in moderation, not abstinence.*” [Op. Cit., p. 88] Unfortunately Mintz’s work, the product of years of living with and talking to the people actually involved in the movement, does not seem to have made much impact on the historians. Unsurprising, really, as history is rarely about the actions, ideas and hopes of working people.

As can be seen, historians seem to delight in misrepresenting the ideas and actions of the Spanish Anarchists. Sometimes, as just seen, the distortions are quite serious, extremely misleading and ensure that anarchism cannot be understood or viewed as a serious political theory (we can understand why Marxists historians would seek this). Sometimes they can be subtle as when Ronald Fraser states that at the CNT’s Saragossa congress in 1936 “*the proposal to create a libertarian militia to crush a military uprising was rejected almost scornfully, in the name of traditional anti-militarism.*” [Blood of Spain, p. 101] Hugh Thomas makes the same claim, stating at “*there was no sign that anyone [at the congress] realised that there was a danger of fascism; and no agreement, in consequence, on the arming of militias, much less the organisation of a revolutionary army as suggested by Juan Garcia Oliver.*” [The Spanish Civil War, p. 181]

However, what Fraser and Thomas omit to tell the reader is that this motion “was defeated by one favouring the idea of guerrilla warfare.” [Peter Marshal, **Demanding the Impossible**, p. 460] The Saragossa resolution itself stated that a “permanent army constitutes the greatest danger for the revolution . . . The armed people will be the best guarantee against all attempts to restore the destroyed regime by interior or exterior forces . . . Each Commune should have its arms and elements of defence.” [quoted by Robert Alexander, **The Anarchists in the Spanish Civil War**, vol. 1, p. 64]

Fraser’s and Hugh’s omission is extremely serious — it gives a radically false impression of anarchist politics. Their comments could lead a reader to think that anarchists, as Marxists claim, do not believe in defending a revolution. As can be seen from the actual resolutions of the Saragossa conference, this is not the case. Indeed, given that the congress was explicitly discussing, along with many other issues, the question of “defence of the revolution” their omission seriously distorts the CNT’s position and anarchist theory. As seen, the congress supported the need to arm the people and to keep those arms under the control of the communes (as well as the role of “Confederal Defence Forces” and the efficient organisation of forces on a national level). Given that Thomas quotes extensively from the Saragossa resolution on libertarian communism we can only surmise that he forgot to read the section entitled “*Defence of the Revolution.*”

Hugh and Thomas omissions, however, ensure that anarchism is presented as an utopian and naive theory, unaware of the problems facing society. In reality, the opposite is the case — the Spanish anarchists were well aware of the need to arm the people and resist counter-revolution and fascism by force. Regardless of Thomas’ claims, it is clear that the CNT and FAI realised the danger of fascism existed and passed appropriate resolutions outlining how to organise an effective means of self-defence (indeed, as early as February 14 of that year, the CNT had issued a prophetic manifesto warning that right-wing elements were ready to provoke a military coup [Murray Bookchin, **The Spanish Anarchists**, p. 273]). To state otherwise, while quoting from the document that discusses the issue, must be considered a deliberate lie.

However, to return to our main point — Eric Hobsbawm’s thesis that the Spanish anarchists were an example of “pre-political” groups — the “primitive rebels” of his title.

Essentially, Hobsbawm describes the Spanish Anarchists — particularly the Andalusian anarchists — as modern-day secular mystics who, like the millenarians of the Middle Ages, were guided by the irrational belief that it was possible to will profound social change. The actions of the Spanish anarchist movement, therefore, can be explained in terms of millenarian behaviour — the belief that it was able to jump start to utopia via an act of will.

The Spanish farm and industrial workers, it is argued, were unable to grasp the complexities of the economic and political structures that dominated their lives and so were attracted to anarchism. According to Hobsbawm, anarchism is marked by “theoretical primitivism” and a primitive understanding of revolution and this explained why anarchism was popular with Spanish workers, particularly farm workers. According to Hobsbawm, anarchism told the workers that by spontaneously rising up together they could overthrow the forces of repression and create the new millennium.

Obviously, we cannot refute Hobsbawm’s claims of anarchism’s “theoretical

primitivism” in this appendix, the reader is invited to consult the main FAQ. Moreover, we cannot stress more that Hobsbawm’s assertion that anarchists believe in spontaneous, overnight uprisings is false. Rather, we see revolution as a **process** in which day-to-day struggle and organisation play a key role — it is not seen as occurring independently of the on-going class struggle or social evolution. While we discuss in depth the nature of an anarchist social revolution in section J.7, we can present a few quotes by Bakunin to refute Hobsbawm’s claim:

“Revolutions are not improvised. They are not made at will by individuals. They come about through the force of circumstances and are independent of any deliberate ill or conspiracy.” [quoted by Brian Morris, **Bakunin: The Philosophy of Freedom**, p. 139]

“It is impossible to rouse people by artificial means. Popular revolutions are born by the actual force of events . . . It is impossible to bring about such a revolution artificially. It is not even possible to speed it up at all significantly . . . There are some periods in history when revolutions are quite simply impossible; there are other periods when they are inevitable.” [**Michael Bakunin: Selected Writings**, p. 183]

As Brian Morris correctly argues, *“Bakunin denies that a social revolution could be made by the will of individuals, independent of social and economic circumstances. He was much less a voluntarist than his Marxist critics make out . . . he was . . . aware that the social revolution would be a long process that may take many years for its realisation.”* [**Bakunin: The Philosophy of Freedom**, pp. 138–9] To aid the process of social revolution, Bakunin supported the need for *“pioneering groups or associations of advanced workers who were willing to initiate this great movement of self-emancipation.”* However, more is needed — namely popular working class organisations — *“what is the organisation of the masses? . . . It is the organisation by professions and trades . . . The organisation of the trade sections . . . bear in themselves the living seed of the new society which is to replace the old world. They are creating not only the ideas but also the facts of the future itself.”* [**Bakunin on Anarchism**, p. 252 and p. 255]

Therefore, Bakunin saw revolution as a process which starts with day-to-day struggle and creation of labour unions to organise that struggle. As he put it himself:

*“What policy should the International [Workers’ Association] follow during th[e] somewhat extended time period that separates us from this terrible social revolution . . . the International will give labour unrest in all countries an **essentially economic** character, with the aim of reducing working hours and increasing salary, by means of the **association of the working masses** . . . It will [also] propagandise its principles . . . Lastly, the International will expand and organise across frontiers of all countries, so that when the revolution — brought about by the force of circumstances — breaks out, the International will be a real force and will know what it has to do. Then it will be able to take the revolution into its own hands*

and give it a direction that will benefit the people: an earnest international organisation of workers' associations from all countries, capable of replacing this departing world of States and bourgeoisie."
[**The Basic Bakunin**, pp. 109–10]

However, while quoting Bakunin refutes part of his thesis, Hobsbawm does base his case on some actual events of Spanish Anarchist history. Therefore we need to look at these cases and show how he gets these wrong. Without an empirical basis, his case obviously falls even without quotes by Bakunin. Luckily the important examples he uses have been analysed by people without the ideological blinkers inherent in Leninism.

While we shall concentrate on just two cases — Casa Viejas in 1933 and the Jerez rising of 1892 — a few general points should be mentioned. As Jerome Mintz notes, Hobsbawms' *"account is based primarily on a preconceived evolutionary model of political development rather than on data gathered in field research. The model scales labour movements in accord with their progress toward mass parties and central authority. In short, he explains how anarchosyndicalists were presumed to act rather than what actually took place, and the uprising at Casa Viejas was used to prove an already established point of view. Unfortunately, his evolutionary model misled him on virtually every point."* [**Op. Cit.**, p. 271] We should also note his *"model"* is essentially Marxist ideology — namely, Marx's assertion that his aim for mass political parties expressed the interests of the working class and all other visions were the products of sectarians. Mintz also points out that Hobsbawm does not live up to his own model:

"While Hobsbawm's theoretical model is evolutionary, in his own treatment anarchism is often regarded as unchanging from one decade to the other. In his text, attitudes and beliefs of 1903–5, 1918–20, 1933, and 1936 are lumped together or considered interchangeable. Of course during these decades the anarchosyndicalists had developed their programs and the individuals involved had become more experienced." [**Op. Cit.**, p. 271f]

Hobsbawm believed that Casas Viejas was the classic *"anarchist"* uprising — *"utopian, millenarian, apocalyptic, as all witnesses agree it to have been."* [**Primitive Rebels**, p. 90] As Mintz states, *"the facts prove otherwise. Casas Viejas rose not in a frenzy of blind millenarianism but in response to a call for a nation-wide revolutionary strike. The insurrection of January 1933 was hatched by faistas [members of the FAI] in Barcelona and was to be fought primarily there and in other urban centres. The uprisings in the countryside would be diversionary and designed to keep the civil guard from shifting reinforcements. The faista plot was then fed by intensive newspaper propaganda, by travelling orators, and by actions undertaken by the [CNT] defence committees. Representatives of the defence committees from Casas Viejas and Medina had received instructions at a regional meeting held days before. On January 11, the anarchosyndicalists of Casas Viejas believed that they were joining their companeros who had already been at the barricades since January 8."* [**Op. Cit.**, p. 272]

Hobsbawm argued that the uprising occurred in accordance with an established economic pattern:

“Economic conditions naturally determined the timing and periodicity of the revolutionary outbreaks — for instance, social movements tended to reach a peak intensity during the worse months of the year — January to March, when farm labourers have least work (the march on Jerez in 1892 and the rising of Casas Viejas in 1933 both occurred early in January), March-July, when the proceeding harvest has been exhausted and times are lean.” [Op. Cit., p. 79]

Mintz states the obvious:

*“In reality, most agricultural strikes took place in May and June, the period of the harvest and the only time of the year when the campesinos had any leverage against the landowners. The uprising at Casas Viejas occurred in January precisely because it was **not** an agricultural strike. The timing of the insurrection, hurriedly called to coincide with a planned railway strike that would make it difficult for the government to shift its forces, was determined by strategic rather than economic considerations.” [Op. Cit., p. 273]*

As for the revolt itself, Hobsbawm asserts that:

“Secure from the outside world, [the men] put up the red and black flag of anarchy and set about dividing the land. They made no attempt to spread the movement or kill anyone.” [Op. Cit., p. 274]

Which, as Mintz clearly shows, was nonsense:

“As is already evident, rather than securing themselves from the rest of world, the uprising at Casas Viejas was a pathetic attempt to join in an ill-fated national insurrection. With regard to his second point, there was neither the time nor the opportunity to ‘set about dividing the land.’ The men were scattered in various locations guarding roads and paths leading to the town. There were no meetings or discussions during this brief period of control. Only a few hours separated the shooting at the barracks and the entrance of the small [government] rescue force from Alcala. Contrary to Hobsbawm’s description of peaceful enterprise, at the outset the anarchists surrounding the barracks had fired on the civil guards, mortally wounding two men.” [Op. Cit., p. 274]

As can be seen, Hobsbawm was totally wrong about the uprising itself and so it cannot be used as evidence for his thesis. On other, less key issues, he was equally wrong. Mintz gives an excellent summary:

“Since kinship is a key feature in ‘primitive’ societies, according to Hobsbawm, it was a major factor in the leadership of the sindicato [union] in Casas Viejas.

“There is no evidence that kinship had anything to do with leadership in the anarchist movement in Casa Viejas or anywhere else. The reverse would be closer to the truth. Since the anarchists expressed belief in universal brotherhood, kinship ties were often undermined.

In times of strike or in carrying out any decision of the collective membership, obreros conscientes sometimes had to act counter to their kinship demands in order to keep faith with the movement and with their companeros.

“Hobsbawm’s specific examples are unfortunately based in part on errors of fact. . .

“Hobsbawm’s model [also] requires a charismatic leader. Accordingly, the inspired leader of the uprising is said to be ‘old Curro Cruz (‘Six Fingers’) who issued the call for revolution . . .’

[. . .]

“This celebration of Seisdedo’s role [‘Six Fingers’], however, ignores the unanimous view of townspeople of every class and political persuasion, who assert that the old man was apolitical and had nothing to do with the uprising . . . every observer and participant in the uprising agrees that Seisdedos was not the leader and was never anything other than a virtuous charcoal burner with but a slight interest in anarchosyndicalism.

[. . .]

“Should the role of charismatic leader be given to someone else in the town? This was not a case of mistaken identity. No single person in Casas Viejas could lay claim to dominating the hearts and minds of the men. . . The sindicato was governed by a junta. Among the cast of characters there is no sign of charismatic leadership . . .” [Op. Cit., pp. 274–6]

Mintz sums up by stating *“Hobsbawm’s adherence to a model, and the accumulation of misinformation, led him away from the essential conflicts underlying the tragedy and from the reality of the people who participated in it.” [Op. Cit., p. 276]*

The Jerez uprising of 1892 also fails to provide Hobsbawm with any empirical evidence to support his claims. Indeed, as in Casas Viejas, the evidence actually works against him. The actual events of the uprising are as follows. Just before midnight of 8th January 1892, several hundred workers entered the town of Jerez crying *“Long live the revolution! Long live Anarchy!”* Armed with only rocks, sticks, scythes and other farm equipment, they marched toward the city jail with the evident intention of releasing its prisoners — who included many political prisoners, victims of the government’s recent anti-anarchist campaign. A few people were killed and the uprising dispersed by a regiment of mounted troops.

Hobsbawm claims this revolt as evidence for his *“primitive rebels”* thesis. As historian George R. Esenwein argues:

“[T]he Jerez incident cannot be explained in terms of this model. What the millenarian view fails to do in this instance is to credit the workers with the ability to define their own political goals. This is not to deny that there were millenarian aspects of the rising, for the mob action of the workers on the night of 8 January indicates a degree of irrationalism that is consistent with millenarian behaviour.

But . . . the agitators seem to have had a clear motive in mind when they rose: they sought to release their comrades from the local jail and thereby demonstrate their defiance of the government's incessant persecution of the International [Workers' Association] movement. However clumsily and crudely they expressed their grievance, the workers were patently aiming to achieve this objective and not to overthrow the local government in order to inaugurate the birth of a libertarian society." [Anarchist Ideology and the Working Class Movement in Spain: 1868–1898, p. 184]

Similarly, many Marxists (and liberal historians) point to the “*cycle of insurrections*” that occurred during the 1930s. They usually portray these revolts as isolated insurrections organised by the FAI who appeared in villages and proclaimed libertarian communism. The picture is one of disorganisation, milenarianism and a believe in spontaneous revolution inspired by a few militants and their daring actions. Nothing could be further from the truth. The “*cycle of insurrections*” was far more complex that this, as Juan Gomez Casas makes clear:

“Between 1932 and 1934 . . . the Spanish anarchists tried to destroy the existing social order through a series of increasingly violent strikes and insurrections, which were at first spontaneous, later co-ordinated.” [Anarchist Organisation: The History of the FAI, p. 135]

Stuart Christie stresses this point when he wrote “[i]t has been widely assumed that the cycle of insurrections which began in . . . January 1933 were organised and instigated by the FAI . . . In fact the rising had nothing to do with the FAI. It began as an entirely spontaneous local affair directed against a local employer, but quickly mushroomed into a popular movement which threatened to engulf the whole of Catalonia and the rest of Spain . . . [CNT militant] Arturo Parera later confirmed that the FAI had not participated in the aborted movement ‘as an organisation.’” [We, the Anarchists, p. 66] While the initial revolts, such as those of the miners of Alto Llobregat in January 1932, were spontaneous acts which caught the CNT and FAI by surprise, the following insurrections became increasingly organised and co-ordinated by those organisations. The January 1933 revolt, as noted above, was based around a planned strike by the CNT railway workers union. The revolt of December 1933 was organised by a National Revolutionary Committee. Both revolts aimed at uprisings all across Spain, based on the existing organisations of the CNT — the unions and their “Defence committees”. Such a degree of planning belies any claims that Spanish Anarchists were “*primitive rebels*” or did not understand the complexities of modern society or what was required to change it.

Ultimately, Hobsbawm’s thesis and its underlying model represents Marxist arrogance and sectarianism. His model assumes the validity of the Marxist claim that true working class movements are based on mass political parties based on hierarchical, centralised, leadership and those who reject this model and political action (electioneering) are sects and sectarians. It was for this reason that Marx, faced with the increased influence of Bakunin, overturned the First International’s original basis of free discussion with his own concept of what a real workers’ movement should be.

Originally, because the various sections of the International worked under different circumstances and had attained different degrees of development, the theoretical ideals which reflected the real movement would also diverge. The International, therefore, was open to all socialist and working class tendencies. The general policies of the International would be, by necessity, based on conference decisions that reflected the free political development that flowed from local needs. These decisions would be determined by free discussion within and between sections of all economic, social and political ideas. Marx, however, replaced this policy with a common program of “*political action*” (i.e. electioneering) by mass political parties via the fixed Hague conference of 1872. Rather than having this position agreed by the normal exchange of ideas and theoretical discussion in the sections guided by the needs of the practical struggle, Marx imposed what **he** considered as the future of the workers movement onto the International — and denounced those who disagreed with him as sectarians. The notion that what Marx considered as necessary might be another sectarian position imposed on the workers’ movement did not enter his head nor that of his followers — as can be seen, Hobsbawm (mis)interpreted anarchism and its history thanks to this Marxist model and vision.

However, once we look at the anarchist movement without the blinkers created by Marxism, we see that rather than being a movement of “*primitive rebels*” Spanish Anarchism was a movement of working class people using valid tactics to meet their own social, economic and political goals — tactics and goals which evolved to meet changing circumstances. Seeing the rise of anarchism and anarcho-syndicalism as the political expression of the class struggle, guided by the needs of the practical struggle they faced naturally follows when we recognise the Marxist model for what it is — just one possible interpretation of the future of the workers’ movement rather than **the** future of that movement. Moreover, as the history of Social Democracy indicates, the predictions of Bakunin and the anarchists within the First International were proved correct. Therefore, rather than being “*primitive rebels*” or sectarian politics forced upon the working class, anarchism reflected the politics required to build a **revolutionary** workers’ movement rather than a reformist mass party.

2. How accurate is Felix Morrow’s book on the Spanish Revolution?

It is fair to say that most Marxists in Britain base their criticisms of the Spanish Anarchism, particularly the revolution of 1936, on the work of Trotskyist Felix Morrow. Morrow’s book **Revolution and Counter-Revolution in Spain**, first published in 1938, actually is not that bad — for some kinds of information. However, it is basically written as Trotskyist propaganda. All too often Morrow is inaccurate, and over-eager to bend reality to fit the party line. This is particularly the case when discussing the actions and ideas of the CNT and FAI and when discussing the activities of his fellow Trotskyists in Spain, the Bolshevik-Leninists. We discuss the first set of inaccuracies in the following sections, here we mention the second, Morrow’s comments on the Spanish Trotskyists.

The Bolshevik-Leninists, for example, an obscure sect who perhaps numbered 20 members at most, are, according to Morrow, transformed into the

only ones who could save the Spanish Revolution — because they alone were members of the Fourth International, Morrow’s own organisation. As he put it:

“Only the small forces of the Bolshevik-Leninists... clearly pointed the road for the workers.” [Felix Morrow, **Revolution and Counter-Revolution in Spain**, p. 191]

“Could that party [the party needed to lead the revolution] be any but a party standing on the platform of the Fourth International?” [**Op. Cit.**, p. 248]

And so on. As we will make clear in the following discussion, Morrow was as wrong about this as he was about anarchism.

The POUM — a more significant Marxist party in Spain, though still tiny compared to the anarchists — is also written up as far more important than it was, and slagged off for failing to lead the masses to victory (or listening to the Bolshevik-Leninists). The Fourth Internationalists “*offered the POUM the rarest and most precious form of aid: a consistent Marxist analysis*” [**Op. Cit.**, p. 105] (never mind Spanish workers needing guns and solidarity!). But when such a programme — prepared in advance — was offered to the POUM by the Fourth International representative — only two hours after arriving in Spain, and a quarter of an hour after meeting the POUM [**Op. Cit.**, p. 139] — the POUM were not interested. The POUM have been both attacked (and claimed as their own) by Trotskyists ever since.

It is Morrow’s attacks on anarchism, though, that have most readily entered leftist folklore — even among Marxists who reject Leninism. Some of Morrow’s criticisms are fair enough — but these were voiced by anarchists long before Morrow put pen to paper. Morrow, in fact, quotes and accepts the analyses of anarchists like Camillo Berneri (“*Berteri had been right*” etc. [**Op. Cit.**, p. 153]), and praises anarchists like Durruti (“*the greatest military figure produced by the war*” [**Op. Cit.**, p. 224]) — then sticks the boot into anarchism. Indeed, Durruti’s analysis is praised but he is transformed into “*no theoretician, but an activist leader of masses... his words express the revolutionary outlook of the class-conscious workers.*” [**Op. Cit.**, p. 250] Of course, his words, activity and “*outlook*” (i.e. political analysis) did not spring out of thin air but rather, to state the obvious, were informed by and reflected his anarchist politics, history, activity and vision (which in turn reflected his experiences and needs as a member of the working class). Morrow obviously wanted to have his cake and eat it.

Typically for today’s left, perhaps, the most quoted sections of Morrow’s book are the most inaccurate. In the next eight sections we discuss some of the most inaccurate claims. After that we point out that Morrow’s analysis of the militias is deeply ironic given Trotsky’s actions as leader of the Red Army. Then we discuss some of Morrow’s inaccurate assertions about anarchism in general.

Of course, some of the errors we highlight in Morrow’s work are the product of the conditions in which it was written — thousands of miles from Spain in America, dependent on papers produced by Spanish Marxists, Anarchists and others. We cannot blame him for such mistakes (although we can blame the Trotskyist publisher who reprints his account without indicating his factual errors and the Marxist writers who repeat his claims without checking their accuracy). We **do**, however, blame Morrow for his errors and misrepresentations

of the activities and politics of the Spanish Anarchists and anarchism in general. These errors derive from his politics and inability to understand anarchism or provide an honest account of it.

By the end of our discussion we hope to show why anarchists argue that Morrow's book is deeply flawed and its objectively skewed by the authors politics and so cannot be taken at face value. Morrow's book may bring comfort to those Marxists who look for ready-made answers and are prepared to accept the works of hacks at face-value. Those who want to learn from the past — instead of re-writing it — will have to look elsewhere.

3. Did a “*highly centralised*” FAI control the CNT?

According to Morrow, “*Spanish Anarchism had in the FAI a highly centralised party apparatus through which it maintained control of the CNT*” [Op. Cit., p. 100]

In reality, the FAI — the Iberian Anarchist Federation — was founded, in 1927, as a confederation of regional federations (including the Portuguese Anarchist Union). These regional federations, in turn, co-ordinated local and district federations of highly autonomous anarchist affinity groups. In the words of Murray Bookchin:

*“Like the CNT, the FAI was structured along confederal lines: the affinity groups were linked together in a Local Federation and the Local Federation in District and Regional Federations. A Local Federation was administered by an ongoing secretariat, usually of three persons, and a committee composed of one mandated delegate from each affinity group. This body comprised a sort of local executive committee. To allow for a full expression of rank-and-file views, the Local Federation was obliged to convene assemblies of all the **fais-tas** in its area. The District and Regional Federations, in turn, were simply the Local federation writ large, replicating the structure of the lower body. All the Local Districts and Regional Federations were linked together by a Peninsular Committee whose tasks, at least theoretically, were administrative... [A FAI secretary] admits that the FAI ‘exhibited a tendency towards centralism’ ... Yet it must also be emphasised that the affinity groups were far more independent than any comparable bodies in the Socialist Party, much less the Communist... the FAI was not an internally repressive organisation ... Almost as a matter of second nature, dissidents were permitted a considerable amount of freedom in voicing and publishing material against the leadership and established policies.”* [The Spanish Anarchists, pp. 197–8]

And:

“Most writers on the Spanish labour movement seem to concur in the view that, with the departure of the moderates, the CNT was to fall under the complete domination of the FAI ... But is this appraisal

correct? The FAI ... was more loosely jointed as an organisation than many of its admirers and critics seem to recognise. It has no bureaucratic apparatus, no membership cards or dues, and no headquarters with paid officials, secretaries, and clerks. . . They jealously guarded the autonomy of their affinity groups from the authority of higher organisational bodies — a state of mind hardly conducive to the development of a tightly knit, vanguard organisation.

*“The FAI, moreover, was not a politically homogeneous organisation which followed a fixed ‘line’ like the Communists and many Socialists. It had no official program by which all **faistas** could mechanically guide their actions.” [Op. Cit., p. 224]*

So, while the FAI may have had centralising tendencies, a “*highly centralised*” political party it was not. Further, many anarcho-syndicalists and affinity groups were not in the FAI (though most seem to have supported it), and many FAI members put loyalty to the CNT (the anarcho-syndicalist union confederation) first. For instance, according to the minutes of the FAI national plenum of January-February 1936:

“The Regional Committee [of Aragon, Rioja, and Navarra] is completely neglected by the majority of the militants because they are absorbed in the larger activities of the CNT”

And:

“One of the reasons for the poor condition of the FAI was the fact that almost all the comrades were active in the defence groups of the CNT” (report from the Regional Federation of the North).

These are internal documents and so unlikely to be lies. [Juan Gomez Casas, **Anarchist Organisation: the History of the FAI**, p. 165 and p. 168]

Anarchists were obviously the main influence in the CNT. Indeed, the CNT was anarcho-syndicalist long before the FAI was founded — from its creation in 1910 the CNT had been anarcho-syndicalist and remained so for 17 years before the FAI existed. However, Morrow was not the only person to assert “*FAI control*” of the CNT. In fact, the claim of “*FAI control*” was an invention of a reformist minority within the organisation — people like Angel Pestana, ex-CNT National Secretary, who wanted to turn the CNT into a politically “*neutral*” union movement. Pestana later showed what he meant by forming the Syndicalist Party and standing for Parliament (the Cortes). Obviously, in the struggle against the reformists, anarcho-syndicalists — inside the FAI or not — voted for people they trusted to run CNT committees. The reformists (called **Treinistas**) lost, split from the CNT (taking about 10% of the membership with them), and the myth of “*FAI dictatorship*” was born. Rather than accept that the membership no longer supported them, the **Treinistas** consoled themselves with tales that a minority, the FAI, had taken control of the CNT.

In fact, due to its decentralised and federal structure, the FAI could not have had the sort of dominance over the CNT that is often attributed to it. At union congresses, where policies and the program for the movement were argued out:

“[D]elegates, whether or not they were members of the FAI, were presenting resolutions adopted by their unions at open membership meetings. Actions taken at the congress had to be reported back to their unions at open meetings, and given the degree of union education among the members, it was impossible for delegates to support personal, non-representative positions.” [Juan Gomez Casas, **Anarchist Organisation: The History of the FAI**, p. 121]

The union committees were typically rotated out of office frequently and committeemen continued to work as wage-earners. In a movement so closely based on the shop floor, the FAI could not maintain influence for long if they ignored the concerns and opinions of co-workers. Moreover, only a minority of the anarcho-sindicalist activists in the CNT belonged to the FAI and, as Juan Gomez Casas points out in his history of the FAI, FAI militants frequently had a prior loyalty to the CNT. Thus his summation seems correct:

“As a minority organisation, the FAI could not possibly have had the kind of control attributed to it ... in 1931 ... there were fifty CNT members for each member of a FAI group. The FAI was strongly federalist, with its groups at the base freely associated. It could not dominate an organisation like the CNT, which had fifty times as many members and was also opposed to hierarchy and centralism. We know that FAI militants were also CNT militants, and frequently they were loyal first to the CNT. Their influence was limited to the base of the organisation through participation in the plenums of militants or unions meetings.” [Op. Cit., p. 133]

He sums up by arguing:

*“The myth of the FAI as conqueror and ruler of the CNT was created basically by the **Treinistas**”* [Op. Cit., p. 134]

Therefore, Morrow is re-cycling an argument which was produced by the reformist wing of the CNT after it had lost influence in the union rank-and-file. Perhaps he judges the FAI by his own standards? After all, the aim of Leninists is for the vanguard party to control the labour unions in their countries. Anarchists reject such a vision and believe in union autonomy — influence of political parties and groups should only exist in as much as they influence the rank-and-file who control the union. Rather than aim to control the CNT, the FAI worked to influence its membership. In the words of Francisco Ascaso (friend of Durruti and an influential anarchist militant in the CNT and FAI in his own right):

“There is not a single militant who as a ‘FAIista’ intervenes in union meetings. I work, therefore I am an exploited person. I pay my dues to the workers’ union and when I intervene at union meetings I do it as someone who is exploited, and with the right which is granted me by the card in my possession, as do the other militants, whether they belong to the FAI or not.” [cited by Abel Paz, **Durruti: The People Armed**, p. 137]

In other words, the FAI “*controlled*” the CNT only to the extent it influenced the membership — who, in fact, controlled the organisation. We must also note that Ascaso’s comment echoes Bakunin’s that the “*purpose of the Alliance [i.e. anarchist federation] is to promote the Revolution . . . it will combat all ambition to dominate the revolutionary movement of the people, either by cliques or individuals. The Alliance will promote the Revolution only through the NATURAL BUT NEVER OFFICIAL INFLUENCE of all members of the Alliance.*” [Bakunin on Anarchism, p. 387]

Regardless of Morrow’s claims, the FAI was a federation of autonomous affinity groups in which, as one member put it, “[*e*]ach FAI group thought and acted as it deemed fit, without bothering about what the others might be thinking or deciding . . . they had no . . . opportunity or jurisdiction . . . to foist a party line upon the grass-roots.” [Francisco Carrasquer, quoted by Stuart Christie, **We, the Anarchists!**, p. 28] There was co-ordination in a federal structure, of course, but that did not create a “*highly centralised*” party-like organisation. Morrow judged the FAI according to his own standards, squeezing it into his ideological vision of the world rather than reporting the reality of the situation (see Stuart Christie’s work for a more detailed refutation of the usual Marxist and Liberal inventions of the activities and nature of the FAI).

In addition, Morrow’s picture of the FAI implicitly paints the CNT as a mere “*transmission belt*” for that organisation (and so a re-production of the Bolshevik position on the relationship of the labour unions and the revolutionary party). Such a picture, however, ignores the CNT’s character as a non-hierarchical, democratic (self-managed) mass movement which had many tendencies within it. It also fails to understand the way anarchists seek to influence mass organisations — not by assuming positions of power but by convincing their fellow workers’ of the validity of their ideas in policy making mass assemblies (see section J.3.6 for more details).

In other words, Morrow’s claims are simply false and express a total lack of understanding of the nature of the CNT, the FAI and their relationship.

4. What is the history of the CNT and the Communist International?

Morrow states that the “*tide of the October Revolution had, for a short time, overtaken the CNT. It had sent a delegate to the Comintern [Communist International] Congress in 1921. The anarchists had then resorted to organised fraction work and recaptured it.*” [Op. Cit., p. 100] He links this to the FAI by stating “[*t*]henceforward . . . the FAI . . . maintained control of the CNT.” Given that the FAI was formed in 1927 and the CNT disassociated itself with the Comintern in 1922, five years before the FAI was created, “*thenceforward*” does not do the FAI’s ability to control the CNT before it was created justice!

Partly it is the inability of the Communist Party and its Trotskyist off-shoots to dominate the CNT which explains Morrow’s comments. Seeing anarchism as “*petty bourgeois*” it is hard to combine this with the obvious truth that a mass, revolutionary, workers’ union could be so heavily influenced by anarchism rather than Marxism. Hence the need for FAI (or anarchist) “*control*” of the CNT. It allows Trotskyists ignore dangerous ideological questions. As J. Romero

Maura notes, the question why anarchism influenced the CNT “*in fact raises the problem why the reformist social democratic, or alternatively the communist conceptions, did not impose themselves on the CNT as they managed to in most of the rest of Europe. This question . . . is based on the false assumption that the anarcho-syndicalist conception of the workers’ struggle in pre-revolutionary society was completely at odds with what the **real** social process signified (hence the constant reference to religious’, ‘messianic’, models as explanations).*” He argues that the “*explanation of Spanish anarcho-syndicalist success in organising a mass movement with a sustained revolutionary **elan** should initially be sought in the very nature of the anarchist concept of society and of how to achieve revolution.*” [J. Romero Maura, “*The Spanish Case*”, in **Anarchism Today**, D. Apter and J. Joll (eds.), p. 78 and p. 65] Once we do that, we can see the weakness of Morrow’s (and others) “*Myth of the FAI*” — having dismissed the obvious reason for anarchist influence, namely its practicality and valid politics, there can only be “control by the FAI.”

However, the question of affiliation of the CNT to the Comintern is worth discussing as it indicates the differences between anarchists and Leninists. As will be seen, the truth of this matter is somewhat different to Morrow’s claims and indicates well his distorted vision.

Firstly to correct a factual error. The CNT in fact sent two delegations to the Comintern. At its 1919 national congress, the CNT discussed the Russian Revolution and accepted a proposition that stated it “*declares itself a staunch defender of the principles upheld by Bakunin in the First International. It declares further that it affiliates provisionally to the Third International on account of its predominantly revolutionary character, pending the holding of the International Congress in Spain, which must establish the foundations which are to govern the true workers’ International.*” [**No Gods, No Masters**, vol. 2, pp. 220–1]

In June 1920, Angel Pestana arrived in Moscow and represented the CNT at the Second Congress of the Communist International. He was arrested when he arrived back in Spain and so could not give his eye-witness account of the strangulation of the revolution and the deeply dishonest manipulation of the congress by the Communist Party. A later delegation arrived in April 1921, headed by Andres Nin and Joaquin Maurin professing to represent the CNT. Actually, Nin and Maurin represented virtually no one but the Lerida local federation (their stronghold). Their actions and claims were disavowed by a plenum of the CNT the following August.

How did Nin and Maurin manage to get into a position to be sent to Russia? Simply because of the repression the CNT was under at the time. This was the period when Catalan bosses hired gun men to assassinate CNT militants and members and the police exercised the notorious practice known as **ley de fugas** (shot while trying to escape). In such a situation, the normal workings of the CNT came under must stress and “*with the best known libertarian militants imprisoned, deported, exiled, if not murdered outright, Nin and his group managed to hoist themselves on to the National Committee . . . Pestana’s report not being available, it was decided that a further delegation should be sent . . . in response to Moscow’s invitation to the CNT to take part in the foundation of the Red International of Labour Unions.*” [Ignacio de Llorens, **The CNT and the Russian Revolution**, p. 8] Juan Gomez Casas confirms this account:

“At a plenum held in Lerida in 1921, while the CNT was in disarray [due to repression] in Catalonia, a group of Bolsheviks was designated to represent the Spanish CNT in Russia . . . The restoration of constitutional guarantees by the Spanish government in April 1922, permitted the anarcho-syndicalists to meet in Saragossa in June 11 . . . [where they] confirmed the withdrawal of the CNT from the Third International and the entrance on principle into the new [revolutionary syndicalist] International Working Men’s Association.” [Anarchist Organisation: History of the FAI, p. 61]

We should note that along with pro-Bolshevik Nin and Maurin was anarchist Gaston Leval. Leval quickly got in touch with Russian and other anarchists, helping some imprisoned Russia anarchists get deported after bringing news of their hunger strike to the assembled international delegates. By embarrassing Lenin and Trotsky, Leval helped save his comrades from the prison camp and so saved their lives.

By the time Leval arrived back in Spain, Pestana’s account of his experiences had been published — along with accounts of the Bolshevik repression of workers, the Kronstadt revolt, the anarchist movement and other socialist parties. These accounts made it clear that the Russian Revolution had become dominated by the Communist Party and the “*dictatorship of the proletariat*” little more than dictatorship by the central committee of that party.

Moreover, the way the two internationals operated violated basic libertarian principles. Firstly, the “*Red Labour International completely subordinated trade unions to the Communist Party.*” [Peirats, **Anarchists in the Spanish Revolution**, p. 38] This completely violated the CNT principle of unions being controlled by their members (via self-management from the bottom up). Secondly, the congresses’ methodology in its debates and decision-making were alien to the CNT tradition. In that organisation self-management was its pride and glory and its gatherings and congresses reflected this. Pestana could not fathom the fierce struggle surrounding the make-up of the chairmanship of the Comintern congress:

*“Pestana says that he was particularly intrigued by the struggle for the chairmanship. He soon realised that the chair **was** the congress, and that the Congress was a farce. The chairman made the rules, presided over deliberations, modified proposals at will, changed the agenda, and presented proposals of his own. For a start, the way the chair handled the gavel was very inequitable. For example, Zinoviev gave a speech which lasted one and one-half hours, although each speaker was supposedly limited to ten minutes. Pestana tried to rebut the speech, but was cut off by the chairman, watch in hand. Pestana himself was rebutted by Trotsky who spoke for three-quarters of an hour, and when Pestana wanted to answer Trotsky’s attack on him, the chairman declared the debate over.” [Op. Cit., pp. 37–8]*

In addition, “[i]n theory, every delegate was free to table a motion, but the chair itself selected the ones that were ‘interesting.’ Proportional voting [by delegation or delegate] had been provided for, but was not implemented. The Russian Communist Party ensured that it enjoyed a comfortable majority.” Peirats continues by noting that “[t]o top it all, certain important decisions were not even

made in the congress hall, but were made begin the scenes.” That was how the resolution that “[i]n forthcoming world congresses of the Third International, the national trade union organisations affiliated to it are to be represented by delegates from each country’s Communist Party” was adopted. He also noted that “[o]bjections to this decision were quite simply ignored.” [No Gods, No Masters, vol. 2, p. 224]

Many of the syndicalist delegates to this “*pantomime*” congress later meet in Berlin and founded the anarcho-syndicalist **International Workers Association** based on union autonomy, self-management and federalism. Unsurprisingly, once Pestana and Leval reported back to their organisation, the CNT rejected the Bolshevik Myth and re-affirmed the libertarian principles it had proclaimed at its 1919 congress. At a plenum of the CNT in 1922, the organisation withdrew its provisional affiliation and voted to join the syndicalist International formed in Berlin.

Therefore, rather than the anarchists conducting “*fraction work*” to “*recapture*” the CNT, the facts are the pro-Bolshevik National Committee of 1921 came about due to the extreme repression the CNT was suffering at the time. Militants were being assassinated in the streets, including committee members. In this context it is easy to see how an unrepresentative minority could temporarily gain influence in the National Committee. Moreover, it was CNT plenary session which revoked the organisations provisional affiliation to the Comintern — that is, a regular meeting of mandated and accountable delegates. In other words, by the membership itself who had been informed of what had actually been happening under the Bolsheviks. In addition, it was this plenum which agreed affiliation to the anarcho-syndicalist **International Workers Association** founded in Berlin during 1922 by syndicalists and anarchists horrified by the Bolshevik dictatorship, having seen it at first hand.

Thus the decision of the CNT in 1922 (and the process by which this decision was made) follow exactly the decisions and processes of 1919. That congress agreed to provisionally affiliate to the Comintern until such time as a real workers’ International inspired by the ideas of Bakunin was created. The only difference was that this International was formed in Germany, not Spain. Given this, it is impossible to argue that the anarchists “*recaptured*” the CNT.

As can be seen, Morrow’s comment presents radically false image of what happened during this period. Rather than resort to “*fraction work*” to “*recapture*” the CNT, the policies of the CNT in 1919 and 1922 were identical. Moreover, the decision to disaffiliate from the Comintern was made by a confederal meeting of mandated delegates representing the rank-and-file as was the original. The anarchists did not “*capture*” the CNT, rather they continued to influence the membership of the organisation as they had always done. Lastly, the concept of “*capture*” displays no real understanding of how the CNT worked — each syndicate was autonomous and self-managed. There was no real officialdom to take over, just administrative posts which were unpaid and conducted after working hours. To “*capture*” the CNT was impossible as each syndicate would ignore any unrepresentative minority which tried to do so.

However, Morrow’s comments allow us to indicate some of the key differences between anarchists and Leninists — the CNT rejected the Comintern because it violated its principles of self-management, union autonomy and equality and built party domination of the union movement in its place.

5. Why did the CNT not join the Workers' Alliance?

Morrow in his discussion of the struggles of the 1930s implies that the CNT was at fault in not joining the Socialist UGT's "*Workers' Alliance*" (**Alianza Obrera**). These were first put forward by the Marxist-Leninists of the BOC (Workers and Peasants Bloc — later to form the POUM) after their attempts to turn the CNT into a Bolshevik vanguard failed [Paul Preston, **The Coming of the Spanish Civil War**, p. 154]. Socialist Party and UGT interest began only after their election defeat in 1933. By 1934, however, there existed quite a few alliances, including one in Asturias in which the CNT participated. Nationally, however, the CNT refused to join with the UGT and this, he implies, led to the defeat of the October 1934 uprising (see next section for a discussion of this rebellion).

However, Morrow fails to provide any relevant historical background to understand the CNT's decision. Moreover, their reasons **why** they did not join have a striking similarity to Morrow's own arguments against the "Workers' Alliance" (which may explain why Morrow does not mention them). In effect, the CNT is damned for having policies similar to Morrow's but having principles enough to stick to them.

First, we must discuss the history of UGT and CNT relationships in order to understand the context within which the anarchists made their decision. Unless we do this, Morrow's claims may seem more reasonable than they actually are. Once we have done this we will discuss the politics of that decision.

From 1931 (the birth of the Second Spanish Republic) to 1933 the Socialists, in coalition with Republicans, had attacked the CNT (a repeat, in many ways, of the UGT's collaboration with the quasi-fascist Primo de Rivera dictatorship of 1923–30). Laws were passed, with Socialist help, making lightening strikes illegal and state arbitration compulsory. Anarchist-organised strikes were violently repressed, and the UGT provided scabs — as against the CNT Telephone Company strike of 1931. This strike gives an indication of the role of the socialists during its time as part of the government (Socialist Largo Caballero was the Minister of Labour, for example):

"The UGT . . . had its own bone to pick with the CNT. The telephone syndicate, which the CNT had established in 1918, was a constant challenge to the Socialists' grip on the Madrid labour movement. Like the construction workers' syndicate, it was a CNT enclave in a solidly UGT centre. Accordingly, the government and the Socialist Party found no difficulty in forming a common front to break the strike and weaken CNT influence.

*"The Ministry of Labour declared the strike illegal and the Ministry of the Interior called out the Civil Guard to intimidate the strikers . . . Shedding all pretence of labour solidarity, the UGT provided the **Compania Telefonica** with scabs while **El Socialista**, the Socialist Party organ, accused the CNT of being run by **pistoleros**. Those tactics were successful in Madrid, where the defeated strikers were obliged to enrol in the UGT to retain their jobs. So far as the Socialists were concerned, the CNT's appeals for solidarity had fallen on deaf ears. . .*

“In Seville, however, the strike began to take on very serious dimensions. . . on July 20, a general strike broke out in Seville and serious fighting erupted in the streets. This strike . . . stemmed from the walkout of the telephone workers . . . pitched battles took place in the countryside around the city between the Civil Guard and the agricultural workers. Maura, as minister of interior, decided to crush the ‘insurrection’ ruthlessly. Martial law was declared and the CNT’s headquarters was reduced to shambles by artillery fire. After nine days, during which heavily armed police detachments patrolled the streets, the Seville general strike came to an end. The struggle in the Andalusian capital left 40 dead and some 200 wounded.” [Murray Bookchin, **The Spanish Anarchists**, pp. 221–2]

Elsewhere, “[d]uring a Barcelona building strike CNT workers barricaded themselves in and said they would only surrender to regular troops. The army arrived and then machine-gunned them as soon as they surrendered.” [Antony Beevor, **The Spanish Civil War**, p. 33] In other words, the republican-socialist government repressed the CNT with violence as well as using the law to undermine CNT activities and strikes.

Morrow fails to discuss this history of violence against the CNT. He mentions in passing that the republican-socialist coalition government “[i]n crushing the CNT, the troops broadened the repression to the whole working class.” He states that “[u]nder the cover of putting down an anarchist putsch in January 1933, the Civil Guard ‘mopped up’ various groups of trouble makers. And encounter with peasants at Casas Viejas, early in January 1933, became a **cause celebre** which shook the government to its foundations.” However, his account of the Casas Viejas massacre is totally inaccurate. He states that “the little village . . . , after two years of patient waiting for the Institute of Agrarian Reform to divide the neighbouring Duke’s estate, the peasants had moved in and begun to till the soil for themselves.” [Op. Cit., p. 22]

Nothing could be further from the truth. Firstly, we must note that the land workers (who were not, in the main, peasants) were members of the CNT. Secondly, as we pointed in section 1, the uprising had nothing to do with land reform. The CNT members did not “till the soil”, rather they rose in insurrection as part of a planned CNT-FAI uprising based on an expected rail workers strike (the “anarchist putsch” Morrow mentions). The workers were too busy fighting the Civil and Assault Guards to till anything. He is correct in terms of the repression, of course, but his account of the events leading up to it is not only wrong, it is misleading (indeed, it appears to be an invention based on Trotskyist ideology rather than having any basis in reality). Rather than being part of a “broadened . . . repression [against] the whole working class,” it was actually part of the “putting down” of the anarchist revolt. CNT members were killed — along with a dozen politically neutral workers who were selected at random and murdered. Thus Morrow downplays the role of the Socialists in repressing the CNT and FAI — he presents it as general repression rather than a massacre resulting from repressing a CNT revolt.

He even quotes a communist paper stating that 9 000 political prisoners were in jail in June 1933. Morrow states that they were “mostly workers.” [p. 23] Yes, they were mostly workers, CNT members in fact — “[i]n mid-April [1933] . . . the CNT launched a massive campaign to release imprisoned CNT-

FAI militants whose numbers had now soared to about 9 000. [Bookchin, **Op. Cit.**, pp. 231–2]

Moreover, during and after CNT insurrections in Catalonia in 1932, and the much wider insurrections of January 1933 (9 000 CNT members jailed) and December 1933 (16 000 jailed) Socialist solidarity was nil. Indeed, the 1932 and January 1933 revolts had been repressed by the government which the Socialist Party was a member of.

In other words, and to state the obvious, the socialists had been part of a government which repressed CNT revolts and syndicates, imprisoned and killed their members, passed laws to restrict their ability to strike and use direct action and provided scabs during strikes. Little wonder that Peirats states “[i]t was difficult for the CNT and the FAI to get used to the idea of an alliance with their Socialist oppressors.” [**Anarchists in the Spanish Revolution**, p. 94]

It is **only** in this context can we understand the events of 1934 and the refusal of the CNT to run into the UGT’s alliance. Morrow, needless to say, does not present this essential context and so the reader cannot understand why the CNT acted as it did in response to Socialist appeals for “unity.” Instead, Morrow implies that CNT-FAI opposition to “workers alliances” were due to them believing “*all governments were equally bad.*” [p. 29] Perhaps if Morrow had presented an honest account of the repression the republican-socialist government had inflicted on the CNT then the reader could make an informed judgement on why anarchist opposition to the socialist proposals existed. Rather than being sectarian or against labour unity, they had been at receiving end of extensive socialist scabbing and state repression.

Moreover, as well as the recent history of socialist repression and scabbing, there was also the experience of a similar alliance between the CNT and UGT that had occurred in 1917. The first test of the alliance came with a miners strike in Andalusia, and a “*CNT proposal for a joint general strike, to be initiated by UGT miners and railway workers, had been rejected by the Madrid Socialists . . . the miners, after striking for four months, returned to work in defeat.*” Little wonder that “*the pact was in shreds. It was to be eliminated completely when a general strike broke out in Barcelona over the arrests of the CNT leaders and the assassination of Layret. Once again the CNT called upon the UGT for support. Not only was aid refused but it was denied with an arrogance that clearly indicated the Socialists had lost all interest in future collaboration. . . The strike in Catalonia collapsed and, with it, any prospect of collaboration between the two unions for years to come.*” [Bookchin, **Op. Cit.**, pp. 175–6]

Of course, such historical context would confuse readers with facts and so goes unmentioned by Morrow.

In addition, there was another reason for opposing the “*workers’ alliances*” — particularly an alliance between the UGT and CNT. Given the history of UGT and CNT pacts plus the actions of the UGT and socialists in the previous government it was completely sensible and politically principled. This reason was political and flowed from the CNT’s libertarian vision. As Durruti argued in 1934:

“The alliance, to be revolutionary, must be genuinely working class. It must be the result of an agreement between the workers’ organisation, and those alone. No party, however, socialist it may be, can belong to a workers’ alliance, which should be built from its founda-

tions, in the enterprises where the workers struggle. Its representative bodies must be the workers' committee chosen in the shops, the factories, the mines and the villages. We must reject any agreement on a national level, between National Committees, but rather favour an alliance carried out at the base by the workers themselves. Then and only then, can the revolutionary drive come to life, develop and take root." [quoted by Abel Paz, **Durruti: The People Armed**, p. 154]

In the Central Region, Orobon Fernandez argued along similar lines in Madrid's **La Tierra**:

"Revolutionary proletarian democracy is direct management of society by the workers, a certain bulwark against party dictatorships and a guarantee of the development of the revolution's forces and undertakings... what matters must is that general guidelines are laid down so that these may serve as a platform of the alliance and furnish a combative and constructive norm for the united forces ... [These include:] acceptance of revolutionary proletarian democracy, which is to say, the will of the majority of the proletariat, as the common denominator and determining factor of the new order of things... immediate socialisation of the means of production, transportation, exchange, accommodation and finance ... federated according to their area of interest and confederated at national level, the municipal and industrial organisations will maintain the principle of unity in the economic structure." [quoted by Jose Peirats, **The CNT in the Spanish Revolution**, vol. 1, pp. 74–5]

The May 1936 Saragossa congress of the CNT passed a resolution concerning revolutionary alliances which was obviously based on these arguments. It stated that in order *"to make the social revolution an effective reality, the social and political system regulating the life of the country has to be utterly destroyed"* and that the *"new revolutionary order will be determined by the free choice of the working class."* [quoted by Jose Peirats, **Op. Cit.**, p. 100]

Only such an alliance, from the bottom up and based on workers' self-management could be a revolutionary one. Indeed, any pact not based on this but rather conducted between organisations would be a pact the CNT and the bureaucracy of the UGT — and remove any possibility of creating genuine bodies of working class self-management (as the history of the Civil War proved). Indeed, Morrow seems to agree:

"The broad character of the proletarian insurrection was explained by the Communist Left (Trotskyist). It devoted itself to efforts to build the indispensable instrument of the insurrection: workers' councils constituted by delegates representing all the labour parties and unions, the shops and streets; to be created in every locality and joined together nationally ... Unfortunately, the socialists failed to understand the profound need of these Workers' Alliances. The bureaucratic traditions were not to be so easily overcome ... the socialist leaders thought that the Workers' Alliances meant they would have

merely to share leadership with the Communist Left and other dissident communist groups . . . actually in most cases they [Workers' Alliances] were merely 'top' committees, without elected or lower-rank delegates, that is, little more than liaison committees between the leadership of the organisations involved. [Op. Cit., pp. 27–8]

As can be seen, this closely follows Durruti's arguments. Bar the reference of "labour parties," Morrow's "indispensable instrument" is identical to Durruti's and other anarchist's arguments against taking part in the "Workers' Alliances" created by the UGT and the creation of genuine alliances from the bottom-up. Thus Morrow faults the CNT for trying to force the UGT to form a **real** workers' alliance by not taking part in what Morrow himself admits were "little more than liaison committees between the leadership"! Also, Morrow argues that "[w]ithout developing soviets — workers' councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie" and he asks "[h]ow could party agreements be the substitute for the necessary vast network of workers' councils?" [Op. Cit., p. 89 and p. 114] Which was, of course, the CNT-FAI's argument. It seems strange that Morrow faults the CNT for trying to create real workers' councils, the "indispensable instrument" of the revolution, by not taking part in a "party agreements" urged by the UGT which would undermine real attempts at rank-and-file unity from below.

Of course, Morrow's statement that "labour parties and unions" should be represented by delegates as well as "the shop and street" contradicts claims it would be democratic. After all, that it would mean that some workers would have multiple votes (one from their shop, their union and their party). Moreover, it would mean that parties would have an influence greater than their actual support in the working class — something a minuscule group like the Spanish Trotskyists would obviously favour as would the bureaucrats of the Socialist and Communist Parties. Little wonder the anarchists urged a workers' alliance made up of actual workers rather than an organisation which would allow bureaucrats, politicians and sects more influence than they actually had or deserved.

In addition, the "Workers' Alliances" were not seen by the UGT and Socialist Party as an organisation of equals. Rather, in words of historian Paul Preston, "from the first it seemed that the Socialists saw the Alianza Obrera was a possible means of dominating the workers movement in areas where the PSOE and UGT were relatively weak." [Op. Cit., p. 154] The Socialist Party only allowed regional branches of the Alianza Obrera to be formed only if they could guarantee Party control would never be lost. [Adrian Schubert "The Epic Failure: The Asturian Revolution of October 1934", in **Revolution and War in Spain**, Paul Preston (ed.), p. 127] Raymond Carr argues that the Socialists, "in spite of professions to the contrary, wished to keep socialist domination of the **Alianza Obrera**" [Spain: 1808–1975, pp. 634–5f] And only one month after the first alliance was set up, one of its founder members — the Catalan **Socialist Union** — left in protest over PSOE domination. [Preston, **The Coming of the Spanish Civil War**, p. 157] In Madrid, the Alianza was "dominated by the Socialists, who imposed their own policy." [Op. Cit., p. 154] Indeed, as Jose Peirats notes, in Asturias where the CNT had joined the Alliance, "despite the provisions of the terms of the alliance to which the CNT had subscribed, the order for the uprising was issued by the socialists. In Oviedo

a specifically socialist, revolutionary committee was secretly at work in Oviedo, which contained no CNT representatives.” [The CNT in the Spanish Revolution, vol. 1, p. 78] Largo Caballero’s desire for trade union unity in 1936 was from a similar mould — “[t]he clear implication was that proletarian unification meant Socialist take-over.” Little wonder Preston states that “[i]f the use that he [Caballero] made of the Alianza Obreras in 1934 had revealed anything, it was that the domination of the working class movement by the UGT meant far more to Largo Caballero than any future prospect of revolution.” [Preston, **Op. Cit.**, p. 270]

As can be seen, the CNT’s position seemed a sensible one given the nature and activities of the “Workers’ Alliance” in practice. Also it seems strange that, if unity was the UGT’s aims, that a CNT call, made by the national plenary in February 1934, for information and for the UGT to clearly and publicly state its revolutionary objectives, met with no reply. [Peirats, **Op. Cit.**, p. 75] In addition, the Catalan Workers’ Alliance called a general strike in March 1934 the day **after** the CNT’s — hardly an example of workers’ unity. [Norman Jones, “Regionalism and Revolution in Catalonia”, **Revolution and War in Spain**, Paul Preston (ed.), p. 102]

Thus, the reasons why the CNT did not join in the UGT’s “Workers’ Alliance” are clear. As well as the natural distrust towards organisations that had repressed them and provided scabs to break their strikes just one year previously, there were political reasons for opposing such an alliance. Rather than being a force to ensure revolutionary organisations springing from the workplace, the “Workers’ Alliance” was little more than pacts between the bureaucrats of the UGT and various Marxist Parties. This was Morrow’s own argument, which also provided the explanation why such an alliance would weaken any real revolutionary movement. To requote Morrow, “[w]ithout developing soviets — workers’ councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie.” [**Op. Cit.**, p. 89]

That is exactly what happened in July, 1936, when the CNT did forsake its anarchist politics and joined in a “Workers’ Alliance” type organisation with other anti-fascist parties and unions to set up the “Central Committee of Anti-Fascist Militias” (see section 20). Thus Morrow himself provides the explanation of the CNT’s **political** rationale for being wary of the UGT’s “Workers’ Alliance” while, of course, refusing to provide the historical context the decision was made.

However, while the CNT’s refusal to join the “Workers’ Alliance” outside of Asturias may have been principled (and sensible), it may be argued that they were the only organisation with revolutionary potential (indeed, this would be the only argument Trotskyists could put forward to explain their hypocrisy). Such an argument would be false for two reasons.

Firstly, such Alliances may have potentially created a revolutionary situation but they would have hindered the formation of working class organs of self-management such as workers’ councils (soviets). This was the experience of the Central Committee of Anti-Fascist Militias and of the Asturias revolt — in spite of massive revolutionary upheaval such councils based on delegates from workplace and community assemblies were **not** formed.

Secondly, the CNT policy of “Unity, yes, but by the rank-and-file” was a valid method of “from the bottom up solidarity.” This can be seen from just two examples — Aragon in 1934 and Madrid in 1936. In Aragon, there was a

“general strike that had totally paralysed the Aragonese capital throughout April 1935, ending . . . on 10 May. . . the Zaragoza general strike had been a powerful advertisement of the value of a united working-class front . . . [However,] no formal agreement . . . had been reached in Zaragoza. The pact there has been created on a purely circumstantial basis with a unity of trade-union action achieved in quite specific circumstances and generated to a considerable extent by the workers themselves.” [Graham Kelsey, **Anarchism in Aragon**, p. 72] In Madrid, April 1936 (in the words of Morrow himself) *“the CNT declared a general strike in Madrid . . . The UGT had not been asked to join the strike, and at first had denounced it . . . But the workers came out of all the shops and factories and public services . . . because they wanted to fight, and only the anarchists were calling them to struggle.”* [**Op. Cit.**, p. 41]

Thus Morrow’s comments against the CNT refusing to join the Workers’ Alliance do not provide the reader with the historical context required to make an informed judgement of the CNT’s decision. Moreover, they seem hypocritical as the CNT’s reasons for refusing to join is similar to Morrow’s own arguments against the Workers’ Alliance. In addition, the CNT’s practical counter-proposal of solidarity from below had more revolutionary potential as it was far more likely to promote rank-and-file unity plus the creation of self-managed organisations such as workers’ councils. The Workers’ Alliance system would have hindered such developments.

6. Was the October 1934 revolt sabotaged by the CNT?

Again, following Morrow, Marxists have often alleged that the Socialist and Workers Alliance strike wave, of October 1934, was sabotaged by the CNT. To understand this allegation, you have to understand the background to October 1934, and the split in the workers’ movement between the CNT and the UGT (unions controlled by the reformist Socialist Party, the PSOE).

Socialist conversion to *“revolution”* occurred only after the elections of November 1933. In the face of massive and bloody repression (see last section), the CNT-FAI had agitated for a mass abstention at the polling booth. Faced with this campaign, the republicans and socialists lost and all the laws they had passed against the CNT were used against themselves. When cabinet seats were offered to the non-republican (fascist or quasi-fascist) right, in October 1934, the PSOE/UGT called for a general strike. If the CNT, nationally, failed to take part in this — a mistake recognised by many anarchist writers — this was not (as reading Morrow suggests) because the CNT thought *“all governments were equally bad”* [Morrow, **Op. Cit.**, p. 29], but because of well-founded, as it turned out, mistrust of Socialist aims.

A CNT call, on the 13th of February 1934, for the UGT to clearly and publicly state its revolutionary objectives, had met with no reply. As Peirats argues, *“[t]hat the absence of the CNT did not bother them [the UGT and Socialist Party] is clear from their silence in regards to the [CNT’s] National Plenary’s request.”* [Peirats, **Anarchists in the Spanish Revolution**, p. 96] Rhetoric aside, the Socialist Party’s main aim in October seems to have been to force new elections, so they could again form a (mildly reformist) coalition with the

Republicans (their programme for the revolt was written by right-wing socialist Indalecio Prieto and seemed more like an election manifesto prepared by the Liberal Republicans than a program for revolutionary change). This was the viewpoint of the CNT, for example. Thus, the CNT, in effect, was to be used as cannon-fodder to help produce another government that would attack the CNT.

As we discussed in the last section, the UGT backed “Workers Alliances” were little better. To repeat our comments again, the Socialist Party (PSOE) saw the alliances as a means of dominating the workers movement in areas where the UGT was weak. The Socialist “Liaison Committee”, for instance, set up to prepare for insurrection, only allowed regional branches to take part in the alliances if they could guarantee Party control (see last section). Raymond Carr argues that the Socialists, “*in spite of professions to the contrary, wished to keep socialist domination of the **Alianza Obrera.***” [Spain: 1808–1975, pp. 634–5f] Only one month after the first alliance was set up, one of its founder members — the Socialist Union of Catalonia — left in protest over PSOE domination.

During October the only real centre of resistance was in Asturias (on the Spanish north coast). However, before discussing that area, we must mention Madrid and Barcelona. According to Morrow, Catalonia “*should have been the fortress of the uprising*” and that “[t]errribly discredited for their refusal to join the October revolt, the anarchists sought to apologise by pointing to the repression they were undergoing at the time from Companys.” [Op. Cit., p. 30 and p. 32] Morrow fails, however and yet again, to mention a few important facts.

Firstly, the uprising in Catalonia was pushed for and lead by Estat Catala which had “*temporary ascendancy over the other groups in the Esquerra*” (the Catalan Nationalist Party which was the Catalan government). “*Companys felt obliged to yield to Dencas’ [the leader of Estat Catala] demand that Catalonia should take this opportunity for breaking with Madrid.*” [Gerald Brenan, **The Spanish Labyrinth**, pp. 282–3] Estat Catala “*was a Youth movement . . . and composed mostly of workmen and adventurers — men drawn from the same soil as the **sindicatos libres** [boss created anti-CNT yellow unions] of a dozen years before — with a violent antagonism to the Anarcho-Syndicalists. It had a small military organisation, the **escamots**, who wore green uniforms. It represented Catalan Nationalism in its most intransigent form: it was in fact Catalan Fascism.*” [Op. Cit., p. 282] Gabriel Jackson calls Estat Catala a “*quasi-fascist movement within the younger ranks of the Esquerra.*” [The Spanish Republic and the Civil War: 1931–1939, p. 150] Ronald Fraser terms it “*the extreme nationalist and proto-fascist*” wing of the party. [Blood of Spain, p. 535] Hugh Thomas notes “*the fascist colouring of Dencas ideas.*” [The Spanish Civil War, p. 135]

In other words, Morrow attacks the CNT for not participating in a revolt organised and led by Catalan Fascists (or, at best, near fascists)!

Secondly, far from being apologetics, the repression the CNT was suffering from Dencas police forces was very real and was occurring right up to the moment of the revolt. In the words of historian Paul Preston:

“[T]he Anarchists bitterly resented the way in which the Generalitat had followed a repressive policy against them in the previous months. This had been the work of the Generalitat’s counsellor for public or-

der, Josep Dencas, leader of the quasi-fascist, ultra-nationalist party *Estat Catala*.” [The Coming of the Spanish Civil War, p. 176]

This is confirmed by anarchist accounts of the rising. As Peirats points out:

*“On the eve of the rebellion the Catalan police jailed as many anarchists as they could put their hands on . . . The union offices had been shut for some time. The press censor had completely blacked out the October 6th issue of **Solidaridad Obrera** . . . When the woodworkers began to open their offices, they were attacked by the police, and a furious gunfight ensued. The official radio . . . reported . . . that the fight had already begun against the FAI fascists . . . In the afternoon large numbers of police and **escamots** turned out to attack and shut down the editorial offices of **Solidaridad Obrera**.”* [Peirats, **Op. Cit.**, pp. 98–9]

In other words, the first shots fired in the Catalan revolt were against the CNT by those in revolt against the central government!

Why were the first shots of the revolt directed at the members of the CNT? Simply because they were trying to take part in the revolt in an organised and coherent manner as urged by the CNT’s Regional Committee itself. In spite of the mass arrests of anarchists and CNT militants the night before by the Catalan rebels, the CNT’s Catalan Regional Committee issued a clandestine leaflet that stated that the CNT *“must enter the battle in a manner consistent with its revolutionary anarchist principles . . . The revolt which broke out this morning must acquire the characteristics of a popular act through the actions of the proletariat . . . We demand the right to intervene in this struggle and we will take this.”* A leaflet had to be issued as **Solidaridad Obrera** was several hours late in appearing due to censorship by the Catalan state. The workers had tried to open their union halls (all CNT union buildings had been closed by the Catalan government since the CNT revolt of December 1933) because the CNT’s leaflet had called for the *“[i]mmmediate opening of our union buildings and the concentration of the workers on those premises.”* [quoted by Peirats, **The CNT in the Spanish Revolution**, vol. 1, p. 85] The participation of the CNT in the revolt as an organised force was something the Catalan rebels refused to allow and so they fired on workers trying to open their union buildings. Indeed, after shutting down **Solidaridad Obrera**, the police then tried to break up the CNT’s regional plenum that was then in session, but fortunately it was meeting on different premises and so they failed. [Peirats, **Op. Cit.**, pp. 85–6]

Juan Gomez Casas argues that:

*“The situation [in October 1934] was especially difficult in Catalonia. The Workers’ Alliance . . . declared a general strike. Luis Companys, president of the Catalan Parliament, proclaimed the Catalan State within the Spanish Federal Republic . . . But at the same time, militants of the CNT and the FAI were arrested . . . **Solidaridad Obrera** was censored. The Catalan libertarians understood that the Catalan nationalists had two objectives in mind: to oppose the central government and to destroy the CNT. Jose Dencas, Counsellor of Defence, issued a strict order: ‘Watch out for the FAI’ . . . Luis Companys broadcast a message on October 5 to all ‘citizens regardless of*

ideology.’ However, many anarchosyndicalist militants were held by his deputy, Dencas, in the underground cells of police headquarters.” [Op. Cit., pp. 151–2]

Hence the paradoxical situation in which the anarchists, anarcho-syndicalists and FAI members found themselves in during this time. The uprising was organised by Catalan fascists who continued to direct their blows against the CNT. As Abel Paz argues, “[f]or the rank and file Catalan worker . . . the insurgents . . . were actually orienting their action in order to destroy the CNT. After that, how could they collaborate with the reactionary movement which was directing its blows against the working class? Here was the paradox of the Catalan uprising of October 6, 1934.” [Durruti: **The People Armed**, p. 158]

In other words, during the Catalan revolt, “the CNT had a difficult time because the insurgents were its worst enemies.” [Peirats, **The Anarchists in the Spanish Revolution**, p. 98] However, the complexity of the actual situation does not bother the reader of Morrow’s work as it is not reported. Little wonder, as Peirats argues, the “absurd contention according to which the confederal proletariat of Catalonia betrayed their brethren in Asturias melts away in the face of a truthful narration of the facts.” [The CNT in the Spanish Revolution, vol. 1, p. 86]

In summary, therefore, Morrow expected the membership of the Catalan CNT and FAI to join in a struggle started and directed by Catalan fascists, whose leaders in the government were arresting and shooting their members, censoring their press, closing their union offices and refusing them a role in the revolt as self-organised forces. We think that sums up the validity of Trotskyism as a revolutionary theory quite well.

In Madrid, the revolt was slightly less farcical. Here the CNT joined the general strike. However, the UGT gave the government 24 hours notice of the general strike, allowing the state to round up the Socialist “leaders,” seize arm depots and repress the insurrection before it got started [Morrow, Op. Cit., p. 30]. As Bookchin argues, the “massive strike in Madrid, which was supported by the entire left, foundered for want of arms and a revolutionary sense of direction.” [Op. Cit., p. 245] He continues:

“As usual, the Socialists emerged as unreliable allies of the Anarchists. A revolutionary committee, established by the CNT and FAI to co-ordinate their own operations, was denied direly needed weapons by the UGT. The arms, as it turned out, had been conveniently intercepted by government troops. But even if they had been available, it is almost certain that the Socialists would not have shared them with the Anarchists. Indeed, relationships between the two major sectors of the labour movement had already been poisoned by the failure of the Socialist Youth and the UGT to keep the CNT adequately informed of their plans or confer with Anarchosyndicalist delegates. Despite heavy fighting in Madrid, the CNT and FAI were obliged to function largely on their own. When, at length, a UGT delegate informed the revolutionary committee that Largo Caballero was not interested in common action with the CNT, the committee disbanded.” [Op. Cit., p. 246]

Bookchin correctly states that “Abad de Santillan was to observe with ample

justification that Socialist attempts to blame the failure of the October Insurrection on Anarchist abstention was a shabby falsehood” and quotes Santillan:

“Can there be talk of abstention of the CNT and censure of it by those who go on strike without warning our organisation about it, who refuse to meet with the delegates of the National Committee [of the CNT], who consent to let the Lerroux-Gil Robles Government take possession of the arms deposits and let them go unused before handing them over to the Confederation and the FAI?” [Ibid.]

Historian Paul Preston confirms that in Madrid “Socialists and Anarchists went on strike . . .” and that “the Socialists actually rejected the participation of Anarchist and Trotskyist groups who offered to help make a revolutionary coup in Madrid.” [The Coming of the Spanish Civil War, p. 174] Moreover, “when delegates travelled secretly to Madrid to try to co-ordinate support for the revolutionary Asturian miners, they were rebuffed by the UGT leadership.” [Graham Kelsey, **Anarchism in Aragon**, p. 73]

Therefore, in two of the three centres of the revolt, the uprising was badly organised. In Catalonia, the revolt was led by fascist Catalan Nationalists who arrested and shot at CNT militants. In Madrid, the CNT backed the strike and was ignored by the Socialists. The revolt itself was badly organised and quickly repressed (thanks, in part, to the actions of the Socialists themselves). Little wonder Peirats asks:

“Although it seems absurd, one constantly has to ask whether the Socialists meant to start a true revolution [in October 1934] in Spain. If the answer is affirmative, the questions keep coming: Why did they not make the action a national one? Why did they try to do it without the powerful national CNT? Is a peaceful general strike revolutionary? Was what happened in Asturias expected, or were orders exceeded? Did they mean only to scare the Radical-CEDA government with their action?” [The Anarchists in the Spanish Revolution, pp 95–6]

The only real centre of resistance was in Asturias (on the Spanish north coast). Here, the CNT had joined the Socialists and Communists in a “Workers Alliance”. But, against the alliance’s terms, the Socialists alone gave the order for the uprising — and the Socialist-controlled Provincial Committee starved the CNT of arms. This despite the CNT having over 22 000 affiliates in the area (to the UGT’s 40 000). We discuss the activities of the CNT during the revolt in Asturias later (in section 20) and so will do so here.

Morrow states that the “backbone of the struggle was broken . . . when the refusal of the CNT railroad workers to strike enabled the government to transport goods and troops.” [Morrow, **Op. Cit.**, p. 30] Yet in Asturias (the only area where major troop transportation was needed) the main government attack was from a sea borne landing of Foreign Legion and Moroccan troops — against the port and CNT stronghold (15 000 affiliates) of Gijon (and, we must stress, the Socialists and Communists refused to provide the anarchists of these ports with weapons to resist the troop landings). Hence his claim seems somewhat at odds with the actual events of the October uprising.

Moreover, he seems alone in this claim. No other historian (for example, Hugh Thomas in **The Spanish Civil War**, Raymond Carr in **Spain: 1808–1975**, Paul Preston in **The Coming of the Spanish Civil War**, Gerald Brenan, **The Spanish Labyrinth**, Gabriel Jackson, **The Spanish Republic and the Civil War: 1931–1939**) makes this claim. But, of course, these are not Trotskyists and so can be ignored. However, for objective readers such an omission might be significant.

Indeed, when these other historians **do** discuss the crushing of the Asturias they all stress the fact that the troops came from the sea. For example, Paul Preston notes that “[w]ith CEDA approval, Franco . . . insisted on the use of troops from Africa . . . they shipped Moorish mercenaries to Asturias.” [**The Coming of the Spanish Civil War**, p. 177] Gabriel Jackson argues that the government “feared to send in the regular Army because of the strong possibility that the Spanish conscripts would refuse to fire on the revolutionaries — or even desert to them. The War Minister . . . , acting on the advice of Generals Franco and Goded, sent in contingents of the Moroccan **regulares** and of the Foreign Legions.” These troops arrived “at the ports of Aviles and Gijon.” [**The Spanish Republic and the Civil War: 1931–1939**, p. 157]

Richard A. H. Robinson argues that it “was soon decided that the [Asturias] rebellion could only be crushed by experienced, professional troops. The other areas of Spain could not be denuded of their garrisons in case there were other revolutionary outbreaks. Franco therefore called upon Colonel Yague to lead a force of Moorish regulars to help re-conquer the province from the rebels.” [**The Origins of Franco’s Spain**, pp. 190–1] Stanley G. Payne gives a more detailed account of the state’s attack:

“Army reinforcements were soon being rushed toward the region . . . Eduardo Lopez Ochoa . . . head[ed] the main relief column . . . he began to make his way eastward [from Galicia] with a modest force of some 360 troops in trucks, half of whom had to be detached on the way to hold the route open. Meanwhile . . . in the main Asturian coastal city of Gijon . . . reinforcements first arrived by sea on the seventh, followed by larger units from the Moroccan Protectorate on the tenth.”
[**Spain’s First Democracy**, p. 219]

No mention of trains in these accounts, so indicating that Morrow’s assertions are false. The main attack on Asturias, and so the transportation of troops and goods, was by *sea*, not by trains.

In addition, these historians point to other reasons for the defeat of the revolt — the amazingly bad organisation of it by the Socialist Party. Raymond Carr sums up the overwhelming opinion of the historians when he says that “[a]s a national movement the revolution was a fiasco.” [**Op. Cit.**, p. 633] Hugh Thomas states that the revolt in Catalonia was “crushed nearly as quickly as the general strike had been in Madrid.” [**The Spanish Civil War**, p. 136] Brenan correctly argues that “[f]rom the moment that Barcelona capitulated and the rising in Madrid fizzled out, the miners were of course doomed.” [**Op. Cit.**, p. 286] The failure of both these revolts was directly attributable to the policies and actions of the Socialists who controlled the “Workers’ Alliances” in both areas. Hence historian Paul Heywood:

“[A]n important factor which contributed to the strikes’ collapse and

made the state's task easier was the underlying attitude of the Socialists. For all the talk of united action by the Left, the Socialists still wished to dominate any combined moves. Unwilling to cede its traditional hegemony, the PSOE rendered the Alianza obrera necessarily ineffective . . .

“Thus, there was little genuine unity on the Spanish Left. Moreover, the strike was very poorly planned. Differences within the PSOE meant that there was no agreement even as to the programme of the strike. For the . . . leftists, it represented the initiation of a full-scale Socialist revolution; for . . . the centrists in the party, the aim of the strike was to force Alcala-Zamora to reconsider and invite the Socialists back into a coalition government with the Republicans.”
[**Marxism and the Failure of Organised Socialism in Spain 1879–1936** pp. 144–5]

Significantly, Heywood argues that “[o]ne thing, however, did emerge from the October strike. The example of Asturias provided a pointed lesson for the Left: crucially, the key to the relative success of the insurrection there was the participation of the CNT in an effective Alianza obrera. Without the CNT, the Asturian rising would have been as short-lived and as easily defeated as those in Madrid and Barcelona.” [Op. Cit., p. 145]

Having discussed both Madrid and Barcelona above, we leave it to the reader to conclude whether Morrow's comments are correct or whether a more likely alternative explanation for the revolt's failure is possible.

However, even assuming Morrow's claims that the failure of the CNT rail workers' union to continue striking in the face of a completely farcical “revolt” played a key role in its defeat were true, it does not explain many facts. Firstly, the government had declared martial law — placing the railway workers in a dangerous position. Secondly, as Jerome R. Mintz points out, railway workers “were represented by two competing unions — the Sindicato Nacional Ferroviario of the UGT . . . and the CNT-affiliated FNIFF . . . The UGT . . . controlled the large majority of the workers. [In 1933] Trifon Gomez, secretary of the UGT union, did not believe it possible to mobilise the workers, few of whom had revolutionary aspirations.” [The Anarchists of Casa Viejas, p. 178] Outside of Catalonia, the majority of the railway workers belonged to the UGT [Sam Dolgoff, The Anarchist Collectives, p. 90f] Asturias (the only area where major troop transportation was needed) does not border Catalonia — apparently the army managed to cross Spain on a rail network manned by a minority of its workers.

However, these points are of little import when compared to the fact that Asturias the main government attack was, as we mentioned above, from a sea borne landing of Foreign Legion and Moroccan troops. Troops from Morocco who land by sea do not need trains. Indeed, The ports of Aviles and Gijon were the principle military bases for launching the repression against the uprising.

The real failure of the Asturias revolt did not lie with the CNT, it lay (unsurprisingly enough) with the Socialists and Communists. Despite CNT pleas the Socialists refused arms, Gijon fell after a bloody struggle and became the main base for the crushing of the entire region (“Arriving at the ports of Aviles and Gijon on October 8, these troops were able to overcome the resistance of the local fishermen and stevedores. The revolutionary committees here were Anarchist dominated. Though they had joined the rising and accepted the slogan

UHP [Unity, Proletarian Brothers], the Socialists and Communists of Oviedo clearly distrusted them and had refused arms to their delegate the day before.” [Gabriel Jackson, **Op. Cit.**, p. 157]).

This Socialist and Communist sabotage of Anarchist resistance was repeated in the Civil War, less than two years later.

As can be seen, Morrow’s account of the October Insurrection of 1934 leaves a lot to be desired. The claim that the CNT was responsible for its failure cannot withstand a close examination of the events. Indeed, by providing the facts which Morrow does not provide we can safely say that the failure of the revolt across Spain rested squarely with the PSOE and UGT. It was badly organised, they failed to co-operate or even communicate with CNT when aid was offered, they relied upon the enemies of the CNT in Catalonia and refused arms to the CNT in both Madrid and Asturias (so allowing the government force, the main force of which landed by sea, easy access to Asturias). All in all, even if the minority of railway workers in the CNT had joined the strike it would have, in all probability, resulted in the same outcome.

Unfortunately, Morrow’s assertions have become commonplace in the ranks of the Left and have become even more distorted in the hands of his Trotskyist readers. For example, we find Nick Wrack arguing that the “*Socialist Party called a general strike and there were insurrectionary movements in Asturias and Catalonia, In Madrid and Catalonia the anarchist CNT stood to one side, arguing that this was a ‘struggle between politicians’ and did not concern the workers even though this was a strike against a move to incorporate fascism into the government.*” He continues, “[i]n Asturias the anarchist militants participated under the pressure of the masses and because of the traditions of unity in that area. However, because of their abstentionist stupidity, the anarchists elsewhere continued to work, even working trains which brought the Moorish troops under Franco to suppress the Asturias insurrection.” [“*Marrxism, Anarchism and the State*”, pp. 31–7, **Militant International Review**, no. 46, p. 34]

Its hard to work out where to start in this travesty of history. We will start with the simple errors. The CNT **did** take part in the struggle in Madrid. As Paul Preston notes, in Madrid the “*Socialists and Anarchists went on strike*” [The **Coming of the Spanish Civil War**, p. 174] In Catalonia, as indicated above, the “*insurrectionary movement*” in Catalonia was organised and lead by Catalan Fascists, who shot upon CNT members when they tried to open their union halls and who arrested CNT and FAI militants the night before the uprising. Moreover, the people organising the revolt had been repressing the CNT for months previously. Obviously attempts by Catalan Fascists to become a government should be supported by socialists, including Trotskyists. Moreover, the UGT and PSOE had worked with the quasi-fascist Primo do Rivera dictatorship during the 1920s. The hypocrisy is clear. So much for the CNT standing “*to one side, arguing that this was a ‘struggle between politicians’ and did not concern the workers even though this was a strike against a move to incorporate fascism into the government.*”

His comments that “*the anarchists ...work[ed] trains which brought the Moorish troops under Franco to suppress the Asturias insurrection*” is just plain silly. It was **not** anarchists who ran the trains, it was railway workers — under martial law — some of whom were in the CNT and some of whom were anarchists. Moreover, as noted above the Moorish troops under Franco arrived **by**

sea and not by train. And, of course, no mention of the fact that the CNT-FAI in the strategically key port of Gijon was denied arms by the Socialists and Communists, which allowed the Moorish troops to disembark without real resistance.

Morrow has a lot to answer for.

7. Were the Friends of Durruti Marxists?

It is sometimes claimed that the **Friends of Durruti** Group which formed during the Spanish Revolution were Marxists or represented a “break” with anarchism and a move towards Marxism. Both these assertions are false. We discuss whether the Friends of Durruti (FoD) represented a “break” with anarchism in the following section. Here we indicate that claims of the FoD being Marxists are false.

The Friends of Durruti were formed, in March 1937, by anarchist militants who had refused to submit to Communist-controlled “militarisation” of the workers’ militias. During the Maydays — the government attack against the revolution two months later — the Friends of Durruti were notable for their calls to stand firm and crush the counter-revolution. During and after the May Days, the leaders of the CNT asserted that the FoD were Marxists (which was quite ironic as it was the CNT leaders who were acting as Marxists in Spain usually did by joining with bourgeois governments). This was a slander, pure and simple.

The best source to refute claims that the FoD were Marxists (or becoming Marxist) or that they were influenced by, or moved towards, the Bolshevik-Leninists is Agustín Guillamón’s book **The Friends of Durruti Group: 1937–1939**. Guillamón is a Marxist (of the “left-communist” kind) and no anarchist (indeed he states that the “*Spanish Revolution was the tomb of anarchism as a revolutionary theory of the proletariat.*” [p. 108]). That indicates that his account can be considered objective and not anarchist wishful thinking. Here we use his work to refute the claims that the FoD were Marxists. Section 9 discusses their links (or lack of them) with the Spanish Trotskyists.

So were the FoD Marxists? Guillamón makes it clear — no, they were not. In his words, “[t]here is nothing in the Group’s theoretical tenets, much less in the columns of **El Amigo del Pueblo** [their newspaper], or in their various manifestos and handbills to merit the description ‘marxist’ being applied to the Group [by the CNT leadership]. They were simply an opposition to the CNT’s leadership’s collaborationist policy, making their stand within the organisation and upon anarcho-syndicalist ideology.” [p. 61] He stresses this in his conclusion:

“The Friends of Durruti was an affinity group, like many another existing in anarcho-syndicalist quarters. It was not influenced to any extent by the Trotskyists, nor by the POUM. Its ideology and watchwords were quintessentially in the CNT idiom: it cannot be said that they displayed a marxist ideology at any time . . . They were against the abandonment of revolutionary objectives and of anarchism’s fundamental and quintessential ideological principles, which the CNT-FAI leaders had thrown over in favour of anti-fascist unity and the need to adapt to circumstances.” [p. 107]

In other words, they wanted to return the CNT “to its class struggle roots.” [Ibid.] Indeed, Balius (a leading member of the group and writer of its 1938 pamphlet **Towards a Fresh Revolution**) was moved to challenge the charges of “*marxist*” levelled at him:

“I will not repay defamatory comment in kind. But what I cannot keep mum about is that a legend of marxism has been woven about my person and I should like the record put straight . . . It grieves me that at the present time there is somebody who dares call me a Marxist when I could refute with unanswerable arguments those who hang such an unjustified label on me. As one who attends our union assemblies and specific gatherings, I might speak of the loss of class sensibility which I have observed on a number of occasions. I have heard it said that we should be making politics — in as many words, comrades — in an abstract sense, and virtually no one protested. And I, who have been aghast at countless such instances, am dubbed a marxist just because I feel, myself to be a one hundred percent revolutionary . . . On returning from exile in France in the days of Primo de Rivera . . . I have been a defender of the CNT and the FAI ever since. In spite of my paralysis, I have done time in prison and been taken in manacles to Madrid for my fervent and steadfast championship of our organisations and for fighting those who once were friends of mine Is that not enough? . . . So where is this marxism of mine? Is it because my roots are not in the factory? . . . The time has come to clarify my position. It is not good enough to say that the matter has already been agreed. The truth must shine through. As far as I am concerned, I call upon all the comrades who have used the press to hang this label upon me to spell out what makes me a marxist.” [El Amigo del Pueblo, no. 4, p. 3]

As can be seen, the FoD were not Marxists. Two more questions arise. Were they a “*break*” with anarchism (i.e. moving towards Marxism) and were they influenced by the Spanish Trotskyists. We turn to these questions in the next two sections.

8. Did the Friends of Durruti “*break with*” anarchism?

Morrow claims that the Friends of Durruti (FoD) “*represented a conscious break with the anti-statism of traditional anarchism. They explicitly declared the need for democratic organs of power, juntas or soviets, in the overthrow of capitalism.*” [Morrow, **Op. Cit.**, p. 247] The truth of the matter is somewhat different.

Before discussing his assertion in more detail a few comments are required. Typically, in Morrow’s topsy-turvy world, all anarchists like the Friends of Durruti (Morrow also includes the Libertarian Youth, the “*politically awakened*” CNT rank and file, local FAI groups, etc.) who remained true to anarchism and stuck to their guns (often literally) — represented a break with anarchism and a move towards Marxism, the revolutionary vanguard party (no doubt part of the

4th International), and a fight for the “*workers state.*” Those anarchists, on the other hand, who compromised for “*anti-fascist unity*” (but mainly to try and get weapons to fight Franco) are the real anarchists because “*class collaboration . . . lies concealed in the heart of anarchist philosophy.*” [Op. Cit., p. 101]

Morrow, of course, would have had a fit if anarchists pointed to the example of the Social Democrat’s who crushed the German Revolution or Stalin’s Russia as examples that “*rule by an elite lies concealed in the heart of Marxist philosophy.*” It does not spring into Morrow’s mind that those anarchists he praises are the ones who show the revolutionary heart of anarchism. This can best be seen from his comments on the Friends of Durruti, who we argue were not evolving towards “*Marrxism*” but rather were trying to push the CNT and FAI back to its pre-Civil War politics and strategy. Moreover, as we argue in section 12, anarchism has always argued for self-managed working class organisations to carry out and defend a revolution. The FoD were simply following in the tradition founded by Bakunin.

In other words, we will show that they did not “*break with*” anarchism — rather they refused to compromise their anarchism in the face of “*comrades*” who thought winning the war meant entering the government. This is clear from their leaflets, paper and manifesto. Moreover, as will become obvious, their “*break*” with anarchism actually just restates pre-war CNT policy and organisation.

For example, their leaflets, in April 1937, called for the unions and municipalities to “*replace the state*” and for no retreat:

“We have the organs that must supplant a State in ruins. The Trade Unions and Municipalities must take charge of economic and social life.” [quoted by Agustin Guillamon, Op. Cit., p. 38]

This clearly is within the CNT and anarcho-syndicalist tradition. Their manifesto, in 1938, repeated this call (“*the state cannot be retained in the face of the unions*”), and made three demands as part of their programme. It is worth quoting these at length:

“I — Establishment of a Revolutionary Junta or National Defence Council.

“This body will be organised as follows: members of the revolutionary Junta will be elected by democratic vote in the union organisations. Account is to be taken of the number of comrades away at the front . . . The Junta will steer clear of economic affairs, which are the exclusive preserve of the unions.

“The functions of the revolutionary Junta are as follows:

- a. *The management of the war*
- b. *The supervision of revolutionary order*
- c. *International affairs*
- d. *Revolutionary propaganda.*

“Posts to come up regularly for re-allocation so as to prevent anyone growing attached to them. And the trade union assemblies will exercise control over the Junta’s activities.

“II — All economic power to the syndicates.

“Since July the unions have supplied evidence of the great capacity for constructive labour. . . It will be the unions that structure the proletarian economy.

“An Economic Council may also be set up, taking into consideration the natures of the Industrial Unions and Industrial federations, to improve on the co-ordination of economic activities.

“III — Free municipality.

[. . .]

“The Municipality shall take charge of those functions of society that fall outside the preserve of the unions. And since the society we are going to build shall be composed exclusively of producers, it will be the unions, no less, that will provide sustenance for the municipalities. . .

“The Municipalities will be organised at the level of local, comarcal and peninsula federations. Unions and municipalities will maintain liaison at local, comarcal and national levels.” [Towards a Fresh Revolution]

This programme basically mimics the pre-war CNT policy and organisation and so cannot be considered as a “break” with anarchist or CNT politics or tradition.

Firstly, we should note that the “municipality” was a common CNT expression to describe a “commune” which was considered as “all the residents of a village or hamlet meeting in assembly (council) with full powers to administer and order local affairs, primarily production and distribution.” In the cities and town the equivalent organisation was “the union” which “brings individuals together, grouping them according to the nature of their work . . . First, it groups the workers of a factory, workshop or firm together, this being the smallest cell enjoying autonomy with regard to whatever concerns it alone . . . The local unions federate with one another, forming a local federation, composed of the committee elected by the unions, and of the general assembly that, in the last analysis, holds supreme sovereignty.” [Issac Puente, **Libertarian Communism**, p. 25 and p. 24]

In addition, the “national federations [of unions] will hold as common property the roads, railways, buildings, equipment, machinery and workshops” and the “free municipality will federate with its counterparts in other localities and with the national industrial federations.” [Op. Cit., p. 29 and p. 26] Thus Puente’s classic pre-war pamphlet is almost identical to points two and three of the FoD Programme.

Moreover, the “Economic Council” urged by the FoD in point two of their programme is obviously inspired by the work of Abad Diego de Santillan, particularly his book **After the Revolution (El Organismo Economico de la Revolucion)**. Discussing the role of the “Federal Council of Economy”, de Santillan says that it “receives its orientation from below and operates in accordance with the resolutions of the regional and national assemblies.” [p. 86] Just as the CNT Congresses were the supreme policy-making body in the CNT itself, they envisioned a similar body emanating from the rank-and-file assemblies to make the guiding decisions for a socialised economy.

This leaves point one of their programme, the call for a “*Revolutionary Junta or National Defence Council*.” It is here that Morrow and a host of other Marxists claim the FoD broke with anarchism towards Marxism. Nothing could be further from the truth.

Firstly, anarchists have long supported the idea of workers’ councils (or soviets) as an expression of working class power to control their own lives (and so society) — indeed, far longer than Marxists. Thus we find Bakunin arguing that the “*future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal*.” Anarchists “*attain this goal . . . by the development and organisation, not of the political but of the social (and, by consequence, anti-political) power of the working masses*.” [Michael Bakunin: **Selected Writings**, p. 206 and p. 198] These councils of workers’ delegates (workers’ councils) would be the basis of the commune and defence of the revolution:

“the federative Alliance of all working men’s associations . . . constitute the Commune . . . Commune will be organised by the standing federation of the Barricades. . . [T]he federation of insurgent associations, communes and provinces . . . [would] organise a revolutionary force capable of defeating reaction . . . it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution.” [Op. Cit., pp. 170–1]

This perspective can be seen in the words of the German anarcho-syndicalist H. Ruediger (member of the IWA’s secretariat in 1937) when he argued that for anarchists “*social re-organisation, like the defence of the revolution, should be concentrated in the hands of **working class organisations** — whether labour unions or new organs of spontaneous creation, such as free councils, etc., which, as an expression of the will of the workers themselves, from **below up**, should construct the revolutionary social community*.” [quoted in **The May Days in Barcelona**, Vernon Richards (ed.), p. 71]

Camillo Berneri sums up the anarchist perspective clearly when he wrote:

“The Marxists . . . foresee the natural disappearance of the State as a consequence of the destruction of classes by the means of ‘the dictatorship of the proletariat,’ that is to say State Socialism, whereas the Anarchists desire the destruction of the classes by means of a social revolution which eliminates, with the classes, the State. The Marxists, moreover, do not propose the armed conquest of the Commune by the whole proletariat, but they propose the conquest of the State by the party which imagines that it represents the proletariat. The Anarchists allow the use of direct power by the proletariat, but they understand by the organ of this power to be formed by the entire corpus of systems of communist administration — corporate organisations [i.e. industrial unions], communal institutions, both regional and national — freely constituted outside and in opposition to all political monopoly by parties and endeavouring to a minimum administrative centralisation.” [“*Dictatorship of the Proletariat and*

State Socialism”, Cienfuegos Press Anarchist Review, no. 4, p. 52]

In other words, anarchists **do** support democratic organs of power when they are **directly** democratic (i.e. self-managed). “*The basic idea of Anarchism is simple,*” argued Voline, “*no party . . . placed above or outside the labouring masses . . . ever succeeds in emancipating them . . . Effective emancipation can only be achieved by the **direct, widespread, and independent action of those concerned, of the workers themselves**, grouped, not under the banner of a political party . . . but in their own class organisations (productive workers’ unions, factory committees, co-operatives, et cetera) on the basis of concrete action and self-government.*” [The Unknown Revolution, p, 197]

Anarchists oppose **representative** organs of power as these are governments and so based on minority power and subject to bureaucratic deformations which ensure **un**-accountability from below. Anarchists argue “*that, by its very nature, political power could not be exercised except by a very restricted group of men at the centre. Therefore this power — the **real** power — could not belong to the soviets. It would actually be in the hands of the party.*” [Voline, **Op. Cit.**, p. 213]

Thus Morrow’s argument is flawed on the basic point that he does not understand anarchist theory or the nature of an anarchist revolution (also see section 12).

Secondly, and more importantly given the Spanish context, the FoD’s vision has a marked similarity to pre-Civil War CNT organisation, policy and vision. This means that the idea of a National Defence Council was not the radical break with the CNT that some claim. Before the civil war the CNT had long has its defence groups, federated at regional and national level. Historian Jerome Mintz provides a good summary:

*“The policies and actions of the CNT were conducted primarily by administrative juntas, beginning with the sindicato, whose junta consisted of a president, secretary, treasurer, and council members. At each step in the confederation, a representative [sic! — delegate] was sent to participate at the next organisational level — from sindicato to the district to the regional confederation, then to the national confederation. In addition to the juntas, however, there were two major committee systems established as adjuncts to the juntas that had developed some autonomy: the **comites pro presos**, or committees for political prisoners, which worked for the release of prisoners and raised money for the relief of their families; and the **comites de defensa**, or defence committees, whose task was to stockpile weapons for the coming battle and to organise the shock troops who would bear the brunt of the fighting.”* [The Anarchists of Casas Viejas, p. 141]

Thus we see that the CNT had its “*juntas*” (which means council or committee and so does not imply any authoritarianism) as well as “*defence committees*” which were elected by democratic vote in the union organisations decades before the FoD existed. The Defence Committees (or councils) were a CNT insurgent agency in existence well before July 1936 and had, in fact, played a key role in many insurrections and strikes, including the events of July 1936. In other

words, the “break” with anarchism Morrow presents was, in fact, an exact reproduction of the way the CNT had traditionally operated and acted — it is the same program of a “workers defence council” and “union management of the economy” that the CNT had advocated prior to the outbreak of the Civil War. The only “break” that **did** occur post 19th of July was that of the CNT and FAI ignoring its politics and history in favour of “anti-fascist unity” and a UGT “Workers’ Alliance” with all anti-fascist unions and parties (see section 20).

Moreover, the CNT insurrection of December 1933 had been co-ordinated by a National Revolutionary Committee [**No Gods, No Masters**, vol. 2, p. 235]. D.A. Santillan argued that the “local Council of Economy will assume the mission of defence and raise voluntary corps for guard duty and if need be, for combat” in the “cases of emergency or danger of a counter-revolution.” [**After the Revolution**, p. 80] During the war itself a CNT national plenum of regions, in September 1936, called for a National Defence Council, with majority union representation and based on Regional Defence Councils. The Defence Council of Aragon, set up soon after, was based on these ideas. The need for co-ordinated revolutionary defence and attack is just common sense — and had been reflected in CNT theory, policy and structure for decades.

An understanding of the basic ideas of anarchist theory on revolution combined with the awareness of the CNT’s juntas (administrative councils or committees) had “defence committees” associated with them makes it extremely clear that rather than being a “conscious break with the anti-statism of traditional anarchism” the FoD’s programme was, in fact, a conscious **return** to the anti-statism of traditional anarchism and the revolutionary program and vision of the pre-Civil War CNT.

This is confirmed if we look at the activities of the CNT in Aragon where they formed the “Defence Council of Aragon” in September 1936. In the words of historian Antony Beevor, “[i]n late September delegates from the Aragonese collectives attended a conference at Bujaraloz, near where Durruti’s column was based. They decided to establish a Defence Council of Aragon, and elected as president Joaquin Ascaso.” [**Op. Cit.**, p. 96] In February 1937, the first congress of the regional federation of collectives was held at Caspe to co-ordinate the activities of the collectives — an obvious example of a regional economic council desired by the FoD. Morrow does mention the Council of Aragon — “the anarchist-controlled Council for the Defence of Aragon” [**Op. Cit.**, p. 111] — however, he strangely fails to relate this fact to anarchist politics. After all, in Aragon the CNT-FAI remained true to anarchism, created a defence council and a federation of collectives. If Morrow had discussed the events in Aragon he would have had to draw the conclusion that the FoD were not a “conscious break with the traditional anti-statism of anarchism” but rather were an expression of it.

This can be seen from the comments made after the end of the war by the Franco-Spanish Group of **The Friends of Durruti**. They clearly argued for a return to the principles of anarchism and the pre-war CNT. They argued not only for workers’ self-organisation and self-management as the basis of the revolution but also to the pre-war CNT idea of a workers’ alliance from the bottom up rather than a UGT-style one at the top (see section 5). In their words:

“A revolution requires the absolute domination of the workers’ organisations as was the case in July, 1936, when the CNT-FAI were masters . . . We incline to the view that it is necessary to form a Revolutionary Alliance; a Workers’ Front; where no one would be allowed to enter and take their place except on a revolutionary basis . . .” [The Friends of Durruti Accuse]

As can be seen, rather than a “revolutionary government” the FoD were consistently arguing for a federation of workers’ associations as the basis of the revolution. In this they were loyally following Bakunin’s basic arguments and the ideas of anarchism. Rather than the FoD breaking with anarchism, it is clear that it was the leading committees of the CNT and FAI which actually broke with the politics of anarchism and the tactics, ideas and ideals of the CNT.

Lastly there are the words of Jaime Balius, one of the FoD’s main activists, who states in 1976 that:

“We did not support the formation of Soviets; there were no grounds in Spain for calling for such. We stood for ‘all power to the trade unions’. In no way were we politically orientated . . . Ours was solely an attempt to save the revolution; at the historical level it can be compared to Kronstadt because if there the sailors and workers called for ‘all power to the Soviets’, we were calling for all power to the unions.” [quoted by Ronald Fraser, Blood of Spain, p. 381]

“Political” here meaning “state-political” — a common anarchist use of the word. According to Fraser, the *“proposed revolutionary junta was to be composed of combatants from the barricades.” [Ibid.]* This echoes Bakunin’s comment that the *“Commune will be organised by the standing federation of the Barricades and by the creation of a Revolutionary Communal Council composed of one or two delegates from each barricade . . . vested with plenary but accountable and removable mandates.” [Op. Cit., pp. 170–1]*

As can be seen, rather than calling for power to a party or looking to form a government (i.e. being “politically orientated”) the FoD were calling for *“all power to the unions.”* This meant, in the context of the CNT, all power to the union assemblies in the workplace. Decision making would flow from the bottom upwards rather than being delegated to a “revolutionary” government as in Trotskyism. To stress the point, the FoD did not represent a “break” with anarchism or the CNT tradition. To claim otherwise means to misunderstand anarchist politics and CNT history.

Our analysis, we must note, also makes a mockery of Guillaumon’s claim that because the FoD thought that libertarian communism had to be *“impose[d]”* and *“defended by force of arms”* their position represented an *“evolution within anarchist thought processes.” [Op. Cit., p. 95]* As has been made clear above, from Bakunin onwards revolutionary anarchism has been aware of the need for an insurrection to create an anarchist society by destroying both the state and capitalism (i.e. to *“impose”* a free society upon those who wish hierarchy to continue and are in a position of power) and for that revolution to be defended against attempts to defeat it. Similarly, his claim that the FoD’s *“revolutionary junta”* was the equivalent of what *“others call the vanguard or the revolutionary party”* cannot be defended given our discussion above — it is clear that the junta

was not seen as a form of delegated power by rather as a means of defending the revolution like the CNT's defence committees and under the direct control of the union assemblies.

It may be argued that the FoD did not actually mean this sort of structure. Indeed, their manifesto states that they are “*introducing a slight variation in anarchism into our program. The establishment of a Revolutionary Junta.*” Surely this implies that they saw themselves as having moved away from anarchism and CNT policy? As can be seen from Balius' comments during and after the revolution, the FoD were arguing for “*all power to the unions*” and stating that “*apolitical anarchism had failed.*” However, “*apolitical*” anarchism came about post-July 19th when the CNT-FAI (ignoring anarchist theory and CNT policy and history) **ignored** the state machine rather than destroying it and supplanting it with libertarian organs of self-management. The social revolution that spontaneously occurred after July 19th was essentially economic and social (i.e. “*apolitical*”) and not “*anti-political*” (i.e. the destruction of the state machine). Such a revolution would soon come to grief on the shores of the (revitalised) state machine — as the FoD correctly argued had happened.

To state that they had introduced a variation into their anarchism makes sense post-July 1936. The “*apolitical*” line of the CNT-FAI had obviously failed and a new departure was required. While it is clear that the FoD's “*new*” position was nothing of the kind, it was elemental anarchist principles, it was “*new*” in respect to the policy the CNT (“*anarchism*”) had conducted during the Civil War — a policy they justified by selective use of anarchist theory and principles. In the face of this, the FoD could claim they were presenting a new variation in spite of its obvious similarities to pre-war CNT policies and anarchist theory. Thus the claim that the FoD saw their ideas as some sort of departure from traditional anarchism cannot be maintained, given the obvious links this “*new*” idea had with the past policies and structure of the CNT. As Guillamon makes it clear, the FoD made “*their stand within the organisation and upon anarcho-syndicalist ideology*” and “[a]t all times the Group articulated an anarcho-syndicalist ideology, although it also voiced radical criticism of the CNT and FAI leadership. But it is a huge leap from that to claiming that the Group espoused marxist positions.” [Op. Cit., p. 61 and p. 95]

One last comment. Morrow states that the “*CNT leadership . . . expelled the Friends of Durruti*” [Op. Cit., p. 189] This is not true. The CNT leadership did **try** to expel the FoD. However, as Balius points out, the “*higher committees order[ed] our expulsion, but this was rejected by the rank and file in the trade union assemblies and at a plenum of FAI groups held in the Casa CNT-FAI.*” [quoted by Agustin Guillamon, Op. Cit., p. 73] Thus the CNT leadership could never get their desire ratified by any assembly of unions or FAI groups. Unfortunately, Morrow gets his facts wrong (and also presents a somewhat false impression of the relationship of the CNT leadership and the rank and file).

9. Were the Friends of Durruti influenced by Trotskyists?

Morrow implies that the Bolshevik-Leninists “*established close contacts with the anarchist workers, especially the ‘Friends of Durruti’*” [Op. Cit., p. 139] The

truth, as usual, is somewhat different.

To prove this we must again turn to Guillamon's work in which he dedicates a chapter to this issue. He brings this chapter by stating:

*"It requires only a cursory perusal of **El Amigo del Pueblo** or Balius's statements to establish that the Friends of Durruti were never marxists, nor influenced at all by the Trotskyists or the Bolshevik-Leninist Section. But there is a school of historians determined to maintain the opposite and hence the necessity for this chapter."* [Op. Cit., p. 94]

He stresses that the FoD *"were not in any way beholden to Spanish Trotskyism is transparent from several documents"* and notes that while the POUM and Trotskyists displayed *"an interest"* in *"bringing the Friends of Durruti under their influence"* this was *"something in which they never succeeded."* [Op. Cit., p. 96 and p. 110]

Pre-May, 1937, Balius himself states that the FoD *"had no contact with the POUM, nor with the Trotskyists."* [Op. Cit., p. 104] Post-May, this had not changed as witness E. Wolf letter to Trotsky in July 1937 which stated that it *"will be impossible to achieve any collaboration with them . . . Neither the POUMists nor the Friends would agree to the meeting [to discuss joint action]."* [Op. Cit., pp. 97–8]

In other words, the Friends of Durruti did not establish *"close contacts"* with the Bolshevik-Leninists after the May Days of 1937. While the Bolshevik-Leninists may have wished for such contacts, the FoD did not (they probably remembered their fellow anarchists and workers imprisoned and murdered when Trotsky was in power in Russia). They were, of course, contacts of a limited kind but no influence or significant co-operation. Little wonder Balius stated in 1946 that the *"alleged influence of the POUM or the Trotskyists upon us is untrue."* [quoted, Op. Cit., p. 104]

It is hardly surprising that the FoD were not influenced by Trotskyism. After all, they were well aware of the policies Trotsky introduced when he was in power. Moreover, the program of the Bolshevik-Leninists was similar in rhetoric to the anarchist vision — they differed on the question of whether they actually **meant** *"all power to the working class"* or not (see section 12 and 13). And, of course, the Trotskyists activities during the May Days amounted to little more than demanding that the workers' do what they were already doing (as can be seen from the leaflet they produced — as George Orwell noted, *"it merely demanded what was happening already"* [Homage to Catalonia, p. 221]). As usual, the *"vanguard of the proletariat"* were trying to catch up with the proletariat.

In theory and practice the FoD were miles ahead of the Bolshevik-Leninists — as to be expected, as the FoD were anarchists.

10. What does the Friends of Durruti's programme tell us about Trotskyism?

Morrow states that the FoD's *"slogans included the essential points of a revolutionary program: all power to the working class, and democratic organs of*

the workers, peasants and combatants, as the expression of the workers' power." [Op. Cit., p. 133] It is useful to compare Leninism to these points to see if that provides a revolutionary program.

Firstly, as we argue in more detail in section 11, Trotsky abolished the democratic organs of the Red Army. Lenin's rule also saw the elimination of the factory committee movement and its replacement with one-man management appointed from above (see section 17 and Maurice Brinton's **The Bolsheviks and Workers' Control** for details). Both these events occurred before the start of the Russian Civil War in May 1918. Moreover, neither Lenin nor Trotsky considered workers' self-management of production as a key aspects of socialism. On this level, Leninism in power did not constitute a "*revolutionary program.*"

Secondly, Leninism does **not** call for "*all power to the working class*" or even "*workers' power*" to manage their own affairs. To quote Trotsky, in an article written in 1937, "*the proletariat can take power only through its vanguard.*" The working classes' role is one of supporting the party:

"Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.

"In this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard."

Thus, rather than the working class as a whole seizing power, it is the "*vanguard*" which takes power — "*a revolutionary party, even after seizing power . . . is still by no means the sovereign ruler of society.*" [Stalinism and Bolshevism] So much for "*workers' power*" — unless you equate that with the "*power*" to give your power, your control over your own affairs, to a minority who claim to represent you. Indeed, Trotsky even attacks the idea that workers' can achieve power directly via organs of self-management like workers' councils (or soviets):

"Those who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat." [Op. Cit.]

In other words, the dictatorship of the proletariat is, in fact, expressed by "*the party dictatorship.*" In this Trotsky follows Lenin who asserted that:

"The very presentation of the question — 'dictatorship of the Party or dictatorship of the class, dictatorship (Party) of the leaders or dictatorship (Party) of the masses?' — is evidence of the most incredible and hopeless confusion of mind . . . [because] classes are usually . . . led by political parties. . . " [Left-wing Communism: An Infantile Disorder, pp. 25–6]

As has been made clear above, the FoD being anarchists aimed for a society of generalised self-management, a system in which working people directly controlled their own affairs and so society. As these words by Lenin and Trotsky indicate they did not aim for such a society, a society based on "*all power to the*

working class.” Rather, they aimed for a society in which the workers would delegate their power into the hands of a few, the revolutionary party, who would exercise power **on their behalf**. The FoD meant exactly what they said when they argued for “*all power to the working class*” — they did not mean this as a euphemism for party rule. In this they followed Bakunin:

“[T]he federated Alliance of all labour associations . . . will constitute the Commune . . . there will be a federation of the standing barricades and a Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade . . . these deputies being invested with binding mandates and accountable and revocable at all times. . . An appeal will be issued to all provinces, communes and associations inviting them to follow the example set . . . [and] to reorganise along revolutionary lines . . . and to then delegate deputies to an agreed place of assembly (all of those deputies invested with binding mandates and accountable and subject to recall), in order to found the federation of insurgent associations, communes and provinces . . . Thus it is through the very act of extrapolation and organisation of the Revolution with an eye to the mutual defences of insurgent areas that the . . . Revolution, founded upon . . . the ruins of States, will emerge triumphant. . .

“Since it is the people which must make the revolution everywhere, and since the ultimate direction of it must at all times be vested in the people organised into a free federation of agricultural and industrial organisations . . . being organised from the bottom up through revolutionary delegation . . .” [No God, No Masters, vol. 1, pp. 155–6]

And:

“Not even as revolutionary transition will we countenance national Conventions, nor Constituent Assemblies, nor provisional governments, nor so-called revolutionary dictatorships: because we are persuaded that revolution is sincere, honest and real only among the masses and that, whenever it is concentrated in the hands of a few governing individuals, it inevitably and immediately turns into reaction.” [Op. Cit., p. 160]

As can be seen, Bakunin’s vision is precisely, to use Morrow’s words, “*all power to the working class, and democratic organs of the workers, peasants and combatants, as the expression of the workers’ power.*” Thus the Friends of Durruti’s program is not a “*break*” with anarchism (as we discussed in more detail in section 8) but rather in the tradition started by Bakunin — in other words, an anarchist program. It is Leninism, as can be seen, which rejects this “*revolutionary program*” in favour of all power to the representatives of the working class (i.e. party) which it confuses with the working class as a whole.

Given that Morrow asserts that “*all power to the working class*” was an “*essential*” point of “*a revolutionary program*” we can only conclude that Trotskyism does not provide a revolutionary program — rather it provides a program based, at best, on representative government in which the workers’ delegate their

power to a minority or, at worse, on party dictatorship **over** the working class (the experience of Bolshevik Russia would suggest the former quickly becomes the latter, and is justified by Bolshevik ideology).

By his own arguments, here as in so many other cases, Morrow indicates that Trotskyism is not a revolutionary movement or theory.

11. Why is Morrow's comments against the militarisation of the Militias ironic?

Morrow denounces the Stalinist militarisation of the militias (their "*campaign for wiping out the internal democratic life of the militias*") as follows:

"The Stalinists early sought to set an 'example' by handing their militias over to government control, helping to institute the salute, supremacy of officers behind the lines, etc. . .

"The example was wasted on the CNT masses . . . The POUM reprinted for distribution in the militias the original Red Army Manual of Trotsky, providing for a democratic internal regime and political life in the army." [Op. Cit., p. 126]

Morrow states that he supported the "*democratic election of soldiers' committees in each unit, centralised in a national election of soldiers' delegates to a national council.*" Moreover, he attacks the POUM leadership because it "**forbade** election of soldiers' committees" and argued that the "*simple, concrete slogan of elected soldier's committees was the only road for securing proletariat control of the army.*" He attacks the POUM because its "*ten thousand militiamen were controlled bureaucratically by officials appointed by the Central Committee of the party, election of soldiers' committees being expressly forbidden.*" [Op. Cit., p. 127, p. 128 and pp. 136–7]

Again, Morrow is correct. A revolutionary working class militia **does** require self-management, the election of delegates, soldiers' councils and so on. Bakunin, for example, argued that the fighters on the barricades would take a role in determining the development of the revolution as the "*Commune will be organised by the standing federation of the Barricades . . . composed of one or two delegates from each barricade . . . vested with plenary but accountable and removable mandates.*" This would complement "*the federative Alliance of all working men's [and women's] associations . . . which will constitute the Commune.*" [Michael Bakunin: Selected Writings, pp. 170–1] That is **exactly** why the CNT militia organised in this fashion (and, we must note, they were only applying the organisational principles of the CNT and FAI — i.e. anarchism — to the militias). The militia columns were organised in a libertarian fashion from the bottom up:

"The establishment of war committees is acceptable to all confederal militias. We start from the individual and form groups of ten, which come to accommodations among themselves for small-scale operations. Ten such groups together make up one centuria, which appoints a delegate to represent it. Thirty centurias make up one column, which is directed by a war committee, on which the delegates

from the centurias have their say. . . although every column retains its freedom of action, we arrive at co-ordination of forces, which is not the same thing as unity of command.” [No Gods, No Masters, vol. 2, pp. 256–7]

In other words, Morrow is arguing for an **anarchist** solution to the problem of defending the revolution and organising those who were fighting fascism. We say anarchist for good reason. What is ironic about Morrow’s comments and description of “*workers’ control of the army*” is that these features were **exactly** those eliminated by Trotsky when he created the Red Army in 1918! Indeed, Trotsky acted in **exactly** the same way as Morrow attacks the Stalinists for acting (and they used many of the same arguments as Trotsky did to justify it).

As Maurice Brinton correctly summarises:

“Trotsky, appointed Commissar of Military Affairs after Brest-Litovsk, had rapidly been reorganising the Red Army. The death penalty for disobedience under fire had been restored. So, more gradually, had saluting, special forms of address, separate living quarters and other privileges for officers. Democratic forms of organisation, including the election of officers, had been quickly dispensed with.” [The Bolsheviks and Workers’ Control, p. 37]

He notes that “[f]or years, Trotskyist literature has denounced these reactionary facets of the Red Army as examples of what happened to it ‘under Stalinism.’” [Op. Cit., p. 37f] This claim was, amazingly enough, also made by Trotsky himself. In 1935 he re-wrote history by arguing that “[i]n the fire of the cruel struggle [of the Civil War], there could not be even a question of a privileged position for officers: the very word was scrubbed out of the vocabulary.” Only “after the victories had been won and the passage made to a peaceful situation” did “the military apparatus” try to “become the most influential and privileged part of the whole bureaucratic apparatus” with “the Stalinist bureaucracy . . . gradually over the succeeding ten to twelve years” ensuring for them “a superior position” and giving them “ranks and decorations.” [How Did Stalin Defeat the Opposition?]

In fact, “ranks and decorations” and “superior” positions were introduced by Trotsky **before** the outbreak of the Civil War in May 1918. Having been responsible for such developments you would think he would remember them!

On March 28th, 1918, Trotsky gave a report to the Moscow City Conference of the Communist Party. In this report he stated that “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree” and that the Bolsheviks “fac[ed] the task of creating a regular Army.” Why the change? Simply because the Bolshevik Party held power (“political power is in the hands of the same working class from whose ranks the Army is recruited”). Of course, power was actually held by the Bolshevik party, not the working class, but never fear:

“Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers’, Peasants’ and Soldiers’ Deputies, there can be no antagonism between the government and the mass

*of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the **appointment** of members of the commanding staff by the organs of the Soviet Power.” [Work, Discipline, Order]*

Of course, most workers’ are well aware that the administration of a trade union usually works against them during periods of struggle. Indeed, so are most Trotskyists as they often denounce the betrayals by that administration. Thus Trotsky’s own analogy indicates the fallacy of his argument. Elected officials do not necessarily reflect the interests of those who elected them. That is why anarchists have always supported **delegation** rather than representation combined with decentralisation, strict accountability and the power of instant recall. In a highly centralised system (as created by the Bolsheviks and as exists in most social democratic trade unions) the ability to recall an administration is difficult as it requires the agreement of **all** the people. Thus there are quite a few grounds for fearing the appointment of commanders by the government — no matter which party makes it up.

If, as Morrow argues, the “*simple, concrete slogan of elected soldier’s committees was the only road for securing proletariat control of the army*” then Trotsky’s regime in the Red Army ensured the defeat of proletarian control of that organisation. The question Morrow raises of who would control the army, the working class or the bourgeois failed to realise the real question — who was to control the army, the working class, the bourgeois or the state bureaucracy. Trotsky ensured that it would be the latter.

Hence Morrow’s own arguments indicate the anti-revolutionary nature of Trotskyism — unless, of course, we decide to look only at what people say and not what they do.

Of course some Trotskyists know what Trotsky actually did when he held power and try and present apologetics for his obvious destruction of soldiers’ democracy. One argues that the “*Red Army, more than any other institution of the civil war years, embodied the contradiction between the political consciousness and circumstantial coercion. On the one hand the creation of a Red Army was a retreat: it was a conscripted not a voluntary army; officers were appointed not elected . . . But the Red Army was also filled with a magnificent socialist consciousness.*” [John Rees, “*In Defence of October*”, **International Socialism**, no. 52, pp. 3–82, p. 46]

This argument is somewhat weak for two reasons.

Firstly, the regressive features of the Red Army appeared **before** the start of the Civil War. It was a political decision to organise in this way, a decision **not justified at the time in terms of circumstantial necessity**. Indeed, far from it (like most of the other Bolshevik policies of the period). Rather it was justified under the rather dubious rationale that workers did not need to fear the actions of a workers’ state. Circumstances were not mentioned at all nor was the move considered as a retreat or as a defeat. It was not even considered as a matter of principle.

This perspective was reiterated by Trotsky after the end of the Civil War. Writing in 1922, he argued that:

“There was and could be no question of controlling troops by means of elected committees and commanders who were subordinate to these

committees and might be replaced at any moment . . . [The old army] had carried out a social revolution within itself, casting aside the commanders from the landlord and bourgeois classes and establishing organs of revolutionary self-government, in the shape of the Soviets of Soldiers' Deputies. These organisational and political measures were correct and necessary from the standpoint of breaking up the old army. But a new army capable of fighting could certainly not grow directly out of them . . . The attempt made to apply our old organisational methods to the building of a Red Army threatened to undermine it from the very outset . . . the system of election could in no way secure competent, suitable and authoritative commanders for the revolutionary army. The Red Army was built from above, in accordance with the principles of the dictatorship of the working class. Commanders were selected and tested by the organs of the Soviet power and the Communist Party. Election of commanders by the units themselves — which were politically ill-educated, being composed of recently mobilised young peasants — would inevitably have been transformed into a game of chance, and would often, in fact, have created favourable circumstances for the machinations of various intriguers and adventurers. Similarly, the revolutionary army, as an army for action and not as an arena of propaganda, was incompatible with a regime of elected committees, which in fact could not but destroy all centralised control.” [The Path of the Red Army]

If a “*circumstantial*” factor exists in this rationale, it is the claim that the soldiers were “*politically ill-educated.*” However, **every** mass movement or revolution **starts** with those involved being “*politically ill-educated.*” The very process of struggle educates them politically. A key part of this radicalisation is practising self-management and self-organisation — in other words, in participating in the decision making process of the struggle, by discussing ideas and actions, by hearing other viewpoints, electing and mandating delegates. To remove this ensures that those involved **remain** “*politically ill-educated*” and, ultimately, incapable of self-government. It also contains the rationale for continuing party dictatorship:

“If some people . . . have assumed the right to violate everybody’s freedom on the pretext of preparing the triumph of freedom, they will always find that the people are not yet sufficiently mature, that the dangers of reaction are ever-present, that the education of the people has not yet been completed. And with these excuses they will seek to perpetuate their own power.” [Errico Malatesta, Life and Ideas, p. 52]

In addition, Trotsky’s rationale refutes any claim that Bolshevism is somehow “*fundamentally*” democratic. The ramifications of it were felt everywhere in the soviet system as the Bolsheviks ignored the “*wrong*” democratic decisions made by the working masses and replaced their democratic organisations with appointees from above. Indeed, Trotsky admits that the “*Red Army was built from above, in accordance with the principles of the dictatorship of the working*

class.” Which means, to state the obvious, appointment from above, the dismantling of self-government, and so on are “*in accordance with the principles*” of Trotskyism. These comments were not made in the heat of the civil war, but afterward during peacetime. Notice Trotsky admits that a “*social revolution*” had swept through the Tsarist army. His actions, he also admits, reversed that revolution and replaced its organs of “*self-government*” with ones identical to the old regime. When that happens it is usually called by its true name, namely **counter-revolution**.

For a Trotskyist, therefore, to present themselves as a supporter of self-managed militias is the height of hypocrisy. The Stalinists repeated the same arguments used by Trotsky and acted in exactly the same way in their campaign against the CNT and POUM militias. Certain acts have certain ramifications, no matter who does them or under what government. In other words, abolishing democracy in the army will generate autocratic tendencies which will undermine socialistic ones **no matter who does it**. The same means cannot be used to serve different ends as there is an intrinsic relationship between the instruments used and the results obtained — that is why the bourgeoisie do not encourage democracy in the army or the workplace! Just as the capitalist workplace is organised to produce proletarians and capital along with cloth and steel, the capitalist army is organised to protect and reinforce minority power. The army and the capitalist workplace are not simply means or neutral instruments. Rather they are social structures which generate, reinforce and **protect** specific social relations. This is what the Russian masses instinctively realised and conducted a social-revolution in both the army and workplace to **transform** these structures into ones which would enhance rather than crush freedom and working class autonomy. The Bolsheviks reversed these movements in favour of structures which reproduced capitalist social relationships **and justified it in terms of “socialism.”** Unfortunately, capitalist means and organisations would only generate capitalist ends.

It was for these reasons that the CNT and its militias were organised from the bottom up in a self-managed way. It was the only way **socialists** and a socialist society could be created — that is why anarchists are anarchists, we recognise that a socialist (i.e. libertarian) society cannot be created by authoritarian organisations. As the justly famous Sonvillier Circular argued “*[h]ow could one expect an egalitarian society to emerge out of an authoritarian organisation? It is impossible.*” [quoted by Brian Morris, **Bakunin: The Philosophy of Freedom**, p. 61] Just as the capitalist state cannot be utilised by the working class for its own ends, capitalist/statist organisational principles such as appointment, autocratic management, centralisation and delegation of power and so on cannot be utilised for social liberation. They are not designed to be used for that purpose (and, indeed, they were developed in the first place to stop it and enforce minority rule!).

In addition, to abolish democracy on the pretext that people are not ready for it ensures that it will never exist. Anarchists, in contrast, argue that “*[o]nly freedom or the struggle for freedom can be the school for freedom.*” [Malatesta, **Op. Cit.**, p. 59]

Secondly, how can a “*socialist consciousness*” be encouraged, or continue to exist, without socialist institutions to express it? Such a position is idealistic nonsense, expressing the wishful notion that the social relationships people experiences does not impact on those involved. In effect, Rees is arguing that

as long as the leaders have the “*right ideas*” it does not matter how an organisation is structured. However, how people develop, the ideas they have in their heads, are influenced by the relations they create with each other — autocratic organisations do not encourage self-management or socialism, they produce bureaucrats and subjects.

An autocratic organisation **cannot** encourage a socialist consciousness by its institutional life, only in spite of it. For example, the capitalist workplace encourages a spirit of revolt and solidarity in those subject to its hierarchical management and this is expressed in direct action — by **resisting** the authority of the boss. It only generates a socialist perspective via resistance to it. Similarly with the Red Army. Education programs to encourage reading and writing does not generate socialists, it generates soldiers who are literate. If these soldiers do not have the institutional means to manage their own affairs, a forum to discuss political and social issues, then they remain order takers and any socialist conscious will wither and die.

The Red Army was based on the fallacy that the structure of an organisation is unimportant and it is the politics of those in charge that matter (Marxists make a similar claim for the state, so we should not be too surprised). However, it is no co-incident that bourgeois structures are always hierarchical — self-management is a politically educational experience which erodes the power of those in charge and transforms those who do it. It is to stop this development, to protect the power of the ruling few, that the bourgeois always turn to centralised, hierarchical structures — they reinforce elite rule. You cannot use the same form of organisation and expect different results — they are designed that way for a reason! To twitter on about the Red Army being “*filled with a magnificent socialist consciousness*” while justifying the elimination of the only means by which that consciousness could survive, prosper and grow indicates a complete lack of socialist politics and any understanding of materialist philosophy.

Moreover, one of the basic principles of the anarchist militia was equality between all members. Delegates received the same pay, ate the same food, wore the same clothes as the rest of the unit. Not so in the Red Army. Trotsky thought, when he was in charge of it, that inequality was “*in some cases . . . quite explicable and unavoidable*” and that “[*e*]very Red Army warrior fully accepts that the commander of his unit should enjoy certain privileges as regards lodging, means of transport and even uniform.” [More Equality!]

Of course, Trotsky would think that, being the head commander of the Army. Unfortunately, because soldier democracy had been abolished by decree, we have no idea whether the rank and file of the Red Army agreed with him. For Trotsky, privilege “*is, in itself, in certain cases, inevitable*” but “[*o*]stentatious indulgence in privilege is not just evil, it is a crime.” Hence his desire for “*more*” equality rather than equality — to aim for “*eliminating the most abnormal [!] phenomena, softening [!] the inequality that exists*” rather than abolish it as they did in the CNT militias. [Op. Cit.]

But, of course, such inequalities that existed in the Red Army are to be expected in an autocratically run organisation. The inequality inherent in hierarchy, the inequality in power between the order giver and order taker, will, sooner or later, be reflected in material inequality. As happened in the Red Army (and all across the “*workers’ state*”). All Trotsky wanted was for those in power to be respectable in their privilege rather than showing it off. The anarchist militias did not have this problem because being libertarian, delegates

were subject to recall and power rested with the rank and file, **not** an elected government.

As another irony of history, Morrow quotes a Bolshevik-Leninist leaflet (which “*points the road*”) as demanding “[*e*]qual pay for officers and soldiers.” [Op. Cit., p. 191] Obviously these good Trotskyists had no idea what their hero actually wrote on this subject or did when in power. We have to wonder how long their egalitarian demands would have survived once they had acquired power — if the experience of Trotsky in power is anything to go by, not very long.

Trotsky did not consider how the abolition of democracy and its replacement with an autocratic system would effect the morale or consciousness of the soldiers subject to it. He argued that in the Red Army “*the best soldier does not mean at all the most submissive and uncomplaining.*” Rather, “*the best soldier will nearly always be sharper, more observant and critical than the others. . . by his critical comments, based on facts accessible to all, he will pretty often undermine the prestige of the commanders and commissars in the eyes of the mass of the soldiers.*” However, not having a democratic army the soldiers could hardly express their opinion other than rebellion or by indiscipline. Trotsky, however, adds a comment that makes his praise of critical soldiers seem less than sincere. He states that “*counter-revolutionary elements, agents of the enemy, make conscious and skilful use of the circumstances I have mentioned [presumably excessive privilege rather than critical soldiers, but who can tell] in order to stir up discontent and intensify antagonism between rank and file and the commanding personnel.*” [Op. Cit.] The question, of course, arises of who can tell the difference between a critical soldier and a “*counter-revolutionary element*”? Without a democratic organisation, soldier are dependent (as in any other hierarchy) on the power of the commanders, commissars and, in the Red Army, the Bolshevik Secret Police (the Cheka). In other words, members of the very class of autocrats their comments are directed against.

Without democratic organisation, the Red Army could never be a means for creating a socialist society, only a means of reproducing autocratic organisation. The influence of the autocratic organisation created by Trotsky had a massive impact on the development of the Soviet State. According to Trotsky himself:

“The demobilisation of the Red Army of five million played no small role in the formation of the bureaucracy. The victorious commanders assumed leading posts in the local Soviets, in economy, in education, and they persistently introduced everywhere that regime which had ensured success in the civil war. Thus on all sides the masses were pushed away gradually from actual participation in the leadership of the country.” [The Revolution Betrayed]

Obviously Trotsky had forgotten who created the regime in the Red Army in the first place! He also seems to have forgotten that after militarising the Red Army, he turned his power to militarising workers (starting with the railway workers). He also forgets that Lenin had been arguing that workers’ must “*unquestioningly obey the single will of the leaders of labour*” from April 1918 along with granting “*individual executives dictatorial power (or ‘unlimited’ powers)*” and that “*the appointment of individuals, dictators with unlimited powers*” was, in fact, “*in general compatible with the fundamental principles of*

Soviet government” simply because “*the history of revolutionary movements*” had “*shown*” that “*the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes.*” He notes that “[u]ndoubtedly, the dictatorship of individuals was compatible with bourgeois democracy.” [**The Immediate Tasks of the Soviet Government**, p. 34 and p. 32]

In other words, Lenin urged the creation of, and implemented, **bourgeois** forms of workplace management based on the appointment of managers from above. To indicate that this was not in contradiction with Soviet principles, he points to the example of **bourgeois** revolutions! As if bourgeois methods do not reflect bourgeois interests and goals. In addition, these “*dictators*” were given the same autocratic powers Trotsky claimed the demobilisation of the Red Army four years later had “*persistently introduced everywhere.*” Yes, “*on all sides the masses were pushed away gradually from actual participation in the leadership of the country*” but the process had started immediately after the October Revolution and was urged and organised by Lenin and Trotsky before the Civil War had started.

Lenin’s support for appointment of (“*dictatorial*”) managers from above makes Trotsky’s 1922 comment that the “*Red Army was built from above, in accordance with the principles of the dictatorship of the working class*” take on a new light. [**The Path of the Red Army**] After all, Lenin argued for an economy system built from above via the appointment of managers before the start of the Civil War. The Red Army was created from above via the appointment of officers before the start of the Civil War. Things had certainly changed since Lenin had argued in **The State and Revolution** that “[a]ll officials, without exception, [would be] elected and subject to recall **at any time.**” This would “*serve as the bridge between capitalism and socialism.*” [**The Essential Lenin**, p. 302] One major difference, given Trotsky’s rationales, seems to be that the Bolsheviks were now in power and so election and recall without exception could be forgotten and replaced by appointment.

In summary, Trotsky’s argument against functional democracy in the Red Army could, and was, used to justify the suppression of any democratic decision or organisation of the working class the Bolshevik government disapproved of. He used the same argument, for example, to justify the undermining of the Factory Committee movement and the struggle for workers’ control in favour of one-man management — the form of management in the workplace was irrelevant as the workers’ were now citizens of a workers’ state and under a workers’ government (see section 17). Needless to say, a state which eliminates functional democracy in the grassroots will not stay democratic for long (and to remain the sovereign power in society, any state will have to eliminate it or, at the very least, bring it under central control — as institutionalised in the USSR constitution of 1918).

Instead of seeing socialism as a product of free association, of working class self-organisation from the bottom up by self-managed organisations, Trotsky saw it as a centralised, top-down system. Of course, being a democrat of sorts he saw the Bolshevik Government as being elected by the mass of the population (or, more correctly, he saw it being elected by the national congress of soviets). However, his vision of centralisation of power provided the rationale for destroying functional democracy in the grass-roots — and without healthy roots, any plant will wither and die. Little wonder, then, that the Bolshevik

experiment proved such a disaster — yes, the civil war did not help but the logic of Bolshevism has started to undermine working class self-management **before** is started.

Thus Trotsky's argument that the democratic nature of a workers' army or militia is irrelevant because a "*workers' state*" exists is flawed on many different levels. And the experience of Trotsky in power indicates well the poverty of Trotskyism and Morrow's criticism of the CNT — his suggestion for a self-managed militia is pure anarchism with nothing to do with Leninism and the experience of Bolshevism in power.

12. What is ironic about Morrow's vision of revolution?

Equally ironic as Morrow's comments concerning democratic militias (see last section) is his argument that the revolution needed to "*give the factory committees, militia committees, peasant committees, a democratic character, by having them elected by all workers in each unit; to bring together these elected delegates in village, city, regional councils ... [and] a national congress.*" [Op. Cit., p. 100]

Such a position is correct, such developments were required to ensure the success of the revolution. However, it is somewhat ironic that a Trotskyist would present them as somehow being opposed to anarchism when, in fact, they are pure anarchism. Indeed, anarchists were arguing in favour of workers' councils more than five decades before Lenin discovered the importance of the Russian Soviets in 1917. Moreover, as we will indicate, what is even more ironic is the fact that Trotskyism does not actually see these organs as an expression of working class self-management and power but rather as a means of the party to take power. In addition, we must also note that it was Lenin and Trotsky who helped undermine the Russian workers' factory committees, militia committees and so on in favour of party rule. We will discuss each of these ironies in turn.

Firstly, as noted, such Morrow's stated position is exactly what Bakunin and the anarchist movement had been arguing since the 1860s. To quote Bakunin:

*"the federative alliance of all working men's associations ... constitute the Commune ... all provinces, communes and associations ... by first **reorganising** on revolutionary lines ... [will] constitute the federation of insurgent associations, communes and provinces ... [and] organise a revolutionary force capable defeating reaction ... [and for] self-defence ... [The] revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations ... organised from the bottom upwards by means of revolutionary delegation..."* [Michael Bakunin: Selected Writings, p. 170–2]

"The future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal." [Op. Cit., p. 206]

Here is Kropotkin presenting the same vision:

“independent Communes for the territorial organisation, and of federations of Trade Unions [i.e. workplace associations] for the organisation of men [and women] in accordance with their different functions. . . [and] free combines and societies . . . for the satisfaction of all possible and imaginable needs, economic, sanitary, and educational; for mutual protection, for the propaganda of ideas, for arts, for amusement, and so on.” [Peter Kropotkin, **Evolution and Environment**, p. 79]

“the complete independence of the Communes, the Federation of free communes and the social revolution in the communes, that is to say the formation of associated productive groups in place of the state organisation.” [quoted by Camillo Berneri, **Peter Kropotkin: His Federalist Ideas**]

Bakunin also mentions that those defending the revolution would have a say in the revolutionary structure — the *“Commune will be organised by the standing federation of the Barricades and by the creation of a Revolutionary Council composed of . . . delegates from each barricade . . . vested with plenary but accountable and removable mandates.”* [**Op. Cit.**, p. 171] This obviously parallels the democratic nature of the CNT militias.

Interestingly enough, Marx commented that *“odd barricades, these barricades of the Alliance [Bakunin’s anarchist organisation], where instead of fighting they spend their time writing mandates.”* [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 111] Obviously the importance of militia self-management was as lost on him as it was on Lenin and Trotsky — under Marx’s state would its defenders just be cannon-fodder, obeying their government and officers without the ability to help determine the revolution they were fighting for? Apparently so. Moreover, Marx quotes Bakunin’s support for *“responsible and recallable delegates, vested with their imperative mandates”* without commenting on the fact Bakunin **predicts** those features of the Paris Commune Marx praised in his **Civil War in France** by a number of years. Looks like Morrow is not the first Marxist to appropriate anarchist ideas without crediting their source.

As can be seen, Morrow’s suggestion on how to push the Spanish Revolution forward just repeats the ideas of anarchism. Any one familiar with anarchist theory would not be surprised by this as they would know that we have seen a free federation of workplace and communal associations as the basis of a revolution and, therefore, a free society since the time of Proudhon. Thus Morrow’s *“Trotskyist”* vision of a federation of workers’ council actually reproduces basic anarchist ideas, ideas which pre-date Lenin’s support for soviets as the basis of his *“workers’ state”* by over half a century (we will indicate the fundamental difference between the anarchist vision and the Trotskyist in due course).

As an aside, these quotes by Bakunin and Kropotkin make a mockery of Lenin’s assertion that anarchists do not analysis *“what to put in the place of what has been destroyed [i.e. the old state machine] and how”* [**Essential Works of Lenin**, p. 362] Anarchists have always suggested a clear answer to what we should *“replace”* the state with — namely free federations of working class organisations created in the struggle against capital and state. To state otherwise is to either be ignorant of anarchist theory or seek to deceive.

Some anarchists like Bakunin and the anarcho-syndicalists and collectivists saw these organisations being based primarily on libertarian labour unions complemented by whatever organisations were created in the process of revolution (“*The future society must be nothing else than the universalisation of the organisation that the International has formed for itself*” — “*The Sonvillier Circular*” echoing Bakunin, quoted by Brian Morris, **Bakunin: The Philosophy of Freedom**, p. 61] Others like Kropotkin and anarcho-communists saw it as a free federation of organisations created by the process of revolution itself. While anarchists did not present a blueprint of what would occur after the revolution (and rightly so) they did provide a general outline in terms of a decentralised, free federation of self-managed workers’ associations as well as linking these future forms of working class self-government with the forms generated in the current class struggle in the here and now.

Similarly, Lenin’s other assertion that anarchists do not study “*the concrete lessons of previous proletarian revolutions*” [**Ibid.**] is equally baseless, as any one reading, say, Kropotkin’s work would soon realise (for example, **The Great French Revolution, Modern Science and Anarchism** or his pamphlet “*Revolutionary Government*”). Starting with Bakunin, anarchists analysed the experiences of the Paris Commune and the class struggle itself to generalise political conclusions from them (for example, the vision of a free society as a federation of workers’ associations is clearly a product of analysing the class struggle and looking at the failures of the Commune). Given that Lenin states in the same work that “*anarchists had tried to claim the Paris Commune as their ‘own’*” [p. 350] suggests that anarchists **had** studied the Paris Commune and he was aware of that fact. Of course, Lenin states that we had “*failed to give . . . a true solution*” to its lessons — given that the solution anarchists proposed was a federation of workers councils to smash the state and defend the revolution his comments seem strange as this, according to **The State and Revolution**, is the “Marxist” solution as well (in fact, as we will soon see, Lenin played lip service to this and instead saw the solution as government by his party rather than the masses as a whole).

Thus, Morrow’s vision of what was required for a successful revolution parallels that of anarchism. We shall now discuss where and how they differ.

The essential difference between the anarchist and Trotskyist vision of workers’ councils as the basis of a revolution is what role these councils should play. For anarchists, these federations of self-managed assemblies is the actual framework of the revolution (and the free society it is trying to create). As Murray Bookchin puts it:

“There can be no separation of the revolutionary process from the revolutionary goal. A society based on self-administration must be achieved by means of self-administration . . . Assembly and community must arise from within the revolutionary process itself; indeed, the revolutionary process must be the formation of assembly and community, and with it, the destruction of power. Assembly and community must become ‘fighting words,’ not distinct panaceas. They must be created as modes of struggle against the existing society, not as theoretical or programmatic abstractions. . . The factory committees . . . must be managed directly by workers’ assemblies in the factories. . . neighbourhood committees, councils and boards must

be rooted completely in the neighbourhood assemble. They must be answerable at every point to the assembly, they and their work must be under continual review by the assembly; and finally, their members must be subject to immediate recall by the assembly. The specific gravity of society, in short, must be shifted to its base — the armed people in permanent assembly. [Post-Scarcity Anarchism, pp. 167–9]

Thus the anarchist social revolution sees workers' councils as organs of working class self-management, the means by which they control their own lives and create a new society based on their needs, visions, dreams and hopes. They are not seen as means by which others, the revolutionary party, seized power **on behalf** of the people as Trotskyists do.

Harsh words? No, as can be seen from Morrow who is quite clear on the role of working class organisation — it is seen purely as the means by which the party can take power. As he argues, there is “*no magic in the soviet form: it is merely the most accurate, most quickly reflecting and responsively changing form of political representation of the masses. . . It would provide the arena in which the revolutionary party can win the support of the working class.*” [Op. Cit., p. 136]

He states that initially the “*reformist majority in the executive committee would decline the assumption of state power. But the workers could still find in the soviets their natural organs of struggle until the genuinely revolutionary elements in the various parties banded together to win a revolutionary majority in the congress and establish a workers' state.*” In other words, the “*workers' state, the dictatorship of the proletariat . . . can only be brought into existence by the direct, **political** intervention of the masses, through the factory and village councils (soviets) at that point where a majority in the soviets is wielded by the workers' party or parties which are determined to overthrow the bourgeois state. Such was the basic theoretical contribution of Lenin.*” [Op. Cit., p. 100 and p. 113]

From an anarchist perspective, this indicates well the fundamental difference between anarchism and Trotskyism. For anarchists, the existence of an “*executive committee*” indicates that the workers' council do not, in fact, have power in society — rather it is the minority in the executive committee who have been delegated power. Rather than govern themselves and society directly, workers are turned into voters implementing the decisions their leaders have made on their behalf. If revolutionary bodies like workers' councils **did** create a “*workers' state*” (as Morrow recommends) then their power would be transferred and centralised into the hands of a so-called “*revolutionary*” government. In this, Morrow follows his guru Trotsky:

“the proletariat can take power only through its vanguard. In itself the necessity for state power arises from an insufficient cultural level of the masses and their heterogeneity. In the revolutionary vanguard, organised in a party, is crystallised the aspirations of the masses to obtain their freedom. Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.

“In this sense the proletarian revolution and dictatorship are the

work of the whole class, but only under the leadership of the vanguard.” [Trotsky, **Stalinism and Bolshevism**]

Thus, rather than the working class as a whole “seizing power”, it is the “*vanguard*” which takes power — “*a revolutionary party, even after seizing power . . . is still by no means the sovereign ruler of society.*” [Ibid.] He mocks the anarchist idea that a socialist revolution should be based on the self-management of workers within their own autonomous class organisations:

“Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Trotsky, **Op. Cit.**, p. 18]

In this he followed comments made when he was in power. In 1920 he argued that “[w]e have more than once been accused of having substituted for the dictatorships of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the . . . party . . . [that] the Soviets . . . [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class.” [Terrorism and Communism, p. 109] Any claims that Trotsky’s infamously authoritarian (indeed dictatorial) politics were a temporary aberration caused by the necessities of the Russian Civil War are refuted by these quotes — 17 years later he was still arguing the same point.

He had the same vision of party dictatorship being the basis of a revolution in 1924. Commenting on the Bolshevik Party conference of April 1917, he states that “*whole of . . . Conference was devoted to the following fundamental question: Are we heading toward the conquest of power in the name of the socialist revolution or are we helping (anybody and everybody) to complete the democratic revolution? . . . Lenin’s position was this: . . . the capture of the soviet majority; the overthrow of the Provisional Government; the seizure of power through the soviets.*” Note, **through** the soviets not **by** the soviets thus indicating the fact the Party would hold the real power, not the soviets of workers’ delegates. Moreover, he states that “*to prepare the insurrection and to carry it out under cover of preparing for the Second Soviet Congress and under the slogan of defending it, was of inestimable advantage to us.*” He continued by noting that it was “*one thing to prepare an armed insurrection under the naked slogan of the seizure of power by the party, and quite another thing to prepare and then carry out an insurrection under the slogan of defending the rights of the Congress of Soviets.*” The Soviet Congress just provided “*the legal cover*” for the Bolshevik plans rather than a desire to see the Soviets actually start managing society. [The Lessons of October]

We are not denying that Trotskyists do aim to gain a majority within working class conferences. That is clear. Anarchists also seek to gain the support of the mass of the population. It is what they do next that counts. Trotskyists seek to create a government above these organisations and dominate the executive committees that requires. Thus power in society shifts to the top, to the leaders

of the centralised party in charge of the centralised state. The workers' become mere electors rather than actual controllers of the revolution. Anarchists, in contrast, seek to dissolve power back into the hands of society and empower the individual by giving them a direct say in the revolution through their workplace, community and militia assemblies and their councils and conferences.

Trotskyists, therefore, advocate workers councils because they see them as **the** means the vanguard party can take power. Rather than seeing socialism or “*workers' power*” as a society in which everyone would directly control their own affairs, Trotskyists see it in terms of working class people delegating their power into the hands of a government. Needless to say, the two things are not identical and, in practice, the government soon turns from being the people's servant into its master.

It is clear that Morrow always discusses workers councils in terms of the strategy and program of the party, not the value that workers councils have as organs of direct workers control of society. He clearly advocates workers councils because he sees them as the best way for the vanguard party to rally workers around its leadership and organise the seizure of state power. At no time does he see then as means by which working class people can govern themselves directly — quite the reverse.

The danger of such an approach is obvious. The government will soon become isolated from the mass of the population and, due to the centralised nature of the state, difficult to hold accountable. Moreover, given the dominant role of the party in the new state and the perspective that it is the workers' vanguard, it becomes increasingly likely that it will place its power before that of those it claims to represent.

Certainly Trotsky's role in the Russian revolution tells us that the power of the party was more important to him than democratic control by workers through mass bodies. When the workers and sailors of the Kronstadt navy base rebelled in 1921, in solidarity with striking workers in Petrograd, they were demanding freedom of the press for socialist and anarchist groups and new elections to the soviets. But the reaction of the Bolshevik leadership was to crush the Kronstadt dissent in blood. Trotsky's attitude towards workers democracy was clearly expressed at the time:

“They [the dissent Bolsheviks of the Workers' Opposition] have placed the workers' right to elect representatives above the Party. As if the Party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the worker's democracy!”

He spoke of the “*revolutionary historic birthright of the Party*” and that it “*is obliged to maintain its dictatorship . . . regardless of temporary vacillations even in the working class . . . The dictatorship does not base itself at every given moment on the formal principle of a workers' democracy.*” [quoted by M. Brinton, **Op. Cit.**, p. 78]

This perspective naturally follows from Trotsky's vanguardist politics. For Leninists, the party is the bearer of “*socialist consciousness*” and, according to Lenin in **What is to be Done?**, workers, by their own efforts, can only achieve a “*trade union*” consciousness and, indeed, “*there can be no talk of an independent ideology being developed by the masses of workers in the process of their*

struggle” and so “*the only choice is: either bourgeois or socialist ideology*” (the later being developed not by workers but by the “*bourgeois intelligentsia*”). [Essential Works of Lenin, p. 82 and p. 74] To weaken or question the party means to weaken or question the socialist nature of the revolution and so weaken the “*dictatorship of the proletariat*.” Thus we have the paradoxical situation of the “*proletarian dictatorship*” repressing workers, eliminating democracy and maintaining itself against the “*passing moods*” of the workers (which means rejecting what democracy is all about). Hence Lenin’s comment at a conference of the Cheka (his political police) in 1920:

“Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves.” [Collected Works, vol. 24, p. 170]

Significantly, of the 17 000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40 913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants or workers. [George Leggett, **The Cheka: Lenin’s Political Police**, p. 178] Needless to say, Lenin failed to mention this aspect of his system in **The State and Revolution** (a failure shared by Morrow and later Trotskyists).

It is hard to combine these facts and Lenin’s and Trotsky’s comments with the claim that the “workers’ state” is an instrument of class rule — after all, Lenin is acknowledging that coercion will be exercised against members of the working class as well. The question of course arises — who decides what a “*wavering*” or “*unstable*” element is? Given their comments on the role of the party and the need for the party to assume power, it will mean in practice whoever rejects the government’s decisions (for example, strikers, local soviets who reject central decrees and instructions, workers who vote for anarchists or parties other than the Bolshevik party in elections to soviets, unions and so on, socialists and anarchists, etc.). Given a hierarchical system, Lenin’s comment is simply a justification for state repression of its enemies (including elements within or even the whole working class).

It could be argued, however, that workers could use the soviets to recall the government. However, this fails for two reasons (we will ignore the question of the interests of the bureaucratic machine which will inevitably surround a centralised body — see section H.3.9 for further discussion).

Firstly, the Leninist state will be highly centralised, with power flowing from the top-down. This means that in order to revoke the government, all the soviets in all parts of the country must, at the same time, recall their delegates and organise a national congress of soviets (which, we stress, is not in permanent session). The local soviets are bound to carry out the commands of the central government (to quote the Soviet constitution of 1918 — they are to “*carry out all orders of the respective higher organs of the soviet power*”). Any independence on their part would be considered “*wavering*” or an expression of “*unstable*” natures and so subject to “*revolutionary coercion*”. In a highly centralised system, the means of accountability is reduced to the usual bourgeois

level — vote in the general election every few years (which, in any case, can be annulled by the government to ensure that the soviets do not go back into the “mud” via the “*passing moods*” caused by the “*insufficient cultural level of the masses*”). In other words, the soviet form may be the “*most accurate, most quickly reflecting and responsively changing form of political representation of the masses*” (to use Morrow’s words) but only **before** they become transformed into state organs.

Secondly, “*revolutionary coercion*” against “*wavering*” elements does not happen in isolation. It will encourage critical workers to keep quiet in case they, too, are deemed “*unstable*” and become subject to “*revolutionary*” coercion. As a government policy it can have no other effect than deterring democracy.

Thus Trotskyist politics provides the rationale for eliminating even the limited role of soviets for electing representatives they hold in that ideology.

Morrow argues that “[o]ne must never forget . . . that soviets **do not begin** as organs of state power” rather they start as “*organs defending the workers’ daily interests*” and include “*powerful strike committees.*” [Op. Cit., p. 136] That is true, initially workers’ councils are expressions of working class power and are organs of working class self-management and self-activity. They are subject to direct control from below and unite from the bottom up. However, once they are turned into “*organs of state power*” their role (to re-quote the Soviet constitution of 1918) becomes that of “*carry[ing] out all orders of the respective higher organs of the soviet power.*” Soviet power is replaced by party power and they become a shell of their former selves — essentially rubber-stamps for the decisions of the party central committee.

Ironically, Morrow quotes the main theoretician of the Spanish Socialist Party as stating “*the organ of the proletarian dictatorship will be the Socialist Party*” and states that they “*were saying precisely what the anarchist leaders had been accusing both communists and revolutionary socialists of meaning by the proletarian dictatorship.*” [Op. Cit., p. 99 and p. 100] This is hardly surprising, as this was what the likes of Lenin and Trotsky **had** been arguing. As well as the quotes we have provided above, we may add Trotsky’s comment that the “*fundamental instrument of proletarian revolution is the party.*” [Lessons of October] And the resolution of the Second World Congress of the Communist International which stated that “[e]very class struggle is a political struggle. The goal of this struggle . . . is the conquest of political power. Political power cannot be seized, organised and operated except through a political party.” [cited by Duncan Hallas, **The Comintern**, p. 35] In addition, we may quote Lenin’s opinion that:

“The very presentation of the question — ‘dictatorship of the Party or dictatorship of the class, dictatorship (Party) of the leaders or dictatorship (Party) of the masses?’ — is evidence of the most incredible and hopeless confusion of mind . . . [because] classes are usually . . . led by political parties. . . .”

And:

“To go so far in this matter as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid.” [Left-wing Communism: An Infantile Disorder, pp. 25–6 and p. 27]

As Lenin and Trotsky constantly argued, proletarian dictatorship was impossible without the political party of the workers (whatever its name). Indeed, to even discuss any difference between the dictatorship of the class and that of the party just indicated a confused mind. Hence Morrow's comments are incredulous, particularly as he himself stresses that the soviet form is useful purely as a means of gaining support for the revolutionary party which would take over the executive of the workers' councils. He clearly is aware that the party is the **essential** organ of proletarian rule from a Leninist perspective — without the dictatorship of the party, Trotsky argues, the soviets fall back into the mud. Trotsky, indeed, stressed this need for the dictatorship of the party rather than of the proletariat in a letter written in 1937:

“The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history. . . The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution . . . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the ‘dictatorship’ of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses.” [Trotsky, **Writings 1936–37**, pp. 513–4]

The net result of Bolshevik politics in Russia was that Lenin and Trotsky undermined the self-management of working class bodies during the Russian Revolution and **before** the Civil War started in May 1918. We have already chronicled Trotsky's elimination of democracy and equality in the Red Army (see section 11). A similar fate befell the factory committees (see section 17) and soviet democracy (as noted above). The logic of Bolshevism is such that at no point did Lenin describe the suppression of soviet democracy and workers' control as a defeat (indeed, as far as workers' control went Lenin quickly moved to a position favouring one-man management). We discuss the Russian Revolution in more detail in the appendix on “What happened during the Russian Revolution?” and so will not do so here.

All in all, while Morrow's rhetoric on the nature of the social revolution may sound anarchist, there are important differences between the two visions. While Trotskyists support workers' councils on purely instrumentalist grounds as the best means of gaining support for their party's assumption of governmental power, anarchists see workers' councils as the means by which people can revolutionise society and themselves by practising self-management in all aspects of their lives. The difference is important and its ramifications signify why the Russian Revolution became the “*dictatorship over the proletariat*” Bakunin predicted. His words still ring true:

*“[b]y popular government they [the Marxists] mean government of the people by a small under of representatives elected by the people. . . [That is,] government of the vast majority of the people by a privileged minority. But this minority, the Marxists say, will consist of workers. Yes, perhaps, of **former** workers, who, as soon as they become rulers or representatives of the people will cease to be workers and will begin to look upon the whole workers’ world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people.”* [**Statism and Anarchy**, p. 178]

It was for this reason that he argued the anarchists do “*not accept, even in the process of revolutionary transition, either constituent assemblies, provisional governments or so-called revolutionary dictatorships; because we are convinced that revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction.*” [**Michael Bakunin: Selected Writings**, p. 237] The history of the Russian Revolution proved him right. Hence anarchist support for popular assemblies and federations of workers’ councils as the framework of the social revolution rather than as a means to elect a “revolutionary” government.

One last point. We must point out that Morrow’s follows Lenin in favouring executive committees associated with workers’ councils. In this he actually ignores Marx’s (and Lenin’s, in **State and Revolution**) comments that the Paris Commune was “*to be a working, not a parliamentary, body, executive and legislative at the same time.*” [**Selected Writings**, p. 287] The existence of executive committees was coded into the Soviet Union’s 1918 Constitution. This suggests two things. Firstly, Leninism and Trotskyism differ on fundamental points with Marx and so the claim that Leninism equals Marxism is difficult to support (the existence of libertarian Marxists like Anton Pannekoek and other council communists also disprove such claims). Secondly, it indicates that Lenin’s claims in **State and Revolution** were ignored once the Bolsheviks took power so indicating that use of that work to prove the democratic nature of Bolshevism is flawed.

Moreover, Marx’s support of the fusion of executive and legislative powers is not as revolutionary as some imagine. For anarchists, as Bookchin argues, “*[i]n point of fact, the consolidation of ‘executive and legislative’ functions in a single body was regressive. It simply identified the process of policy-making, a function that rightly should belong to the people in assembly, with the technical execution of these policies, a function that should be left to strictly administrative bodies subject to rotation, recall, limitations of tenure . . . Accordingly, the melding of policy formation with administration placed the institutional emphasis of classical [Marxist] socialism on centralised bodies, indeed, by an ironical twist of historical events, bestowing the privilege of formulating policy on the ‘higher bodies’ of socialist hierarchies and their execution precisely on the more popular ‘revolutionary committees’ below.*” [**Toward an Ecological Society**, pp. 215–6]

13. Why do anarchists reject the Marxist “workers’ state”?

Morrow asserts two “*fundamental*” tenets of “*anarchism*” in his book [Op. Cit., pp. 101–2]. Unfortunately for him, his claims are somewhat at odds with reality. Anarchism, as we will prove in section 14, does not hold one of the positions Morrow states it does. The first “*tenet*” of anarchism he fails to discuss at all and so the reader cannot understand **why** anarchists think as they do. We discuss this “*tenet*” here.

The first tenet is that anarchism “*has consistently refused to recognise the distinction between a bourgeois and a workers’ state. Even in the days of Lenin and Trotsky, anarchism denounced the Soviet Union as an exploiters’ regime.*” [Op. Cit., p. 101] It is due to this, he argues, the CNT co-operated with the bourgeois state:

*“The false anarchist teachings on the nature of the state . . . should logically have led them [the CNT] to refuse governmental participation in any event . . . the anarchists were in the intolerable position of objecting to the necessary administrative co-ordination and centralisation of the work they had already begun. Their anti-statism ‘as such’ had to be thrown off. What **did** remain, to wreck disaster in the end, was their failure to recognise the distinction between a workers’ and a bourgeois state.”* [Op. Cit., p. 101]

Needless to say, Morrow does not bother to explain **why** anarchists consider the bourgeois and workers’ state to be similar. If he did then perhaps his readers would agree with the anarchists on this matter. However, before discussing that we have to address a misrepresentation of Morrow’s. Rather than the expression of anarchist politics, the actions of the CNT were in direct opposition to them. As we showed in the section 12, anarchists see a social revolution in terms of creating federations of workers associations (i.e. workers’ councils). It was this vision that had created the structure of the CNT (as Bakunin had argued, “*the organisation of the trade sections and their representation in the Chambers of Labour . . . bear in themselves the living seeds of the new society which is to replace the old one. They are creating not only the ideas, but also the facts of the future itself*” [Bakunin on Anarchism, p. 255]).

Thus, the social revolution would see the workers’ organisation (be they labour unions or spontaneously created organs) “*tak[ing] the revolution into its own hands . . . an earnest international organisation of workers’ associations . . . [would] replac[e] this departing political world of States and bourgeoisie.*” [The Basic Bakunin, p. 110] This is **precisely** what the CNT did not do — rather it decided against following anarchist theory and instead decided to co-operate with other parties and unions in the “*Central Committee of Anti-Fascist Militias*” (at least temporarily until the CNT stronghold in Saragossa was liberated by CNT militias). In effect, it created a UGT-like “Alliance” with other anti-fascist parties and unions and rejected its pre-war policy of “unity from below.” The CNT and FAI leadership decided not to talk of libertarian communism but only of the fight against fascism. A greater mistake they could not have made.

An anarchist approach in the aftermath of the fascist uprising would have meant replacing the Generalitat with a federal assembly of delegates from workplace and local community assemblies (a Defence Council, to use a CNT expression). Only popular assemblies (not political parties) would be represented (parties would have an influence only in proportion to their influence in the basic assemblies). All the CNT would have had to do was to call a Regional Congress of unions and invite the UGT, independent unions and unorganised workplaces to send delegates to create the framework of this system. This, we must stress, was **not** done. We will discuss why in section 20 and so will refrain from doing so here. However, **because** the CNT in effect “*postponed*” the political aspects of the social revolution (namely, to quote Kropotkin, to “*smash the State and replace it with the Federation [of Communes]*” [No Gods, No Masters, vol. 1, p. 259]) the natural result would be exactly as Morrow explains:

“But isn’t it a far cry from the failure to create the organs to overthrow the bourgeoisie, to the acceptance of the role of class collaboration with the bourgeoisie? Not at all . . . Without developing soviets — workers’ councils — it was inevitable that even the anarchists and the POUM would drift into governmental collaboration with the bourgeoisie.” [Op. Cit., pp. 88–9]

As Kropotkin predicted, “*there can be no half-way house: either the Commune is to be absolutely free to endow itself with whatever institutions it wishes and introduce all reforms and revolutions it may deem necessary, or else it will remain . . . a mere subsidiary of the State, chained in its every movement.*” [Op. Cit., p. 259] Without an alternative means of co-ordinating the struggle, the CNT would, as Morrow argued, have little choice but to collaborate with the state. However, rather than being a product of anarchist theory, as Morrow states, this came about by **ignoring** that theory (see section 20).

This can be seen from the false alternative used to justify the CNT’s and FAI’s actions — namely, “*either libertarian communism, which means anarchist dictatorship, or democracy, which means collaboration.*” The creation of libertarian communism is done **from below** by those subject to capitalist and statist hierarchy overthrowing those with power over them by smashing the state machine and replacing it with self-managed organisations as well as expropriating capital and placing it under workers’ self-management. As Murray Bookchin argues:

“Underlying all [the] errors [of the CNT], at least in theoretical terms, was the CNT-FAI’s absurd notion that if it assumed power in the areas it controlled, it was establishing a ‘State.’ As long as the institutions of power consisted of armed workers and peasants as distinguished from a professional bureaucracy, police force, army, and cabal of politicians and judges, they were no[t] a State . . . These institutions, in fact comprised a revolutionary people in arms . . . not a professional apparatus that could be regarded as a State in any meaningful sense of the term. . . . That the ‘taking of power’ by an armed people in militias, libertarian unions and federations, peasant communes and industrial collectives could be viewed as an ‘anarchist dictatorship’ reveals the incredible confusion that filled the minds of

the 'influential militants.'” [“*Looking Back at Spain,*” pp. 53–96,
The Radical Papers, pp. 86–7]

This perspective explains why anarchists do not see any fundamental difference between a so-called “*workers’ state*” and the existing state. For anarchists, the state is based fundamentally on hierarchical power — the delegation of power into the hands of a few, of a government, of an “*executive*” committee. Unlike Lenin, who stressed the “*bodies of armed men*” aspect of the state, anarchists consider the real question as one of who will tell these “*bodies of armed men*” what to do. Will it be the people as a whole (as expressed through their self-managed organisations) or will be it a government (perhaps elected by representative organisations)?

If it **was** simply a question of consolidating a revolution and its self-defence then there would be no argument:

“But perhaps the truth is simply this: . . . [some] take the expression ‘dictatorship of the proletariat’ to mean simply the revolutionary action of the workers in taking possession of the land and the instruments of labour, and trying to build a society and organise a way of life in which there will be no place for a class that exploits and oppresses the producers.

“Thus constructed, the ‘dictatorship of the proletariat’ would be the effective power of all workers trying to bring down capitalist society and would thus turn into Anarchy as soon as resistance from reactionaries would have ceased and no one can any longer seek to compel the masses by violence to obey and work for him. In which case, the discrepancy between us would be nothing more than a question of semantics. Dictatorship of the proletariat would signify the dictatorship of everyone, which is to say, it would be a dictatorship no longer, just as government by everybody is no longer a government in the authoritarian, historical and practical sense of the word.

“But the real supporters of ‘dictatorship of the proletariat’ do not take that line, as they are making quite plain in Russia. Of course, the proletariat has a hand in this, just as the people has a part to play in democratic regimes, that is to say, to conceal the reality of things. In reality, what we have is the dictatorship of one party, or rather, of one’ party’s leaders: a genuine dictatorship, with its decrees, its penal sanctions, its henchmen and above all its armed forces, which are at present [1919] also deployed in the defence of the revolution against its external enemies, but which will tomorrow be used to impose the dictator’s will upon the workers, to apply a break on revolution, to consolidate the new interests in the process of emerging and protect a new privileged class against the masses.”
[Malatesta, **No Gods, No Masters**, vol. 2, pp. 38–9]

Maurice Brinton sums up the issue well when he argued that “*workers’ power*” “cannot be identified or equated with the power of the Party — as it repeatedly was by the Bolsheviks . . . What ‘taking power’ really implies is that the vast majority of the working class at last realises its ability to manage both

production and society — and organises to this end.” [The Bolsheviks and Workers’ Control, p. xiv]

The question is, therefore, one of **who** “seizes power” — will it be the mass of the population or will it be a party claiming to represent the mass of the population. The difference is vital — and anyone who confuses the issue (like Lenin) does so either out of stupidity or vested interests.

If it **is** the mass of people then they have to express themselves and their power (i.e. the power to manage their own affairs). That requires that individuals — no matter where they are, be it in the workplace, community or on the front line — are part of self-managed organisations. Only by self-management in functional groups can working class people be said to controlling their own lives and determining their own fate. Such a system of popular assemblies and their means of defence would not be a state in the anarchist sense of the word.

As we argued in section 12, the Trotskyist vision of revolution, while seeming in some ways similar to that of anarchists, differ on this question. For Trotskyists, the **party** takes power, **not** the mass of the population directly. Only if you view “*proletarian*” seizure of power in terms of electing a political party to government could you see the elimination of functional democracy in the armed forces and the workplaces as no threat to working class power. Given Trotsky’s actual elimination of democracy in the Red Army and Navy plus his comments on one-man management (and their justifications — see sections 11 and 17) it is clear that Trotskyists consider the workers’ state in terms of party government, **not** self-management, **not** functional direct democracy.

Yes, the Trotskyists do claim that it is the workers, via their soviets, who will elect the government and hold it accountable but such a position fails to realise that a social revolution can only be created from below, by the direct action of the mass of the population. By delegating power into the hands of a few, the revolution is distorted. The initiative and power no longer rests in the hands of the mass of the population and so they can no longer take part in the constructive work of the revolution **and so it will not reflect their interests and needs**. As power flows from the top-down, bureaucratic distortions are inevitable.

Moreover, the government will inevitably clash with its subjects and Trotskyist theory provides the justification for the government imposing its wishes and negating workers’ democracy (see section 12 for evidence for this claim). Moreover, in the centralised state desired by Trotskyists democratic accountability will inevitably suffer as power flows to the top:

“The power of the local soviets passed into the hands of the [National] Executive Committee, the power of the Executive Committee passed into the hands of the Council of People’s Commissars, and finally, the power of the Council of People’s Commissars passed into the hands of the Political Bureau of the Communist Party.” [Murray Bookchin, **Post-Scarcity Anarchism**, p. 152]

Little wonder, then, these CNT aphorisms:

“power corrupts both those who exercise it and those over whom it is exercised; those who think they can conquer the State in order to destroy it are unaware that the State overcomes all its conquerors. . . dictatorship of the proletariat is dictatorship without the

proletariat and against them.” [Peter Marshall, **Demanding the Impossible**, p. 456]

That, in a nut shell, why anarchists consider the workers’ state as no real change from the bourgeois state. Rather than creating a system in which working class people directly manage their own affairs, the workers’ state, like any other state, involves the delegation of that power into the hands of a few. Given that state institutions generate specific social relations, specific relations of authority (namely those order giver and order taker) they cannot help becoming separated from society, becoming a new class based on the state’s bureaucratic machine. Any state structure (particularly a highly centralised one, as desired by Leninists) has a certain independence from society and so serves the interests of those within the State institutions rather than the people as a whole.

Perhaps a Leninist will point to **The State and Revolution** as evidence that Lenin desired a state based round the soviets — workers’ council — and so our comments are unjustified. However, as Marx said, judge people by what they do, not what they say. The first act of the October Revolution was to form an executive power **over** the soviets (although, of course, in theory accountable to their national congress). In **The State and Revolution** Lenin praised Marx’s comment that the Paris Commune was both administrative **and** executive. The “workers’ state” created by Lenin did not follow that model (as Russian anarcho-syndicalists argued in August 1918, “*the Soviet of People’s Commissars [i]s an organ which does not stem from the soviet structure but only interferes with its work*” [**The Anarchists in the Russian Revolution**, p. 118]).

Thus the Bolshevik state was not based around soviet self-management **nor** the fusion of executive and administrative in their hands but rather the use of the soviets to elect a government (a separate executive) which had the real power. The issue is quite simple — either “*All power to the Soviets*” means just that or it means “*All power to the government elected by the Soviets*”. The two are not the same as the first, for the obvious reason that in the second the soviets become simply ratification machines for the government and not organs in which the working masses can run their own affairs. We must also point out that the other promises made in Lenin’s book went the same way as his support for the combining administration and executive tasks in the Paris Commune — and, we stress, all **before** the Civil War started in May 1918 (the usual Trotskyist defence of such betrayals is blame the Civil War which is hard to do as it had not started yet).

So it is unsurprising that Morrow does not explain why anarchists reject the “*dictatorship of the proletariat*” — to do so would be to show that Trotskyism is not the revolutionary movement for workers’ liberty it likes to claim it is. Moreover, it would involve giving an objective account of anarchist theory and admitting that the CNT did not follow its teachings.

14. What is wrong with Morrow’s “*fundamental tenet*” of anarchism?

According to Morrow the “*second fundamental tenet in anarchist teaching*” is, apparently, the following:

“Since Bakunin, the anarchists had accused Marrists of over-estimating the importance of state power, and had characterised this as merely the reflection of the petty-bourgeois intellectuals’ pre-occupation with lucrative administrative posts. Anarchism calls upon workers to turn their backs on the state and seek control of the factories as the real source of power. The ultimate sources of power (property relations) being secured, the state power will collapse, never to be replaced.”

He then sums up by stating the Spanish anarchists *“thus failed to understand that it was only the collapse of state power . . . which had enabled them to seize the factories.”* [Op. Cit., p. 102]

It would be interesting to discover in what work of Bakunin, or any anarchist, such a position could be found. Morrow gives us no references to help us in our quest — hardly surprising as no anarchist (Spanish or otherwise) ever argued this point before July 1936. However, in September 1936, we discover the CNT arguing that the *“withering away of the State is socialism’s ultimate objective. Facts have demonstrated that in practice it is achieved by liquidation of the bourgeois State, brought to a state of asphyxiation by economic expropriation.”* [No Gods, No Masters, vol. 2, p. 261] This, we must note, was the same month the CNT decided to join the Catalan Government! So much for the state having withered away.

However, will soon be made clear, such comments were a revision of anarchist theory brought about by the apparent victory of the CNT on July 19th, 1936 (just as other revisions occurred to justify CNT participation in the state). In other words, Morrow’s *“second fundamental tenet”* does not exist in anarchist theory. To prove this, we will quote Bakunin and a few other famous anarchists as well as giving an overview of some of the insurrections organised by the CNT before 1936. We start with Bakunin, Kropotkin and Malatesta.

Given that Bakunin thought that it was the *“power of the State”* which *“sustains the privileged classes”* against the *“legitimate indignation of the masses of the people”* it is hard to know what Morrow is talking about. [The Political Philosophy of Bakunin, p. 196] Given this perspective, it naturally follows that to abolish capitalism, to allow the seizure of factories by the workers, the state had to be abolished (or *“destroyed”*). Equally clear is that the *“natural and necessary consequence of this destruction will be . . . [among others, the] dissolution of army, magistracy, bureaucracy, police and priesthood. . . confiscation of all productive capital and means of production on behalf of workers’ associations, who are to put them to use . . . the federative Alliance of all working men’s associations . . . will constitute the Commune.”* [Michael Bakunin: Selected Writings p. 253 and p. 170]

Thus, the state has to be abolished in order to ensure that workers’ can take over the means of production, so abolishing capitalism. This is the **direct opposite** of Morrow’s claim that *“[s]ince Bakunin”* anarchism had *“call[ed] upon the workers to turn their backs to the state and seek control of the factories as the real source of power.”* While control of the economy by workers is an important, indeed a key, aspect of a social revolution it is not a sufficient one for anarchists. It must be combined with the destruction of the state (as Bakunin argued, *“[n]o revolution could succeed . . . today unless it was simultaneously a political and a social revolution”* [No Gods, No Masters, vol. 1, p. 141]). As the power of the state *“sustains”* the capitalists it clearly follows that the

capitalist only has his property because the state protects his property claims — without the state, workers' would seize the means of production. Which means, contra Morrow, Bakunin was aware that in order for workers' to take over their workplaces the state had to be destroyed as it was by means of the state that capitalist property rights are enforced.

And, just to stress the obvious, you cannot “*turn your backs on the state*” while dissolving the state bureaucracy, the army, police and so on. This is clear for Bakunin. He argued that “[*l*]iberty can only be created by liberty, by an insurrection of all the people and the voluntary organisation of the workers from below upward.” And the nature of this workers' organisation? Workers' councils — the “*proletariat . . . must enter the International [Workers' Association] en masse, form[ing] factory, artisan, and agrarian sections, and unite them into local federations.*” [**Statism and Anarchy**, p. 179 and p. 49]

Similarly, we discover Kropotkin arguing that “*expropriation*” would occur at the same time as “*the capitalists' power to resist [had] been smashed*” and that “*the authorities*” will be “*overthrown.*” [**No Gods, No Masters**, vol. 1, p. 232 and p. 233] He also recognised the need for self-defence, arguing that the revolution must “*withstand both the attempts to form a government that would seek to strangle it and any onslaughts which may emanate from without.*” [**Op. Cit.**, p. 232] He argued the Commune “*must smash the State and replace it with the Federation and it will act accordingly.*” [**Op. Cit.**, p. 259] You cannot do all this by “*turning your backs*” on the state. To smash the state you need to face it and fight it — there is no other way.

Elsewhere he argued that the commune of the future would base itself on “*the principles of anarchist communism*” and “*entirely abolish . . . property, government, and the state.*” They will “*proclaim and establish their independence by direct socialist revolutionary action, abolishing private property*” when “*governments are swept away by the people . . . the insurgent people will not wait until some new government decrees, in its marvellous wisdom, a few economic reforms.*” Rather, they “*will take possession on the spot and establish their rights by utilising it without delay. They will organise themselves in the workshops to continue the work, but what they will produce will be what is wanted by the masses, not what gives the highest profit to employers. . . they will organise themselves to turn to immediate use the wealth stored up in the towns; they will take possession of it as if it had never been stolen from them by the middle class.*” [**The Commune of Paris**] Note that Kropotkin explicitly states that only **after** “*governments are swept away*” would the “*insurgent people . . . organise themselves in the workshops.*”

As Malatesta noted, the anarchist principles formulated in 1872 at the Congress of St Imier (under the influence of Bakunin, obviously) stated that “[*d*]estruction of all political power is the first duty of the proletariat” who must “*establish solidarity in revolutionary action outside the framework of bourgeois politics.*” He adds, “[*n*]eedless to say, for the delegates of St. Imier as for us and for all anarchists, the abolition of political power is not possible without the simultaneous destruction of economic privilege.” [**Life and Ideas**, pp. 157–8]

Malatesta himself always stressed that revolution required “*the insurrectionary act which sweeps away the material obstacles, the armed forces of the government.*” He argued that “[*o*]nce the government has been overthrown . . . it will be the task of the people . . . to provide for the satisfaction of immediate needs and to prepare for the future by destroying privileges and harmful institutions.”

[Op. Cit., p. 163 and p. 161] In other words, the revolution needs to smash the state and at the same time abolish capitalism by expropriation by the workers.

Thus anarchism is clear on that you need to destroy the state in order to expropriate capital. Morrow's assertions on this are clearly false. Rather than urging "*workers to turn their backs on the state and seek control of the factories as the real source of power*" anarchism calls upon workers to "*overthrow,*" "*smash,*" "*sweep away,*" "*destroy,*" "*dissolve*" the state and its bureaucratic machinery via an "*insurrectionary act*" and expropriate capital **at the same time** — in other words, a popular uprising probably combined with a general strike ("*an excellent means for starting the social revolution,*" in Malatesta's words, but not in itself enough to make "*armed insurrection unnecessary*" [Errico Malatesta, **The Anarchist Reader**, pp. 224–5]).

That, in itself, indicates that Morrow's "*fundamental tenet*" of anarchism does not, in fact, actually exist. In addition, if we look at the history of the CNT during the 1930s we discover that the union organised numerous insurrections which did not, in fact, involve workers "*turning their backs on the state*" but rather attacking the state. For example, in the spontaneous revolt of CNT miners in January 1932, the workers "*seized town halls, raised the black-and-red flags of the CNT, and declared **comunismo libertario.***" In Tarassa, the same year, the workers again "*seiz[ed] town halls*" and the town "*swept by street fighting.*" The revolt in January 1933 began with "*assaults by Anarchist action groups . . . on Barcelona's military barracks . . . Serious fighting occurred in working-class **barrios** and the outlying areas of Barcelona . . . Uprising occurred in Tarassa, Sardanola-Ripollet, Lerida, in several **pueblos** in Valencia province, and in Andalusia.*" In Casas Viejas, as we discussed in section 1, the CNT members surrounded and attacked the barracks of the Civil Guard. In December 1933, the workers "*reared barricades, attacked public buildings, and engaged in heavy street fighting . . . many villages declared libertarian communism.*" [Murray Bookchin, **The Spanish Anarchists**, p. 225, p. 226, p. 227 and p. 238]

Moreover, "*[w]herever possible . . . insurrections had carried out industrial and agrarian take-overs and established committees for workers' and peasant's control, libertarian systems of logistics and distribution — in short, a miniature society 'organised on the lines set down by Kropotkin.'*" [Bookchin, **Op. Cit.**, p. 239]

Now, does all that really sound like workers turning their backs on the state and only seizing control of their factories?

Perhaps it will be argued that Morrow is referring to **after** the insurrection (although he clearly is not). What about the defence of the revolution? Anarchists have always been clear on this too — the revolution would be defended by the people in arms. We have discussed this issue above (in sections 1 and 8 in particular) so we do not need to discuss it in much detail here. We will just provide another quote by Bakunin (although written in 1865, Bakunin made the same points over and over again until his death in 1876):

"While it [the revolution] will be carried out locally everywhere, the revolution will of necessity take a federalist format. Immediately after established government has been overthrown, communes will have to reorganise themselves along revolutionary lines . . . In order to defend the revolution, their volunteers will at the same time form a communal militia. But no commune can defend itself in isolation.

So it will be necessary for each of them to radiate outwards, to raise all its neighbouring communes in revolt . . . and to federate with them for common defence.” [No Gods, No Masters, vol. 1, p. 142]

This was essentially the position agreed by the CNT in May 1936:

“The armed people will be the best guarantee against all attempts to restore the destroyed regime by interior or exterior forces . . . Each Commune should have its arms and elements of defence.” [quoted by Robert Alexander, **The Anarchists in the Spanish Civil War**, vol. 1, p. 64]

Like the CNT with its “*Defence Committees*” the defence of the revolution would rest with the commune and its federation. Thus Morrow’s “*fundamental tenet*” of anarchism does not exist. We have **never** urged the ignoring of the state nor the idea that seizing economic power will eliminate political power by itself. Nor is anarchism against the defence of a revolution. The position of the CNT in May 1936 was identical to that of Bakunin in 1865. The question is, of course, how do you organise a revolution and its defence — is it by the whole people or is it by a party representing that people. Anarchists argue for the former, Trotskyists the latter. Needless to say, a state structure (i.e. a centralised, hierarchical structure based on the delegation of power) is required only when a revolution is seen as rule by a party — little wonder anarchists reject the concept of a “*workers’ state*” as a contradiction in terms.

The question of July 1936 however rears its head. If anarchism **does** stand for insurrection, workers councils and so on, then why did the CNT ignore the state? Surely that suggests anarchism is, as Morrow claims, flawed? No, it does not — as we argue in some detail in section 20 this confuses mistakes by **anarchists** with errors in anarchist theory. The CNT-FAI did not pursue anarchist theory and so July 1936 does not invalidate anarchism. As Bakunin argued, “[*n*]o revolution could succeed . . . unless it was simultaneously a political and a social revolution.” [No Gods, No Masters, vol. 1, p. 141] The revolution of July 1936 was a social revolution (it expropriated capital and revolutionised social relationships across society) but it was not a political revolution — in other words, it did not destroy the state. The CNT refused to do this because of the danger of fascism and fear of isolation (see section 20). Little wonder the social revolution was defeated — the CNT did not apply basic anarchist theory. To dismiss anarchist ideas because they were not applied seems somewhat strange.

To finish this section we must indicate that Morrow’s statement concerning anarchists “*turning our backs*” to the state and concentrating on property actually contradicts both Engels and Lenin.

As Lenin notes in **The State and Revolution**, “*Marx agreed with Proudhon on the necessity of ‘smashing’ the present state machine. . . [there is] similarity between Marxism and anarchism (Proudhon and Bakunin) . . . on this point*” and that anarchists advocate “*the destruction of the state machine.*” [Essential Works of Lenin, p. 310 and p. 358] You can hardly smash the state or destroy the state machine by “*turning your back*” to it. Similarly, Engels argued (although distorting his thought somewhat) that Bakunin saw “*the state as the main evil to be abolished . . . [and] maintains that it is the state which has created capital, that the capitalist has his capital only by the grace of the state . . . [Hence] it is above all the state which must be done away with . . . organise,*

and when ALL workers are won over . . . abolish the state and replace it with the organisation of the International.” [The Marx-Engels Reader, pp. 728–9] You cannot “abolish” and “replace” the state by ignoring it (“turning your back to it”). We must also stress that Engels comments disprove Lenin’s assertion that anarchists “have absolutely no clear idea of *what* the proletariat will put in its [the states] place.” [Op. Cit., p. 358] We have always been clear, namely a federation of workers’ associations (this was the organisation of the First International). In other, more modern, words, a system of workers’ councils — a position Marxists only embraced six decades later when Lenin advocated them as the basis of his “workers’ state.”

Thus Morrow’s comments against anarchism are in contradiction to usual Marxist claims against anarchism (namely, that we seek to smash the state but do not understand that the workers’ state is necessary to abolish capitalism). Indeed, Engels attributed the opposite idea to Bakunin that Morrow implies anarchists think with regards to property — namely the idea that the capitalist has his property because of the state. Morrow’s “*fundamental tenet*” of anarchism not only does not exist in anarchist theory, it does not even exist in the Marxist critique of that theory! It is impressive enough to assign a false doctrine to your enemies, it takes real ability to make a claim which contradicts your own theory’s assertions!

15. Did Spanish Anarchism aim for the creation of “*collectives*” before the revolution?

The formation of the worker-managed enterprises called “*collectives*” in the Spanish revolution of 1936 has sometimes led people (particularly Marxists) to misconceptions about anarcho-syndicalist and communist-anarchist theory. These comments by a Marxist-Leninist are typical:

“Spanish anarchists believed that a system of autonomous collectives, with the weakest possible connections between them, was the alternative to capitalism and also to the Marxist view of society running the entire economy as one whole.”

And:

“The anarchist theory led to the ordinary anarchist considering each factory as owned simply by the workers that laboured there, and not by the working class as a whole.” [Joseph Green, “The Black Autonomy Collective and the Spanish Civil War”, **Communist Voice** no. 10, Vol. 2, no. 5, Oct. 1, 1996]

This assertion is sometimes voiced by Libertarian Marxists of the council communist tendency (who should know better):

“At the time of the Civil War, a popular idea amongst the Spanish working class and peasants was that each factory, area of land, etc., should be owned collectively by its workers, and that these ‘collectives’ should be linked with each other on a ‘federal’ basis — that is, without any superior central authority.

“This basic idea had been propagated by anarchists in Spain for more than 50 years. When the Civil War began, peasants and working class people in those parts of the country which had not immediately fallen under fascist control seized the opportunity to turn anarchist ideal into reality.” [“Anarchism and the Spanish ‘Revolution’”, **Subversion** no. 18]

Trotskyist Felix Morrow also presents a similar analysis when he states that the POUM “recorded the tendency of CNT unions to treat collectivised property as their own. It never attacked the anarcho-syndicalist theories which created the tendency.” [Op. Cit., p. 104]

However, the truth of the matter is somewhat different.

Firstly, as will soon become clear, CNT policy and anarchist theory was **not** in favour of workers’ owning their individual workplaces. Instead both argued for **socialisation** of the means of life by a system of federations of workers’ assemblies. Individual workplaces would be managed by their workers but they would not exist in isolation or independently of the others — they would be members of various federations (minimally an industrial one and one which united all workplaces regardless of industry in a geographical area). These would facilitate co-ordination and co-operation between self-managed workplaces. The workplace would, indeed, be autonomous but such autonomy did not negate the need for federal organs of co-ordination nor did federation negate that autonomy (as we will discuss later in section 18, autonomy means the ability to make agreements with others and so joining a federation is an expression of autonomy and not necessarily its abandonment, it depends on the nature of the federation).

Secondly, rather than being the product of “more than 50 years” of anarchist propaganda or of “anarcho-syndicalist theories”, the “collectives” instituted during the Civil War were seen by the CNT as merely a temporary stop-gap. They had not been advocated in the CNT’s pre-Civil War program, but came into existence precisely because the CNT was unable to carry out its libertarian communist program, which would have required setting up workers congresses and federal councils to establish co-ordination and aid the planning of common activities between the self-managed workplaces. In other words, the idea of self-managed workplaces was seen as one step in a process of socialisation, the basic building block of a federal structure of workers’ councils. They were **not** seen as an end in themselves no matter how important they were as the base of a socialised economy.

Thus the CNT had never proposed that factories or other facilities would be owned by the people who happened to work there. The CNT’s program called for the construction of “libertarian communism.” This was the CNT’s agreed goal, recognising it must be freely created from below. In addition, the Spanish Anarchists argued for “free experimentation, free show of initiative and suggestions, as well as the freedom of organisation,” recognising that “[i]n each locality the degree of [libertarian] communism, collectivism or mutualism will depend on conditions prevailing. Why dictate rules? We who make freedom our banner, cannot deny it in economy.” [D. A. de Santillan, **After the Revolution**, p. 97] In other words, the CNT recognised that libertarian communism would not be created overnight and different areas will develop at different speeds and in different directions depending on the material circumstances they faced and what their population desired.

However, libertarian communism was the CNTs declared goal. This meant that the CNT aimed for a situation where the economy as a whole would be socialised and **not** an mutualist economy consisting independent co-operatives owned and controlled by their workers (with the producers operating totally independently of each other on the basis of market exchange). Instead, workers would manage their workplace directly, but would not own it — rather ownership would rest with society as a whole but the day-to-day management of the means of production would be delegated to those who did the actual work. Councils of workers' delegates, mandated by and accountable to workplace assemblies, would be created to co-ordinate activity at all levels of the economy.

A few quotes will be needed to show that this was, in fact, the position of the Spanish Anarchists. According to Issac Puente, the *“national federations will hold as common property all the roads, railways, buildings, equipment, machinery and workshops.”* The village commune *“will federate with its counterparts in other localities and with the national industrial federations.”* [**Libertarian Communism**, p. 29 and p. 26] In D. A. de Santillan's vision, libertarian communism would see workers' councils overseeing 18 industrial sectors. There would also be *“councils of the economy”* for local, regional and national levels (ultimately, international as well). [**Op. Cit.**, pp. 50–1 and pp. 80–7] These councils would be *“constitute[d] by delegations or through assemblies”* and *“receives [their] orientation from below and operates in accordance with the resolutions”* of their appropriate *“assemblies.”* [**Op. Cit.**, p. 83 and p. 86]

The CNT's national conference in Saragossa during May 1936 stressed this vision. Its resolution declared that the revolution would abolish *“private property, the State, the principle of authority, and . . . classes.”* It argued that *“the economic plan of organisation, throughout national production, will adjust to the strictest principles of social economy, directly administered by the producers through their various organs of production, designated in general assemblies of the various organisations, and always controlled by them.”* In urban areas, *“the workshop or factory council”* would make *“pacts with other labour centres”* via *“Councils of Statistics and Production”* which are the *“organ of relations of Union to Union (association of producers)”*, in other words, workers' councils. These would *“federate among themselves, forming a network of constant and close relations among all the producers of the Iberian Confederation.”* In rural areas, *“the producers of the Commune”* would create a *“Council of Cultivation”* which would *“establish the same network of relations as the Workshop, Factory Councils and those of Production and Statistics, complementing the free federation represented by the Commune.”*

The resolution argues that *“[b]oth the Associations of industrial producers and Associations of agricultural producers will federate nationally”* and *“Communes will federate on a county and regional basis . . . Together these Communes will constitute an Iberian Confederation of Autonomous Libertarian Communes.”* Being anarchists, the CNT stressed that *“[n]one of these organs will have executive or bureaucratic character”* and their members *“will carry out their mission as producers, meeting after the work day to discuss questions of details which don't require the decision of the communal assemblies.”* The assemblies themselves *“will meet as often as needed by the interests of the Commune. . . . When problems are dealt with which affect a country or province, it must be the Federations which deliberate, and in the meetings and assemblies all Communities will be represented and the delegates will bring points of view previously agreed upon”*

by the Commune assembly. [quoted by Robert Alexander, **The Anarchists in the Spanish Revolution**, vol. 1, p. 59, p. 60 and p. 62]

Joan Ferrer, a bookkeeper who was the secretary of the CNT commercial workers union in Barcelona, explained this vision:

“It was our idea in the CNT that everything should start from the worker, not — as with the Communists — that everything should be run by the state. To this end we wanted to set up industrial federations — textiles, metal-working, department stores, etc. — which would be represented on an overall Economics Council which would direct the economy. Everything, including economic planning, would thus remain in the hands of the workers.” [quoted by Ronald Fraser, **Blood of Spain**, p. 180]

However, social revolution is a dynamic process and things rarely develop exactly as predicted or hoped in pre-revolutionary times. The “collectives” in Spain are an example of this. Although the regional union conferences in Catalonia had put off overthrowing the government in July of 1936, workers began taking over the management of industries as soon as the street-fighting had died down. The initiative for this did not come from the higher bodies — the regional and national committees — but from the rank-and-file activists in the local unions. In some cases this happened because the top management of the enterprise had fled and it was necessary for the workers to take over if production was to continue. But in many cases the local union militants decided to take advantage of the situation to end wage labour by creating self-managed workplaces.

As to be expected of a real movement, mistakes were made by those involved and the development of the movement reflected the real problems the workers faced and their general level of consciousness and what they wanted. This is natural and to denounce such developments in favour of ideal solutions means to misunderstand the dynamic of a revolutionary situation. In the words of Malatesta:

“To organise a [libertarian] communist society on a large scale it would be necessary to transform all economic life radically, such as methods of production, of exchange and consumption; and all this could not be achieved other than gradually, as the objective circumstances permitted and to the extent that the masses understood what advantages could be gained and were able to act for themselves.” [**Life and Ideas**, p. 36]

This was the situation in revolutionary Spain. Moreover, the situation was complicated by the continued existence of the bourgeois state. As Gaston Leval, in his justly famous study of the collectives, states *“it was not . . . true socialisation, but . . . a self-management straddling capitalism and socialism, which we maintain would not have occurred had the Revolution been able to extend itself fully under the direction of our syndicates.”* [Gaston Leval, **Collectives in the Spanish Revolution**, p. 227–8] Leval in fact terms it *“a form of workers neo-capitalism”* but such a description is inaccurate (and unfortunate) simply because wage labour had been abolished and so it was not a form of capitalism

— rather it was a form of mutualism, of workers' co-operatives exchanging the product of their labour on the market.

However, Leval basic argument was correct — due to the fact the political aspect of the revolution (the abolition of the state) had been “postponed” until after the defeat of fascism, the economic aspects of the revolution would also remain incomplete. The unions that had seized workplaces were confronted with a dilemma. They had control of their individual workplaces, but the original libertarian plan for economic co-ordination was precluded by the continued existence of the State. It was in this context of a partial revolution, under attack by the counter-revolution, that the idea of “collectives” was first put forward to solve some of the problems facing the workers and their self-managed workplaces. Unfortunately, this very “solution” caused problems of its own. For example, Gaston Leval indicates that the collectivisation decree of October 1936 “*legalising collectivisation*”, “*distorted everything right from the start*” [Op. Cit., p. 227] and did not allow the collectives to develop beyond a mutualist condition into full libertarian communism. It basically legalised the existing situation while hindering its development towards libertarian communism by undermining union control.

This dilemma of self-managed individual workplaces and lack of federations to co-ordinate them was debated at a CNT union plenary in September of 1936. The idea of converting the worker-managed workplaces into co-operatives, operating in a market economy, had never been advocated by the Spanish anarchists before the Civil War, but was now seen by some as a temporary stop-gap that would solve the immediate question of what to do with the workplaces that had been seized by the workers. It was at this meeting that the term “*collective*” was first adopted to describe this solution. This concept of “*collectivisation*” was suggested by Joan Fabregas, a Catalan nationalist of middle class origin who had joined the CNT after July of 1936. As one CNT militant recalled:

“Up to that moment, I had never heard of collectivisation as a solution for industry — the department stores were being run by the union. What the new system meant was that each collectivised firm would retain its individual character, but with the ultimate objective of federating all enterprises within the same industry.” [quoted by Ronald Fraser, **Blood of Spain**, p. 212]

However, a number of unions went beyond “collectivisation” and took over all the facilities in their industries, eliminating competition between separate firms. The many small barber and beauty shops in Barcelona were shut down and replaced with large neighbourhood haircutting centres, run through the assemblies of the CNT barbers' union. The CNT bakers union did something similar. The CNT Wood Industry Union shut down the many small cabinet-making shops, where conditions were often dangerous and unhealthy. They were replaced with two large factories, which included new facilities for the benefit of the workforce, such as a large swimming pool.

The union ran the entire industry, from the felling of timber in the Val d'Aran to the furniture showrooms in Barcelona. The railway, maritime shipping and water, gas and electric industry unions also pursued this strategy of industrial unification, as did the textile union in the industrial town of Badalona, outside Barcelona. This was considered to be a step in the direction of eventual socialisation.

At the Catalan union plenary of September, 1936, “*the bigger, more powerful unions, like the woodworkers, the transport workers, the public entertainment union, all of which had already socialised [i.e. unified their industries under union management], wanted to extend their solution to the rest of industry. The smaller, weaker unions wanted to form co-operatives. . .*” [Fraser, **Op. Cit.**, p. 212]

The collectives came out of this conflict and discussion as a sort of “middle ground” — however, it should be stressed that it did not stop many unions from ignoring the Catalan’s governments’ attempt to legalise (and so control) the collectives (the so-called “*collectivisation*” decree) as far as they could. As Albert Perez-Baro, a Catalan Civil Servant noted, “*the CNT . . . pursued its own, unilateral objectives which were different. Syndical collectivisation or syndicalised collectives, I would call those objectives; that’s to say, collectives run by their respective unions . . . The CNT’s policy was thus not the same as that pursued by the decree.*” [quoted by Fraser, **Op. Cit.**, pp. 212–3] Indeed, Abad de Santillan stated later that he “*was an enemy of the decree because I considered it premature . . . When I became [economics] councillor [of the Generalitat for the CNT], I had no intention of taking into account of carrying out the decree; I intended to allow our great people to carry on the task as they saw fit, according to their own aspiration.*” [quoted, **Op. Cit.**, p. 212f]

Therefore, when Leninist Joseph Green argues the initial collectivisation of workplaces “*was the masses starting to take things into their own hands, and they showed that they could continue production in their workplaces . . . The taking over of the individual workplaces and communities is one step in a revolutionary process. But there is yet more that must be done — the workplaces and communities must be integrated into an overall economy*” he is just showing his ignorance. The CNT, despite Green’s assertions to the contrary, were well aware that the initial collectivisations were just one step in the revolution and were acting appropriately. It takes some gall (or extreme ignorance) to claim that CNT theory, policy and actions were, in fact, the exact opposite of what they were. Similarly, when he argues “*[h]ow did the anarchists relate the various workplace collectives to each other in Barcelona? . . . they made use of a patchwork system including a Central Labour Bank, an Economic Council, credit . . .*” he strangely fails to mention the socialisation attempts made by many CNT industrial unions during the revolution, attempts which reflected pre-war CNT policy. But such facts would get in the way of a political diatribe and so are ignored. [Green, **Op. Cit.**]

Green continues his inaccurate diatribe by arguing that:

“The problem is that, saddled with their false theory, they could not understand the real nature of the economic steps taken in the collectives, and thus they could not deal with the economic relations that arose among the collectives.” [**Op. Cit.**]

However, the only thing false about this is the false assertions concerning anarchist theory. As is crystal clear from our comments above, the Spanish anarchists (like all anarchists) were well aware of the need for economic relations between collectives (self-managed workplaces) before the revolution and acted to create them during it. These were the industrial federations and federations of rural communities/collectives predicted in anarchist and CNT theory and actually created, in part at least, during the revolution itself.

Thus Green's "*critique*" of anarchism is, in fact, **exactly** what anarchist theory actually argues and what the Spanish anarchists themselves argued and tried to implement in all industries. Of course, there are fundamental differences between the anarchist vision of socialisation and the Leninist vision of Nationalisation but this does not mean that anarchism is blind to the necessity of integrating workplaces and communities into a coherent system of federations of workers' councils (as proven above). However, such federation has two sources — it is either imposed from above or agreed to from below. Anarchists choose the former as the latter negates any claim that a revolution is a popular, mass movement from below (and, incidentally, the Leninist claim that the "*workers' state*" is simply a tool of the workers to defeat capitalist oppression).

The actual process in Spain towards industrial federations and so socialisation was dependent on the wishes of the workers involved — as would be expected in a true social revolution. For example, the department stores were collectivised and an attempt to federate the stores failed. The works councils opposed it, considering the enterprises as their own and were unwilling to join a federation — the general assemblies of the collectives agreed. Joan Ferrer, the secretary of the CNT commercial union, considered it natural as "[o]nly a few months before, the traditional relationship between employer and worker had been overthrown. Now the workers were being asked to make a new leap — to the concept of collective ownership. It was asking a lot to expect the latter to happen overnight." [quoted by Fraser, **Op. Cit.**, p. 220]

However, before Leninists like Green rush in and assert that this proves that "*anarchist theory led to the ordinary anarchist considering each factory as owned simply by the workers that laboured there*" we should point out two things. Firstly, it was the "*ordinary anarchists*" who were trying to organise socialisation (i.e. CNT members and militants). Secondly, the Russian Revolution also saw workers taking over their workplaces and treating them as their own property. Leninists like Green would have a fit if we took these examples to "prove" that Leninism "*led to the ordinary Bolshevik worker considering each factory as owned simply by the workers that laboured there*" (which was what the Mensheviks **did** argue in 1917 when Martov "*blamed the Bolsheviks for creating the local, particularistic attitudes prevailing among the masses.*" [Samuel Farber, **Before Stalinism**, p. 72]). In other words, such events are a natural part of the process of a revolution and are to be expected regardless of the dominant theory in that revolution.

To summarise.

The Spanish revolution does confirm anarchist theory and in no way contradicts it. While many of the aspects of the collectives were in accord with pre-war CNT policy and anarchist theory, other aspects of them were in contradiction to them. This was seen by the militants of the CNT and FAI who worked to transform these spontaneously created organs of economic self-management into parts of a socialised economy as required for libertarian communism. Such a transformation flowed from below and was not imposed from above, as would be expected in a libertarian social revolution.

As can be seen, the standard Marxist account of the collectives and its relationship to anarchist theory and CNT policy is simply wrong.

16. How does the development of the collectives indicate the differences between Bolshevism and anarchism?

As argued in the last section, the collectives formed during the Spanish Revolution reflected certain aspects of anarchist theory but not others. They were a compromise solution brought upon by the development of the revolution and did not, as such, reflect CNT or anarchist theory or vision bar being self-managed by their workers. The militants of the CNT and FAI tried to convince their members to federate together and truly socialise the economy, with various degrees of success. A similar process occurred during the Russian Revolution of 1917. There workers created factory committees which tried to introduce workers' self-management of production. The differences in outcome in these two experiences and the actions of the Bolsheviks and anarchists indicate well the fundamental differences between the two philosophies. In this section we discuss the contrasting solutions pursued by the CNT and the Bolsheviks in their respective revolutions.

The simple fact is that revolutions are complex and dynamic processes which involve many contradictory developments. The question is how do you push them forward — either from below or from above. Both the Spanish and the Russian revolution were marked by “localism” — when the workers in a factory consider it their own property and ignore wider issues and organisation.

Lenin and the Bolsheviks “solved” the problem of localism by eliminating workers' self-management in favour of one-man management appointed from above. Attempts by the workers and factory committees themselves to combat localism were stopped by the Bolshevik dominated trade unions which “*prevented the convocation of a planned All-Russian Congress of Factory Committees*” in November 1917 when “*called upon*” by the Bolsheviks “*to render a special serve to the nascent Soviet State and to discipline the Factory Committees.*” [I. Deutscher, quoted by Maurice Brinton, **The Bolsheviks and Workers' Control**, p. 19] Instead, the Bolsheviks built from the top-down their system of “*unified administration*” based on converting the Tsarist system of central bodies which governed and regulated certain industries during the war. [Brinton, **Op. Cit.**, p. 36] The CNT, in comparison, tried to solve the problem of localism by a process of discussion and debate from below. Both were aware of the fact the revolution was progressing in ways different from their desired goal but their solution reflected their different politics — libertarian in the case of the CNT, authoritarian in the case of Bolshevism.

Therefore, the actual economic aspects of the Spanish revolution reflected the various degrees of political development in each workplace and industry. Some industries socialised according to the CNT's pre-war vision of libertarian communism, others remained at the level of self-managed workplaces in spite of the theories of the union and anarchists. This was the case with other aspects of the collectives. As Vernon Richards points out, “*[i]n some factories . . . the profits or income were shared out among the workers . . . As a result, wages fluctuated in different factories and even within the same industry . . . But fortunately . . . the injustice of this form of collectivisation was recognised and combated by the CNT syndicates from the beginning.*” [**Lessons of the Spanish Revolution**, pp. 106-7]

Thus the collectives, rather than expressing the economic vision of communist-anarchism or anarcho-syndicalism, came into existence precisely because the CNT was unable to carry out its libertarian communist program, which would have required setting up workers congresses and co-ordinating councils to establish common ownership and society wide self-management. To assert that the collectives were an exact reflection of anarchist or anarcho-syndicalist theory is, therefore, incorrect. Rather, they reflected certain aspects of that theory (such as workers' self-management in the workplace) while others (industrial federations to co-ordinate economic activity, for example) were only partially met. This, we must stress, is to be expected as a revolution is a **process** and not an event. As Kropotkin argued:

"It is a whole insurrectionary period of three, four, perhaps five years that we must traverse to accomplish our revolution in the property system and in social organisation." [Words of a Rebel, p. 72]

Thus the divergence of the actual revolution from the program of the CNT was to be expected and so did not represent a failure or a feature of anarchist or anarcho-syndicalist theory as Morrow and other Marxists assert. Rather, it expresses the nature of a social revolution, a movement from below which, by its very nature, reflects real needs and problems and subject to change via discussion and debate. Bakunin's comments stress this aspect of the revolution:

"I do not say that the peasants [and workers], freely organised from the bottom up, will miraculously create an ideal organisation, confirming in all respects to our dreams. But I am convinced that what they construct will be living and vibrant, a thousands times better and more just than any existing organisation. Moreover, this ... organisation, being on the one hand open to revolutionary propaganda ... , and on the other, not petrified by the intervention of the State ... will develop and perfect itself through free experimentation as fully as one can reasonably expect in our times.

"With the abolition of the State, the spontaneous self-organisation of popular life ... will revert to the communes. The development of each commune will take its point of departure the actual condition of its civilisation ... " [Bakunin on Anarchism, p. 207]

To **impose** an "*ideal*" solution would destroy a revolution — the actions and decisions (**including what others may consider mistakes**) of a free people are infinitely more productive and useful than the decisions and decrees of the best central committee. Moreover, a centralised system by necessity is an imposed system (as it excludes by its very nature the participation of the mass of the people in determining their own fate). As Bakunin argued, "*Collectivism could be imposed only on slaves, and this kind of collectivism would then be the negation of humanity. In a free community, collectivism can come about only through the pressure of circumstances, not by imposition from above but by a free spontaneous movement from below.*" [Op. Cit., p. 200] Thus socialisation must proceed from below, reflecting the real development and desires of those involved. To "*speed-up*" the process via centralisation can only result in replacing socialisation with nationalisation and the elimination of workers' self-management with hierarchical management. Workers' again would be reduced

to the level of order-takers, with control over their workplaces resting not in their hands but in those of the state.

Lenin argued that “*Communism requires and presupposes the greatest possible centralisation of large-scale production throughout the country. The all-Russian centre, therefore, should definitely be given the right of direct control over all the enterprises of the given branch of industry. The regional centres define their functions depending on local conditions of life, etc., in accordance with the general production directions and decisions of the centre.*” He continued by explicitly arguing that “[t]o deprive the all-Russia centre of the right to direct control over all the enterprises of the given industry . . . would be regional anarcho-syndicalism, and not communism.” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 292]

We expect that Morrow would subscribe to this “*solution*” to the problems of a social revolution generates. However, such a system has its own problems.

First is the basic fallacy that the centre will not start to view the whole economy as its property (and being centralised, such a body would be difficult to effectively control). Indeed, Stalin’s power was derived from the state bureaucracy which ran the economy in its own interests. Not that it suddenly arose with Stalin. It was a feature of the Soviet system from the start. Samuel Farber, for example, notes that, “*in practice, [the] hypercentralisation [pursued by the Bolsheviks from early 1918 onwards] turned into infighting and scrambles for control among competing bureaucracies*” and he points to the “*not untypical example of a small condensed milk plant with few than 15 workers that became the object of a drawn-out competition among six organisations including the Supreme Council of National Economy, the Council of People’s Commissars of the Northern Region, the Vologda Council of People’s Commissars, and the Petrograd Food Commissariat.*” [Op. Cit., p. 73] In other words, centralised bodies are not immune to viewing resources as their own property (and compared to an individual workplace, the state’s power to enforce its viewpoint against the rest of society is considerably stronger).

Secondly, to eliminate the dangers of workers’ self-management generating “*propertarian*” notions, the workers’ have to have their control over their workplace reduced, if not eliminated. This, by necessity, generates **bourgeois** social relationships and, equally, appointment of managers from above (which the Bolsheviks did embrace). Indeed, by 1920 Lenin was boasting that in 1918 he had “*pointed out the necessity of recognising the dictatorial authority of single individuals for the pursue of carrying out the Soviet idea*” and even claimed that at that stage “*there were no disputes in connection with the question*” of one-man management. [quoted by Brinton, Op. Cit., p. 65] While the first claim is true (Lenin argued for one-man management appointed from above **before** the start of the Civil War in May 1918) the latter one is **not** true (excluding anarchists and anarcho-syndicalists, there were also the dissent Left-Communists in the Bolshevik party itself).

Thirdly, a centralised body effectively excludes the mass participation of the mass of workers — power rests in the hands of a few people which, by its nature, generates bureaucratic rule. This can be seen from the example of Lenin’s Russia. The central bodies the Bolsheviks created had little knowledge of the local situation and often gave orders that contradicted each other or had little bearing to reality, so encouraging factories to ignore the centre. In other words the government’s attempts to centralise actually led to localism (as well

as economic mismanagement)! Perhaps this was what Green means when he argues for a “*new centralism*” which would be “*compatible with and requiring the initiative of the workers at the base*” [Green **Op. Cit.**] — that is, the initiative of the workers to ignore the central bodies and keep the economy going **in spite** of the “*new centralism*”?

The simple fact is, a socialist society **must** be created from below, by the working class itself. If the workers do not know how to create the necessary conditions for a socialist organisation of labour, no one else can do it for them or compel them to do it. If the state is used to combat “localism” and such things then it obviously cannot be in the hands of the workers’ themselves. Socialism can only be created by workers’ own actions and organisations otherwise it will not be set up at all — something else will be, namely state capitalism.

Thus, a close look at Lenin’s “*solution*” indicates that Trotskyist claim that their state is the “*tool of the majority in their fight against exploitation by the few*” (to use Joseph Green’s words) is refuted by their assertion that this state will also bring the economy under centralised control and by the actions of the Bolsheviks themselves.

Why is this? Simply because **if** the mass of collectives are not interested in equality and mutual aid in society as a whole then how can the government actually be the “*tool*” of the majority when it imposes such “*mutual aid*” and “*equality*” upon the collectives? In other words, the interests of the government replace those of the majority. After all, if workers **did** favour mutual aid and equality then they would federate themselves to achieve it. (which the collectives were actually doing all across Spain, we must note). If they do not do this then how can the “*workers’ state*” be said to be simply their tool when it has to **impose** the appropriate economic structure upon them? The government is elected by the whole people, so it will be claimed, and so must be their tool. This is obviously flawed — “*if,*” argued Malatesta, “*you consider these worthy electors as unable to look after their own interests themselves, how is it that they will know how to choose for themselves the shepherds who must guide them? And how will they be able to solve this problem of social alchemy, of producing a genius from the votes of a mass of fools? And what will happen to the minorities which are still the most intelligent, most active and radical part of a society?*” [Malatesta, **Anarchy**, p. 53]

What does all this mean? Simply that Trotskyists recognise, implicitly at least, that the workers’ state is not, in fact, the simple tool of the workers. Rather, it is the means by which “*socialism*” will be imposed upon the workers by the party. If workers do not practice mutual aid and federation in their day-to-day running of their lives, then how can the state impose it if it is simply their tool? It suggests what is desired “*by all of the working people as a whole*” (nearly always a euphemism for the party in Trotskyist ideology) is different that what they actually want (as expressed by their actions). In other words, a conflict exists between the workers’ and the so-called “*workers’ state*” — in Russia, the party imposed **its** concept of the interests of the working class, even against the working class itself.

Rather than indicate some kind of failure of anarchist theory, the experience of workers’ self-management in both Spain and Russia indicate the authoritarian core of Trotskyist ideology. If workers do not practice mutual aid or federation then a state claiming to represent them, to be simply their tool, cannot force them to do so without exposing itself as being an alien body with power **over**

the workers.

For these reasons Bakunin was correct to argue that anarchists have “no faith except in freedom. Both [Marxists and anarchists], equally supporters of science which is to destroy superstition and replace belief, differ in the former wishing to impose it, and the latter striving to propagate it; so human groups, convinced of its truth, may organise and federate spontaneously, freely, from the bottom up, by their own momentum according to their real interests, but never according to any plan laid down in advance and imposed upon the **ignorant masses** by some superior intellects.” Anarchists, he continues, “think that there is much more practical and intellectual common sense in the instinctive aspirations and in the real needs of the mass of the people than in the profound intelligence of all these doctors and teachers of mankind who, after so many fruitless attempts to make humanity happy, still aspire to add their own efforts.” [Michael Bakunin: **Selected Writings**, p. 198]

In summary, the problem of “localism” and any other problems faced by a social revolution will be solved in the interests of the working class only if working class people solve them themselves. For this to happen it requires working class people to manage their own affairs directly and that implies self-managed organising from the bottom up (i.e. anarchism) rather than delegating power to a minority at the top, to a “revolutionary” party or government. This applies economically, socially and politically. As Bakunin argued, the “*revolution should not only be made for the people’s sake; it should also be made by the people.*” [No Gods, No Masters, vol. 1, p. 141]

Thus the actual experience of the collectives and their development, rather than refuting anarchism, indicates well that it is the only real form of socialism. Attempts to nationalise the means of production inevitably disempower workers and eliminate meaningful workers’ self-management or control. It does not eliminate wage labour but rather changes the name of the boss. Socialism can only be built from below. If it is not, as the Russian experience indicated, then state capitalism will be the inevitable outcome.

17. Why is Morrow’s support for “*proletarian methods of production*” ironic?

Morrow states “[i]n the midst of civil war the factory committees are demonstrating the superiority of proletarian methods of production.” [Op. Cit., p. 53] This is ironic as the Bolsheviks in power fought against the factory committees and their attempts to introduce the kind of workers’ self-management Morrow praises in Spain (see Maurice Brinton’s **The Bolsheviks and Workers’ Control** for details). Moreover, rather than seeing workers’ self-management as “*proletarian methods of production*” Lenin and Trotsky thought that how a workplace was managed was irrelevant under socialism. Trotsky argued that “[i]t would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy of the collective will of the workers [a euphemism for the Party — M.B.] and not at all in the form in which individual economic organisations are administered.” Indeed, “I consider

if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully.” [quoted by Maurice Brinton, **Op. Cit.**, p. 66 and pp. 66–7]

In other words, Trotsky both in theory and in practice opposed “*proletarian methods of production*” — and if the regime introduced by Trotsky and Lenin in Russia was **not** based on “*proletarian methods of production*” then what methods was it based on? One-man management with “*the appointment of individuals, dictators with unlimited powers*” by the government and “*the people unquestioningly obey[ing] the single will of the leaders of labour.*” [**The Immediate Tasks of the Soviet Government**, p. 32 and p. 34] In other words, the usual **bourgeois** methods of production with the workers’ doing what the boss tells them. At no time did the Bolsheviks support the kind of workers’ self-management introduced by the anarchist influenced workers of Spain — indeed they hindered it and replaced it with one-man management at the first opportunity (see Maurice Brinton’s classic **The Bolsheviks and Workers’ Control** for details).

To point out the obvious, bourgeois methods of production means bourgeois social relations and relations of production. In other words, Morrow comments allows us to see that Lenin and Trotsky’s regime was not proletarian at the point of production. How ironic. And if it was not proletarian at the point of production (i.e. at the source of **economic** power) how could it remain proletarian at the political level? Unsurprisingly, it did not — party power soon replaced workers’ power and the state bureaucracy replaced the party.

Yet again Morrow’s book exposes the anti-revolutionary politics of Trotskyism by allowing anarchists to show the divergence between the rhetoric of that movement and what it did when it was in power. Morrow, faced with a workers’ movement influenced by anarchism, inadvertently indicates the poverty of Trotskyism when he praises the accomplishments of that movement. The reality of Leninism in power was that it eliminated the very things Morrow praises — such as “*proletarian methods of production,*” democratic militias, workers’ councils and so on. Needless to say, the irony of Morrow’s work is lost on most of the Trotskyists who read it.

18. Were the federations of collectives an “*abandonment*” of anarchist ideas?

From our discussion in section 15, it is clear that anarchism does not deny the need for co-ordination and joint activity, for federations of self-managed workplaces, industries and rural collectives at all levels of society. Far from it. As proven in sections 12 and 15, such federations are a basic idea of anarchism. In anarchy co-ordination flows **from below** and not imposed by a few from above. Unfortunately Marxists cannot tell the difference between solidarity from below and unity imposed from above. Morrow, for example, argues that “*the anarchist majority in the Council of Aragon led in practice to the abandonment of the anarchist theory of the autonomy of economic administration. The Council acted as a centralising agency.*” [**Op. Cit.**, pp. 205–6]

Of course it does nothing of the kind. Yes, anarchists are in favour of autonomy — including the autonomy of economic administration. We are also in favour of federalism to co-ordinate joint activity and promote co-operation on a wide-scale (what Morrow would, inaccurately, call “*centralism*” or “*centralisation*”). Rather than seeing such agreements of joint activity as the “*abandonment*” of autonomy, we see it as an **expression** of that autonomy. It would be a strange form of “*freedom*” that suggested making arrangements and agreements with others meant a restriction of your liberty. For example, no one would argue that to arrange to meet your friend at a certain place and time meant the elimination of your autonomy even though it obviously reduces your “*liberty*” to be somewhere else at the same time.

Similarly, when an individual joins a group and takes part in its collective decisions and abides by their decisions, this does not represent the abandonment of their autonomy. Rather, it is an expression of their freedom. If we took Morrow’s comment seriously then anarchists would be against all forms of organisation and association as they would mean the “*abandonment of autonomy*” (of course some Marxists **do** make that claim, but such a position indicates an essentially **negative** viewpoint of liberty, a position they normally reject). In reality, of course, anarchists are aware that freedom is impossible outside of association. Within an association absolute “*autonomy*” cannot exist, but such “*autonomy*” would restrict freedom to such a degree that it would be so self-defeating as to make a mockery of the concept of autonomy and no sane person would seek it.

Of course anarchists are aware that even the best association could turn into a bureaucracy that **does** restrict freedom. Any organisation could transform from being an expression of liberty into a bureaucratic structure which restricts liberty because power concentrates at the top, into the hands of an elite. That is why we propose specific forms of organisation, ones based on self-management, decentralisation and federalism which promote decision-making from the bottom-up and ensure that the organisation remains in the hands of its members and its policies are agreements between them rather than ones imposed upon them. For this reason the basic building block of the federation is the autonomous group assembly. It is this body which decides on its own issues and mandates delegates to reach agreements within the federal structure, leaving to itself the power to countermand the agreements its delegates make. In this way autonomy is combined with co-ordination in an organisation that is structured to accurately reflect the needs and interests of its members by leaving power in their hands. In the words of Murray Bookchin, anarchists “*do not deny the need for co-ordination between groups, for discipline, for meticulous planning, and for unity in action. But [we] believe that co-ordination, discipline, planning, and unity in action must be achieved **voluntarily**, by means of self-discipline nourished by conviction and understanding, not by coercion and a mindless, unquestioning obedience to orders from above.*” [**Post-Scarcity Anarchism**, p. 215]

Therefore, anarchist support for “*the autonomy of economic administration*” does not imply the lack of co-operation and co-ordination, of joint agreements and federal structures which may, to the uninformed like Morrow, seem to imply the “*abandonment*” of autonomy. As Kropotkin argued, the commune “*cannot any longer acknowledge any superior: that, above it, there cannot be anything, save the interests of the Federation, freely embraced by itself in concert with*

other Communes.” [No Gods, No Masters, vol. 1, p. 259] This vision was stressed in the CNT’s Saragossa resolution on Libertarian Communism made in May, 1936, which stated that the “*the foundation of this administration will be the commune. These communes are to be autonomous and will be federated at regional and national levels to achieve their general goals. The right to autonomy does not preclude the duty to implement agreements regarding collective benefits.*” [quoted by Jose Peirats, **The CNT in the Spanish Revolution**, p. 106] Hence anarchists do not see making collective decisions and working in a federation as an abandonment of autonomy or a violation of anarchist theory.

The reason for this is simple. To exercise your autonomy by joining self-managing organisations and, therefore, agreeing to abide by the decisions you help make is not a denial of that autonomy (unlike joining a hierarchical structure, we must stress). That is why anarchists have always stressed the importance of the **nature** of the associations people join **as well as** their voluntary nature — as Kropotkin argued, the “*communes of the next revolution will not only break down the state and substitute free federation for parliamentary rule; they will part with parliamentary rule within the commune itself . . . They will be anarchist within the commune as they will be anarchist outside it.*” [**The Commune of Paris**] Moreover, within the federal structures anarchists envision, the actual day-to-day running of the association would be autonomous. There would be little or no need for the federation to interfere with the mundane decisions a group has to make day in, day out. As the Saragossa resolution makes clear:

“[The] commune . . . will undertake to adhere to whatever general norms may be agreed by majority vote after free debate . . . The inhabitants of a commune are to debate among themselves their internal problems . . . Federations are to deliberate over major problems affecting a country or province and all communes are to be represented at their reunions and assemblies, thereby enabling their delegates to convey the democratic viewpoint of their respective communes . . . every commune which is implicated will have its right to have its say . . . On matters of a regional nature, it is the duty of the regional federation to implement agreements . . . So the starting point is the individual, moving on through the commune, to the federation and right on up finally to the confederation.” [quoted by Jose Peirats, **Op. Cit.**, pp. 106–7]

Since the Council of Aragon and the Federation of Collectives were based on a federal structure, regular meetings of mandated delegates and decision-making from the bottom up, it would be wrong to call them a “*centralising agency*” or an “*abandonment*” of the principle of “*autonomy.*” Rather, they were expressions of that autonomy based around a **federal** and not centralised organisation. The autonomy of the collective, of its mass assembly, was not restricted by the federation nor did the federation interfere with the day to day running of the collectives which made it up. The structure was a federation of autonomous collectives. The role of the Council was to co-ordinate the decisions of the federation delegate meetings — in other words, purely administrative implementation of collective agreements. To confuse this with centralisation is a mistake common to Marxists, but it is still a confusion.

To summarise, what Morrow claims is an “*abandonment*” of anarchism is, in fact, an expression of anarchist ideas. The Council of Aragon and the Aragon Federation of Collectives were following the CNT’s vision of libertarian communism and not abandoning it, as Morrow claims. As anyone with even a basic understanding of anarchism would know.

19. Did the experience of the rural collectives refute anarchism?

Some Leninists attack the rural collectives on similar lines as they attack the urban ones (as being independent identities and without co-ordination — see section 15 for details). They argue that “*anarchist theory*” resulted in them considering themselves as being independent bodies and so they ignored wider social issues and organisation. This meant that anarchist goals could not be achieved:

“Let’s evaluate the Spanish collectives according to one of the basic goals set by the anarchists themselves. This was to ensure equality among the toilers. They believed that the autonomous collectives would rapidly equalise conditions among themselves through ‘mutual aid’ and solidarity. This did not happen . . . conditions varied greatly among the Spanish collectives, with peasants at some agricultural collectives making three times that of peasants at other collectives.”
[Joseph Green, **Op. Cit.**]

Of course, Green fails to mention that in the presumably “*centralised*” system created by the Bolsheviks, the official rationing system had a differentiation of **eight to one** under the class ration of May 1918. By 1921, this, apparently, had fallen to around four to one (which is still higher than the rural collectives) but, in fact, remained at eight to one due to workers in selected defence-industry factories getting the naval ration which was approximately double that of the top civilian workers’ ration. [Mary McAuley, **Bread and Justice: State and Society in Petrograd 1917–1922**, pp. 292–3] This, we note, ignores the various privileges associated with state office and Communist Party membership which would increase differentials even more (and such inequality extended into other fields, Lenin for example warned in 1921 against “*giving non-Party workers a false sense of having some increase in their rights*” [Marx, Engels and Lenin, **Op. Cit.**, p. 325]). The various resolutions made by workers for equality in rations were ignored by the government (all this long before, to use Green’s words “*their party degenerated into Stalinist revisionism*”).

So, if equality is important, then the decentralised rural collectives were far more successful in achieving it than the “*centralised*” system under Lenin (as to be expected, as the rank-and-file were in control, not a few at the top).

Needless to the collectives could not unify history instantly. Some towns and workplaces started off on a more favourable position than others. Green quotes an academic (David Miller) on this:

“Such variations no doubt reflected historical inequalities of wealth, but at the same time the redistributive impact of the [anarchist] federation had clearly been slight.”

Note that Green implicitly acknowledges that the collectives **did** form a federation. This makes a mockery of his claims that earlier claims that the anarchists “*believed that the village communities would enter the realm of a future liberated society if only they became autonomous collectives. They didn’t see the collectives as only one step, and they didn’t see the need for the collectives to be integrated into a broader social control of all production.*” [Op. Cit.] As proven above, such assertions are either the product of ignorance or a conscious lie. We quoted numerous Spanish anarchist documents that stated the exact opposite to Green’s assertions. The Spanish anarchists were well aware of the need for self-managed communities to federate. Indeed, the federation of collectives fits **exactly** pre-war CNT policy and anarchist theory (see sections 15 and 18 for details). To re-quote a Spanish Anarchist pamphlet, the village commune “*will federate with its counterparts in other localities and with the national industrial federations.*” [Issac Puente, **Libertarian Communism**, p. 26] Thus what Green asserts the CNT and FAI did not see the need of, they in fact **did** see the need for and argued for their creation before the Civil War and actually created during it! Green’s comments indicate a certain amount of “*doublethink*” — he maintains that the anarchists rejected federations while acknowledging they did federate.

However, historical differences are the product of **centuries** and so it will take some time to overcome them, particularly when such changes are not imposed by a central government. In addition, the collectives were not allowed to operate freely and were soon being hindered (if not physically attacked) by the state within a year. Green dismisses this recognition of reality by arguing “*one could argue that the collectives didn’t have much time to develop, being in existence for only two and a half years at most, with the anarchists only having one year of reasonably unhindered work, but one could certainly not argue that this experience confirmed anarchist theory.*” However, his argument is deeply flawed for many reasons.

Firstly, we have to point out that Green quotes Miller who is using data from collectives in Castille. Green, however, was apparently discussing the collectives of Aragon and the Levante and their respective federations (as was Miller). To state the obvious, it is hard to evaluate the activities of the Aragon or Levante federation using data from collectives in the Castille federation. Moreover, in order to evaluate the redistributive activities of the federations you need to look at the differentials before and after the federation was created. The data Miller uses does not do that and so the lack of success of the federation cannot be evaluated using Green’s source. Thus Green uses data which is, frankly, a joke to dismiss anarchism. This says a lot about the quality of his critique.

As far as the Castille federation goes, Robert Alexander notes “[a]nother feature of the work of regional federation was that of aiding the less fortunate collectives. Thus, within a year, it spent 2 000 000 pesetas on providing chemical fertilisers and machines to poorer collectives, the money from this being provided by the sale of products of the wealthier ones.” [The Anarchists in the Spanish Civil War, vol. 1, p. 438] He also quotes an article from an anarchist paper which states “*there does not yet exist sufficient solidarity*” between rich and poor collectives and that notes “*the difficulties which the State has put in the way of the development of the collectives.*” [Op. Cit., p. 439] Thus the CNT was open about the difficulties it was experiencing in the collectives and the problems facing it.

Secondly, the collectives may have been in existence for about one year before the Stalinists attacked but their federations had not. The Castille federation was born in April, 1937 (the general secretary stated in July of that year “[w]e have fought terrible battles with the Communists” [Op. Cit., p. 446]). The Aragon federation was created in February 1937 (the Council of Aragon was created in October 1936) and the Communists under Lister attacked in August 1937. The Levante federation was formed a few weeks after the start of the war and the attacks against them started in March 1937. The longest period of free development, therefore, was only **seven** months and not a year. Thus the federations of collectives — the means seen by anarchist theory to co-ordinate economic and social activities and promote equality — existed for only a few months before they were physically attacked by the state. Green expects miracles if he thinks history can be nullified in half a year.

Thirdly, anarchists do not think communist-anarchism, in all its many aspects, is possible overnight. Anarchists are well aware, to quote Kropotkin, the “*revolution may assume a variety of characters and differing degrees of intensity among different peoples.*” [No Gods, No Masters, vol. 1, p. 231] Also, as noted above, we are well aware that a revolution is a **process** (“*By revolution we do not mean just the insurrectionary act*” [Malatesta, **Life and Ideas**, p. 156]) which will take some time to fully develop once the state has been destroyed and capital expropriated. Green’s assertion that the Spanish Revolution refutes anarchist theory is clearly a false one.

Green argues that a “*vast organisational task faces the oppressed masses who are rising up to eliminate the old exploiting system, but anarchist theory just brushes aside this problem — co-ordination between collective would supposedly be easily accomplished by ‘mutual aid’ or ‘voluntary co-operation’ or, if absolutely need be, by the weakest possible federation.*” [Op. Cit.] As can be seen from our discussion, such a claim is a false one. Anarchists are well aware of difficulties involved in a revolution. That is why we stress that revolution must come from below, by the actions of the oppressed themselves — it is far too complex to left to a few party leaders to decree the abolition of capitalism. Moreover, as proven above anarchist theory and practice is well aware of the need for organisation, co-operation and co-ordination. We obviously do not “*brush it aside.*” This can be seen from Green’s reference to “*the weakest possible federation.*” This obviously is a cover just in case the reader is familiar with anarchist theory and history and knows that anarchists support the federation of workers’ associations and communes as the organisational framework of a revolution and of the free society.

This distorted vision of anarchism even extends to other aspects of the revolution. Green decides to attack the relative lack of international links the Spanish anarchist movement had in 1936. He blames this on anarchist theory and states “*again the localist anarchist outlook would go against such preparations. True, the anarchists had had their own International association in the 1870s, separate from the original First International and the Marxists. It had flopped so badly that the anarchists never tried to resuscitate it and seem to prefer to forget about it. Given anarchist localism, it is not surprising that this International doesn’t even seem to be been missed by current-day anarchists.*” [Op. Cit.]

Actually, the anarchist International came out of the First International and was made up of the libertarian wing of that association. Moreover, in 1936 the CNT was a member of the International Workers’ Association founded in

1922 in Berlin. The IWA was small, but this was due to state and Fascist repression. For example, the German FAUD, the Italian USI and the FORA in Argentina had all been destroyed by fascist governments. However, those sections which did exist (such as the Swedish SAC and French CGTSR) **did** send aid to Spain and spread CNT and FAI news and appeals (as did anarchist groups across the world). The IWA still exists today, with sections in over a dozen countries (including the CNT in Spain). In addition, the International Anarchist Federation also exists, having done so for a number of decades, and also has sections in numerous countries. In other words, Green either knows nothing about anarchist history and theory or he does and is lying.

He attacks the lack of CNT support for Moroccan independence during the war and states “[t]hey just didn’t seem that concerned with the issue during the Civil War.” Actually, many anarchists **did** raise this important issue. Just one example, Camillo Berneri argued that “we must intensify our propaganda in favour of Morocco autonomy.” [“What can we do?”, **Cienfuegos Press Anarchist Review**, no. 4, p. 51] Thus to state “the anarchists . . . didn’t seem that concerned” is simply false. Many anarchists were and publicly argued for it. Trapped as a minority force in the government, the CNT could not push through this position.

Green also points out that inequality existed between men and woman. He even quotes the anarchist women’s organisation Mujeres Libres to prove his point. He then notes what the Bolsheviks did to combat sexism, “[a]mong the methods of influence was mobilising the local population around social measures promulgated throughout the country. The banner of the struggle was not autonomy, but class-wide effort.” Two points, Mujeres Libres was a nation wide organisation which aimed to end sexism by collective action inside and outside the anarchist movement by organising women to achieve their own liberation (see Martha Ackelsberg’s , **Free Women of Spain** for more details). Thus its aims and mode of struggle **was** “class-wide” — as anyone familiar with that organisation and its activities would know. Secondly, why is equality between men and women important? Because inequality reduces the freedom of women to control their own lives, in a word, it hinders they **autonomy**. Any campaign against sexism is based on the banner of autonomy — that Green decides to forget this suggests a lot about his politics.

Thus Green gets it wrong again and again. Such is the quality of most Leninist accounts of the Spanish revolution.

20. Does the experience of the Spanish Revolution indicate the failure of anarchism or the failure of anarchists?

Marxists usually point to the events in Catalonia after July 19th, 1936, as evidence that anarchism is a flawed theory. They bemoan the fact that, when given the chance, the anarchists did not “seize power” and create a “dictatorship of the proletariat.” To re-quote Trotsky:

“A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anar-

chist workers), is still by no means the sovereign ruler of society.”
[Stalinism and Bolshevism]

However, as we argued in section 12, the Trotskyist “definition” of “workers’ power” and “proletarian dictatorship” is, in fact, party power, party dictatorship and party sovereignty — **not** working class self-management. Indeed, in a letter written in 1937, Trotsky clarified what he meant: “*Because the leaders of the CNT renounced dictatorship for themselves they left the place open for the Stalinist dictatorship.*” [our emphasis, **Writings 1936–7**, p. 514]

Hence the usual Trotskyist lament concerning the CNT is that the anarchist leaders did not seize power themselves and create the so-called “*dictatorship of the proletariat*” (i.e. the dictatorship of those claiming to represent the proletariat). A strange definition of “*workers’ power*,” we must admit. The “leaders” of the CNT and FAI quite rightly rejected such a position — unfortunately they also rejected the anarchist position at the same time, as we will see.

Trotsky states that the “*leaders of the CNT ... explained their open betrayal of the theory of anarchism by the pressure of ‘exceptional circumstances’ ... Naturally, civil war is not a peaceful and ordinary but an ‘exceptional circumstance.’ Every serious revolutionary organisation, however, prepares precisely for ‘exceptional circumstances.’*” [“*Stalinism and Bolshevism*”, **Op. Cit.**, p. 16]

Trotsky is, for once, correct. We will ignore the obvious fact that his own (and every other Leninist) account of the degeneration of the Russian Revolution into Stalinism is a variation of the “*exceptional circumstances*” excuse and turn to his essential point. In order to evaluate anarchism and the actions of the CNT we have to evaluate **all** the revolutionary situations it found itself in, **not** just July, 1936 in Catalonia. This is something Trotsky and his followers seldom do — for reasons that will become clear.

Obviously space considerations does not allow us to discuss every revolutionary situation anarchism faced. We will, therefore, concentrate on the Russian Revolution and the activities of the CNT in Spain in the 1930s. These examples will indicate that rather than signifying the failure of anarchism, the actions of the CNT during the Civil War indicate the failure of anarchists to apply anarchist theory and so signifies a betrayal of anarchism. In other words, that anarchism is a valid form of revolutionary politics.

If we look at the Russian Revolution, we see anarchist theory gain its most wide scale influence in those parts of the Ukraine protected by the Makhnovist army. The Makhnovists fought against White (pro-Tsarist), Red and Ukrainian Nationalists in favour of a system of “*free soviets*” in which the “*working people themselves must freely choose their own soviets, which are to carry out the will and desires of the working people themselves. that is to say, administrative, not ruling councils.*” As for the economy, the “*land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised.*” [“*Some Makhnovist Proclamations*”, contained in Peter Arshinov, **The History of the Makhnovist Movement**, p. 273]

To ensure this end, the Makhnovists refused to set up governments in the towns and cities they liberated, instead urging the creation of free soviets so that the working people could govern themselves. Taking the example of Aleksandrovsk, once they had liberated the city the Makhnovists “*immediately invited*

the working population to participate in a general conference . . . it was proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations . . . The first conference was followed by a second. The problems of organising life according to principles of self-management by workers were examined and discussed with animation by the masses of workers, who all welcomed this ideas with the greatest enthusiasm . . . Railroad workers took the first step . . . They formed a committee charged with organising the railway network of the region . . . From this point, the proletariat of Aleksandrovsk began systematically to the problem of creating organs of self-management.” [Op. Cit., p. 149]

They also organised free agricultural communes which “[a]dmittedly . . . were not numerous, and included only a minority of the population . . . But what was most precious was that these communes were formed by the poor peasants themselves. The Makhnovists never exerted any pressure on the peasants, confining themselves to propagating the idea of free communes.” [Op. Cit., p. 87] Makhno played an important role in abolishing the holdings of the landed gentry. The local soviet and their district and regional congresses equalised the use of the land between all sections of the peasant community. [Op. Cit., pp. 53–4]

Moreover, the Makhnovists took the time and energy to involve the whole population in discussing the development of the revolution, the activities of the army and social policy. They organised numerous conferences of workers’, soldiers’ and peasants’ delegates to discuss political and social issues. They organised a regional congress of peasants and workers when they had liberated Aleksandrovsk. When the Makhnovists tried to convene the third regional congress of peasants, workers and insurgents in April 1919 and an extraordinary congress of several regions in June 1919 (including Red Army soldiers) the Bolsheviks viewed them as counter-revolutionary, tried to ban them and declared their organisers and delegates outside the law. For example, Trotsky issued order 1824 which stated the June 1919 congress was forbidden, that to inform the population of it was an act of high treason and all delegates should be arrested immediately as were all the spreading the call. [Op. Cit., p. 98–105 and p. 122–31]

The Makhnovists replied by holding the conferences anyway and asking “[c]an there exist laws made by a few people who call themselves revolutionaries, which permit them to outlaw a whole people who are more revolutionary than they are themselves?” and “[w]hose interests should the revolution defend: those of the Party or those of the people who set the revolution in motion with their blood?” Makhno himself stated that he “consider[ed] it an inviolable right of the workers and peasants, a right won by the revolution, to call conferences on their own account, to discuss their affairs.” [Op. Cit., p. 103 and p. 129] These actions by the Bolsheviks should make the reader ponder if the elimination of workers’ democracy during the civil war can fully be explained by the objective conditions facing Lenin’s government or whether Leninist ideology played an important role in it. As Arshinov argues, “[w]hoever studies the Russian Revolution should learn it [Trotsky’s order no. 1824] by heart.” [Op. Cit., p. 123] Obviously the Bolsheviks considered that soviet system was threatened if soviet conferences were called and the “dictatorship of the proletariat” was undermined if the proletariat took part in such events.

In addition, the Makhnovists “full applied the revolutionary principles of freedom of speech, of thought, of the press, and of political association. In all cities and towns occupied by the Makhnovists, they began by lifting all the prohibitions and repealing all the restrictions imposed on the press and on political organisations by one or another power.” Indeed, the “only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist-Revolutionaries and other statistes was a prohibition on the formation of those ‘revolutionary committees’ which sought to impose a dictatorship over the people.” [Op. Cit., p. 153 and p. 154]

The army itself, in stark contrast to the Red Army, was fundamentally democratic (although, of course, the horrific nature of the civil war did result in a few deviations from the ideal — however, compared to the regime imposed on the Red Army by Trotsky, the Makhnovists were much more democratic movement). Arshinov proves a good summary:

“The Makhnovist insurrectionary army was organised according to three fundamental principles: voluntary enlistment, the electoral principle, and self-discipline.

*“**Voluntary enlistment** meant that the army was composed only of revolutionary fighters who entered it of their own free will.*

*“**The electoral principle** meant that the commanders of all units of the army, including the staff, as well as all the men who held other positions in the army, were either elected or accepted by the insurgents of the unit in question or by the whole army.*

*“**Self-discipline** meant that all the rules of discipline were drawn up by commissions of insurgents, then approved by general assemblies of the various units; once approved, they were rigorously observed on the individual responsibility of each insurgent and each commander.”*
[Op. Cit., p. 96]

Thus the Makhnovists indicate the validity of anarchist theory. They organised the self-defence of their region, refused to form of a “revolutionary” government and so the life of the region, its social and revolutionary development followed the path of self-activity of the working people who did not allow any authorities to tell them what to do. They respected freedom of association, speech, press and so on while actively encouraging workers’ and peasants’ self-management and self-organisation.

Moving to the Spanish movement, the various revolts and uprisings organised by the CNT and FAI that occurred before 1936 were marked by a similar revolutionary developments as the Makhnovists. We discuss the actual events of the revolts in 1932 and 1933 in more detail in section 14 and so will not repeat ourselves here. However, all were marked by the anarchist movement attacking town halls, army barracks and other sources of state authority and urging the troops to revolt and side with the masses (the anarchists paid a lot of attention to this issue — like the French syndicalists they produced anti-militarist propaganda arguing that soldiers should side with their class and refuse orders to fire on strikers and to join popular revolts). The revolts also saw workers taking over their workplaces and the land, trying to abolish capitalism while trying to

abolish the state. In summary, they were **insurrections** which combined political goals (the abolition of the state) and social ones (expropriation of capital and the creation of self-managed workplaces and communes).

The events in Asturias in October 1934 gives a more detailed account of nature of these insurrections. The anarchist role in this revolt has not been as widely known as it should be and this is an ideal opportunity to discuss it. Combined with the other insurrections of the 1930s it clearly indicates that anarchism is a valid form of revolutionary theory.

While the CNT was the minority union in Asturias, it had a considerable influence of its own (the CNT had over 22 000 affiliates in the area and the UGT had 40 000). The CNT had some miners in their union (the majority were in the UGT) but most of their membership was above ground, particularly in the towns of Aviles and Gijon. The regionalist federation of the CNT had joined the Socialist Party dominated "*Alianza Obrera*," unlike the other regional federations of the CNT.

When the revolt started, the workers organised attacks on barracks, town halls and other sources of state authority (just as the CNT revolts of 1932 and 1933 had). Bookchin indicates that "*[s]tructurely, the insurrection was managed by hundreds of small revolutionary committees whose delegates were drawn from unions, parties, the FAI and even anti-Stalinist Communist groups. Rarely, if at all, were there large councils (or 'soviets') composed of delegates from factories.*" [**The Spanish Anarchists**, p. 249] This, incidentally, indicates that Morrow's claims that in Asturias "*the Workers' Alliances were most nearly like soviets, and had been functioning for a year under socialist and Communist Left leadership*" are false. [**Op. Cit.**, p. 31] The claims that the Asturias uprising had established soviets was simply Communist and government propaganda.

In fact, the Socialists "*generally functioned through tightly knit committees, commonly highly centralised and with strong bureaucratic proclivities. In Asturias, the UGT tried to perpetuate this form wherever possible . . . But the mountainous terrain of Asturias made such committees difficult to co-ordinate, so that each one became an isolated miniature central committee of its own, often retaining its traditional authoritarian character.*" The anarchists, on the other hand, "*favoured looser structures, often quasi-councils composed of factory workers and assemblies composed of peasants. The ambience of these fairly decentralised structures, their improvisatory character and libertarian spirit, fostered an almost festive atmosphere in Anarchist-held areas.*" [**Op. Cit.**, p. 249] Bookchin quotes an account which compares anarchist La Felguera with Marxist Sama, towns of equal size and separated only by the Nalon river:

*"[The October Insurrection] triumphed immediately in the metallurgical and in the mining town. . . Sama was organised along military lines. Dictatorship of the proletariat, red army, Central Committee, discipline. authority . . . La Felguera opted for **comunismo libertario**: the people in arms, liberty to come and go, respect for the technicians of the Duro-Felguera metallurgical plant, public deliberations of all issues, abolition of money, the rational distribution of food and clothing. Enthusiasm and gaiety in La Felguera; the sullenness of the barracks in Sama. The bridges [of Sama] were held by a corp of guards complete with officers and all. No one could enter or leave Sama without a safe-conduct pass, or walk through the streets*

without passwords. All of this was ridiculously useless, because the government troops were far away and the Sama bourgeoisie disarmed and neutralised . . . The workers of Sama who did not adhere to the Marxist religion preferred to go to La Felguera, where at least they could breathe. Side by side there were two concepts of socialism: the authoritarian and the libertarian; on each bank of the Nalon, two populations of brothers began a new life: with dictatorship in Sama; with liberty in La Felguera.” [Op. Cit., pp. 249–50]

Bookchin notes that “[i]n contrast to the severely delimited Marxist committee in Sama, La Felguera workers met in popular assembly, where they socialised the industrial city’s economy. The population was divided into wards, each of which elected delegates to supply and distribution committees. . . The La Felguera commune . . . proved to be so successful, indeed so admirable, that surrounding communities invited the La Felguera Anarchists to advise them on reorganising their own social order. Rarely were comparable institutions created by the Socialists and, where they did emerge, it was on the insistence of the rank-and-file workers.” [Op. Cit., p. 250]

In other words, the Asturias uprising saw anarchists yet again applying their ideas with great success in a revolutionary situation. As Bookchin argues:

“Almost alone, the Anarchists were to create viable revolutionary institutions structured around workers’ control of industry and peasants’ control of land. That these institutions were to be duplicated by Socialist workers and peasants was due in small measure to Anarchist example rather than Socialist precept. To the degree that the Asturian miners and industrial workers in various communities established direct control over the local economy and structured their committees along libertarian lines, these achievements were due to Anarchist precedents and long years of propaganda and education.” [Op. Cit., p. 250–1]

Unlike their Socialist and Communist allies, the anarchists in Asturias took the Alianza’s slogan “*Unity, Proletarian Brothers*” seriously. A key factor in the defeat of the uprising (beyond its isolation due to socialist incompetence elsewhere — see section 6) was the fact that “[s]o far as the Aviles and Gijon Anarchists were concerned . . . their Socialist and Communist ‘brothers’ were to honour the slogan only in the breach. When Anarchist delegates from the seaports arrived in Oviedo on October 7, pleading for arms to resist the imminent landings of government troops, their requests were totally ignored by Socialists and Communists who, as [historian Gabriel] Jackson notes, ‘clearly mistrusted them.’ The Oviedo Committee was to pay a bitter price for its refusal. The next day, when Anarchist resistance, hampered by the pitiful supply of weapons, failed to prevent the government from landing its troops, the way into Asturias lay open. The two seaports became the principal military bases for launching the savage repression of the Asturian insurrection that occupied so much of October and claimed thousands of lives.” [Murray Bookchin, Op. Cit., p. 248]

Therefore, to state as Morrow does that before July 1936, “anarchism had never been tested on a grand scale” and now “leading great masses, it was to have a definite test” is simply wrong. [Op. Cit., p. 101] Anarchism had had

numerous definite tests before involving “*great masses*,” both in Spain and elsewhere. The revolts of the 1930s, the Makhnovists in the Ukraine, the factory occupations in Italy in 1920 (see section A.5.5) and in numerous other revolutionary and near revolutionary situations anarchism had been tested **and had passed** those tests. Defeat came about by the actions of the Marxists (in the case of Asturias and Italy) or by superior force (as in the 1932 and 1933 Spanish insurrections and the Ukraine) **not** because of anarchist theory or activities. At no time did they collaborate with the bourgeois state or compromise their politics. By concentrating on July 1936, Marxists effectively distort the history of anarchism — a bit like arguing the actions of the Social Democratic Party in crushing the German discredits Marxism while ignoring the actions and politics of the council communists during it or the Russian Revolution.

But the question remains, why did the CNT and FAI make such a mess (politically at least) of the Spanish Revolution of 1936? However, even this question is unfair as the example of the Aragon Defence Council and Federation of Collectives indicate that anarchists **did** apply their ideas successfully in certain areas during that revolution.

Morrow is aware of that example, as he argues that the “*Catalonian [i.e. CNT] militia marched into Aragon as an army of social liberation . . . Arriving in a village, the militia committees sponsor the election of a village anti-fascist committee . . . [which] organises production on a new basis*” and “[e]very village wrested from the fascists was transformed into a forest of revolution.” Its “*municipal councils were elected directly by the communities. The Council of Aragon was at first largely anarchist.*” He notes that “[l]ibertarian principles were attempted in the field of money and wages” yet he fails to mention the obvious application of libertarian principles in the field of **politics** with the state abolished and replaced by a federation of workers’ associations. To do so would be to invalidate his basic thesis against anarchism and so it goes unmentioned, hoping the reader will not notice this confirmation of anarchist **politics** in practice. [Op. Cit., p. 53, p. 204 and p. 205]

So, from the experience of the Ukraine, the previous revolts in 1932, 1933 and 1934 and the example of the Council of Aragon it appears clear that rather than exposing anarchist theory (as Marxists claim), the example of July 1936 in Catalonia is an aberration. Anarchist politics had been confirmed as a valid revolutionary theory many times before and, indeed, shown themselves as the only one to ensure a free society. However, why did this aberration occur?

Most opponents of anarchism provide a rather (in)famous quote from FAI militant Juan Garcia Oliver, describing the crucial decision made in Catalonia in July of ’36 to co-operate with Companys’ government to explain the failure of the CNT to “seize power”:

“The CNT and FAI decided on collaboration and democracy, eschewing revolutionary totalitarianism . . . by the anarchist and Confederal dictatorship.” [quoted by Stuart Christie, **We, the Anarchists!**, p. 105]

In this statement Garcia Oliver describes the capitalist state as “*democracy*” and refers to the alternative of the directly democratic CNT unions taking power as “*totalitarianism*” and “*dictatorship*.” Marxists tend to think this statement tells us something about the CNT’s original program in the period leading

up to the crisis of July 1936. As proven above, any such assertion would be false (see also section 8). In fact this statement was made in December of 1937, many months after Garcia Oliver and other influential CNT activists had embarked upon collaboration in the government ministries and Republican army command. The quote is taken from a report by the CNT leadership, presented by Garcia Oliver and Mariano Vazquez (CNT National Secretary in 1937) at the congress of the International Workers Association (IWA). The CNT was aware that government participation was in violation of the principles of the IWA and the report was intended to provide a rationalisation. That report is an indication of just how far Garcia Oliver and other influential CNT radicals had been corrupted by the experience of government collaboration.

Garcia Oliver's position in July of 1936 had been entirely different. He had been one of the militants to argue in favour of overthrowing the Companys government in Catalonia in the crucial union assemblies of July 20–21. As Juan Gomez Casas argues:

“The position supported by Juan Garcia Oliver [in July of '36] has been described as ‘anarchist dictatorship’ Actually, though, Oliver was advocating application of the goals of the Saragossa Congress in Barcelona and Catalonia at a time in history when, in his opinion, libertarian communism was a real possibility. It would always signify dissolution of the old parties dedicated to the idea of [state] power, or at least make it impossible for them to pursue their politics aimed at seizure of power. There will always be pockets of opposition to new experiences and therefore resistance to joining ‘the spontaneity of the popular masses.’ In addition, the masses would have complete freedom of expression in the unions and in the economic organisations of the revolution as well as in their political organisations.”
[Anarchist Organisation: The History of the FAI, p. 188f]

Those libertarians who defended government participation in Spain argued that a non-hierarchical re-organisation of society in Catalonia in July of '36 could only have been imposed by force, against the opposition of the parties and sectors of society that have a vested interest in existing inequalities. They argued that this would have been a “dictatorship,” no better than the alternative of government collaboration.

If this argument were valid, then it logically means that anarchism itself would be impossible, for there will always be sectors of society — bosses, judges, politicians, etc. — who will oppose social re-organisation on a libertarian basis. As Malatesta once argued, some people “*seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of a respect for the **freedom** of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!*” [Anarchy, p. 41] It is doubtful he would have predicted that certain anarchists would be included in such believers!

Neither anarchism nor the CNT program called for suppressing other viewpoints. The various viewpoints that existed among the workforce and population would be reflected in the deliberations and debates of the workplace and community assemblies as well as in the various local and regional congresses and conference and on their co-ordinating Councils. The various political groups

would be free to organise, publish their periodicals and seek influence in the various self-managed assemblies and structures that existed. The CNT would be dominant because it had overwhelming support among the workers of Catalonia (and would have remained dominant as long as that continued).

What is essential to a state is that its authority and armed power be top-down, separate and distinct from the population. Otherwise it could not function to protect the power of a boss class. When a population in society directly and democratically controls the armed force (in fact, effectively **is** the armed force as in the case of the CNT militias), directly manages its own affairs in decentralised, federal organisations based on self-management from the bottom upwards and manages the economy, this is not a “state” in the historical sense. Thus the CNT would not in any real sense have “seized power” in Catalonia, rather it would have allowed the mass of people, previously disempowered by the state, to take control of their own lives — both individually and collectively — by smashing the state and replacing it by a free federation of workers’ associations.

What this means is that a non-hierarchical society must be imposed by the working class against the opposition of those who would lose power. In building the new world we must destroy the old one. Revolutions are authoritarian by their very nature, but only in respect to structures and social relations which promote injustice, hierarchy and inequality. It is not “authoritarian” to destroy authority, in other words! Revolutions, above all else, must be libertarian in respect to the oppressed (indeed, they are acts of liberation in which the oppressed end their oppression by their own direct action). That is, they must develop structures that involve the great majority of the population, who have previously been excluded from decision making about social and economic issues.

So the dilemma of “anarchist dictatorship” or “collaboration” was a false one and fundamentally wrong. It was never a case of banning parties, etc. under an anarchist system, far from it. Full rights of free speech, organisation and so on should have existed for all but the parties would only have as much influence as they exerted in union, workplace, community, militia (and so on) assemblies, as should be the case! “Collaboration” yes, but within the rank and file and within organisations organised in a libertarian manner. Anarchism does not respect the “freedom” to be a capitalist, boss or politician.

Instead of this “collaboration” from the bottom up, the CNT and FAI committees favoured “collaboration” from the top down. In this they followed the example of the UGT and its “*Workers’ Alliances*” rather than their own activities previous to the military revolt. Why? Why did the CNT and FAI in Catalonia reject their previous political perspective and reject the basic ideas of anarchism? As shown above, the CNT and FAI has successfully applied their ideas in many insurrections before hand. Why the change of direction? There were two main reasons.

Firstly, while a majority in Catalonia and certain other parts of Spain, the CNT and FAI were a minority in such areas as Castille and Asturias. To combat fascism required the combined forces of all parties and unions and by collaborating with a UGT-like “Anti-Fascist Alliance” in Catalonia, it was believed that such alliances could be formed elsewhere, with equality for the CNT ensured by the Catalan CNT’s decision of equal representation for minority organisations in the Catalan Anti-Fascist Committee. This would, hopefully, also ensure aid

to CNT militias via the government's vast gold reserves and stop foreign intervention by Britain and other countries to protect their interests if libertarian communism was declared.

However, as Vernon Richards argues:

“This argument contains . . . two fundamental mistakes, which many of the leaders of the CNT-FAI have since recognised, but for which there can be no excuse, since they were not mistakes of judgement but the deliberate abandonment of the principles of the CNT. Firstly, that an armed struggle against fascism or any other form of reaction could be waged more successfully within the framework of the State and subordinating all else, including the transformation of the economic and social structure of the country, to winning the war. Secondly, that it was essential, and possible, to collaborate with political parties — that is politicians — honestly and sincerely, and at a time when power was in the hands of the two workers organisations. . .

“All the initiative . . . was in the hands of the workers. The politicians were like generals without armies floundering in a desert of futility. Collaboration with them could not, by any stretch of the imagination, strengthen resistance to Franco. On the contrary, it was clear that collaboration with political parties meant the recreation of governmental institutions and the transferring of initiative from the armed workers to a central body with executive powers. By removing the initiative from the workers, the responsibility for the conduct of the struggle and its objectives were also transferred to a governing hierarchy, and this could not have other than an adverse effect on the morale of the revolutionary fighters.” [Lessons of the Spanish Revolution, p. 42]

In addition, in failing to take the initiative to unite the working class independently of the Republican state at the crucial moment, in July of '36, the CNT of Catalonia was in effect abandoning the only feasible alternative to the Popular Front strategy. Without a libertarian system of popular self-management, the CNT and FAI had no alternative but to join the bourgeois state. For a revolution to be successful, as Bakunin and Kropotkin argued, it needs to create libertarian organisations (such as workers' associations, free communes and their federations) which can effectively replace the state and the market, that is to create a widespread libertarian organisation for social and economic decision making through which working class people can start to set their own agendas. Only by going this can the state and capitalism be effectively smashed. If this is not done and the state is ignored rather than smashed, it continues and gets stronger as it will be the only medium that exists for wide scale decision making. This will result in revolutionaries having to work within it, trying to influence it since no other means exist to reach collective decisions.

The failure to smash the state, this first betrayal of anarchist principles, led to all the rest, and so the defeat of the revolution. Not destroying the state meant that the revolution could never be fully successful economically as politics and economics are bound together so closely. Only under the political conditions of anarchism can its economic conditions flourish and vice versa.

The CNT had never considered a “strategy” of collaboration with the Popular Front prior to July of ’36. In the months leading up to the July explosion, the CNT had consistently criticised the Popular Front strategy as a fake unity of leaders over the workers, a strategy that would subordinate the working class to capitalist legality. However, in July of ’36, the CNT conferences in Catalonia had not seen clearly that their “temporary” participation in the Anti-Fascist Militia Committee would drag them inexorably into a practice of collaboration with the Popular Front. As Christie argues, *“the Militias Committee was a compromise, an artificial political solution . . . It . . . drew the CNT-FAI leadership inexorably into the State apparatus, until then its principle enemy, and led to the steady erosion of anarchist influence and credibility.”* [Op. Cit., p. 105]

Secondly, the fear of fascism played a key role. After all, this was 1936. The CNT and FAI had seen their comrades in Italy and Germany being crushed by fascist dictatorships, sent to concentration camps and so on. In Spain, Franco’s forces were slaughtering union and political militants and members by the tens of thousands (soon to reach hundreds of thousands by the end of the war and beyond). The insurrection had not been initiated by the people themselves (as had the previous revolts in the 1930s) and this also had a psychological impact on the decision making process. The anarchists were, therefore, in a position of being caught between two evils — fascism and the bourgeois state, elements of which had fought with them on the streets. To pursue anarchist politics at such a time, it was argued, could have resulted in the CNT fighting on two fronts — against the fascists and also against the Republican government. Such a situation would have been unbearable and so it was better to accept collaboration than aid Fascism by dividing the forces of the anti-fascist camp.

However, such a perspective failed to appreciate the depth of hatred the politicians and bourgeois had for the CNT. Indeed, by their actions it would appear they preferred fascism to the social revolution. So, in the name of “anti-fascist” unity, the CNT worked with parties and classes which hated both them and the revolution. In the words of Sam Dolgoff *“both before and after July 19th, an unwavering determination to crush the revolutionary movement was the leitmotif behind the policies of the Republican government; irrespective of the party in power.”* [The Anarchist Collectives, p. 40]

Rather than eliminate a civil war developing within the civil war, the policy of the CNT just postponed it — until such time as the state was stronger than the working class. The Republican government was quite happy to attack the gains of the revolution, physically attacking rural and urban collectives, union halls, assassinating CNT and FAI members of so on. The difference was the CNT’s act only postponed such conflict until the balance of power had shifted back towards the status quo.

Moreover, the fact that the bourgeois republic was fighting fascism could have meant that it would have tolerated the CNT social revolution rather than fight it (and so weakening its own fight against Franco). However, such an argument remains moot.

It is clear that anti-fascism destroyed the revolution, not fascism. As a Scottish anarchist in Barcelona during the revolution argued, *“Fascism is not something new, some new force of evil opposed to society, but is only the old enemy, Capitalism, under a new and fearful sounding name . . . Anti-Fascism is the new slogan by which the working class is being betrayed.”* [Ethal McDonald, Workers Free Press, Oct. 1937] This was also argued by the **Friends of Dur-**

ruti who stated that “[d]emocracy defeated the Spanish people, not Fascism.”
[**The Friends of Durruti Accuse**]

The majority at the July 20–21 conferences went along with proposal of postponing the social revolution, of starting the work of creating libertarian communism, and smashing the state and replacing it with a federation of workers’ assemblies. Most of the CNT militants there saw it as a temporary expedient, until the rest of Spain was freed from Franco’s forces (in particular, Aragon and Saragossa). Companys’ (the head of the Catalan government) had proposed the creation of a body containing representatives of all anti-fascist parties and unions called the “*Central Committee of Anti-Fascist Militias*,” sponsored by his government. The CNT meeting agreed to this proposal, though only on condition that the CNT be given the majority on it. A sizeable minority of delegates were apparently disgusted by this decision. The delegation from Bajo Llobregat County (an industrial area south of Barcelona) walked out saying they would never go along with government collaboration.

Therefore, the decision to postpone the revolution and so to ignore the state rather than smashing was a product of isolation and the fear of a fascist victory. However, while “isolation” may explain the Catalan militants’ fears and so decisions, it does not justify their decision. If the CNT of Catalonia had given Companys the boot and set up a federation of workplace and community assemblies in Catalonia, uniting the rank-and-file of the other unions with the CNT, this would have strengthened the resolve of workers in other parts of Spain, and it might have also inspired workers in nearby countries to move in a similar direction.

Isolation, the uneven support for a libertarian revolution across Spain and the dangers of fascism were real problems, but they do not excuse the libertarian movement for its mistakes. On the contrary, in following the course of action advised by leaders like Horacio Prieto and Abad Diego de Santillan, the CNT only weakened the revolution and helped to discredit libertarian socialism. After all, as Bakunin and Kropotkin continually stressed, revolutions break out in specific areas and then spread outward — isolation is a feature of revolution which can only be overcome by action, by showing a practical example which others can follow.

Most of the CNT militants at the July 20th meeting saw the compromise as a temporary expedient, until the rest of Spain was freed from Franco’s forces (in particular, Aragon and Saragossa). As the official account states, “[t]he situation was considered and it was unanimously decided not to mention *Libertarian Communism* until such time as we had captured that part of Spain that was in the hands of the rebels.” [quoted by Christie, **Op. Cit.**, p. 102] However, the membership of the CNT decided **themselves** to start the social revolution (“*very rapidly collectives . . . began to spring up. It did not happen on instructions from the CNT leadership . . . the initiative came from CNT militants*” [Ronald Fraser, **Blood of Spain**, p. 349]). The social revolution began anyway, from below, but without the key political aspect (abolition of the state) and so was fatally compromised from the beginning.

As Stuart Christie argues:

“The higher committees of the CNT-FAI-FIJJL in Catalonia saw themselves caught on the horns of a dilemma: social revolution, fascism or bourgeois democracy. Either they committed themselves to

the solutions offered by social revolution, regardless of the difficulties involved in fighting both fascism and international capitalism, or, through fear of fascism . . . they sacrificed their anarchist principles and revolutionary objectives to bolster, to become part of the bourgeois state . . . Faced with an imperfect state of affairs and preferring defeat to a possibly Pyrrhic victory, Catalan anarchist leadership renounced anarchism in the name of expediency and removed the social transformation of Spain from their agenda.

“But what the CNT-FAI leaders failed to grasp was that the decision whether or not to implement Libertarian Communism was not theirs to make. Anarchism was not something which could be transformed from theory to practice by organisational decree. . .

“What the CNT-FAI leadership had failed to take on board was the fact that the spontaneous defensive movement of 19 July had developed a political direction of its own. On their own initiative, without any intervention by the leadership of the unions or political parties, the rank and file militants of the CNT, representing the dominant force within the Barcelona working class, together with other union militants had, with the collapse of State power, . . . been welded . . . into genuinely popular non-partisan revolutionary committees . . . in their respective neighbourhoods. They were the natural organisms of the revolution itself and direct expression of popular power.” [Op. Cit., p. 99]

In other words, the bulk of the CNT-FAI membership acted in an anarchist way while the higher committees compromised their politics and achievements in the name of anti-fascist unity. In this the membership followed years of anarchist practice and theory. It was fear of fascism which made many of the leading militants of the CNT abandon anarchist politics and instead embrace “anti-fascist unity” and compromise with the bourgeois republic. To claim that July 1936 indicated the failure of anarchism means to ignore the constructive work of millions of CNT members in their workplaces, communities and militias and instead concentrate on a few militants who made the terrible mistake of ignoring their political ideas in an extremely difficult situation. As we said above, this may explain the decision but it does not justify it.

Therefore, it is clear that the experiences of the CNT and FAI in 1936 indicate a failure of anarchists to apply their politics rather than the failure of those politics. The examples of the Makhnovists, the revolts in Spain between 1932 and 1934 as well as the Council of Aragon show beyond doubt that this is the case. Rather than act as anarchists in July 1936, the militants of the Catalan CNT and FAI ignored their basic ideas (not lightly, we stress, but in response to real dangers). They later justified their decisions by putting their options in a Marxist light — “either we impose libertarian communism, and so become an anarchist dictatorship, or we collaborate with the democratic government.” As Vernon Richards makes clear:

“Such alternatives are contrary to the most elementary principles of anarchism and revolutionary syndicalism. In the first place, an ‘anarchist dictatorship’ is a contradiction in terms (in the same way

as the 'dictatorship of the proletariat' is), for the moment anarchists impose their social ideas on the people by force, they cease being anarchists . . . the arms of the CNT-FAI held could be no use for imposing libertarian communism . . . The power of the people in arms can only be used in the defence of the revolution and the freedoms won by their militancy and their sacrificed. We do not for one moment assume that all social revolutions are necessarily anarchist. But whatever form the revolution against authority takes, the role of anarchists is clear: that of inciting the people to abolish capitalistic property and the institutions through which it exercises its power for the exploitation of the majority by a minority. . . the role of anarchists [is] to support, to incite and encourage the development of the social revolution and to frustrate any attempts by the bourgeois capitalist state to reorganise itself, which it would seek to do." [Op. Cit., pp. 43–6]

Their compromise in the name of anti-fascist unity contained the rest of their mistakes. Joining the "*Central Committee of Anti-Fascist Militias*" was the second mistake as at no time could it be considered as the embryo of a new workers' power. It was, rather, an organisation like the pre-war UGT "*Workers' Alliances*" — an attempt to create links between the top-level of other unions and parties. Such an organisation, as the CNT recognised before the war (see section 5), could not be a means of creating a revolutionary federation of workers' associations and communes and, in fact, a hindrance to such a development, if not its chief impediment.

Given that the CNT had rejected the call for revolution in favour of anti-fascist unit on July 20th, such a development does not reflect the CNT's pre-war program. Rather it was a reversion to Felix Morrow's Trotskyist position of joining the UGT's "*Workers' Alliance*" in spite of its non-revolutionary nature (see section 5).

The CNT did not carry out its program (and so apply anarchist politics) and so did not replace the Generalitat (Catalan State) with a Defence Council in which only union/workplace assemblies (not political parties) were represented. To start the process of creating libertarian communism all the CNT would have had to do was to call a Regional Congress of unions and invite the UGT, independent unions and unorganised workplaces to send delegates. It could also have invited the various neighbourhood and village defence committees that had either sprung up spontaneously or were already organised before the war as part of the CNT. Unlike the other revolts it took part in the 1930s, the CNT did not apply anarchist politics. However, to judge anarchism by this single failure means to ignore the whole history of anarchism and its successful applications elsewhere, including by the CNT and FAI during numerous revolts in Spain during the 1930s and in Aragon in 1936.

Ironically enough, Kropotkin had attacked the official CNT line of not mentioning Libertarian Communism "*until such time as we had captured that part of Spain that was in the hands of the rebels.*" In analysing the Paris Commune Kropotkin had lambasted those who had argued "*Let us first make sure of victory, and then see what can be done.*" His comments are worth quoting at length:

"Make sure of victory! As if there were any way of forming a free

commune without laying hands upon property! As if there were any way of conquering the foe while the great mass of the people is not directly interested in the triumph of the revolution, by seeing that it will bring material, moral and intellectual well-being to everybody.

“The same thing happened with regard to the principle of government. By proclaiming the free Commune, the people of Paris proclaimed an essential anarchist principle, which was the breakdown of the state.

“And yet, if we admit that a central government to regulate the relations of communes between themselves is quite needless, why should we admit its necessity to regulate the mutual relations of the groups which make up each commune? ... There is no more reason for a government inside the commune than for a government outside.”
[The Commune of Paris]

Kropotkin’s argument was sound, as the CNT discovered. By waiting until victory in the war they were defeated. Kropotkin also indicated the inevitable effects of the CNT’s actions in co-operating with the state and joining representative bodies. In his words:

“Paris sent her devoted sons to the town hall. There, shelved in the midst of files of old papers, obliged to rule when their instincts prompted them to be and to act among the people, obliged to discuss when it was needful to act, to compromise when no compromise was the best policy, and, finally, losing the inspiration which only comes from continual contact with the masses, they saw themselves reduced to impotence. Being paralysed by their separation from the people — the revolutionary centre of light and heat — they themselves paralysed the popular initiative.” [Op. Cit.]

Which, in a nutshell, was what happened to the leading militants of the CNT who collaborated with the state. As anarchist turned Minister admitted after the war, “[w]e were in the government, but the streets were slipping away from us. We had lost the workers’ trust and the movement’s unity had been whittled away.” [No Gods, No Masters, vol. 2, p. 274] The actions of the CNT-FAI higher committees and Ministers helped paralyse and defeat the May Days revolt of 1937. The CNT committees and leaders become increasingly isolated from the people, they compromised again and again and, ultimately, became an impotent force. Kropotkin was proved correct. Which means that far from refuting anarchist politics or analysis, the experience of the CNT-FAI in the Spanish Revolution *confirms* it.

In summary, therefore, the Spanish Revolution of 1936 indicates the failure of anarchists rather than the failure of anarchism.

One last point, it could be argued that anarchist theory allowed the leadership of the CNT and FAI to paint their collaboration with the state as a libertarian policy. That is, of course, correct. Anarchism is against the so-called “dictatorship of the proletariat” just as much as it is against the actual dictatorship of the bourgeoisie (i.e. the existing system and its off-shoots such as fascism). This allowed the CNT and FAI leaders to argue that they were following anarchist theory by not destroying the state completely in July 1936.

Of course, such a position cannot be used to discredit anarchism simply because such a revision meant that it can never be libertarian to abolish government and the state. In other words, the use made of anarchist theory by the leaders of the CNT and FAI in this case presents nothing else than a betrayal of that theory rather than its legitimate use.

Also, and more importantly, while anarchist theory was corrupted to justify working with other parties and unions in a democratic state, **Marxist** theory was used to justify the brutal one-party dictatorship of the Bolsheviks, first under Lenin and the Stalin. That, we feel, sums up the difference between anarchism and Leninism quite well.

Reply to errors and distortions in Phil Mitchinson's *Marxism and direct action*

Phil Mitchinson essay **Marxism and direct action** attempts to provide a “Marxist” (i.e. Leninist/Trotskyist) critique of the current “Direct Action” based groups which came to notice at various demonstrations across the world — most famously in Seattle, November 1999. He, correctly, links these groups and currents with anarchism. However, his “critique” is nothing but a self-contradictory collection of false assertions, lies and nonsense, as we shall prove (indeed, his “critique” seems more the product of envy at anarchist influence in these movements than the product of scholarship or objectivity). That is why we have decided to reply to his article — it gives us an ideal possibility to indicate the depths to which some Marxists will swoop to distort anarchist politics and movements.

1. How does Mitchinson impoverish the politics of the direct action groups?

He begins by noting that the “*recent anti-capitalist demonstrations have brought together many different groups protesting against the destruction of the environment, racism, the exploitation of the third world, and also many ordinary young people protesting at the state of things in general. They have certainly shattered the myth that everyone is happy and that the capitalist system is accepted as the only possible form of society.*” Of course, this is correct. What he fails to mention is that these demonstrations and groups managed to do this **without** the “guidance” of any Leninist party — indeed, the vanguard parties are noticeable by their absence and their frantic efforts to catch up with these movements. This, of course, is not the first time this has happened. Looking at every revolution we discover the “revolutionary” parties either playing no role in their early stages or a distinctly counter-productive role.

He states that “[a]ll around us we see the misery this system causes. Famine, war, unemployment, homelessness and despair, these are the violent acts that the system perpetrates against millions every day.” However, as much as these

aspects of capitalism are terrible, the anti-capitalist revolt expressed by many within the direct action groups is much wider than this (standard) leftist list. The movements, or at least parts of them, have a much more radical critique of the evils of capitalism — one that bases it self on abolishing alienation, domination, wage slavery, oppression, exploitation, the spiritual as well as material poverty of everyday life, by means of self-management, autonomy, self-organisation and direct action. They raise the possibility of playful, meaningful, empowering and productive self-activity to replace “*tedious, over-tiring jobs*” as well as the vision of a libertarian communist (i.e. moneyless, stateless) society. Mitchinson’s account of the movements he is trying to critique is as poverty stricken intellectually as the capitalist system these movements are challenging. Leninists like Mitchinson, instead of a swallowing a dose of humility and learning from the very different ways this new wave of protest is being framed, are trying to squeeze the protest into their own particular one-dimensional model of revolution. Being unable to understand the movements he is referring to, he pushes their vision into the narrow confines of his ideology and distorts it.

He goes on to state that “[w]itnessing and experiencing this destruction and chaos, young people everywhere are driven to protest.” Of course, anyone who is part of these movements will tell you that a wide cross-section of age groups are involved, not just “*young people*.” However, Mitchinson’s comments on age are not surprising — ever since Lenin, Bolshevik inspired Marxists have attributed other, more radical, political theories, analyses and visions to the alleged youth of those who hold these opinions (in spite of the facts). In other words, these ideas, they claim, are the produce of immaturity, inexperience and youth and will, hopefully, be grown out of. Just as many parents mutter to themselves that their anarchist (or socialist, homosexual, whatever) children will “grow out of it”, Lenin and his followers like Mitchinson consider themselves as the wiser, older relations (perhaps a friendly Uncle or a Big Brother?) of these “young” rebels and hope they will “grow out of” their infantile politics.

The word patronising does not do Mitchinson justice!

2. Does anarchism “*juxtapose*” theory and action?

Now Mitchinson launches into his first strawman of his essay. He asserts:

“However, the idea of getting involved in a political organisation is a turn off for many, who understandably want to do something, and do something now. In reality, the attempt to juxtapose organisation, discussion, and debate with ‘direct action’ is pure sophistry.”

We are not aware of any anarchist or direct action group which does not discuss and debate their actions, the rationale of their actions and the aims of their actions. These demonstrations that “*young people*” apparently turn up at are, in fact, organised by groups who have meetings, discuss their ideas, their objectives, their politics, and so on. That much should be obvious. In reality, it is Mitchinson who expresses “*pure sophistry*,” not the “*many*” who he claims act without thinking. And, of course, he fails to mention the two days of meetings, discussion and debate which took place the Saturday/Sunday before the May

Day actions in London. To mention the May Day 2000 conference would confuse the reader with facts and so goes unmentioned.

He then asserts that the *“ideas of Marrism are not the subject of academic study, they are precisely a guide to action.”* Of course, we have to point out here that the Marxist Parties Mitchinson urges us to build did not take part in organising the actions he praises (a few members of these parties did come along, on some of them, to sell papers, of course, but this is hardly a “vanguard” role). In general, the vanguard parties were noticeable by their absence or, **at best**, their lack of numbers and involvement. If we judge people by what they do, rather than what they say (as Marx urged), then we must draw the conclusion that the Marxism of Mitchinson is a guide to inaction rather than action.

Mitchinson continues by stating Marxists *“are all in favour of action, but it must be clearly thought out, with definite aims and objectives if it is to succeed. Otherwise we end up with directionless action.”* It would be impolite to point out that no anarchist or member of a direct action organisation would disagree with this statement. Every anti-capitalist demonstration has had a definite aim and objective, was clearly thought out and organised. It did not “just happen.” Mitchinson presents us with a strawman so fragile that even a breeze of reality would make it disintegrate.

The question is, of course, what kind of organisation do we create, how do we determine our aims and objectives. That is the key question, one that Mitchinson hides behind the strawman of organisation versus non-organisation, planned action versus *“directionless action.”* To state it bluntly, the question is actually one of do we organise in an authoritarian manner or a libertarian manner, not whether or not we organise. Mitchinson may not see the difference (in which case he thinks all organisation is “authoritarian”) but for anarchists and members of direct action groups the difference is vital.

He goes on to state:

“Furthermore without political organisation who decides what action is to be taken, when and where? There can be no greater direct action than the seizing of control over our own lives by the vast majority of society. In that act lies the essence of revolution. Not just an aimless ‘direct action’ but mass, democratic and conscious action, the struggle not just against capitalism, but for a new form of society, socialism.”

Again Mitchinson presents us with the strawman of *“conscious”* action verses *“aimless”* action. As noted above, the anti-capitalist demonstrations **were** organised — non-hierarchical groups decided collectively what action was to be organised, when and where. The real question is not organisation versus non-organisation but rather authoritarian versus libertarian organisation. Either decision making from the bottom up or decision making from the top-down. As for there bring *“no greater direct action”* than revolution, well, anarchists have been saying that for over one hundred years — we don’t need a Marxist to tell us our own ideas!

3. How does Mitchinson distort the London May Day demo?

He then gets to the crux of the issue — “*So, what comes next?*” He goes on to assert:

“The organisers of the demo tell us this was not a protest in order to secure changes, reforms apparently are a waste of time. No, simply by participating in what they call the ‘carnival’ we become better people, and eventually more and more people will participate, until a critical mass is reached and we all ignore capitalism, don’t pay our bills, until they go away. What an infantile flight of fancy!”

Yes, indeed, what an infantile flight of fancy! However, the flight is purely Mitchinson’s. No one in RTS (or any other anarchist) makes such a claim. Yes, RTS urged people to take part in a carnival — as they argue, “[m]any of the great moments of revolutionary history were carnivalesque . . . But we are not waiting for these moments of carnivalesque revolution, we are trying to merge them into every moment of everyday life. We cannot live on one-off days, a letting of steam, safety valves for society enabling life to return to normal the next day or for hierarchical domination to return, as did in so many historical revolutions. Revolution is not an act but a process and carnival can prepare us for this process.” [Maybe, p. 9] Thus “carnival” is **not** seen as an end to itself (as Mitchinson asserts) but rather an aid to the creation of a revolutionary movement. Mitchinson confuses a celebration of May Day with an insurrection! In the words of **Maybe**:

“And although Mayday is just one day, it seeks to incite continuous creativity and action towards a radical remaking of everyday life. Steeped in a history of daily struggle, of ‘day in day out’ organising for social change, but pulsating with the celebration of renewal and fresh hope that returns with the coming of summer. Mayday will always be a pivotal moment.” [Maybe, p. 5]

Maybe is clear — we need to organise the daily struggle and enjoy ourselves while we are at it. Mitchinson’s distortion of that message is pitiful.

4. Do anarchists really think “*the bosses will do nothing to defend their system*”?

He continues:

“The genuine intentions of those protesting is not open to question. However, the way to hell is paved with many such good intentions. Are we really to believe that whilst we all ‘place ourselves outside of capitalism’, the bosses will do nothing to defend their system? This ostrich like tactic of burying our heads in the sand until they go away is not serious. Nor is it action. In reality, it is irresponsible, indirect inaction.”

The comment about “*indirect inaction*” is somewhat funny coming from a political tendency which did not produce a movement of the importance of Seattle 1999 and is now trying to recruit from it. But it would be interesting to discover in which anarchist work comes the notion that we do not think the bosses will not defend their system. Yes, Lenin did claim that anarchists would “*lay down their arms*” after a revolution, but as Murray Bookchin notes, anarchists are “*not so naive as to believe anarchism could be established overnight. In imputing this notion to Bakunin, Marx and Engels wilfully distorted the Russian anarchist’s views. Nor did the anarchists . . . believe that the abolition of the state involved ‘laying down arms’ immediately after the revolution. . .*” [**Post-Scarcity Anarchism**, p. 213] Bakunin, for example, thought the “*Commune would be organised by the standing federation of the Barricades*” and that “*the federation of insurgent associations, communes and provinces . . . [would] organise a revolutionary force capable of defeating reaction . . . it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution.*” [**Michael Bakunin: Selected Writings**, p. 170 and p. 171]

Moreover, RTS actions have continually come into conflict with the state and its forces of defence. Mitchinson seems to think that the participants of RTS and its demonstrations are incapable of actually understanding and learning from their experiences — they have seen and felt the capitalist system defending itself. Anyone on the J18, N30, A16 or M1 demos or just watching them on TV would have seen the capitalist system defending itself with vigour — and the protestors **fighting back**. Rather than acknowledge the obvious, Mitchinson asserts nonsense. The only person burying their head in the sand is Mitchinson if he ignores the experiences of his own senses (and the basic principles of materialism) in favour of an ideological diatribe with no basis in reality.

What is “*irresponsible*” is misrepresenting the viewpoints of your enemies and expecting them not to point out your errors.

5. How does Mitchinson misrepresent anarchist organisation?

Mitchinson now moves onto the real enemy, anarchism. He asserts that:

“Anarchist organisations have always hidden behind a facade of ‘self-organisation’. They claim to have no leaders, no policy etc. Yet who decides?”

Yes, anarchist groups claim to have no leaders but they do not claim to be without policies. Anyone with any comprehension of anarchist theory and history would know this (just one example, Bakunin argued that we needed to establish “*a genuine workers’ program — the policy of the International [Workers Association]*” [*“The Policy of the International”*, **The Basic Bakunin**, p. 100]).

Mitchinson asks the question, if we do not have leaders, “*who decides?*” That in itself exposes the authoritarian nature of his politics and the Bolshevik style party. He obviously cannot comprehend that, without leaders deciding things for us, we manage our own affairs — we decide the policy of our organisations

collectively, by the direct democracy of the membership. Forgetting his early comment of that there is “*no greater direct action than the seizing of control over our own lives by the vast majority of society,*” he now asks how the vast majority of society can seize control over our own lives without leaders to tell us what to do!

Anarchists reject the idea of leaders — instead we argue for the “*leadership of ideas.*” As we discuss this concept in section J.3.6 and so will not do so here. However, the key concept is that anarchists seek to spread their ideas by discussing their politics **as equals** in popular organisations and convincing the mass assemblies of these bodies by argument. Rather than using these bodies to be elected to positions of power (i.e. leadership as it is traditionally understood) anarchists consider it essential that power remains in the hands of the base of an organisation and argue that the policies of the organisation be decided by the member directly in assemblies and co-ordinated by conferences of mandated, recallable delegates (see section A.2.9 for more discussion).

This is to be expected, of course, as anarchists believe that a free society can only be created by organisations which reflect the principles of that society. Hence we see policies being made by those affected by them and oppose attempts to turn self-managed organisations into little more than vehicles to elect “leaders.” A free society is a self-managed one and can only be created by self-management in the class struggle or revolutionary process. All that revolutionaries should do is try and influence the decisions these organisations make by discussing our ideas with their membership — simply as any other member could in the mass assemblies the organisation is built upon. Any attempt by revolutionaries to seize power upon behalf of these organisations means destroying their revolutionary potential and the revolution itself by replacing the participation of all with the power of a few (the party).

Thus anarchist theory and practice is very clear on the question “*who decides*” — it is those who are affected by the question via group assemblies and conferences of mandated, recallable delegates. Rather than have “*no policy,*” policy in an anarchist organisation is decided directly by the membership. Without “*leaders*” — without power delegated into the hands of a few — who else **could** make the decisions and policy? That Mitchinson cannot comprehend this implies that he cannot envision a society without a few telling the many what to do.

He continues:

“If there was no leadership and no policy then there could be no action of any kind. The recent demonstrations have been highly organised and co-ordinated on an international scale. Good, so it should be. However, without organisation and democracy no-one, except a clique at the top, has any say in why, where and when. Such a movement will never bring international capital trembling to its knees.”

Firstly, we must point out that these demonstrations which have spread like wild-fire across the world have, most definitely, made international capital nervous. Secondly, we must point out that no Leninist vanguards were involved in organising them (a few members turned up to sell papers later, once their significance had registered with the party leadership). Thirdly, we must point out that no Leninist vanguard has made “*international capital*” tremble in the

knees for quite a few decades — since 1917, only Stalinist vanguards have had any effect (and, of course, “*international capital*” soon realised they could work with the Bolsheviks and other “Communist” leaders as one ruling elite with another). It seems somewhat ironic that a Leninist, whose movement was noticeable in its absence, mocks the first movement to scare the ruling class for nearly 30 years.

Secondly, we must note that the policy decided upon by the multitude of groups across the world was decided upon by the members of those groups. They practised organisation and **direct** democracy to make their policy decisions and implement them. Given that Mitchinson wonders how people can make decisions without leaders, his comments about rule by “*a clique at the top*” are somewhat ironic. As the history of the Russian Revolution indicates, a highly centralised state system (which mimics the highly centralised party) soon results in rule by the top party officials, not by the mass of people.

Mitchinson again decides to flog his fallacy of organisation versus non-organisation:

“One of the best known anarchist groups in Britain, Reclaim the Streets, save the game away in their spoof Mayday publication, ‘Maybe’. Incidentally, who wrote these articles, who decided what went in and what didn’t, who edited it, where did the money come from? Our intention here is not to accuse them of dodgy financing — simply to point out that this ‘no leaders’ stuff is a self-organised myth.”

It states who put together **MayDay** on page 5 of the paper. It was “*an organic group of ‘guerrilla gardeners’*” — in other words, members of **Reclaim the Streets** who desired to produce the paper for that event. These people would have joined the group producing it via the weekly RTS open meetings and would have been held accountable to that same open meeting. No great mystery there — if you have even the slightest vision of how a non-hierarchical organisation works. Rather than being a “*myth*”, RTS shows that we do not need to follow leaders — instead we can manage our own organisations directly and freely participate in projects organised via the main open meeting. Writing articles, editing, and so on are not the work of “*leaders*” — rather they are simply tasks that need doing. They do not imply a leadership role — if they did then every hack journalist is a “*leader*.”

He continues to attack what he cannot understand:

“On page 20 they announce ‘Reclaim the streets is non-hierarchical, spontaneous and self-organised. We have no leaders, no committee, no board of directors, no spokes people. There is no centralised unit for decision making, strategic planning and production of ideology. There is no membership and no formalised commitment. There is no master plan and no pre-defined agenda.’

“There are two problems here. Firstly who is ‘we’, who made the above statement, and who decided it. Secondly, if it were true, it would not be something of which to be proud. Whether you like it or not, there is no way the capitalist system will ever be overthrown by such a haphazard and slipshod method.”

Taking the first issue, “*who is ‘we,’ who made the above statement, and who decided it.*” Why, it is the membership of RTS — decided via their weekly open meeting (as mentioned on that page). That Mitchinson cannot comprehend this says a lot about his politics and vision. He cannot comprehend self-management, direct democracy. He seems not to be able to understand that groups can make decisions collectively, without having to elect leaders to make any decisions for them.

Taking the second issue, it is clear that Mitchinson fails to understand the role of RTS (and other anarchist groups). Anarchists do not try to overthrow capitalism **on behalf of others** — they urge them to overthrow it themselves, by their own direct action. The aim of groups like RTS is to encourage people to take direct action, to fight the powers that be and, in the process, create their own organs of self-management and resistance. Such a process of working class self-activity and self-organisation in struggle is the starting process of every revolution. People in struggle create their own organisations — such as soviets (workers’ councils), factory committees, community assemblies — through which they start to manage their own affairs and, hopefully, overthrow the state and abolish capitalism. It is not the task of RTS to overthrow capitalism, it is the task of the whole population.

Moreover, many anarchists do see the need for a specific anarchist organisation — three national federations exist in the UK, for example. RTS does not need to organise in this fashion simply because such groups **already** exist. It is not its role — its role is a means to encourage self-activity and direct action as well as raising libertarian ideas in a popular manner. For more “serious” political organisation, people can and do turn to other anarchist groups and federations.

The street carnival principle of RTS is precisely the type of organising anarchists excel at — namely fun organising that catches the fun and excitement of popular direct action and, most importantly, **gets people out on the streets** — something Marxists have failed to do very well (if at all). It’s a small step from organising a street carnival to further, “more serious” organising. Anarchist revolution is about bringing joy back into human lives, not endless (and often dishonest) polemics on the ideas of long dead philosophers. Rather, it is about creating a philosophy which, while inspired by past thinkers, is not subservient to them and aims to base itself on **current** struggles and needs rather than past ones. It is also about building a new political culture, one that is popular, active, street-based (versus ivory-tower elitist), and above all, fun. Only this way can we catch the imagination of everyday people and move them from resigned apathy to active resistance. The Marxists have tried their approach, and it has been a resounding failure — everyday people consider Marxism at best irrelevant, and at worst, inhuman and lifeless. Fortunately, anarchists are not following the Marxist model of organising, having learned from history

Thus Mitchinson fails to understand the role of RTS or its position in the UK anarchist movement.

He then asserts:

“There is no theory, no coherent analysis of society, no alternative programme. To brag of a lack of direction, a lack of purpose and a lack of coherence, in the face of such a highly organised and brutal enemy as international capital, is surely the height of irresponsibil-

ity.”

Firstly, anyone reading **Maybe** or other RTS publications will quickly see there is theory, coherent analysis and an alternative vision. As Mitchinson has obviously read **Maybe** we can only assume his claim is a conscious lie. Secondly, RTS in the quoted passage clearly do **not** “brag of a lack of direction, a lack of purpose and a lack of coherence.” They do state there is no “centralised unit for decision-making” — which is true, they have a **decentralised** unit for decision-making (direct democracy in open meetings). There is “no master-plan,” etc. as any plans are decided upon by these open meetings. There is no pre-defined agenda because, as a democratic organisation, it is up to the open meeting to define their own agenda.

It is only Mitchinson’s **assumption** that only centralised parties, with leaders making the decisions, can have “direction,” “purpose” and “coherence.” As can be seen **by their actions** that RTS **does** have direction, purpose and coherence. Needless to say, while other anarchists may be critical about RTS and its actions, we do not deny that it has been an effective organisation, involving a great many people in its actions who would probably not be involved in political activities. Rather than being “irresponsible,” RTS shows the validity of libertarian organisation and its effectiveness. No Marxist Party has remotely approached RTS’s successes in terms of involving people in political actions. This is hardly a surprise.

6. How does Mitchinson define anarchism wrongly?

Mitchinson states:

“In reality the leaders of these movements are not devoid of ideology, they are anarchists. Anarchism is not simply a term of abuse, it comes from the Greek word ‘anarchos’ meaning ‘without government’. To anarchists the state — the institutions of government, the army, police, courts etc. — is the root cause of all that is wrong in the world. It must be destroyed and replaced not with any new form of government, but the immediate introduction of a stateless society.”

Firstly, “anarchos” actually means “without authority,” or “contrary to authority” (as Kropotkin put it). It does **not** mean “without government” as such (although it commonly is used that way). This means that anarchism does **not** consider the state as “the root of all that is wrong with the world” — we consider it, like capitalism (wage slavery), patriarchy, hierarchy in general, etc., as a symptom of a deeper problem, namely authority (or, more precisely, authoritarian social relations, hierarchical power — of which class power is a subset). Therefore anarchist theory is concerned with more than just the state — it is against capitalism just as much as it is against the state, for example.

Thus, to state the obvious, as anyone familiar with anarchist theory could tell you, anarchists do not think that “the state” is the root of all that is wrong in the world. Marxists have asserted this for years — unfortunately for them, repetition does not make something true! Rather, anarchists see the state as **one** of the causes of evil in the world and the main protector of all the rest. We

also stress that in order to combat all the evils, we need to destroy the state so that we are in a position to abolish the other evils by being in control of our own lives. For example, in order to abolish capitalism — i.e. for workers' to seize the means of life — the state, which protects property rights, must be destroyed. Without doing so, the police and army will come and take back that which the workers' have taken. However, we do not claim that the state causes all of our problems — we do claim that getting rid of the state is an essential act, on which many others are dependent.

As Brian Morris argues:

“Another criticism of anarchism is that it has a narrow view of politics: that it sees the state as the fount of all evil, ignoring other aspects of social and economic life. This is a misrepresentation of anarchism. It partly derives from the way anarchism has been defined, and partly because Marxist historians have tried to exclude anarchism from the broader socialist movement. But when one examines the writings of classical anarchists... as well as the character of anarchist movements... it is clearly evident that it has never had this limited vision. It has always challenged all forms of authority and exploitation, and has been equally critical of capitalism and religion as it has been of the state.” [*“Anthropology and Anarchism,” Anarchy: A Journal of Desire Armed*, no. 45, p. 40]

As can be seen, Mitchinson repeats into the usual Marxist straw man.

7. Does anarchism reject fighting for reforms?

After asserting the usual Marxist falsehoods about anarchism, he moves on:

“This opposition to the state and authority leads to a rejection of participation in any form of parliamentary activity, belonging to a political party or fighting for any reforms, that is political change through the state.”

Again Mitchinson smuggles in a falsehood into his “analysis.” Anarchists do not reject *“fighting for any reforms”* — far from it. We do reject parliamentary activity, that is true, but we think that reforms can and must be won. We see such reforms coming via the direct action of those who desire them — for example, by workers striking for better working conditions, more wages and so. Anyone with even a passing awareness of anarchist thought would know this. Indeed, that is what direct action means — it was coined by French anarcho-syndicalists to describe the struggle for reforms within capitalism!

As for rejecting parliamentary activity, yes, anarchists do reject this form of “action.” However, we do so for reasons Mitchinson fails to mention. Section J.2 of the FAQ discusses the reasons why anarchists support direct action and oppose electioneering as a means of both reform and for revolution.

Similarly, anarchists reject political parties but we do not reject political organisations — i.e. specific anarchist groups. The difference is that political parties are generally organised in a hierarchical fashion and anarchist federations

are not — we try and create the new world when we organise rather than reproducing the traits of the current, bourgeois, one.

Needless to say, Mitchinson seeks to recruit the people he is slandering and so holds out an olive-branch by stating that “[o]f course, *Marxism is opposed to the brutal domination of the capitalist state too. Marx saw a future society without a state but instead ‘an association in which the free development of each is the condition for the free development of all.’ That is a self-governing people. The question however is how can this be achieved?*”

Yes, as Bakunin argued, Marxists do not reject our programme out of hand. They claim to also seek a free society and so Mitchinson is correct — the question is how can this be achieved. Anarchists argue that a self-governing people can only be achieved by self-governing means — “*Bakunin . . . advocated socialist (i.e., libertarian) means in order to achieve a socialist (i.e., libertarian) society.*” [Arthur Lehning, “*Introduction*”, **Michael Bakunin: Selected Writings**, p. 27] Thus means and ends must be consistent — revolutionary movements must be organised in a way that reflects the society we want to create. Thus a self-governing society can only be created by self-governing organisations and a self-governing movement. If the revolutionary movement reflect bourgeois society — for example, is hierarchical — then it cannot create a free society. That is the rationale for the way anarchist groups organise, including RTS. Marxists, as we will see, disagree and consider how a revolutionary movement organises itself as irrelevant.

Also, we must note that earlier Mitchinson denied that a self-governing organisation could exist when he was discussing RTS. He asserted that “[i]f there was no leadership and no policy then there could be no action of any kind.” Now he claims that it is possible, but only **after** the revolution. We will note the obvious contradiction — how do people become capable of self-government post-revolution if they do not practice it pre-revolution and, obviously, during the revolution?

8. Does anarchism see the state as the root of all problems?

Mitchinson moves on to assert that:

“Since anarchism sees in the state the root of all problems, it therefore believes these problems will be resolved by the destruction of the state.”

As noted above, anarchists do **not** see in the state the root of all problems. We do urge the destruction of the state but that is because the state is the protector of existing society and in order to transform that society we need get rid of it. Kropotkin, for example, was well aware of “*the evil done by Capitalism and the State that supports it.*” [**Evolution and Environment**, p. 83] Rather than seeing the State as the root of all evil, anarchists are well aware that evil is caused by many things — particularly capitalism — and that the state, as well as causing its own evils, supports and protects others. Thus anarchists are aware that the state is a tool for minority rule and only one source of evil.

Mitchinson, after misrepresenting anarchist thought, states:

“Marrism, meanwhile, sees the division of society into classes, a minority who own the means of producing wealth, and the majority of us whose labour is the source of that wealth, as the crux of the matter. It is this class division of society which gives rise to the state — because the minority need a special force to maintain their rule over the majority — which has evolved over thousands of years into the complicated structures we see today.”

Anarchists would agree, as far as this goes. Bakunin argued that the State *“is authority, domination, and forced, organised by the property-owning and so-called enlightened classes against the masses.”* He saw the social revolution as destroying capitalism and the state at the same time, that is *“to overturn the State’s domination, and that of the privileged classes whom it solely represents.”* [The Basic Bakunin, p. 140] The idea that the state is a means to ensure class rule is one anarchists, as can be seen, would agree with.

However, anarchists do not reduce their understanding of the state to this simplistic Marxist analysis. While being well aware that the state is the means of ensuring the domination of an economic elite, anarchists recognise that the state machine also has interests of its own. The state, for anarchists, is the delegation of power into the hands of a few. This creates, by its very nature, a privileged position for those at the top of the hierarchy:

“A government, that is a group of people entrusted with making the laws and empowered to use the collective force to oblige each individual to obey them, is already a privileged class and cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put in a privileged position, the government is already at odds with the people whose strength it disposes of.” [Malatesta, **Anarchy**, p. 34]

Thus, while it is true that the state (particularly under capitalism) acts as the agent of the capitalist class, it does not mean that it does not have interests of its own. The State has developed as a means of imposing minority rule — that much anarchists and Marxists can agree upon. To do so it has developed certain features, notably delegation of power into the hands of a few. This feature of the state is a product of its function. However, function and feature are inseparable — retain the feature and the function will be re-established. In other words, maintain the state and minority rule will be re-established.

The simplistic class analysis of the state has always caused Marxists problems, particularly Trotskyists who used it to deny the obvious class nature of Stalinist Russia. Rather than see the USSR as a class society in which the State bureaucracy exploited and oppressed the working class for its own benefits, Trotskyists argued it was an autocratic, privileged bureaucracy in a classless society. As anarchist Camillo Berneri argued:

“In history there is no absurdity. An autocratic bureaucracy is a class, therefore it is not absurd that it should exist in a society where classes remain — the bureaucratic class and the proletarian class. If the USSR was a ‘classless’ society, it would also be a society without

a bureaucratic autocracy, which is the natural fruit of the permanent existence of the State. [“*The State and Classes*”, **Cienfuegos Press Anarchist Review**, no, 4, p. 49]

The weakness (or incompleteness) of the Marxist understanding of the state can best be seen by Trotsky’s and his followers lack of understanding of Stalinism. As the state owned all the land and means of production, there could be no classes and so the Soviet Union must be a classless society. However, the obvious privileges of the bureaucracy could not be denied (as Trotsky was once a leading bureaucrat, he saw and experienced them at first hand). But as the state bureaucracy could not be a class and have class interests (by definition), Trotsky could not see the wood for the trees. The actual practice of Leninism in power is enough to expose its own theoretical weaknesses.

9. Why is Mitchinson wrong about the “*Abolition [i.e. Abolition] of the state*”?

Mitchinson moves on to argue that the “*modern capitalist state can wear many guises, monarchy, republic, dictatorship, but in the end its purpose remains the same, to maintain the minority rule of the capitalist class. Marxism’s goal therefore is not simply to abolish the state, but to put an end to class society.*” Needless to say, that is also anarchism’s goal. As Bakunin argued, “*political transformation . . . [and] economic transformation . . . must be accomplished together and simultaneously.*” [The **Basic Bakunin**, p. 106] So, as can be seen, anarchism’s goal is not simply abolishing the state, but to put an end to class society. That anarchists have always argued the state and capitalism must be destroyed at the same time is easily discovered from reading their works.

Continuing this theme he argues that the state “*was born with the split of society into classes to defend private property. So long as there are classes there will be a state. So, how can class society be ended? Not by its denial, but only by the victory of one of the contending classes. Triumph for capitalism spells ruin for millions.*”

Of course, we could point out here that many anthropologists disagree with the claim that the state is a product of class society. As Michael Taylor summarises, the “*evidence does not give this proposition a great deal of support. Much of the evidence which has been offered in support of it shows only that the primary states, not long after their emergence, were economically stratified. But this is of course consistent also with the simultaneous rise . . . of political and economic stratification, or with the **prior** development of the state — i.e. of **political** stratification — and the creation of economic stratification by the ruling class.*” [Community, Anarchy and Liberty, p. 132]

Also, of course, as should be obvious from what we have said previously, anarchists do not think class society can be ended by “denial.” As is clear from even a quick reading of any anarchist thinker, anarchists seek to end class society as well as the state. However, we reject as simplistic the Marxist notion that the state exists purely to defend classes. The state has certain properties **because it is a state** and one of these is that it creates a bureaucratic class around it due to its centralised, hierarchical nature. Within capitalism, the state bureaucracy is part of the ruling class and (generally) under the control

of the capitalist class. However, to generalise from this specific case is wrong as the state bureaucracy is a class in itself — and so trying to abolish classes without abolishing the state is doomed to failure.

10. Why is Mitchinson’s comment that we face either “*socialism or barbarism*” actually undermine his case?

Mitchinson continues:

“As Marx once explained the choice before us is not socialism or the status quo, but socialism or barbarism.”

We should point out that it Rosa Luxemburg who is usually associated with this quote. She made her famous comment during the First World War. The start of this war saw the Marxist German Social Democratic Party (and a host of others) vote for war credits in Parliament. This party was a mass workers’ party which aimed to use every means, including elections, to gain reforms for the working class. The net end result of this strategy was the voting for war credits and the support of their state and ruling class in the war — that is, the betrayal of the fundamental principles of socialism.

This event did not happen out of the blue. It was the end result of years of working within the bourgeois political system, of using elections (“*political activity*”) as a means of struggle. The Social Democratic Parties had already been plagued with reformist elements for years. These elements, again, did not come from nowhere but were rather the response to what the party was actually doing. They desired to reform the party to bring its rhetoric in-line with its practice. As one of the most distinguished historians of this period put it, the “*distinction between the contenders remained largely a subjective one, a difference of ideas in the evaluation of reality rather than a difference in the realm of action.*” [C. Schorske, **German Social Democracy**, p. 38] The debacle of 1914 was a logical result of the means chosen, the evidence was already there for all to see (except, apparently, Lenin who praised the “*fundamentals of parliamentary tactics*” of the German and International Social Democracy and how they were “*at the same time implacable on questions of principle and always directed to the accomplishment of the final aim*” in his obituary of August Bebel in 1913! [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 248])

Needless to say, this result had been predicted by Bakunin over 40 years previously. And Mitchinson wants us to repeat this strategy? As Marx said, history repeats itself — first it is tragedy, second time it is farce.

11. Why is Mitchinson wrong to assert anarchists do not believe in defending a revolution?

Mitchinson argues that the “*victory of the working class can only mean the destruction of the capitalist state. Will the capitalists take defeat like sporting ladies and gentlemen, retiring quietly to the pavilion? No, all history suggests*

that they would not. The workers would need to create a new state, for the first time to defend the rule of the majority over the minority."

Yes, indeed, all history **does** show that a ruling class will not retire quietly and a revolution will need to defend itself. If anarchists **did** believe that they would retire peacefully then Marxists would be correct to attack us. However, Marxist assertions are false. Indeed, they must think anarchists are morons if they genuinely do think we do not believe in defending a revolution. A few quotes should suffice to expose these Marxist claims as lies:

"Commune will be organised by the standing federation of the Bar-ricades... [T]he federation of insurgent associations, communes and provinces... [would] organise a revolutionary force capable of defeating reaction... it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution." [Michael Bakunin: Selected Writings, pp. 170–1]

*"[L]et us suppose... it is Paris that starts [the revolution]... Paris will naturally make haste to organise itself as best it can, in revolutionary style, after the workers have joined into associations and made a clean sweep of all the instruments of labour, every kind of capital and building; armed and organised by streets and **quartiers**, they will form the revolutionary federation of all the **quartiers**, the federative commune... All the French and foreign revolutionary communes will then send representatives to organise the necessary common services... and to organise common defence against the enemies of the Revolution."* [Op. Cit., p. 178–9]

Bakunin was well aware that revolution implied "civil war" — i.e. attempts by the ruling class to maintain its power (see, for example, his "Letters to a Frenchman" in **Bakunin on Anarchism**). As can be seen, Bakunin was well aware of the needs to defend a revolution after destroying the state and abolishing capitalism. Similarly we discover Malatesta arguing that we should "[a]rm all the population," and the "creation of a voluntary militia, without powers to interfere as militia in the life of the community, but only to deal with any armed attacks by the forces of reaction to re-establish themselves, or to resist outside intervention by countries as yet not in a state of revolution." [**Life and Ideas**, p. 170 and p. 166] In Malatesta's words:

"But, by all means, let us admit that the governments of the still unemancipated countries were to want to, and could, attempt to reduce free people to a state of slavery once again. Would this people require a government to defend itself? To wage war men are needed who have all the necessary geographical and mechanical knowledge, and above all large masses of the population willing to go and fight. A government can neither increase the abilities of the former nor the will and courage of the latter. And the experience of history teaches us that a people who really want to defend their own country are invincible: and in Italy everyone knows that before the corps of volunteers (anarchist formations) thrones topple, and regular armies composed of conscripts or mercenaries disappear... [Some people] seem

*almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of a respect for the **freedom** of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!”* [Anarchy, pp. 40–1]

Not only do we have this theoretical position, we can also point to concrete historical examples — the Makhnovist movement in the Russian Revolution and the CNT militias during the Spanish Revolution, among others — that prove that anarchists do recognise the need and importance of defending a successful revolution.

Therefore, statements asserting that anarchists are against defending a revolution are either spreading a conscious lie or a product of deep ignorance.

Thus the question is **not** one of defending or not defending a revolution. The question is **how** do we defend it (and, another key question, what **kind** of revolution do we aim for). Marxists urge us to “*create a new state, for the first time to defend the rule of the majority over the minority.*” Anarchists reply that every state is based on the delegation of power into the hands of a minority and so cannot be used to defend the rule of the majority over the minority. Rather, it would be the rule of those who claim to represent the majority. The confusion between people power and party power is at the root of why Leninism is not revolutionary.

Mitchinson then quotes Lenin and Trotsky to defend his assertion:

“The proletariat needs the state only temporarily. We do not at all disagree with the anarchists on the question of the abolition of the state as the aim. We maintain that, to achieve this aim, we must temporarily make use of the instruments resources and methods of state power against the exploiters.” [Lenin]

“Marxists are wholly in agreement with the anarchists in regard to the final goal: the liquidation of the state. Marxists are statist only to the extent that one cannot achieve the liquidation of the state simply by ignoring it.” [Trotsky]

Of course, quoting Lenin or Trotsky when they make a false assertion does not turn lies into truth. As proven above, anarchists are well aware of the necessity of overthrowing the state by revolution **and** defending that revolution against attempts to defeat it. To state otherwise is to misrepresent anarchist theory on this subject. Moreover, despite Trotsky’s claims, anarchists are aware that you do not destroy something by ignoring it. The real question is thus **not** whether to defend a revolution or whether to shatter the state machine. The questions are, **how** do you shatter the state, what do you replace existing society with and how do you defend a revolution. To state otherwise is to build a strawman — unfortunately much of Lenin’s “masterpiece” **The State and Revolution** is based on destroying this self-created strawman.

12. Would the “workers’ state” really be different, as Mitchinson claims?

Mitchinson argues that from “*the very beginning this would be like no previous state machine. From day one it would be in effect a semi-state.*” The question is, for anarchists, whether this “semi-state” is marked by the delegation of power into the hands of a government. If so, then the “semi-state” is no such thing — it is a state like any other and so an instrument of minority rule. Yes, this minority may state it represents the majority but in practice it can only represent itself and claim that is what the majority desires.

Hence, for anarchists, “*the essence of the state ... [is] centralised power **or to put it another way the coercive authority** of which the state enjoys the monopoly, in that organisation of violence known as ‘government’; in the hierarchical despotism, juridical, police and military despotism that imposes laws on everyone.*” [Luigi Fabbri, **Op. Cit.**, pp. 24–5] The so-called “semi-state” is nothing of the kind — it is a centralised power in which a few govern the many. Therefore, the “workers’ state” would be “workers” in name only.

Mitchinson continues:

“The task of all previous revolutions was to seize state power. From the experience of the Paris Commune of 1871 Marx and Engels concluded that it would not be possible for the workers to simply use the old state apparatus, they would instead have to replace it with an entirely new one, to serve the interests of the majority and lay the basis for a socialist society.”

Needless to say, he forgets the **key** question — **who** is to seize power. Is it the majority, directly, or a minority (the leaders of a party) who claim to represent the majority. Leninists are clear, it is to be the party, not the working class as a whole. They confuse party power with class power. In the words of Lenin:

*“The very presentation of the question — ‘dictatorship of the Party **or** dictatorship of the class, dictatorship (Party) of the leaders **or** dictatorship (Party) of the masses?’ — is evidence of the most incredible and hopeless confusion of mind ... [because] classes are usually ... led by political parties. ... “*

And:

“To go so far in this matter as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid.” [**Left-wing Communism: An Infantile Disorder**, pp. 25–6 and p. 27]

However, what is **truly** stupid is confusing the rule by a minority with that of the majority managing their own affairs. The two things are different, they generate different social relationships and to confuse the two is to lay the ground work for the rule by a bureaucratic elite, a dictatorship of state officials **over** the working class.

Now we come to the usual Leninist claims about Bolshevik theory:

“To ensure that the workers maintain control over this state, Lenin argued for the election of all officials who should be held accountable and subject to recall, and paid no more than the wage of a skilled worker. All bureaucratic tasks should be rotated. There should be no special armed force standing apart from the people, and we would add, all political parties except fascists should be allowed to organise.”

This is what Lenin, essentially, said he desired in **The State and Revolution** (Mitchinson misses out one key aspect, to which we will return later). Anarchists reply in three ways.

Firstly, we note that *“much that passes for ‘Marxism’ in **State and Revolution** is pure anarchism — for example, the substitution of revolutionary militias for professional armed bodies and the substitution of organs of self-management for parliamentary bodies. What is authentically Marxist in Lenin’s pamphlet is the demand for ‘strict centralism,’ the acceptance of a ‘new’ bureaucracy, and the identification of soviets with a state.”* [Murray Bookchin, **Post-Scarcity Anarchism**, p. 213] As an example, let us look at the recall of “officials” (inspired by the Paris Commune). We find this in Bakunin’s and Proudhon’s work **before** it was applied by the Communards and praised by Marx. Bakunin in 1868 argued for a *“Revolutionary Communal Council”* composed of *“delegates . . . vested with plenary but accountable and removable mandates.”* [**Michael Bakunin: Selected Writings**, pp. 170–1] Proudhon’s election manifesto of 1848 argued for *“universal suffrage and as a consequence of universal suffrage, we want implementation of the binding mandate. Politicians balk at it! Which means that in their eyes, the people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy.”* [**No Gods, No Masters**, vol. 1, p. 63] As can be seen, Lenin’s recommendations were first proposed by anarchists.

Thus the positive aspects of Lenin’s work are libertarian in nature, **not** Marxist as such. Indeed given how much time is spent on the Paris Commune (an essentially libertarian revolt obviously inspired by Proudhon’s ideas) his work is more libertarian than Marxist, as Bookchin makes clear. It is the non-libertarian aspects which helped to undermine the anarchist elements of the work.

Secondly, Lenin does not mention, never mind discuss, the role of the Bolshevik Party would have in the new “semi-state.” Indeed, the party is mentioned only in passing. That in itself indicates the weakness of using **The State and Revolution** as a guide book to Leninist theory or practice. Given the importance of the role of the party in Lenin’s previous and latter works, it suggests that to quote **The State and Revolution** as proof of Leninism’s democratic heart leaves much to be desired. And even **The State and Revolution**, in its one serious reference to the Party, is ambiguous in the extreme:

*“By educating the workers’ party, Marxism educates the vanguard of the proletariat which is capable of assuming power and **of leading the whole people** to Socialism, of directing and organising the new order, of being the teacher, the guide, the leader of all the toiling and exploited in the task of building up their social life without the bourgeoisie and against the bourgeoisie.”* [**The Essential Lenin**, p. 288]

Is it the vanguard **or** the proletariat which is “*capable of assuming power*”? The answer is important as a **social** revolution requires the fullest participation of the formerly oppressed masses in the management of their own affairs. In the context of the rest of **The State and Revolution** it could be argued it is the proletariat. However, this cannot be squared with Lenin’s (or Trotsky’s) post-October arguments and practices or the resolution of the Second World Congress of the Communist International which stated that “[e]very class struggle is a political struggle. The goal of this struggle . . . is the conquest of political power. Political power cannot be seized, organised and operated except through a political party.” [cited by Duncan Hallas, **The Comintern**, p. 35] It is obvious that if the party rules, the working class does not. A socialist society cannot be built without the participation, self-activity and self-management of the working class. Thus the question of **who** makes decisions and **how** they do so is essential — if it is not the masses then the slide into bureaucracy is inevitable.

Thus to quote **The State and Revolution** proves nothing for anarchists — it does not discuss the key question of the party and so fails to present a clear picture of Leninist politics and their immediate aims. As soon becomes clear if you look at Leninism in power — i.e. what it actually did when it had the chance, to which we now turn.

Thirdly, we point to what he actually **did** in power. In this we follow Marx, who argued that we should judge people by what they do rather than what they say. We will concentrate on the pre-Civil War (October 1917 to May 1918) period to indicate that this breaking of promises started **before** the horrors of Civil War can be claimed to have forced these decisions onto the Bolsheviks.

Before the out-break of Civil War, the Bolsheviks had replaced election of “*all officials*” by appointment from above in many areas of life — for example, they abolished the election of officers in the Red Army and replaced workers’ self-management in production with one-man management, both forms of democracy being substituted by appointed from above. In addition, by the end of April, 1918, Lenin **himself** was arguing “[o]bedience, and unquestioning obedience at that, during work to the one-man decisions of Soviet directors, of the dictators elected **or appointed** by Soviet institutions, vested with dictatorial powers.” [**Six Theses on the Immediate Tasks of the Soviet Government**, p. 44 — our emphasis] Moreover, the Soviet Constitution stated that “[e]very commissar [of the Council of People’s Commissars — i.e. the Soviet government] has a collegium (committee) of which he is the president, and the members of which are appointed by the Council of People’s Commissars.” Appointment was the rule at the very heights of the state. The “*election of all officers*” (“*without exception*” [Lenin, **The State and Revolution**, p. 302]) had ended by month six of the revolution even in Lenin’s own writings — and **before** the start of the Civil War.

Lenin also argued in mid-April 1918 that the “*socialist character of Soviet, i.e. proletarian, democracy*” lies, in part, in “*the people themselves determin[ing] the order and time of elections.*” [**The Immediate Tasks of the Soviet Government**, pp. 36–7] Given that “*the government [had] continually postponed the new general elections to the Petrograd Soviet, the term of which had ended in March 1918*” because it “*feared that the opposition parties would show gains*” Lenin’s comments seem hypocritical in the extreme. [Samuel Farber, **Before Stalinism**, p. 22]

Moreover, the Bolsheviks did not stay true to Lenin’s claim in **The State**

and Revolution that “since the majority of the people *itself* suppresses its oppressors, a ‘special force’ is **no longer necessary**” as so “in place of a **special** repressive force, the whole population itself came on the scene.” In this way the “state machine” would be “the armed masses of workers who become transformed into a universal people’s militia.” [Op. Cit., p. 301, p. 320 and p. 347] Instead they created a political police force (the Cheka) and a standing army (in which elections were set aside by decree). These were special, professional, armed forces standing apart from the people and unaccountable to them. Indeed, they were used to repress strikes and working class unrest. So much for Mitchinson’s claim that “there should be no special armed force standing apart from the people” — it did not last three months (the Cheka was founded two months into the revolution, the Red Army was created in early 1918 and elections set aside by March of that year).

Lastly, the Bolsheviks banned newspapers from the start — including other socialist papers. In addition, they did not allow other political tendencies to organise freely. The repression started **before** the Civil War with the attack, by the Cheka, in April 1918 on the anarchist movements in Petrograd and Moscow. While repression obviously existed during the Civil War, it is significant that it, in fact, started **before** it began. During the Civil War, the Bolsheviks repressed all political parties, including the Mensheviks even though they “consistently pursued a policy of peaceable opposition to the Bolshevik regime, a policy conducted by strictly legitimate means” and “[i]ndividual Mensheviks who joined organisations aiming at the overthrow of the Soviet Government were expelled from the Menshevik Party.” [George Leggett, **The Cheka: Lenin’s Political Police**, pp. 318–9 and p. 332] In fact, repression **increased** after the end of the Civil War — a strange fact if it was that war which necessitated repression in the first place.

Moreover, Mitchinson fails to mention Lenin’s argument that, like the Paris Commune, the workers’ state would be based on a fusion of executive and administrative functions in the hands of the workers’ delegates. This is hardly surprising, as Lenin created an executive body (the Council of People’s Commissars) immediately after the October Revolution. This division of executive and administrative powers was written into the Soviet Constitution. So much for **The State and Revolution** — its promises did not last a night.

Thus, his claims that the “semi-state” would not be like any other state are contradicted by the actual experience of Bolshevism in power. For anarchists, this comes as no surprise as they are well aware that the state machine does not (indeed, **cannot**) represent the interests of the working classes due to its centralised, hierarchical and elitist nature — all it can do is represent the interests of the party in power, its own bureaucratic needs and privileges and slowly, but surely, remove itself from popular control. Hence the movement away from popular control — it is the nature of centralised power to remove itself from control from below, control by the masses, particularly when all other focal points of working class self-management have been abolished as being no longer required as we have a “semi-state.”

Mitchinson seems to want us to look purely at Bolshevik theory and not its practice. It is exactly what supporters of capitalism desire us to do — in theory, capitalism is based on free agreement and free exchange between autonomous individuals but in practice it is a system of inequality which violates the autonomy of individuals and makes a mockery of free agreement.

In a way, **The State and Revolution** laid out the foundations and sketched out the essential features of an alternative to Bolshevik power — as noted, that system would be essentially libertarian. Only the pro-Leninist tradition has used Lenin’s work, almost to quiet their conscience, because Lenin, once in power, ignored it totally. Such is the nature of the state — as Kropotkin and all other anarchists have argued, there can be no such thing as a “revolutionary government.” Conflict will inevitably arise between the party which aims to control the revolution and the actions of the masses themselves. To resolve the conflict the state must eliminate the organs of workers self-activity which the revolution creates otherwise the party cannot impose its decisions — and this is what the Bolshevik state did, aided of course by the horrors of the civil war.

To state the obvious, to quote theory and not relate it to the practice of those who claim to follow that theory is a joke. It is little more than sophistry. If you look at the actions of the Bolsheviks before and after the Russian Revolution you cannot help draw the conclusion that Lenin’s **State and Revolution** has nothing to do with Bolshevik policy and presents a false image of what Trotskyists desire.

13. Is the Marxist “worker’s state” really the rule of one class over another?

Mitchinson argues that the *“task of this state would be to develop the economy to eradicate want. Less need, means less need to govern society, less need for a state. Class society and the state will begin to wither away as the government of people, the rule of one class over another, is replaced by the administration of things, the planned use of resources to meet society’s needs.”*

As Malatesta makes clear, this is pure sophistry:

“Whoever has power over things has power over men; whoever governs production also governs the producers; who determines consumption is master over the consumer.

“This is the question; either things are administered on the basis of free agreement of the interested parties, and this is anarchy; or they are administered according to laws made by administrators and this is government, it is the State, and inevitably it turns out to be tyrannical.

“It is not a question of the good intentions or the good will of this or that man, but of the inevitability of the situation, and of the tendencies which man generally develops in given circumstances.”

[**Life and Ideas**, p. 145]

Moreover, it is debatable whether Trotskyists really desire the rule of one class over another in the sense of working class over capitalist class. To quote Trotsky:

“the proletariat can take power only through its vanguard. In itself the necessity for state power arises from an insufficient cultural level of the masses and their heterogeneity. In the revolutionary vanguard, organised in a party, is crystallised the aspirations of the masses

to obtain their freedom. Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.

“In this sense the proletarian revolution and dictatorship are the work of the whole class, but only under the leadership of the vanguard.” [Stalinism and Bolshevism]

Thus, rather than the working class as a whole seizing power, it is the “vanguard” which takes power — “a revolutionary party, even after seizing power . . . is still by no means the sovereign ruler of society.” [Ibid.] That is, of course, true — they are still organs of working class self-management (such as factory committees, workers councils, trade unions, soldier committees) through which working people can still exercise their sovereignty. Little wonder Trotsky abolished independent unions, decreed the end of soldier committees and urged one-man management and the militarisation of labour when in power. Such working class organs do conflict with the sovereign rule of the party and so have to be abolished.

After being in power four years, Trotsky was arguing that the “Party is obliged to maintain its dictatorship . . . regardless of temporary vacillations even in the working class . . . The dictatorship does not base itself at every moment on the formal principle of a workers’ democracy.” [quoted by Brinton, **The Bolsheviks and Workers’ Control**, p. 78]

This position follows naturally from Trotsky’s comments that the party “crystallises” the “aspirations” of the masses. If the masses reject the party then, obviously, their “cultural level” has fallen and so the party has the right, nay the duty, to impose its dictatorship over them. Similarly, the destruction of organs of working class self-management can be justified because the vanguard has taken power — which is **exactly** what Trotsky argued.

With regards to the Red Army and its elected officers, he stated in March 1918 that “the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree” because the Bolshevik Party held power or, as he put it, “political power is in the hands of the same working class from whose ranks the Army is recruited.” Of course, power was actually held by the Bolshevik party, not the working class, but never fear:

*“Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers’, Peasants’ and Soldiers’ Deputies, there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the **appointment** of members of the commanding staff by the organs of the Soviet Power.”* [Work, Discipline, Order]

He made the same comments with regard the factory committees:

“It would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed

in the abolition of private property in the means of production, in the supremacy of the collective will of the workers [a euphemism for the Party — M.B.] and not at all in the form in which individual economic organisations are administered.” [quoted by Maurice Brinton, Op. Cit., p. 66]

This point is reiterated in his essay, “*Bolshevism and Stalinism*” (written in 1937) when he argued that:

“Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Trotsky, Op. Cit., p. 18]

And, obviously, without party dictatorship the soviets would return to the “*mud.*” In other words, the soviets are only important to attain party rule and if the two come into conflict then Trotskyism provides the rule of the party with an ideological justification to eliminate soviet democracy. Lenin’s and Trotsky’s politics allowed them to argue that if you let the proletariat have a say then the dictatorship of the proletariat could be in danger.

Thus, for Trotsky, the “*dictatorship of the proletariat*” is independent of allowing the proletariat to manage their own affairs directly. However, without the means to manage their own affairs directly, control their own lives, the proletariat are placed into the position of passive electors, who vote for parties who rule for and over them, in their own name. Moreover, they face the constant danger of the “*vanguard*” nullifying even these decisions as “*temporary vacillations.*” A fine liberation indeed.

Also, as libertarian socialist Maurice Brinton argues, none of the Bolshevik leaders “*saw the proletarian nature of the Russian regime as primarily and crucially dependent on the exercise of workers’ power at the point of production (i.e. workers’ management of production). It should have been obvious to them as Marxists that if the working class did not hold economic power, its ‘political’ power would at best be insecure and would in fact degenerate.*” [Op. Cit., p. 42]

With direct working class sovereignty eroded by the Bolsheviks in the name of indirect, i.e. party, sovereignty it is hardly surprising that the dictatorship of the proletariat becomes the dictatorship **over** the proletariat as Bakunin predicted. With the elimination of functional democracy and self-management, indirect democracy would not be able to survive for long in the face of centralised, top-down decision making by the ruling party.

So hopeless was Trotsky’s understanding of socialism and the nature of a working class social revolution that he even considered the Stalinist dictatorship to be an expression of the “*dictatorship of the proletariat.*” He argued that the “*bureaucracy has expropriated the proletariat politically in order to guard its social conquests with **its own** methods. The anatomy of society is determined by its economic relations. So long as the forms of property that have been created by the October Revolution are not overthrown, the proletariat remains the ruling class.*” [The Class Nature of the Soviet State]

Just to stress the point, according to Trotsky, under Stalinism **the proletariat was the ruling class** and that Stalin’s dictatorship eliminated what

remained (and it was not much) of working class political influence in order “to guard its social conquests”! What social conquests could remain if the proletariat was under the heel of a totalitarian dictatorship? Just one, state ownership of property — precisely the means by which the (state) bureaucracy enforced its control over production and so the source of its economic power (and privileges). To state the obvious, if the working class does not **control** the property it is claimed to own then someone else does. The economic relationship thus generated is a hierarchical one, in which the working class is an oppressed class. Thus Trotsky identified the source of the bureaucracy’s economic power with “socialism” — no wonder his analysis of Stalinism (and vision of socialism) proved so disastrous.

Trotsky argues that the “*liberal-anarchist thought closes its eyes to the fact that the Bolshevik revolution, with all its repressions, meant an upheaval of social relations in the interests of the masses, whereas Stalin’s Thermidorian upheaval accompanies the reconstruction of Soviet society in the interest of a privileged minority.*” [**Stalinism and Bolshevism**] However, social relations are just that, **social** and so between individuals and classes — ownership of property cannot tell the whole story. What social relations did Bolshevism bring about?

As far as the wage labour social relationship goes (and do not forget that is the defining feature of capitalism), the Bolsheviks opposed workers’ self-management in favour of, first, “*control*” over the capitalists and then one-man management. No change in social relationships there. Property relations did change in the sense that the state became the owner of capital rather than individual capitalists, but the **social** relationship workers experienced during the working day and within society was identical. The state bureaucrat replaced the capitalist.

As for politics, the Bolshevik revolution replaced government with government. Initially, it was an elected government and so it had the typical social relationships of representative government. Later, it became a one party dictatorship — a situation that did not change under Stalin. Thus the social relationships there, again, did not change. The Bolshevik Party became the head of the government. That is all. This event also saw the reconstruction of Soviet Society in the interest of a privileged minority — it is well known that the Communists gave themselves the best rations, best premises and so on.

Thus the Bolshevik revolution did **not** change the social relations people faced and so Trotsky’s comments are wishful thinking. The “*interests of the masses*” could not, and were not, defended by the Bolshevik revolution as it did not change the relations of authority in a society — the social relationships people experienced remain unchanged. Perhaps that is why Lenin argued that the proletarian nature of the Russian regime was ensured by the nature of the ruling party? There could be no other basis for saying the Bolshevik state was a workers’ state. After all, nationalised property without workers’ self-management **does not change social relationships** it just changes who is telling the workers what to do.

The important point to note is that Trotsky argued that the proletariat could be a ruling class when it had **no** political influence, never mind democracy, when subject to a one-party state and bureaucratic dictatorship and when the social relations of the society were obviously capitalistic. No wonder he found it impossible to recognise that dictatorship by the party did not equal dictatorship by the proletariat.

Therefore, the claim that Trotskyists see the “*dictatorship of the proletariat*” as “*the rule of one class over another*” is, as can be seen, a joke. Rather they see it as the rule of the party over the rest of society, **including** the working class. Even when that party had become a bureaucratic nightmare, murdering millions and sending hundreds of thousands to forced labour camps, Trotsky still argued that the “*working class*” was still the “*ruling class*.” Not only that, his political perspective allowed him to justify the suppression of workers’ democracy in the name of the “*rule*” of the workers. For this reason, anarchists feel that the real utopians are the Leninists who believe that party rule equals class rule and that centralised, hierarchical power in the hands of the few will not become a new form of class rule. History, we think, supports our politics on this issue (as in so many others).

Mitchinson argues that “*Anarchism’s utopian calls to abolish the state overnight demonstrates neither the understanding of what the state is, nor the programme of action necessary to achieve the goal it sets itself.*” However, as made clear, it is Marxism which is utopian, believing that rule by a party equals rule by a class and that a state machine can be utilised by the majority of the population. As Kropotkin argued, Anarchists “*maintain that the State organisation, having been the force to which minorities resorted for establishing and organising their power over the masses, cannot be the force which will serve to destroy these privileges.*” [**Kropotkin’s Revolutionary Pamphlets**, p. 170]

Luigi Fabbri sums up the difference well:

“The mistake of authoritarian communists in this connection is the belief that fighting and organising are impossible without submission to a government; and thus they regard anarchists . . . as the foes of all organisation and all co-ordinated struggle. We, on the other hand, maintain that not only are revolutionary struggle and revolutionary organisation possible outside and in spite of government interference but that, indeed, that is the only effective way to struggle and organise, for it has the active participation of all members of the collective unit, instead of their passively entrusting themselves to the authority of the supreme leaders.” [*“Anarchy and ‘Scientific’ Communism”*, in **The Poverty of Statism**, pp. 13–49, Albert Meltzer (ed.), p. 27]

Mitchinson moves on to the usual Marxist slander that as “*a modern philosophy anarchism developed in the 19th century alongside the explosive growth of capitalism and its state machine. It represented a rebellion by a section of the petty bourgeoisie at the loss of their position in society, driven to the wall by the growth of monopoly.*” We have refuted this assertion in another appendix (Reply to errors and distortions in David McNally’s pamphlet “Socialism from Below”) and so will not do so here.

14. Why do anarchists reject the Marxist notion of “*conquest of power*”?

Mitchinson now decides to quote some anarchists to back up his spurious argument:

“Their case was argued by Mikhail Bakunin and his supporters in the First International. At an anarchist conference in 1872 they argued ‘The aspirations of the proletariat can have no other aim than the creation of an absolutely free economic organisation and federation based on work and equality and wholly independent of any political government, and such an organisation can only come into being through the spontaneous action of the proletariat itself...no political organisation can be anything but the organisation of rule in the interests of a class and to the detriment of the masses...the proletariat, should it seize power, would become a ruling, and exploiting, class...’”

To understand this passage it is necessary to place it in historical context. In 1872, the proletariat was a **minority** class within all nations **bar** the UK. In almost all nations, the majority of the working class were either artisans or peasants (hence the reference to *“the masses”*). To urge that the proletariat seize power meant to advocate the class rule of a **minority** of the working masses. Minority rule could be nothing else but the dictatorship of a minority over the majority (a dictatorship in the usual sense of the word), and dictatorships always become exploitative of the general population.

Thus Mitchinson’s “analysis” is ahistoric and, fundamentally, unscientific and a mockery of materialism.

Moreover, anarchists like Bakunin also made clear that the Marxist notion of *“proletarian dictatorship”* did not even mean that the proletariat **as a whole** would exercise power. In his words:

“What does it mean, ‘the proletariat raised to a governing class?’ Will the entire proletariat head the government? The Germans number about 40 million. Will all 40 million be members of the government? The entire nation will rule, but no one would be ruled. Then there will be no government, there will be no state; but if there is a state, there will also be those who are ruled, there will be slaves.

“In the Marxists’ theory this dilemma is resolved in a simple fashion. By popular government they mean government of the people by a small number of representatives elected by the people. So-called popular representatives and rulers of the state elected by the entire nation on the basis of universal suffrage — the last word of the Marxists, as well as the democratic school — is a lie behind which the despotism of a ruling minority is concealed, a lie all the more dangerous in that it represents itself as the expression of a sham popular will.

*“So . . . it always comes down to the same dismal result: government of the vast majority of the people by a privileged minority. But this minority, the Marxists say, will consist of workers. Yes, perhaps, of **former** workers, who, as soon as they become rulers or representatives of the people will cease to be workers and will begin to look upon the whole workers’ world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people.” [Statism and Anarchy, p. 178]*

Thus anarchists reject the notion of the dictatorship of the proletariat for two reasons. Firstly, because it excluded the bulk of the working masses when it was first used by Marx and Engels. Secondly, because in practice it would mean the dictatorship of the party **over** the proletariat. Needless to say, Mitchinson does not mention these points.

Mitchinson argues that “[a]lthough this sounds radical enough it nonetheless amounts to a recipe for inaction and disaster.” And quotes Trotsky to explain why:

“To renounce the conquest of power is voluntarily to leave the power with those who wield it, the exploiters. The essence of every revolution consisted and consists in putting a new class in power, thus enabling it to realise its own programme in life. It is impossible to wage war and to reject victory. It is impossible to lead the masses towards insurrection without preparing for the conquest of power.”

For anarchists the question immediately is, “power to who”? As is clear from the writings of Lenin and Trotsky they see the “conquest of power” **not** in terms of “putting a new class in power” but, in fact, the **representatives** of that class, the vanguard party, into power. Anarchists, in contrast, argue that organs of working class self-management are the means of creating and defending a **social** revolution as it is the only means that the mass of people can actually run their own lives and any power over and above these organs means dictatorship **over** the working class, a new form of state and class power.

As Rudolf Rocker argues:

“Let no one object that the ‘dictatorship of the proletariat’ cannot be compared to run of the mill dictatorship because it is the dictatorship of a class. Dictatorship of a class cannot exist as such, for it ends up, in the last analysis, as being the dictatorship of a given party which arrogates to itself the right to speak for that class. Thus, the liberal bourgeoisie, in their fight against despotism, used to speak in the name of the ‘people’ . . .

“We already know that a revolution cannot be made with rosewater. And we know, too, that the owning classes will never yield up their privileges spontaneously. On the day of victorious revolution the workers will have to impose their will on the present owners of the soil, of the subsoil and of the means of production, which cannot be done — let us be clear on this — without the workers taking the capital of society into their own hands, and, above all, without their having demolished the authoritarian structure which is, and will continue to be, the fortress keeping the masses of the people under dominion. Such an action is, without doubt, an act of liberation; a proclamation of social justice; the very essence of social revolution, which has nothing in common with the utterly bourgeois principle of dictatorship.

“The fact that a large number of socialist parties have rallied to the idea of councils, which is the proper mark of libertarian socialist and revolutionary syndicalists, is a confession, recognition that the tack they have taken up until now has been the product of a falsification,

a distortion, and that with the councils the labour movement must create for itself a single organ capable of carrying into effect the unmitigated socialism that the conscious proletariat longs for. On the other hand, it ought not to be forgotten that this abrupt conversion runs the risk of introducing many alien features into the councils concept, features, that is, with no relation to the original tasks of socialism, and which have to be eliminated because they pose a threat to the further development of the councils. These alien elements are able only to conceive things from the dictatorial viewpoint. It must be our task to face up to this risk and warn our class comrades against experiments which cannot bring the dawn of social emancipation any nearer — which indeed, to the contrary, positively postpone it.

“Consequently, our advice is as follows: Everything for the councils or soviets! No power above them! A slogan which at the same time will be that of the social revolutionary.” [Anarchism and Sovietism]

Or, as the Bakunin influenced Jura Federation of the First International put it in 1874, *“the dictatorship that we want is one which the insurgent masses exercise directly, without intermediary of any committee or government.”* [quoted by Peter Marshall, **Demanding the Impossible**, p. 631] In other words, a situation in which the working masses defend their freedom, their control over their own lives, from those who seek to replace it with minority rule.

15. What caused the degeneration of the Russian Revolution?

Mitchinson argues that:

“Anarchists see in the degeneration of the Soviet Union into a totalitarian dictatorship proof that Bakunin was right. In reality, only Leon Trotsky and Marxism have been able to explain the causes of that degeneration, finding its roots not in men’s heads or personalities, but in the real life conditions of civil war, armies of foreign intervention, and the defeat of revolution in Europe.”

Needless to say, anarchism explains the causes of the degeneration in a far more rich way than Mitchinson claims. The underlying assumption of his “critique” of anarchism is that the **politics** of the Bolsheviks had no influence on the outcome of the revolution — it was a product purely of objective forces. He also subscribes to the contradictory idea that Bolshevik politics were essential for the success of that revolution. The facts of the matter is that people are faced with choices, choices that arise from the objective conditions that they face. What decisions they make will be influenced by the ideas they hold — they will **not** occur automatically, as if people were on auto-pilot — and their ideas are shaped by the social relationships they experience. Thus, someone placed into a position of power over others will act in certain ways, have a certain world view, which would be alien to someone subject to egalitarian social relations.

So, obviously the “*ideas in people’s heads*” matter, particularly during a revolution. Someone in favour of centralisation, centralised power and who equates party rule with class rule (like Lenin and Trotsky), will act in ways (and create structures) totally different from someone who believes in decentralisation and federalism. In other words, **political ideas do matter** in society. Nor do anarchists leave our analysis at this obvious fact — as noted, we also argue that the types of organisation people create and work in shapes the way they think and act. This is because specific kinds of organisation have specific authority relations and so generate specific social relationships. These obviously affect those subject to them — a centralised, hierarchical system will create authoritarian social relationships which shape those within it in totally different ways than a decentralised, egalitarian system. That Mitchinson denies this obvious fact suggests he knows nothing of materialist philosophy.

Moreover, anarchists are aware of the problems facing the revolution. After all, anarchists were involved in that revolution and wrote some of the best works on that revolution (for example, Voline’s **The Unknown Revolution**, Arshinov’s **The History of the Makhnovist Movement** and Maximov’s **The Guillotine at Work**). However, they point to the obvious fact that the politics of the Bolsheviks played a key role in how the revolution developed. While the terrible objective conditions may have shaped certain aspects of the actions of the Bolsheviks it cannot be denied that the impulse for them were rooted in Bolshevik theory. After all, anarchist theory could not justify the suppression of the functional democracy associated with the factory committees or the soldiers election of officers in the Red Army. Bolshevik theory could, and did.

Indeed, Trotsky was still claiming in 1937 that the “*Bolshevik party achieved in the civil war the correct combination of military art and Marxist politics.*” [**Stalinism and Bolshevism**] In other words, the Bolshevik policies implemented during the Civil War were the correct, Marxist, ones. Also, although Lenin described the NEP (New Economic Policy) of 1921 as a ‘defeat’, at no stage did he describe the suppression of soviet democracy and workers’ control in such language. In other words, Bolshevik politics did play a role, a key role, in the degeneration of the Russian Revolution and to deny it is to deny reality. In the words of Maurice Brinton:

*“[I]n relation to industrial policy there is a clear-cut and incontrovertible link between what happened under Lenin and Trotsky and the later practice of Stalinism. We know that many on the revolutionary left will find this statement hard to swallow. We are convinced however that any honest reading of the facts cannot but lead to this conclusion. The more one unearths about this period [1917–21], the more difficult it becomes to define — or even see — the ‘gulf’ allegedly separating what happened in Lenin’s time from what happened later. Real knowledge of the facts also makes it impossible to accept . . . that the whole course of events was ‘historically inevitable’ and ‘objectively determined.’ Bolshevik ideology and practice were **themselves** important and sometimes decisive factors in the equation, at every critical stage of this critical period.”* [**Op. Cit.**, p. 84]

We should also point out that far from “*Leon Trotsky and Marxism*” explaining the degeneration of the Russian revolution, Trotsky could not understand

that a “*totalitarian dictatorship*” could be an expression of a new minority class and presented a decidedly false analysis of the Soviet Union as a “*degenerated workers’ state*.” That analysis led numerous Trotskyists to support these dictatorships and oppose workers’ revolts against them. In addition, Trotsky’s own reservations were only really voiced after he had lost power. Moreover, he never acknowledged how his own policies (such as the elimination of soldiers democracy, the militarisation of labour, etc.) played a key role in the rise of the bureaucracy and Stalin.

Ultimately, every explanation of the degeneration of the Russian revolution by Trotskyists ends up as an appeal to “*exception circumstances*” — they blame the rise of Stalinism on the Civil War, to the “*exceptional circumstances*” created by that war. This can be faulted for two reasons.

Firstly, as Trotsky himself argued (with respect to the Spanish Anarchists) “*did not the leaders of German social democracy invoke, in their time, the same excuse? Naturally, civil war is not a peaceful and ordinary but an ‘exceptional circumstance.’ . . . we do severely blame the anarchist theory, which seemed wholly suitable for times of peace, but had to be dropped rapidly as soon as the ‘exceptional circumstance’ of the . . . revolution had begun.*” [**Stalinism and Bolshevism**] Needless to say, he did not apply his critique to his own politics, which were also a form of the “*exceptional circumstances*” excuse. Given how quickly Bolshevik “principles” (as expressed in **The State and Revolution**) were dropped, we can only assume that Bolshevik ideas are also suitable purely for “*times of peace*” as well.

Secondly, this “explanation” basically argues that, **if** the bourgeois did not defend their power in 1917, then Leninism would have worked out fine. As Mitchinson himself noted above, belief that the bourgeois will just go away without a fight is “*an infantile flight of fancy*.” As Lenin argued, “*revolution . . . , in its development, would give rise to exceptionally complicated circumstances*” and “[*r*]evolution is the sharpest, most furious, desperate class war and civil war. Not a single great revolution in history has escaped civil war. No one who does not live in a shell could imagine that civil war is conceivable without exceptionally complicated circumstances.” [**Will the Bolsheviks Maintain Power?**, p. 80 and p. 81]

If the Civil War did solely produce the degeneration of the Russian Revolution then all we can hope for is that in the next social revolution, the civil war Lenin argued was inevitable is not as destructive as the Russian one. Hope is not much of a basis to build a “scientific” socialism — but then again, neither is “fate” much of a basis to explain the degeneration of the Russian Revolution but that is what Trotskyists do argue.

We discuss the Russian Revolution in more detail in the appendix on “What happened during the Russian Revolution?” of the FAQ and will not do so here. However, we can point out the experience of the anarchist Makhnovist movement in the Ukraine during the Russian Revolution. Facing exactly the same objective conditions they encouraged soviet democracy, held regular congresses of workers and peasants (the Bolsheviks tried to ban two of them), defended freedom of the press and of association and so on. If objective conditions determined Bolshevik policies, why did they not also determine the policies of the Makhnovists? This practical example indicates that the usual Trotskyist explanation of the degeneration of the Revolution is false.

Perhaps it is because of this, that it showed an alternative to Bolshevik politics existed and worked, that Trotskyists slander it? Trotsky himself asserted that the Makhnovists were simply “kulaks” on horseback and that Makhno’s “followers . . . [expressed] a militant anti-Semitism.” [Lenin and Trotsky, **Kronstadt**, p. 80] We discuss the Makhnovist movement in the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?” of the FAQ and there we refute claims that the Makhnovist movement was a kulak (rich peasant) one. However, the charge of “militant anti-Semitism” is a serious one and so we will expose its falsehood here and well as in section 9 of the specified appendix.

The best source to refute claims of anti-Semitism is to quote the work of the Jewish anarchist Voline. He summarises the extensive evidence against such claims:

“We could cover dozens of pages with extensive and irrefutable proofs of the falseness of these assertions. We could mention articles and proclamations by Makhno and the Council of Revolutionary Insurgents denouncing anti-Semitism. We could tell of spontaneous acts by Makhno himself and other insurgents against the slightest manifestation of the anti-Semitic spirit on the part of a few isolated and misguided unfortunates in the army and the population. . . One of the reasons for the execution of Grigoriev by the Makhnovists was his anti-Semitism and the immense pogrom he organised at Elizabethgrad. . . We could cite a whole series of similar facts, but we do not find it necessary . . . and will content ourselves with mentioning briefly the following essential facts:

“1. A fairly important part in the Makhnovist movement was played by revolutionists of Jewish origin.

“2. Several members of the Education and Propaganda Commission were Jewish.

“3. Besides many Jewish combatants in various units of the army, there was a battery composed entirely of Jewish artillery men and a Jewish infantry unit.

“4. Jewish colonies in the Ukraine furnished many volunteers to the Insurrectionary Army.

“5. In general the Jewish population . . . took an active part in all the activities of the movement. The Jewish agricultural colonies . . . participated in the regional assemblies of workers, peasants and partisans; they sent their delegates to the regional Revolutionary Military Council. . . ” [**The Unknown Revolution**, pp. 967–8]

Voline also quotes the eminent Jewish writer and historian M. Tcherikover about the question of the Makhnovists and anti-Semitism. The Jewish historian states “with certainty that, on the whole, the behaviour of Makhno’s army cannot be compared with that of the other armies which were operating in Russian during the events 1917–21 . . . It is undeniable that, of all these armies, including the Red Army, the Makhnovists behaved best with regard the civil population in general and the Jewish population in particular . . . The proportion of **justified** complaints against the Makhnovist army, in comparison with the

others, is negligible. . . Do not speak of pogroms alleged to have been organised by Makhno himself. That is a slander or an error. Nothing of the sort occurred. As for the Makhnovist Army . . . [n]ot once have I been able to prove the existence of a Makhnovist unit at the place a pogrom against the Jews took place. Consequently, the pogroms in question could not have been the work of the Makhnovists." [quoted by Voline, **Op. Cit.**, p. 699]

Given that the Red Army agreed to two pacts with the Makhnovists, we can only surmise, if Trotsky thought he was telling the truth, that Trotsky was a hypocrite. However, Trotsky was either consciously lying or in error — unfortunately the Trotskyist publishers of his words did not bother to note that his assertion was false. We are sorry for this slight digression, but many Trotskyists take Trotsky's words at face value and repeat his slander — unless we indicate their false nature they may not take our argument seriously.

Mitchinson continues by stating:

"The position of anarchism only serves to endorse the bourgeois slander that Stalinism was inherent in Bolshevism."

This appeal against slander is ironic from someone who writes an article full of it. But, of course, it is **bourgeois** slander that he objects too — Trotskyist slander (and falsification) is fine.

The question of whether it is a "*bourgeois slander*" to argue (with supporting evidence) that "*Stalinism was inherent in Bolshevism*" is an important one. Trotskyists often point out that anarchist and libertarian Marxist critiques of Bolshevism sound similar to bourgeois ones and that anarchist accounts of Bolshevik crimes against the revolution and working class give ammunition to the defenders of the status quo. However, this seems more like an attempt to stop critical analysis of the Russian Revolution than a serious political position. Yes, the bourgeois do argue that Stalinism was inherent in Bolshevism — however they do so to discredit all forms of socialism and radical social change. Anarchists, on the other hand, analyse the revolution, see how the Bolsheviks acted and draw conclusions from the facts in order to push forward revolutionary thought, tactics and ideas. Just because the conclusions are similar does not mean that they are invalid — to label criticism of Bolshevism as "*bourgeois slander*" is nothing less than attempt to put people off investigating the Russian Revolution.

There is are course essential differences between the "*bourgeois slanders*" against the Bolsheviks and the anarchist critique. The bourgeois slander is based on an opposition to the revolution **as such** while the anarchist critique affirms it. The bourgeois slanders are not the result of the experiences of the working masses and revolutionaries subject to the Bolshevik regime as the anarchist is. Similarly, the bourgeois slanders ignore the nature of capitalist society while the anarchist critique points out that the degeneration of the Bolshevik state and party were a result of it not breaking with bourgeois ideas and organisational structures. Ultimately, it is **not** a case of "*bourgeois slanders*" but rather an honest evaluation of the events of the Russian Revolution from a working class perspective.

To use an analogy, it is common place for the bourgeois press and ideologists to attack trade unions as being bureaucratic and unresponsive to the needs of their members. It is also common place for members of those same trade unions

to think exactly the same. Indeed, it is a common refrain of Trotskyists that the trade unions **are** bureaucratic and need to be reformed in a more democratic fashion (indeed, Mitchinson calls for the unions to be “*transformed*” in his essay). Needless to say, the bourgeois comments are “correct” in the sense that the trade unions do have a bureaucracy — their reasons for stating that truth serve their interests and their solutions aid those interests and not those of the members of the unions. Could a Trotskyist say that it was a “*bourgeois slander*” if the capitalist press point to the bureaucratic nature of the unions when their own papers do the same?

While it may be in the interests of the ruling elite and its apologists to scream about “*bourgeois slanders*”, it hinders the process of working class self-emancipation to do so. As intended, in all likelihood.

16. Did anarchists reject “*the need for organisation in the shape of trade unions*”?

Mitchinson now decides to “expose” anarchism:

“In its early days, this modern anarchism found a certain support amongst the workers. However, through the course of struggle workers learned the need for organisation in the shape of the trade unions, and also for political organisation which led to the building of the mass workers parties.”

To see the total nonsense of this claim we need only to turn to Marx. In his words, Bakunin thought that the “*working class . . . must only organise themselves by trades-unions.*” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 48] Bakunin himself argued “*the natural organisation of the masses . . . is organisation based on the various ways that their various types of work define their day-to-day life; it is organisation by trade association.*” [**The Basic Bakunin**, p. 139] Kropotkin argued that the “*union [syndicat] is absolutely necessary. It is the only form of workers’ grouping which permits the direct struggle to be maintained against capital without falling into parliamentarism.*” [quoted by Caroline Cahm, **Kropotkin and the Rise of Revolutionary Anarchism**, p. 269]

So much for anarchism being against trade unions (as Mitchinson implies). As for mass workers parties, well, history proved Bakunin right — such parties became corrupted, bureaucratic and reformist. For Mitchinson the last 130 years have not existed.

He goes on to argue that “*Bakunin and co. denounced participation in parliament, or the fight for reforms as a betrayal of the revolution, they ‘rejected all political action not having as its immediate and direct objective the triumph of the workers over capitalism, and as a consequence, the abolition of the state.’*”

We must first note that the Bakunin quote presented does not support Mitchinson’s assertions — unless you think that reforms can only be won via participation in parliament (something anarchists reject). The reason **why** Bakunin rejected “*all political action*” (i.e. bourgeois politics — electioneering in other words) is not explained. We will now do so.

Bakunin did denounce participation in parliament. History proved him right. Participation in parliament ensured the corruption of the Social Democratic Parties, the Greens and a host of other radical and socialist organisations. Mitchinson seems to have forgotten the fights against reformism that continually occurred in the Social Democratic Parties at end of the nineteenth and start of the twentieth centuries, a fight which ended with the defeat of the revolutionary wing and the decision to support the nation state in the first world war. The actual experience of using parliament confirmed Bakunin's prediction that when "*the workers . . . send common workers . . . to Legislative Assemblies . . . The worker-deputies, transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois . . . For men do not make their situations; on the contrary, men are made by them.*" [**The Basic Bakunin**, p. 108]

What is not true, however, is that claim that Bakunin thought that "*the fight for reforms [w]as a betrayal of the revolution.*" Bakunin was a firm believer in the importance of struggles for reforms, but struggles of a specific kind — namely struggles to win reforms which are based on the **direct action** by workers themselves:

*“What policy should the International [Workers’ Association] follow during th[e] somewhat extended time period that separates us from this terrible social revolution . . . the International will give labour unrest in all countries an **essentially economic** character, with the aim of reducing working hours and increasing salary, by means of the **association of the working masses** . . . It will [also] propagandise its principles . . . [Op. Cit., p. 109]*

“And indeed, as soon as a worker believes that the economic state of affairs can be radically transformed in the near future, he begins to fight, in association with his comrades, for the reduction of his working hours and for an increase in his salary. . . through practice and action . . . the progressive expansion and development of the economic struggle will bring him more and more to recognise his true enemies: the privileged classes, including the clergy, the bourgeois, and the nobility; and the State, which exists only to safeguard all the privileges of those classes.” [Op. Cit., p. 103]

This argument for reforms by direct action and workers' associations was a basic point of agreement in those sections of the First International which supported Bakunin's ideas. In the words of an anarchist member of the Jura Federation writing in 1875:

*“Instead of begging the State for a law compelling employers to make them work only so many hours, the trade associations **directly impose** this reform on the employers; in this way, instead of a legal text which remains a dead letter, a real economic change is effected **by the direct initiative of the workers** . . . if the workers devoted all their activity and energy to the organisation of their trades into societies of resistance, trade federations, local and regional, if, by meetings, lectures, study circles, papers and pamphlets, they kept up a permanent socialist and revolutionary agitation; if by linking*

practice to theory, they realised directly, without any bourgeois and governmental intervention, all immediately possible reforms, reforms advantageous not to a few workers but to the labouring mass — certainly then the cause of labour would be better served than . . . legal agitation.” [quoted by Caroline Cahm, **Kropotkin and the Rise of Revolutionary Anarchism**, p. 226]

So much for Bakunin or the libertarian wing of the First International being against reforms or the struggle for reforms. Anarchists have not changed their minds on this issue.

17. Why do anarchists reject political activity?

After spreading falsehoods against Bakunin, Mitchinson states that:

“Marxism fights for the conquest of political power by the working class and the building of a socialist society, under which the state will wither away.

“Until then should workers refrain from political activity? Should they reject all reforms that might improve their existence? Nothing would please Blair or the bosses more.”

It is ironic that Mitchinson mentions Blair. He is, after all, the leader of the Labour Party — as mass workers party formed from the trade unions to use political action to gain reforms within capitalism. The current state of Labour indicates well the comment that *“in proportion as the socialists become a power in the present bourgeois society and State, their socialism must die out.”* [Kropotkin, **Kropotkin’s Revolutionary Pamphlets**, p. 189] It is as if the history of Social Democracy (or even the German Greens) does not exist for Mitchinson — he points to Blair to refute anarchist analysis that Parliamentary politics corrupts the parties that use it! How strange, to ignore the results of socialists actually using *“political activity”* (and we must stress that anarchists traditionally use the term *“political action”* to refer to electioneering, i.e. bourgeois politics, only). Obviously reality is something which can be ignored when creating a political theory.

Needless to say, as noted above, anarchists do not *“reject all reforms.”* We have quoted Bakunin, now we quote Kropotkin — *“the Anarchists have always advised taking an active part in those workers’ organisations which carry on the direct struggle of Labour against Capital and its protector, the State.”* He continued by arguing that such struggle, *“better than any other indirect means, permits the worker to obtain some temporary improvements in the present conditions of work, while it opens his eyes to the evil done by Capitalism and the State that supports it, and wakes up his thoughts concerning the possibility of organising consumption, production, and exchange without the intervention of the capitalist and the State.”* [**Evolution and Environment**, pp. 82–3]

Thus we do not think that political action (electioneering) equates to reforms nor even is the best means of winning reforms in the first place. Anarchists argue that by direct action we can win reforms.

Mitchinson continues his diatribe:

“Of course not, we must advocate the struggle for every gain no matter how minor, and use any and every field open to us. Only the dilettante can reject better wages or a health care system. Precisely through these struggles, and the struggles to transform the workers organisations the unions and the parties, we learn and become more powerful and bring closer the day when it will be possible to transform society for good.”

As noted, anarchists do not reject reforms. Only a dilettante misrepresents the position of his enemies. And, as can be seen from the above quotes by Bakunin and Kropotkin, anarchists agree with Mitchinson’s comments. Anarchists agree on the need to win reforms by direct action, which necessitates the creation of new forms of working class organisation based on firm libertarian principles and tactics — organisations like workers’ councils, factory committees, community assemblies and so on.

However, when looking at the fields of struggle open to us, we evaluate them based on a materialist basis — looking at the implications of the tactics in theory and how they **actually worked out in practice**. Mitchinson obviously refuses to do this. Anarchists, on the other hand, base their politics on such an evaluation. For example, Bakunin would have been aware of Proudhon’s experiences in the French National Assembly during the 1848 revolution:

“As soon as I set foot in the parliamentary Sinai, I ceased to be in touch with the masses; because I was absorbed by my legislative work, I entirely lost sight of current events . . . One must have lived in that isolator which is called the National Assembly to realise how the men who are most completely ignorant of the state of the country are almost always those who represent it . . . fear of the people is the sickness of all those who belong to authority; the people, for those in power, are the enemy.” [Proudhon, quoted by Peter Marshall, **Demanding the Impossible**, p. 244]

Similarly, the practical experiences of a socialist elected into Parliament would be easy to predict — they would be swamped by bourgeois politics, issues and activities. Anarchism gained such socialists elected to parliament as Johann Most and Ferdinand Nieuwenhuis who soon released the correctness of the anarchist analysis. Thus actual experience confirmed the soundness of anarchist politics. Mitchinson, on the other hand, has to deny history — indeed, he fails to mention the history of Social Democracy at all in his article.

Thus the claim that we should use *“every field open to us”* is idealistic nonsense, at total odds with any claim to use scientific techniques of analysis (i.e. to being a scientific socialist) or a supporter of materialist philosophy. It means the rejection of historical analysis and the embrace of ahistoric wishful thinking.

Moreover, why do the workers need to *“transform”* their own organisations in the first place? Perhaps because they are bureaucratic organisations in which power is centralised at the top, in a few hands? Why did this happen, if fighting for reforms by any suitable means (including electioneering) was their rationale? Perhaps because the wrong people are in positions of power? But why are they the wrong people? Because they are right-wing, have reformist ideas, etc. Why do they have reformist ideas? Here Mitchinson must fall silent, because

obviously they have reformist ideas because the organisations and activities they are part of are reformist through and through. The tactics (using elections) and organisational structure (centralisation of power) bred such ideas — as Bakunin and other anarchists predicted. Mitchinson's politics cannot explain why this occurs, which explains why Lenin was so surprised when German Social Democracy supported its ruling class during the First World War.

18. How do anarchists struggle for reforms under capitalism?

Mitchinson continues his distortion of anarchism by arguing:

“Marxists fight for every reform, whilst at the same time explaining that while capitalism continues none of these advances are safe. Only socialism can really solve the problems of society.”

As noted above, anarchists also fight for every reform possible — but by direct action, by the strength of working people in their “*natural organisations*” and “*social power*” (to use Bakunin's words). We also argue that reforms are always in danger — that is why we need to have strong, direct action based organisations and self-reliance. If we leave it to leaders to protect (never mind **win** reforms) we would not have them for long. Given that Labour governments have whittled previous reforms just as much as Conservative ones, anarchists feel our strategy is the relevant one.

Mitchinson continues:

“Our modern day anarchists, Reclaim the Streets and others, have no support in Britain amongst the organised workers.”

Which is not true, as RTS and other anarchists do seek influence with the organised workers (and the unorganised ones, and the unemployed, etc.). They have invited rank-and-file trade union activists to their demonstrations to speak, trade unionists are members of anarchist organisations, etc. Anarchists are at the forefront of supporting strikers, particularly when their union betrays their struggle and does not support them. For example, during the Liverpool dockers strike RTS and the dockers formed a common front, organised common demonstrations and so on. The trade unions did nothing to support the dockers, RTS and other anarchist groups did. That in itself indicates the weakness of Mitchinson's claims. It would also be useful to point out that Trotskyists have little support amongst organised workers as well.

Moreover, anarchists do not seek to become part of the trade union bureaucracy and so their influence cannot be easily gauged.

After asserting these dubious “facts” about anarchist influence, he continues:

“Some radicalised youth however are attracted to their ‘direct action’ stance. There is a vacuum left by the absence of a mass Labour youth organisation which, fighting for a socialist programme, could attract these young workers and students. With no lead being given by the tops of the unions, and Labour in government attacking young people, that vacuum can be temporarily and partly filled by groups like Reclaim the Streets.”

Needless to say, Mitchinson does not pose the question **why** the Labour government is attacking “*young people*” (and numerous other sections of the working class). Why has the Labour Party, a mass workers party which uses elections to gain reforms, been attacking (as it has always done, we must note) its support? If its because the leaders are “right-wing” then why have the membership supported them? Why have the “right-wing” gained such influence? Also, why is there no “*mass Labour youth organisation*”? And why should “*young people*” join an organisation which is part of the party which is attacking them? And why are the “*tops of the unions*” not giving a “*lead*”? Perhaps because its not in their interests to do so? Because they hate direct action and radical workers as much as the bosses?

Mitchinson’s “analysis” is question begging in the extreme.

He continues:

“What action do they propose though? In their press statement (2/5/00) they explain, ‘We were not protesting. Under the shadow of an irrelevant parliament we were planting the seeds of a society where ordinary people are in control of their land, their resources, their food and their decision making. The garden symbolised an urge to be self-reliant rather than dependent on capitalism.’”

Firstly, we should point out that having access to land **is** a key way for workers to be independent of capitalism. Perhaps Mitchinson forgets Marx’s discussion of the colonies in chapter 33 of **Capital**? In it Marx discusses how access to land allowed immigrants to America and Australia to reject wage labour (i.e. capitalism) by providing them with the means to survive without selling themselves on the labour market to survive. The state had to be used to enforce the laws of supply and demand by restricting access to the land. Or, perhaps, he had forgotten Marx’s discussion in chapter 27 of **Capital** of the role of enclosures in creating a dispossessed mass of people who were forced, by necessity, to become the first generation of wage slaves? Either way, access to the land **was** (and still is, in many countries) a means of being independent of capitalism — and one which the state acts to destroy.

Secondly, the garden was a **symbol** of a communist society, not an expression of the type of society RTS and other anarchists desire. So, as a **symbol** of a anti-capitalist vision, the garden is a good one given the history of state violence used to separate working people from the land and propel them into the labour market. However, it is only a **symbol** and not, obviously, to be taken as an example of the future society RTS or other anarchists desire. Only someone lacking in imagination could confuse a symbol with a vision — as the press release states it “*celebrated the possibility of a world that encourages co-operation and sharing rather than one which rewards greed, individualism and competition.*”

Thirdly, as their press release states, “*Guerrilla Gardening is not a protest; by its very nature it is a creative peaceful celebration of the growing global anti-capitalist movement.*” Mitchinson attacks the action for being something it was never intended to be.

He “analyses” the RTS press release:

“The fact that parliament appears powerless to prevent job losses or

the destruction of the environment, only demonstrates that it serves the interests of capitalism.”

Very true, as Kropotkin argued the “*State is there to protect exploitation, speculation and private property; it is itself the by-product of the rapine of the people. The proletariat must rely on his own hands; he can expect nothing of the State. It is nothing more than an organisation devised to hinder emancipation at all costs.*” [Words of a Rebel, p. 27] He argues elsewhere that “*small groups of men [and women] were imbued with the . . . spirit of revolt. They also rebelled — sometimes with the hope of partial success; for example winning a strike and of obtaining bread for their children . . . Without the menace contained in such revolts, no serious concession has ever been wrung by the people from governing classes.*” [Evolution and Environment, p. 103]

Mitchinson seems to agree:

“However, under pressure from below it is possible to introduce reforms through parliament that are in the interests of ordinary people.”

Thus reforms **are** possible, but only if we rely on ourselves, organise pressure from below and use direct action to force parliament to act (if that is required). Which is what anarchists have always argued. Without anti-parliamentary action, parliament will ignore the population. That is what anarchists have always argued — we have to rely on our own organisations, solidarity and direct action to change things for the better. Faced with such a movement, parliament would introduce reforms regardless of who was a member of it. Without such a movement, you end up with Tony Blair. Thus Mitchinson is confused — by his own logic, the anarchists are correct, we have to work outside parliament and electioneering in order to be effective.

He continues:

“It is no use declaring parliament to be irrelevant, and turning your back on it when the majority do not agree, and still look to government to make their lives better. This is the mirror image of the sects attitude to the Labour Party. Any and every avenue which can be used to improve our lives must be used.”

How do you change the opinion of the majority? By changing your position to match theirs? Of course not. You change their position by argument and proving that direct action is more effective in making their lives better than looking to government. Mitchinson would have a fit if someone argued “*it is no use declaring capitalism to be wrong and fighting against it when the majority do not agree and still look to it to make their lives better.*” If the majority do not agree with you, then you try and change their opinion — you do not accept that opinion and hope it goes away by itself!

Mitchinson seems to be following Lenin when he argued “*[y]ou must not sink to the level of the masses . . . You must tell them the bitter truth. You are duty bound to call their bourgeois-democratic and parliamentary prejudices what they are — prejudices. But at the same time you must soberly follow the actual state of the class-consciousness . . . of all the toiling masses.*” [Left-wing Communism: An Infantile Disorder, p. 41] Obviously, you cannot

tell workers the bitter truth and at the same time follow their prejudices. In practice, if you follow their prejudices you cannot help but encourage faith in parliament, social democratic parties, leaders and so on. Progress is achieved by discussing issues with people, not ducking the question of political issues in favour of saying what the majority want to hear (which is what the capitalist media and education system encourage them to believe in the first place). As a means of encouraging revolutionary thought it is doomed to failure.

Also, just to stress the point, any and every avenue which can be used to improve our lives must be used but only if it actually is revolutionary and does not place obstacles in the process of social change. Parliamentary action has been proven time and time again to be a false way for radical change — it only ends up turning radicals into supporters of the status quo. It makes as much sense as arguing that any and every avenue must be used to cure a disease, including those which give you a new disease in its place.

19. How does Mitchinson distorts the use of the term “*Self-reliance*”?

Mitchinson argues that:

“In any case this ‘self-reliance’ is no alternative. Self-reliance won’t get electricity into your house, educate your children or treat you when you are ill.”

No anarchist and no one in RTS ever claimed it would. We use the term “*self-reliance*” in a totally different way — as anyone familiar with anarchist or RTS theory would know. We use it to describe individuals who think for themselves, question authority, act for themselves and do not follow leaders. No anarchist uses the term to describe some sort of peasant life-style. But then why let facts get in the way of a nice diatribe?

He continues:

“We have the resources to cater for all of society’s needs, the only problem is that we do not own them.”

Actually, the **real** problem is that we do not **control** them. The examples of Nationalised industries and the Soviet Union should make this clear. In theory, they were both owned by their populations but, in practice, they were effectively owned by those who managed them — state bureaucrats and managers. They were not used to cater for our needs, but rather the needs of those who controlled them. For this reason anarchists argue that common ownership without workers’ self-management in the workplace and community would be little more than state capitalism (wage labour would still exist, but the state would replace the boss).

He continues with his distortion of the concept of “*self-reliance*”:

“Individualism (self-reliance) cannot be an alternative to socialism, where all the resources of society are at all of our disposal, and equally we all contribute what we can to society.”

Firstly, anarchists are socialists and mostly seek a (libertarian) communist society where the resources of the world are at our disposal.

Secondly, self-reliance has little to do with “*individualism*” — it has a lot to do with **individuality**, however. The difference is important.

Thirdly, in a part of the press release strangely unquoted by Mitchinson, RTS argue that their action “*celebrated the possibility of a world that encourages co-operation and sharing rather than one which rewards greed, individualism and competition.*” RTS are well aware that self-reliance does not equal individualism and they are very clear that oppose individualism and desire co-operation. Given that Mitchinson quotes from their press release, he must know this and yet he asserts the opposite.

Mitchinson seems to equate self-reliance with “*individualism*” and so, presumably, capitalism. However, capitalists do not want self-reliant workers, they want order takers, people who will not question their authority. As David Noble points out, after an experiment in workers’ control General Electric replaces it with a the regime that was “*designed to ‘break’ the pilots of their new found ‘habits’ of self-reliance, self-discipline, and self-respect.*” [**Forces of Production**, p. 307]

Capitalists know the danger of self-reliant people. Self-reliant people question authority, think for themselves, do not follow leaders and bring these abilities into any groups they join. Thus self-reliance is not purely an individual thing, it also refers to groups **and** classes. Anarchists desire to see a self-reliant working class — a class which makes its own decisions and does not follow leaders. Thus, for anarchists, self-reliance refers to **both** individuals and groups (just as self-management and self-liberation does). Needless to say, for those in authority or those seeking authority self-reliance is an evil thing which must be combated. Hence Mitchinson’s diatribe — it is the cry of the would-be leader who is afraid his followers will not respect his authority.

20. Is anarchism an example of “*Philosophical idealism*”?

He turns to the May Day demonstration:

“Guerrilla gardening and its related varieties that have sprung up in various places, is nothing more than an offshoot of the old utopian idea of changing society by example.”

Actually, it was a specific demonstration to encourage people to get involved in collective action, to have a good time and challenge authority and the status quo. It was an attempt to change society by example only in the sense that it would encourage others to act, to challenge the status quo and get involved in collective action. If Mitchinson was consistent he would have to oppose **every** demonstration that occurred before the final insurrection that created the “workers’ state” — a demonstration is, by its very nature, an example to others of what is possible, an example of our collective strength and our desire for change. You may be critical of the nature of the guerrilla gardening action (and many anarchists are), but you cannot misrepresent its nature as Mitchinson does and be expected to be taken seriously.

He continues:

“The roots of this scheme lie in idealist philosophy. Philosophical idealism refers to the notion that people’s actions are a consequence of their thoughts, that ideas and not our conditions of life determine our outlook. When, through a long process of accumulation, we change people’s minds, then they will live differently, capitalism will simply be redundant. The capitalist class themselves will presumably sit idly by and watch their system fall apart.”

Given that the “anti-capitalist” demonstrations have met extensive state violence, it is clear that those involved are well aware that capitalist class will not just watch its power disappear.

Also, calling RTS’s action “*idealist philosophy*” is quite ironic for someone who seems intent in ignoring the history of Social Democracy and dismisses attempts to analyse the Bolsheviks in power as “*bourgeois slanders.*” However, Mitchinson in his diatribe forgets one of the basic arguments of materialism — namely that ideas themselves are part of the material world and so influence society and how it develops. He rejects the notion that peoples thoughts and ideas determine their actions. He obviously thinks that people operate on autopilot, not thinking about their actions. However, in reality, what people do is dependent on their thoughts — they think about their actions and what motivates them influences their activity. If thoughts did not determine people’s actions then Mitchinson would not have spent so much time writing this article!

Thus Mitchinson is well aware of the importance of ideas in social change, at least implicitly. Indeed, he argues for the need for a “*mass Labour youth organisation which, fighting for a socialist programme, could attract these young workers and students.*” To state the obvious, a socialist programme is a means to “*change people’s minds*” and present the possibility of creating a new society. Does he seriously think a socialist revolution is possible without changing people’s minds, getting them to desire a socialist society?

Moreover, if he had read Bakunin he would be aware that anarchists consider the class struggle as the way to change people’s ideas. As Bakunin argued:

*“the germs of [socialist thought] ... [are to] be found in the instinct of every earnest worker. The goal ... is to make the worker fully aware of what he wants, to unjam within him a stream of thought corresponding to his instinct ... What impedes the swifter development of this salutary thought among the working masses? Their ignorance to be sure, that is, for the most part the political and religious prejudices with which self-interested classes still try to obscure their conscious and their natural instinct. How can we dispel this ignorance and destroy these harmful prejudices? By education and propaganda? ... they are insufficient ... [and] who will conduct this propaganda? ... [The] workers’ world ... is left with but a single path, that of **emancipation through practical action** ... It means workers’ solidarity in their struggle against the bosses. It means **trade-unions, organisation** ... To deliver [the worker] from that ignorance [of reactionary ideas], the International relies on collective experience he gains in its bosom, especially on the progress of the collective struggle of the workers against the bosses ... As soon*

as he begins to take an active part in this wholly material struggle, . . . Socialism replaces religion in his mind. . . through practice and collective experience . . . the progressive and development of the economic struggle will bring him more and more to recognise his true enemies . . . The workers thus enlisted in the struggle will necessarily . . . recognise himself to be a revolutionary socialist, and he will act as one. [The Basic Bakunin, pp. 102–3]

Thus anarchists are aware that experience determines thought but we are also aware that thought is essential for action. We recognise the importance of ideas in the class struggle but we also realise that the ideas people have change as a result of that struggle. To state otherwise is to misrepresent anarchist thought.

21. How is Mitchinson's critique self-contradictory?

He continues his distortion:

“Whilst believing in a revolutionary struggle to overthrow capitalism, anarchists argue that it must be replaced by . . . nothing.”

This is ironic for quite a few reasons. Firstly, above Mitchinson claimed that anarchists did not aim to overthrow capitalism, just the state. Now he is claiming we **do** believe in overthrowing capitalism. Secondly, he quoted Trotsky saying that anarchists just ignore the state. Now Mitchinson states we aim to overthrow the capitalism via revolutionary struggle. How do you overthrow something via revolutionary struggle by ignoring it? His critique is not even internally consistent.

Moreover, he is well aware what anarchists want to replace capitalism with, after all he quotes an anarchist conference which stated that they aimed for “*the creation of an absolutely free economic organisation and federation based on work and equality*”! Bakunin was always arguing that the International Workers Association should become “*an earnest organisation of workers associations from all countries, capable of replacing this departing world of States and bourgeoisie.*” [The Basic Bakunin, p. 110] In other words, the “*future social organisation must be made solely from the bottom upwards, by the free association of workers, first in their unions, then in the communes, regions, nations and finally in a great federation, international and universal.*” [Michael Bakunin: Selected Writings, p. 206] Even Engels acknowledged that the anarchists aimed to “*dispose all the authorities, abolish the state and replace it with the organisation of the International.*” [Marx, Engels and Lenin, Op. Cit., p. 72] Anyone with even a basic knowledge of anarchist theory would know this. And given that Mitchinson stated that “*Marx saw a future society without a state*” as well and that he quotes Trotsky as arguing “*Marxists are wholly in agreement with the anarchists in regard to the final goal: the liquidation of the state*” we can only assume that Marxists also aim at replacing it, eventually, when the state “*withers away,*” with “*nothing.*”

This sentence, more than any other, shows the level which some Marxists will sink to when discussing anarchism. It shows that the standard Marxist critique of anarchism is little more than an inconsistent collection of lies, distortion and

misrepresentation. Mitchinson not only contradicts his ideological gurus, he even contradicts himself! That is truly impressive.

22. How did Trotsky make the trains run on time?

Mitchinson asks:

“Yet with no central apparatus, no organisation, how would the trains run on time, how could organ transplants be organised, how could the world’s resources be channelled into permanently overcoming famine.”

Firstly, we must note the usual fallacy — being opposed to a “*central apparatus*” does not imply “*no organisation*.” Instead of centralised organisation, anarchists propose **federal** organisations in which co-ordination is achieved by collective decision making from the bottom up. In other words, rather than delegate power into the hands of “*leaders*”, an anarchist organisation leaves power at the bottom and co-ordination results from collective agreements that reflect the needs of those directly affected by them. Thus a federal organisation co-ordinates activities but in a bottom-up fashion rather than top-down, as in a centralised body.

Secondly, needless to say, anarchists are quite clear on who would make the trains run on time — the railway workers. Anarchists are firm supporters of workers’ self-management. Anyone with even a basic understanding of anarchist theory would know that. Moreover, the experience of workers’ self-management of the railways by the anarchist union the CNT during the Spanish Revolution indicates that such anarchism can, and does, ensure that the trains run on time. In contrast, the experience of Russia — when the Bolsheviks did create a “*central apparatus*” — proved a total failure. It is quite appropriate that Mitchinson uses the “*trains running on time*” example, after all it is what apologists for Italian fascism praised Mussolini for! This is because Trotsky (when he ran the railways) did so in a way that Mussolini would have been proud of — he subjected the railway workers to military discipline:

*“Due to the Civil War — and to other factors less often mentioned, such as the attitude of the railway workers to the ‘new’ regime — the Russian railways had virtually ceased to function. Trotsky, Commissar for Transport, was granted wide emergency powers [in August 1920] to try out his theories of ‘militarisation of labour.’ He started out placing the railwaymen and the personnel of the repair workshops under martial law. When the railwaymen’s trade union objected, he summarily ousted its leaders and, **with the full support and endorsement of the Party leadership**, ‘appointed others willing to do his bidding. He repeated the procedure in other unions of transport workers.’”* [Maurice Brinton, **The Bolsheviks and Workers’ Control**, p. 67]

He ruled the “*central apparatus*” he created, called the Tsektran, “*along strict military and bureaucratic lines.*” [Ibid.] The trains did start moving

again, of course. The question is — do workers manage their own activity or does some other group. Trotsky and Lenin in power decided for the latter — and built the “*centralised apparatus*” required to ensure that result. Needless to say, Trotsky did not justify his militarisation of work in terms of necessary evils resulting from appalling objective conditions. Rather he saw it as a matter of “*principle*”:

“The working class cannot be left wandering all over Russia. They must be thrown here and there, appointed, commanded, just like soldiers.”

“The very principle of compulsory labour is for the Communist quite unquestionable . . . the only solution to economic difficulties from the point of view of both principle and of practice is to treat the population of the whole country as the reservoir of the necessary labour power . . . and to introduce strict order into the work of its registration, mobilisation and utilisation.”

“The introduction of compulsory labour service is unthinkable without the application . . . of the methods of militarisation of labour.”
[quoted by M. Brinton, **Op. Cit.**, p. 61 and p. 66]

Why “*principle*”? Perhaps because Marx and Engels had stated in **The Communist Manifesto** that one of the measures required during the revolution was the “[*e*]stablishment of industrial armies”? [**Selected Writings**, p. 53]

Moreover, the experience of “*central apparatus*” in Bolshevik Russia helped create famine — the vast bureaucracy spawned by the “workers’ state” could not handle the information a centralised distribution system required. Food rotted in trains waiting for bureaucrats to “*channel*” resources (and, needless to say, the bureaucrats never went hungry).

23. Can centralised planning meet the needs of the whole of society?

Our Marxist friend then quotes **Maybe**:

“The radical social movements that are increasingly coming together don’t want to seize power but to dissolve it. They are dreaming up many autonomous alternative forms of social organisation, forms that are directly linked to the specific needs of locality. What might be an alternative to capitalism for people living currently in a housing estate in Croydon is completely different to what might be suitable for the inhabitants of the slums of Delhi.”

He comments on these very sensible words:

“It cannot be of no concern to us what form a new society will take in different countries or even different regions. The economic power we have created over centuries can and must be used in a planned, rational way to eradicate hunger, disease and illiteracy. It must be used in the interests of the whole of society.”

Obviously, the needs of actual people, what sort of society they want, is irrelevant to Marxism. Also ignored is the fact that different cultures will have different visions of what a free society will be like. Thus, for Mitchinson, everyone, everywhere, will be subject to the same form of society — “*in the interests of society.*” However, as Bakunin argued, the state “*is an arbitrary creature in whose breast all the positive, living, individual or local interests of the people clash, destroy and absorb each other into the abstraction known as the common interest, the public good or the public welfare, and where all real wills are dissolved into the other abstraction that bears the name of the will of the people.* It follows that this alleged will of the people is never anything but the sacrifice and dissolution of all the real wants of the population, just as this so-called public good is nothing but the sacrifice of their interests.” [Michael Bakunin: Selected Writings, pp. 265–6]

The different needs of different areas and regions must be the starting point of any social reconstruction, the basis on which we create specific programmes to improve our societies, eco-systems and world. If we do not recognise the diversity inherent in a world of billions of people, millions of eco-systems, thousands of cultures, hundreds of regions then we cannot use the resources of society to improve our lives. Instead we would have uniform plan imposed on everything which, by its very nature, cannot take into accounts the real needs of those who make up “*the whole of society.*” In other words, the resources of the world must not be used by an abstraction claiming to act “*in the interests of society*” but rather by the people who actually make up society themselves — if we do that we ensure that their interests are met directly as they manage their own affairs and that their use reflects the specific requirements of specific people and eco-systems and not some abstraction called “*the interests of society*” which, by its centralised nature, would sacrifice those interests.

Of course, it seems somewhat strange that Mitchinson thinks that people in, say, New Delhi or Croyden, will not seek to eradicate hunger, disease and illiteracy as they see fit, co-operating with others as and when they need to and creating the federative organisations required to do so. The need to share experiences and resources does not conflict with the different areas experimenting in different ways, expressing themselves in ways which suit their particular needs and difficulties. As any ecologist could tell you, different eco-systems need different forms of care. The same with communities — Mitchinson would drown local needs in the name of an artificial construct.

He continues:

“That can only be achieved by the democratic planning of society where the power at our fingertips could be used with due respect for the future of the planet, the conservation of it’s resources, our own working conditions, and living standards. Whether we like it or not, growing a few carrots on empty plots of land will not eradicate hunger and famine.”

How can “*democratic planning*” of the whole “*of society*” take into account the needs of specific localities, eco-systems, communities? It cannot. Respect for the future of our planet means respecting the fundamental law of nature — namely that conformity is death. Diversity is the law of life — which means that a future socialist society must be libertarian, organised from the bottom

up, based on local self-management and a respect for diversity. Such a federal structures does not preclude co-ordinated activity (or the creation of democratic **plans**) — the reverse in fact, as federalism exists to allow co-ordination — but instead of being imposed by a few “*leaders*” as in a centralised system, it is the product of local needs and so reflective of the needs of real people and eco-systems.

As for his comment about “*due respect of the future of the planet*” is obviously inspired by “*the youth*” being concerned about ecological issues. However, Leninism’s desire for centralised states and planning excludes an ecological perspective by definition. As Bakunin argued:

“What man, what group of individuals, no matter how great their genius, would dare to think themselves able to embrace and understand the plethora of interests, attitudes and activities so various in every country, every province, locality and profession.” [Op. Cit., p. 240]

Diversity is the basis of any eco-system. Centralism cannot, as Bakunin makes clear, embrace it.

Needless to say, Mitchinson’s comments about carrots is pure stupidity and an insult to the intelligence of his audience.

24. Is technology neutral?

Mitchinson goes on:

“We have the power to do just that, but only if we combine new technology, industry and the talents and active participation of millions.”

Needless to say, he fails to indicate how the millions **can** participate in a “*centralised apparatus*” beyond electing their “*leaders*.” Which indicates the fallacy of Marxism — it claims to desire a society based on the participation of everyone yet favours a form of organisation — centralisation — that precludes that participation.

In addition, he fails to note that technology and industry have been developed by capitalists to enhance their own power. As we argued in section D.10, technology cannot be viewed in isolation from the class struggle. This means that industry and technology was not developed to allow the active participation of millions. The first act of any revolution will be seizing of the means of life — including industry and technology — by those who use it and, from that moment on, their radical transformation into **appropriate** technology and industry, based on the needs of the workers, the community and the planet. Mitchinson obvious shares the common Marxist failing of believing technology and industry is neutral. In this he follows Lenin. As S.A. Smith correctly summarises:

“Lenin believed that socialism could be built only on the basis of large-scale industry as developed by capitalism, with its specific types of productivity and social organisation of labour. Thus for him, capitalist methods of labour-discipline or one-man management were not

necessarily incompatible with socialism. Indeed, he went so far as to consider them to be inherently progressive, failing to recognise that such methods undermined workers' initiative at the point of production. This was because Lenin believed that the transition to socialism was guaranteed, ultimately, not by the self-activity of workers, but by the 'proletarian' character of state power... There is no doubt that Lenin did conceive proletarian power in terms of the central state and lacked a conception of localising such power at the point of production." [Red Petrograd, pp. 261–2]

The Russian workers, unsurprisingly, had a different perspective:

"Implicit in the movement for workers' control was a belief that capitalist methods cannot be used for socialist ends. In their battle to democratise the factory, in their emphasis on the importance of collective initiatives by the direct producers in transforming the work situation, the factory committees had become aware — in a partial and groping way, to be sure — that factories are not merely sites of production, but also of reproduction — the reproduction of a certain structure of social relations based on the division between those who give orders and those who take them, between those who direct and those who execute... inscribed within their practice was a distinctive vision of socialism, central to which was workplace democracy." [Op. Cit., p. 261]

The movement for workers' control was undermined and finally replaced by one-man management by the kind of "*central apparatus*" Mitchinson urges us to build (see M. Brinton's classic work **The Bolsheviki and Workers' Control** for more details). Those who do not study history are doomed to repeat it.

He goes on:

"The economic power we have created can be compared to the destructive force of lightning, untamed and anarchic under the market, yet organised into cables and wires electricity transforms our lives. Industry is not the enemy, nor are machines. The state is, but it is a symptom not the disease. It is capitalism and its ownership of the economy, its stewardship of society that we have to replace."

However, unlike electricity, "*economic power*" requires people to operate it. The question is not whether "*machines*" are the enemy (often they are, as machines are used by capitalists to weaken the power of workers and control them). The question is whether the future society we aim at is one based on workers' and community self-management or whether it is based on an authoritarian system of delegated power. It is clear that Marxists like Mitchinson desire the latter — indeed, as is clear from his diatribe, he cannot comprehend an alternative to hierarchical organisation.

Given that one of the things capitalism and the state have in common is a hierarchical, top-down structure, it is clear that any revolutionary movement must fight both — at the same time.

25. Do anarchists ignore the “*strength of the working class*”?

Mitchinson argues that:

“The task of our time is to combine the strength and experience of the working class and its mighty organisations with the power and energy of the youth internationally, on the basis of a clear understanding of what capitalism is, what the state is, and a programme for changing society. That requires a combination of theory and action. In that combination lies the strength of Marxism.”

The first question is surely **what** “*mighty organisations*” of the working class is he talking about. Is it the Labour Party? Or is it the trade unions? Probably the latter — if so, the question is how effective have these “*mighty organisations*” been recently? The answer must, surely, be “not very.” Why is that? In union there is strength, as anarchists have long been aware. Why has this strength been so lacking? Simply because the unions are centralised, bureaucratic and run from the top down. They have placed numerous barriers in front of their members when they have taken militant action. That is why anarchists urge workers to form rank-and-file controlled organisations to manage their own struggles and take back the power they have delegated to their so-called leaders. Only in this way, by building truly revolutionary organisations like workers’ councils (soviets), factory committees, community assemblies and so on can they really create a “*mighty*” force. In other words, anarchists are well aware of the strength of working class people and their power to change society — indeed, as proven above, anarchism is based on that awareness and organise appropriately!

The second question is surely to ask whether Mitchinson is aware that **Reclaim the Streets** have been building links with rank and file trade union militants for years — long before Mitchinson decided to enlighten them with “*the strength of Marxism.*” In other words, “*the strength of Marxism.*” seems to rest in telling radical working class people to do what they have already doing! Such strength is truly amazing and must explain the prominent role Leninists have had in the numerous anti-capitalist demonstrations and organisations recently.

Needless to say, **anarchism** provides “*a clear understanding of what capitalism is, what the state is, and a programme for changing society. That requires a combination of theory and action.*” This has been proven above when we corrected Mitchinson’s numerous errors regarding anarchist theory. Moreover, as far as combining theory and action goes, it is clear that **anarchism** has been doing that of late, **not** Marxism. While anarchists have been at the forefront of the anti-capitalist demonstrations, working with others as equals, Marxists have been noticeable by their absence. Combining theory and practice, non-hierarchically organised direct action closed down the WTO and presented a clear message to the oppressed around the world — **resistance is fertile**. What have Marxists achieved? Apparently producing articles such as these, distorting the politics and activities of those who actually **are** changing the world rather than just interpreting it. That they cannot produce an honest critique of anarchism indicates the uselessness of their politics.

26. What does Mitchinson’s article tell about the nature of Trotskyism?

He finishes his diatribe as follows:

“If you want to fight against capitalism, do so fully armed with a socialist programme and perspective. Join with us in the struggle for the socialist transformation of the planet.”

It is clear that to be “*fully armed with a socialist programme*” means to critique that which you know nothing about, spread slanders and lie about what your opponents actually think. There **is** much to be critical of in the recent anti-capitalist demonstrations and the various groups that have helped organise and take part in them. Anarchists have been the first to point these out. However, we have a lot to learn from them as well — they are struggling against capitalism and, as Kropotkin argues, “*Anarchism . . . originated in everyday struggles*” and “*the Anarchist movement was renewed each time it received an impression from some great practical lesson: it derived its origin from the teachings of life itself.*” [Evolution and Environment, p. 58 and p. 57]

Thus we must critique these movements honestly and as equals — Mitchinson, as can be seen, does neither. He slanders those involved and dismisses out of hand their experiences and the reasons that have brought them to struggle in a specific way against the dominant society. In this he follows Lenin, who argued in **Left-Wing Communism: An Infantile Disorder** that western revolutionaries ignore their own experiences in their own — and similar — countries and instead follow the “lessons” of experiences gained in a near pre-capitalist, absolutist state. The stupidity of such an approach is clear.

Mitchinson presents those in struggle with the ultimatum “subscribe to our platform or be denounced.” Little wonder that Leninists are non-existent in the groups that have taken part and organised the anti-capitalist demonstrations — not willing to learn from those involved in the class struggle, all they can do is act as petty sectarians. Sectarians expect working class people to relate to their predetermined political positions, whereas revolutionaries apply our politics to the conditions we face as members of the working class. For Leninists revolutionary consciousness is not generated by working class self-activity, but is embodied in the party. The important issues facing the working class — and how to fight — are to be determined not by the workers ourselves, but by the leadership of the party, who are the “vanguard of the working class”. Hence Mitchinson’s dismissal (in a particularly dishonest manner, we must stress) of those involved in struggle and their experiences. True “revolution” obviously lies in the unchanging ideas generated at the start of the twentieth century in a monarchy developing towards capitalism, **not** in the experiences and desires of living people fighting for freedom in the here and now. Yes, these ideas and movements can be confused and unclear — but they are living and subject to change by the influence of revolutionaries who act in a libertarian manner (i.e. as equals, willing to learn as well as teach).

The Italian Marxist Antonio Gramsci once wrote that “*to tell the truth is a communist and revolutionary act.*” However, even he did not apply this when discussing anarchism and the activities of anarchists (see Gwyn Williams’ **Proletarian Order**, pp. 193–4). Be that as it may, Gramsci’s point is correct.

Telling the truth is a revolutionary act. If we judge Mitchinson's article by this standard then we can only conclude that neither he nor the politics he defends are revolutionary or communist.

Thus we find his ending comment truly a "*flight of fancy*" — after reading our comments above, we hope you agree with us. If you seek a **true** socialist transformation of this planet rather than its degeneration into centralised state capitalism, discover more about anarchism.

Reply to errors and distortions in the SWP's "*Marxism and Anarchism*"

In issue no. 1714 of Socialist Worker (dated 16th September 2000) the British Socialist Workers Party (SWP) decided to expose anarchism in an article entitled "*Marxism and Anarchism*." However, their article is little more than a series of errors and distortions. We shall indicate how the SWP lies about anarchist ideas and discuss the **real** differences between anarchism and Marxism. Moreover, we will indicate that the bulk of the SWP's article just recycles common Leninist slanders about anarchism, slanders that have been refuted many times over.

1. What does the anti-globalisation movement tell us about the effectiveness of the "vanguard" parties like the SWP?

The inspiration for their diatribe is clear — they are worried about anarchist influence in the various anti-capitalist and anti-globalisation movements and demonstrations which are currently occurring across the world. As they put it:

"The great revolt against capitalism in Seattle last year, and similar demonstrations since, have attracted diverse groups of protesters. Anarchists, amongst others, have taken part in all of those protests."

Yes, indeed, anarchists have been involved in these demonstrations from the start, unlike "vanguard" parties like the SWP who only became aware of the significance of these movements once they exploded in the streets. That in itself should tell us something about the effectiveness of the Bolshevik inspired politics the SWP raise as an alternative to anarchism. Rather than being at the vanguard of these demonstrations and movements, parties like the SWP have been, post-Seattle, busy trying to catch up with them. Nor is this the only time this has happened.

In Russia, in February 1917, for example, the Bolshevik party opposed the actions that produced the revolution which overthrew the Tsar. After weeks of strikes with police attacks on factories, the most oppressed part of the working class, the women textile workers, took the initiative. Demands for bread

and attacks on bakeries were superseded by a massive demonstration of women workers on International Women's Day. The women had ignored a local Bolshevik directive to wait until May Day! The early slogan of "*Bread!*" was quickly followed by "*Down with the autocracy! Down with the war!*" By February 24th, half of Petrograd was on strike. The workers did go to their factories, not to work, but to hold meetings, pass resolutions and then go out to demonstrate. The Vyborg committee of the Bolsheviks opposed the strikes. Luckily for the Russian workers, and unfortunately for the Tsar, the Bolsheviks were ignored. If they had followed the Bolsheviks, the February Revolution would not have occurred!

The backward nature of the Bolshevik style of party can also be seen from events 12 years earlier. In 1905, workers spontaneously organised councils of workers' delegates ("soviets" in Russian). The soviets were based on workplaces electing recallable delegates to co-ordinate strikes and were created by the Russian workers themselves, independently of political parties.

Far from being at the vanguard of these developments the Bolsheviks were, in fact, deeply hostile to them. The Bolshevik Central Committee members in Petersburg were uneasy at the thought of a "*non-Party*" mass organisation existing side by side with their party. Instead of seeing the Soviet as a form of workers' self-organisation and self-activity (and so a key area for area for activity), they regarded it with hostility. They saw it as a rival to the party.

The St. Petersburg Bolsheviks organised a campaign against the Soviet due to its "*non-Party*" nature. They presented an ultimatum to the Soviet that it must place itself under the leadership of their party. On 24 October they had moved a resolution along the same lines in meetings at the various factories, demanding that the Soviet accept the Social Democratic programme and tactics and demanding that it must define its political stance.

The Bolshevik Central Committee then published a resolution, that was binding upon all Bolsheviks throughout Russia, insisting that the soviets must accept the party programme. Agitation against the soviet continued. On 29 October, the Bolshevik's Nevsky district committee declared inadmissible for Social Democrats to participate in any kind of "*workers' parliament*" like the Soviet.

The Bolshevik argument was that the Soviet of Workers' Deputies should not have existed as a political organisation and that the social democrats must withdraw from it, since its existence acted negatively upon the development of the social democratic movement. The Soviet of Delegates could remain as a trade union organisation, or not at all. Indeed, the Bolsheviks presented the Soviet with an ultimatum: either accept the programme of the Bolsheviks or else disband! The Bolshevik leaders justified their hostility to the Soviet on the grounds that it represented "*the subordination of consciousness to spontaneity*" — in this they followed Lenin's arguments in **What is to be Done?**. When they moved their ultimatum in the Soviet it was turned down and the Bolshevik delegates, led by the Central Committee members, walked out. The other delegates merely shrugged their shoulders and proceeded to the next point on the agenda.

If workers had followed the Bolsheviks the 1905 revolution would not have occurred and the first major experience of workers' councils would never have happened. Rather than being in favour of working class self-management and power, the Bolsheviks saw revolution in terms of party power. This confusion re-

mained during and after 1917 when the Bolsheviks finally supported the soviets (although purely as a means of ensuring a Bolshevik government).

Similarly, during the British Poll Tax rebellion of the late 1980s and early 1990s, the SWP dismissed the community based mass non-payment campaign. Instead they argued for workers to push their trade unions leadership to call strikes to overthrow the tax. Indeed, they even argued that there was a “*danger that community politics divert people from the means to win, from the need to mobilise working class activity on a collective basis*” by which they meant trade union basis. They argued that the state machine would “*wear down community resistance if it cannot tap the strength of the working class.*” Of course it goes without saying that the aim of the community-based non-payment campaign was working class activity on a collective basis. This explains the creation of anti-poll tax unions, organising demonstrations, occupations of sheriff officers/bailiffs offices and council buildings, the attempts to resist warrant sales by direct action, the attempts to create links with rank-and-file trade unionists and so on. Indeed, the SWP’s strategy meant mobilising **fewer** people in collective struggle as trade union members were a minority of those affected by the tax as well as automatically excluding those workers **not** in unions, people who were unemployed, housewives, students and so on. Little wonder the SWP failed to make much of an impact in the campaign.

However, once non-payment began in earnest and showed hundreds of thousands involved and refusing to pay, overnight the SWP became passionate believers in the collective class power of community based non-payment. They argued, in direct contradiction to their earlier analysis, that the state was “*shaken by the continuing huge scale of non-payment.*” [quoted by Trotwatch, **Carry on Recruiting**, pp. 29–31]

The SWP proved to be totally unresponsive to new forms of struggle and organisation produced by working class people when resisting the government. In this they followed the Bolshevik tradition closely — the Bolsheviks initially ignored the soviets created during the 1905 Russian Revolution and then asked them to disband. They only recognised their importance in 1917, 12 years after that revolution was defeated and the soviets had re-appeared.

Therefore, the fact that the self-proclaimed “vanguard of the proletariat” is actually miles behind the struggle comes as no surprise. Nor are their slanders against those, like anarchists, who are at the front of the struggle unsurprising. They produced similar articles during the poll tax rebellion as well, to counter anarchist influence by smearing our ideas.

2. What does the SWP miss out in its definition of anarchism?

The SWP continue:

“Anarchism is generally taken to mean a rejection of all authority.”

One question immediately arises. What do anarchists mean by the term “*authority*”? Without knowing that, it will be difficult to evaluate the SWP’s arguments.

Kropotkin provides the answer. He argued that “*the origin of the anarchist inception of society . . . [lies in] the criticism . . . of the hierarchical organisations and the authoritarian conceptions of society; and . . . the analysis of the tendencies that are seen in the progressive movements of mankind.*” He stresses that anarchism “*refuses all hierarchical organisation.*” [**Kropotkin’s Revolutionary Pamphlets**, p. 158 and p. 137]

Thus anarchism rejects authority in the sense, to use Malatesta’s words, of “*the delegation of power, that is the abdication of initiative and sovereignty of all into the hands a few.*” [**Anarchy**, p. 40] Once this is clearly understood, it will quickly be seen that the SWP create a straw man to defeat in argument.

Moreover, by concentrating on what anarchism is **against** the SWP can ignore what anarchism is **for**. This is important as to discuss the positive ideas of anarchism would mean having to discuss anarchists ideas on organisation, why we oppose centralisation, favour federalism as a means of co-ordinating decisions, why we propose self-management in place of government, and so on. To do this would mean accurately presenting libertarian theory rather than a just series of slanders, which, of course, the SWP would hate to do.

So what is anarchism for?

Anarchism derives from the Greek for “*without authority*” or “*without rulers*” and this informs anarchist theory and visions of a better world. This means that anarchism is against the “*domination of man by man*” (and woman by woman, woman by man, and so on). However, “[*a*]*s knowledge has penetrated the governed masses . . . the people have revolted against the form of authority then felt most intolerable. This spirit of revolt in the individual and the masses, is the natural and necessary fruit of the spirit of domination; the vindication of human dignity, and the saviour of social life.*” Thus “*freedom is the necessary preliminary to any true and equal human association.*” [Charlotte Wilson, **Anarchist Essays**, p. 54 and p. 40] In other words, anarchist comes from the struggle of the oppressed against their rulers and is an expression of individual and social freedom. Anarchism was born from the class struggle.

This means, positively, that anarchists stress the need for **self-government** (often called **self-management**) of both individuals and groups. Self-management within free associations and decision making from the bottom-up is the only way domination can be eliminated. This is because, by making our own decisions ourselves, we automatically end the division of society into governors and governed (i.e. end hierarchy). In other words, those affected by a decision make that decision. Anarchism clearly means support for freedom and equality and so all forms of hierarchical organisation (such as the state and the capitalist workplace) and authoritarian social relationship (such as sexism, racism, homophobia and wage labour) must be abolished. This means that anarchist organisations must be self-managed, decentralised and based on federalism. Only this form of organisation can end the division of society into rulers and ruled, oppressor and oppressed, exploiter and exploited and create a society of free and equal individuals.

This is why anarchists stress such things as decision making by mass assemblies and the co-ordination of decisions by mandated and recallable delegates. The federal structure which unites these basic assemblies would allow local affairs to be decided upon locally and directly, with wider issues discussed and decided upon at their appropriate level and by all involved. This would allow those affected by a decision to have a say in it, so allowing them to manage

their own affairs directly and without hierarchy. This, in turn, would encourage the self-reliance, self-confidence and initiative of those involved. As a necessary complement of our opposition to authority is support for *“direct action.”* This means that people, rather than looking to leaders or politicians to act for them, look to themselves and the own individual and collective strength to solve their own problems. This also encourages self-liberation, self-reliance and self-confidence as the prevailing culture would be *“if we want something sorted out, we have to do it ourselves”* — in other words, a *“do it yourself”* mentality.

Therefore, the **positive** side of anarchism (which naturally flows from its opposition to authority) results in a political theory which argues that people must control their own struggles, organisations and affairs directly. This means we support mass assemblies and their federation via councils of mandated delegates subject to recall if they break their mandates (i.e. they act as they see fit, i.e. as politicians or bureaucrats, and not as the people who elected them desire). This way people directly govern themselves and control their own lives. It means we oppose the state and support free federations of self-governing associations and communes. It means we oppose capitalism and support workers’ self-management. It means we reject hierarchy, centralism and authoritarian structures and argue for self-managed organisations, built from the bottom up and always accountable to the base. It means we consider the direct control of struggles and movements by those involved as not only essential in the here and now but also essential training for living in a free, libertarian socialist society (for example, workers direct and total control of their strikes and unions trains them to control their workplaces and communities during and after the revolution). It means we oppose hierarchy in all its forms and support free association of equals. In other words, anarchism can generally be taken to mean support for self-government or self-management.

By discussing only the negative side of anarchism, by missing out what kinds of authority anarchists oppose, the SWP ensure that these aspects of our ideas are not mentioned in their article. For good reason as it puts Marxism in a bad light.

3. Why does mentioning the history of anarchism weaken the SWP’s argument?

The SWP correctly argue that we *“live in a world of bullying line managers, petty school rules, oppressive police, and governments that serve the rich and powerful.”* However, they trivialise anarchism (and the natural feelings that result from such domination) by stating *“[e]veryone who hates that has, at least at times, felt a streak of ‘anarchist’ revolt against authority.”* Thus anarchism is presented as an emotional response rather than as valid, coherent intellectual opposition to the state, wage labour, inequality and hierarchical authority in general. But, of course, anarchism is more than this, as the SWP acknowledge:

“Anarchism, however, is more than a personal reaction against the tyrannies of capitalism. It is a set of political beliefs which have been held up as an alternative to the revolutionary socialist ideas of Karl Marx. Anarchist ideas have, on occasion, had a mass influence on movements against capitalism.”

Given that the “*revolutionary socialist ideas*” of Marx have been proven wrong on numerous occasions while Bakunin’s predictions were proven right, anarchists humbly suggest that anarchism is a valid alternative to Marxism. For example, Bakunin correctly predicted that when “*the workers . . . send common workers . . . to Legislative Assemblies . . . The worker-deputies, transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois . . . For men do not make their situations; on the contrary, men are made by them.*” [The Basic Bakunin, p. 108] The history of the Marxist Social Democratic Parties across the world proved him right.

Similarly, Bakunin predicted that Marx’s “*dictatorship of the proletariat*” would become the “*dictatorship over the proletariat.*” The experience of the Russian Revolution proved him correct — once the Bolshevik party had become the government power became centralised at the top, the workers’ soviets quickly became a cog in the state machinery rubber-stamping the decrees of the Bolshevik government, workers’ control of production by factory committees was replaced by state appointed managers and so on. The “socialist” state quickly became a bureaucratic monster without real control from below (indeed, the Bolsheviks actually disbanded soviets when opposition parties won a majority in them at the start of 1918). The start of the Civil War in May 1918 just made things worse.

The SWP continue by arguing:

“Socialists and anarchists share a hatred of capitalism. They have often fought alongside each other in major battles against the capitalist system. They struggled together in the Europe-wide mass strikes at the end of the First World War and the inspiring Spanish Revolution in 1936, as well as in countless smaller battles today.”

Which is true. They also fail to mention that the mass-strikes at the end of the First World War were defeated by the actions of the Social-Democratic Parties and trade unions. These parties were self-proclaimed revolutionary Marxist organisations, utilising (as Marx had argued) the ballot box and centralised organisations. Unsurprisingly, given the tactics and structure, reformism and bureaucracy had developed within them. When workers took strike action, even occupying their factories in Italy, the bureaucracy of the Social Democratic Parties and trade unions acted to undermine the struggle, isolating workers and supporting capitalism. Indeed, the German Social Democratic Party (which was, pre-1914, considered the jewel in the crown of Marxism and the best means to refute the anarchist critique of Marxist tactics) actually organised an alliance with the right-wing para-military Freikorps to violently suppress the revolution. The Marxist movement had degenerated into bourgeois parties, as Bakunin predicted.

It is also strange that the SWP mention the “*inspiring Spanish Revolution in 1936*” as this revolution was mainly anarchist in its “*inspiring*” features. Workers took over workplaces and the land, organising them under workers’ self-management. Direct democracy was practised by hundreds of thousands of workers in line with the organisational structures of the anarchist union the C.N.T. In contrast, the Russian Revolution saw power become centralised into the hands of the Bolshevik party leadership and workers’ self-management of

production was eliminated in favour of one-man management imposed from above (see M. Brinton's **The Bolsheviks and Workers' Control** for details).

4. How is the SWP wrong about centralisation?

The SWP continue by arguing that *“there are differences between revolutionary socialism and anarchism. Both understand the need for organisation but disagree over what form that organisation takes.”* This is a vast step forward in the usual Marxist slander that anarchists reject the need for organisation and so should be welcomed. Unfortunately the rest of the discussion on this issue falls back into the usual swamp of slander.

They argue that *“[e]very struggle, from a local campaign against housing privatisation to a mass strike of millions of workers, raises the need for organisation. People come together and need mechanisms for deciding what to do and how to do it.”* They continue by arguing that *“Anarchism says that organisation has nothing to do with centralisation. For anarchism, any form of centralisation is a type of authority, which is oppressive.”*

This is true, anarchists do argue that centralisation places power at the centre, so disempowering the people at the base of an organisation. In order to co-ordinate activity anarchists propose federal structures, made up on mandated delegates from autonomous assemblies. In this way, co-ordination is achieved while ensuring that power remains at the bottom of the organisation, in the hands of those actually fighting or doing the work. Federalism does not deny the need to make agreements and to co-ordinate decisions. Far from it — it was put forward by anarchists precisely to ensure co-ordination of joint activity and to make agreements in such a way as to involve those subject to those decisions in the process of making them. Federalism **involves** people in managing their own affairs and so they develop their initiative, self-reliance, judgement and spirit of revolt so that they can **act** intelligently, quickly and autonomously during a crisis or revolutionary moment and show solidarity as and when required instead of waiting for commands from above as occurs with centralised movements. In other words, federalism is the means to combine participation and co-ordination and to create an organisation run from the bottom up rather than the top-down. As can be seen, anarchists do not oppose co-ordination and co-operation, making agreements and implementing them together.

After mentioning centralisation, the SWP make a massive jump of logic and assert:

“But arguing with someone to join a struggle, and trying to put forward tactics and ideas that can take it forward are attempts to lead.

“It is no good people coming together in a struggle, discussing what to do and then doing just what they feel like as if no discussion had taken place. We always need to take the best ideas and act on them in a united way.”

Placing ideas before a group of people is a “lead” but it is not centralisation. Moreover, anarchists are not against making agreements! Far from it. The aim of federal organisation is to make agreements, to co-ordinate struggles and activities. This does not mean ignoring agreements. As Kropotkin argued, the

commune “cannot any longer acknowledge any superior: that, above it, there cannot be anything, save the interests of the Federation, freely embraced by itself in concert with other Communes.” [No Gods, No Masters, vol. 1, p. 259] This vision was stressed in the C.N.T.’s resolution on Libertarian Communism made in May, 1936, which stated that “the foundation of this administration will be the Commune. These Communes are to be autonomous and will be federated at regional and national levels for the purpose of achieving goals of a general nature. The right of autonomy is not to preclude the duty of implementation of agreements regarding collective benefits.” [quoted by Jose Pierats, **The C.N.T. in the Spanish Revolution**, p. 68] In the words of Malatesta:

“But an organisation, it is argued, presupposes an obligation to co-ordinate one’s own activities with those of others; thus it violates liberty and fetters initiative. As we see it, what really takes away liberty and makes initiative impossible is the isolation which renders one powerless. Freedom is not an abstract right but the possibility of acting . . . it is by co-operation with his fellows that man finds the means to express his activity and his power of initiative.” [**Life and Ideas**, pp. 86–7]

Hence anarchists do not see making collective decisions and working in a federation as an abandonment of autonomy or a violation of anarchist theory and principles. Rather, we see such co-operation and co-ordination, generated from below upwards, as an essential means of exercising and protecting freedom.

The SWP’s comment against anarchism is a typical Marxist position. The assumption seems to be that “centralisation” or “centralism” equals co-ordination and, because we reject centralisation, anarchists must reject co-ordination, planning and agreements. However, in actuality, anarchists have always stressed the need for federalism to co-ordinate joint activities, stressing that decision-making and organisation must flow from below upwards so that the mass of the population can manage their own affairs directly (i.e. practice self-management and so anarchy). Unfortunately, Marxists fail to acknowledge this, instead asserting we are against co-operation, co-ordination and making agreements. The SWP’s arguments are an example of this, making spurious arguments about the need for making agreements.

In this the SWP are following in a long-line of Marxist inventions. For example, Engels asserted in his infamous diatribe “*The Bakuninists at work*” that Bakunin “[a]s early as September 1870 (in his **Lettres a un francais** [*Letters to a Frenchman*]) . . . had declared that the only way to drive the Prussians out of France by a revolutionary struggle was to do away with all forms of centralised leadership and leave each town, each village, each parish to wage war on its own.” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 141]

In fact, the truth is totally different. Bakunin does, of course, reject “centralised leadership” as it would be “necessarily very circumscribed, very short-sighted, and its limited perception cannot, therefore, penetrate the depth and encompass the whole complex range of popular life.” However, it is a falsehood to state that he denies the need for co-ordination of struggles and federal organisation from the bottom up in that or any other work. As he puts it, the revolution must “foster the self-organisation of the masses into autonomous

bodies, federated from the bottom upwards.” With regards to the peasants, he thinks they will “*come to an understanding, and form some kind of organisation . . . to further their mutual interests . . . the necessity to defend their homes, their families, and their own lives against unforeseen attack . . . will undoubtedly soon compel them to contract new and mutually suitable arrangements.*” The peasants would be “*freely organised from the bottom up.*” [“*Letters to a French*”, **Bakunin on Anarchism**, p. 196, p. 206 and p. 207] In this he repeated his earlier arguments concerning social revolution — claims Engels was well aware of, just as he was well aware of the statements by Bakunin in his “*Letters to a Frenchman.*” In other words, Engels deliberately lied about Bakunin’s political ideas. It appears that the SWP is simply following the Marxist tradition in their article.

5. Why does the SWP’s “*picket line is ‘authoritarian’*” argument totally miss the point?

They continue by arguing:

“Not all authority is bad. A picket line is ‘authoritarian.’ It tries to impose the will of the striking workers on the boss, the police and on any workers who may be conned into scabbing on the strike.”

What should strike the reader about this example is its total lack of class analysis. In this the SWP follow Engels. In his essay **On Authority**, Engels argues that a “*revolution is certainly the most authoritarian thing there is; it is the act whereby one part of the population imposes its will upon the other part by means of rifles, bayonets and cannon—authoritarian means, if such there be at all; and if the victorious party does not want to have fought in vain, it must maintain this rule by means of the terror its arms inspire in the reactionaries.*” [The Marx-Engels Reader, p. 733]

However, such an analysis is without a class basis and so will, by necessity, mislead the writer and the reader. Engels argues that revolution is the imposition by “*one part of the population*” on another. Very true — but Engels fails to indicate the nature of class society and, therefore, of a social revolution. In a class society “*one part of the population*” constantly “*imposes its will upon the other part*” all the time. In other words, the ruling class imposes its will on the working class everyday in work by the hierarchical structure of the workplace and in society by the state. Discussing the “*population*” as if it was not divided by classes, and so subject to specific forms of authoritarian social relationships, is liberal nonsense. Once we recognise that the “*population*” in question is divided into classes we can easily see the fallacy of Engels argument. In a social revolution, the act of revolution is the overthrow of the power and authority of an oppressing and exploiting class by those subject to that oppression and exploitation. In other words, it is an act of liberation in which the hierarchical power of the few over the many is eliminated and replaced by the freedom of the many to control their own lives. It is hardly authoritarian to destroy authority! Thus a social revolution is, fundamentally, an act of liberation for the oppressed who act in their own interests to end the system in which “*one part of population imposes its will upon the other*” everyday.

This applies equally to the SWP's example of a picket line. Is a picket line really authoritarian because it tries to impose its will on the boss, police or scabs? Rather, is it not defending the workers' freedom against the authoritarian power of the boss and their lackeys (the police and scabs)? Is it "*authoritarian*" to resist authority and create a structure — a strike assembly and picket line — which allows the formally subordinated workers to manage their own affairs directly and without bosses? Is it "*authoritarian*" to combat the authority of the boss, to proclaim your freedom and exercise it? Of course not. The SWP are playing with words.

Needless to say, it is a large jump from the "authority" of a strikers' assembly to that of a highly centralised "workers' state" but that, of course, is what the SWP wish the reader to do. Comparing a strikers' assembly and picket line — which is a form of self-managed association — with a state cannot be done. It fails to recognise the fundamental difference. In the strikers' assembly and picket line the strikers themselves decide policy and do not delegate power away. In a state, power is delegated into the hands of a few who then use that power as they see fit. This by necessity disempowers those at the base, who are turned into mere electors and order takers. Such a situation can only spell death of a social revolution, which requires the active participation of all if it is to succeed. It also exposes the central fallacy of Marxism, namely that it claims to desire a society based on the participation of everyone yet favours a form of organisation — centralisation — that precludes that participation.

6. Why are the SWP's examples of "*state functions*" wrong?

The SWP continue their diatribe against anarchism:

"Big workers' struggles throw up an alternative form of authority to the capitalist state. Militant mass strikes throw up workers' councils. These are democratic bodies, like strike committees. But they take on organising 'state functions' — transport, food distribution, defence of picket lines and workers' areas from the police and army, and so on."

To state the obvious, transportation and food distribution are not "*state functions*." They are economic functions. Similarly, defence is not a "*state function*" as such — after all, individuals can and do defend themselves against aggression, strikers organise themselves to defend themselves against cops and hired strike breakers, and so on. This means that defence can be organised in a **libertarian** fashion, directly by those involved and based on self-managed workers' militias and federations of free communes. It need not be the work of a state nor need it be organised in a statist (i.e. hierarchical) fashion like, for example, the current bourgeois state and military or the Bolshevik Red Army (where the election of officers, soldiers' councils and self-governing assemblies were abolished by Trotsky in favour of officers appointed from above). So "defence" is **not** a state function.

What is a "*state function*" is imposing the will of a minority — the government, the boss, the bureaucrat — onto the population via professional bodies

such as the police and military. This is what the Bolshevik state did, with workers' councils turned into state bodies executing the decrees of the government and using a specialised and hierarchical army and police force to do so. The difference is important. Luigi Fabbri sums up it well:

“The mistake of authoritarian communists in this connection is the belief that fighting and organising are impossible without submission to a government; and thus they regard anarchists . . . as the foes of all organisation and all co-ordinated struggle. We, on the other hand, maintain that not only are revolutionary struggle and revolutionary organisation possible outside and in spite of government interference but that, indeed, that is the only effective way to struggle and organise, for it has the active participation of all members of the collective unit, instead of their passively entrusting themselves to the authority of the supreme leaders.

“Any governing body is an impediment to the real organisation of the broad masses, the majority. Where a government exists, then the only really organised people are the minority who make up the government; and . . . if the masses do organise, they do so against it, outside it, or at the very least, independently of it. In ossifying into a government, the revolution as such would fall apart, on account of its awarding that government the monopoly of organisation and of the means of struggle.” [“Anarchy and ‘Scientific’ Communism”, in **The Poverty of Statism**, pp. 13–49, Albert Meltzer (ed.), p. 27]

Thus the difference between anarchists and Leninists is not whether the organisations workers' create in struggle will be the framework of a free society (or the basis of the Commune). Indeed, anarchists have been arguing this for longer than Marxists have. The difference is whether these organisations remain self-managed or whether they become part of a centralised state. In the words of Camillo Berneri:

“The Marxists . . . foresee the natural disappearance of the State as a consequence of the destruction of classes by the means of ‘the dictatorship of the proletariat,’ that is to say State Socialism, whereas the Anarchists desire the destruction of the classes by means of a social revolution which eliminates, with the classes, the State. The Marxists, moreover, do not propose the armed conquest of the Commune by the whole proletariat, but they propose the conquest of the State by the party which imagines that it represents the proletariat. The Anarchists allow the use of direct power by the proletariat, but they understand by the organ of this power to be formed by the entire corpus of systems of communist administration-corporate organisations [i.e. industrial unions], communal institutions, both regional and national-freely constituted outside and in opposition to all political monopoly by parties and endeavouring to a minimum administrative centralisation.” [“Dictatorship of the Proletariat and State Socialism”, **Cienfuegos Press Anarchist Review**, no. 4, p. 52]

So, anarchists agree, in “*big workers' struggles*” organisation is essential and can form an alternative to the capitalist state. However, such a framework only

becomes an “authority” when power is transferred from the base into the hands of an executive committee at the top. Strike and community assemblies, by being organs of self-management, are not an “authority” in the same sense that the state is or the boss is. Rather, they are the means by which people can manage their own struggles (and so affairs) directly, to govern themselves and so do without the need for hierarchical authority.

The SWP, in other words, confuse two very different things.

7. What is ironic about the SWP’s comment that workers’ councils must “*break up*” the capitalist state?

After misunderstanding basic concepts, the SWP treat us to a history lesson:

“Such councils were a feature of the Russian revolutions of 1905 and 1917, the German Revolution after the First World War, the Spanish Revolution of 1936, and many other great struggles. Socialists argue that these democratic workers’ organisations need to take power from the capitalists and break up their state.”

Anarchists agree. Indeed, they argued that workers’ organisations should “*break up*” and replace the state long before Lenin discovered this in 1917. For example, Bakunin argued in the late 1860s that the International Workers’ Association, an “*international organisation of workers’ associations from all countries*”, would “*be able to take the revolution into its own hands*” and be “*capable of replacing this departing political world of States and bourgeoisie.*” The “*natural organisation of the masses*” was “*organisation by trade association,*” in other words, by unions, “*from the bottom up.*” The means of creating socialism would be “*emancipation through practical action . . . workers’ solidarity in their struggle against the bosses. It means trades unions, organisation*.” The very process of struggle would create the framework of a new society, a federation of workers’ councils, as “*strikes indicate a certain collective strength already, a certain understanding among the workers . . . each strike becomes the point of departure for the formation of new groups.*” He stresses the International was a product of the class war as it “*has not created the war between the exploiter and the exploited; rather, the requirements of that war have created the International.*” Thus the seeds of the future society are created by the class struggle, by the needs of workers to organise themselves to resist the boss and the state. [The Basic Bakunin, p. 110, p. 139, p. 103 and p. 150]

He stressed that the revolution would be based on federations of workers’ associations, in other words, workers’ councils:

“the federative alliance of all working men’s associations . . . [will] constitute the Commune . . . [the] Communal Council [will be] composed of . . . delegates . . . vested with plenary but accountable and removable mandates . . . all provinces, communes and associations . . . by first reorganising on revolutionary lines . . . [will] constitute the federation of insurgent associations, communes and provinces . . . [and] organise a revolutionary force capable defeating reaction . . . [and for]

self-defence ... [The] revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations ... organised from the bottom upwards by means of revolutionary delegation...” [Michael Bakunin: Selected Writings, pp. 170–2]

And:

“The future social organisation must be made solely from the bottom up, by the free association or federation of workers, firstly in their unions, then in the communes, regions, nations and finally in a great federation, international and universal.” [Op. Cit., p. 206]

Thus it is somewhat ironic to have Leninists present basic anarchist ideas as if they had thought of them first!

Then again, the ability of the Marxists to steal anarchist ideas and claim them as their own is well known. They even rewrite history to do so. For example, the SWP’s John Rees in the essay *“In Defence of October”* argues that *“since Marx’s writings on the Paris Commune”* a *“cornerstone of revolutionary theory”* was *“that the soviet is a superior form of democracy because it unifies political and economic power.”* [International Socialism, no. 52, p. 25] Nothing could be further from the truth, as Marx’s writings on the Paris Commune prove.

The Paris Commune, as Marx himself argued, was *“formed of the municipal councillors, chosen by universal suffrage in the various wards of the town.”* [The Civil War in France, Selected Works, p. 287] As Marx made clear, it was definitely **not** based on delegates from workplaces and so could **not** unify political and economic power. Indeed, to state that the Paris Commune was a soviet is simply a joke, as is the claim that Marxists supported soviets as revolutionary organs to smash and replace the state from 1871. In fact Marxists did not subscribe to this *“cornerstone of revolutionary theory”* until 1917 when Lenin argued that the Soviets would be the best means of ensuring a Bolshevik government.

Indeed the **only** political movement which took the position Rees falsely ascribes to Marxism was anarchism. This can be clearly seen from Bakunin’s works, a few representative quotes we have provided above. Moreover, Bakunin’s position dates, we must stress, from **before** the Paris Commune. This position has been argued by revolutionary anarchists ever since — decades before Marxists did.

Similarly, Rees argues that *“the socialist revolution must counterpose the soviet to parliament ... because it needs an organ which combines economic power — the power to strike and take control of the workplaces — with an insurrectionary bid for political power, breaking the old state.”* [Ibid.] However, he is just repeating anarchist arguments made decades before Lenin’s temporary conversion to the soviets. In the words of the anarchist Jura Federation (written in 1880):

“The bourgeoisie’s power over the popular masses springs from economic privileges, political domination and the enshrining of such privileges in the laws. So we must strike at the wellsprings of bourgeois power, as well as its various manifestations.”

“The following measures strike us as essential to the welfare of the revolution, every bit as much as armed struggle against its enemies:

“The insurgents must confiscate social capital, landed estates, mines, housing, religious and public buildings, instruments of labour, raw materials, gems and precious stones and manufactured products:

“All political, administrative and judicial authorities are to be abolished.

“... What should the organisational measures of the revolution be?

“Immediate and spontaneous establishment of trade bodies: provisional assumption by those of ... social capital ...: local federation of a trades bodies and labour organisation:

“Establishment of neighbourhood groups and federations of same ...

[...]

“[T]he federation of all the revolutionary forces of the insurgent Communes ... Federation of Communes and organisation of the masses, with an eye to the revolution’s enduring until such time as all reactionary activity has been completely eradicated.

[...]

“Once trade bodies have been established, the next step is to organise local life. The organ of this life is to be the federation of trades bodies and it is this local federation which is to constitute the future Commune.” [No Gods, No Masters, vol. 1, pp. 246–7]

As can be seen, long before Lenin’s turn towards the soviets as a means of the Bolsheviks taking power, **anarchists**, not Marxists, had argued that we must counterpose the council of workers’ delegates (by trade in the case of the Jura federation, by workplace in the case of the later anarcho-syndicalist unions, anarchist theory and the soviets). Anarchists clearly saw that, to quote Bakunin, “[n]o revolution could succeed ... today unless it was simultaneously a political and a social revolution.” [Op. Cit., p. 141] Unlike Marx, who clearly saw a political revolution (the conquest of state power) coming **before** the economic transformation of society (“The political rule of the producer cannot coexist with the perpetuation of his social slavery. The Commune was therefore to serve as a lever for uprooting the economical foundations upon which rests the existence of classes and therefore of class-rule.” [Marx, Op. Cit., p. 290]). This is why anarchists saw the social revolution in terms of economic and social organisation and action as its first steps were to eliminate both capitalism and the state.

Rees, in other words, is simply stating anarchist theory as if Marxists have been arguing the same thing since 1871!

Moreover, anarchists predicted other ideas that Marx took from the experience of the Paris Commune. Marx praised the fact that each delegate to the Commune was “at any time revocable and bound by the **mandat impératif** (formal instructions) of his constituents ... [and so] strictly responsible agents.” [Op. Cit., p. 288] Anarchists had held this position a number of years **before** the Commune introduced it. Proudhon was arguing in 1848 for “universal suffrage and as a consequence of universal suffrage, we want implementation of the binding mandate. Politicians balk at it! Which means that in their eyes, the

people, in electing representatives, do not appoint mandatories but rather abjure their sovereignty! That is assuredly not socialism: it is not even democracy.” [No Gods, No Masters, vol. 1, p. 63] We find Bakunin arguing exactly the same. For example, in 1868 he wrote that the “*Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade . . . these deputies being invested with binding mandates and accountable and revocable at all times.*” [Op. Cit., p. 155]). In addition, the similarities with the Commune’s political ideas and Proudhon’s are clear, as are the similarities between the Russian Soviets and Bakunin’s views on revolution.

So, as well as predicting the degeneration of social democracy and the Russian revolution, anarchists have also predicted such key aspects of revolutionary situations as organising on the basis of workplace and having delegates mandated and subject to instant recall. Such predictions flow from taking part in social movements and analysing their tendencies. Moreover, a revolution is the resisting of current authorities and an act of self-liberation and so its parallels with anarchism are clear. As such the class struggle, revolutionary movements and revolutions have a libertarian basis and tendencies and, therefore, it is unsurprising that anarchist ideas have spontaneously developed in them. Thus we have a two way interaction between ideas and action. Anarchist ideas have been produced spontaneously by the class struggle due to its inherent nature as a force confronting authority and its need for self-activity and self-organisation. Anarchism has learned from that struggle and influenced it by its generalisations of previous experiences and its basis in opposing hierarchy. Anarchist predictions, therefore, come as no surprise.

Therefore, Marxists have not only been behind the class struggle itself, they have also been behind anarchism in terms of practical ideas on a social revolution and how to organise to transform society. While anarchist ideas have been confirmed by the class struggle, Marxist ones have had to be revised to bring them closer to the actual state of the struggle and to the theoretical ideas of anarchism. And the SWP have the cheek to present these ideas as if their tradition had thought of them!

Little wonder the SWP fail to present an honest account of anarchism.

8. How do the SWP re-write the history of the Russian Revolution?

Their history lesson continues:

“This happened in Russia in October 1917 in a revolution led by the Bolshevik Party.”

In reality, this did not happen. In October 1917, the Bolshevik Party took power in the name of the workers’ councils, the councils themselves did not take power. This is confirmed by Trotsky, who notes that the Bolshevik Party conference of April 1917 “*was devoted to the following fundamental question: Are we heading toward the conquest of power in the name of the socialist revolution or are we helping (anybody and everybody) to complete the democratic revolution? . . . Lenin’s position was this: . . . the capture of the soviet majority; the overthrow of the Provisional Government; the seizure of power through*

the soviets.” Note, **through** the soviets not **by** the soviets thus indicating the fact the Party would hold the real power, not the soviets of workers’ delegates. Moreover, he states that “*to prepare the insurrection and to carry it out under cover of preparing for the Second Soviet Congress and under the slogan of defending it, was of inestimable advantage to us.*” He continued by noting that it was “*one thing to prepare an armed insurrection under the naked slogan of the seizure of power by the party, and quite another thing to prepare and then carry out an insurrection under the slogan of defending the rights of the Congress of Soviets.*” The Soviet Congress just provided “*the legal cover*” for the Bolshevik plans rather than a desire to see the Soviets actually start managing society. [The Lessons of October]

In 1920, he argued that “[*w*]e have more than once been accused of having substituted for the dictatorships of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only because of the dictatorship of the party. It is thanks to the . . . party . . . [that] the Soviets . . . [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class.” [Terrorism and Communism, p. 109]

In 1937 he continued this theme by arguing that “*the proletariat can take power only through its vanguard.*” Thus, rather than the working class as a whole “*seizing power*”, it is the “*vanguard*” which takes power — “*a revolutionary party, even after seizing power . . . is still by no means the sovereign ruler of society.*” He mocked the anarchist idea that a socialist revolution should be based on the self-management of workers within their own autonomous class organisations:

“Those who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Stalinism and Bolshevism]

As can be seen, over a 17 year period Trotsky argued that it was the party which ruled, not the councils. The workers’ councils became little more than rubber-stamps for the Bolshevik government (and not even that, as the central government only submitted a fraction of its decrees to the Central Executive of the national soviet, and that soviet was not even in permanent session). As Russian Anarchist Voline made clear “*for, the anarchists declared, if ‘power’ really should belong to the soviets, it could not belong to the Bolshevik Party, and if it should belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets.*” [The Unknown Revolution, p. 213] In the words of Kropotkin:

“The idea of soviets . . . councils of workers and peasants . . . controlling the economic and political life of the country is a great idea. All the more so, since it is necessarily follows that these councils should be composed of all who take part in the real production of national wealth by their own efforts.”

“But as long as the country is governed by a party dictatorship, the workers’ and peasants’ councils evidently lose their entire significance. They are reduced to the passive role formerly played by the ‘States General,’ when they were convoked by the king and had to combat an all-powerful royal council.” [**Kropotkin’s Revolutionary Pamphlets**, pp. 254–5]

In other words, the workers’ councils took power in name only. Real power rested with the central government and the workers’ councils become little more than a means to elect the government. Rather than manage society directly, the soviets simply became a transmission belt for the decrees and orders of the Bolshevik party. Hardly a system to inspire anyone.

However, the history of the Russian Revolution has two important lessons for members of the various anti-globalisation and anti-capitalist groups. Firstly, as we noted in section 1, is usually miles behind the class struggle and the ideas developed in it. As another example, we can point to the movement for workers’ control and self-management that developed around the factory committees during the summer of 1917. It was the workers themselves, **not** the Bolshevik Party, which raised the issue of workers’ self-management and control during the Russian Revolution. As historian S.A. Smith correctly summarises, the *“factory committees launched the slogan of workers’ control of production quite independently of the Bolshevik party. It was not until May that the party began to take it up.”* [**Red Petrograd**, p. 154] Given that the defining aspect of capitalism is wage labour, the Russian workers’ raised a clearly socialist demand that entailed its abolition. It was the Bolshevik party, we must note, who failed to raise above a *“trade union conscious”* in this and so many other cases.

Therefore, rather than being at the forefront of struggle and ideas, the Bolsheviks were, in fact, busy trying to catch up. History has repeated itself in the anti-capitalist demonstrations. We should point out that anarchists have supported the idea of workers’ self-management of production since 1840 and, unsurprisingly enough, were extremely active in the factory committee movement in 1917.

The second lesson to be gained from the Russian Revolution is that while the Bolsheviks happily (and opportunistically) took over popular slogans and introduced them into their rhetoric, they rarely meant the same thing to the Bolsheviks as they did to the masses. For example, as noted above, the Bolsheviks took up the slogan *“All Power to the Soviets”* but rather than mean that the Soviets would manage society directly they actually meant the Soviets would delegate their power to a Bolshevik government which would govern society in their name. Similarly with the term *“workers’ control of production.”* As S.A. Smith correctly notes, Lenin used *“the term [‘workers’ control’] in a very different sense from that of the factory committees.”* In fact Lenin’s *“proposals . . . [were] thoroughly statist and centralist in character, whereas the practice of the factory committees was essentially local and autonomous.”* [**Op. Cit.**, p. 154] Once in power, the Bolsheviks systematically undermined the popular meaning of workers’ control and replaced it with their own, statist conception. This ultimately resulted in the introduction of *“one-man management”* (with the manager appointed from above by the state). This process is documented in Maurice Brinton’s **The Bolsheviks and Workers’ Control**, who also indicates the clear links between Bolshevik practice and Bolshevik ideology as well

as how both differed from popular activity and ideas.

Hence the comments by Russian Anarchist Peter Arshinov:

“Another no less important peculiarity is that [the] October [revolution of 1917] has two meanings — that which the working’ masses who participated in the social revolution gave it, and with them the Anarchist-Communists, and that which was given it by the political party [the Marxist-Communists] that captured power from this aspiration to social revolution, and which betrayed and stifled all further development. An enormous gulf exists between these two interpretations of October. The October of the workers and peasants is the suppression of the power of the parasite classes in the name of equality and self-management. The Bolshevik October is the conquest of power by the party of the revolutionary intelligentsia, the installation of its ‘State Socialism’ and of its ‘socialist’ methods of governing the masses.” [The Two Octobers]

The members of the “anti-capitalist” movements should bear that in mind when the SWP uses the same rhetoric as they do. Appearances are always deceptive when it comes to Leninists. The history of the Russian Revolution indicates that while Leninists like the SWP can use the same words as popular movements, their interpretation of them can differ drastically.

Take, for example, the expression “anti-capitalist.” The SWP will claim that they, too, are “anti-capitalist” but, in fact, they are only opposed to “free market” capitalism and actually support state capitalism. Lenin, for example, argued that workers’ must “*unquestioningly obey the single will of the leaders of labour*” in April 1918 along with granting “*individual executives dictatorial power (or ‘unlimited’ powers)*” and that “*the appointment of individuals, dictators with unlimited powers*” was, in fact, “*in general compatible with the fundamental principles of Soviet government*” simply because “*the history of revolutionary movements*” had “*shown*” that “*the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes.*” He notes that “*[u]ndoubtedly, the dictatorship of individuals was compatible with bourgeois democracy.*” [The Immediate Tasks of the Soviet Government, p. 34 and p. 32]

He confused state capitalism with socialism. “*State capitalism,*” he wrote, “*is a complete material preparation for socialism, the threshold of socialism, a rung on the ladder of history between which and the rung called socialism there are no gaps.*” [Collected Works, vol. 24, p. 259] He argued that socialism “*is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly made to benefit the whole people; by this token it ceases to be capitalist monopoly.*” [The Threatening Catastrophe and how to avoid it, p. 37]

As Peter Arshinov argued, a “*fundamental fact*” of the Bolshevik revolution was “*that the workers and the peasant labourers remained within the earlier situation of ‘working classes’ — producers managed by authority from above.*” He stressed that Bolshevik political and economic ideas may have “*remov[ed] the workers from the hands of individual capitalists*” but they “*delivered them to the yet more rapacious hands of a single ever-present capitalist boss, the State. The relations between the workers and this new boss are the same as*

earlier relations between labour and capital . . . Wage labour has remained what it was before, except that it has taken on the character of an obligation to the State. . . It is clear that in all this we are dealing with a simple substitution of State capitalism for private capitalism.” [The History of the Makhnovist Movement, p. 35 and p. 71] Therefore, looking at Bolshevism in power and in theory it is clear that it is not, in fact, “anti-capitalist” but rather in favour of state capitalism and any appropriation of popular slogans was always under the firm understanding that the Bolshevik interpretation of these ideas is what will be introduced.

Therefore the SWP’s attempt to re-write Russian History. The actual events of the Russian Revolution indicate well the authoritarian and state-capitalist nature of Leninist politics.

9. How do the SWP re-write the history of the Spanish Revolution?

The SWP, after re-writing Russian history, move onto Spanish history:

“It did not happen in Spain in 1936. The C.N.T., a trade union heavily influenced by anarchist ideas, led a workers’ uprising in the city of Barcelona that year. Workers’ councils effectively ran the city.

“But the capitalist state machine did not simply disappear. The government and its army, which was fighting against Franco’s fascist forces, remained, although it had no authority in Barcelona.

“The government even offered to hand power over to the leaders of the C.N.T. But the C.N.T. believed that any form of state was wrong. It turned down the possibility of forming a workers’ state, which could have broken the fascists’ coup and the capitalist state.

“Worse, it accepted positions in a government that was dominated by pro-capitalist forces.

“That government crushed workers’ power in Barcelona, and in doing so fatally undermined the fight against fascism.”

It is hard to know where to start with this distortion of history.

Firstly, we have to point out that the C.N.T. did lead a workers’ uprising in 1936 but it was in response to a military coup and occurred all across Spain. The army was not “*fighting against Franco’s fascist forces*” but rather had been the means by which Franco had tried to impose his version of fascism. Indeed, as the SWP know fine well, one of the first acts the CNT did in the Spanish Revolution was to organise workers’ militias to go fight the army in those parts of Spain in which the unions (particularly the CNT which lead the fighting) did not defeat it by street fighting. Thus the C.N.T. faced the might of the Spanish army rising in a fascist coup. That, as we shall see, influenced its decisions.

By not mentioning (indeed, lying about) the actual conditions the CNT faced in July 1936, the SWP ensure the reader cannot understand what happened and why the CNT made the decisions it did. Instead the reader is encouraged to think it was purely a result of anarchist theory. Needless to say, the SWP

have a fit when it is suggested the actions of the Bolsheviks during the Russian Civil War were simply the result of Leninist ideology and unaffected by the circumstances they were made in. The logic is simple: the mistakes of Marxists are **never** their fault, **never** derive from Marxist politics and are always attributable to circumstances (regardless of the facts); the mistakes of anarchists, however, **always** derive from their politics and can never be explained by circumstances (regardless of counter-examples and those circumstances). Once this is understood, the reason why the SWP distorted the history of the Spanish Revolution becomes clear.

Secondly, anarchism does not think that the “*capitalist state machine*” will “*simply disappear*.” Rather, anarchists think that (to quote Kropotkin) the revolution “*must smash the State and replace it with the Federation [of workers’ associations and communes] and it will act accordingly*.” [No Gods, No Masters, vol. 1, p. 259] In other words, the state does not disappear, it is destroyed and replaced with a new, libertarian, form of social structure. Thus the SWP misrepresents anarchist theory.

Thirdly, yes, the Catalan government did offer to stand aside for the C.N.T. and the C.N.T. rejected the offer. Why? The SWP claim that “*the C.N.T. believed that any form of state was wrong*” and that is why it did not take power. That is true, but what the SWP fail to mention is more important. The C.N.T. refused to implement libertarian communism after the defeat of the army uprising in July 1936 simply because it did not want to be isolated nor have to fight the republican government as well as the fascists (needless to say, such a decision, while understandable, was wrong). But such historical information would confuse the reader with facts and make their case against anarchism less clear-cut.

Ironically the SWP’s attack on the CNT indicates well the authoritarian basis of its politics and its support of soviets simply as a means for the party leaders to take power. After all, they obviously consider it a mistake for the “*leaders of the CNT*” to refuse power. Trotsky made the same point, arguing that:

“A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society.”
[Stalinism and Bolshevism]

Yet the SWP say they, and their political tradition, are for “*workers’ power*” yet, in practice, they clearly mean that power will be seized, held and exercised by the workers’ leaders. A strange definition of “workers’ power,” we must admit but one that indicates well the differences between anarchists and Marxists. The former aim for a society based on workers’ self-management. The latter desire a society in which workers’ delegate their power to control society (i.e. their own lives) to the “leaders,” to the “workers’ party” who will govern on their behalf. The “leaders” of the CNT quite rightly rejected such this position — unfortunately they also rejected the anarchist position at the same time and decided to ignore their politics in favour of collaborating with other anti-fascist unions and parties against Franco.

Simply put, either the workers’ have the power or the leaders do. To confuse the rule of the party with workers’ self-management of society lays the basis for

party dictatorship (as happened in Russia). Sadly, the SWP do exactly this and fail to learn the lessons of the Russian Revolution.

Therefore, the SWP's argument against anarchism is logically flawed. Yes, the CNT did not take state power. However, neither did it destroy the state, as anarchist theory argues. Rather it ignored the state and this was its undoing. Thus the SWP attacks anarchism for anarchists failing to act in an anarchist manner! How strange.

One last point. The events of the Spanish Revolution are important in another way for evaluating anarchism and Marxism. Faced with the military coup, the Spanish government did nothing, even refusing to distribute arms to the workers. The workers, however, took the initiative, seized arms by direct action and took to the streets to confront the army. Indeed, the dynamic response of the CNT members to Franco's coup compared to the inaction of the Marxist inspired German workers movement faced with Hitler's taking of power presents us with another example of the benefits of federalism against centralism, of anarchism against Marxism. The federal structure of the CNT had accustomed its members to act for themselves, to show initiative and act without waiting for orders from the centre. The centralised German system did the opposite.

The SWP will argue, of course, that the workers were misled by their leaders ("who were only Marxists in name only"). The question then becomes: why did they not act for themselves? Perhaps because the centralised German workers' movement had eroded their members initiative, self-reliance and spirit of revolt to such a degree that they could no longer act without their leaders instructions? It may be argued that with **better** leaders the German workers would have stopped the Nazis, but such a plea fails to understand **why** better leaders did not exist in the first place. A centralised movement inevitably produces bureaucracy and a tendency for leaders to become conservative and compromised.

All in all, rather than refute anarchism the experience of the Spanish Revolution **confirms** it. The state needs to be destroyed, **not** ignored or collaborated with, and replaced by a federation of workers' councils organised from the bottom-up. By failing to do this, the CNT did ensure the defeat of the revolution but it hardly indicates a failure of anarchism. Rather it indicates a failure of anarchists who made the wrong decision in extremely difficult circumstances.

Obviously it is impossible to discuss the question of the C.N.T. during the Spanish Revolution in depth here. We address the issue of Marxist interpretations of Spanish Anarchist history in the appendix "*Marxism and Spanish Anarchism.*" Section 20 of that appendix discusses the C.N.T.'s decision to collaborate with the Republican State against Franco as well as its implications for anarchism.

10. Do anarchists ignore the fact that ideas change through struggle?

The SWP try and generalise from these experiences:

"In different ways, the lessons of Russia and Spain are the same. The organisational questions thrown up in particular struggles are critical when it comes to the working class challenging capitalism.

“Workers face conflicting pressures. On the one hand, they are forced to compete in the labour market. They feel powerless, as an individual, against the boss.

“That is why workers can accept the bosses’ view of the world. At the same time constant attacks on workers’ conditions create a need for workers to unite and fight back together.

“These two pressures mean workers’ ideas are uneven. Some see through the bosses’ lies. Others can be largely taken in. Most part accept and part reject capitalist ideas. The overall consciousness of the working class is always shifting. People become involved in struggles which lead them to break with pro-capitalist ideas.”

That is very true and anarchists are well aware of it. That is why anarchists organise groups, produce propaganda, argue their ideas with others and encourage direct action and solidarity. We do so because we are aware that the ideas within society are mixed and that struggle leads people to break with pro-capitalist ideas. To quote Bakunin:

*“the germs of [socialist thought] . . . [are to] be found in the instinct of every earnest worker. The goal . . . is to make the worker fully aware of what he wants, to unjam within him a stream of thought corresponding to his instinct . . . What impedes the swifter development of this salutary thought among the working masses? Their ignorance to be sure, that is, for the most part the political and religious prejudices with which self-interested classes still try to obscure their conscious and their natural instinct. How can we dispel this ignorance and destroy these harmful prejudices? By education and propaganda? . . . they are insufficient . . . [and] who will conduct this propaganda? . . . [The] workers’ world . . . is left with but a single path, that of **emancipation through practical action** . . . It means workers’ solidarity in their struggle against the bosses. It means **trade-unions, organisation** . . . To deliver [the worker] from that ignorance [of reactionary ideas], the International relies on collective experience he gains in its bosom, especially on the progress of the collective struggle of the workers against the bosses . . . As soon as he begins to take an active part in this wholly material struggle, . . . Socialism replaces religion in his mind. . . through practice and collective experience . . . the progressive and development of the economic struggle will bring him more and more to recognise his true enemies . . . The workers thus enlisted in the struggle will necessarily . . . recognise himself to be a revolutionary socialist, and he will act as one.” [The Basic Bakunin, p. 102–3]*

Therefore anarchists are well aware of the importance of struggle and propaganda in winning people to anarchist ideas. No anarchist has ever argued otherwise.

11. Why do anarchists oppose the Leninist “revolutionary party”?

The SWP argue that:

“So there is always a battle of ideas within the working class. That is why political organisation is crucial. Socialists seek to build a revolutionary party not only to try to spread the lessons from one struggle to another.

“They also want to organise those people who most clearly reject capitalism into a force that can fight for their ideas inside the working class as a whole. Such a party is democratic because its members constantly debate what is happening in today’s struggles and the lessons that can be applied from past ones.”

That, in itself, is something most anarchists would agree with. That is why they build specific anarchist organisations which discuss and debate politics, current struggles, past struggles and revolutions and so on. In Britain there are three national anarchist federations (the Anarchist Federation, the Solidarity Federation and the Class War Federation) as well as numerous local groups and regional federations. The aim of these organisations is to try and influence the class struggle towards anarchist ideas (and, equally important, **learn** from that struggle as well — the “*program of the Alliance [Bakunin’s anarchist group], expanded to keep pace with developing situations.*” [Bakunin, **Bakunin on Anarchism**, p. 406]). The need for a specific political organisation is one most anarchists would agree with.

Thus few anarchists are believers in spontaneous revolution and see the need for anarchists to organise **as anarchists** to spread anarchist ideas and push the struggle towards anarchist ends (smashing the state and capitalism and the creation of a free federation of workers’ councils and communes) via anarchist tactics (direct action, solidarity, general strikes, insurrection and encouraging working class self-organisation and self-management). Hence the need for specific anarchist organisations:

“The Alliance [Bakunin’s anarchist group] is the necessary complement to the International [the revolutionary workers’ movement]. But the International and the Alliance, while having the same ultimate aims, perform different functions. The International endeavours to unify the working masses . . . regardless of nationality and national boundaries or religious and political beliefs, into one compact body; the Alliance . . . tries to give these masses a really revolutionary direction. The programs of one and the other, without being opposed, differ in the degree of their revolutionary development. The International contains in germ, but only in germ, the whole program of the Alliance. The program of the Alliance represents the fullest unfolding of the International.” [Bakunin on Anarchism, p. 157]

However, anarchists also argue that the revolutionary organisation must also reflect the type of society we want. Hence an anarchist federation must be self-organised from below, rejecting hierarchy and embracing self-management. For

anarchists an organisation is not democratic because it debates, as the SWP claims. It is democratic only if the membership actually decides the policy of the organisation. That the SWP fail to mention this is significant and places doubt on whether their organisation is democratic in fact (as we indicate in section 22, the SWP may debate but it is not democratic). The reason why democracy in the SWP may not be all that it should be can be found in their comment that:

“It is also centralised, as it arrives at decisions which everyone acts on.”

However, this is not centralisation. Centralisation is when the centre decides everything and the membership follow those orders. That the membership may be in a position to elect those at the centre does not change the fact that the membership is simply expected to follow orders. It is the organisational principle of the army or police, not of a free society. That this is the principle of Leninism can be seen from Trotsky’s comment that the *“statues [of the party] should express the leadership’s organised distrust of the members, a distrust manifesting itself in vigilant control from above over the Party.”* [quoted by M. Brinton, **The Bolsheviks and Workers’ Control**, p. xi] Thus the centre controls the membership, not vice versa.

In **What is to be Done?** Lenin discussed *“the confusion of ideas concerning the meaning of democracy.”* He dismisses the idea of self-management as *“Primitive Democracy.”* He uses the example of the early British unions, where workers *“thought that it was an indispensable sign of democracy for all the members to do all the work of managing the unions; not only were all questions decided by the vote of all the members, but all the official duties were fulfilled by all the members in turn.”* He considered *“such a conception of democracy”* as *“absurd”* and saw it as historical necessity that it was replaced by *“representative institutions”* and *“full-time officials”*. [**Essential Works of Lenin**, pp. 162–3] In other words, the Leninist tradition rejects self-management in favour of hierarchical structures in which power is centralised in the hands of *“full-time officials”* and *“representative institutions.”*

In contrast, Bakunin argued that trade unions which ended *“primitive democracy”* and replaced it with representative institutions became bureaucratic and *“simply left all decision-making to their committees ... In this manner power gravitated to the committees, and by a species of fiction characteristic of all governments the committees substituted their own will and their own ideas for that of the membership.”* The membership become subject to *“the arbitrary power”* of the committees and *“ruled by oligarchs.”* In other words, bureaucracy set in and democracy **as such** was eliminated and while *“very good for the committees ... [it was] not at all favourable for the social, intellectual, and moral progress of the collective power”* of the workers’ movement. [**Bakunin on Anarchism**, pp. 246–7] Who was correct can quickly be seen from the radical and pro-active nature of the British trade union leadership. Ironically, the SWP always bemoan trade union bureaucracies betraying workers in struggle yet promote an organisational structure that ensures that power flows to the centre and into the hands of bureaucrats.

At best, Leninism reduces “democracy” to mean that the majority designates its rulers, copied from the model of bourgeois parliamentary democracy.

In practice it is drained of any real meaning and quickly becomes a veil thrown over the unlimited power of the rulers. The base does not run the organisation just because once a year it elects delegates who designate the central committee, no more than the people are sovereign in a parliamentary-type republic because they periodically elect deputies who designate the government. That the central committee is designated by a “democratically elected” congress makes no difference once it is elected, it is de facto and de jure the absolute ruler of the organisation. It has complete (statutory) control over the body of the Party (and can dissolve the base organisations, kick out militants, etc.).

Therefore it is ironic that the SWP promote themselves as supporters of democracy as it is anarchists who support the “*primitive democracy*” (self-management) contemptuously dismissed by Lenin. With their calls for centralisation, it is clear that SWP still follow Lenin, wishing to place decision-making at the centre of the organisation, in the hands of leaders, in the same way the police, army and bureaucratic trade unions do. Anarchists reject this vision as non-socialist and instead argue for the fullest participation in decision making by those subject to those decisions. Only in this way can government — inequality in power — be eliminated from society.

Just to stress the point, anarchists are not opposed to people making decisions and everyone who took part in making the decision acting on them. Such a system is not “centralised,” however, when the decisions flow from the bottom-up and are made by mandated delegates, accountable to the people who mandated them. It is centralised when it is decided upon by the leadership and imposed upon the membership. Thus the issue is not whether we organise or not organise, nor whether we co-ordinate joint activity or not, it is a question of how we organise and co-ordinate — from the bottom up or from the top down. As Bakunin argued:

“Discipline, mutual trust as well as unity are all excellent qualities when properly understood and practised, but disastrous when abused . . . [one use of the word] discipline almost always signifies despotism on the one hand and blind automatic submission to authority on the other. . .

“Hostile as I am to [this,] the authoritarian conception of discipline, I nevertheless recognise that a certain kind of discipline, not automatic but voluntary and intelligently understood is, and will ever be, necessary whenever a greater number of individuals undertake any kind of collective work or action. Under these circumstances, discipline is simply the voluntary and considered co-ordination of all individual efforts for a common purpose. At the moment of revolution, in the midst of the struggle, there is a natural division of functions according to the aptitude of each, assessed and judged by the collective whole. . .

“In such a system, power, properly speaking, no longer exists. Power is diffused to the collectivity and becomes the true expression of the liberty of everyone, the faithful and sincere realisation of the will of all . . . this is the only true discipline, the discipline necessary for the organisation of freedom. This is not the kind of discipline preached by the State . . . which wants the old, routine-like, automatic blind

discipline. Passive discipline is the foundation of every despotism.
[Bakunin on Anarchism, pp. 414-5]

Therefore, anarchists see the need to make agreements, to stick by them and to show discipline but we argue that this must be to the agreements we helped to make and subject to our judgement. We reject “centralisation” as it confuses the necessity of agreement with hierarchical power, of solidarity and agreement from below with unity imposed from above as well as the need for discipline with following orders.

12. Why do the SWP make a polemical fetish of “unity” and “democracy” to the expense of common sense and freedom?

The SWP argue that “unity” is essential:

“Without unity around decisions there would be no democracy — minorities would simply ignore majority decisions.”

Anarchists are in favour of free agreement and so argue that minorities should, in general, go along with the majority decisions of the groups and federations they are members of. That is, after all, the point behind federalism — to co-ordinate activity. Minorities can, after all, leave an association. As Malatesta argued, “anarchists recognise that where life is lived in common it is often necessary for the minority to come to accept the opinion of the majority. When there is an obvious need or usefulness in doing something and, to do it requires the agreement of all, the few should feel the need adapt to the wishes of the many.” [The Anarchist Revolution, p. 100] The Spanish C.N.T. argued in its vision of Libertarian Communism that:

“Communes are to be autonomous and will be federated at regional and national levels for the purpose of achieving goals of a general nature. . . communes . . . will undertake to adhere to whatever general norms [that] may be majority vote after free debate. . . The inhabitants of a Commune are to debate their internal problems . . . among themselves. Whenever problems affecting an entire comarca [district] or province are involved, it must be the Federations [of communes] who deliberate and at every reunion or assembly these may hold all of the Communes are to be represented and their delegates will relay the viewpoints previously approved in their respective Communes . . . On matters of a regional nature, it will be up to the Regional Federation to put agreements into practice and these agreements will represent the sovereign will of all the region’s inhabitants. So the starting point is the individual, moving on through the Commune, to the Federation and right on up finally to the Confederation.” [quoted by Jose Pierats, The C.N.T. in the Spanish Revolution, pp. 68-9]

Therefore, as a general rule-of-thumb, anarchists have little problem with the minority accepting the decisions of the majority after a process of free debate

and discussion. As we argue in section A.2.11, such collective decision making is compatible with anarchist principles — indeed, is based on them. By governing ourselves directly, we exclude others governing us. However, we do not make a fetish of this, recognising that, in certain circumstances, the minority must and should ignore majority decisions. For example, if the majority of an organisation decide on a policy which the minority thinks is disastrous then why should they follow the majority? In 1914, the representatives of the German Social Democratic Party voted for war credits. The anti-war minority of that group went along with the majority in the name of “*democracy*,” “*unity*” and “*discipline*”. Would the SWP argue that they were right to do so? Similarly, if a majority of a community decided, say, that homosexuals were to be arrested, would the SWP argue that minorities must not ignore that decision? We hope not.

In general, anarchists would argue that a minority should ignore the majority when their decisions violate the fundamental ideas which the organisation or association are built on. In other words, if the majority violates the ideals of liberty, equality and solidarity then the minority can and should reject the decisions of the majority. So, a decision of the majority that violates the liberty of a non-oppressive minority — say, restricting their freedom of association — then minorities can and should ignore the decisions and practice civil disobedience to change that decision. Similarly, if a decision violates the solidarity and the feelings of equality which should inform decisions, then, again, the minority should reject the decision. We cannot accept majority decisions without question simply because the majority can be wrong. Unless the minority can judge the decisions of the majority and can reject them then they are slaves of the majority and the equality essential for a socialist society is eliminated in favour of mere obedience.

However, if the actions of the majority are simply considered to be disastrous but breaking the agreement would weaken the actions of the majority, then solidarity should be the overwhelming consideration. As Malatesta argued, “[t]here are matters over which it is worth accepting the will of the majority because the damage caused by a split would be greater than that caused by error; there are circumstances in which discipline becomes a duty because to fail in it would be to fail in the solidarity between the oppressed and would mean betrayal in face of the enemy . . . What is essential is that individuals should develop a sense of organisation and solidarity, and the conviction that fraternal co-operation is necessary to fight oppression and to achieve a society in which everyone will be able to enjoy his [or her] own life.” [Life and Ideas, pp. 132–3]

He stresses the point:

“But such an adaptation [of the minority to the decisions of the majority] on the one hand by one group must be reciprocal, voluntary and must stem from an awareness of need and of goodwill to prevent the running of social affairs from being paralysed by obstinacy. It cannot be imposed as a principle and statutory norm. . .

“So . . . anarchists deny the right of the majority to govern in human society in general . . . how is it possible . . . to declare that anarchists should submit to the decisions of the majority before they have even heard what those might be?” [The Anarchist Revolution, pp. 100–1]

Therefore, while accepting majority decision making as a key aspect of a revolutionary movement and a free society, anarchists do not make a fetish of it. We recognise that we must use our own judgement in evaluating each decision reached simply because the majority is not always right. We must balance the need for solidarity in the common struggle and needs of common life with critical analysis and judgement.

Needless to say, our arguments apply with even more force to the decisions of the **representatives** of the majority, who are in practice a very small minority. Leninists usually try and confuse these two distinct forms of decision making. When groups like the SWP discuss majority decision making they almost always mean the decisions of those elected by the majority — the central committee or the government — rather than the majority of the masses or an organisation.

So, in practice the SWP argue that the majority of an organisation cannot be consulted on every issue and so what they actually mean is that the decisions of the central committee (or government) should be followed at all times. In other words, the decisions of a minority (the leaders) should be obeyed by the majority. A minority owns and controls the “revolutionary” organisation and “democracy” is quickly turned into its opposite. Very “democratic.”

As we shall indicate in the next two sections, the SWP do not, in fact, actually follow their own arguments. They are quite happy for minorities to ignore majority decisions — as long as the minority in question is the leadership of their own parties. As we argue in section 14, such activities flow naturally from the vanguardist politics of Leninism and should not come as a surprise.

13. How does the Battle of Prague expose the SWP as hypocrites?

To evaluate the sincerity of the SWP’s proclaimed commitment to “*democracy*” and “*centralism*” we just have to look at the actions of their contingent at the demonstration against the WTO and IMF in Prague on September 26th, 2000.

Let us recall that on September 16th, the SWP had argued as follows:

“It is no good people coming together in a struggle, discussing what to do and then doing just what they feel like as if no discussion had taken place.”

They stressed that importance of “*centralisation*” which they defined as “*arriv[ing] at decisions which everyone acts on. Without unity around decisions there would be no democracy — minorities would simply ignore majority decisions.*”

In practice, the International Socialist (IS) section of the Prague demonstration (the SWP and its sister parties) totally ignored their own arguments. Instead of ending up in the Pink sector (for which they had put themselves down) they somehow ended up behind “*Ya Basta*” in the yellow sector. As they were at the front of the march this should have been impossible. It turns out they deliberately entered the wrong sector because they refused to accept the agreed plan to split the march in three.

The protests had been co-ordinated by INPEG. INPEG was established as a democratic implement of communication and co-ordination among individuals

and groups which want to protest against the annual summit of IMF in Prague on September 2000. It included a variety groups — for instance reformists (e.g. NESEHNUTI), anarchists (e.g. CSAF or Solidarity) and Leninists (i.e. Socialist Solidarity, sister organisation of the British SWP). The IS group had argued at INPEG committee meetings earlier in the year for a single march on the centre (which of course could not have shut the conference down). They failed to win this argument and so had betrayed the rest of the protesters on the day by simply marching directly onto the bridge themselves (in the yellow sector) instead of continuing into the Pink sector as they were supposed to.

Why did the SWP do what they did? Presumably they put themselves down for the Pink section because it was at the front of the march and so offered the best media coverage for their placards and banners. Similarly, they joined the Yellow Section because it was marching directly to the conference centre and not, like Pink, going round to the rear and so, again, offered the best media coverage. In other words, they “*did their own thing*”, ignored the agreements they made and weakened the protests simply to look the dominant group in the press. Ironically, the Czech media made sure that the Leninist parties got onto their front pages simply because many of them chose to march in Prague with red flags emblazoned with hammer and sickles. Flags associated with the Soviet occupation and the old regime are hardly “popular” and so useful to smear the protests.

The decision of the SWP to ignore the agreed plan was applauded by other Leninists. According to the post-Prague issue of the Communist Party of Great Britain’s paper **Weekly Worker**:

“Farcically, the organisers had decided to split the march into three, each with its own route and composition — blue (anarchist), pink (trade unions and left organisations) and yellow (NGOs and Jubilee 2000). Ostensibly, this started as a tactic designed to facilitate forming a human chain around the conference centre, although by the day of the action this aim had, apparently, been abandoned. Whether these truly stupid arrangements had been accepted beforehand by all on the INPEG (Initiative Against Economic Globalisation) remains hazy, given the paucity of information about the debates and differences on this self-appointed body.”

The splitting of the march into three, as a matter of fact, was a great success. It allowed the demonstrators to encircle the conference centre. The marches splitting off from the back working beautifully, catching the police and media by surprise who were clustered at the front of the march (indeed, the police later admitted that they had been caught off guard by the splitting of the march). From the splitting points to the centre the marches were unaccompanied by both police and media. A clear victory. Indeed, what would have been “*truly stupid*” was doing what the police had expected (and SWP wanted) — to have one big march.

How was the demonstration’s organised? According to eye-witness Katharine Viner (writing in **The Guardian** on Friday September 29, 2000):

“In the run-up to Tuesday’s demonstration I attended the convergence centre, where ‘spokes council’ meetings took place, and found

the sense of community and organisation there astonishing and moving. Every 'affinity group' — NGO or group of friends — sent a spokesperson to meetings to make decisions and work out strategy. It sounds impossible to contain, and it was laborious, but it worked and consensus was found. It felt like proper democracy in a way that the ballot box does not."

Julie Light, of **Corporate Watch**, indicates the same process at work in her account entitled **Spirits, Tensions Run High in Prague** (dated September 25, 2000):

"the activist coalition called the Initiative Against Economic Globalisation (INPEG) is training hundreds of people in civil disobedience at the Convergence Centre. The Centre, a converted warehouse space located under Prague's Libensky Bridge, serves as an information and strategy clearinghouse for the protesters. A 'spokes council' made up of representatives of dozens of groups makes decisions by consensus for this international ad-hoc coalition that has never worked together before. They have an elaborate system of hand signals to indicate their views as they discuss the details of the protests. Given the logistical obstacles, things seem to be running remarkably smoothly."

Obviously "proper democracy" and a council of group spokespeople discussing the protests were not good enough for the SWP and other Leninist groups. Nor, of course, making an agreement and sticking to it.

The **Weekly Worker** complements the SWP's decision:

"Come the march itself, the damage was partially repaired by the decision of a majority of the 'pink' contingent (with the SWP and its international sections to the fore) to simply veer off the agreed route. This pink section then partially merged with the yellow to advance on the conference."

We must point out that the International Socialist appear to have lied about the numbers they were bringing to Prague. The day before the demonstration they claimed they said they would contribute 2,500 to the Pink section — since then their own press has reported 1,000 in their delegation (**Socialist Worker** no. 1716 stated that the "day began when over 1,000 marched from the Florenc bus station . . . led by supporters of Socialist Worker and its sister papers elsewhere in Europe"). This would have left the Pink block seriously under strength even if they had not unilaterally left their block.

Their defection from the agreed plan had very serious repercussions on the day — one gate in the Pink sector was never covered. In the Blue sector, where the anarchists were concentrated, this meant that at the height of a battle with hundreds of riot police, a water cannon and two Armoured Personnel Carriers they were forced to send 300 people on a 2 km hike to attempt to close this gate. Shortly after they left a police charge broke the Blue Block lines leading to arrests and injuries.

Thus, by ignoring the plan and doing their own thing, they not only made a mockery of their own arguments and the decision making process of the demonstration, weakened the protest and placed others in danger.

And the net effect of their defection? As the **Weekly Worker** pathetically comments:

“Of course, it was blocked by ranks of riot police . . .”

As the bridge was a very narrow front this resulted in a huge amount of people stuck behind “*Ya Basta!*” with nothing to do except sit around. So the “International Socialists” and other Leninists who undertook the act of sabotage with them were stuck doing nothing behind “*Ya Basta*” at the bottom of the bridge (as would be expected — indeed, this exposes another failing of centralism, its inability to know local circumstances, adapt to them and plan taking them into account). The tiny number of anarchists who marched around to cover their gate on the other hand, took the police by surprise and broke through to the conference centre until driven back by hundreds of riot police. Worse, there were some problems in the “Yellow Block” as the Leninists were pushing from behind and it took some serious explaining to get them to understand that they should stop it because otherwise people in the front line could be crushed to death. Moreover, they demanded to be allowed up alongside “*Ya Basta*” at the front, next to the riot cops, but when “*Ya Basta*” did pull out and invited the SWP to take their place in the front they refused to do so.

Moreover, the actual result of the SWP’s disgraceful actions in Prague also indicates the weakness of centralism. Having centrally decided to have one big march (regardless of what the others thought or the majority wished or agreed to) the decision was made with clearly no idea of the local geography otherwise they would have known that the front at the bridge would have been small. The net result of the “efficient” centralisation of the SWP? A mass of protestors stuck doing nothing due to a lack of understanding of local geography and the plan to blockade the conference seriously weakened. A federal organisation, on the other hand, would have had information from the local activists who would have been organising the protests and made their plans accordingly.

Therefore, to summarise. Ten days after denouncing anarchism for refusing to accept majority decisions and for being against “centralisation” (i.e. making and keeping agreements), the SWP ignore majority decisions, break agreements and do their own thing. Not only that, they weaken the demonstration and place their fellow protestors in difficulties simply so they could do nothing someplace else as, unsurprisingly enough, their way was blocked by riot cops. An amazing example of “democratic centralism” in practice and sure to inspire us all to follow the path of Marxism-Leninism!

The hypocrisy of their actions and arguments are clear. The question now arises, what do anarchists think of their action. As we argued in the last section, while anarchists favour direct democracy (self-management) when making decisions we also accept that minorities can and should ignore a majority decision if that decision is considered to be truly disastrous. However, any such decision must be made based on evaluating the damage caused by so making it and whether it would be a violation of solidarity to do so. This is what the SWP clearly failed to do. Their decision not only made a mockery of their own argument, it failed to take into account **solidarity** with the rest of the demonstration.

From an anarchist perspective, therefore, the SWP’s decision and actions cannot be justified. They violated the basic principles of a revolutionary movement, the principles of liberty, equality and solidarity. They ignored the liberty

of others by violating their agreements with them, they violated their equality by acting as if the other groups ideas and decisions did not matter and they violated solidarity by ignoring the needs of the common struggle and so placing their fellow demonstrators in danger. While anarchists **do** respect the rights of minorities to act as they see fit, we also recognise the importance of solidarity with our fellow workers and protestors. The SWP by failing to consider the needs of the common struggle sabotaged the demonstration and should be condemned not only as hypocrites but also as elitists — the party is not subject to the same rules as other demonstrators, whose wishes are irrelevant when they conflict with the party. The implications for the SWP’s proclaimed support for democracy is clear.

So it appears that minorities **can** and **should** ignore agreements — as long as the minority in question are the leaders of the SWP and its sister parties. They have exposed themselves as being hypocrites. Like their heroes, Lenin and Trotsky, they will ignore democratic decisions when it suits them (see next section). This is sickening for numerous reasons — it placed the rest of the demonstrators in danger, it weakened the demonstration itself and it shows that the SWP say one thing and do the exact opposite. They, and the political tradition they are part of, clearly are not to be trusted. The bulk of the membership went along with this betrayal like sheep. Hardly a good example of revolutionary consciousness. In fact it shows that the “revolutionary” discipline of the SWP **is** like that of the cops or army) and that SWP’s centralised system **is** based on typically bourgeois notions. In other words, the organisational structure desired by the SWP does not encourage the autonomy, initiative or critical thinking of its members (as anarchists have long argued).

Prague shows that their arguments for “centralisation” as necessary for “democracy” are hypocrisy and amount to little more than a call for domination by the SWP’s leadership over the anti-capitalist movement — a call hidden behind the rhetoric of “democracy.” As can be seen, in practice the SWP happily ignores democracy when it suits them. The party always comes first, regardless of what the people it claims to represent actually want. In this they follow the actions of the Bolsheviks in power (see next section). Little wonder Marxism-Leninism is dying — the difference between what they claim and what they do is becoming increasingly well known.

14. Is the Leninist tradition actually as democratic as the SWP like to claim?

While the SWP attack anarchism for being undemocratic for being against “centralism” the truth is that the Leninist tradition is fundamentally undemocratic. Those, like the SWP, who are part of the Bolshevik tradition have no problem with minorities ignoring majority decisions — as long as the minority in question is the leadership of the vanguard party. We discussed the example of the “*battle of Prague*” in the last section, now we turn to Bolshevism in power during the Russian Revolution.

For example, the Bolsheviks usually overthrew the results of provincial soviet elections that went against them [Samuel Farber, **Before Stalinism**, pp 22–24]. It was in the spring of 1918 that the Bolsheviks showed how little they really

supported the soviets. As discontent grew soviet after soviet fell to Menshevik-SR blocs. To stay in power they had to destroy the soviets and they did. Opposition victories were followed by disbanding of the soviets and often martial law. [Vladimir Brovkin, “*The Menshevik’s Political Comeback: The elections to the provincial soviets in spring 1918*”, **Russian Review** no. 42 (1983), pp. 1–50]

In addition, the Bolsheviks abolished by decree soldiers’ councils and the election of officers in the Red Army in favour of officers appointed from above (see section 11 of the appendix “*Marxism and Spanish Anarchism*” for details). They replaced self-managed factory committees with appointed, autocratic managers (see M. Brinton’s **The Bolsheviks and Workers Control** or section 17 of the appendix “*Marxism and Spanish Anarchism*” for details). All this before the start of the Russian Civil War. Similarly, Lenin and Trotsky happily replaced the democratically elected leaders of trade unions with their followers when it suited them.

As Trotsky argued in 1921, you cannot place “*the workers’ right to elect representatives above the party. As if the Party were not entitled to assert its dictatorship even if that dictatorship clashed with the passing moods of the workers’ democracy!*” He continued by stating the “*Party is obliged to maintain its dictatorship . . . regardless of temporary vacillations even in the working class . . . The dictatorship does not base itself at every moment on the formal principle of a workers’ democracy.*” [quoted by M. Brinton, **The Bolsheviks and Workers’ Control**, p. 78]

Of course, such a position follows naturally from Lenin’s theory from **What is to be Done?** that “*the working class, exclusively by their own effort, is able to develop only trade union consciousness . . . The theory of socialism [i.e. Marxism], however, grew out of the philosophic, historical and economic theories that were elaborated by the educated representatives of the propertied classes, the intellectuals . . . the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas among the revolutionary socialist intelligentsia.*” This meant that “*Social Democratic [i.e. socialist] consciousness . . . could only be brought to them from without.*” [**Essential Lenin**, pp. 74–5]

For Leninists, if the workers’ act in ways opposed to by the party, then the party has the right to ignore, even repress, the workers — they simply do not (indeed, cannot) understand what is required of them. They cannot reach “*socialist consciousness*” by their own efforts — indeed, their opinions can be dismissed as “*there can be no talk of an independent ideology being developed by the masses of the workers in the process of their movement **the only choice is: either bourgeois or socialist ideology . . . to belittle socialist ideology in any way, to deviate from it in the slightest degree means strengthening bourgeois ideology . . . the spontaneous development of the labour movement leads to it becoming subordinated to bourgeois ideology.***” [**Op. Cit.**, p. 82] Given that the socialist ideology cannot be communicated without the vanguard party, this means that the **party** can ignore the wishes of the masses simply because such wishes **must be** influenced by “bourgeois” ideology. Thus Leninism contains within itself the justification for eliminating democracy within the revolution. From Lenin’s arguments to Bolshevik actions during the revolution and Trotsky’s assertions in 1921 is only a matter of time — and **power**.

In other words, the SWP’s “*Battle of Ideas*” becomes, once the vanguard is

in power, just a battle:

“Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves.” [Lenin, **Collected Works**, vol. 24, p. 170]

Significantly, of the 17 000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40 913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants or workers. [George Leggett, **The Cheka: Lenin’s Political Police**, p. 178] Needless to say, Lenin failed to mention this aspect of his system in **The State and Revolution**, as do the SWP in their article.

It is hard to combine these facts and the SWP’s comments with the claim that the “workers’ state” is an instrument of class rule — after all, Lenin is acknowledging that coercion will be exercised against members of the working class as well. The question of course arises — who decides what a “*wavering*” or “*unstable*” element is? Given their comments on the role of the party and the need for the party to assume power, it will mean in practice whoever rejects the government’s decisions (for example, strikers, local soviets which reject central decrees and instructions, workers who vote for anarchists or parties other than the Bolshevik party in elections to soviets, unions and so on, socialists and anarchists, etc.). Given a hierarchical system, Lenin’s comment is simply a justification for state repression of its enemies (including elements within, or even the whole of, the working class).

It could be argued, however, that workers could use the soviets to recall the government. However, this fails for two reasons.

Firstly, the Leninist state will be highly centralised, with power flowing from the top-down. This means that in order to revoke the government, all the soviets in all parts of the country must, at the same time, recall their delegates and organise a national congress of soviets (which, we note, is not in permanent session). The local soviets are bound to carry out the commands of the central government (to quote the Soviet constitution of 1918 — they are to “*carry out all orders of the respective higher organs of the soviet power*”). Any independence on their part would be considered “*wavering*” or an expression of “*unstable*” natures and so subject to “*revolutionary coercion*”. In a highly centralised system, the means of accountability is reduced to the usual bourgeois level — vote in the general election every few years (which, in any case, can be annulled by the government if it dislikes the “*passing moods*” expressed by them). As can be seen above, the Bolsheviks did disband soviets when they considered the wrong (i.e. “*wavering*” or “*unstable*”) elements had been elected to them and so a highly centralised state system cannot be responsive to real control from below.

Secondly, “*revolutionary coercion*” against “*wavering*” elements does not happen in isolation. It will encourage critical workers to keep quiet in case they, too, are deemed “*unstable*” and become subject to “*revolutionary*” coercion. As a government policy it can have no other effect than deterring democracy.

Thus Leninist politics provides the rationale for eliminating even the limited role of soviets for electing the government they hold in that ideology. The Leninist conception of workers' councils is purely instrumental. In 1907, Lenin argued that:

“the Party . . . has never renounced its intention of utilising certain non-party organisations, such as the Soviets of Workers’ Deputies . . . to extend Social-Democratic influence among the working class and to strengthen the Social-Democratic labour movement . . . the incipient revival creates the opportunity to organise or utilise non-party working-class institutions, such as Soviets . . . for the purpose of developing the Social-Democratic movement; at the same time the Social-Democratic Party organisations must bear in mind if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actually become superfluous.” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, pp. 209–10]

As can be seen from the experiences of Russia under Lenin, this perspective did not fundamentally change — given a conflict between the councils and the party, the party always came first and soviets simply superfluous.

15. Why is the SWP’s support for centralisation anti-socialist?

The SWP continue:

“Centralism is needed above all because the capitalist state is centralised. The police, media moguls, employers, the state bureaucracy and governments act in a concerted way to protect the system.”

Very true. However, the SWP fail to analyse *why* the state is centralised. Simply put, the state is centralised to **facilitate minority rule** by excluding the mass of people from taking part in the decision making processes within society. This is to be expected as social structures do not evolve by chance — rather they develop to meet specific needs and requirements. The specific need of the ruling class is to rule and that means marginalising the bulk of the population. Its requirement is for minority power and this is transformed into the structure of the state and capitalist company. The SWP assume that centralisation is simply a tool without content. Rather, it is a tool that has been fashioned to do a specific job, namely to exclude the bulk of the population from the decision making process. It is designed that way and can have no other result. For that reason anarchists reject centralisation. As the justly famous Sonvillier Circular argued: *“How could one expect an egalitarian society to emerge out of an authoritarian organisation? It is impossible.”* [quoted by Brian Morris, **Bakunin: The Philosophy of Freedom**, p. 61]

Thus Rudolf Rocker:

“For the state centralisation is the appropriate form of organisation, since it aims at the greatest possible uniformity in social life

for the maintenance of political and social equilibrium. But for a movement whose very existence depends on prompt action at any favourable moment and on the independent thought and action of its supporters, centralism could but be a curse by weakening its power of decision and systematically repressing all immediate action. If, for example, as was the case in Germany, every local strike had first to be approved by the Central, which was often hundreds of miles away and was not usually in a position to pass a correct judgement on the local conditions, one cannot wonder that the inertia of the apparatus of organisation renders a quick attack quite impossible, and there thus arises a state of affairs where the energetic and intellectually alert groups no longer serve as patterns for the less active, but are condemned by these to inactivity, inevitably bringing the whole movement to stagnation. Organisation is, after all, only a means to an end. When it becomes an end in itself, it kills the spirit and the vital initiative of its members and sets up that domination by mediocrity which is the characteristic of all bureaucracies.” [Anarcho-Syndicalism, p. 54]

Just as the capitalist state cannot be utilised by the working class for its own ends, capitalist/statist organisational principles such as appointment, autocratic management, centralisation and delegation of power and so on cannot be utilised for social liberation. They are not designed to be used for that purpose (and, indeed, they were developed in the first place to stop it and enforce minority rule!).

The implication of the SWP’s argument is that centralisation is required for co-ordinated activity. Anarchists disagree. Yes, there is a need for co-ordination and joint activity, but that must be created from below, in new ways that reflect the goals we are aiming for. During the Spanish Revolution anarchists organised militias to fight the fascists. One was led by anarchist militant Durruti. His military adviser, Pérez Farras, a professional soldier, was concerned about the application of libertarian principles to military organisation. Durruti replied:

“I have already said and I repeat; during all my life, I have acted as an anarchist. The fact of having been given political responsibility for a human collective cannot change my convictions. It is under these conditions that I agreed to play the role given to me by the Central Committee of the Militias.

“I thought — and what has happened confirms my belief — that a workingmen’s militia cannot be led according to the same rules as an army. I think that discipline, co-ordination and the fulfilment of a plan are indispensable. But this idea can no longer be understood in the terms of the world we have just destroyed. We have new ideas. We think that solidarity among men must awaken personal responsibility, which knows how to accept discipline as an autonomous act.

“Necessity imposes a war on us, a struggle that differs from many of those that we have carried on before. But the goal of our struggle is always the triumph of the revolution. This means not only victory over the enemy, but also a radical change in man. For this change to occur, man must learn to live in freedom and develop in himself his

potentialities as a responsible individual. The worker in the factory, using his tools and directing production, is bringing about a change in himself. The fighter, like the worker, uses his gun as a tool and his acts must lead to the same goals as those of the worker.

“In the struggle he cannot act like a soldier under orders but like a man who is conscious of what he is doing. I know it is not easy to get such a result, but what one cannot get by reason, one can never get through force. If our revolutionary army must be maintained through fear, we will have changed nothing but the colour of fear. It is only by freeing itself from fear that a free society can be built.” [quoted by Abel Paz, **Durruti: The People Armed**, p. 224]

Durruti’s words effectively refute the SWP’s flawed argument. We need to organise, co-ordinate, co-operate our activities but we cannot do so in bourgeois ways. We need to discover new ways, based on libertarian ideas and not capitalist ones like centralisation.

Indeed, this conflict between the Leninist support for traditional forms of organisational structure and the new forms produced by workers in struggle came into conflict during the Russian Revolution. One such area of conflict was the factory committee movement and its attempts at workers’ self-management of production. As historian A.S. Smith summarises:

“Implicit in the movement for workers’ control was a belief that capitalist methods cannot be used for socialist ends. In their battle to democratise the factory, in their emphasis on the importance of collective initiatives by the direct producers in transforming the work situation, the factory committees had become aware — in a partial and groping way, to be sure — that factories are not merely sites of production, but also of reproduction — the reproduction of a certain structure of social relations based on the division between those who give orders and those who take them, between those who direct and those who execute . . . inscribed within their practice was a distinctive vision of socialism, central to which was workplace democracy.

“Lenin believed that socialism could be built only on the basis of large-scale industry as developed by capitalism, with its specific types of productivity and social organisation of labour. Thus for him, capitalist methods of labour-discipline or one-man management were not necessarily incompatible with socialism. Indeed, he went so far as to consider them to be inherently progressive, failing to recognise that such methods undermined workers’ initiative at the point of production. This was because Lenin believed that the transition to socialism was guaranteed, ultimately, not by the self-activity of workers, but by the ‘proletarian’ character of state power. . . There is no doubt that Lenin did conceive proletarian power in terms of the central state and lacked a conception of localising such power at the point of production.” [**Red Petrograd**, pp. 261–2]

The outcome of this struggle was the victory of the Bolshevik vision (as it had state power to enforce it) and the imposition of apparently “efficient” capitalist methods of organisation. However, the net effect of using (or, more correctly,

imposing) capitalist organisations was, unsurprisingly, the re-introduction of capitalist social relations. Little wonder the Russian Revolution quickly became just another form of capitalism — *state* capitalism where the state appointed manager replaced the boss and the workers' position remained identical. Lenin's attempts to centralise production simply replaced workers' power at the point of production with that of state bureaucrats.

We must point out the central fallacy of the SWP's argument. Essentially they are arguing you need to fight fire with fire. They argue that the capitalist class is centralised and so, in order to defeat them, so must we. Unfortunately for the SWP, you do not put a fire out with fire, you put fire out with water. Therefore, to defeat centralised system you need decentralised social organisation. Such decentralisation is required to include the bulk of the population in the revolutionary struggle and does not imply isolation. A decentralised movement does not preclude co-ordination or co-operation but that co-ordination must come from below, based on federal structures, and not imposed from above.

So a key difference between anarchism and Marxism on how the movement against capitalism should organise in the here and now. Anarchists argue that it should prefigure the society we desire — namely it should be self-managed, decentralised, built and organised from the bottom-up in a federal structure. This perspective can be seen from the justly famous Sonvillier Circular:

“The future society should be nothing but a universalisation of the organisation which the International will establish for itself. We must therefore take care to bring this organisation as near as possible to our ideal . . . How could one expect an egalitarian and free society to grow out of an authoritarian organisation? That is impossible. The International, embryo of the future human society, must be, from now on, the faithful image of our principles of liberty and federation.” [quoted by Marx, **Fictitious Splits in the International**]

Of course, Marx replied to this argument and, in so doing, misrepresented the anarchist position. He argued that the Paris Communards “*would not have failed if they had understood that the Commune was ‘the embryo of the future human society’ and had cast away all discipline and all arms — that is, the things which must disappear when there are no more wars!*” [Ibid.] Needless to say this is simply a slander on the anarchist position. Anarchists, as the Circular makes clear, recognise that we cannot totally reflect the future and so the current movement can only be “*as near as possible to our ideal.*” Thus we have to do things, such as fighting the bosses, rising in insurrection, smashing the state or defending a revolution, which we would not have to do in a socialist society but that does not imply we should not try and organise in a socialist way in the here and now. Such common sense, unfortunately, is lacking in Marx who instead decided to utter nonsense for a cheap polemical point.

Therefore, if we want a revolution which is more than just a change in who the boss is, we must create new forms of organisation and struggle which do not reproduce the traits of the world we are fighting. To put out the fire of class society, we need the water of a classless society and so we should organise in a libertarian way, building the new world in the shell of the old.

16. Why is the SWP wrong about the A16 Washington D.C. demo?

As an example of why Marxism is better than anarchism they give an example:

“Protesters put up several roadblocks during the major anti-capitalist demonstration in Washington in April of this year. The police tried to clear them. The question arose of what the protesters should do.

“Some wanted to try to maintain the roadblocks. Others thought the best tactic was to reorganise the protests into one demonstration. Instead of coming to a clear decision and acting on it, the key organiser of the whole event told people at each roadblock to do what they thought was right.

“The resulting confusion weakened all the protests.”

Firstly, we must point out that this argument is somewhat ironic coming from a party that ignored the agreed plan during the Prague anti-WTO demonstration and did *“what they thought was right”* (see section 13). Indeed, the various anti-capitalist demonstrations have been extremely effective and have been organised in an **anarchist** manner thus refuting the SWP.

Secondly, unfortunately for the SWP, they have the facts all wrong. The World Bank/IMF complex in Washington DC was extremely difficult to blockade. The police blocked over 50 blocks on the day of the demonstration to travel. DC has very wide streets. Many World Bank and IMF Delegates spent the night in those buildings, or came in early in the morning long before sunrise. This calls into question whether a blockade was the best strategy considering the logistic details involved (the Blockade strategy was abandoned for the Republican and Democratic Party Conference demonstrations). In addition to the blockades, there was an officially permitted rally blocks away from the action.

The tactical process worked in practice like this. While there was an original plan agreed to by consensus at the beginning of the blockades by all affinity groups, with groups picking which intersection to occupy and which tactics to use, there was a great deal of flexibility as well. There were several flying columns that moved from intersection to intersection reinforcing barricades and increasing numbers where it looked like police might charge. The largest of these was the Revolutionary Anti-Capitalist Bloc (*“the Black Bloc”*) made up mostly of class-struggle anarchists but included a number of other left libertarians (such as council communists and autonomists). The RACB officially maintained its autonomy within the demonstration and worked with others when and where it could. The affinity groups of the RACB would come to quick decisions on what to do. Often, they would quickly respond to the situation; usually their appearance was enough for the cops to fall back after a few tense moments.

By early afternoon, the various affinity groups manning the blockades were informed that the blockades had failed, and enough delegates had made it inside that the meeting was continuing inside with only a short delay. So the question came of what to do next? There were varying opinions. Some affinity groups favoured maintaining their blockades symbolically as an act of defiance and hoping to slow the dispersion of World Bank/IMF representatives as they left the meeting. Others wished to have a victory march around the area. Others

wanted to join the rally. Some wanted to march on the World Bank and try for an occupation. There was no consensus. After much discussion between the affinity groups, a decision was reached.

The RACB was divided between two choices — either join with the rally or march on the Bank. There was a lot of negotiation back and forth between affinity groups. A compromise was reached. The RACB would move to each blockade in order and provide cover for those locked down to unlock and safely merge with the growing march so that attempts could be made the next day do blockade. The march continued to swell as it made its way along the route, eventually merging with the crowd at the permitted demonstration.

A decision was made. Perhaps it wasn't the most militant. Perhaps it did not foresee that the next day would lack the numbers to even attempt a successful blockade. But arrests on the demonstration were kept to a minimum, a large show of strength was put on and strong feelings of solidarity and camaraderie grew. The cops could only control a few square blocks, the rest of the city was ours. And it was a decision that everyone had a part in making, and one that everyone could live with. It's called self-management, perhaps it isn't always the fastest method of making decisions, but it is the best one if you desire freedom.

Of course, the last thing the SWP would want to admit is that anarchists led the victory march around Washington D.C. without a permit, without marshals, without many arrests and a minimal amount of violence! Of all the recent demonstrations in the U.S. the black bloc was the largest and most well received at Washington. Moreover, that demonstration showed that decentralised, federal organisation worked in practice. Each affinity group participated in the decision making process and an agreement reached between all involved. Centralisation was not required, no centre imposed the decision. Rather than weaken the protests, decentralisation strengthened it by involving all in the decision making process. Little wonder the SWP re-wrote history.

17. Why does the SWP's Washington example refute the SWP's own argument and not anarchism?

However, let us assume that the SWP's fictional account of the A16 demonstration (see last section) was, in fact, true. What does it actually mean? We must point out its interesting logic. They argue that the protests had a "*key organiser*" which means they were centralised. They argue that the protestors looked to that person for direction. Unfortunately that person could not come to a "*clear decision*" and instead handed back decision making to each roadblock. In other words, centralisation failed, not federalism. Moreover, the state would have had a simple means to destroy the demonstration — arrest the "*key organiser*." In a centralised system, without a centre, the whole structure collapses — without someone giving orders, nothing is done.

In a federal structure each roadblock would have sent a delegate to a council to co-ordinate struggle (which, we stress, was what actually did happen). To quote Bakunin, "*there will be a federation of the standing barricades and a Revolutionary Communal Council will operate on the basis of one or two delegates from each barricade . . . these deputies being invested with binding mandates and*

accountable and revocable at all times.” [No Gods, No Masters, vol. 1, p. 155] In the SWP’s version of history, the blockades did not do this and so, unsurprisingly, without organisation, there was confusion. As an argument against anarchism it is useless. So the SWP’s fictional example is an argument against centralisation — of placing decision-making power at the centre. In their story, faced with the task of co-ordinating actions which they had no knowledge of, the “*key organiser*” could not act and by not having a federal structure, the roadblocks were weakened due to lack of co-ordination. In reality, a federal structure existed within the demonstration, each roadblock and affinity group could take effective action instantly to counter the police, without waiting for instructions from the centre, as well as communicate what has happening to other roadblocks and come to common agreements on what action to take. The Washington demonstration — like the other anti-capitalist demonstrations — showed the effectiveness of anarchist principles, of decentralisation and federalism from the bottom up.

So the SWP’s analysis of the Washington demonstration is faulty on two levels. Firstly, their account is not accurate. The demonstration was organised in a decentralised manner and worked extremely well. Secondly, even if their account was not fiction, it proves the failure of centralisation, not federalism.

They draw a lesson from their fictional account:

“The police, needless to say, did not ‘decentralise’ their decision making. They co-ordinated across the city to break the protests.”

Such an analogy indicates the bourgeois and authoritarian nature of the SWP’s politics. They do not understand that the capitalist state and workplace is centralised for a reason. It is to concentrate power into the hands of a few, with the many reduced to mere order takers. It is the means by which bourgeois rule is enforced

Moreover, they seem to be arguing that if we followed the example of the bourgeois state, of the organisational structure of the police or the army, then we would be as “effective” as they are. They are, in effect, arguing that the anti-capitalist movement should reproduce the regulated docility of the police force into its ranks, reproduce the domination of a few bosses at the top over a mass of unquestioning automations at the bottom. As Murray Bookchin argued, the Leninist “*has always had a grudging admiration and respect for that most inhuman of all hierarchical institutions, the military.*” [Toward an Ecological Society, p. 254f] The SWP prove him right.

18. Why is a “revolutionary party” a contradiction in terms?

They continue by arguing that “*Anarchists say a revolutionary party is at best unnecessary and at worst another form of authoritarianism. But they cannot avoid the problems that a revolutionary party addresses.*” In reality, while anarchists reject the “revolutionary” party, they do not reject the need for an anarchist federation to spread anarchist ideas, convince others of our ideas and to give a lead during struggles. We reject the Bolshevik style “revolutionary party” simply because it is organised in a centralised, bourgeois, fashion and

so produces all the problems of capitalist society within so-called revolutionary organisations. As the anarchists of Trotwatch explain, such a party leaves much to be desired:

“In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly ‘revolutionary’ organisation: between leaders and led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class.” [Carry on Recruiting!, p. 41]

Such an organisation can never create a socialist society. In contrast, anarchists argue that socialist organisations should reflect as much as possible the future society we are aiming to create. To build organisations which are statist/capitalistic in structure cannot do other than reproduce the very problems of capitalism/statism into them and so undermine their liberatory potential. As Murray Bookchin puts it:

*“The ‘glorious party,’ when there is one, almost invariably lags behind the events . . . In the beginning . . . it tends to have an inhibitory function, not a ‘vanguard’ role. Where it exercises influence, it tends to slow down the flow of events, not ‘co-ordinate’ the revolutionary forced. This is not accidental. The party is structured along hierarchical lines **that reflect the very society it professes to oppose** . . . Its membership is schooled in obedience . . . The party’s leadership, in turn, is schooled in habits born of command, authority, manipulation . . . Its leaders . . . lose contact with the living situation below. The local groups, which know their own immediate situation better than any remote leaders, are obliged to subordinate their insights to directives from above. The leadership, lacking any direct knowledge of local problems, responds sluggishly and prudently. . .*

“The party becomes less efficient from a revolutionary point of view the more it seeks efficiency by means of hierarchy, cadres and centralisation. Although everyone marches in step, the orders are usually wrong, especially when events begin to move rapidly and take unexpected turns—as they do in all revolutions. The party is efficient in only one respect—in moulding society in its own hierarchical image if the revolution is successful. It recreates bureaucracy, centralisation and the state. It fosters the bureaucracy, centralisation and the state. It fosters the very social conditions which justify this kind of society. Hence, instead of ‘withering away,’ the state controlled by the ‘glorious party’ preserves the very conditions which ‘necessitate’ the existence of a state — and a party to ‘guard’ it.

“On the other hand, this kind of party is extremely vulnerable in periods of repression. The bourgeoisie has only to grab its leadership to destroy virtually the entire movement. With its leaders in prison or in hiding, the party becomes paralysed; the obedient membership had no one to obey and tends to flounder . . .

“[T]he Bolshevik leadership was ordinarily extremely conservative, a trait that Lenin had to fight throughout 1917 — first in his efforts to reorient the Central Committee against the provisional government (the famous conflict over the ‘April Theses’), later in driving the Central Committee toward insurrection in October. In both cases he threatened to resign from the Central Committee and bring his views to ‘the lower ranks of the party.’” [Post-Scarcity Anarchism, pp. 194–9]

Thus the example of the “successful” Russian Revolution indicates the weakness of Leninism — Lenin had to fight the party machine he helped create in order to get it do anything revolutionary. Hardly a good example of a “revolutionary” party.

But, then again, the SWP know that anarchists do not reject the need for anarchists to organise as anarchists to influence the class struggle. As they argue, *“Anarchism’s attempts to deal with them have been far less effective and less democratic.”* The question is not of one of **whether** revolutionaries should organise together but **how** they do this. And as we shall see in the next four sections, the SWP’s examples of revolutionary anarchist organisations are either unique and so cannot be generalised from (Bakunin’s ideas on revolutionary organisation), or false (the F.A.I. was **not** organised in the way the SWP claim). Indeed, the simple fact is that the SWP **ignore** the usual ways anarchists organise as anarchists and yet try and draw conclusions about anarchism from their faulty examples.

19. Do anarchists operate “*in secret*”?

They continue:

“All the major anarchist organisations in history have been centralised but have operated in secret.”

It is just as well they say *“all the major anarchist organisations,”* it allows them to ignore counter-examples. We can point to hundreds of anarchist organisations that are/were not secret. For example, the Italian Anarchist Union (IAU) was a non-secret organisation. Given that the IAU had around 20 000 members in 1920, we wonder by what criteria the SWP excludes it from being a *“major anarchist organisation”*? After all, estimates of the membership of the F.A.I. (one of the SWP’s two *“major”* anarchist organisations) vary from around 6 000 to around 30 000. Bakunin’s “Alliance” (the other SWP example) amounted to, at most, under 100. In terms of size, the IAU was equal to the F.A.I. and outnumbered the “Alliance” considerably. Why was the UAI not a *“major anarchist organisation”*?

Another, more up to date, example is the French Anarchist Federation which organises today. It as a weekly paper and groups all across France as well as in Belgium. That is not secret and is one of the largest anarchist organisations existing today (and so, by anyone’s standards *“a major anarchist organisation”*). We wonder why the SWP excludes it? Simply because they know their generalisation is false?

Therefore, as can be seen, the SWP's claim is simply a lie. Few anarchist organisations have been secret. Those that have been secret have done so when conditions demanded it (for example, during periods of repression and when operating in countries with authoritarian governments). Just as Marxist organisations have done. For example, the Bolsheviks were secret for great periods of time under Tsarism and, ironically enough, the Trotskyist-Zinovievist **United Opposition** had to resort to secret and conspiratorial organisation to reach the Russian Communist Party rank and file in the 1920s. Therefore, to claim that anarchists have some sort of monopoly of secret organising is simply a lie — Marxists, like anarchists, have sometimes organised in secret when they have been forced to by state repression or likelihood of state repression. It is not a principle but, rather, sometimes a necessity. As anyone with even a basic grasp of anarchist history would know.

Similarly for the SWP's claims that "*all the major anarchist organisations in history have been centralised.*" Such a claim is also a lie, as we shall prove in the sections 20 and 22.

20. Why is the SWP wrong about Bakunin's organisation?

As an example of a "*major anarchist organisation*" the SWP point to Bakunin and the organisations he created:

"The 19th century theorist of anarchism Mikhail Bakunin's organisation had a hierarchy of committees, with half a dozen people at the top, which were not under the democratic control of its members."

Firstly, we have to wonder why anyone would have wanted to join Bakunin's group if they had no say in the organisation. Also, given that communication in the 19th century was extremely slow, such an organisation would have spent most of its time waiting for instructions from above. Why would anyone want to join such a group? Simple logic undermines the SWP's argument.

Secondly, we should also point out that the Bolshevik party itself was a secret organisation for most of its life in Tsarist Russia. Bakunin, an exile from that society, would have been aware, like the Bolsheviks, of the necessity of secret organising. Moreover, having spent a number of years imprisoned by the Tsar, Bakunin would not have desired to end up **back** in prison after escaping from Siberia to the West. In addition, given that the countries in which anarchists were operating at the time were not democracies, in the main, a secret organisation would have been considered essential. As Murray Bookchin argues, "*Bakunin's emphasis on conspiracy and secrecy can be understood only against the social background of Italy, Spain, and Russia the three countries in Europe where conspiracy and secrecy were matters of sheer survival.*" [**The Spanish Anarchists**, p. 24] The SWP ignore the historical context.

Thirdly, the reality of Bakunin's organisation is slightly different from the SWP's claims. We have discussed this issue in great detail in section J.3.7 of the FAQ. However, it is useful to indicate the type of organisation Bakunin thought was necessary to aid the revolution. If we do, it soon becomes clear that the SWP's claim that it was "*not under the democratic control of its members*" is

not true. To do so we shall quote from his letter to the Russian Nihilist Sergey Nechayev in which he explains the differences in their ideas. He discusses the “*principles and mutual conditions*” for a “*new society*” of revolutionaries in Russia (noting that this was an “*outline of a plan*” which “*must be developed, supplemented, and sometimes altered according to circumstances*”):

“Equality among all members and the unconditional and absolute solidarity — one for all and all for one — with the obligation for each and everyone to help each other, support and save each other. . .

*“Complete frankness among members and proscription of any Jesuitical methods in their relationships . . . When a member has to say anything against another member, this must be done at a general meeting and in his presence. **General fraternal control** of each other . . .*

“Everyone’s personal intelligence vanished like a river in the sea in the collective intelligence and all members obey unconditionally the decisions of the latter.

“All members are equal; they know all their comrades and discuss and decide with them all the most important and essential questions bearing on the programme of the society and the progress of the cause. The decision of the general meeting is absolute law. . .

“The society chooses an Executive Committee from among their number consisting of three or five members who should organise the branches of the society and manage its activities in all the regions of the [Russian] Empire on the basis of the programme and general plan of action adopted by the decision of the society as a whole. . .

“This Committee is elected for an indefinite term. If the society . . . the People’s Fraternity is satisfied with the actions of the Committee, it will be left as such; and while it remains a Committee each member . . . and each regional group have to obey it unconditionally, except in such cases where the orders of the Committee contradict either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all . . . have participated equally in the discussion of them. . .

“In such a case members of the group must halt the execution of the Committee’s orders and call the Committee to judgement before the general meeting . . . If the general meeting is discontented with the Committee, it can always substitute another one for it. . .

“Any member or any group is subject to judgement by the general meeting . . .

“No new Brother can be accepted without the consent of all or at the very least three-quarters of all the members. . .

*“The Committee divides the members . . . among the Regions and constitutes Regional groups of leaderships from them . . . Regional leadership is charged with organising the second tier of the society — the **Regional Fraternity**, on the basis of the same programme, the same rules, and the same revolutionary plan. . .*

*“All members of the **Regional Fraternity** know each other, but do not know of the existence of the **People’s Fraternity**. They only know that there exists a **Central Committee** which hands down to them their orders for execution through **Regional Committee** which has been set up by it, i.e. by the **Central Committee** . . .*

*“Each Regional Committee will set up **District Committees** from members of the **Regional Fraternity** and will appoint and replace them. . .*

*“District Committees can, if necessary and only with the consent of the Regional Committee, set up a third tier of the organisation — **District Fraternity** with a programme and regulations as near as possible to the general programme and regulations of the People’s Fraternity. The programme and regulations of the District Fraternity will not come into force until they are discussed and passed by the general meeting of the Regional Fraternity and have been confirmed by the Regional Committee. . .*

*“Jesuitical control . . . are totally excluded from all three tiers of the secret organisation . . . The strength of the whole society, as well as the morality, loyalty, energy and dedication of each member, is based exclusively and totally on the shared truth, sincerity and trust, and on the open fraternal control of all over each one.” [cited by Michael Confino, **Daughter of a Revolutionary**, pp. 264–6]*

As can be seen, while there is much in Bakunin’s ideas that few anarchists would agree to, it cannot be said that it was **not** under the “*democratic control of its members.*” The system of committees is hardly libertarian but neither is it the top-down dictatorship the SWP argue it was. For example, the central committee was chosen by the “*general meeting*” of the members, which also decided upon the “*programme of the society and the progress of the cause.*” Its “*decision*” was “*absolute law*” and the central committee could be replaced by it. Moreover, the membership could ignore the decisions of the central committee if it “*contradict[ed] either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all . . . have participated equally in the discussion of them.*” Each tier of the organisation had the same “*programme and regulations.*” Anarchists today would agree that Bakunin’s plan was extremely flawed. The appointment of committees from above is hardly libertarian, even given that each tier had the same “*regulations*” and so general meetings of each Fraternity, for example. However, the SWP’s summary of Bakunin’s ideas, as can be seen, is flawed.

Given that no other anarchist group or federation operated in this way, it is hard to generalise from Bakunin’s flawed ideas on organisation to a conclusion about anarchism. But, of course, this is what the SWP do — and such a generalisation is simply a lie. The example of the F.A.I., the SWP’s other example, indicates how most anarchist organisations work in practice — namely, a decentralised federation of autonomous groups (see section 22).

Moreover, as we will indicate in the next section, the SWP have little reason to attack Bakunin’s ideas. This is because Lenin had similar (although not identical) ones on the question of organising revolutionaries in Tsarist Russia and because the SWP are renown for their leadership being secretive, centralised,

bureaucratic and top-down.

In summary, anarchists agree with the SWP that Bakunin's ideas are not to be recommended while pointing out that the likes of the SWP fail to provide an accurate account of their internal workings (i.e. they were more democratic than the SWP suggest), the role Bakunin saw for them in the labour movement and revolution or the historical context in which they were shaped. Moreover, we also argue that their comments against Bakunin, ironically, apply with equal force to their own party which is renown, like all Bolshevik-style parties, as being undemocratic, top-down and authoritarian. We turn to this issue in the next section.

21. Why is the SWP's attack on Bakunin's organisation ironic?

That the SWP attack Bakunin's organisational schema (see last section) is somewhat ironic. After all, the Bolshevik party system had many of the features of Bakunin's organisational plan. If Bakunin, quite rightly, should be attacked for certain aspects of these ideas, then so must Bolshevik parties like the SWP.

For example, Lenin argued in favour of centralisation and secrecy in his work **What is to be Done?**. In this work he argued as follows:

*“The active and widespread participation of the masses will not suffer; on the contrary, it will benefit by the fact that a ‘dozen’ experienced revolutionaries, no less professionally trained than the police, will centralise all the secret side of the work — prepare leaflets, work out approximate plans and **appoint bodies of leaders** for each urban district, for each factory district and for each educational institution, etc. [our emphasis] (I know that exception will be taken to my ‘undemocratic’ views, but I shall reply to this altogether unintelligent objection later on.) The centralisation of the most secret functions in an organisation of revolutionaries will not diminish, but rather increase the extent and the quality of the activity of a large number of other organisations that are intended for wide membership and which, therefore, can be as loose and as public as possible, such as trade unions; workers’ circles for self-education and the reading illegal literature, and socialist and also democratic, circles for **all other sections of the population**, etc., etc. We must have **as large a number as possible** of such organisations having the widest possible variety of functions, but it would be absurd and dangerous **to confuse them with the organisation of revolutionaries**, to erase the line of demarcation between them, to make still more the masses’ already incredibly hazy appreciation of the fact that in order to ‘serve’ the mass movement we must have people who will devote themselves exclusively to Social-Democratic activities, and that such people must **train** themselves patiently and steadfastly to be professional revolutionaries.” [The Essential Lenin, p. 149]*

And:

*“The only serious organisational principle the active workers of our movement can accept is **strict secrecy, strict selection of members**, and the training of professional revolutionaries. If we possessed these qualities, something even more than ‘democratism’ would be guaranteed to us, namely, complete, comradely, mutual confidence among revolutionaries. And this is absolutely essential for us, because in Russia it is useless thinking that democratic control can substitute for it.”* [our emphasis, **Op. Cit.**, p. 162]

Thus we have Lenin advocating “*strict secrecy, strict selection of members*” as well as a centralised party which will “*appoint bodies of leaders for each urban district, for each factory district and for each educational institution.*” The parallels with Bakunin’s system are clear and are predominately the result of the identical political conditions both revolutionaries experienced. While anarchists are happy to indicate and oppose the non-libertarian aspects of Bakunin’s ideas, it is hard for the likes of the SWP to attack Bakunin while embracing Lenin’s ideas on the party, justifying their more “un-democratic” aspects as a result of the objective conditions of Tsarism.

Similar top-down perspectives can be seen from Bolshevism in Power. The 1918 constitution of the Soviet Union argued that local soviets were to “*carry out all orders of the respective higher organs of the soviet power.*” In 1919, the Bolshevik’s Eighth Party Congress strengthened party discipline. As Maurice Brinton notes, the “*Congress ruled that each decision must above all be fulfilled. Only after this is an appeal to the corresponding Party organ permissible.*” [**The Bolsheviks and Workers’ Control**, p. 55] He quotes the resolution:

“The whole matter of posting of Party workers is in the hands of the Central Committee. Its decisions are binding for everyone.” [**Op. Cit.**, pp. 55–6]

This perspective was echoed in the forerunner of the SWP, the **International Socialists**. In September 1968, the Political Committee of International Socialism submitted the “*Perspectives for I.S.*” Point 4 said:

“Branches must accept directives from the Centre, unless they fundamentally disagree with them, in which case they should try to accord with them, while demanding an open debate on the matter.” [quoted by Brinton, **Op. Cit.**, p. 55f]

The parallels with Bakunin’s ideas are clear (see last section). However, it is to Bakunin’s credit that he argued that while “*each regional group have to obey it [the central committee] unconditionally*” he recognised that there existed “*cases where the orders of the Committee contradict either the general programme of the principle rules, or the general revolutionary plan of action, which are known to everybody as all . . . have participated equally in the discussion of them.*” when this happened, “*members of the group must halt the execution of the Committee’s orders and call the Committee to judgement before the general meeting . . . If the general meeting is discontented with the Committee, it can always substitute another one for it.*” Thus, rather than the unquestioning obedience of the Bolshevik party, who have to obey, then complain, the members of Bakunin’s group did not negate their judgement and could refuse to carry out orders.

Therefore, the SWP have a problem. On the one hand, they denounce Bakunin's ideas of a centralised, secret top-down organisation of revolutionaries. On the other, the party structure that Lenin recommends is also a tightly disciplined, centralised, top-down structure with a membership limited to those who are willing to be professional revolutionaries. They obviously want to have their cake and eat it too. Unfortunately for them, they cannot. If they attack Bakunin, they must attack Lenin, not to do so is hypocrisy.

The simple fact is that the parallels between Bakunin's and Lenin's organisational ideas cannot be understood without recognising that both revolutionaries were operating in an autocratic state under conditions of complete illegality, with a highly organised political police trying to infiltrate and destroy any attempt to change the regime. Once this is recognised, the SWP's comments can be seen to be hypocritical in the extreme. Nor can their feeble attempt to use Bakunin to generalise about all anarchist organisations be taken seriously as Bakunin's organisations were not "*major*" nor were his ideas on secret organisation and organising followed after his death. They were a product of Bakunin's experiences in Tsarist Russian and not generic to anarchism (as the SWP know fine well).

Moreover, many people leave the SWP due to its undemocratic, authoritarian and bureaucratic nature. The comments by one group of ex-SWP dissidents indicate the hypocrisy of the SWP's attack on Bakunin:

"The SWP is not democratic centralist but bureaucratic centralist. The leadership's control of the party is unchecked by the members. New perspectives are initiated exclusively by the central committee (CC), who then implement their perspective against all party opposition, implicit or explicit, legitimate or otherwise.

"Once a new perspective is declared, a new cadre is selected from the top down. The CC select the organisers, who select the district and branch committees — any elections that take place are carried out on the basis of 'slates' so that it is virtually impossible for members to vote against the slate proposed by the leadership. Any members who have doubts or disagreements are written off as 'burnt out' and, depending on their reaction to this, may be marginalised within the party and even expelled.

[...]

"The outcome is a party whose conferences have no democratic function, but serve only to orientate party activists to carry out perspectives drawn up before the delegates even set out from their branches. At every level of the party, strategy and tactics are presented from the top down, as pre-digested instructions for action. At every level, the comrades 'below' are seen only as a passive mass to be shifted into action, rather than as a source of new initiatives." [ISG, Discussion Document of Ex-SWP Comrades]

They argue that a "*democratic*" party would involve the "[r]egular election of all party full-timers, branch and district leadership, conference delegates, etc. with the right of recall," which means that in the SWP appointment of full-timers, leaders and so on is the norm. They argue for the "*right of branches*

to propose motions to the party conference” and for the “right for members to communicate horizontally in the party, to produce and distribute their own documents.” They stress the need for “an independent Control Commission to review all disciplinary cases (independent of the leadership bodies that exercise discipline), and the right of any disciplined comrades to appeal directly to party conference.” They argue that in a democratic party “no section of the party would have a monopoly of information” which indicates that the SWP’s leadership is essentially secretive, withholding information from the party membership. [Op. Cit.] As can be seen, the SWP have little grounds on which to attack Bakunin given this damning account of its internal workings.

Other dissidents argue the same point. In 1991 members in Southampton SWP asked “When was the last time a motion or slate to conference was opposed?” and pointed out:

“The CC usually stays the same or changes by one member. Most of the changes to its composition are made between Conferences. None of the CC’s numerous decisions made over the preceding year are challenged or brought to account. Even the Pre-Conference bulletins contain little disagreements.”

They stress that:

“There is real debate within the SWP, but the framework for discussion is set by the Central Committee. The agenda’s national events ... are set by the CC or its appointees and are never challenged ... Members can only express their views through Conference and Council to the whole party indirectly.” [quoted by Trotwatch, **Carry On Recruiting!**, p. 39 and pp. 40–1]

Therefore, the SWP does not really have a leg to stand on. While Bakunin’s ideas on organisation are far from perfect, the actual practice of the SWP places their comments in context. They attack Bakunin while acting in similar ways while claiming they do not. Anarchists do not hold up Bakunin’s ideas on how anarchists should organise themselves as examples to be followed nor as particularly democratic (in contrast to his ideas on how the labour movement and revolution should be organised, which we **do** recommend) — as the SWP know. However, the SWP claim they are a revolutionary party and yet their organisational practices are deeply anti-democratic with a veneer of (bourgeois) democracy. The hypocrisy is clear.

Ironically, the ISG dissidents who attack the SWP for being “bureaucratic centralist” note that “[a]nybody who has spent time involved in ‘Leninist’ organisations will have come across workers who agree with Marxist politics but refuse to join the party because they believe it to be undemocratic and authoritarian. Many draw the conclusion that Leninism itself is at fault, as every organisation that proclaims itself Leninist appears to follow the same pattern.” [Lenin vs. the SWP: Bureaucratic Centralism Or Democratic Centralism?] This is a common refrain with Leninists — when reality says one thing and the theory another, it must be reality that is at fault. Yes, every Leninist organisation may be bureaucratic and authoritarian but it is not the theory’s fault that those who apply it are not capable of actually doing it. Such an application of scientific principles by the followers of “scientific socialism” is worthy of note

— obviously the usual scientific method of generalising from facts to produce a theory is inapplicable when evaluating “scientific socialism” itself.

One last point. While some may argue that the obvious parallels between Bakunin’s ideas and Lenin’s should embarrass anarchists, most anarchists disagree. This is for four reasons.

Firstly, anarchists are **not** “*Bakuninists*” or followers of “*Bakuninism*.” This means that we do not blindly follow the ideas of individuals, rather we take what we find useful and reject the flawed and non-libertarian aspects of their ideas. Therefore, if we think Bakunin’s specific ideas on how revolutionaries should organise are flawed and not libertarian then we reject them while keeping the bulk of Bakunin’s useful and libertarian ideas as inspiration. We do not slavishly follow individuals or their ideas but apply critical judgement and embrace what we find useful and reject what we consider nonsense.

Secondly, anarchism did not spring fully formed out of Bakunin’s (or Proudhon’s or Kropotkin’s or whoever’s) mind. We expect individuals to make mistakes, not to be totally consistent, not totally break with their background. Bakunin clearly did not manage to break completely with his background as a political exile and an escapee from Tsarist Russia. Hence his arguments and support for secret organisation — his experiences, like Lenin’s, pushed him in that direction. Moreover, we should also remember that Russia was not the only country which the anarchist and labour movements were repressed during this time. In France, after the defeat of the Paris Commune, the International was made illegal. The Spanish section of the International had been proscribed in 1872 and the central and regional authorities repressed it systematically from the summer of 1873, forcing the organisation to remain underground between 1874 and 1881. As can be seen, the SWP forget the historical context when attacking Bakunin’s secrecy.

Thirdly, Bakunin did not, like Lenin, think that “*socialist consciousness*” had to be introduced into the working class. He argued that due to the “*economic struggle of labour and capital*” a worker who joined the International Workers’ Association “*would inevitably discover, through the very force of circumstances and through the develop of this struggle, the political, socialist, and philosophical principles of the International.*” He thought that working class people were “**socialists without knowing it**” as “*their most basic instinct and their social situation makes them . . . earnestly and truly socialist . . . They are socialist because of all the conditions of their material existence and all the needs of their being. . . The workers lack neither the potential for socialist aspirations nor their actuality; they lack socialist thought.*” Thus the “germs” of “*socialist thought*” are to “*be found in the instinct of every earnest worker. The goal . . . is to make the worker fully aware of what he wants.*” The method? The class struggle itself — “*the International relies on the collective experience he gains in its bosom, especially on the progress of the collective struggle of the workers against the bosses.*” [The Basic Bakunin, p. 100 and pp. 101–3]

Bakunin did not deny the importance of those who already are socialists to organise themselves and “*influence*” those who were not socialists so that in “*critical moments [they will] . . . follow the International’s lead.*” However, this influence was **not** to inject socialist ideas into the working class but rather to aid their development by the “*propagation of its [the International] ideas and . . . the organisation of its members’ natural effect on the masses.*” As can be seen, Bakunin’s ideas on this subject differ considerably from Lenin’s. [Op.

Cit., p. 139 and p. 140]

Unsurprisingly, the programme of the revolutionary organisation had to reflect the instincts and needs of the working population and must never be imposed on them. As he argued, the working masses were “*not a blank page on which any secret society can write whatever it wishes . . . It has worked out, partly consciously, probably three-quarters unconsciously, its own programme which the secret society must get to know or guess and to which it must adapt itself.*” He stresses that once the state “*is destroyed . . . the people will rise . . . for **their own** [ideal]*” and anyone “*who tries to foist **his own** programme on the people will be left holding the baby.*” [quoted in **Daughter of a Revolutionary**, Michael Confino (ed.), p. 252, p. 254 and p. 256] As he stresses, libertarian socialist ideas come from the masses and not from outside them:

“In opposition to . . . oppressive statist orientations . . . an entirely new orientation finally arose from the depths of the proletariat itself . . . It proceeds directly to the abolition of all exploitation and all political or juridical as well as governmental and bureaucratic oppression, in other words, to the abolition of all classes . . . and the abolition of their last buttress, the state.

“That is the program of social revolution.” [**Statism and Anarchy**, pp. 48–9]

Therefore, for Bakunin, the revolutionary organisation did not play the same role as for Lenin. It existed to aid the development of socialist consciousness within the working class, not inject that consciousness into a mass who cannot develop it by their own efforts. The difference is important as Lenin’s theory justified the substitution of party power for workers power, the elimination of democracy and the domination of the party over the class it claimed to represent. Bakunin, recognising that socialist ideas are “*instinctive*” in the working class due to their position in society and their everyday experiences, could not do this as the organisation existed to clarify these tendencies, not create them in the first place and inject them into the masses.

Lastly, the role the organisation plays in the workers’ movement and revolution are distinctly different. As Bakunin constantly stressed, the secret organisation must never take state power. As he put it, the “*main purpose and task of the organisation*” would be to “*help the people to achieve self-determination.*” It would “*not threaten the liberty of the people because it is free from all official character*” and “*not placed above the people like state power.*” Its programme “*consists of the fullest realisation of the liberty of the people*” and its influence is “*not contrary to the free development and self-determination of the people, or its organisation from below according to its own customs and instincts because it acts on the people only by the natural personal influence of its members who are not invested with any power.*” Thus the revolutionary group would be the “*helper*” of the masses, with an “*organisation within the people itself.*” [quoted by Michael Confino, **Op. Cit.**, p. 259, p. 261, p. 256 and p. 261] The revolution itself would see “*an end to all masters and to domination of every kind, and the free construction of popular life in accordance with popular needs, not from above downward, as in the state, but from below upward, by the people themselves, dispensing with all governments and parliaments — a voluntary alliance of agricultural and factory worker associations, communes, provinces,*

and nations; and, finally, . . . universal human brotherhood triumphing on the ruins of all the states.” [Statism and Anarchy, p. 33]

As can be seen, instead of seeking state power, as Lenin’s party desired, Bakunin’s would seek “*natural influence*” rather than “*official influence*.” As we argued in section J.3.7, this meant influencing the class struggle and revolution within the mass assemblies of workers’ associations and communes and in their federations. Rather than seek state power and official leadership positions, as the Leninist party does, Bakunin’s organisation rejected the taking of hierarchical positions in favour of working at the base of the organisation and providing a “*leadership of ideas*” rather than of people (see section J.3.6). While Bakunin’s organisational structures are flawed from a libertarian perspective (although more democratic than Marxists claim) the way it works within popular organisations **is** libertarian and in stark contrast with the Leninist position which sees these bodies as stepping stones for party power.

Therefore, Bakunin rejected key Leninist ideas and so cannot be considered as a forefather of Bolshevism in spite of similar organisational suggestions. The similarity in structure is due to a similarity in political conditions in Russia and **not** similarities in political ideas. If we look at Bakunin’s ideas on social revolution and the workers’ movement we see a fully libertarian perspective — of a movement from the bottom-up, based on the principles of direct action, self-management and federalism. Anarchists since his death have applied **these** ideas to the specific anarchist organisation as well, rejecting the non-libertarian elements of Bakunin’s ideas which the SWP correctly (if somewhat hypocritically and dishonestly) denounce.

22. Was the F.A.I. a “*centralised and secret*” organisation that shunned “*open debate and common struggle*”?

They move onto Spanish Anarchism:

“The anarchist organisation inside the Spanish C.N.T., the F.A.I., was centralised and secret. A revolutionary party thrives on open debate and common struggle with wider groups of workers.”

We discuss this Marxist myth in more detail in section 3 of the appendix on “*Marxists and Spanish Anarchism*”. However a few points are worth making. The F.A.I., regardless of what the SWP assert, was not centralised. It was a federation of autonomous affinity groups. As one member put it:

“It was never its aim to act as a leadership or anything of the sort — to begin with they had no slogans, nor was any line laid down, let alone any adherence to any hierarchical structure . . . This is what outside historians ought to grasp once and for all: that neither Duruti, nor Ascaso, nor Garcia Oliver — to name only the great C.N.T. spokesmen — issued any watchwords to the ‘masses,’ let alone delivered any operational plan or conspiratorial scheme to the bulk of the C.N.T. membership.”

He stresses that:

“Each F.A.I. group thought and acted as it deemed fit, without bothering about what the others might be thinking or deciding . . . they had no . . . opportunity or jurisdiction . . . to foist a party line upon the grass-roots.” [Francisco Carrasquer, quoted by Stuart Christie, **We, the Anarchists!**, p. 25 and p. 28]

Murray Bookchin paints a similar picture:

“The F.A.I. . . was more loosely jointed as an organisation than many of its admirers and critics seem to recognise. It has no bureaucratic apparatus, no membership cards or dues, and no headquarters with paid officials, secretaries, and clerks. . . They jealously guarded the autonomy of their affinity groups from the authority of higher organisational bodies—a state of mind hardly conducive to the development of a tightly knit, vanguard organisation.

“The F.A.I., moreover, was not a politically homogeneous organisation which followed a fixed ‘line’ like the Communists and many Socialists. It had no official program by which all faistas could mechanically guide their actions.” [**The Spanish Anarchists**, p. 224]

Stuart Christie argues that the decentralised nature of the F.A.I. helped it survive the frequent repression directed against it and the C.N.T:

“The basic units of the F.A.I. were . . . small autonomous affinity groups of anarchist militants. This cohesive quasi-cellular form of association had evolved, gradually, over the period of time it takes for relationships to be established and for mutual trust to grow. The affinity groups consisted, usually, of between three and 10 members bound by ties of friendship, and who shared well defined aims and agreed methods of struggle. Once such a group had come into existence it could, if it so wished, solicit affiliation to the F.A.I. . . The affinity groups were also highly resistant to police infiltration. Even if infiltration did occur, or police agents did manage to set up their own ‘affinity’ groups it would not have been a particularly efficient means of intelligence gathering; the atomic structure of the F.A.I. meant there was no central body to provide an overview of the movement as a whole.” [**We, the Anarchists!**, p. 28]

He stresses its decentralised nature:

*“Above all, it was not a representative body and involved **no** delegation of power either within the affinity groups or in the regional or national administrative bodies to empower those bodies to make decisions on behalf of the collectivity. Drawing on many years of revolutionary experience the F.A.I. was firmly rooted in federal principles and structured in such a way that its co-ordinating function did not deprive its constituent members of their autonomous power. . . In situations where it was necessary for delegates to take decisions, e.g. at plenary meetings during times of crisis or clandestinity, those decisions were required to be ratified by the whole membership who, in effect, constituted the administration. . . The groups in a city or*

town constituted a Local Federation while the rural groups, combined, formed a District Federation. These were administered by a secretariat and a committee composed of one mandated delegate from each affinity group. The Local and District Federations were obliged to convene regular assemblies of all groups in its area... Local and District Federations constituted a Regional Federation. These, in turn, were co-ordinated by a Peninsular Committee. None of these committees, local, district, regional or national, could be described as having a bureaucratic apparatus. Nor did they wield executive power of any description. Their function was purely administrative.” [Op. Cit., pp. 29–30]

Therefore, the claim that the F.A.I. was a centralised organisation is simply false. Rather it was a federation of autonomous groups, as can be seen (see also section 3 of the appendix on “*Marxists and Spanish Anarchism*” for more discussion on this topic).

Was the F.A.I. a “secret” organisation? When it was founded in 1927, Spain was under the dictatorship of Primo de Rivera and so it was illegal and secret by necessity. As Stuart Christie correctly notes, “[a]s an organisation publicly committed to the overthrow of the dictatorship, the F.A.I. functioned, from 1927 to 1931, as an illegal rather than a secret organisation. From the birth of the Republic in 1931 onwards, the F.A.I. was simply an organisation which, until 1937, refused to register as an organisation as required by Republican Law.” [We, the Anarchists!, p. 24] Thus it was illegal rather than secret. As one anarchist militant asked, “[i]f it was secret, how come I was able to attend F.A.I. meetings without ever having joined or paid dues to the ‘specific’ organisation?” [Francesco Carrasquer, quoted by Christie, Op. Cit., p. 24]

Moreover, given the periods of repression suffered by the Spanish libertarian movement throughout its history (including being banned and forced underground) being an illegal organisation made perfect sense. The anarchist movement was made illegal a number of times. Nor did the repression end during the Republic of 1931–6. This means that for the F.A.I. to be illegal was a sensible thing to do, particularly after failed revolutionary attempts resulted in massive arrests and the closing of union halls. Again, the SWP ignore historical context and so mislead the reader.

Did the F.A.I. ignore “open debate and common struggle.” No, of course not. The members of the F.A.I. were also members of the C.N.T. The C.N.T. was based around mass assemblies in which all members could speak. It was here that members of the F.A.I. took part in forming C.N.T. policy along with other C.N.T. members. Anarchists in the C.N.T. who were not members of the F.A.I. indicate this. Jose Borrás Casacarosa notes that “[o]ne has to recognise that the F.A.I. did not intervene in the C.N.T. from above or in an authoritarian manner as did other political parties in the unions. It did so from the base through militants ... the decisions which determined the course taken by the C.N.T. were taken under constant pressure from these militants.” Jose Campos notes that F.A.I. militants “tended to reject control of confederal committees and only accepted them on specific occasions ... if someone proposed a motion in assembly, the other F.A.I. members would support it, usually successfully. It was the individual standing of the faista in open assembly.” [quoted by Stuart Christie, Op. Cit., p. 62] As Francisco Ascaso (friend of Durruti and an

influential anarchist militant in the C.N.T. and F.A.I. in his own right) put it:

“There is not a single militant who as a ‘F.A.I.ista’ intervenes in union meetings. I work, therefore I am an exploited person. I pay my dues to the workers’ union and when I intervene at union meetings I do it as someone who is exploited, and with the right which is granted me by the card in my possession, as do the other militants, whether they belong to the F.A.I. or not.” [cited by Abel Paz, **Durruti: The People Armed**, p. 137]

This meant that it was at union meetings and congresses where policies and the program for the movement were argued out:

“[D]elegates, whether or not they were members of the F.A.I., were presenting resolutions adopted by their unions at open membership meetings. Actions taken at the congress had to be reported back to their unions at open meetings, and given the degree of union education among the members, it was impossible for delegates to support personal, non-representative positions.” [Juan Gomez Casas, **Anarchist Organisation: The History of the F.A.I.**, p. 121]

As can be seen, open debate with their fellow workers in the union assemblies. In this they followed Bakunin’s arguments that anarchist organisation “rules out any idea of dictatorship and of a controlling and directive power” and it “will promote the Revolution only through the **natural but never official influence** of all members of the Alliance.” This influence would be exerted in the union assemblies, as the union members “could only defend their rights and their autonomy in only one way: the workers called general membership meetings. Nothing arouses the antipathy of the committees more than these popular assemblies. . . In these great meetings of the sections, the items on the agenda was amply discussed and the most progressive opinion prevailed. . . ” This would ensure that the assemblies had “real autonomy” and actually were the real power in the organisation. Any committees would be made up of “delegates who conscientiously fulfilled all their obligations to their respective sections as stipulated in the statutes,” “reporting regularly to the membership the proposals made and how they voted” and “asking for further instructions (plus instant recall of unsatisfactory delegates)” [**Bakunin on Anarchism**, p. 154, p. 387 and p. 247]

The anarchist revolution would be organised in an identical fashion, and, in Bakunin’s words, “must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations . . . organised from the bottom upwards by means of revolutionary delegations . . . [who] will set out to administer public services, not to rule over peoples.” [**Michael Bakunin: Selected Writings**, p. 172]

As can be seen, the F.A.I. (like all anarchists) influenced the class struggle and revolution via their natural influence in winning debates with their fellow workers in union assemblies. They did not seek power but rather influence for their ideas. To claim otherwise, to claim that anarchists reject open debate with their fellow workers is false. Instead of seeking to power — and so limiting debates to during elections — anarchists argue that people must control their own organisations (and so the revolution) directly and all the time. This means,

as can be seen, we encourage open debate and discussion far more than those, like the SWP, who seek centralised political power for themselves. In such a system, the only people who debate regularly are the members of the government — everyone else is just a voter and an order taker.

23. Do anarchists wait for “*spontaneous upsurges by workers*”?

After lying about the F.A.I., they move on to lying about anarchist theory:

“Anarchists instead look to spontaneous upsurges by workers. In the struggle anarchists will declare themselves and urge the workers on. They hope this will lead to the toppling of capitalism. History is full of mass struggles which have been able to win significant gains, but which have not had a clear leadership that can carry the struggle over to victory against capitalism.”

Nothing could be further from the truth. Their own article exposes their lies. They mention the C.N.T., which was organised in an anarchist way and in which anarchists were heavily involved. Anarchists from Bakunin onward have all argued in favour of organising as anarchists as well as organising workers and fighting for reforms in the here and now. For Bakunin, “*the natural organisation of the masses . . . is organisation based on the various ways that their various types of work define their day-to-day life; it is organisation by trade association.*” [The Basic Bakunin, p. 139] He stressed the importance of anarchists being involved in unions as well as union struggle for reforms by direct action:

“What policy should the International [Workers’ Association] follow during th[e] somewhat extended time period that separates us from this terrible social revolution . . . the International will give labour unrest in all countries an essentially economic character, with the aim of reducing working hours and increasing salary, by means of the association of the working masses . . . It will [also] propagandise its principles . . .” [Op. Cit., p. 109]

Indeed, he saw the labour movement as the means to create a socialist society:

“The masses are a force, or at least the essential elements of a force. What do they lack? They lack two things which up till now constituted the power of all government: organisation and knowledge.

“The organisation of the International [Workers’ Association], having for its objective not the creation of new despotisms but the uprooting of all domination, will take on an essentially different character from the organisation of the State. . . But what is the organisation of the masses? . . . It is the organisation by professions and trades . . .

“The organisation of the trade sections and their representation in the Chambers of Labour . . . bear in themselves the living seeds of the new society which is to replace the old world. They are creating not

only the ideas, but also the facts of the future itself." [Bakunin on Anarchism, pp. 254–5]

All anarchists have stressed the importance of working in and outside the labour movement to gain influence for anarchist ideas of direct action, solidarity, self-management and federalism in the here and now, rather than waiting for a "*spontaneous uprising*" to occur. As Kropotkin argued, "*Revolutionary Anarchist Communist propaganda with Labour Unions had always been a favourite mode of action in the Federalist [or libertarian] . . . section of the International Working Men's Association.*" [Act For Yourselves, p. 119] Malatesta makes the same point:

"anarchists, convinced of the validity of our programme, must strive to acquire overwhelming influence in order to draw the movement towards the realisation of our ideas. But such influence must be won by doing more and better than others, and will only be useful if won in that way.

"Today we must deepen, develop and propagate our ideas and co-ordinate our forces in a common action. We must act within the labour movement to prevent it being limited to and corrupted by the exclusive pursuit of small improvements compatible with the capitalist system; and we must act in such a way that it contributes to preparing for a complete social transformation. We must work with the unorganised, and perhaps unorganisable, masses to awaken a spirit of revolt and the desire and hope for a free and happy life. We must initiate and support all movements that tend to weaken the forces of the State and of capitalism and to raise the mental level and material conditions of the workers. We must, in short, prepare, and prepare ourselves, morally and materially, for the revolutionary act which will open the way to the future." [The Anarchist Revolution, p. 109]

Therefore, as can be seen, the SWP's assertions are totally at odds with the actual ideas of anarchists, as would be known by anyone with even a basic understanding of anarchist theory. After all, if spontaneous uprisings were sufficient in themselves we would be living in an anarchist society. As Bakunin argued "*if instinct alone had been sufficient for the liberation of peoples, they would have long since freed themselves.*" [Bakunin on Anarchism, p. 254] This explains why anarchists organise **as anarchists** in groups and federations to influence the class struggle. We are aware of the need for revolutionaries to organise to influence the class struggle, spread anarchist ideas and tactics and present the case for revolutionary change. An anarchist society will not come about by accident, it must be consciously desired and created by the mass of the population. As Kropotkin argued:

"Communist organisations . . . must be the work of all, a natural growth, a product of the constructive genius of the great mass. Communism cannot be imposed from above; it could not live even for a few months if the constant and daily co-operation of all did not uphold it. It must be free." [Kropotkin's Revolutionary Pamphlets, p. 140]

So, clearly, anarchists see the importance of working class organisation and struggle in the here and now. Anarchists are active in industrial disputes and (as the SWP note) the anti-globalisation movement and were heavily involved in the anti-poll-tax and anti-Criminal Justice Act struggles in the UK, for example. The role of anarchists is not to wait for “*upsurges*” but rather to encourage them by spreading our ideas and encouraging workers to organise and fight their bosses and the state. It is for this reason anarchists form groups and federations, to influence workers today rather than waiting for a “*spontaneous uprising*” to occur. Moreover, it is quite ironic that the SWP say that anarchists wait for upsurges before declaring themselves to the masses. After all, that is what the SWP do. They turn up at picket lines and try and sell their paper and party to the strikers. Obviously, if anarchist do this, it is bad, if the SWP do it, then it is “*revolutionary*.”

Therefore, rather than believing in or waiting for “*spontaneous upsurges*” anarchists, like the SWP, spread their message, try and convince people to become revolutionaries. That is why there are numerous anarchist federations across the world, involved in numerous struggles and working class organisations, with magazines, papers and leaflets being produced and distributed. Anarchists stress the importance of winning people over to anarchist ideas and of giving a “*lead*” in struggle rather than as a “*leadership*” (which implies a hierarchical relationship between the mass of people and a group of leaders). To state otherwise, to argue we wait for spontaneous uprisings, is simply a lie.

Anarchist organisations see themselves in the role of aiders, not leaders. As Voline argued, the politically aware minority “*should intervene. But, in every place and under all circumstances, . . . [they] should freely participate in the common work, as true collaborators, not as dictators. It is necessary that they especially create an example, and employ themselves. . . without dominating, subjugating, or oppressing anyone. . . Accordingly to the libertarian thesis, it is the labouring masses themselves, who, by means of the various class organisations, factory committees, industrial and agricultural unions, co-operatives, et cetera, federated. . . should apply themselves everywhere, to solving the problems of waging the Revolution. . . As for the ‘elite’ [i.e. the politically aware], their role, according to the libertarians, is to help the masses, enlighten them, teach them, give them necessary advice, impel them to take initiative, provide them with an example, and support them in their action — but not to direct them governmentally.*” [The Unknown Revolution, pp. 177–8]

Sadly, Leninists like the SWP confuse giving a lead with taking power themselves. They seek to take over positions of responsibility in a movement and turn them into positions of power which they can use to tell the others what to do. Instead of being the servants of the organisation, they become its masters. For this reason anarchist organisations try to influence movements from below, in the mass assemblies which make it up, rather than seek power.

24. Do anarchists blame workers “*for being insufficiently revolutionary*”?

After creating a straw man about anarchist theory, they draw some thoughts from it:

“When struggles have not spontaneously broken capitalism, anarchists have tended to end up blaming workers for being insufficiently revolutionary. So 19th century French anarchist Pierre-Joseph Proudhon started off talking of his ‘love of the people’ but ended up saying he ‘despised’ humanity because they had not overthrown capitalism.”

Strange that they picked Proudhon as he was not a revolutionary anarchist. Rather he favoured the reform of capitalism via mutual credit and workers’ cooperatives and rejected the idea of “uprisings” and/or revolution (spontaneous or not). Anyone with even a limited knowledge of Proudhon’s work would know this. In addition, Proudhon’s last book (**The Political Capacity of the Working Classes**), finished on his death bed, was an attempt to influence the workers’ movement towards his ideas of mutualism and federalism. Hardly to be expected from someone who “despised” humanity for not overthrowing capitalism. As examples go, the SWP is clearly clutching at straws.

Moreover, as we argued in the last section, revolutionary anarchists like Bakunin, Malatesta, Kropotkin, Goldman, Berkman, Rocker, etc., all placed a great deal of time and energy in trying to work within and influence workers’ struggles and the labour movement in the here and now. They did not think that workers struggles would necessarily “spontaneously” break capitalism. While recognising, as we indicated in section 10, that the class struggle changed the ideas of those involved, they recognised the need for anarchist groups, papers, pamphlets to influence the class struggle in a libertarian way and towards a revolution. They were well aware that “spontaneous” uprisings occurred but were not enough in themselves — anarchists would need to organise as anarchists to influence the class struggle, particularly when “uprisings” were not occurring and the daily struggle between governed and governor, exploited and exploiter was taking less spectacular forms (hence anarchist support and involvement in the labour movement and unions like the C.N.T.).

The SWP then move onto an even greater factual error. They claim that the *“biggest anarchist groups today, the ‘autonomists’ in Europe, treat workers who have not fully broken with capitalist ideas as an enemy rather than a potential ally.”* Unfortunately for them, the “autonomists” are not generally anarchists (the name should have given the SWP some clue, as anarchists are quite proud of their name and generally use it, or libertarian, to describe themselves). Rather the “autonomists” are non-Leninist Marxists whose ideas (and name) originally came from the Marxist left in Italy during the 1960s. It is also probable that the various European anarchist federations (such as the French and Italian) and anarcho-syndicalist unions are bigger than the autonomists. However, without any examples of the groups meant it is hard to evaluate the accuracy of the SWP’s claims as regards their size or opinions. Suffice it to say, the leading theorists of “autonomism” such as Toni Negri and Harry Cleaver do not express the opinions the SWP claim “autonomists” have.

25. Why does the history of centralised parties refute the SWP’s arguments?

The SWP admit that their analysis leaves much to be desired by mentioning that *“[m]any anarchists understand the way that capitalism works and organise*

to change the world.” In other words, if an anarchist points out the flaws in their argument or a reader knows an anarchist who does not match the SWP’s distorted picture, then the SWP can say that they are part of the “*many.*” Extremely handy, if dishonest, comment to make.

The SWP continue by arguing that our “*rejection of centralisation means that at critical moments their intervention in the struggle is fatally flawed.*” This is ironic. Given that their example of the benefits of centralisation showed the flaws in that method of organising, their conclusion seems without basis. Moreover, as argued above, centralisation is the key means by which minorities govern majorities. It is a tool used to impose minority rule and is not designed for other uses. But, then again, the SWP do aim for minority rule — the rule of the “*revolutionary*” party over the masses. As they argue:

“The working class needs what anarchism rejects — a clear and determined revolutionary party which can lead the working class as a whole, and is not afraid to overthrow capitalism and set up a workers’ state.”

Yes, indeed. The examples of the current anti-capitalist movement, the poll tax revolt and the 1917 February Russian revolution indicate well that a revolutionary party works. If such a party had led the working class in each of these events, they would not have occurred. The workers would have done nothing, as the Bolsheviks desired. People would have paid their poll tax waiting for the trade union bureaucrats to act. The anti-globalisation demonstrations would not have happened as the “vanguard” party did not recognise their importance.

The Russian Revolution quickly resulted in the marginalisation of the workers’ councils by the centralised, “*clear and determined*” Bolsheviks who turned them into rubber stamps of their government, it suggests that the politics of the SWP leave much to be desired. Given that the one “success” of Leninist politics — the Russian Revolution of October 1917 — created state capitalism, with workers’ soviets and factory committees undermined in favour of party power (**before**, we must stress, the start of the civil war — what most Leninists blame the rise of Stalinism on) we may suggest that **anarchist** ideas have been proven correct again and again. After all, the validity of a theory surely lies in its ability to **explain** and **predict** events. Anarchists, for example, predicted both the degeneration of both Social Democracy and the Russian revolution, the two main examples of Marxism in action, and presented coherent reasons **why** this would happen. Marxists have had to generate theories to explain these events **after** they have occurred, theories which conveniently ignore the role of Marxist politics in historical events.

This, we suggest, provides the explanation of why they have spent so much time re-writing history and smearing anarchism. Not being able to discuss our ideas honestly — for that would expose the authoritarian ideas of Bolshevism and its role in the degeneration of the Russian Revolution — the SWP invent a straw man they call anarchism and beat him to death. Unfortunately for them, anarchists are still around and can expose their lies for what they are.

Reply to errors and distortions in John Fisher's *“Why we must further Marxism and not Anarchism”*

On the Trotskyist “New Youth” webpage there is an article entitled “Why we must further Marxism and not Anarchism” by John Fisher. This article contains numerous distortions of anarchist ideas and positions. Indeed, he makes so many basic errors that only two possible explanations are possible: either he knows nothing about anarchism or he does and is consciously lying.

We will compare his assertions to what anarchist theory actually argues in order to show that this is the case.

1. Why should *“the so-called Anarchistic youth of today”* be concerned that Trotskyists consider them allies?

Fisher starts his diatribe against anarchism with some thoughts on the radical youth active in the anti-globalisation demonstrations and movements:

“The so-called Anarchistic youth of today, year 2001, for the most part simply use the term ‘Anarchist’ as an indication of not wanting to go along with the ‘system’ in not wanting to assimilate, which is a giant leap forward on their part considering all their lives they’ve constantly been bombarded with the huge American Corporate propaganda machine. For this achievement, they are already more our ally than our enemy.”

It makes you wonder how Fisher knows this. Has there been a poll of “anarchistic youth” recently? It would be interesting to discover the empirical basis for this statement. Given the quality of the rest of the article, we can hazard a guess and say that these particular facts are just assertions and express wishful thinking rather than any sort of reality.

Needless to say, these “*anarchistic youth*” had better watch out. We all know what happens to the “*ally*” of the vanguard party once that party takes power. Anarchists remember the fate of our comrades when Lenin and Trotsky ruled the “proletarian” state.

The Russian anarchists were at the forefront of the struggle between the February and October revolutions in 1917. As socialist historian Samuel Farber notes, the anarchists “*had actually been an unnamed coalition partner of the Bolsheviks in the October Revolution.*” [**Before Stalinism**, p. 126] The anarchists were the “allies” of the Bolsheviks before they took power as both shared the goals of abolishing the provisional government and for a social revolution which would end capitalism.

This changed once the Bolsheviks had taken power. On the night of April 11th, 1918, the Cheka surrounded 26 Anarchist clubs in Moscow, in the insuring fighting Anarchists suffered 40 casualties and 500 were taken prisoner. The Petrograd anarchists protested this attack:

“The Bolsheviks have lost their senses. They have betrayed the proletariat and attacked the anarchists. They have joined . . . the counter-revolutionary bourgeoisie. They have declared war on revolutionary anarchism. . . We regarded you [Bolsheviks] as our revolutionary brothers. But you have proved to be traitors. You are Cains — you have killed your brothers . . . There can be no peace with the traitors to the working class. The executioners of the revolution wish to become the executioners of anarchism.” [quoted by Paul Avrich, **The Anarchists in the Russian Revolution**, p. 113]

Fifteen days later similar raids were carried out in Petrograd. This repression, we must note, took place months before the outbreak of the Russian Civil War (in late May 1918). In May of that year, leading anarchist periodicals (including **Burevestnik**, **Anarkhia** and **Golos Truda**) were closed down by the government. The repression continued during the war and afterwards. Many imprisoned anarchists were deported from the “workers’ state” in 1921 after they went on hunger strike and their plight was raised by libertarian delegates to the founding congress of the Red International of Labour Unions held that year.

Unsurprisingly, the Bolsheviks denied they held anarchists. French anarchist Gaston Leval accounted how Lenin had “*reiterated the charges made by Dzerzhinsky [founder of the Bolsheviks secret police, the Cheka] . . . Those in prison were not true anarchists nor idealists — just bandits abusing our good intentions.*” Leval, having gathered the facts, indicated this was not true, making Lenin backtrack. [**No Gods, No Masters**, vol. 2, p. 213]

Unsurprisingly, when the libertarian delegates to the congress reported back on conditions in Russia to their unions, they withdrew from the Trade-Union International.

In the Ukraine, the anarchist influenced Makhnovist movement also became an “ally” with the Bolsheviks in the common struggle against the counter-revolutionary White armies. The Bolsheviks betrayed their allies each time they formed an alliance.

The first alliance was in March 1919 during the struggle against Denikin, In May of that year, two Cheka agents sent to assassinate Makhno (the main leader

of the movement) were caught and executed. The following month Trotsky, the commander of the Red Army, outlawed the Makhnovists and Communist troops attacked their headquarters at Gulyai-Polye.

Denikin's massive attack on Moscow in September 1919 saw the shaky alliance resumed in the face of a greater threat. Once Denikin had been defeated, the Bolsheviks ordered the Makhnovists to the Polish front. This was obviously designed to draw them away from their home territory, so leaving it defenceless against Bolshevik rule. The Makhnovists refused and Trotsky, again, outlawed and attacked them.

Hostilities were again broken off when the White General Wrangel launched a major offensive in the summer of 1920. Again the Bolsheviks signed a pact with Makhno. This promised amnesty for all anarchists in Bolshevik prisons, freedom for anarchist propaganda, free participation to the Soviets and "*in the region where the Makhnovist Army is operating, the population of workers and peasants will create its own institutions of economic and political self-management.*" [quoted by Peter Arshinov, **The History of the Makhnovist Movement**, pp. 177–9] Once Wrangel had been defeated, the Bolsheviks ripped up the agreement and turned their forces, once again, against their "ally" and finally drove them out of the Soviet Union in 1921.

These events should be remembered when the authoritarian left argue that we aim for the same thing and are allies.

2. What else do people learn about when they discover anarchism is not "*utter rebellion*"?

Fisher continues:

"In some cases, 'Anarchist' youth begin to try to learn about what Anarchism truly is instead of seeing it merely as utter rebellion. They learn Anarchism is a form of Socialism, they learn they have much in common with Marxists, they learn the state must be smashed, they learn the state is a tool of suppression used by one class against another."

They learn much more than this. They learn, for example, about the history of Marxism and how anarchism differs from it.

They learn, for example, about the history of Marxist Social Democracy. Many forget that Social Democracy was the first major Marxist movement. It was formed initially in Germany in 1875 when the followers of Lassalle and Marx united to form the Social Democratic Party of Germany (SPD). This party followed Marx and Engels recommendations that workers should form a distinct political party and conquer political power. It rejected the anarchist argument that workers should "*abstain from politics*" (i.e. elections) and instead, to use an expression from Marx's preamble of the French Workers' Party, turn the franchise "*from a means of deception . . . into an instrument of emancipation.*" [**Marx and Engels Reader**, p. 566]

Rather than confirm Marx's politics, Social Democracy confirmed Bakunin's. It quickly degenerated into reformism. As Bakunin predicted, when "*the workers . . . send common workers . . . to Legislative Assemblies . . . The worker-deputies,*

transplanted into a bourgeois environment, into an atmosphere of purely bourgeois ideas, will in fact cease to be workers and, becoming Statesmen, they will become bourgeois . . . For men do not make their situations; on the contrary, men are made by them.” [The Basic Bakunin, p. 108]

Form the early 1890s, Social Democracy was racked by arguments between reformists (the “revisionist” wing) and revolutionaries. The former wanted to adapt the party and its rhetoric to what it was doing. As one of the most distinguished historians of this period put it, the “*distinction between the contenders remained largely a subjective one, a difference of ideas in the evaluation of reality rather than a difference in the realm of action.*” [C. Schorske, **German Social Democracy**, p. 38]

In 1914, the majority of social democrats in Germany and across the world supported their state in the imperialist slaughter of the First World. This disgraceful end would not have surprised Bakunin.

Anarchists also learn about the Russian Revolution. They learn how Lenin and Trotsky eliminated democracy in the armed forces, in the workplace and in the soviets.

They learn, for example, that the Bolsheviks had disbanded soviets which had been elected with non-Bolshevik majorities in the spring and summer of 1918. [Samuel Farber, **Op. Cit.**, p. 24]

They learn that at the end of March, 1918, Trotsky reported to the Communist party that “*the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree*” in the Red Army. [quoted by M. Brinton, **The Bolsheviks and Workers’ Control**, pp. 37–8]

They learn that Lenin opposed workers’ management of production. Before the October Revolution he saw “workers’ control” purely in terms of the “*universal, all-embracing workers’ control over the capitalists.*” [Will the Bolsheviks Maintain Power?, p. 52] He did not see it in terms of workers’ management of production itself (i.e. the abolition of wage labour) via federations of factory committees. Anarchists and the workers’ factory committees did. “*On three occasions in the first months of Soviet power, the [factory] committee leaders sought to bring their model into being. At each point the party leadership overruled them. The result was to vest both managerial and control powers in organs of the state which were subordinate to the central authorities, and formed by them.*” [Thomas F. Remington, **Building Socialism in Bolshevik Russia**, p. 38]

Lenin himself quickly supported “*one-man management*” invested with “*dictatorial powers*” after “*control over the capitalists*” failed. By 1920, Trotsky was advocating the “*militarisation of labour*” and implemented his ideas on the railway workers.

They learn that Leninism is just another form of capitalism (state capitalism). As Lenin put it, socialism “*is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly made to benefit the whole people; by this token it ceases to be capitalist monopoly.*” [The Threatening Catastrophe and how to avoid it, p. 37]

They learn that Lenin and Trotsky argued for party dictatorship and centralised, top-down rule (see section 4).

They also learn that this should not come as a surprise. Anarchism argues that the state is a tool to allow minorities to rule and has been designed to

ensure minority power. They learn that it cannot, by its very nature, be a tool for liberation — no matter who is in charge of it.

3. What do anarchists think will “*replace the smashed state machine*”?

Fisher now makes a common Marxist assertion. He states:

“But what they do not learn, and never will from an Anarchist perspective is what is to replace the smashed state machine?”

In reality, if you read anarchist thinkers you will soon discover what anarchists think will “replace” the state: namely the various working class organisations created by the class struggle and revolution. In the words of Kropotkin, the “*elaboration of new social forms can only be the collective work of the masses.*” [Words of a Rebel, p. 175] He stressed that “*[to] make a revolution it is not . . . enough that there should be . . . [popular] risings . . . It is necessary that after the risings there should be something new in the institutions [that make up society], which would permit new forms of life to be elaborated and established.*” [The Great French Revolution, vol. 1, p. 200]

Thus the framework of a free society would be created by the process of the revolution itself. As such, as Kropotkin put it, “*[d]uring a revolution new forms of life will always germinate on the ruins of the old forms . . . It is impossible to legislate for the future. All we can do is vaguely guess its essential tendencies and clear the road for it.*” [Evolution and Environment, pp. 101–2] So while the specific forms these organisations would take cannot be predicted, their general nature can be.

So what is the general nature of these new organisations? Anarchists have consistently argued that the state would be replaced by a free federation of workers’ associations and communes, self-managed and organised from the bottom-up. In Malatesta’s words, anarchy is the “*free organisation from below upwards, from the simple to the complex, through free agreement and the federation of associations of production and consumption.*” In particular, he argued anarchists aim to “*push the workers to take possession of the factories, to federate among themselves and work for the community*” while the peasants “*should take over the land and produced usurped by the landlords, and come to an agreement with the industrial workers.*” [Life and Ideas, p. 147 and p. 165]

This vision of revolution followed Bakunin’s:

“the federative alliance of all working men’s associations . . . [will] constitute the Commune . . . [the] Communal Council [will be] composed of . . . delegates . . . vested with plenary but accountable and removable mandates . . . all provinces, communes and associations . . . by first reorganising on revolutionary lines . . . [will] constitute the federation of insurgent associations, communes and provinces . . . [and] organise a revolutionary force capable defeating reaction . . . [and for] self-defence . . . [The] revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations

... organised from the bottom upwards by means of revolutionary delegation...” [Michael Bakunin: Selected Writings, pp. 170–2]

Similarly, Proudhon argued federations of workers associations and communes to replace the state. While seeing such activity as essentially reformist in nature, he saw the germs of anarchy as being the result of “generating from the bowels of the people, from the depths of labour, a greater authority, a more potent fact, which shall envelop capital and the State and subjugate them” as “it is of no use to change the holders of power or introduce some variation into its workings: an agricultural and industrial combination must be found by means of which power, today the ruler of society, shall become its slave.” [System of Economical Contradictions, p. 399 and p. 398] What, decades later, Proudhon called an “agro-industrial federation” in his **Principle of Federation**.

Kropotkin, unsurprisingly enough, had similar ideas. He saw the revolution as the “expropriation of the whole of social wealth” by the workers, who “will organise the workshops so that they continue production” once “the governments are swept out by the people.” The “coming social revolution” would see “the complete abolition of States, and reorganisation from the simple to the complex through the free federation of the popular forces of producers and consumers,” the “federation of workers’ corporations and groups of consumers.” The “Commune will know that it must break the State and replace it by the Federation” (which is “freely accepted by itself as well as the other communes”). [Words of a Rebel, p. 99, p. 91, p. 92 and p. 83]

Thus “independent Communes for the territorial organisation, and of federations of Trade Unions [i.e. workplace associations] for the organisation of men [and women] in accordance with their different functions, gave a **concrete** conception of society regenerated by a social revolution.” [Peter Kropotkin, **Evolution and Environment**, p. 79]

In his classic history of the French Revolution he pointed to “the popular Commune” as an example of the “something new” required to turn an uprising into a revolution. He argued that “the Revolution began by creating the Commune ... and through this institution it gained ... immense power.” He stressed that it was “by means of the ‘districts’ [of the Communes] that ... the masses, accustoming themselves to act without receiving orders from the national representatives, were practising what was to be described later as Direct Self-Government.” Such a system did not imply isolation, for while “the districts strove to maintain their own independence” they also “sought for unity of action, not in subjection to a Central Committee, but in a federative union.” The Commune “was thus made **from below upward**, by the federation of the district organisations; it spring up in a revolutionary way, from popular initiative.” [The Great French Revolution, vol. 1, p. 200 and p. 203]

During the 1905 and 1917 revolutions, Kropotkin expressed his support for the soviets created by the workers in struggle. He argued that anarchists should “enter the Soviets, but certainly only as far as the Soviets are organs of the struggle against the bourgeoisie and the state, and not organs of authority.” [quoted by Graham Purchase, **Evolution and Revolution**, p. 30] After the 1917 revolution, he re-iterated this point, arguing that “idea of soviets ... of councils of workers and peasants ... controlling the economic and political life of the country is a great idea. All the more so, since it necessarily follows that these councils should be composed of all who take part in the production of natural

wealth by their own efforts.” [Kropotkin’s Revolutionary Pamphlets, p. 254]

Therefore, Fisher’s comments are totally untrue. Anarchists have been pretty clear on this issue from Proudhon onwards (see section I.2.3 for a further discussion of this issue).

4. What did Trotsky and Lenin think must replace the bourgeois state?

Fisher continues his inaccurate attack:

“What we as Marxists explain is what must replace the smashed bourgeois state machine.

“Engels explains that the state is a ‘special coercive force’. So what must come after the bourgeoisie is overthrown to keep it down? As Lenin explains in the State and Revolution: the bourgeois state ‘must be replaced by a “special coercive force” for the suppression of the bourgeois by the proletariat (the dictatorship of the proletariat)’ (pg 397 vol. 25 collected works) that is workers’ democracy.”

There are numerous issues here. Firstly, of course, is the question of how to define the state. Fisher implicitly assumes that anarchists and Marxists share the same definition of what marks a “state.” Secondly, there is the question of whether quoting Lenin’s **State and Revolution** without relating it to Bolshevik practice is very convincing. Thirdly, there is the question of the defence of the revolution. We will discuss the second question here, the first in the next section and the third in section 6.

There is a well-known difference between Lenin’s work **The State and Revolution** and actual Bolshevik practice. In the former, Lenin promised the widest democracy, although he also argued that “[w]e cannot imagine democracy, not even proletarian democracy, without representative institutions.” [“The State and Revolution”, **Essential Works of Lenin**, p. 306] Clearly, he saw “democracy” in the normal, bourgeois, sense of electing a government who will make the decisions for the electors. Indeed, the “*dictatorship of the proletariat*” is described as “*the organisation of the vanguard of the oppressed as the ruling class.*” [Op. Cit., p. 337] This “*vanguard*” is the party:

“By educating the workers’ party, Marxism educates the vanguard of the proletariat which is capable of assuming power and of leading the whole people to Socialism, of directing and organising the new order, of being the teacher, the guide, the leader of all the toiling and exploited in the task of building up their social life without the bourgeoisie and against the bourgeoisie.” [Op. Cit., p. 288]

So the vanguard of the oppressed would become the “*ruling class*”, **not** the oppressed. This means that “*workers’ democracy*” is simply reduced to meaning the majority designates its rulers but does not rule itself. As such, the “workers’ state” is just the same as any other state (see next section).

Thus, before taking power Lenin argued for party power, not workers’ power. The workers can elect representatives who govern on their behalf, but they

do not actually manage society themselves. This is the key contradiction for Bolshevism — it confuses workers' power with party power.

Post-October, the ideas of Lenin and Trotsky changed. If their works are consulted, it is soon discovered what they thought should “replace” the bourgeois state: party dictatorship.

In the words of Lenin (from 1920):

“In the transition to socialism the dictatorship of the proletariat is inevitable, but it is not exercised by an organisation which takes in all industrial workers . . . What happens is that the Party, shall we say, absorbs the vanguard of the proletariat, and this vanguard exercises the dictatorship of the proletariat.” [**Collected Works**, vol. 21, p. 20]

He stressed that this was an inevitable aspect of revolution, applicable in all countries:

“the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts . . . that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard . . . Such is the basic mechanism of the dictatorship of the proletariat, and the essentials of transitions from capitalism to communism . . . for the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation.” [**Op. Cit.**, vol. 32, p. 21]

Trotsky agreed with this lesson and argued it to the end of his life:

“The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history. . . The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution . . . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the ‘dictatorship’ of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses.” [**Writings 1936–37**, pp. 513–4]

Lenin and Trotsky are clearly explaining the need for party dictatorship over the working class. This was seen as a **general** lesson of the Russian Revolution. How many Marxists “explain” this to anarchists?

Clearly, then, Fisher is not being totally honest when he argues that Trotskyism is based on “workers’ democracy.” Lenin, for example, argued that “*Marxism teaches — and this tenet has not only been formally endorsed by the whole of the Communist International in the decisions of the second Congress . . . but has also been confirmed in practice by our revolution — that only the political party of the working class, i.e. the Communist Party, is capable of uniting, training and organising a vanguard of the proletariat and of the whole working people that alone will be capable of withstanding the inevitable petty-bourgeois vacillations of this mass.*” [Op. Cit., vol. 32, p. 246]

Lenin is, of course, rejecting what democracy is all about, namely the right and duty of representative bodies to carry out the wishes of the electors (i.e. their “vacillations”). Instead of workers’ democracy, he is clearly arguing for the right of the party to ignore it and impose its own wishes on the working class.

Trotsky argued along the same lines (again in 1921):

“They [the dissent Bolsheviks of the Workers’ Opposition] have placed the workers’ right to elect representatives above the Party. As if the Party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the worker’s democracy!”

He spoke of the “*revolutionary historic birthright of the Party*” and that it “*is obliged to maintain its dictatorship . . . regardless of temporary vacillations even in the working class . . . The dictatorship does not base itself at every given moment on the formal principle of a workers’ democracy.*” [quoted by M. Brinton, **The Bolsheviks and Workers’ Control**, p. 78]

Needless to say, they did not explain how these lessons and arguments are compatible with Lenin’s **State and Revolution** where he had argued that “[a]ll officials, without exception,” must be “*elected and subject to recall at any time.*” [The **Essential Lenin**, p. 302] If they **are** subject to election and recall at any time, then they will reflect the “*passing moods*” (the “*vacillations*”) of the workers’ democracy. Therefore, to combat this, soviet democracy must be replaced by party dictatorship and neither Lenin nor Trotsky were shy in both applying and arguing this position.

It is a shame, then, for Fisher’s argument that both Lenin and Trotsky also explained why party dictatorship was more important than workers’ democracy. It is doubly harmful for his argument as both argued that this “lesson” was of a **general** nature and applicable for all revolutions.

It is also a shame for Fisher’s argument that the Leninists, once in power, overthrew every soviet that was elected with a non-Bolshevik majority (see section 6 of the appendix on “What happened during the Russian Revolution?”). They also repressed those who demanded real workers’ democracy (as, for example, in Kronstadt in 1921 — see the appendix on “What was the Kronstadt Rebellion?” — or during the numerous strikes under Lenin’s rule — see sections 3 and 5 of the appendix on “What caused the degeneration of the Russian Revolution?”).

Clearly, Fisher’s account of Trotskyism, like his account of anarchism, leaves a lot to be desired.

5. Is the “proletarian ‘state’” really a new kind of state?

Fisher, after keeping his readers ignorant of Lenin and Trotsky **real** position on workers’ democracy, argues that:

“The proletariat ‘state’ is no longer a state in the proper sense of the word, Lenin explains, because it is no longer the minority suppressing the majority, but the vast majority suppressing a tiny minority! The Proletariat suppressing the Bourgeoisie.”

If it is not a state “*in the proper sense of the word*” then why use the term state at all? Marxists argue because its function remains the same — namely the suppression of one class by another. However, every state that has ever existed has been the organ by which a **minority** ruling class suppresses the majority. As such, the Marxist definition is a-historic in the extreme and extracts a metaphysical essence of the state rather than producing a definition based on empirical evidence.

In order to show the fallacy of Fisher’s argument, it is necessary to explain what anarchists think the state is.

The assumption underlying Fisher’s argument is that anarchists and Marxists share identical definitions of what a state is. This is not true. Marxists, as Fisher notes, think of a state as simply as an instrument of class rule and so concentrate solely on this function. Anarchists disagree. While we agree that the main function of the state is to defend class society, we also stress the structure of the state has evolved to ensure that role. In the words of Rudolf Rocker:

“[S]ocial institutions . . . do not arise arbitrarily, but are called into being by special needs to serve definite purposes . . . The newly arisen possessing classes had need of a political instrument of power to maintain their economic and social privileges over the masses of their own people . . . Thus arose the appropriate social conditions for the evolution of the modern state, as the organ of political power of privileged castes and classes for the forcible subjugation and oppression of the non-possessing classes . . . Its external forms have altered in the course of its historical development, but its functions have always been the same . . . And just as the functions of the bodily organs of . . . animals cannot be arbitrarily altered, so that, for example, one cannot at will hear with his eyes and see with his ears, so also one cannot at pleasure transform an organ of social oppression into an instrument for the liberation of the oppressed. The state can only be what it is: the defender of mass-exploitation and social privileges, and creator of privileged classes.” [Anarcho-Syndicalism, p. 20]

This means that the structure of the state has evolved to ensure its function. Organ and role are interwoven. Keep one and the other will develop. And what is the structure (or organ) of the state? For anarchists, the state means “*the sum total of the political, legislative, judiciary, military and financial institutions through which the management of their own affairs . . . are taken away from the*

people and entrusted to others who ... are vested with the powers to make the laws for everything and everybody, and to oblige the people to observe them, if need be, by the use of collective force." In summary, it "means the delegation of power, that is the abdication of initiative and sovereignty of all into the hands of a few." [**Anarchy**, p. 13 and p. 40]

This structure has not evolved by chance. It is required by its function as the defender of minority class power. As Kropotkin stressed, the bourgeois needed the state:

"To attack the central power, to strip it of its prerogatives, to decentralise, to dissolve authority, would have been to abandon to the people the control of its affairs, to run the risk of a truly popular revolution. That is why the bourgeoisie sought to reinforce the central government even more. . ." [Kropotkin, **Words of a Rebel**, p. 143]

This means that to use the structure of the state (i.e. centralised, hierarchical power in the hands of a few) would soon mean the creation of a new minority class of rulers as the state "could not survive without creating about it a new privileged class." [Malatesta, **Anarchy**, p. 35]

Therefore, for a given social organisation to be a state it must be based on delegated **power**. A state is marked by the centralisation of power into a few hands at the top of the structure, in other words, it is hierarchical in nature. This is, of course, essential for a minority class to remain control over it. Thus a social system which places power at the base, into the hands of the masses, is not a state as anarchists understand it. As Bakunin argued, "[w]here all rule, there are no more ruled, and there is no State." [**The Political Philosophy of Bakunin**, p. 223] Therefore, real workers democracy — i.e. self-management — existed, then the state would no longer exist.

The question now arises, does the Marxist "workers' state" meet this definition? As indicated in section 4, the answer is a clear yes. In **The State and Revolution**, Lenin argued that the workers' state would be based on representative democracy. This meant, according to Bakunin, that political power would be "exercised by proxy, which means entrusting it to a group of men elected to represent and govern them, which in turn will unfailingly return them to all the deceit and subservience of representative or bourgeois rule." [**Michael Bakunin: Selected Writings**, p. 255]

Rather than "the vast majority suppressing a tiny minority" we have a tiny minority, elected by the majority, suppressing those who disagree with what the government decrees, including those within the class which the state claims to represent. In the words of Lenin:

"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves." [**Collected Works**, vol. 24, p. 170]

And who exercises this "revolutionary coercion"? The majority? No, the vanguard. As Lenin argued, "the correct understanding of a Communist of

his tasks” lies in “correctly gauging the conditions and the moment when the vanguard of the proletariat can successfully seize power, when it will be able during and after this seizure of power to obtain support from sufficiently broad strata of the working class and of the non-proletarian toiling masses, and when, thereafter, it will be able to maintain, consolidate, and extend its rule, educating, training and attracting ever broader masses of the toilers.” He stressed that “to go so far . . . as to draw a contrast in general between the dictatorship of the masses and the dictatorship of the leaders, is ridiculously absurd and stupid.” [Left-Wing Communism: An Infantile Disorder, p. 35, p. 27]

In other words, for Lenin, if the leaders exercised their dictatorship, then so did the masses. Such a position is pure and utter nonsense. If the party leaders govern, then the masses do not. And so the “workers’ state” is a state in the normal sense of the word, with the “minority suppressing the majority.” This was made clear by Trotsky in 1939:

“The very same masses are at different times inspired by different moods and objectives. It is just for this reason that a centralised organisation of the vanguard is indispensable. Only a party, wielding the authority it has won, is capable of overcoming the vacillation of the masses themselves.” [The Moralists and Sycophants, p. 59]

Thus the party (a minority) holds power and uses that power against the masses themselves. Little wonder, given that, once in power, the Bolsheviks quickly forgot their arguments in favour of representative democracy and argued for party dictatorship (see section 4).

Such a transformation of representative democracy into minority class rule was predicted by anarchists:

“[I]t is not true that once the social conditions are changed the nature and role of government would change. Organ and function are inseparable terms. Take away from an organ its function and either the organ dies or the function is re-established . . . A government, that is a group of people entrusted with making laws and empowered to use the collective power to oblige each individual to obey them, is already a privileged class cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put into a privileged position, the government is already at odds with the people whose strength it disposes of.” [Malatesta, Anarchy, pp. 33–4]

Which, of course, is what happened in Russia. As we indicated in section 4, both Lenin and Trotsky defended the imposition of party rule, its need to be beyond public control, by the necessities generated by the revolution (the “vacillations” within the masses meant that democracy, public control, had to be eliminated in favour of party dictatorship).

Therefore, from an anarchist perspective, the so-called “workers’ state” is still a state in “the proper sense of the word” as it is based on centralised, top-down power. It is based on the tiny minority (the party leaders) governing everyone else and suppressing anyone who disagreed with them — the vast majority.

If the vast majority did have real power then the state would not exist. As the “proletarian” state is based on delegated power, it is still a state and, as such, an instrument of minority class rule. In this case, the minority is the party leaders who will use their new powers to consolidate their position over the masses (while claiming that their rule equals that of the masses).

6. Do anarchists “*hope the capitalists do not make any attempts of counterrevolution*”?

Fisher continues his inventions:

“Instead of organising an instrument for the coercion of the bourgeois by the proletariat, the Anarchists wish to simply abolish the state overnight and hope that the capitalists do not make any attempts of counterrevolution, an absurd and unrealistic idea.”

Yes, it would be, if anarchists actually believed that. Sadly for Fisher, we do not and have stated so on many, many, many occasions. Indeed, to make an assertion like this is to show either a total ignorance of anarchist theory or a desire to deceive.

So do anarchists “*hope that the capitalists do not make any attempts of counterrevolution*”? Of course not. We have long argued that a revolution would need to defend itself. In the words of Malatesta:

“But, by all means, let us admit that the governments of the still unemancipated countries were to want to, and could, attempt to reduce free people to a state of slavery once again. Would this people require a government to defend itself? To wage war men are needed who have all the necessary geographical and mechanical knowledge, and above all large masses of the population willing to go and fight. A government can neither increase the abilities of the former nor the will and courage of the latter. And the experience of history teaches us that a people who really want to defend their own country are invincible: and in Italy everyone knows that before the corps of volunteers (anarchist formations) thrones topple, and regular armies composed of conscripts or mercenaries disappear. . . [Some people] seem almost to believe that after having brought down government and private property we would allow both to be quietly built up again, because of a respect for the freedom of those who might feel the need to be rulers and property owners. A truly curious way of interpreting our ideas!” [**Anarchy**, pp. 40–1]

Elsewhere he argued that a revolution would “*reorganise things in such a way that it will be impossible for bourgeois society to be reconstituted. And all this, and whatever else would be required to satisfy public needs and the development of the revolution would be the task of . . . al kinds of committees, local, inter-communal, regional and national congresses which would attend to the co-ordination of social activity . . . The creation of voluntary militia . . . to deal with any armed attacks by the forces of reaction to re-establish themselves,*

or to resist outside intervention by countries as yet not in a state of revolution.” [Life and Ideas, pp. 165–6]

He was not alone in this position. Every revolutionary anarchist argued along these lines. Bakunin, for example, clearly saw the need to defend a revolution:

“Commune will be organised by the standing federation of the Bar-ricades. . . [T]he federation of insurgent associations, communes and provinces . . . [would] organise a revolutionary force capable of defeating reaction . . . it is the very fact of the expansion and organisation of the revolution for the purpose of self-defence among the insurgent areas that will bring about the triumph of the revolution.” [Michael Bakunin: Selected Writings, pp. 170–1]

And:

*“[L]et us suppose . . . it is Paris that starts [the revolution] . . . Paris will naturally make haste to organise itself as best it can, in revolutionary style, after the workers have joined into associations and made a clean sweep of all the instruments of labour, every kind of capital and building; armed and organised by streets and **quartiers**, they will form the revolutionary federation of all the **quartiers**, the federative commune. . . All the French and foreign revolutionary communes will then send representatives to organise the necessary common services . . . and to organise common defence against the enemies of the Revolution.”* [Op. Cit., p. 178–9]

He stressed the need to organise and co-ordinate the defence of the revolution by armed workers:

“Immediately after established government has been overthrown, communes will have to reorganise themselves along revolutionary lines . . . In order to defend the revolution, their volunteers will at the same time form a communal militia. But no commune can defend itself in isolation. So it will be necessary for each of them to radiate outwards, to raise all its neighbouring communes in revolt . . . and to federate with them for common defence.” [No Gods, No Masters, vol. 1, p. 142]

Similarly, the Spanish anarcho-syndicalist CNT union recognised the need for defending a revolution in its 1936 resolution on Libertarian Communism:

“We acknowledge the necessity to defend the advances made through the revolution . . . So . . . the necessary steps will be taken to defend the new regime, whether against the perils of a foreign capitalist invasion . . . or against counter-revolution at home. It must be remembered that a standing army constitutes the greatest danger for the revolution, since its influence could lead to dictatorship, which would necessarily kill off the revolution. . .

“The people armed will be the best assurance against any attempt to restore the system destroyed from either within or without. . .

“Let each Commune have its weapons and means of defence . . . the people will mobilise rapidly to stand up to the enemy, returning to their workplaces as soon as they may have accomplished their mission of defence. . .

“1. The disarming of capitalism implies the surrender of weaponry to the communes which be responsible for ensuring defensive means are effectively organised nationwide.

“2. In the international context, we shall have to mount an intensive propaganda drive among the proletariat of every country so that it may take an energetic protest, calling for sympathetic action against any attempted invasion by its respective government. At the same time, our Iberian Confederation of Autonomous Libertarian Communes will render material and moral assistance to all the world’s exploited so that these may free themselves forever from the monstrous control of capitalism and the State.” [quoted by Jose Peirats, **The CNT in the Spanish Revolution**, vol. 1, p. 110]

If it was simply a question of consolidating a revolution and its self-defence then there would be no argument. Rather the question is one of power — will power be centralised, held by a handful of leaders and exercised from the top downwards or will it be decentralised and society run from the bottom-up by working people themselves?

Fisher distorts the real issue and instead invents a straw man which has no bearing at all on the real anarchist position (for further discussion, see sections I.5.14 and J.7.6).

7. Are Anarchists simply “*potential Marxists*”?

After creating the straw man argument that anarchists have not thought about counter-revolution, Fisher asserts:

“The majority of our ‘Anarchist’ friends never thought about this little loop hole, and as for the rest of them they shrug it off, or say something to the effect of the armed proletariat themselves will stop capitalist reaction, which, an armed proletariat in reality, is a proletarian ‘state’! In conclusion our ‘Anarchists’ are simply potential Marxists who need access to genuinely revolutionary ideas.”

Of course, anarchists have thought about this and have come up with, as Fisher puts it, “*the armed proletariat.*” Indeed, anarchists have held this position since the days of Bakunin, as we proved in the last section.

Moreover, from an anarchist perspective, an “armed proletariat” is not a “state” as there is not minority of rulers telling the proletariat what to do (see section 5). The “proletariat” state of Lenin was a real state simply because it was the Bolshevik party leaders who were telling the armed forces of the state what to do and who to repress (including striking workers, anarchists and rebelling peasants). These forces, we must note, were organised from the top-down, with the government appointing officers. It was an “armed proletariat” only in the same sense that the bourgeois army is an “armed proletariat” (i.e.

working class people made by the rank and file, fought the battles and followed the orders decided upon by a handful of people at the top).

So, if defence of a revolution by the armed proletariat makes you a Marxist then Bakunin, Malatesta, Kropotkin, Goldman, Berkman, Makhno and Durruti were all “Marxists”! As is every revolutionary anarchist. Needless to say, this is impossible and, as such, Fisher’s “little loop hole” in anarchism does not exist.

Clearly, Fisher has no understanding of anarchist thought and prefers invention rather than research.

Our Trotskyist then states that:

“It is our job, as Marxists to explain these ideas to them!”

In other words, the Marxist job is to explain anarchist ideas to anarchists and call them Marxism. How impressive!

8. Is Marxism scientific?

Fisher finishes by arguing that:

“As Lenin states, ‘the ideas of Marx are all powerful, because they are true’! We have the science of dialectics on our side, not idealism, mysticism or theology. Our philosophy is solid as a rock.”

Firstly, dialectics is not a science. Secondly, quoting Lenin on the wonders of Marxism is like quoting the Pope on the joys of Catholicism. Thirdly, the only rocks around are in the heads of Trotskyists if they really think this nonsense about anarchism.

Simply put, a science involves investigating the facts of what is being investigated and generating theories based on those facts. Clearly, our Trotskyist has not bothered to discover the facts about anarchism. He has made numerous assertions about anarchism which are contradicted by the works of anarchism. He has, as such, ignored the fundamental nature of science and has, instead, embraced the approach of the fiction writer.

As such, if Fisher’s article is an example of the “science” of Marxism then we can safely state that Marxism is not a science. Rather it is based on invention and slander.

9. What does the Russian Revolution tell us about Trotskyism?

Our Trotskyist decides to quote another Trotskyist, Ted Grant, on the dangers of anarchism:

“However, the setting up of soviets and strike committees — important as it is — does not solve the fundamental problem facing the Russian workers. In and of themselves, soviets solve nothing. What is decisive is the party that leads them. In February 1917, the workers and soldiers set up soviets — a step of enormous importance to the revolution. But in the hands of the Mensheviks and SRs

they were reduced to impotence... In Germany in November 1918, the soviets were in the hands of the Social Democratic leaders who betrayed the revolution and handed power back to the bourgeoisie. Under these conditions the soviets soon dissolved, and were merely transient phenomena. The same would have happened in Russia, if it had not been for the Bolshevik Party and the leadership of Lenin and Trotsky."

Grant is, of course, just paraphrasing Trotsky in his analysis. Moreover, like Trotsky's, his comments indicate the fundamentally dictatorial nature of Trotskyism.

Simply put, if the "leadership" of the party is the key to soviet power, then if the workers' reject that leadership via soviet elections then the Trotskyist is on the horns of a dilemma. Without party "leadership" then the soviets will be "reduced to impotence" and be "merely transient phenomena." To maintain this party "leadership" (and ensure the soviet power) then the democratic nature of the soviets must be undermined. Therefore the Trotskyist is in the ironic situation of thinking that soviet democracy will undermine soviet power.

This dilemma was solved, in practice, by Trotsky during the Russian Revolution — he simply placed party "leadership" above soviet democracy. In other words, he maintained soviet power by turning the soviets into "nothing." He argued this position numerous times in his life, when he was in power and after he had been expelled from Russia by Stalin.

In 1920, we find Trotsky's thoughts on this subject in his infamous work **Terrorism and Communism**. In this work he defended the fact of Communist Party dictatorship:

"We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of our party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the clarity of its theoretical vision and its strong revolutionary organisation that the party has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this 'substitution' of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class. It is quite natural that, in the period in which history brings up those interests, in all their magnitude, on to the order of the day, the Communists have become the recognised representatives of the working class as a whole."

Needless to say, this is incredulous. How can the replacement of soviet power by party power mean the "supremacy of labour"? It means the supremacy of the Bolshevik party, not "labour." The transformation of the soviets from genuine democratic organs of working class self-government ("shapeless parliaments of labour") into an instrument of Bolshevik party rule ("the apparatus of the supremacy of labour") cannot be seen as a victory of democracy, quite the reverse. The dictatorship of the Bolshevik party marginalised the soviets just as

much as the events of the German Revolution. The only difference is that under the Bolsheviks they maintained a symbolic existence.

Therefore, rather than the “leadership” of the Bolshevik party ensuring soviet rule it meant, in practice, party dictatorship. The soviets played no role in the decision making process as power rested firmly in the hands of the party.

This position was repeated in 1937, in his essay “*Bolshevism and Stalinism*.” There he argued that a “*revolutionary party, even having seized power . . . is still by no means the sovereign ruler of society*.” He stressed that “*the proletariat can take power only through its vanguard*” and that “[t]hose who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.” [Trotsky, **Stalinism and Bolshevism**]

Therefore, we have the same position. Without party dictatorship, the soviets would fall back into the “*mud of reformism*.” He argued that the “*fact that this party subordinates the Soviets politically to its leaders has in itself abolished the Soviet system no more than the domination of the conservative majority has abolished the British parliamentary system*.” [Op. Cit.] This analogy is flawed for two reasons.

Firstly, the parliamentary system is based on a division between executive and legislative functions. Lenin argued that the soviet system would, like the Paris Commune, abolish this division and so ensure “*the conversion of the representative institutions from mere ‘talking shops’ into working bodies*.” [The **Essential Lenin**, p. 304] If the decisions being made by the Soviets have been decided upon by the leaders of the Bolshevik party then the soviets represent those leaders, not the people who elected them. As in the bourgeois system, the representatives of the people govern them rather than express the wishes of the majority. As such, the idea that the Soviets are organs of working class self-government **has** been abolished. Instead, they are mere “talking shops” with power resting in the hands of the party leadership.

Secondly, when elections take place parliamentary system it is generally recognised that the majority of representatives can become the government. The system is therefore based on the assumption that the government is accountable to parliament, not parliament to the government. This means that the “domination” of the majority within Parliament is an expression of parliamentary democracy. The majority party does not maintain that only its existence in power ensures that parliamentary democracy can continue, therefore necessitating the suppression of elections. However, that is the position of Trotsky (and of Lenin) and, let us not forget, the actual actions of the Bolsheviks.

That this is the logical conclusion of Trotsky’s position can be seen when he discusses the Kronstadt rebellion of March 1921 (see the appendix on “What was the Kronstadt Rebellion?”). In 1938, he argued that the “*Kronstadt slogan*” was “*soviets without Communists*.” [Lenin and Trotsky, **Kronstadt**, p. 90] This, of course, is factually incorrect. The Kronstadt slogan was “*all power to the soviets but not to the parties*” (or “*free soviets*”). From this incorrect assertion, Trotsky argued as follows:

“to free the soviets from the leadership [!] of the Bolsheviks would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik

and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve as a bridge from the proletarian dictatorship. They could play no other role, regardless of the 'ideas' of their participants. The Kronstadt uprising thus had a counterrevolutionary character.” [Op. Cit., p. 90]

Interesting logic. Let us assume that the result of free elections would have been the end of Bolshevik “leadership” (i.e. dictatorship), as seems likely. What Trotsky is arguing is that to allow workers to vote for their representatives would “*only serve as a bridge from the proletarian dictatorship*”!

This argument was made (in 1938) as a **general point** and is **not** phrased in terms of the problems facing the Russian Revolution in 1921. In other words Trotsky is clearly arguing for the dictatorship of the party and contrasting it to soviet democracy. As he put it elsewhere, the “*revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution.*” [Writings 1936–7, pp. 513–4] So much for “All Power to the Soviets” or “workers’ power”!

Clearly, Grant’s and Trotsky’s arguments contain a deeply undemocratic core. The logic of their position — namely that party rule is essential to ensure soviet rule — in practice means that soviet rule is replaced by party dictatorship. To include the masses into the decision making process by soviet democracy means loosening the tight political control of the party on the soviets and allowing the possibility that opposition forces may win in the soviets. However, if that happens then it means the end of soviet power as that is only possible by means of party “leadership.” This, in turn, necessitates party dictatorship to maintain “soviet power”, as Trotsky and Lenin admitted and implemented.

Simply put, Grant’s argument shows the dangers of Trotskyism, not of anarchism.

10. Do anarchists reject “leadership”?

Grant continues by asserting the need for leaders:

“Some say that such a party is not necessary, that the workers do not need a party, that it leads to bureaucracy, and so on. That is a fatal error. The whole history of the international workers’ movement shows the absolute need for a revolutionary party. Anarchism is an expression of impotence, which can offer no way out. Of course, the reason why some honest workers and young people turn towards anarchism is because of their revulsion against Stalinism and the bureaucratic and class collaborationist policies of the existing leaderships, both on the political and trade union field. This is understandable, but profoundly mistaken. The answer to a bad leadership is not no leadership, but to create a leadership that is worthy of the workers’ cause. To refuse to do this, to abstain from the political struggle . . . amounts to handing over the workers to the existing leaders without a struggle. In order to combat the policy of class

collaboration, it is necessary to pose an alternative in the form of a revolutionary policy, and therefore also a revolutionary tendency."

There are so many fallacies in this argument it is hard to know where to start.

Firstly, we should note that anarchists do not deny the need for "leaders" nor for the need for revolutionaries to organise together to influence the class struggle. To claim so indicates a failure to present the anarchist case honestly.

In the words of Kropotkin:

"The idea of anarchist communism, today represented by . . . minorities, but increasingly finding popular expression, will make its way among the mass of the people. Spreading everywhere, the anarchist groups . . . will take strength from the support they find among the people."
[**Words of a Rebel**, p. 75]

Bakunin considered it essential that revolutionaries organise and influence the masses. As he put it, "*the chief aim and purpose of this organisation*" is to "*help the people towards self-determination on the lines of the most complete equality.*" [Michael Bakunin: **Selected Writings**, p. 191]

Therefore, to claim that anarchists deny the need for political organisation and "leaders" is a misrepresentation. As we argue in more depth in section J.3, this is not the case. However, we must stress that anarchists do not seek positions of power ("leadership") in organisations. Rather, they aim to influence by the power of our ideas, "*through the natural, personal influence of its members, who have not the slightest power.*" [Bakunin, **Op. Cit.**, p. 193] This is because "leadership" positions in hierarchical organisations are a source of corruption, which is the second major fallacy in Grant's argument.

While acknowledging that the existing leadership of working class organisations and unions are "*bureaucratic and class collaborationist,*" he does not indicate why this is so. He argued that we need a "new" leadership, with the correct ideas, to replace the current ones. However, the "*policy of class collaboration*" within these leaderships did not develop by chance. Rather they are a product of both the tactics (such as electioneering, in the case of political parties) and structures used in these organisations.

Looking at structures, we can clearly see that hierarchy is key. By having leadership positions separate from the mass of workers (i.e. having hierarchical structures), an inevitable division develops between the leaders and the rank and file. The "leaders" are insulated from the life, interests and needs of the membership. Their views adjust to their position, not vice versa, and so "leadership" becomes institutionalised and quickly becomes bureaucratic. As Bakunin argued, the only way to avoid bureaucracy is to empower the rank and file.

Taking the Geneva section of the IWMA, Bakunin noted that the construction workers' section "*simply left all decision-making to their committees . . . In this manner power gravitated to the committees, and by a species of fiction characteristic of all governments the committees substituted their own will and their own ideas for that of the membership.*" [Bakunin on Anarchism, p. 246] To combat this bureaucracy, "*the construction workers . . . sections could only defend their rights and their autonomy in only one way: the workers called general membership meetings. Nothing arouses the antipathy of the committees*

more than these popular assemblies. . . In these great meetings of the sections, the items on the agenda was amply discussed and the most progressive opinion prevailed. . .” [Op. Cit., p. 247]

This did not mean the end of organisations and committees, but rather a change in power. Any committees would be made up of “*delegates who conscientiously fulfilled all their obligations to their respective sections as stipulated in the statutes,*” “*reporting regularly to the membership the proposals made and how they voted*” and “*asking for further instructions (plus instant recall of unsatisfactory delegates).*” [Ibid.] Power would be in the hands of the rank and file, not the committees.

It is in this context that anarchists try and give a lead. Anarchist organisation “*rules out any idea of dictatorship and of a controlling and directive power*” and it “*will promote the Revolution only through the **natural but never official influence** of all members of the Alliance.*” [Op. Cit., p. 154 and p. 387] This influence would be exerted in the basic assemblies of the organisation, which would retain the power to decide their own fates: “*In such a system, power, properly speaking, no longer exists. Power is diffused to the collectivity and becomes the true expression of the liberty of everyone, the faithful and sincere realisation of the will of all.*” [Op. Cit., p. 415]

Only in this way can the bad effects of having institutionalised “leadership” positions be avoided. Instead of ignoring “bad” leadership, anarchists encourage workers to rely on their own initiative and power. They do not “refuse” to combat bureaucratic leaderships, rather they combat them from below by ensuring that workers manage their own affairs directly. As such, anarchists are well aware of the need “*to pose an alternative in the form of a revolutionary policy, and therefore also a revolutionary tendency.*”

As Malatesta argued, we “*do not want to **emancipate** the people; we want the people to **emancipate themselves.***” Thus anarchists “*advocate and practise direct action, decentralisation, autonomy and individual initiative; they should make special efforts to help members [of popular organisations] learn to participate directly in the life of the organisation and to dispense with leaders and full-time functionaries.*” However, “[w]e must not wait to achieve anarchy, in the meantime limiting ourselves to simple propaganda . . . We must seek to get all people . . . to make demands, and impose itself and take for itself all the improvements and freedoms that it desires as and when it reaches the state of wanting them, and the power to demand them: and in always propagating all aspects of our programme, and always struggling for its complete realisation, we must push people to want always more and to increase its pressures, until it has reached complete emancipation.” [Life and Ideas, p. 90, p. 125 and p. 189]

He, like all anarchists, stressed there were different kinds of “leadership”:

“It is possible to direct [“lead”] through advice and example, leaving the people — provided with the opportunities and means of supplying their own needs themselves — to adopt our methods and solutions if these are, or seem to be, better than those suggested and carried out by others. But it is also possible to direct by taking over command, that is by becoming a government and imposing one’s own ideas and interests through police methods.” [The Anarchist Revolution, p. 108]

Unsurprisingly, anarchists favour the first way of “leading” people and utterly reject the second.

Clearly, then, anarchists do not reject being “leaders” in the sense of arguing our ideas and combating the influence and power of bureaucratic leaderships. However, this “lead” is based on the influence of our ideas and, as such, is a non-hierarchical relationship between anarchist activists and other workers. Thus Grant’s argument is a straw man.

Finally, his comment that “*whole history of the international workers’ movement shows the absolute need for a revolutionary party*” is simply false. Every example of a “revolutionary party” has been a failure. They have never created a socialist society which, let us not forget, was their aim. The first “revolutionary” party was Social Democracy. That quickly became reformist and, in Germany, crushed the revolution that broke out there after the end of the First World War.

The Bolshevik party was no better. It soon transformed itself for being the masses servant to being its master (see section 4). It justified its repression against the working class in terms of its “vanguard” position. When it degenerated into Stalinism, Communist Parties across the world followed it — no matter how insane its policies became.

This is unsurprising. As the anarchists of Trotwatch explain, such a “revolutionary” party leaves much to be desired:

“In reality, a Leninist Party simply reproduces and institutionalises existing capitalist power relations inside a supposedly ‘revolutionary’ organisation: between leaders and led; order givers and order takers; between specialists and the acquiescent and largely powerless party workers. And that elitist power relation is extended to include the relationship between the party and class.” [Carry on Recruiting!, p. 41]

Therefore, while anarchists stress the need to organise as anarchists (i.e. into political associations) they reject the need for a “revolutionary party” in the Marxist or Leninist mold. Rather than seeking power on behalf of the masses, anarchist groups work within the mass organisations of the working class and urge them to take and exercise power directly, without governments and without hierarchy. We seek to win people over to our ideas and, as such, we work with others as equals using debate and discussion to influence the class struggle (see section J.3.6 for fuller details and a discussion of how this differs from the Trotskyist position).

Therefore, Grant’s whole argument is flawed. Anarchists do not reject “leadership,” they reject hierarchical leadership. We clearly see the need to organise politically to influence the class struggle but do so as equals, by the strength of our ideas. We do not seek to create or seize positions of “leadership” (i.e. power) but rather seek to ensure that the masses manage their own affairs and are influenced by political tendencies only in-so-far as they can be convinced of the validity of the politics and ideas of those tendencies.

11. Does the Spanish Revolution show anarchism is flawed?

As usual, Grant brings up the question of the Spanish Revolution:

“The anarchist workers of the CNT played a heroic role in the struggle against fascism. In July 1936, they rose up and stormed the barracks armed with just sticks and knives and a few old hunting rifles, and beat the fascists. They set up soviets and established a workers’ militia and workers’ control in the factories. The CNT and the POUM (a centrist party led by ex-Trotskyists) were the only power in Barcelona. Soon the whole of Catalonia was in the hands of the workers. The bourgeois President of Catalonia, LLuis Companys, actually invited the CNT to take power! But the anarchist leaders refused to take power, and the opportunity was lost.”

Needless to say, this summary leaves much to be desired.

Firstly, there are the factual errors. The offer to the CNT from Companys occurred on July 20th, immediately after the uprising had been defeated in Barcelona. The situation in the rest of Catalonia, never mind Spain, was unknown. This fact is essential to understanding the decisions made by the CNT. Faced with a military coup across the whole of Spain intent on introducing fascism, the outcome of which was unknown, the CNT in Barcelona was in a difficult situation. If it tried to implement libertarian communism then it would have had to fight both the fascist army and the Republican state. Faced with this possibility, the CNT leaders decided to ignore their politics and collaborate with other anti-fascists within the bourgeois state. Needless to say, to fail to indicate the rationale for the CNT’s decision and the circumstances it was made in means to misinform the reader. This does not mean the CNT’s decision was correct, it is just to indicate the extremely difficult circumstances in which it was made.

Secondly, Grant lets the cat out of the bag by admitted that he sees the Spanish Revolution in terms of the anarchist “leaders” taking power. In this he followed Trotsky, who had argued that:

“A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society.”
[“**Stalinism and Bolshevism**”]

Clearly, rather than the masses taking power, Trotskyism sees the party (the leaders) having the real power in society. Trotsky stressed this fact elsewhere when he argued that “[b]ecause the leaders of the CNT renounced dictatorship for themselves they left the place open for the Stalinist dictatorship.” [Writings 1936–7, p. 514]

The “anarchist leaders” quite rightly rejected this position, but they also rejected the anarchist one as well. Let us not forget that the anarchist position is the destruction of the state by means of federations of workers associations (see section 3). The CNT refused to do this. Which, of course, means that Grant is attacking anarchist theory in spite of the fact that the CNT **ignored** that theory!

As we have discussed this issue in depth elsewhere (namely sections I.8.10, I.8.11 and section 20 of the appendix “*Marxists and Spanish Anarchism*”) we will leave our discussion of the Spanish Revolution to this short summary.

12. Does anarchism believe in spontaneous revolution?

Grant now asserts another erroneous position to anarchism, namely the believe that anarchists believe in spontaneous revolution. He presents the case of the Albanian revolution:

“However, the most crushing answer to anarchism is the fate of the Albanian revolution. The Albanian masses, as the result of the nightmare brought about by the collapse of so-called market reform . . . rose up in a spontaneous insurrection. With no organisation, no leadership, and no conscious plan, they stormed the barracks with their bare hands. The army fraternised . . . opened the gates of the barracks and distributed arms. Revolutionary committees were established, especially in the South, and the armed militias spread the revolt from one town to the next. The forces of reaction sent by Berisha were routed by the armed people. There was nothing to stop them from entering Tirana . . . But here the importance of leadership becomes clear. Lacking a revolutionary leadership with the perspective of taking power and transforming society, the insurrectionists failed to take Tirana.”

Needless to say, the argument for “*a revolutionary leadership*” with “*the perspective of taking power*” is hard to combine with his later argument that “*the Russian workers, basing themselves on their own strength and organisation, [must] take power into their own hands.*” As Grant has argued throughout this excerpt, the idea that the workers should take power themselves is utopian as a Bolshevik style leadership is required to seize power. As Trotsky and Lenin made clear, the working class as a whole cannot exercise the “proletariat dictatorship” — only party dictatorship can ensure the transition from capitalism to communism. In summary, Grant is simply using the old Bolshevik technique of confusing the party with the proletariat.

However, this is besides the point. Grant asserts that anarchists think a revolution can occur spontaneously, without the need for anarchists to organise as anarchists and argue their politics. Needless to say, anarchists do not hold such a position and never have. If we did then anarchists would not write books, pamphlets and leaflets, they would not produce papers and take part in struggles and they would not organise anarchist groups and federations. As we do all that, clearly we do not think that an anarchist society will come about without us trying to create it. As such, Grant’s comments misrepresent the anarchist position.

This can be seen from Bakunin, who argued that the 1848 revolutions failed “*for a quite a simple reason: it was rich in instinct and in negative theoretical ideas . . . but it was still totally devoid of the positive and practical ideas which would have been necessary to build a new system . . . on the ruins of the bourgeois*

world. The workers who fought for the emancipation of the people in June were united by instinct, not ideas . . . This was the principal cause of their defeat.” [Michael Bakunin: Selected Writings, p. 104]

Given that “instinct as a weapon is not sufficient to safeguard the proletariat against the reactionary machinations of the privileged classes,” instinct “left to itself, and inasmuch as it has not been transformed into consciously reflected, clearly determined thought, lends itself easily to falsification, distortion and deceit.” [The Political Philosophy of Bakunin, p. 215] Therefore, the “goal, then, is to make the worker fully aware of what he [or she] wants, to unjam within him [or her] a steam of thought corresponding to his [or her] instinct.” This is done by “a single path, that of **emancipation through practical action**,” by “workers’ solidarity in their struggle against the bosses,” of “collective struggle of the workers against the bosses.” This would be complemented by socialist organisations “propagandis[ing] its principles.” [The Basic Bakunin, p. 102, p. 103 and p. 109]

Hence the need for anarchists to organise as anarchists:

“The Alliance [Bakunin’s anarchist group] is the necessary complement to the International [the revolutionary workers’ movement]. But the International and the Alliance, while having the same ultimate aims, perform different functions. The International endeavours to unify the working masses . . . regardless of nationality and national boundaries or religious and political beliefs, into one compact body; the Alliance . . . tries to give these masses a really revolutionary direction. The programs of one and the other, without being opposed, differ in the degree of their revolutionary development. The International contains in germ, but only in germ, the whole program of the Alliance. The program of the Alliance represents the fullest unfolding of the International.” [Bakunin on Anarchism, p. 157]

Thus only by arguing for anarchist ideas can anarchy come about. It will not come about by accident. Hence Malatesta’s argument that anarchists “*must deepen, develop and propagate our ideas and co-ordinate our forces in a common action. We must act within the labour movement . . . [W]e must act in such a way that it contributes to preparing for a complete social transformation. We must work with the unorganised . . . masses to awaken the spirit of revolt and the desire and hope for a free and happy life. We must initiate and support all movements that tend to weaken the forces of the State and of capitalism and to raise the mental level and material conditions of the workers. . . And then, in the revolution, we must take an energetic part (if possible before and more effectively than the others) in the essential material struggle and drive it to the utmost limit in destroying all the repressive forces of the State. We must encourage the workers to take possession of the means of production . . . and of stocks of manufactured goods; to organise immediately, on their own, an equitable distribution of . . . products . . . and for the continuation and intensification of production and all services useful to the public. We must . . . promote action by the workers’ associations, the co-operatives, the voluntary groups — to prevent the emergence of new authoritarian powers, new governments, opposing them with violence if necessary, but above all rendering them useless.*” [The Anarchist Revolution, pp. 109–110]

A key process of this is to argue that workers' organisations become the framework of the new world and smash the state. As Murray Bookchin argues, anarchists "*seek to persuade the factory committees, assemblies [and other organisations created by people in struggle] . . . to make themselves into **genuine organs of popular self-management**, not to dominate them, manipulate them, or hitch them to an all-knowing political party.*" [**Post-Scarcity Anarchism**, p. 217] For more discussion of this issue, see section J.7.5 (What is the role of anarchists in a social revolution?).

Clearly, rather than being "*the most crushing answer to anarchism,*" the fate of the Albanian revolution rather shows how inaccurate Grant's argument is. Anarchists do not hold the position he states we do, as we have proven. Anarchists were not surprised by the fate of the Albanian revolution as the Albanian workers were not fighting **for** an anarchist society but rather were protesting **against** the existing system. The role of anarchists in such a struggle would have been to convince those involved to smash the existing state and create a new society based on federations of workers' associations. That this was not done suggests that anarchist ideas were not the dominant ones in the revolt and, therefore, it is hardly surprising that the revolution failed.

Appendix: The Russian Revolution

This appendix of the FAQ exists to discuss in depth the Russian revolution and the impact that Leninist ideology and practice had on its outcome. Given that the only reason why Leninism is taken seriously in some parts of the revolutionary movement is the Russian Revolution, it is useful to expose what Alexander Berkman called “the Bolshevik Myth.” This means discussing certain aspects of the revolution and indicating exactly how Leninism helped destroy any libertarian potential it had. It also means analysing common, modern-day, Leninist excuses for the actions of the Bolsheviks to see if they hold water. It also means analysing in depth specific events of the revolution (such as the Kronstadt uprising of March 1921 and the libertarian influenced Makhnovist movement) to see if there was an alternative to Leninism at the time. Luckily, the answer is yes.

As will become clear from this appendix, Bolshevik actions and ideology had a decisive impact on the development and degeneration of the Revolution. With its centralised, top-down statist political vision, its (openly) state capitalist economic vision and its aim for party power, Leninism had pushed the revolution in an authoritarian direction before the Russian Civil War started (the most common Leninist explanation of what went wrong). Leninism, ironically enough, proved the anarchist critique of Marxism to be correct. Anarchists are confident that in depth analysis of the Russian Revolution will confirm the limitations of Bolshevism as a revolutionary movement and point to libertarian ideas for anyone who wants to change the world.

What happened during the Russian Revolution?

This appendix of the FAQ is not a full history of the Russian Revolution. The scope of such a work would simply be too large. Instead, this section will concentrate on certain key issues which matter in evaluating whether the Bolshevik revolution and regime were genuinely socialist or not. This is not all. Some Leninists acknowledge that that Bolshevik policies had little to do with socialism as such were the best that were available at the time. As such, this section will look at possible alternatives to Bolshevik policies and see whether they were, in fact, inevitable.

So for those seeking a comprehensive history of the revolution will have to look elsewhere. Here, we concentrate on those issues which matter when evaluating the socialist content of the revolution and of Bolshevism. In other words, the development of working class self-activity and self-organisation, workers' resistance to their bosses (whether capitalist or "red"), the activity of opposition groups and parties and the fate of working class organisations like trade unions, factory committees and soviets. Moreover, the role of the ruling party and its ideals also need to be indicated and evaluated somewhat (see "How did Bolshevik ideology contribute to the failure of the Revolution?" for a fuller discussion of the role of Bolshevik ideology in the defeat of the revolution).

This means that this section is about two things, what Alexander Berkman termed "*the Bolshevik Myth*" and what Voline called "*the Unknown Revolution*" (these being the titles of their respective books on the revolution). After his experiences in Bolshevik Russia, Berkman came to the conclusion that it was "*[h]igh time the truth about the Bolsheviks were told. The whited sepulchre must unmasked, the clay feet of the fetish beguiling the international proletariat to fatal will o' wisps exposed. The Bolshevik myth must be destroyed.*" By so doing, he aimed to help the global revolutionary movement learn from the experience of the Russian revolution. Given that "*[t]o millions of the disinherited and enslaved it became a new religion, the beacon of social salvation*" it was an "*imperative to unmask the great delusion, which otherwise might lead the Western workers to the same abyss as their brothers in Russia.*" Bolshevism had "*failed, utterly and absolutely*" and so it was "*incumbent upon those who have seen through the myth to expose its true nature . . . Bolshevism is of the past. The future belongs to man and his liberty.*" [**The Bolshevik Myth**, p. 318 and p. 342]

Subsequent events proved Berkman correct. Socialism became linked to Soviet Russia and as it fell into Stalinism, the effect was to discredit socialism,

even radical change as such, in the eyes of millions. And quite rightly too, given the horrors of Stalinism. If more radicals had had the foresight of Berkman and the other anarchists, this association of socialism and revolution with tyranny would have been combated and an alternative, libertarian, form of socialism would have risen to take the challenge of combating capitalism in the name of a **genuine** socialism, rooted in the ideals of liberty, equality and solidarity.

However, in spite of the horrors of Stalinism many people seeking a radical change in society are drawn to Leninism. This is partly to do with the fact that in many countries Leninist parties have a organised presence and many radicalised people come across them first. It is also partly to do with the fact that many forms of Leninism denounce Stalinism for what it was and raise the possibility of the “genuine” Leninism of the Bolshevik party under Lenin and Trotsky. This current of Leninism is usually called “Trotskyism” and has many offshoots. For some of these parties, the differences between Trotskyism and Stalinism is pretty narrow. The closer to orthodox Trotskyism you get, the more Stalinist it appears. As Victor Serge noted of Trotsky’s “Fourth International” in the 1930s, *“in the hearts of the persecuted I encountered the same attitudes as in their persecutors [the Stalinists] . . . Trotskyism was displaying symptoms of an outlook in harmony with the very Stalinism against which it had taken its stand . . . any person in the circles of the ‘Fourth International’ who went so far as to object to [Trotsky’s] propositions was promptly expelled and denounced in the same language that the bureaucracy had employed against us in the Soviet Union.”* [**Memoirs of a Revolutionary**, p. 349] As we discuss in section 3 of the appendix on “Were any of the Bolshevik oppositions a real alternative?”, perhaps this is unsurprising given how much politically Trotsky’s “Left Opposition” had shared with Stalinism.

Other Trotskyist parties have avoided the worse excesses of orthodox Trotskyism. Parties associated with the **International Socialists**, for example portray themselves as defending what they like to term *“socialism from below”* and the democratic promise of Bolshevik as expressed during 1917 and in the early months of Bolshevik rule. While anarchists are somewhat sceptical that Leninism can be called *“socialism from below”* (see section H.3.3), we need to address the claim that the period between February 1917 to the start of the Russian civil war at the end of May 1918 shows the real nature of Bolshevism. In order to do that we need to discuss what the Russian anarchist Voline called *“The Unknown Revolution.”*

So what is the *“Unknown Revolution”*? Voline, an active participant in 1917 Russian Revolution, used that expression as the title of his classic account of the Russian revolution. He used it to refer to the rarely acknowledged independent, creative actions of the revolutionary people themselves. As Voline argued, *“it is not known how to study a revolution”* and most historians *“mistrust and ignore those developments which occur silently in the depths of the revolution . . . at best, they accord them a few words in passing . . . [Yet] it is precisely these hidden facts which are important, and which throw a true light on the events under consideration and on the period.”* This section of the FAQ will try and present this *“unknown revolution,”* those movements *“which fought the Bolshevik power in the name of true liberty and of the principles of the Social Revolution which that power had scoffed at and trampled underfoot.”* [**The Unknown Revolution**, p. 19 and p. 437] Voline gives the Kronstadt rebellion (see the appendix on “What was the Kronstadt Rebellion?”) and the Makhnovist movement (see

the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?”) pride of place in his account. Here we discuss other movements and the Bolshevik response to them.

Leninist accounts of the Russian Revolution, to a surprising extent, fall into the official form of history — a concern more with political leaders than with the actions of the masses. Indeed, the popular aspects of the revolution are often distorted to accord with a predetermined social framework of Leninism. Thus the role of the masses is stressed during the period before the Bolshevik seizure of power. Here the typical Leninist would agree, to a large extent, with summarised history of 1917 we present in section 1. They would undoubtedly disagree with the downplaying of the role of the Bolshevik party (although as we discuss in section 2, that party was far from the ideal model of the vanguard party of Leninist theory and modern Leninist practice). However, the role of the masses in the revolution would be praised, as would the Bolsheviks for supporting it.

The real difference arises once the Bolsheviks seize power in November 1917 (October, according to the Old Style calendar then used). After that, the masses simply disappear and into the void steps the leadership of the Bolshevik party. For Leninism, the “*unknown revolution*” simply stops. The sad fact is that very little is known about the dynamics of the revolution at the grassroots, particularly after October. Incredible as it may sound, very few Leninists are that interested in the realities of “workers’ power” under the Bolsheviks or the actual performance and fate of such working class institutions as soviets, factory committees and co-operatives. What is written is often little more than vague generalities that aim to justify authoritarian Bolshevik policies which either explicitly aimed to undermine such bodies or, at best, resulted in their marginalisation when implemented.

This section of the FAQ aims to make known the “*unknown revolution*” that continued under the Bolsheviks and, equally important, the Bolshevik response to it. As part of this process we need to address some of the key events of that period, such as the role of foreign intervention and the impact of the civil war. However, we do not go into these issues in depth here and instead cover them in depth in the appendix on “What caused the degeneration of the Russian Revolution?”. This is because most Leninists excuse Bolshevik authoritarianism on the impact of the civil war, regardless of the facts of the matter. As we discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the ideology of Bolshevism played its role as well — something that modern day Leninists strenuously deny (again, regardless of the obvious). As we indicate in this section, the idea that Bolshevism came into conflict with the “*unknown revolution*” is simply not viable. Bolshevik ideology and practice made it inevitable that this conflict erupted, as it did **before** the start of the civil war (also see section 3 of the appendix on “What caused the degeneration of the Russian Revolution?”).

Ultimately, the reason why Leninist ideas still have influence on the socialist movement is due to the apparent success of the Russian Revolution. Many Leninist groups, mainly Trotskyists and derivatives of Trotskyism, point to “Red October” and the creation of the first ever workers state as concrete examples of the validity of their ideas. They point to Lenin’s **State and Revolution** as proving the “democratic” (even “libertarian”) nature of Leninism while, at the same time, supporting the party dictatorship he created and, moreover,

rationalising the utter lack of working class freedom and power under it. We will try to indicate the falseness of such claims. As will become clear from this section, the following summation of an anonymous revolutionary is totally correct:

“Every notion about revolution inherited from Bolshevism is false.”

In this, they were simply repeating the conclusions of anarchists. As Kropotkin stressed in 1920:

“It seems to me that this attempt to build a communist republic on the basis of a strongly centralised state, under the iron law of the dictatorship of one party, has ended in a terrible fiasco. Russia teaches us how not to impose communism.” [Peter Kropotkin, quoted by Guerin, **Anarchism**, p. 106]

Ultimately, the experience of Bolshevism was a disaster. And as the Makhnovists in the Ukraine proved, Bolshevik ideology and practice was **not** the only option available (see the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?”). There **were** alternatives, but Bolshevik ideology simply excluded using them (we will discuss some possibilities in this various sub-sections below). In other words, Bolshevik ideology is simply not suitable for a real revolutionary movement and the problems it will face. In fact, its ideology and practice ensures that any such problems will be magnified and made worse, as the Russian revolution proves.

Sadly many socialists cannot bring themselves to acknowledge this. While recognising the evils of the Stalinist bureaucracy, these socialists deny that this degeneration of Bolshevism was inevitable and was caused by outside factors (namely the Russian Civil War or isolation). While not denying that these factors did have an effect in the outcome of the Russian Revolution, the seeds for bureaucracy existed from the first moment of the Bolshevik insurrection. These seeds where from three sources: Bolshevik politics, the nature of the state and the post-October economic arrangements favoured and implemented by the ruling party.

As we will indicate, these three factors caused the new “workers’ state” to degenerate long before the out break of the Civil war in May of 1918. This means that the revolution was **not** defeated primarily because of isolation or the effects of the civil war. The Bolsheviks had already seriously undermined it from within **long before** the effects of isolation or civil war had a chance to take hold. The civil war which started in the summer of 1918 did take its toll in what revolutionary gains survived, not least because it allowed the Bolsheviks to portray themselves and their policies as the lessor of two evils. However, Lenin’s regime was already defending (state) capitalism against genuine socialist tendencies before the outbreak of civil war. The suppression of Kronstadt in March 1921 was simply the logical end result of a process that had started in the spring of 1918, at the latest. As such, isolation and civil war are hardly good excuses — particularly as anarchists had predicted they would affect every revolution decades previously and Leninists are meant to realise that civil war and revolution are inevitable. Also, it must be stressed that Bolshevik rule was opposed by the working class, who took collective action to resist it and

the Bolsheviks justified their policies in ideological terms and **not** in terms of measures required by difficult circumstances (see the appendix on “What caused the degeneration of the Russian Revolution?”).

One last thing. We are sure, in chronicling the “excesses” of the Bolshevik regime, that some Leninists will say “they sound exactly like the right-wing.” Presumably, if we said that the sun rises in the East and sets in the West we would also “sound like the right-wing.” That the right-wing also points to certain **facts** of the revolution does not in any way discredit these facts. How these facts are used is what counts. The right uses the facts to discredit socialism and the revolution. Anarchists use them to argue for libertarian socialism and support the revolution while opposing the Bolshevik ideology and practice which distorted it. Similarly, unlike the right we take into account the factors which Leninists urge us to use to excuse Bolshevik authoritarianism (such as civil war, economic collapse and so on). We are simply not convinced by Leninist arguments.

Needless to say, few Leninists apply their logic to Stalinism. To attack Stalinism by describing the facts of the regime would make one sound like the “right-wing.” Does that mean socialists should defend one of the most horrific dictatorships that ever existed? If so, how does that sound to non-socialists? Surely they would conclude that socialism **is** about Stalinism, dictatorship, terror and so on? If not, why not? If “sounding like the right” makes criticism of Lenin’s regime anti-revolutionary, then why does this not apply to Stalinism? Simply because Lenin and Trotsky were not at the head of the dictatorship as they were in the early 1920s? Does the individuals who are in charge override the social relations of a society? Does dictatorship and one-man management become less so when Lenin rules? The apologists for Lenin and Trotsky point to the necessity created by the civil war and isolation within international capitalism for their authoritarian policies (while ignoring the fact they started **before** the civil war, continued after it **and were justified at the time** in terms of Bolshevik ideology). Stalin could make the same claim.

Other objections may be raised. It may be claimed that we quote “bourgeois” (or even worse, **Menshevik**) sources and so our account is flawed. In reply, we have to state that you cannot judge a regime based purely on what it says about itself. As such, critical accounts are required to paint a full picture of events. Moreover, it is a sad fact that few, if any, Leninist accounts of the Russian Revolution actually discuss the class and social dynamics (and struggles) of the period under Lenin and Trotsky. This means we have to utilise the sources which **do**, namely those historians who do not identify with the Bolshevik regime. And, of course, any analysis (or defence) of the Bolshevik regime will have to account for critical accounts, either by refuting them or by showing their limitations. As will become obvious in our discussion, the reason why latter day Bolsheviks talk about the class dynamics post-October in the most superficial way is that it would be hard, even impossible, to maintain that Lenin’s regime was remotely socialist or based on working class power. Simply put, from early 1918 (at the latest) conflict between the Bolsheviks and the Russian working masses was a constant feature of the regime. It is only when that conflict reached massive proportions that Leninists do not (i.e. cannot) ignore it. In such cases, as the Kronstadt rebellion proves, history is distorted in order to defend the Bolshevik state (see the appendix on “What was the Kronstadt Rebellion?” for details).

The fact that Leninists try to discredit anarchists by saying that we sound like the right is sad. In effect, it **blocks** any real discussion of the Russian Revolution and Bolshevism (as intended, probably). This ensures that Leninism remains above critique and so no lessons can be learnt from the Russian experience. After all, if the Bolsheviks had no choice then what lessons **are** there to learn? None. And if we are to learn no lessons (bar, obviously, mimic the Bolsheviks) we are doomed to repeat the same mistakes — mistakes that are partly explained by the objective circumstances at the time and partly by Bolshevik politics. But given that most of the circumstances the Bolsheviks faced, such as civil war and isolation, are likely to reappear in any future revolution, modern-day Leninists are simply ensuring that Karl Marx was right — history repeats itself, first time as tragedy, second time as farce.

Such a position is, of course, wonderful for the pro-Leninist. It allows them to quote Lenin and Trotsky and use the Bolsheviks as the paradigm of revolution while washing their hands of the results of that revolution. By arguing that the Bolsheviks were “*making a virtue of necessity*,” (to use the expression of Leninist Donny Gluckstein [**The Tragedy of Bukharin**, p. 41]), they are automatically absolved of proving their arguments about the “democratic” essence of Bolshevism in power. Which is useful as, logically, no such evidence could exist and, in fact, there is a whole host of evidence pointing the other way which can, by happy co-incidence, be ignored. Indeed, from this perspective there is no point even discussing the revolution at all, beyond praising the activities and ideology of the Bolsheviks while sadly noting that “fate” (to quote Leninist Tony Cliff) ensured that they could not fulfil their promises. Which, of course, almost Leninist accounts **do** boil down to. Thus, for the modern Leninist, the Bolsheviks cannot be judged on what they did nor what they said while doing it (or even after). They can only be praised for what they said and did **before** they seized power.

However, anarchists have a problem with this position. It smacks more of religion than theory. Karl Marx was right to argue that you cannot judge people by what they say, only by what they do. It is in this revolutionary spirit that this section of the FAQ analyses the Russian revolution and the Bolshevik role within it. We need to analyse what they did when they held power as well as the election manifesto. As we will indicate in this section, neither was particularly appealing.

Finally, we should note that Leninists today have various arguments to justify what the Bolsheviks did once in power. We discuss these in the appendix on “What caused the degeneration of the Russian Revolution?”. We also discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?” the ideological roots of the counter-revolutionary role of the Bolsheviks during the revolution. That the politics of the Bolsheviks played its role in the failure of the revolution can be seen from the example of the anarchist influenced Makhnovist movement which applied basic libertarian principles in the same difficult circumstances of the Russian Civil War (see “Why does the Makhnovist movement show there is an alternative to Bolshevism?” on this important movement).

1 Can you give a short summary of what happened in 1917?

2 How did the Bolsheviks gain mass support?

3 Surely the Russian Revolution proves that vanguard parties work?

No, far from it. Looking at the history of vanguardism we are struck by its failures, not its successes. Indeed, the proponents of “*democratic centralism*” can point to only one apparent success of their model, namely the Russian Revolution. However, we are warned by Leninists that failure to use the vanguard party will inevitably condemn future revolutions to failure:

*“The proletariat can take power only through its vanguard. . . Without the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power . . . The Soviets are the only organised form of the tie between the vanguard and the class. A revolutionary content can be given this form only by the party. This is proved by the positive experience of the October Revolution and by the negative experience of other countries (Germany, Austria, finally, Spain). No one has either shown in practice or tried to explain articulately on paper how the proletariat can seize power without the political leadership of a party that knows what it wants.” [Trotsky, **Stalinism and Bolshevism**]*

To anarchist ears, such claims seem out of place. After all, did the Russian Revolution actually result in socialism or even a viable form of soviet democracy? Far from it. Unless you picture revolution as simply the changing of the party in power, you have to acknowledge that while the Bolshevik party **did** take power in Russian in November 1917, the net effect of this was **not** the stated goals that justified that action. Thus, if we take the term “*effective*” to mean “*an efficient means to achieve the desired goals*” then vanguardism has not been proven to be effective, quite the reverse (assuming that your desired goal is a socialist society, rather than party power). Needless to say, Trotsky blames the failure of the Russian Revolution on “*objective*” factors rather than Bolshevik policies and practice, an argument we address in detail in “What caused the degeneration of the Russian Revolution?” and will not do so here.

So while Leninists make great claims for the effectiveness of their chosen kind of party, the hard facts of history are against their positive evaluation of vanguard parties. Ironically, even the Russian Revolution disproves the claims of Leninists. The fact is that the Bolshevik party in 1917 was very far from the “*democratic centralist*” organisation which supporters of “*vanguardism*” like to claim it is. As such, its success in 1917 lies more in its divergence from the principles of “*democratic centralism*” than in their application. The subsequent degeneration of the revolution and the party is marked by the increasing **application** of those principles in the life of the party.

Thus, to refute the claims of the “*effectiveness*” and “*efficiency*” of vanguardism, we need to look at its one and only success, namely the Russian

Revolution. As the Cohen-Bendit brothers argue, “*far from leading the Russian Revolution forwards, the Bolsheviks were responsible for holding back the struggle of the masses between February and October 1917, and later for turning the revolution into a bureaucratic counter-revolution — in both cases because of the party’s very nature, structure and ideology.*” Indeed, “[f]rom April to October, Lenin had to fight a constant battle to keep the Party leadership in tune with the masses.” [Obsolete Communism, p. 183 and p. 187] It was only by continually violating its own “*nature, structure and ideology*” that the Bolshevik party played an important role in the revolution. Whenever the principles of “*democratic centralism*” were applied, the Bolshevik party played the role the Cohen-Bendit brothers subscribed to it (and once in power, the party’s negative features came to the fore).

Even Leninists acknowledge that, to quote Tony Cliff, throughout the history of Bolshevism, “*a certain conservatism arose.*” Indeed, “[a]t practically all sharp turning points, Lenin had to rely on the lower strata of the party machine against the higher, or on the rank and file against the machine as a whole.” [Lenin, vol. 2, p. 135] This fact, incidentally, refutes the basic assumptions of Lenin’s party schema, namely that the broad party membership, like the working class, was subject to bourgeois influences so necessitating central leadership and control from above.

Looking at both the 1905 and 1917 revolutions, we are struck by how often this “*conservatism*” arose and how often the higher bodies were behind the spontaneous actions of the masses and the party membership. Looking at the 1905 revolution, we discover a classic example of the inefficiency of “*democratic centralism.*” Facing in 1905 the rise of the soviets, councils of workers’ delegates elected to co-ordinate strikes and other forms of struggle, the Bolsheviks did not know what to do. “*The Petersburg Committee of the Bolsheviks,*” noted Trotsky, “*was frightened at first by such an innovation as a non-partisan representation of the embattled masses, and could find nothing better to do than to present the Soviet with an ultimatum: immediately adopt a Social-Democratic program or disband. The Petersburg Soviet as a whole, including the contingent of Bolshevik workingmen as well ignored this ultimatum without batting an eyelash.*” [Stalin, vol. 1, p. 106] More than that, “[t]he party’s Central Committee published the resolution on October 27, thereby making it the binding directive for all other Bolshevik organisations.” [Oskar Anweiler, **The Soviets**, p. 77] It was only the return of Lenin which stopped the Bolshevik’s open attacks against the Soviet (also see section 8 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”).

The rationale for these attacks is significant. The St. Petersburg Bolsheviks were convinced that “*only a strong party along class lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent.*” [quoted by Anweiler, **Op. Cit.**, p. 77] In other words, the soviets could not reflect workers’ interests because they were elected by the workers! The implications of this perspective came clear in 1918, when the Bolsheviks gerrymandered and disbanded soviets to remain in power (see section 6). That the Bolshevik’s position flowed naturally from Lenin’s arguments in **What is to be Done?** is clear. Thus the underlying logic of Lenin’s vanguardism ensured that the Bolsheviks played a negative role with regards the soviets which, combined

with “democratic centralism” ensured that it was spread far and wide. Only by ignoring their own party’s principles and staying in the Soviet did rank and file Bolsheviks play a positive role in the revolution. This divergence of top and bottom would be repeated in 1917.

Given this, perhaps it is unsurprising that Leninists started to rewrite the history of the 1905 revolution. Victor Serge, a “Left Oppositionist” and anti-Stalinist asserted in the late 1920s that in 1905 the Petrograd Soviet was “*led by Trotsky and inspired by the Bolsheviks.*” [**Year One of the Russian Revolution**, p. 36]. While the former claim is correct, the latter is not. As noted, the Bolsheviks were initially opposed the soviets and systematically worked to undermine them. Unsurprisingly, Trotsky at that time was a Menshevik, not a Bolshevik. After all, how could the most revolutionary party that ever existed have messed up so badly? How could democratic centralism faired so badly in practice? Best, then, to suggest that it did not and give the Bolsheviks a role better suited to the rhetoric of Bolshevism than its reality.

Trotsky was no different. He, needless to say, denied the obvious implications of these events in 1905. While admitting that the Bolsheviks “*adjusted themselves more slowly to the sweep of the movement*” and that the Mensheviks “*were preponderant in the Soviet,*” he tries to save vanguardism by asserting that “*the general direction of the Soviet’s policy proceeded in the main along Bolshevik lines.*” So, in spite of the lack of Bolshevik influence, in spite of the slowness in adjusting to the revolution, Bolshevism was, in fact, the leading set of ideas in the revolution! Ironically, a few pages later, he mocks the claims of Stalinists that Stalin had “*isolated the Mensheviks from the masses*” by noting that the “*figures hardly bear [the claims] out.*” [**Op. Cit.**, p. 112 and p. 117] Shame he did not apply this criteria to his own claims.

Of course, every party makes mistakes. The question is, how did the “*most revolutionary party of all time*” fare in 1917. Surely that revolution proves the validity of vanguardism and “democratic centralism”? After all, there was a successful revolution, the Bolshevik party did seize power. However, the apparent success of 1917 was not due to the application of “democratic centralism,” quite the reverse. While the myth of 1917 is that a highly efficient, democratic centralist vanguard party ensured the overthrow of the Provisional Government in November 1917 in favour of the Soviets (or so it seemed at the time) the facts are somewhat different. Rather, the Bolshevik party throughout 1917 was a fairly loose collection of local organisations (each more than willing to ignore central commands and express their autonomy), with much internal dissent and infighting and no discipline beyond what was created by common loyalty. The “democratic centralist” party, as desired by Lenin, was only created in the course of the Civil War and the tightening of the party dictatorship. In other words, the party became more like a “democratic centralist” one as the revolution degenerated. As such, the various followers of Lenin (Stalinists, Trotskyists and their multitude of offshoots) subscribe to a myth, which probably explains their lack of success in reproducing a similar organisation since. So assuming that the Bolsheviks did play an important role in the Russian revolution, it was because it was **not** the centralised, disciplined Bolshevik party of Leninist myth. Indeed, when the party **did** operate in a vanguardist manner, failure was soon to follow.

This claim can be proven by looking at the history of the 1917 revolution. The February revolution started with a spontaneous protests and strikes. As Murray Bookchin notes, “*the Petrograd organisation of the Bolsheviks opposed*

the calling of strikes precisely on the eve of the revolution which was destined to overthrow the Tsar. Fortunately, the workers ignored the Bolshevik 'directives' and went on strike anyway. In the events which followed, no one was more surprised by the revolution than the 'revolutionary' parties, including the Bolsheviks." [Post-Scarcity Anarchism, p. 194] Trotsky quotes one of the Bolshevik leaders at the time:

"Absolutely no guiding initiative from the party centres was felt . . . the Petrograd Committee had been arrested and the representative of the Central Committee . . . was unable to give any directives for the coming day." [quoted by Trotsky, **History of the Russian Revolution**, vol. 1, p. 147]

Not the best of starts. Of course rank and file Bolsheviks took part in the demonstrations, street fights and strikes and so violated the principles their party was meant to be based on. As the revolution progressed, so did the dual nature of the Bolshevik party (i.e. its practical divergence from "democratic centralism" in order to be effective and attempts to force it back into that schema which handicapped the revolution). However, during 1917, "democratic centralism" was ignored in order to ensure the the Bolsheviks played any role at all in the revolution. As one historian of the party makes clear, in 1917 and until the outbreak of the Civil War, the party operated in ways that few modern "vanguard" parties would tolerate:

"The committees were a law unto themselves when it came to accepting orders from above. Democratic centralism, as vague a principle of internal administration as there ever has been, was commonly held at least to enjoin lower executive bodies that they should obey the behests of all higher bodies in the organisational hierarchy. But town committees in practice had the devil's own job in imposing firm leadership . . . Insubordination was the rule of the day whenever lower party bodies thought questions of importance were at stake.

"Suburb committees too faced difficulties in imposing discipline. Many a party cell saw fit to thumb its nose at higher authority and to pursue policies which it felt to be more suited to local circumstances or more desirable in general. No great secret was made of this. In fact, it was openly admitted that hardly a party committee existed which did not encounter problems in enforcing its will even upon individual activists." [Robert Service, **The Bolshevik Party in Revolution 1917–1923**, pp. 51–2]

So while Lenin's ideal model of a disciplined, centralised and top-down party had been expounded since 1902, the operation of the party never matched his desire. As Service notes, "*a disciplined hierarchy of command stretching down from the regional committees to party cells*" had "*never existed in Bolshevik history.*" In the heady days of the revolution, when the party was flooded by new members, the party ignored what was meant to be its guiding principles. As Service constantly stresses, Bolshevik party life in 1917 was the exact opposite of that usually considered (by both opponents and supporters of Bolshevism) as its normal mode of operation. "*Anarchist attitudes to higher authority,*" he

argues, “were the rule of the day” and “no Bolshevik leader in his right mind could have contemplated a regular insistence upon rigid standards of hierarchical control and discipline unless he had abandoned all hope of establishing a mass socialist party.” This meant that “in the Russia of 1917 it was the easiest thing in the world for lower party bodies to rebut the demands and pleas by higher authority.” He stresses that “[s]uburb and town committees . . . often refused to go along with official policies . . . they also . . . sometimes took it into their heads to engage in active obstruction.” [Op. Cit., p. 80, p. 62 p. 56 and p. 60]

This worked both ways, of course. Town committees did “snub their nose at lower-echelon viewpoints in the time before the next election. Try as hard as they might, suburb committees and ordinary cells could meanwhile do little to rectify matters beyond telling their own representative on their town committee to speak on their behalf. Or, if this too failed, they could resort to disruptive tactics by criticising it in public and refusing it all collaboration.” [Op. Cit., pp. 52–3] Even by early 1918, the Bolshevik party bore little resemblance to the “democratic centralist” model desired by Lenin:

“The image of a disciplined hierarchy of party committees was therefore but a thin, artificial veneer which was used by Bolshevik leaders to cover up the cracked surface of the real picture underneath. Cells and suburb committees saw no reason to kow-tow to town committees; nor did town committees feel under compulsion to show any greater respect to their provincial and regional committees than before.” [Op. Cit., p. 74]

It is this insubordination, this local autonomy and action in spite of central orders which explains the success of the Bolsheviks in 1917. Rather than a highly centralised and disciplined body of “professional” revolutionaries, the party in 1917 saw a “significant change . . . within the membership of the party at local level . . . From the time of the February revolution requirements for party membership had been all but suspended, and now Bolshevik ranks swelled with impetuous recruits who knew next to nothing about Marxism and who were united by little more than overwhelming impatience for revolutionary action.” [Alexander Rabinowitch, **Prelude to Revolution**, p. 41]

This mass of new members (many of whom were peasants who had just recently joined the industrial workforce) had a radicalising effect on the party’s policies and structures. As even Leninist commentators argue, it was this influx of members who allowed Lenin to gain support for his radical revision of party aims in April. However, in spite of this radicalisation of the party base, the party machine still was at odds with the desires of the party. As Trotsky acknowledged, the situation “called for resolute confrontation of the sluggish Party machine with masses and ideas in motion.” He stressed that “the masses were incomparably more revolutionary than the Party, which in turn was more revolutionary than its committeemen.” Ironically, given the role Trotsky usually gave the party, he admits that “[w]ithout Lenin, no one had known what to make of the unprecedented situation.” [Stalin, vol. 1, p. 301, p. 305 and p. 297]

Which is significant in itself. The Bolshevik party is usually claimed as being the most “revolutionary” that ever existed, yet here is Trotsky admitting that its leading members did not have a clue what to do. He even argued that

“[e]very time the Bolshevik leaders had to act without Lenin they fell into error, usually inclining to the Right.” [Op. Cit., p. 299] This negative opinion of the Bolsheviks applied even to the *“left Bolsheviks, especially the workers”* whom we are informed *“tried with all their force to break through this quarantine”* created by the Bolshevik leaders policy *“of waiting, of accommodation, and of actual retreat before the Compromisers”* after the February revolution and before the arrival of Lenin. Trotsky argues that *“they did not know how to refute the premise about the bourgeois character of the revolution and the danger of an isolation of the proletariat. They submitted, gritting their teeth, to the directions of their leaders.”* [History of the Russian Revolution, vol. 1, p. 273] It seems strange, to say the least, that without one person the whole of the party was reduced to such a level given that the aim of the “revolutionary” party was to develop the political awareness of its members.

Lenin’s arrival, according to Trotsky, allowed the influence of the more radical rank and file to defeat the conservatism of the party machine. By the end of April, Lenin had managed to win over the majority of the party leadership to his position. However, as Trotsky argues, this *“April conflict between Lenin and the general staff of the party was not the only one of its kind. Throughout the whole history of Bolshevism . . . all the leaders of the party at all the most important moments stood to the right of Lenin.”* [Op. Cit., p. 305] As such, if “democratic centralism” had worked as intended, the whole party would have been arguing for incorrect positions the bulk of its existence (assuming, of course, that Lenin was correct most of the time).

For Trotsky, *“Lenin exerted influence not so much as an individual but because he embodied the influence of the class on the Party and of the Party on its machine.”* [Stalin, vol. 1, p. 299] Yet, this was the machine which Lenin had forged, which embodied his vision of how a “revolutionary” party should operate and was headed by him. In other words, to argue that the party machine was behind the party membership and the membership behind the class shows the bankruptcy of Lenin’s organisational scheme. This *“backwardness,”* moreover, indicates an independence of the party bureaucracy from the membership and the membership from the masses. As Lenin’s constantly repeated aim was for the party to seize power (based on the dubious assumption that class power would only be expressed, indeed was identical to, party power) this independence held serious dangers, dangers which became apparent once this goal was achieved.

Trotsky asks the question *“by what miracle did Lenin manage in a few short weeks to turn the Party’s course into a new channel?”* Significantly, he answers as follows: *“Lenin’s personal attributes and the objective situation.”* [Ibid.] No mention is made of the democratic features of the party organisation, which suggests that without Lenin the rank and file party members would not have been able to shift the weight of the party machine in their favour. Trotsky seems close to admitting this:

“As often happens, a sharp cleavage developed between the classes in motion and the interests of the party machines. Even the Bolshevik Party cadres, who enjoyed the benefit of exceptional revolutionary training, were definitely inclined to disregard the masses and to identify their own special interests and the interests of the machine on the very day after the monarchy was overthrown.” [Stalin, vol. 1,

p. 298]

Thus the party machine, which embodied the principles of “democratic centralism” proved less than able to the task assigned it in practice. Without Lenin, it is doubtful that the party membership would have over come the party machine:

“Lenin was strong not only because he understood the laws of the class struggle but also because his ear was faultlessly attuned to the stirrings of the masses in motion. He represented not so much the Party machine as the vanguard of the proletariat. He was definitely convinced that thousands from among those workers who had borne the brunt of supporting the underground Party would now support him. The masses at the moment were more revolutionary than the Party, and the Party more revolutionary than its machine. As early as March the actual attitude of the workers and soldiers had in many cases become stormily apparent, and it was widely at variance with the instructions issued by all the parties, including the Bolsheviks.”
[Op. Cit., p. 299]

Little wonder the local party groupings ignored the party machine, practising autonomy and initiative in the face of a party machine inclined to conservatism, inertia, bureaucracy and remoteness. This conflict between the party machine and the principles it was based on and the needs of the revolution and party membership was expressed continually throughout 1917:

“In short, the success of the revolution called for action against the ‘highest circles of the party,’ who, from February to October, utterly failed to play the revolutionary role they ought to have taken in theory. The masses themselves made the revolution, with or even against the party — this much at least was clear to Trotsky the historian. But far from drawing the correct conclusion, Trotsky the theorist continued to argue that the masses are incapable of making a revolution without a leader.” [Daniel & Gabriel Cohn-Bendit, **Op. Cit.**, p. 188]

Looking at the development of the revolution from April onwards, we are struck by the sluggishness of the party hierarchy. At every revolutionary upsurge, the party simply was not to the task of responding to the needs of masses and the local party groupings closest to them. This can be seen in June, July and October itself. At each turn, the rank and file groupings or Lenin had to constantly violate the principles of their own party in order to be effective. The remoteness and conservatism of the party even under Lenin can be constantly seen.

For example, when discussing the cancellation by the central committee of a demonstration planned for June 10th by the Petrograd Bolsheviks, the unresponsiveness of the party hierarchy can be seen. The “*speeches by Lenin and Zinoviev [justifying their actions] by no means satisfied the Petersburg Committee. If anything, it appears that their explanations served to strengthen the feeling that at best the party leadership had acted irresponsibly and incompetently and was seriously out of touch with reality.*” Indeed, many “*blamed the Central*

Committee for taking so long to respond to Military Organisation appeals for a demonstration.” [Rabinowitch, **Op. Cit.**, p. 88 and p. 92]

During the discussions in late June, 1917, on whether to take direct action against the Provisional Government there was a “*wide gulf*” between lower organs evaluations of the current situation and that of the Central Committee. [Rabinowitch, **Op. Cit.**, p. 129] Indeed, among the delegates from the Bolshevik military groups, only Lashevich (an old Bolshevik) spoke in favour of the Central Committee position and he noted that “[f]requently it is impossible to make out where the Bolshevik ends and the Anarchist begins.” [quoted by Rabinowitch, **Op. Cit.**, p. 129]

In the July days, the breach between the local party groups and the central committee increased. As we noted in the section 1, this spontaneous uprising was opposed to by the Bolshevik leadership, in spite of the leading role of their own militants (along with anarchists) in fermenting it. While calling on their own militants to restrain the masses, the party leadership was ignored by the rank and file membership who played an active role in the event. Sickened by being asked to play the role of “*fireman*,” the party militants rejected party discipline in order to maintain their credibility with the working class. Rank and file activists, pointing to the snowballing of the movement, showed clear dissatisfaction with the Central Committee. One argued that it “*was not aware of the latest developments when it made its decision to oppose the movement into the streets.*” Ultimately, the Central Committee appeal “*for restraining the masses . . . was removed from . . . Pravda . . . and so the party’s indecision was reflected by a large blank space on page one.*” [Rabinowitch, **Op. Cit.**, p. 150, p. 159 and P. 175] Ultimately, the indecisive nature of the leadership can be explained by the fact it did not think it could seize state power for itself. As Trotsky noted, “*the state of popular consciousness . . . made impossible the seizure of power by the Bolsheviks in July.*” [**History of the Russian Revolution**, vol. 2, p. 81]

The indecision of the party hierarchy did have an effect, of course. While the anarchists at Kronstadt looked at the demonstration as the start of an uprising, the Bolsheviks there were “*wavering indecisively in the middle*” between them and the Left-Social Revolutionaries who saw it as a means of applying pressure on the government. This was because they were “*hamstrung by the indecision of the party Central Committee.*” [Rabinowitch, **Op. Cit.**, p. 187] Little wonder so many Bolshevik party organisations developed and protected their own autonomy and ability to act!

Significantly, one of the main Bolshevik groupings which helped organise and support the July uprising, the Military Organisation, started their own paper after the Central Committee had decreed after the failed revolt that neither it, nor the Petersburg Committee, should be allowed to have one. It “*angrily insisted on what it considered its just prerogatives*” and in “*no uncertain terms it affirmed its right to publish an independent newspaper and formally protested what is referred to as ‘a system of persecution and repression of an extremely peculiar character which had begun with the election of the new Central Committee.’*” [Rabinowitch, **Op. Cit.**, p. 227] The Central Committee backed down, undoubtedly due to the fact it could not enforce its decision.

As the Cohn-Bendit brothers argue, “*five months after the Revolution and three months before the October uprising, the masses were still governing themselves, and the Bolshevik vanguard simply had to toe the line.*” [**Op. Cit.**, p.

186] Within that vanguard, the central committee proved to be out of touch with the rank and file, who ignored it rather than break with their fellow workers.

Even by October, the party machine still lagged behind the needs of the revolution. In fact, Lenin could only impose his view by going over the head of the Central Committee. According to Trotsky's account, "*this time he [wa]s not satisfied with furious criticism*" of the "*ruinous Fabianism of the Petrograd leadership*" and "*by way of protest he resign[ed] from the Central Committee.*" [History of the Russian Revolution, vol. 3, p. 131] Trotsky quotes Lenin as follows:

"I am compelled to request permission to withdraw from the Central Committee, which I hereby do, and leave myself freedom of agitation in the lower ranks of the party and at the party congress." [quoted by Trotsky, **Op. Cit.**, p. 131]

Thus the October revolution was precipitated by a blatant violation of the principles Lenin spent his life advocating. Indeed, if someone else other than Lenin had done this we are sure that Lenin, and his numerous followers, would have dismissed it as the action of a "*petty-bourgeois intellectual*" who cannot handle party "*discipline.*" This is itself significant, as is the fact that he decided to appeal to the "*lower ranks*" of the party. Simply put, rather than being "democratic" the party machine effectively blocked communication and control from the bottom-up. Looking at the more radical party membership, he "*could only impose his view by going over the head of his Central Committee.*" [Daniel and Gabriel Cohn-Bendit, **Op. Cit.**, p. 187] He made sure to send his letter of protest to "*the Petrograd and Moscow committees*" and also made sure that "*copies fell into the hands of the more reliable party workers of the district locals.*" By early October (and "*over the heads of the Central Committee*") he wrote "*directly to the Petrograd and Moscow committees*" calling for insurrection. He also "*appealed to a Petrograd party conference to speak a firm word in favour of insurrection.*" [Trotsky, **Op. Cit.**, p. 131 and p. 132]

In October, Lenin had to fight what he called "*a wavering*" in the "*upper circles of the party*" which led to a "*sort of dread of the struggle for power, an inclination to replace this struggle with resolutions protests, and conferences.*" [quoted by Trotsky, **Op. Cit.**, p. 132] For Trotsky, this represented "*almost a direct pitting of the party against the Central Committee,*" required because "*it was a question of the fate of the revolution*" and so "*all other considerations fell away.*" [Trotsky, **Op. Cit.**, pp. 132–3] On October 8th, when Lenin addressed the Bolshevik delegates of the forthcoming Northern Congress of Soviets on this subject, he did so "*personally*" as there "*was no party decision*" and the "*higher institutions of the party had not yet expressed themselves.*" [Trotsky, **Op. Cit.**, p. 133] Ultimately, the Central Committee came round to Lenin's position but they did so under pressure of means at odds with the principles of the party.

This divergence between the imagine and reality of the Bolsheviks explains their success. If the party had applied or had remained true to the principles of "democratic centralism" it is doubtful that it would have played an important role in the movement. As Alexander Rabinowitch argues, Bolshevik organisational unity and discipline is "*vastly exaggerated*" and, in fact, Bolshevik success in 1917 was down to "*the party's internally relatively democratic, tolerant, and decentralised structure and method of operation, as well as its essentially open*

and mass character — in striking contrast to the traditional Leninist model.” In 1917, he goes on, “subordinate party bodies with the Petersburg Committee and the Military Organisation were permitted considerable independence and initiative . . . Most importantly, these lower bodies were able to tailor their tactics and appeals to suit their own particular constituencies amid rapidly changing conditions. Vast numbers of new members were recruited into the party . . . The newcomers included tens of thousands of workers and soldiers . . . who knew little, if anything, about Marxism and cared nothing about party discipline.” For example, while the slogan “All Power to the Soviets” was “officially withdrawn by the Sixth [Party] Congress in late July, this change did not take hold at the local level.” [The Bolsheviks Come to Power, p. 311, p. 312 and p. 313]

It is no exaggeration to argue that if any member of a current vanguard party acted as the Bolshevik rank and file did in 1917, they would quickly be expelled (this probably explains why no such party has been remotely successful since). However, this ferment from below was quickly undermined within the party with the start of the Civil War. It is from this period when “democratic centralism” was actually applied within the party and clarified as an organisational principle:

“It was quite a turnabout since the anarchic days before the Civil War. The Central Committee had always advocated the virtues of obedience and co-operation; but the rank-and-filers of 1917 had cared little about such entreaties as they did about appeals made by other higher authorities. The wartime emergency now supplied an opportunity to expatiate on this theme at will.” [Service, **Op. Cit.**, p. 91]

Service stresses that “it appears quite remarkable how quickly the Bolsheviks, who for years had talked idly about a strict hierarchy of command inside the party, at last began to put ideas into practice.” [Op. Cit., p. 96]

In other words, the conversion of the Bolshevik party into a fully fledged “democratic centralist” party occurred during the degeneration of the Revolution. This was both a consequence of the rising authoritarianism within the party and society as well as one of its causes. As such, it is quite ironic that the model used by modern day followers of Lenin is that of the party during the decline of the revolution, not its peak. This is not surprising. Once in power, the Bolshevik party imposed a state capitalist regime onto the Russian people. Can it be surprising that the party structure which it developed to aid this process was also based on bourgeois attitudes and organisation? Simply put, the party model advocated by Lenin may not have been very effective during a revolution but it was exceedingly effective at prompting hierarchy and authority in the post-revolutionary regime. It simply replaced the old ruling elite with another, made up of members of the radical intelligentsia and odd ex-worker or ex-peasant.

This was due to the hierarchical and top-down nature of the party Lenin had created. While the party base was largely working class, the leadership was not. Full-time revolutionaries, they were either middle-class intellectuals or (occasionally) ex-workers and (even rarer) ex-peasants who had left their class to become part of the party machine. Even the delegates at the party congresses did not truly reflect class basis of the party membership. For example, the number of delegates was still dominated by white-collar or others (59.1% to

40.9%) at the sixth party congress at the end of July 1917. [Cliff, **Lenin**, vol. 2, p. 160] So while the party gathered more working class members in 1917, it cannot be said that this was reflected in the party leadership which remained dominated by non-working class elements. Rather than being a genuine working class organisation, the Bolshevik party was a hierarchical group headed by non-working class elements whose working class base could not effectively control them even during the revolution in 1917. It was only effective because these newly joined and radicalised working class members ignored their own party structure and its defining ideology.

After the revolution, the Bolsheviks saw their membership start to decrease. Significantly, *“the decline in numbers which occurred from early 1918 onwards”* started happening *“contrary to what is usually assumed, some months before the Central Committee’s decree in midsummer that the party should be purged of its ‘undesirable’ elements.”* These lost members reflected two things. Firstly, the general decline in the size of the industrial working class. This meant that the radicalised new elements from the countryside which had flocked to the Bolsheviks in 1917 returned home. Secondly, the loss of popular support the Bolsheviks were facing due to the realities of their regime. This can be seen from the fact that while the Bolsheviks were losing members, the Left SRS almost doubled in size to 100,000 (the Mensheviks claimed to have a similar number). Rather than non-proletarians leaving, *“[i]t is more probable by far that it was industrial workers who were leaving in droves. After all, it would have been strange if the growing unpopularity of Sovnarkom in factory milieu had been confined exclusively to non-Bolsheviks.”* Unsurprisingly, given its position in power, *“[a]s the proportion of working-class members declined, so that of entrants from the middle-class rose; the steady drift towards a party in which industrial workers no longer numerically predominated was under way.”* By late 1918 membership started to increase again but *“[m]ost newcomers were not of working-class origin . . . the proportion of Bolsheviks of working-class origin fell from 57 per cent at the year’s beginning to 48 per cent at the end.”* It should be noted that it was not specified how many were classed as having working-class origin were still employed in working-class jobs. [Robert Service, **Op. Cit.**, p. 70, pp. 70–1 and p. 90] A new ruling elite was thus born, thanks to the way vanguard parties are structured and the application of vanguardist principles which had previously been ignored.

In summary, the experience of the Russian Revolution does not, in fact, show the validity of the “vanguard” model. The Bolshevik party in 1917 played a leading role in the revolution only insofar as its members violated its own organisational principles (Lenin included). Faced with a real revolution and an influx of more radical new members, the party had to practice anarchist ideas of autonomy, local initiative and the ignoring of central orders which had no bearing to reality on the ground. When the party did try to apply the top-down and hierarchical principles of “democratic centralism” it failed to adjust to the needs of the moment. Moreover, when these principles were finally applied they helped ensure the degeneration of the revolution. As we discussed in section H.5, this was to be expected.

4 Was Lenin’s “State and Revolution” applied after October?

In a nutshell, no. In fact the opposite was the case. Post-October, the Bolsheviks not only failed to introduce the ideas of Lenin’s **State and Revolution**, they in fact introduced the exact opposite. As one historian puts it:

“To consider ‘State and Revolution’ as the basic statement of Lenin’s political philosophy — which non-Communists as well as Communists usually do — is a serious error. Its argument for a utopian anarchism never actually became official policy. The Leninism of 1917 . . . came to grief in a few short years; it was the revived Leninism of 1902 which prevailed as the basis for the political development of the USSR.” [Robert V. Daniels, **The Conscience of the Revolution**, pp. 51–2]

Daniels is being far too lenient with the Bolsheviks. It was not, in fact, “a few short years” before the promises of 1917 were forgotten. In some cases, it was a few short hours. In others, a few short months. However, in a sense Daniels is right. It did take until 1921 before all hope for saving the Russian Revolution finally ended. With the crushing of the Kronstadt rebellion, the true nature of the regime became obvious to all with eyes to see. Moreover, the banning of factions within the party at the same time did mark a return to the pattern of “*What is to be Done?*” rather than the more fluid practice Bolshevism exhibited in, say, 1917 (see section 3). However, as we discuss in the appendix “Were any of the Bolshevik oppositions a real alternative?”, the various Bolshevik oppositions were, in their own way, just as authoritarian as the mainstream of the party.

In order to show that this is the case, we need to summarise the main ideas contained in Lenin’s work. Moreover, we need to indicate what the Bolsheviks did, in fact, do. Finally, we need to see if the various rationales justifying these actions hold water.

So what did Lenin argue for in **State and Revolution**? Writing in the mid-1930s, anarchist Camillo Berneri summarised the main ideas of that work as follows:

“The Leninist programme of 1917 included these points: the discontinuance of the police and standing army, abolition of the professional bureaucracy, elections for all public positions and offices, revocability of all officials, equality of bureaucratic wages with workers’ wages, the maximum of democracy, peaceful competition among the parties within the soviets, abolition of the death penalty.” [“*The Abolition and Extinction of the State*,” **Cienfuegos Press Anarchist Review**, no. 4, p. 50]

As he noted, “[n]ot a single one of the points of this programme has been achieved.” This was, of course, under Stalinism and most Leninists will concur with Berneri. However what Leninists tend not to mention is that in the 7 month period from November 1917 to May 1918 none of these points was achieved. So, as an example of what Bolshevism “really” stands for it seems strange to harp

on about a work which was never implemented when the its author was in a position to do so (i.e. before the onslaught of a civil war Lenin thought was inevitable anyway!).

To see that Berneri's summary is correct, we need to quote Lenin directly. Obviously the work is a wide ranging defence of Lenin's interpretation of Marxist theory on the state. As it is an attempt to overturn decades of Marxist orthodoxy, much of the work is quotes from Marx and Engels and Lenin's attempts to enlist them for his case (we discuss this issue in section H.3.10). Equally, we need to discount the numerous straw men arguments about anarchism Lenin inflicts on his reader (see sections H.1.3, H.1.4 and H.1.5 for the truth about his claims). Here we simply list the key points as regards Lenin's arguments about his "workers' state" and how the workers would maintain control of it:

1) Using the Paris Commune as a prototype, Lenin argued for the abolition of "*parliamentarianism*" by turning "*representative institutions from mere 'talking shops' into working bodies.*" This would be done by removing "*the division of labour between the legislative and the executive.*" [Essential Works of Lenin, p. 304 and p. 306]

2) "*All officials, without exception, to be elected and subject to recall at any time*" and so "*directly responsible to their constituents.*" "*Democracy means equality.*" [Op. Cit., p. 302, p. 306 and p. 346]

3) The "*immediate introduction of control and superintendence by all, so that all shall become 'bureaucrats' for a time and so that, therefore, no one can become a 'bureaucrat.'*" Proletarian democracy would "*take immediate steps to cut bureaucracy down to the roots . . . to the complete abolition of bureaucracy*" as the "*essence of bureaucracy*" is officials becoming transformed "*into privileged persons divorced from the masses and superior to the masses.*" [Op. Cit., p. 355 and p. 360]

4) There should be no "*special bodies of armed men*" standing apart from the people "*since the majority of the people itself suppresses its oppressors, a 'special force' is no longer necessary.*" Using the example of the Paris Commune, Lenin suggested this meant "*abolition of the standing army.*" Instead there would be the "*armed masses.*" [Op. Cit., p. 275, p. 301 and p. 339]

5) The new (workers) state would be "*the organisation of violence for the suppression of . . . the exploiting class, i.e. the bourgeoisie. The toilers need a state only to overcome the resistance of the exploiters*" who are "*an insignificant minority,*" that is "*the landlords and the capitalists.*" This would see "*an immense expansion of democracy . . . for the poor, democracy for the people*" while, simultaneously, imposing "*a series of restrictions on the freedom of the oppressors, the exploiters, the capitalists. . . their resistance must be broken by force: it is clear that where is suppression there is also violence, there is no freedom, no democracy.*" [Op. Cit., p. 287 and pp. 337–8]

This would be implemented after the current, bourgeois, state had been smashed. This would be the "*dictatorship of the proletariat*" and be "*the introduction of complete democracy for the people.*" [Op. Cit., p. 355] However, the key practical ideas on what the new "semi-state" would be are contained in these five points. He generalised these points, considering them valid not only for Russia in 1917 but in all countries. In this his followers agree. Lenin's work is considered valid for today, in advanced countries as it was in revolutionary Russia.

Three things strike anarchist readers of Lenin's work. Firstly, as we noted in section H.1.7, much of it is pure anarchism. Bakunin had raised the vision of a system of workers' councils as the framework of a free socialist society in the 1860s and 1870s. Moreover, he had also argued for the election of mandated and recallable delegates as well as for using a popular militia to defend the revolution (see section H.2.1). What is not anarchist is the call for centralisation, equating the council system with a state and the toleration of a "new" officialdom. Secondly, the almost utter non-mention of the role of the party in the book is deeply significant. Given the emphasis that Lenin had always placed on the party, its absence is worrying. Particularly (as we indicate in section 5) he had been calling for the party to seize power all through 1917. When he does mention the party he does so in an ambiguous way which suggests that it, not the class, would be in power. As subsequent events show, this was indeed what happened in practice. And, finally, the anarchist reader is struck by the fact that every one of these key ideas were not implemented under Lenin. In fact, the opposite was done. This can be seen from looking at each point in turn.

The first point as the creation of "working bodies", the combining of legislative and executive bodies. The first body to be created by the Bolshevik revolution was the "Council of People's Commissars" (CPC) This was a government separate from and above the Central Executive Committee (CEC) of the soviets congress. It was an executive body elected by the soviet congress, but the soviets themselves were not turned into "working bodies." Thus the promises of Lenin's **State and Revolution** did not last the night.

As indicated in section 5, the Bolsheviks clearly knew that the Soviets had alienated their power to this body. However, it could be argued that Lenin's promises were kept as this body simply gave itself legislative powers four days later. Sadly, this is not the case. In the Paris Commune the delegates of the people took executive power into their own hands. Lenin reversed this. His executive took legislative power from the hands of the people's delegates. In the former case, power was decentralised into the hands of the population. In the latter case, it was centralised into the hands of a few. This concentration of power into executive committees occurred at all levels of the soviet hierarchy (see section 6 for full details). Simply put, legislative and executive power was taken **from** the soviets assemblies and handed to Bolshevik dominated executive committees.

What of the next principle, namely the election and recall of all officials? This lasted slightly longer, namely around 5 months. By March of 1918, the Bolsheviks started a systematic campaign against the elective principle in the workplace, in the military and even in the soviets. In the workplace, Lenin was arguing for appointed one-man managers "*vested with dictatorial powers*" by April 1918 (see section 10). In the military, Trotsky simply decreed the end of elected officers in favour of appointed officers (see section 14). And as far as the soviets go, the Bolsheviks were refusing to hold elections because they "*feared that the opposition parties would show gains.*" When elections were held, "*Bolshevik armed force usually overthrew the results*" in provincial towns. Moreover, the Bolsheviks "*pack[ed] local soviets*" with representatives of organisations they controlled "*once they could not longer count on an electoral majority.*" [Samuel Farber, **Before Stalinism**, p. 22, p. 24 and p. 33] This gerrymandering was even practised at the all-Russian soviet congress (see section 6 for full details of this Bolshevik onslaught against the soviets). So much for

competition among the parties within the soviets! And as far as the right of recall went, the Bolsheviks only supported this when the workers were recalling the opponents of the Bolsheviks, not when the workers were recalling them.

In summary, in under six months the Bolsheviks had replaced election of “*all officials*” by appointment from above in many areas of life. Democracy had simply being substituted by appointed from above (see section 4 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution; for the deeply undemocratic reasoning used to justify this top-down and autocratic system of so-called democracy). The idea that different parties could compete for votes in the soviets (or elsewhere) was similarly curtailed and finally abolished.

Then there was the elimination of bureaucracy. As we show in section 7 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, a new bureaucratic and centralised system quickly emerged. Rather than immediately cutting the size and power of the bureaucracy, it steadily grew. It soon became the real power in the state (and, ultimately, in the 1920s became the social base for the rise of Stalin). Moreover, with the concentration of power in the hands of the Bolshevik government, the “*essence*” of bureaucracy remained as the party leaders became “*privileged persons divorced from the masses and superior to the masses.*” They were, for example, more than happy to justify their suppression of military democracy in terms of them knowing better than the general population what was best for them (see section 4 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?” for details).

Then there is the fourth point, namely the elimination of the standing army, the suppression of “*special bodies of armed men*” by the “*armed masses.*” This promise did not last two months. On the 20th of December, 1917, the Council of People’s Commissars decreed the formation of a political (secret) police force, the “*Extraordinary Commission to Fight Counter-Revolution.*” This was more commonly known by the Russian initials of the first two terms of its official name: The Cheka. Significantly, its founding decree stated it was to “*watch the press, saboteurs, strikers, and the Socialist-Revolutionaries of the Right.*” [contained in Robert V. Daniels, **A Documentary History of Communism**, vol. 1, p. 133]

While it was initially a small organisation, as 1918 progressed it grew in size and activity. By April 1918, it was being used to break the anarchist movement across Russia (see section 23 for details). The Cheka soon became a key instrument of Bolshevik rule, with the full support of the likes of Lenin and Trotsky. The Cheka was most definitely a “*special body of armed men*” and not the same as the “*armed workers.*” In other words, Lenin’s claims in **State and Revolution** did not last two months and in under six months the Bolshevik state had a mighty group of “*armed men*” to impose its will.

This is not all. The Bolsheviks also conducted a sweeping transformation of the military within the first six months of taking power. During 1917, the soldiers and sailors (encouraged by the Bolsheviks and other revolutionaries) had formed their own committees and elected officers. In March 1918, Trotsky simply abolished all this by decree and replaced it with appointed officers (usually ex-Tsarist ones). In this way, the Red Army was turned from a workers’ militia (i.e. an armed people) into a “*special body*” separate from the general population (see section 15 for further discussion on this subject).

So instead of eliminating a “*special force*” above the people, the Bolsheviks did the opposite by creating a political police force (the Cheka) and a standing army (in which elections were set aside by decree). These were special, professional, armed forces standing apart from the people and unaccountable to them. Indeed, they were used to repress strikes and working class unrest, a topic we now turn to.

Then there is the idea of that Lenin’s “workers’ state” would simply be an instrument of violence directed at the exploiters. This was not how it turned out in practice. As the Bolsheviks lost popular support, they turned the violence of the “worker’s state” against the workers (and, of course, the peasants). As noted above, when the Bolsheviks lost soviet elections they used force to disband them (see section 6 for further details). Faced with strikes and working class protest during this period, the Bolsheviks responded with state violence (see section 5 of the appendix on “What caused the degeneration of the Russian Revolution?” for details). We will discuss the implications of this for Lenin’s theory below. So, as regards the claim that the new (“workers”) state would repress only the exploiters, the truth was that it was used to repress whoever opposed Bolshevik power, including workers and peasants.

As can be seen, after the first six months of Bolshevik rule not a single measure advocated by Lenin in **State and Revolution** existed in “revolutionary” Russia. Some of the promises were broken in quiet quickly (overnight, in one case). Most took longer. For example, the democratisation of the armed forces had been decreed in late December 1917. However, this was simply acknowledging the existing revolutionary gains of the military personnel. Similarly, the Bolsheviks passed a decree on workers’ control which, again, simply acknowledged the actual gains by the grassroots (and, in fact, limited them for further development — see section 9). This cannot be taken as evidence of the democratic nature of Bolshevism as most governments faced with a revolutionary movement will acknowledge and “legalise” the facts on the ground (until such time as they can neutralise or destroy them). For example, the Provisional Government created after the February Revolution also legalised the revolutionary gains of the workers (for example, legalising the soviets, factory committees, unions, strikes and so forth). The real question is whether Bolshevism continued to encourage these revolutionary gains once it had consolidated its power. Which they did not. Indeed, it can be argued that the Bolsheviks simply managed to do what the Provisional Government it replaced had failed to do, namely destroy the various organs of popular self-management created by the revolutionary masses. So the significant fact is not that the Bolsheviks recognised the gains of the masses but that their toleration of the application of what their followers say were their real principles did not last long and was quickly ended. Moreover, when the leading Bolsheviks looked back at this abolition they did not consider it in any way in contradiction to the principles of “communism” (see section 14).

We have stressed this period for a reason. This was the period **before** the out-break of major Civil War and thus the policies applied show the actual nature of Bolshevism, it’s essence if you like. This is a significant date as most Leninists blame the failure of Lenin to live up to his promises on this even. In reality, the civil war was **not** the reason for these betrayals — simply because it had not started yet (see section 16 on when the civil war started and its impact). Each of the promises were broken in turn months before the civil war happened.

“*All Power to the Soviets*” became, very quickly, “*All Power to the Bolsheviks*.” In the words of historian Marc Ferro:

*“In a way, **The State and Revolution** even laid the foundations and sketched out the essential features of an alternative to Bolshevik power, and only the pro-Leninist tradition has used it, almost to quieten its conscience, because Lenin, once in power, ignored its conclusions. The Bolsheviks, far from causing the state to wither away, found endless reasons for justifying its enforcement.”* [October 1917, pp. 213–4]

Where does that leave Lenin’s **State and Revolution**? Well, modern-day Leninists still urge us to read it, considering it his greatest work and the best introduction to what Leninism really stands for. For example, we find Leninist Tony Cliff calling that book “*Lenin’s real testament*” while, at the same time, acknowledging that its “*message . . . which was the guide for the first victorious proletarian revolution, was violated again and again during the civil war.*” Not a very good “*guide*” or that convincing a “*message*” if it was not applicable in the very circumstances it was designed to be applied in (a bit like saying you have an excellent umbrella but it only works when it is not raining). Moreover, Cliff is factually incorrect. The Bolsheviks “*violated*” that “*guide*” before the civil war started (i.e. when “*the victories of the Czechoslovak troops over the Red Army in June 1918, that threatened the greatest danger to the Soviet republic,*” to quote Cliff). Similarly, much of the economic policies implemented by the Bolsheviks had their roots in that book and the other writings by Lenin from 1917 (see section 5 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”). [Lenin, vol. 3, p. 161 and p. 18]

Given this, what use is Lenin’s **State and Revolution**? If this really was the “*guide*” it is claimed to be, the fact that it proved totally impractical suggests it should simply be ignored. Simply put, if the side effects of a revolution (such as civil war) require it to be ripped up then modern Leninists should come clean and admit that revolution and workers’ democracy simply do not go together. This was, after all, the conclusion of Lenin and Trotsky (see section H.3.8). As such, they should not recommend Lenin’s work as an example of what Bolshevism aims for. If, however, the basic idea of workers’ democracy and freedom are valid and considered the only way of achieving socialism then we need to wonder **why** the Bolsheviks did not apply them when they had the chance, particularly when the Makhnovists in the Ukraine did. Such an investigation would only end up by concluding the validity of anarchism, **not** Leninism.

This can be seen from the trajectory of Bolshevik ideology post-October. Simply put, it was not bothered by the breaking of the promises of **State and Revolution** and 1917 in general. As such, Cliff is just wrong to assert that while the message of **State and Revolution** was “*violated again and again*” it “*was also invoked again and again against bureaucratic degeneration.*” [Cliff, **Op. Cit.**, p. 161] Far from it. Lenin’s **State and Revolution** was rarely invoked against degeneration by the mainstream Bolshevik leadership. Indeed, they happily supported party dictatorship and one-man management. Ironically for Cliff, it **was** famously invoked against the state capitalist policies being implemented in early 1918. This was done by the “Left Communists”

around Bukharin in their defence of workers' self-management against Lenin's policy! Lenin told them to reread it (along with his other 1917 works) to see that "state capitalism" was his aim all along! Not only that, he quoted from **State and Revolution**. He argued that "*accounting and control*" was required "*for the proper functioning of the first stage of communist society.*" "*And this control,*" he continued, "*must be established not only over 'the insignificant capitalist minority, over the gentry . . .', but also over the workers who 'have been thoroughly corrupted by capitalism . . .'*" He ended by saying it was "*significant that Bukharin did **not** emphasise **this**.*" [**Collected Works**, vol. 27, pp. 353–4] Needless to say, the Leninists who urge us to read Lenin's work do not emphasize that either.

As the Bolsheviks lost more and more support, the number of workers "*thoroughly corrupted by capitalism*" increased. How to identify them was easy: they did not support the party. As historian Richard summarises, a "*lack of identification with the Bolshevik party was treated as the absence of political consciousness altogether.*" [**Soviet Communists in Power**, p. 94] This is the logical conclusion of vanguardism, of course (see section H.5.3). However, to acknowledge that state violence was also required to "control" the working class totally undermines the argument of **State and Revolution**.

This is easy to see and to prove theoretically. For example, by 1920, Lenin was more than happy to admit that the "workers' state" used violence against the masses. At a conference of his political police, the Cheka, Lenin argued as follows:

"Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves." [**Collected Works**, vol. 42, p. 170]

This was simply summarising Bolshevik practice from the start. However, in **State and Revolution** Lenin had argued for imposing "*a series of restrictions on the freedom of the oppressors, the exploiters, the capitalists.*" In 1917 he was "*clear that where is suppression there is also violence, there is no freedom, no democracy.*" [**Op. Cit.**, pp. 337–8] So if violence is directed against the working class then, obviously, there can be "*no freedom, no democracy*" for that class. And who identifies who the "*wavering and unstable*" elements are? Only the party. Thus any expression of workers' democracy which conflicts with the party is a candidate for "*revolutionary coercion.*" So it probably just as well that the Bolsheviks had eliminated military democracy in March, 1918.

Trotsky expands on the obvious autocratic implications of this in 1921 when he attacked the Workers' Opposition's ideas on economic democracy:

"The Party . . . is . . . duty bound to retain its dictatorship, regardless of the temporary vacillations of the amorphous masses, regardless of the temporary vacillations even of the working class. This awareness is essential for cohesion; without it the Party is in danger of perishing . . . At any given moment, the dictatorship does not rest on the formal principle of workers' democracy . . . if we look upon workers' democracy as something unconditional . . . then . . . every plant

should elect its own administrative organs and so on . . . From a formal point of view this is the clearest link with workers' democracy. But we are against it. Why? . . . Because, in the first place, we want to retain the dictatorship of the Party, and, in the second place, because we think that the [democratic] way of managing important and essential plants is bound to be incompetent and prove a failure from an economic point of view . . . [quoted by Jay B. Sorenson, **The Life and Death of Soviet Trade Unionism**, p. 165]

Thus the Russian Revolution and the Bolshevik regime confirmed anarchist theory and predictions about state socialism. In the words of Luigi Fabbri:

“It is fairly certain that between the capitalist regime and the socialist there will be an intervening period of struggle, during which proletariat revolutionary workers will have to work to uproot the remnants of bourgeois society . . . But if the object of this struggle and this organisation is to free the proletariat from exploitation and state rule, then the role of guide, tutor or director cannot be entrusted to a new state, which would have an interest in pointing the revolution in a completely opposite direction. . .

“The outcome would be that a new government — battenning on the revolution and acting throughout the more or less extended period of its ‘provisional’ powers — would lay down the bureaucratic, military and economic foundations of a new and lasting state organisation, around which a compact network of interests and privileges would, naturally, be woven. Thus in a short space of time what one would have would not be the state abolished, but a state stronger and more energetic than its predecessor and which would come to exercise those functions proper to it — the ones Marx recognised as being such — ‘keeping the great majority of producers under the yoke of a numerically small exploiting minority.’

“This is the lesson that the history of all revolutions teaches us, from the most ancient down to the most recent; and it is confirmed . . . by the day-to-day developments of the Russian revolution . . .

“Certainly, [state violence] starts out being used against the old power . . . But as the new power goes on consolidating its position . . . ever more frequently and ever more severely, the mailed fist of dictatorship is turned against the proletariat itself in whose name that dictatorship was set up and is operated! . . . the actions of the present Russian government [of Lenin and Trotsky] have shown that in real terms (and it could not be otherwise) the ‘dictatorship of the proletariat’ means police, military, political and economic dictatorship exercised over the broad mass of the proletariat in city and country by the few leaders of the political party.

“The violence of the state always ends up being used AGAINST ITS SUBJECTS, of whom the vast majority are always proletarians . . . The new government will be able to expropriate the old ruling class in whole or in part, but only so as to establish a new ruling class that will hold the greater part of the proletariat in subjection.

“That will come to pass if those who make up the government and the bureaucratic, military and police minority that upholds it end up becoming the real owners of wealth when the property of everyone is made over exclusively to the state. In the first place, the failure of the revolution will be self evident. In the second, in spite of the illusions that many people create, the conditions of the proletariat will always be those of a subject class.” [“Anarchy and ‘Scientific’ Communism”, in **The Poverty of Statism**, pp. 13–49, Albert Meltzer (ed.), pp. 26–31]

The standard response by most modern Leninists to arguments like this about Bolshevism is simply to downplay the authoritarianism of the Bolsheviks by stressing the effects of the civil war on shaping their ideology and actions. However, this fails to address the key issue of why the reality of Bolshevism (even before the civil war) was so different to the rhetoric. Anarchists, as we discuss in “How did Bolshevik ideology contribute to the failure of the Revolution?”, can point to certain aspects of Bolshevik ideology and the social structures it favoured which can explain it. The problems facing the revolution simply brought to the fore the limitations and dangers inherent in Leninism and, moreover, shaping them in distinctive ways. We draw the conclusion that a future revolution, as it will face similar problems, would be wise to avoid applying Leninist ideology and the authoritarian practices it allows and, indeed, promotes by its support of centralisation, confusion of party power with class power, vanguardism and equation of state capitalism with socialism. Leninists, in contrast, can only stress the fact that the revolution was occurring in difficult circumstances and hope that “fate” is more kind to them next time — as if a revolution, as Lenin himself noted in 1917, would not occur during nor create “difficult” circumstances! Equally, they can draw no lessons (bar repeat what the Bolsheviks did in 1917 and hope for better objective circumstances!) from the Russian experience simply because they are blind to the limitations of their politics. They are thus doomed to repeat history rather than make it.

So where does this analysis of Lenin’s **State and Revolution** and the realities of Bolshevik power get us? The conclusions of dissent Marxist Samuel Farber seem appropriate here. As he puts it, “*the very fact that a Sovnarkom had been created as a separate body from the CEC [Central Executive Committee] of the soviets clearly indicates that, Lenin’s **State and Revolution** notwithstanding, the separation of at least the top bodies of the executive and the legislative wings of the government remained in effect in the new Soviet system.*” This suggests “*that **State and Revolution** did not play a decisive role as a source of policy guidelines for ‘Leninism in power.’*” After all, “*immediately after the Revolution the Bolsheviks established an executive power . . . as a clearly separate body from the leading body of the legislature. . . Therefore, some sections of the contemporary Left appear to have greatly overestimated the importance that **State and Revolution** had for Lenin’s government. I would suggest that this document . . . can be better understood as a distant, although doubtless sincere [!], socio-political vision . . . as opposed to its having been a programmatic political statement, let alone a guide to action, for the period immediately after the successful seizure of power.*” [Farber, **Op. Cit.**, pp. 20–1 and p. 38]

That is **one** way of looking at it. Another would be to draw the conclusion that a “*distant . . . socio-political vision*” drawn up to sound like a “*guide to*

action” which was then immediately ignored is, at worse, little more than a deception, or, at best, a theoretical justification for seizing power in the face of orthodox Marxist dogma. Whatever the rationale for Lenin writing his book, one thing is true — it was never implemented. Strange, then, that Leninists today urge use to read it to see what “Lenin really wanted.” Particularly given that so few of its promises were actually implemented (those that were just recognised the facts on the ground) and **all** of were no longer applied in less than six months after the seize of power.

The best that can be said is that Lenin did want this vision to be applied but the realities of revolutionary Russia, the objective problems facing the revolution, made its application impossible. This is the standard Leninist account of the revolution. They seem unconcerned that they have just admitted that Lenin’s ideas were utterly impractical for the real problems that any revolution is most likely to face. This was the conclusion Lenin himself drew, as did the rest of the Bolshevik leadership. This can be seen from the actual practice of “Leninism in power” and the arguments it used. And yet, for some reason, Lenin’s book is still recommended by modern Leninists!

5 Did the Bolsheviks really aim for Soviet power?

It seems a truism for modern day Leninists that the Bolsheviks stood for “soviet power.” For example, they like to note that the Bolsheviks used the slogan “*All Power to the Soviets*” in 1917 as evidence. However, for the Bolsheviks this slogan had a radically different meaning to what many people would consider it to mean.

As we discuss in section 25, it was the anarchists (and those close to them, like the SR-Maximalists) who first raised the idea of soviets as the means by which the masses could run society. This was during the 1905 revolution. At that time, neither the Mensheviks nor the Bolsheviks viewed the soviets as the possible framework of a socialist society. This was still the case in 1917, until Lenin returned to Russia and convinced the Bolshevik Party that the time was right to raise the slogan “*All Power to the Soviets*.”

However, as well as this, Lenin also advocated a somewhat different vision of what a Bolshevik revolution would result in. Thus we find Lenin in 1917 continually repeating the basic idea: “*The Bolsheviks must assume power*.” The Bolsheviks “*can and **must** take state power into their own hands*.” He raised the question of “*will the Bolsheviks dare take over full state power alone?*” and answered it: “*I have already had occasion . . . to answer this question in the affirmative*.” Moreover, “*a political party . . . would have no right to exist, would be unworthy of the name of party . . . if it refused to take power when opportunity offers*.” [Selected Works, vol. 2, p 328, p. 329 and p. 352]

He equated party power with popular power: “*the power of the Bolsheviks — that is, the power of the proletariat*.” Moreover, he argued that Russia “*was ruled by 130,000 landowners . . . and they tell us that Russia will not be able to be governed by the 240,000 members of the Bolshevik Party — governing in the interest of the poor and against the rich*.” He stresses that the Bolsheviks “*are not Utopians. We know that just any labourer or any cook would be incapable of taking over immediately the administration of the State*.” Therefore they “*demand that the teaching should be conducted by the class-consciousness workers*

and soldiers, that this should be started immediately.” Until then, the “*conscious workers must be in control.*” [**Will the Bolsheviks Maintain Power?** p. 102, pp. 61–62, p. 66 and p. 68]

As such, given this clear and unambiguous position throughout 1917 by Lenin, it seems incredulous, to say the least, for Leninist Tony Cliff to assert that “[t]o start with Lenin spoke of the **proletariat**, the **class** — not the Bolshevik Party — assuming state power.” [Lenin, vol. 3, p. 161] Surely the title of one of Lenin’s most famous pre-October essays, usually translated as “*Can the Bolsheviks Retain State Power?*”, should have given the game away? As would, surely, quoting numerous calls by Lenin for the Bolsheviks to seize power? Apparently not.

This means, of course, Lenin is admitting that the working class in Russia would **not** have power under the Bolsheviks. Rather than “the poor” governing society directly, we would have **the Bolsheviks** governing in their interests. Thus, rather than soviet power as such, the Bolsheviks aimed for “party power through the soviets” — a radically different position. And as we discuss in the next section, when soviet power clashed with party power the former was always sacrificed to ensure the latter. As we indicate in section H.1.2, this support for party power before the revolution was soon transformed into a defence for party dictatorship after the Bolsheviks had seized power. However, we should not forget, to quote one historian, that the Bolshevik leaders “*anticipated a ‘dictatorship of the proletariat,’ and that concept was a good deal closer to a party dictatorship in Lenin’s 1917 usage than revisionist scholars sometimes suggest.*” [Sheila Fitzpatrick, “*The Legacy of the Civil War,*” pp. 385–398, **Party, State, and Society in the Russian Civil War**, Diane P. Koenker, William G. Rosenberg and Ronald Grigor Suny (eds.), p. 388]

While modern-day Leninists tend to stress the assumption of power by the soviets as the goal of the Bolshevik revolution, the Bolsheviks themselves were more honest about it. For example, Trotsky quotes Lenin at the first soviet congress stating that it was “*not true to say that no party exists which is ready to assume power; such a party exists: this is our party.*” Moreover, “[o]ur party is ready to assume power.” As the Second Congress approached, Lenin “*rebuked those who connected the uprising with the Second Congress of the Soviets.*” He protested against Trotsky’s argument that they needed a Bolshevik majority at the Second Congress, arguing (according to Trotsky) that “[w]e have to win power and not tie ourselves to the Congress. It was ridiculous and absurd to warn the enemy about the date of the rising . . . First the party must seize power, arms in hand, and then we could talk about the Congress.” [**On Lenin**, p. 71, p. 85]

Trotsky argued that “*the party could not seize power by itself, independently of the Soviets and behind its back. This would have been a mistake . . . [as the] soldiers knew their delegates in the Soviet; it was through the Soviet that they knew the party. If the uprising had taken place behind the back of the Soviet, independently of it, without its authority . . . there might have been a dangerous confusion among the troops.*” Significantly, Trotsky made no mention of the proletariat. Finally, Lenin came over to Trotsky’s position, saying “*Oh, all right, one can proceed in this fashion as well, provided we seize power.*” [**Op. Cit.**, p. 86 and p. 89]

Trotsky made similar arguments in his **History of the Russian Revolution** and his article **Lessons of October**. Discussing the July Days of 1917, for

example, Trotsky discusses whether (to quote the title of the relevant chapter) “*Could the Bolsheviks have seized the Power in July?*” and noted, in passing, the army “*was far from ready to raise an insurrection in order to give the power to the Bolshevik Party.*” As far as the workers were concerned, although “*inclining toward the Bolsheviks in its overwhelming majority, had still not broken the umbilical cord attaching it to the Compromisers*” and so the Bolsheviks could not have “*seized the helm in July.*” He then lists other parts of the country where the soviets were ready to take power. He states that in “*a majority of provinces and county seats, the situation was incomparably less favourable*” simply because the Bolsheviks were not as well supported. Later he notes that “[*m*any of the provincial soviets had already, before the July days, become organs of power.” Thus Trotsky was only interested in whether the workers could have put the Bolsheviks in power or not rather than were the soviets able to take power themselves. Party power was the decisive criteria. [**History of the Russian Revolution**, vol. 2, p. 78, p. 77, p. 78, p. 81 and p. 281]

This can be seen from the October insurrection. Trotsky again admits that the “*Bolsheviks could have seized power in Petrograd at the beginning of July*” but “*they could not have held it.*” However, by September the Bolsheviks had gained majorities in the Petrograd and Moscow soviets. The second Congress of Soviets was approaching. The time was considered appropriate to think of insurrection. By in whose name and for what end? Trotsky makes it clear. “*A revolutionary party is interested in legal coverings,*” he argued and so the party could use the defending the second Congress of Soviets as the means to justify its seizure of power. He raises the question: “*Would it not have been simpler . . . to summon the insurrection directly in the name of the party?*” and answers it in the negative. “*It would be an obvious mistake,*” he argued, “*to identify the strength of the Bolshevik party with the strength of the soviets led by it. The latter was much greater than the former. However, without the former it would have been mere impotence.*” He then quotes numerous Bolshevik delegates arguing that the masses would follow the soviet, not the party. Hence the importance of seizing power in the name of the soviets, regardless of the fact it was the Bolshevik party who would in practice hold “*all power.*” Trotsky quotes Lenin are asking “*Who is to seize power?*” “*That is now of no importance,*” argued Lenin. “*Let the Military Revolutionary Committee take it, or ‘some other institution,’ which will declare that it will surrender the power only to the genuine representatives of the interests of the people.*” Trotsky notes that “*some other institution*” was a “*conspirative designation for the Central Committee of the Bolsheviks.*” And who turned out to be the “*genuine representatives of the interests of the people*”? By amazing co-incidence the Bolsheviks, the members of whose Central Committee formed the first “soviet” government. [**Op. Cit.**, vol. 3, p. 265, p. 259, p. 262, p. 263 and p. 267]

As we discuss in section H.3.11, Trotsky was simply repeating the same instrumentalist arguments he had made earlier. Clearly, the support for the soviets was purely instrumental, simply a means of securing party power. For Bolshevism, the party was the key institution of proletarian revolution:

“The party set the soviets in motion, the soviets set in motion the workers, soldiers, and to some extent the peasantry . . . If you represent this conducting apparatus as a system of cog-wheels — a comparison which Lenin had recourse at another period on another

theme — you may say that the impatient attempt to connect the party wheel directly with the gigantic wheel of the masses — omitting the medium-sized wheel of the soviets — would have given rise to the danger of breaking the teeth of the party wheel. [Trotsky, **Op. Cit.**, p. 264]

Thus the soviets existed to allow the party to influence the workers. What of the workers running society directly? What if the workers reject the decisions of the party? After all, **before** the revolution Lenin “*more than once repeated that the masses are far to the left of the party, just as the party is to the left of the Central Committee.*” [Trotsky, **Op. Cit.**, p. 258] What happens when the workers refuse to be set in motion by the party but instead set themselves in motion and reject the Bolsheviks? What then for the soviets? Looking at the logic of Trotsky’s instrumentalist perspective, in such a case we would predict that the soviets would have to be tamed (by whatever means possible) in favour of party power (the real goal). And this is what did happen. The fate of the soviets after October prove that the Bolsheviks did not, in fact, seek soviet power without doubt (see next section). And as we discuss in section 4 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the peculiar Bolshevik definition of “soviet power” allowed them to justify the elimination of from the bottom-up grassroots democracy in the military and in the workplace with top-down appointments.

Thus we have a distinctly strange meaning by the expression “*All Power to the Soviets.*” In practice, it meant that the soviets alienate its power to a Bolshevik government. This is what the Bolsheviks considered as “soviet power,” namely party power, pure and simple. As the Central Committee argued in November 1917, “*it is impossible to refuse a purely Bolshevik government without treason to the slogan of the power of the Soviets, since a majority at the Second All-Russian Congress of Soviets . . . handed power over to this government.*” [contained in Robert v. Daniels (ed.), **A Documentary History of Communism**, vol. 1, pp. 128–9] Lenin was clear, arguing mere days after the October Revolution that “*our present slogan is: No Compromise, i.e. for a homogeneous Bolshevik government.*” [quoted by Daniels, **Conscience of the Revolution**, p. 65]

In other words, “soviet power” exists when the soviets hand power over to someone else (namely the Bolshevik leaders)! The difference is important, “*for the Anarchists declared, if ‘power’ really should belong to the soviets, it could not belong to the Bolshevik party, and if it should belong to that Party, as the Bolsheviks envisaged, it could not belong to the soviets.*” [Voline, **The Unknown Revolution**, p. 213]

Which means that while anarchists and Leninists both use the expression “*All Power to the Soviets*” it does not mean they mean exactly the same thing by it. In practice the Bolshevik vision simply replaced the power of the soviets with a “soviet power” above them:

“The success of the Bolsheviks in the October Revolution — that is to say, the fact that they found themselves in power and from there subordinated the whole Revolution to their Party is explained by their ability to substitute the idea of a Soviet power for the social revolution and the social emancipation of the masses. A priori, these

*two ideas appear as non-contradictory for it was possible to understand Soviet power as the power of the soviets, and this facilitated the substitution of the idea of Soviet power for that of the Revolution. Nevertheless, in their realisation and consequences these ideas were in violent contraction to each other. The conception of Soviet Power incarnated in the Bolshevik state, was transformed into an entirely traditional bourgeois power concentrated in a handful of individuals who subjected to their authority all that was fundamental and most powerful in the life of the people — in this particular case, the social revolution. Therefore, with the help of the ‘power of the soviets’ — in which the Bolsheviks monopolised most of the posts — they effectively attained a total power and could proclaim their dictatorship throughout the revolutionary territory . . . All was reduced to a single centre, from where all instructions emanated concerning the way of life, of thought, of action of the working masses.” [Peter Arshinov, **The Two Octobers**]*

Isolated from the masses, holding power on their behalf, the Bolshevik party could not help being influenced by the realities of their position in society and the social relationships produced by statist forms. Far from being the servants of the people, they become upon the seizing of power their masters. As we argue in section 7 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the experience of Bolshevism in power confirmed anarchist fears that the so-called “workers’ state” would quickly become a danger to the revolution, corrupting those who held power and generating a bureaucracy around the new state bodies which came into conflict with both the ruling party and the masses. Placed above the people, isolated from them by centralisation of power, the Bolsheviks pre-revolutionary aim for party power unsurprising became in practice party dictatorship.

In less than a year, by July 1918, the soviet regime was a **de facto** party dictatorship. The theoretical revisions soon followed. Lenin, for example, was proclaiming in early December 1918 that while legalising the Mensheviks the Bolsheviks would “*reserve state power for ourselves, and for ourselves alone.*” [**Collected Works**, vol. 28, p. 213] Victor Serge records how when he arrived in Russia in the following month he discovered “*a colourless article*” signed by Zinoviev on “*The Monopoly of Power*” which said “*Our Party rules alone . . . it will not allow anyone . . . The false democratic liberties demanded by the counter-revolution.*” [**Memoirs of a Revolutionary**, p. 69] Serge, like most Bolsheviks, embraced this perspective wholeheartedly. For example, when the Bolsheviks published Bakunin’s “confession” to the Tsar in 1921 (in an attempt to discredit anarchism) “*Serge seized on Bakunin’s passage concerning the need for dictatorial rule in Russia, suggesting that ‘already in 1848 Bakunin had pre-saged Bolshevism.’*” [Lawrence D. Orton, “*introduction,*” **The Confession of Mikhail Bakunin**, p. 21] At the time Bakunin wrote his “confession” he was not an anarchist. At the time Serge wrote his comments, he was a leading Bolshevik and reflecting mainstream Bolshevik ideology.

Indeed, so important was it considered by them, the Bolsheviks revised their theory of the state to include this particular lesson of their revolution (see section H.3.8 for details). As noted in section H.1.2, all the leading Bolsheviks were talking about the “*dictatorship of the party*” and continued to do so until

their deaths. Such a position, incidentally, is hard to square with support for soviet power in any meaningful term (although it is easy to square with an instrumentalist position on workers' councils as a means to party power). It was only in the mid-30s that Serge started to revise his position for this position (Trotsky still subscribed to it). By the early 1940s, he wrote that "[a]gainst the Party the anarchists were right when they inscribed on their black banners, 'There is no worse poison than power' — meaning absolute power. From now on the psychosis of power was to captive the great majority of the leadership, especially at the lower levels." [Serge, **Op. Cit.**, p. 100]

Nor can the effects of the civil war explain this shift. As we discuss in the next section, the Bolshevik assault on the soviets and their power started in the spring of 1918, months before the start of large scale civil war. And it should be stressed that the Bolsheviks were not at all bothered by the creation of party dictatorship over the soviets. Indeed, in spite of ruling over a one party state Lenin was arguing in November 1918 that "*Soviet power is a million times more democratic than the most democratic bourgeois republic.*" How can that be when the workers do not run society nor have a say in who rules them? When Karl Kautsky raised this issue, Lenin replied by saying he "*fails to see the **class** nature of the state apparatus, of the machinery of state . . . The Soviet government is the **first** in the world . . . to **enlist** the people, specifically the **exploited** people in the work of administration.*" [**Collected Works**, vol. 28, p. 247 and p. 248]

However, the key issue is not whether workers take part in the state machinery but whether they determine the policies that are being implemented, i.e. whether the masses are running their own lives. After all, as Ante Ciliga pointed out, the Stalinist GPU (secret police) "*liked to boast of the working class origin of its henchmen.*" One of his fellow prisoners retorted to such claims by pointing out they were "*wrong to believe that in the days the Tsar the gaolers were recruited from among the dukes and the executioners from among the princes!*" [**The Russian Engima**, pp. 255–6] Simply put, just because the state administration is made up of bureaucrats who were originally working class does not mean that the working class, as a class, manages society.

In December of that year Lenin went one further and noted that at the Sixth Soviet Congress "*the Bolsheviks had 97 per cent*" of delegates, i.e. "*practically all representatives of the workers and peasants of the whole of Russia.*" This was proof of "*how stupid and ridiculous is the bourgeois fairy-tale about the Bolsheviks only having minority support.*" [**Op. Cit.**, pp. 355–6] Given that the workers and peasants had no real choice in who to vote for, can this result be surprising? Of course not. While the Bolsheviks **had** mass support a year previously, pointing to election results under a dictatorship where all other parties and groups are subject to state repression is hardly convincing evidence for current support. Needless to say, Stalin (like a host of other dictators) made similar claims on similarly dubious election results. If the Bolsheviks were sincere in their support for soviet power then they would have tried to organise genuine soviet elections. This was possible even during the civil war as the example of the Makhnovists showed.

So, in a nutshell, the Bolsheviks did not fundamentally support the goal of soviet power. Rather, they aimed to create a "soviet power," a Bolshevik power above the soviets which derived its legitimacy from them. However, if the soviets conflicted with that power, it were the soviets which were repudiated

not party power. Thus the result of Bolshevik ideology was the marginalisation of the soviets and their replacement by Bolshevik dictatorship. This process started before the civil war and can be traced to the nature of the state as well as the underlying assumptions of Bolshevik ideology (see “How did Bolshevik ideology contribute to the failure of the Revolution?”).

6 What happened to the soviets after October?

As indicated in the last question, the last thing which the Bolsheviks wanted was “*all power to the soviets.*” Rather they wanted the soviets to hand over that power to a Bolshevik government. As the people in liberal capitalist politics, the soviets were “sovereign” in name only. They were expected to delegate power to a government. Like the “sovereign people” of bourgeois republics, the soviets were much praised but in practice ignored by those with real power.

In such a situation, we would expect the soviets to play no meaningful role in the new “workers’ state.” Under such a centralised system, we would expect the soviets to become little more than a fig-leaf for party power. Unsurprisingly, this is **exactly** what they did become. As we discuss in section 7 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, anarchists are not surprised by this as the centralisation so beloved by Marxists is designed to empower the few at the centre and marginalise the many at the circumference.

The very first act of the Bolshevik revolution was for the Second Congress of Soviets to alienate its power and hand it over to the “Council of People’s Commissars.” This was the new government and was totally Bolshevik in make-up (the Left SRs later joined it, although the Bolsheviks always maintained control). Thus the first act of the revolution was the creation of a power **above** the soviets. Although derived from the soviet congress, it was not identical to it. Thus the Bolshevik “workers’ state” or “semi-state” started to have the same characteristics as the normal state (see section H.3.7 for a discussion of what marks a state).

The subsequent marginalisation of the soviets in the “soviet” state occurred from top to bottom should not, therefore be considered an accident or a surprise. The Bolshevik desire for party power within a highly centralised state could have no other effect. At the top, the Central Executive Committee (CEC or VTsIK) was quickly marginalised from power. This body was meant to be the highest organ of soviet power but, in practice, it was sidelined by the Bolshevik government. This can be seen when, just four days after seizing power, the Bolshevik Council of People’s Commissars (CPC or Sovnarkom) “*unilaterally arrogated to itself legislative power simply by promulgating a decree to this effect. This was, effectively, a Bolshevik **coup d’etat** that made clear the government’s (and party’s) pre-eminence over the soviets and their executive organ. Increasingly, the Bolsheviks relied upon the appointment from above of commissars with plenipotentiary powers, and they split up and reconstituted fractious Soviets and intimidated political opponents.*” [Neil Harding, **Leninism**, p. 253] Strange actions for a party proclaiming it was acting to ensure “All power to the soviets” (as we discussed in the last section, this was always considered by Lenin as little more than a slogan to hide the fact that the party would be in power).

It is doubtful that when readers of Lenin's **State and Revolution** read his argument for combining legislative and executive powers into one body, they had this in mind! But then, as we discussed in section 4, that work was never applied in practice so we should not be too surprised by this turn of events. One thing is sure, four days after the "soviet" revolution the soviets had been replaced as the effective power in society by a handful of Bolshevik leaders. So the Bolsheviks immediately created a power **above** the soviets in the form of the CPC. Lenin's argument in **The State and Revolution** that, like the Paris Commune, the workers' state would be based on a fusion of executive and administrative functions in the hands of the workers' delegates did not last one night. In reality, the Bolshevik party was the **real** power in "soviet" Russia.

Given that the All-Russian central Executive Committee of Soviets (VTsIK) was dominated by Bolsheviks, it comes as no surprise to discover it was used to augment this centralisation of power into the hands of the party. The VTsIK (*"charged by the October revolution with controlling the government,"* the Sovnarkom) was *"used not to control but rather extend the authority and centralising fiat of the government. That was the work of Iakov Sverdlov, the VTsIK chairman, who — in close collaboration with Lenin as chairman of the Sovnarkom — ensured that the government decrees and ordinances were by the VTsIK and that they were thus endowed with Soviet legitimacy when they were sent to provincial soviet executive committees for transmission to all local soviets . . . To achieve that, Sverdlov had to reduce the 'Soviet Parliament' to nothing more than an 'administrative branch' (as Sukhanov put it) of the Sovnarkom. Using his position as the VTsIK chairman and his tight control over its praesidium and the large, disciplined and compliant Bolshevik majority in the plenary assembly, Sverdlov isolated the opposition and rendered it impotent. So successful was he that, by early December 1917, Sukhanov had already written off the VTsIK as 'a sorry parody of a revolutionary parliament,' while for the Bolshevik, Martin Latsis-Zurabs, the VTsIK was not even a good rubberstamp. Latsis campaigned vigorously in March and April 1918 for the VTsIK's abolition: with its 'idle, long-winded talk and its incapacity for productive work' the VTsIK merely held up the work of government, he claimed. And he may have had a point: during the period of 1917 to 1918, the Sovnarkom issued 474 decrees, the VTsIK a mere 62."* [Israel Getzler, **Soviets as Agents of Democratisation**, p. 27]

This process was not an accident. Far from it. In fact, the Bolshevik chairman Sverdlov knew exactly what he was doing. This included modifying the way the CEC worked:

"The structure of VTsIK itself began to change under Sverdlov. He began to use the presidium to circumvent the general meeting, which contained eloquent minority spokesmen . . . Sverdlov's used of the presidium marked a decisive change in the status of that body within the soviet hierarchy. In mid-1917 . . . [the] plenum had directed all activities and ratified bureau decisions which had a 'particularly important social-political character.' The bureau . . . served as the executive organ of the VTsIK plenum . . . Only in extraordinary cases when the bureau could no be convened for technical reason could the presidium make decisions. Even then such actions remained subject to review by the plenum." [Charles Duval, "Yakov M. Sverdlov and

the All-Russian Central Executive Committee of Soviets (VTsIK)”, pp. 3–22, **Soviet Studies**, vol. XXXI, no. 1, January 1979, pp. 6–7]

Under the Bolsheviks, the presidium was converted “*into the **de facto** centre of power within VTsIK.*” It “*began to award representations to groups and factions which supported the government. With the VTsIK becoming ever more unwieldy in size by the day, the presidium began to expand its activities.*” The presidium was used “*to circumvent general meetings.*” Thus the Bolsheviks were able “*to increase the power of the presidium, postpone regular sessions, and present VTsIK with policies which had already been implemented by the Sovnarkon. Even in the presidium itself very few people determined policy.*” [Charles Duval, **Op. Cit.**, p.7, p. 8 and p. 18]

So, from the very outset, the VTsIK was overshadowed by the “Council of People’s Commissars” (CPC). In the first year, only 68 of 480 decrees issued by the CPC were actually submitted to the Soviet Central Executive Committee, and even fewer were actually drafted by it. The VTsIK functions “*were never clearly delineated, even in the constitution, despite vigorous attempts by the Left SRs . . . that Lenin never saw this highest soviet organ as the genuine equal of his cabin and that the Bolsheviks deliberated obstructed efforts at clarification is [a] convincing*” conclusion to draw. It should be stressed that this process started before the outbreak of civil war in late May, 1918. After that the All-Russian Congress of soviets, which convened every three months or so during the first year of the revolution, met annually thereafter. Its elected VTsIK “*also began to meet less frequently, and at the height of the civil war in late 1918 and throughout 1919, it never once met in full session.*” [Carmen Sirianni, **Workers’ Control and Socialist Democracy**, pp. 203–4]

The marginalisation of the soviets can be seen from the decision on whether to continue the war against Germany. As Cornelius Castoriadis notes, under Lenin “*[c]ollectively, the only real instance of power is the Party, and very soon, only the summits of the Party. Immediately after the seizure of power the soviets as institutions are reduced to the status of pure window-dressing (we need only look at the fact that, already at the beginning of 1918 in the discussions leading up to the Brest-Litovsk Peace Treaty, their role was absolutely nil).*” [**The role of Bolshevik Ideology in the birth of the Bureaucracy**, p. 97] In fact, on the 26th of February, 1918, the Soviet Executive “*began a survey of 200 local soviets; by 10 March 1918 a majority (105–95) had come out in favour of a revolutionary war, although the soviets in the two capitals voted . . . to accept a separate peace.*” [Geoffrey Swain, **The Origins of the Russian Civil War**, p. 128] This survey was ignored by the Bolshevik Central Committee which voted 4 against, 4 abstain and 5 for it. This took Russia out of the Great War but handed over massive areas to imperialist Germany. The controversial treaty was ratified at the Fourth Soviet Congress, unsurprisingly as the Bolshevik majority simply followed the orders of their Central Committee. It would be pointless to go over the arguments of the rights and wrongs of the decision here, the point is that the 13 members of the Bolshevik Central Committee decided the future faith of Russia in this vote. The soviets were simply ignored in spite of the fact it was possible to consult them fully. Clearly, “soviet power” meant little more than window-dressing for Bolshevik power.

Thus, at the top summits of the state, the soviets had been marginalised by

the Bolsheviks from day one. Far from having “all power” their CEC had given that to a Bolshevik government. Rather than exercise real power, it’s basic aim was to control those who did exercise it. And the Bolsheviks successfully acted to undermine even this function.

If this was happening at the top, what was the situation at the grass-roots? Here, too, oligarchic tendencies in the soviets increased post-October, with “[e]ffective power in the local soviets relentlessly gravitated to the executive committees, and especially their presidia. Plenary sessions became increasingly symbolic and ineffectual.” The party was “successful in gaining control of soviet executives in the cities and at **uezd** and **guberniya** levels. These executive bodies were usually able to control soviet congresses, though the party often disbanded congresses that opposed major aspects of current policies.” Local soviets “had little input into the formation of national policy” and “[e]ven at higher levels, institutional power shifted away from the soviets.” [C. Sirianni, **Op. Cit.**, p. 204 and p. 203] The soviets quickly had become rubber-stamps for the Communist government, with the Soviet Constitution of 1918 codifying the centralisation of power and top-down decision making. Local soviets were expected to “carry out all orders of the respective higher organs of the soviet power” (i.e. to carry out the commands of the central government).

This was not all. While having popular support in October 1917, the realities of “Leninism in power” soon saw a backlash develop. The Bolsheviks started to lose popular support to opposition groups like the Mensheviks and SRs (left and right). This growing opposition was reflected in two ways. Firstly, a rise in working class protests in the form of strikes and independent organisations. Secondly, there was a rise in votes for the opposition parties in soviet elections. Faced with this, the Bolsheviks responded in three ways, delaying elections, gerrymandering or force. We will discuss each in turn.

Lenin argued in mid-April 1918 that the “socialist character of Soviet, i.e. **proletarian**, democracy” lies, in part, in because “the people themselves determine the order and time of elections.” [**The Immediate Tasks of the Soviet Government**, pp. 36–7] However, the reality in the grassroots was somewhat different. There “the government [was] continually postponed the new general elections to the Petrograd Soviet, the term of which had ended in March 1918” because it “feared that the opposition parties would show gains. This fear was well founded since in the period immediately preceding 25 January, in those Petrograd factories where the workers had decided to hold new elections, the Mensheviks, SRs, and non-affiliated candidates had won about half the seats.” [Samuel Farber, **Before Stalinism**, p. 22] In Yaroslavl, the more the Bolsheviks tried to postpone the elections, the more the idea of holding new elections became an issue itself.” When the Bolsheviks gave in and held elections in early April, the Mensheviks won 47 of the 98 seats, the Bolsheviks 38 and the SRs 13. [“The Mensheviks’ Political Comeback: The Elections to the Provincial City Soviets in Spring 1918”, **The Russian Review**, vol. 42, pp. 1–50, p. 18] The fate of the Yaroslavl soviet will be discussed shortly. As Geoffrey Swain summaries, Menshevik and SR “successes in recalling Bolshevik delegates from the soviets had forced the Bolsheviks increasingly to delay by-elections.” [**The Origins of the Russian Civil War**, p. 91]

As well as postponing elections and recall, the Bolsheviks also quickly turned to gerrymandering the soviets to ensure the stability of their majority in the soviets. In this they made use of certain institutional problems the soviets had

had from the start. On the day which the Petrograd soviet was formed in 1917, the Bolshevik Shlyapnikov “*proposed that each socialist party should have the right to two seats in the provisional executive committee of the soviet.*” This was “*designed, initially, to give the Bolsheviks a decent showing, for they were only a small minority of the initiating group.*” It was agreed. However, the “*result was that members of a dozen different parties and organisations (trades unions, co-operative movements, etc.) entered the executive committee. They called themselves ‘representatives’ (of their organisations) and, by virtue of this, they speedily eliminated from their discussions the committee members chosen by the general assembly although they were the true founders of the Soviet.*” This meant, for example, Bolshevik co-founders of the soviet made way for such people as Kamenev and Stalin. Thus the make-up of the soviet executive committee was decided upon by “*the leadership of each organisation, its executive officers, and not with the [soviet] assembly. The assembly had lost its right to control.*” Thus, for example, the Bolshevik central committee member Yoffe became the presidium of the soviet of district committees without being elected by anyone represented at those soviets. “*After October, the Bolsheviks were more systematic in their use of these methods, but there was a difference: there were now no truly free elections that might have put a brake to a procedure that could only benefit the Bolshevik party.*” [Marc Ferro, **October 1917**, p. 191 and p. 195]

The effects of this can be seen in Petrograd soviet elections of June 1918. In these the Bolsheviks “*lost the absolute majority in the soviet they had previously enjoyed*” but remained its largest party. However, the results of these elections were irrelevant. This was because “*under regulations prepared by the Bolsheviks and adopted by the ‘old’ Petrograd soviet, more than half of the projected 700-plus deputies in the ‘new’ soviet were to be elected by the Bolshevik-dominated district soviets, trade unions, factory committees, Red Army and naval units, and district worker conferences: thus, the Bolsheviks were assured of a solid majority even before factory voting began.*” [Alexander Rabinowitch, **Early Disenchantment with Bolshevik Rule**, p. 45] To be specific, the number of delegates elected directly from the workplace made up a mere third of the new soviet (i.e. only 260 of the 700 plus deputies in the new soviet were elected directly from the factories): “*It was this arbitrary ‘stacking’ of the new soviet, much more than election of ‘dead souls’ from shut-down factories, unfair campaign practices, falsification of the vote, or direct repression, that gave the Bolsheviks an unfair advantage in the contest.*” [Alexander Rabinowitch, **The Petrograd First City District Soviet during the Civil War**, p. 140]

In other words, the Bolsheviks gerrymandered and packed soviets to remain in power, so distorting the soviet structure to ensure Bolshevik dominance. This practice seems to have been commonplace. In Saratov, as in Petrograd, “*the Bolsheviks, fearing that they would lose elections, changed the electoral rules . . . in addition to the delegates elected directly at the factories, the trade unions — but only those in favour of soviet power, in other words supporters of the Bolsheviks and Left SRs — were given representation. Similarly, the political parties supporting Soviet power automatically received twenty-five seats in the soviets. Needless to say, these rules heavily favoured the ruling parties*” as the Mensheviks and SRs “*were regarded by the Bolsheviks as being against Soviet power.*” [Brovkin, **Op. Cit.**, p. 30]

A similar situation existed in Moscow. For example, the largest single union

in the soviet in 1920 was that of soviet employees with 140 deputies (9% of the total), followed by the metal workers with 121 (8%). In total, the bureaucracies of the four biggest trade unions had 29.5% of delegates in the Moscow soviet. This packing of the soviet by the trade union bureaucracy existed in 1918 as well, ensuring the Bolsheviks were insulated from popular opposition and the recall of workplace delegates by their electors. Another form of gerrymandering was uniting areas of Bolshevik strength “*for electoral purposes with places where they were weak, such as the creation of a single constituency out of the Moscow food administration (MPO) and the Cheka in February 1920.*” [Richard Sakwa, **Soviet Communists in Power**, p. 179 and p. 178]

However, this activity was mild compared to the Bolshevik response to soviet elections which did not go their way. According to one historian, by the spring of 1918 “*Menshevik newspapers and activists in the trade unions, the Soviets, and the factories had made a considerable impact on a working class which was becoming increasingly disillusioned with the Bolshevik regime, so much so that in many places the Bolsheviks felt constrained to dissolve Soviets or prevent re-elections where Mensheviks and Socialist Revolutionaries had gained majorities.*” [Israel Getzler, **Martov**, p. 179] This is confirmed by other sources. “*By the middle of 1918,*” notes Leonard Schapiro, “*the Mensheviks could claim with some justification that large numbers of the industrial working class were now behind them, and that for the systematic dispersal and packing of the soviets, and the mass arrests at workers’ meetings and congresses, their party could eventually have won power by its policy of constitutional opposition. In the elections to the soviets which were taking place in the spring of 1918 throughout Russia, arrests, military dispersal, even shootings followed whenever Mensheviks succeeded in winning majorities or a substantial representation.*” [**The Origin of the Communist Autocracy**, p. 191]

For example, the Mensheviks “*made something of a comeback about Saratov workers in the spring of 1918, for which the Bolsheviks expelled them from the soviet.*” [Donald J. Raleigh, **Experiencing Russia’s Civil War**, p. 187] Izhevsk, a town of 100,000 with an armaments industry which was the main suppliers of rifles to the Tzar’s Army, experienced a swing to the left by the time of the October revolution. The Bolsheviks and SR-Maximalists became the majority and with a vote 92 to 58 for the soviet to assume power. After a revolt by SR-Maximalist Red Guards against the Bolshevik plans for a centralised Red Army in April, 1918, the Bolsheviks became the sole power. However, in the May elections the Mensheviks and [right] SRs “*experienced a dramatic revival*” and for “*the first time since September 1917, these two parties constituted a majority in the Soviet by winning seventy of 135 seats.*” The Bolsheviks “*simply refused to acquiesce to the popular mandate of the Mensheviks and Socialist Revolutionaries.*” In June, the Bolshevik leadership “*appealed to the Karzan’ Soviet . . . for assistance.*” The troops sent along with the Bolshevik dominated Red Guards “*abrogated the results of the May and June elections*” and imprisoned the SR and Menshevik soviet delegates. The summer of 1918 also saw victories for the SRs and Mensheviks in the soviet elections in Votkinsk, a steel town near Izhevsk. “*As in Izhevsk the Bolsheviks voided the elections.*” [Stephan M. Merk, “*The ‘Class-Tragedy’ of Izhevsk: Working Class Opposition to Bolshevism in 1918*”, pp. 176–90, **Russian History**, vol. 2, no. 2, p. 181 and p. 186]

However, the most in depth account of this destruction of soviet is found in

the research of Vladimir Brovkin. According to him, there “are three factors” which emerge from the soviet election results in the spring of 1918. These are, firstly, “*the impressive success of the Menshevik-SR opposition*” in those elections in all regions in European Russia. The second “*is the Bolshevik practice of outright disbandment of the Menshevik-SR-controlled soviets. The third is the subsequent wave of anti-Bolshevik uprisings.*” In fact, “*in all provincial capitals of European Russia where elections were held on which there are data, the Mensheviks and the SRs won majorities on the city soviets in the spring of 1918.*” Brovkin stresses that the “*process of the Menshevik-SR electoral victories threatened Bolshevik power. That is why in the course of the spring and summer of 1918, the soviet assemblies were disbanded in most cities and villages. To stay in power, the Bolsheviks had to destroy the soviets. . . These steps generated a far-reaching transformation in the soviet system, which remained ‘soviet’ in name only.*” Brovkin presents accounts from numerous towns and cities. As an example, he discusses Tver’ where the “*escalation of political tensions followed the already familiar pattern*” as the “*victory of the opposition at the polls*” in April 1918 “*brought about an intensification of the Bolshevik repression. Strikes, protests, and marches in Tver’ lead to the imposition of martial law.*” [Brovkin, **Op. Cit.**, p. 46, p. 47, p. 48 and p. 11] Thus Bolshevik armed force not only overthrew the election results, it also suppressed working class protest against such actions. (Brovkin’s book **The Mensheviks after October** contains the same information as his article).

This Bolshevik attack on the soviets usually started with attempts to stop new elections. For example, after a demonstration in Petrograd in favour of the Constituent Assembly was repressed by the Bolsheviks in mid-January 1918, calls for new elections to the soviet occurred in many factories. “*Despite the efforts of the Bolsheviks and the Factory Committees they controlled, the movement for new elections to the soviet spread to more than twenty factories by early February and resulted in the election of fifty delegates: thirty-six SRs, seven Mensheviks and seven non-party.*” However, the Bolsheviks “*unwillingness to recognise the elections and to seat new delegates pushed a group of Socialists to . . . lay plans for an alternative workers’ forum . . . what was later to become the Assembly of Workers’ Plenipotentiaries.*” [Scott Smith, “*The Social-Revolutionaries and the Dilemma of Civil War*”, **The Bolsheviks in Russian Society**, pp. 83–104, Vladimir N. Brovkin (Ed.), pp. 85–86] This forum, like all forms of working class protest, was crushed by the Bolshevik state. By the time the elections were held, in June 1918, the civil war had started (undoubtedly favouring the Bolsheviks) and the Bolsheviks had secured their majority by packing the soviet with non-workplace “representatives.”

In Tula, again in the spring of 1918, local Bolsheviks reported to the Bolshevik Central Committee that the “*Bolshevik deputies began to be recalled one after another . . . our situation became shakier with passing day. We were forced to block new elections to the soviet and even not to recognise them where they had taken place not in our favour.*” In the end, the local party leader was forced to abolish the city soviet and to vest power in the Provincial Executive Committee. This refused to convene a plenum of the city soviet for more than two months, knowing that newly elected delegates were non-Bolshevik. [Smith, **Op. Cit.**, p. 87]

In Yaroslavl’, the newly elected soviet convened on April 9th, 1918, and when it elected a Menshevik chairman, “*the Bolshevik delegation walked out*

and declared the soviet dissolved. In response, workers in the city went out on strike, which the Bolsheviks answered by arresting the strike committee and threatening to dismiss the strikers and replace them with unemployed workers." This failed and the Bolsheviks were forced to hold new elections, which they lost. Then "the Bolsheviks dissolved this soviet as well and places the city under martial law." A similar event occurred in Riazan' (again in April) and, again, the Bolsheviks "promptly dissolved the soviet and declared a dictatorship under a Military-Revolutionary Committee." [Op. Cit., pp. 88–9]

The opposition parties raised such issues at the All-Russian Central Executive Committee of Soviets (VTsIK), to little avail. On the 11th of April, one "protested that non-Bolshevik controlled soviets were being dispersed by armed force, and wanted to discuss the issue." The chairman "refus[ed] to include it in the agenda because of lack of supporting material" and such information was submitted to the presidium of the soviet. The majority (i.e. the Bolsheviks) "supported their chairman" and the facts were "submitted . . . to the presidium, where they apparently remained." It should be noted that the "same fate befell attempts to challenge the arrests of Moscow anarchists by the government on 12 April." The chairman's "handling of the anarchist matter ended its serious discussion in the VTsIK." [Charles Duval, Op. Cit., pp. 13–14] Given that the VTsIK was **meant** to be the highest soviet body between congresses, the lack of concern for Bolshevik repression against soviets and opposition groups clearly shows the Bolshevik contempt for soviet democracy.

Needless to say, this destruction of soviet democracy continued during the civil war. For example, the Bolsheviks simply rejected the voice of people and would refuse to accept an election result. Emma Goldman attended an election meeting of bakers in Moscow in March, 1920. "It was," she said, "the most exciting gathering I had witnessed in Russia." However the "chosen representative, an Anarchist, had been refused his mandate by the Soviet authorities. It was the third time the workers gathered to re-elect their delegate . . . and every time they elected the same man. The Communist candidate opposing him was Semashko, the Commissar of the Department of Health . . . [who] raved against the workers for choosing a non-Communist, called anathema upon their heads, and threatened them with the Tcheka and the curtailment of their rations. But he had no effect on the audience except to emphasise their opposition to him, and to arouse antagonism against the party he represented. The workers' choice was repudiated by the authorities by the authorities and later even arrested and imprisoned." After a hunger strike, they were released. In spite of chekists with loaded guns attending union meetings, the bakers "would not be intimidated" and threatened a strike unless they were permitted to elect their own candidate. This ensured the bakers' demands were met. [My Disillusionment in Russia, pp. 88–9]

Unsurprisingly, "there is a mass of evidence to support the Menshevik accusations of electoral malpractice" during elections in May 1920. And in spite of Menshevik "declaration of support for the Soviet regime against the Poles" the party was "still subject to harassment." [Skawa, Op. Cit., p. 178]

This gerrymandering was not limited to just local soviets. The Bolsheviks used it at the fifth soviet congress as well.

First, it should be noted that in the run up to the congress, "on 14 June 1918, they expelled Martov and his five Mensheviks together with the Socialist Revolutionaries from the Central Executive Committee, closed down their news-

papers . . . and drove them underground, just on the eve of the elections to the Fifth Congress of Soviets in which the Mensheviks were expected to make significant gains." [Israel Getzler, **Martov**, p. 181] The rationale for this action was the claim that the Mensheviks had taken part in anti-soviet rebellions (as we discuss in section 23, this was not true). The action was opposed by the Left SRs, who correctly questioned the legality of the Bolshevik expulsion of opposition groupings. They "*branded the proposed expulsion bill illegal, since the Mensheviks and SRs had been sent to the CEC by the Congress of Soviets, and only the next congress had the right to withdraw their representation. Furthermore, the Bolsheviks had no right to pose as defenders of the soviets against the alleged SR counter-revolution when they themselves has been disbanding the peasants' soviets and creating the committees of the poor to replace them.*" [Brovkin, **The Mensheviks After October**, p. 231] When the vote was taken, only the Bolsheviks supported it. Their votes were sufficient to pass it.

Given that the Mensheviks had been winning soviet elections across Russia, it is clear that this action was driven far more by political needs than the truth. This resulted in the Left Social Revolutionaries (LSRs) as the only significant party left in the run up to the fifth Congress. The LSR author (and ex-commissar for justice in the only coalition soviet government) of the only biography of LSR leader (and long standing revolutionary who suffered torture and imprisonment in her fight against Tsarism) Maria Spiridonova states that "*[b]etween 900 and 100 delegates were present. Officially the LSR numbered 40 percent of the delegates. They own opinion was that their number were even higher. The Bolsheviks strove to keep their majority by all the means in their power.*" He quotes Spiridonova's address to the Congress: "*You may have a majority in this congress, but you do have not a majority in the country.*" [I. Steinberg, **Spiridonova**, p. 209]

Historian Geoffrey Swain indicates that the LSRs had a point:

*"Up to the very last minute the Left SRs had been confident that, as the voice of Russia's peasant masses, they would receive a majority when the Fifth Congress of Soviets assembled . . . which would enable them to deprive Lenin of power and launch a revolutionary war against Germany. Between April and the end of June 1918 membership of their party had almost doubled, from 60,000 to 100,000, and to prevent them securing a majority at the congress Lenin was forced to rely on dubious procedures: he allowed so-called committees of poor peasants to be represented at the congress. Thus as late as 3 July 1918 returns suggested a majority for the Left SRs, but a Congress of Committees of Poor Peasants held in Petrograd the same day 'redressed the balance in favour of the Bolsheviks,' to quote the **Guardian's** Philips-Price, by deciding it had the right to represent the all those districts where local soviets had not been 'cleansed of kulak elements and had not delivered the amount of food laid down in the requisitioning lists of the Committees of Poor Peasants.' This blatant gerrymandering ensured a Bolshevik majority at the Fifth Congress of Soviets."* [**The Origins of the Russian Civil War**, p. 176]

Historian Alexander Rabinowitch confirms this gerrymandering. As he put

it, by the summer of 1918 “popular disenchantment with Bolshevik rule was already well advanced, not only in rural but also in urban Russia” and the “primary beneficiaries of this nationwide grass-roots shift in public opinion were the Left SRs. During the second half of June 1918, it was an open question which of the two parties would have a majority at the Fifth All-Russian Congress of Soviets . . . On the evening of 4 July, virtually from the moment the Fifth Congress of Soviets opened in Moscow’s Bolshoi Theatre, it was clear to the Left SRs that the Bolsheviks had effectively ‘fabricated’ a sizeable majority in the congress and consequently, that there was no hope whatever of utilising it to force a fundamental change in the government’s pro-German, anti-peasant policies.” While he acknowledges that an “exact breakdown of properly elected delegates may be impossible to ascertain” it was possible (“based on substantial but incomplete archival evidence”) to conclude that “it is quite clear that the Bolshevik majority was artificially inflated and highly suspect.” He quotes the report of one leading LSR, based on data from LSR members of the congress’s Credentials Committee, saying that the Bolsheviks “conjured up” 299 voting delegates. “The Bible tells us,” noted the report’s author, “that God created the heavens and the earth from nothing . . . In the twentieth century the Bolsheviks are capable of no lesser miracles: out of nothing, they create legitimate credentials.” [“Maria Spiridonova’s ‘Last Testament’”, **The Russian Review**, pp. 424–46, vol. 54, July 1995, p. 426]

This gerrymandering played a key role in the subsequent events. “Deprived of their democratic majority,” Swain notes, “the Left SRs resorted to terror and assassinated the German ambassador Mirbach.” [Swain, **Op. Cit.**, p. 176] The LSR assassination of Mirbach and the events which followed were soon labelled by the Bolsheviks an “uprising” against “soviet power” (see section 23 for more details). Lenin “decided that the killing of Mirbach provided a fortuitous opportunity to put an end to the growing Left SR threat.” [Rabinowitch, **Op. Cit.**, p. 427] After this, the LSRs followed the Mensheviks and Right SRs and were expelled from the soviets. This in spite of the fact that the rank and file knew nothing of the plans of the central committees and that their soviet delegates had been elected by the masses. The Bolsheviks had finally eliminated the last of their more left-wing opponents (the anarchists had been dealt with the in April, see section 24 for details).

As discussed in section 21, the Committees of Poor Peasants were only supported by the Bolsheviks. Indeed, the Left SRs opposed them as being utterly counter-productive and an example of Bolshevik ignorance of village life. Consequently, we can say that the “delegates” from the committees were Bolsheviks or at least Bolshevik supporters. Significantly, by early 1919 Lenin admitted the Committees were failures and ordered them disbanded. The new policy reflected Left SR arguments against the Committees. It is hard not to concur with Vladimir Brovkin that by “establishing the committees of the poor to replace the [rural] soviets . . . the Bolsheviks were trying to create some institutional leverage of their own in the countryside for use against the SRs. In this light, the Bolshevik measures against the Menshevik-led city soviets . . . and against SR-led village soviets may be seen as a two-pronged attempt to stem the tide that threatened to leave them in the minority at the Fifth Congress of Soviets.” [**The Mensheviks after October**, p. 226]

Thus, by July 1918, the Bolsheviks had effectively secured a monopoly of political power in Russia. When the Bolsheviks (rightly, if hypocritically) dis-

banded the Constituent Assembly in January 1918, they had claimed that the soviets (rightly) represented a superior form of democracy. Once they started losing soviet elections, they could find no better way to “secure” workers’ democracy than to destroy it by gerrymandering soviets, disbanding them and expelling opposition parties from them. All peaceful attempts to replace them had been destroyed. The soviet CEC was marginalised and without any real power. Opposition parties had been repressed, usually on little or no evidence. The power of the soviets had been replaced by a soviet power in less than a year. However, this was simply the culmination of a process which had started when the Bolsheviks seized power in November 1917. Simply put, the Bolsheviks had always aimed for “all power to the party via the soviets” and once this had been achieved, the soviets could be dispensed with. Maurice Brinton simply stated the obvious when he wrote that “*when institutions such as the soviets could no longer be influenced by ordinary workers, the regime could no longer be called a soviet regime.*” [**The Bolsheviks and Workers’ Control**, p. xiii] By this obvious criteria, the Bolshevik regime was no longer soviet by the spring of 1918, i.e. before the outbreak of civil war. While opposition groups were not finally driven out of the soviets until 1923 (i.e. three years **after** the end of the civil war) their presence “*does not indicate the existence of a multi-party system since they in no way threatened the dominating role of the Bolsheviks, and they had not done so from mid-1918.*” [Richard Sakwa, **Op. Cit.**, p. 168]

Tony Cliff, leader of the British Leninist party the SWP, justified the repression of the Mensheviks and SRs on the grounds that they were not prepared to accept the Soviet system and rejected the role of “*constitutional opposition.*” He tries to move forward the repression until after the outbreak of full civil war by stating that “[*d]espite their strong opposition to the government, for some time, i.e. until after the armed uprising of the Czechoslovakian Legion [in late May, 1918] — the Mensheviks were not much hampered in their propaganda work.*” If having papers banned every now and then, members arrested and soviets being disbanded as soon as they get a Menshevik majority is “*not much hampered*” then Cliff does seem to be giving that phrase a new meaning. Similarly, Cliff’s claim that the “*civil war undermined the operation of the local soviets*” also seems lacking based on this new research. [**Lenin: Revolution Besieged**, vol. 3, p. 163, p. 167 and p. 150]

However, the Bolshevik assault on the soviets started during the spring of 1918 (i.e. in March, April and May). That is **before** the Czech rising and the onset of full scale civil war which occurred in late May (see section 3 of the appendix on “What caused the degeneration of the Russian Revolution?” on Bolshevik repression before the Czech revolt). Nor is it true that the Mensheviks rejected constitutional methods. Though they wished to see a re-convocation of the Constituent Assembly they believed that the only way to do this was by winning a majority of the soviets (see section 23). Clearly, attempts to blame the Civil War for the elimination of soviet power and democracy seems woefully weak given the actions of the Bolsheviks in the spring of 1918. And, equally clearly, the reduction of local soviet influence cannot be fully understood without factoring in the Bolshevik prejudice in favour of centralisation (as codified in the Soviet Constitution of 1918) along with this direct repression.

The simple fact is that the soviets were marginalised and undermined after the October Revolution simply because they **did** reflect the wishes of the working class, in spite of their defects (defects the Bolsheviks exploited to con-

solidate their power). The problem was that the workers no longer supported Lenin. Few Leninists would support such an obvious conclusion. For example, John Rees states that “[i]n the cities the Reds enjoyed the fierce and virtually undivided loyalty of the masses throughout the civil war period.” [“In Defence of October”, pp. 3–82, **International Socialism**, no. 52, p. 47] Which, of course, explains the vast number of strikes and protests directed against the Bolshevik regime and the workers’ resolutions calling its end! It also explains why the Bolsheviks, in the face of such “undivided loyalty”, had to suppress opposition parties and impose a party dictatorship!

Simply put, **if** the Bolsheviks did have the support Rees states they did then they had no need to repress soviet democracy and opposition parties. Such “fierce” loyalty would not have been amenable to opposition arguments. Strange, then, that the Bolsheviks continually explained working class unrest in terms of the influence of Mensheviks, Left SRs and so on during the civil war. Moreover, Rees contradicts himself by arguing that if the Kronstadt revolt had succeeded, then it would have resulted in “the fall of the Bolsheviks.” [Op. Cit., p. 63] Now, given that the Kronstadt revolt called for free soviet elections (and **not** “soviets without parties” as Rees asserts), why did the Bolsheviks not agree to them (at least in the cities)? If, as Rees argues, the Reds had the fierce loyalty of the city workers, then why did the Bolsheviks not introduce soviet democracy in the cities after the end of the Civil War? Simply because they knew that such “loyalty” did not, in fact, exist. Zinoviev, for example, declared that the Bolsheviks’ support had been reduced to 1 per cent in early 1920. [Farber, **Before Stalinism**, p. 188]

So much for working class “loyalty” to the Bolsheviks. And, needless to say, Rees’ comments totally ignore the election results **before** the start of the civil war which prompted the Bolsheviks to pack or disband soviets. As Bertrand Russell summarised from his experiences in Lenin’s Russia during the civil war (in 1920): “No conceivable system of free elections would give majorities to the Communists, either in the town or country.” [The Practice and Theory of Bolshevism, pp. 40–1] Thus we have a major contradiction in the pro-Leninist argument. On the one hand, they stress that the workers supported the Bolsheviks wholeheartedly during the civil war. On the other, they argue that party dictatorship had to be imposed. If the Bolsheviks had the support they claimed they had, then they would have won soviet elections easily. They did not and so free soviet elections were not held.

This fact also explains the fate of the so-called “non party” conferences favoured by the Bolsheviks in late 1920. In spite of praising the soviets as “more democratic” than anything in the “best democratic republics of the bourgeois world,” Lenin also argued that non-Party conferences were also required “to be able to watch the mood of the masses, to come closer to them, to respond to their demands.” [Left-Wing Communism, p. 33 and p. 32] If the soviets were as democratic as Lenin claimed, then the Bolsheviks would have no need of “non-party” conferences. Significantly, the Bolsheviks “responded” to these conferences and “their demands” by disbanding them. This was because “[d]uring the disturbances” of late 1920, “they provided an effective platform for criticism of Bolshevik policies.” Their frequency was decreased and they “were discontinued soon afterward.” [Richard Sakwa, **Soviet Communists in Power**, p. 203] In other words, they meet the same fate as the soviets in the spring and summer of 1918.

Perhaps we should not be too surprised by these developments. After all, as we discuss in section 8 of the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the Bolsheviks had long had a distinctly undemocratic political ideology. Their support for democratic norms were less than consistent. The one thing they **were** consistent was their hypocrisy. Thus democratic decisions were to be binding on their opponents (even if that majority had to be manipulated into being) but not upon them. Before the revolution Lenin had openly espoused a double standard of discipline. “*We will not permit,*” he argued, “*the idea of unity to tie a noose around our necks, and we shall under no circumstances permit the Mensheviks to lead us by the rope.*” [quoted by Robert V. Daniels, **The Conscience of the Revolution**, p. 17] Once in power, their political perspectives had little trouble ignoring the will of the working class when it clashed with what they, as that class’s self-proclaimed vanguard, had decided what was in its best interests. As we discussed in section H.5, such an autocratic perspective is at the heart of vanguardism. If you aim for party power, it comes as no surprise that the organs used to achieve it will wither under it. Just as muscles only remain strong if you use them, so soviets can only work if it is used to run society, not nominate the handful of party leaders who do. As Kropotkin argued in 1920:

“The idea of soviets . . . of councils of workers and peasants . . . controlling the economic and political life of the country is a great idea. All the more so, since it necessarily follows that these councils should be composed of all who take part in the production of natural wealth by their own efforts.

“But as long as the country is governed by a party dictatorship, the workers’ and peasants’ councils evidently lose their entire significance. They are reduced to . . . [a] passive role . . . A council of workers ceases to be free and of any use when liberty of the press no longer exists . . . [and they] lose their significance when the elections are not preceded by a free electoral campaign, and when the elections are conducted under pressure of a party dictatorship . . . It means the death-knell of the new system.” [**Kropotkin’s Revolutionary Pamphlets**, pp. 254–5]

Clearly, the fate of the soviets after October shows the dangers of Bolshevism to popular self-management and autonomy. We should be try and learn the lessons from the experience rather than, as pro-Bolsheviks do, rationalise and justify the usurpation of power by the party. The most obvious lesson to learn is to oppose the creation of any power **above** the soviets. This was not lost on Russian anarchists active in the revolution. For this reason, anarcho-syndicalists resolved, in August 1918, that they “*were for the soviets but categorically against the Soviet of People’s Commissars as an organ which does not stem from the soviet structure but only interferes with its work.*” Thus they were “*for the establishment of **free soviets** of workers’ and peasants’ representatives, and the abolition of the Soviet of People’s Commissars as an organisation inimical to the interests of the working class.*” [contained in Paul Avrich, **The Anarchists in the Russian Revolution**, p. 118 and p. 117] This resolution was driven by the experience of the Bolshevik dominated “soviet” regime.

It is also worth quoting Rudolf Rocker at length on this issue:

“Let no one object that the ‘dictatorship of the proletariat’ cannot be compared to run of the mill dictatorship because it is the dictatorship of a class. Dictatorship of a class cannot exist as such, for it ends up, in the last analysis, as being the dictatorship of a given party which arrogates to itself the right to speak for that class. Thus, the liberal bourgeoisie, in their fight against despotism, used to speak in the name of the ‘people’.. .

“We already know that a revolution cannot be made with rosewater. And we know, too, that the owning classes will never yield up their privileges spontaneously. On the day of victorious revolution the workers will have to impose their will on the present owners of the soil, of the subsoil and of the means of production, which cannot be done — let us be clear on this — without the workers taking the capital of society into their own hands, and, above all, without their having demolished the authoritarian structure which is, and will continue to be, the fortress keeping the masses of the people under dominion. Such an action is, without doubt, an act of liberation; a proclamation of social justice; the very essence of social revolution, which has nothing in common with the utterly bourgeois principle of dictatorship.

“The fact that a large number of socialist parties have rallied to the idea of councils, which is the proper mark of libertarian socialist and revolutionary syndicalists, is a confession, recognition that the tack they have taken up until now has been the product of a falsification, a distortion, and that with the councils the labour movement must create for itself a single organ capable of carrying into effect the unmitigated socialism that the conscious proletariat longs for. On the other hand, it ought not to be forgotten that this abrupt conversion runs the risk of introducing many alien features into the councils concept, features, that is, with no relation to the original tasks of socialism, and which have to be eliminated because they pose a threat to the further development of the councils. These alien elements are able only to conceive things from the dictatorial viewpoint. It must be our task to face up to this risk and warn our class comrades against experiments which cannot bring the dawn of social emancipation any nearer — which indeed, to the contrary, positively postpone it.

“Consequently, our advice is as follows: Everything for the councils or soviets! No power above them! A slogan which at the same time will be that of the social revolutionary.” [Anarchism and Sovietism]

The validity of this argument can be seen, for example, from the expulsion of opposition parties from the soviets in June and July 1918. This act exposes the hollowness of Bolshevik claims of their soviet system presented a form of “higher” democracy. If the Bolshevik soviet system was, as they claimed, based on instant recall then why did they, for example, have to expel the Mensheviks and Right SRs from the soviet CEC in the first place? Why did the electors not simply recall them? It was two weeks after the Czech revolt before the Bolsheviks acted, surely enough time for voters to act? Perhaps this did not

happen because the CEC was not, in fact, subject to instant recall at all? Being nominated at the quarterly soviet congress, they were effectively isolated from popular control. It also means that the Bolshevik government was even more insulated from popular control and accountability. To “recall” it, electors would have to either wait for the next national soviet congress or somehow convince the CEC to call an emergency one. As an example of workers’ running society, the Bolshevik system leaves much to be desired.

Another obvious lesson to learn was the use of appointments to the soviets and their executives from other organisations. As seen above, the Bolsheviks used the “representation” of other bodies they control (such as trade unions) to pack soviet assemblies in their favour. Similarly, allowing political parties to nominate representatives in soviet executives also marginalised the soviet assemblies and those delegates actually elected in the workplaces.

This was obvious to the Russian anarchists, who argued “*for effective soviets organised on collective lines with the direct delegation of workers and peasants from every factory, workshop, village, etc., and not political chatterboxes gaining entry through party lists and turning the soviets into talking shops.*” [contained in Paul Avrich, **The Anarchists in the Russian Revolution**, p. 118] The Makhnovists, likewise, argued that “[o]nly labourers who are contributing work necessary to the social economy should participate in the soviets. Representatives of political organisations have no place in worker-peasant soviets, since their participation in a workers’ soviet will transform the latter into deputies of the party and can lead to the downfall of the soviet system.” [contained in Peter Arshinov’s **History of the Makhnovist Movement**, p. 266] As we discuss in section 15 of the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?”, Leninists sometimes distort this into a claim that the Makhnovists opposed members of political standing for election.

This use of party lists meant that soviet delegates could be anyone. For example, the leading left-wing Menshevik Martov recounts that in early 1920 Bolsheviks in a chemical factory “*put up Lenin against me as a candidate [to the Moscow soviet]. I received seventy-six votes he-eight (in an open vote).*” [quoted by Israel Getzler, **Martov**, p. 202] How would either of these two intellectuals actually know and reflect the concerns and interests of the workers they would be “delegates” of? If the soviets were meant to be the delegates of working people, then why should non-working class members of political parties be elected to a soviet?

However, in spite of these problems, the Russian soviets were a key means of ensuring working class participation in the revolution. As recognised by all the socialist oppositions to the Bolsheviks, from the anarchists to the Mensheviks. As one historian put it:

“Small wonder that the principal political demand of Mensheviks, Left SRs, SR Maximalists, Kronstadt sailors and of many oppositionists . . . has been for freely elected soviets which would this be restored to their original role as agents of democratisation.” [Israel Getzler, **Soviets as Agents of Democratisation**, p. 30]

The sad fate of the soviets after the Bolshevik seizure of power simply confirms the opinion of the left Menshevik Martov who had “*rubbed it in to the Bolsheviks . . . at the first All-Russian Congress of Trade Unions [in January*

1918], that they who were now extolling the Soviets as the 'highest forms of the socialist development of the proletariat,' had shown little love of them in 1905 or in 1917 after the July days; they loved Soviets only when they were 'in the hands of the Bolshevik party.' " [Getzler, **Martov**, p. 174] As the next few months showed, once the soviets left those hands, then the soviets themselves were destroyed. The civil war did not start this process, it just gave the latter-day supporters of Bolshevism something to use to justify these actions.

- 7 How did the factory committee movement develop?
- 8 What was the Bolshevik position on “workers’ control” in 1917?
- 9 What happened to the factory committees after October?
- 10 What were the Bolshevik economic policies in 1918?
- 11 Did Bolshevik economic policies work?
- 12 Was there an alternative to Lenin’s “state capitalism” and “war communism”?
- 13 Did the Bolsheviks allow independent trade unions?
- 14 Was the Red Army really a revolutionary army?
- 15 Was the Red Army “filled with socialist consciousness”?
- 16 How did the civil war start and develop?
- 17 Was the civil war between just Reds and Whites?
- 18 How extensive was imperialist intervention?
- 19 Did the end of the civil war change Bolshevik policies?
- 20 Can the Red Terror and the Cheka be justified?
- 21 Did Bolshevik peasant policies work?
- 22 Was there an alternative to grain requisition?
- 23 Was the repression of the socialist opposition justified?
- 24 What did the anarchists do during the revolution?
- 25 Did the Russian revolution refute anarchism?

What was the Kronstadt Rebellion?

The Kronstadt rebellion took place in the first weeks of March, 1921. Kronstadt was (and is) a naval fortress on an island in the Gulf of Finland. Traditionally, it has served as the base of the Russian Baltic Fleet and to guard the approaches to the city of St. Petersburg (which during the first world war was re-named Petrograd, then later Leningrad, and is now St. Petersburg again) thirty-five miles away.

The Kronstadt sailors had been in the vanguard of the revolutionary events of 1905 and 1917. In 1917, Trotsky called them the “*pride and glory of the Russian Revolution.*” The inhabitants of Kronstadt had been early supporters and practitioners of soviet power, forming a free commune in 1917 which was relatively independent of the authorities. In the words of Israel Getzler, an expert on Kronstadt, “*it was in its commune-like self-government that Red Kronstadt really came into its own, realising the radical, democratic and egalitarian aspirations of its garrison and working people, their insatiable appetite for social recognition, political activity and public debate, their pent up yearning for education, integration and community. Almost overnight, the ship’s crews, the naval and military units and the workers created and practised a direct democracy of base assemblies and committees.*” [Kronstadt 1917–1921, p. 248] In the centre of the fortress an enormous public square served as a popular forum holding as many as 30,000 persons. The Kronstadters “*proved convincingly the capacity of ordinary people to use their ‘heads, too’ in governing themselves, and managing Russia’s largest navel base and fortress.*” [Getzler, **Op. Cit.**, p. 250]

The Russian Civil War had ended in Western Russia in November 1920 with the defeat of General Wrangel in the Crimea. All across Russia popular protests were erupting in the countryside and in the towns and cities. Peasant uprisings were occurring against the Communist Party policy of grain requisitioning (a policy the Bolsheviks and their argued had been thrust upon them by the circumstances but which involved extensive, barbaric and counter-productive repression). In urban areas, a wave of spontaneous strikes occurred and in late February a near general strike broke out in Petrograd.

On February 26th, in response to these events in Petrograd, the crews of the battleships *Petropavlovsk* and *Sevastopol* held an emergency meeting and agreed to send a delegation to the city to investigate and report back on the ongoing strike movement. On their turn two days later, the delegates informed their fellow sailors of the strikes (with which they had full sympathy with) and the government repression directed against them. Those present at this meeting

on the *Petropavlovsk* then approved a resolution which raised 15 demands which included free elections to the soviets, freedom of speech, press, assembly and organisation to workers, peasants, anarchists and left-socialists (see section 3 for full details). Of the 15 demands, only two were related to what Marxists like to term the “petty-bourgeoisie” (the peasantry and artisans) and these demanded “*full freedom of action*” for all peasants and artisans who did not hire labour. Like the Petrograd workers, the Kronstadt sailors demanded the equalisation of wages and the end of roadblock detachments restricting travel and the ability of workers to bring food into the city.

A mass meeting of fifteen to sixteen thousand people was held in Anchor Square on March 1st and what has become known as the *Petropavlovsk* resolution was passed after the “*fact-finding*” delegation had made its report. Only two Bolshevik officials voted against the resolution. At this meeting it was decided to send another delegation to Petrograd to explain to the strikers and the city garrison of the demands of Kronstadt and to request that non-partisan delegates be sent by the Petrograd workers to Kronstadt to learn first-hand what was happening there. This delegation of thirty members was arrested by the Bolshevik government.

As the term of office of the Kronstadt soviet was about to expire, the mass meeting also decided to call a “*Conference of Delegates*” for March 2nd. This was to discuss the manner in which the new soviet elections would be held. This conference consisted of two delegates from the ship’s crews, army units, the docks, workshops, trade unions and Soviet institutions. This meeting of 303 delegates endorsed the *Petropavlovsk* resolution and elected a five-person “*Provisional Revolutionary Committee*” (this was enlarged to 15 members two days later by another conference of delegates). This committee was charged with organising the defence of Kronstadt, a move decided upon in part by the threats of the Bolshevik officials there and the groundless rumour that the Bolsheviks had dispatched forces to attack the meeting. Red Kronstadt had turned against the Communist government and raised the slogan of the 1917 revolution “*All Power to the Soviets*”, to which was added “*and not to parties.*” They termed this revolt the “*Third Revolution*” and would complete the work of the first two Russian Revolutions in 1917 by instituting a true toilers republic based on freely elected, self-managed, soviets.

The Communist Government responded with an ultimatum on March 2nd. This asserted that the revolt had “*undoubtedly been prepared by French counter-intelligence*” and that the *Petropavlovsk* resolution was a “*SR-Black Hundred*” resolution (SR stood for “Social Revolutionaries”, a party with a traditional peasant base and whose right-wing had sided with White forces; the “Black Hundreds” were a reactionary, indeed proto-fascist, force dating back to before the revolution which attacked Jews, labour militants, radicals and so on). They argued that the revolt had been organised by an ex-Tsarist officers led by ex-General Kozlovsky (who had, ironically, been placed in the fortress as a military specialist by Trotsky). This was the official line through-out the revolt.

During the revolt, Kronstadt started to re-organise itself from the bottom up. The trade union committees were re-elected and a Council of Trade Unions formed. The Conference of Delegates met regularly to discuss issues relating to the interests of Kronstadt and the struggle against the Bolshevik government (specifically on March 2nd, 4th and 11th). Rank and file Communists left the party in droves, expressing support for the revolt and its aim of “*all power to the*

soviets and not to parties.” About 300 Communists were arrested and treated humanly in prison (in comparison, at least 780 Communists left the party in protest of the actions it was taking against Kronstadt and its general role in the revolution). Significantly, up to one-third of the delegates elected to Kronstadt’s rebel conference of March 2nd were Communists. [Avrich, **Op. Cit.**, pp. 184–7 and p. 81]

The Kronstadt revolt was a non-violent one, but from the start the attitude of the authorities was not one of serious negotiation but rather one of delivering an ultimatum: either come to your senses or suffer the consequences. Indeed, the Bolsheviks issued the threat that they would shoot the rebels “*like partridges*” and took the families of the sailors hostage in Petrograd. Towards the end of the revolt Trotsky sanctioned the use of chemical warfare against the rebels and if they had not been crushed, a gas attack would have carried out. [Paul Avrich, **Kronstadt 1921**, p. 146 and pp. 211–2] No real attempt was made to settle the revolt peacefully. While there was at least three to four weeks before the ice was due to melt after the March 2nd “*Conference of Delegates*” meeting which marked the real start of the revolt, the Bolsheviks started military operations at 6.45pm on March 7th.

There were possible means for a peaceful resolution of the conflict. On March 5th, two days before the bombardment of Kronstadt had begun, anarchists led by Emma Goldman and Alexander Berkman offered themselves as intermediates to facilitate negotiations between the rebels and the government (anarchist influence had been strong in Kronstadt in 1917). [Emma Goldman, **Living My Life**, vol. 2, pp. 882–3] This was ignored by the Bolsheviks. Years later, the Bolshevik Victor Serge (and eye-witness to the events) acknowledged that “*[e]ven when the fighting had started, it would have been easy to avoid the worst: it was only necessary to accept the mediation offered by the anarchists (notably Emma Goldman and Alexander Berkman) who had contact with the insurgents. For reasons of prestige and through an excess of authoritarianism, the Central Committee refused this course.*” [The **Serge-Trotsky Papers**, p. 164]

Another possible solution, namely the Petrograd Soviet suggestion of March 6th that a delegation of party and non-party members of the Soviet visit Kronstadt was not pursued by the government. The rebels, unsurprisingly enough, had reservations about the **real** status of the non-party delegates and asked that the elections to the delegation take place within the factories, with observers from Kronstadt present (in itself a very reasonable request). Nothing came of this (unsurprisingly, as such a delegation would have reported the truth that Kronstadt was a popular revolt of working people so exposing Bolshevik lies and making the planned armed attack more difficult). A delegation “*sent by Kronstadt to explain the issues to the Petrograd Soviet and people was in the prisons of the Cheka.*” [Victor Serge, **Memoirs of a Revolutionary**, p. 127] According to Serge, “*right from the first moment, at a time when it was easy to mitigate the conflict, the Bolshevik leaders had no intention of using anything but forcible methods.*” [Ibid.] This is confirmed by latter research. The refusal to pursue these possible means of resolving the crisis peacefully is explained by the fact that the decision to attack Kronstadt had already been made. Basing himself on documents from the Soviet Archives, historian Israel Getzler states that “*[b]y 5 March, if not earlier, the Soviet leaders had decided to crush Kronstadt. Thus, in a cable to . . . [a] member of the Council of Labour and Defence, on that day, Trotsky insisted that ‘only the seizure of Kronstadt*

will put an end to the political crisis in Petrograd.' On the same day, acting as chairman of the RVSR [the Revolutionary Military Council of the Army and Navy of the Republic], he ordered the reformation and mobilisation of the Seventh Army 'to suppress the uprising in Kronstadt,' and appointed General Mikhail Tukhachevskii as its commander changed with suppressing the uprising in Kronstadt 'in the shortest possible time.'” [“The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents”, **Revolutionary Russia**, pp. 24–44, Vol. 15, No. 1, June 2002, p. 32]

As Alexander Berkman noted, the Communist government would “*make no concessions to the proletariat, while at the same time they were offering to compromise with the capitalists of Europe and America.*” [Berkman, **The Russian Tragedy**, p. 62] While happy to negotiate and compromise with foreign governments, they treated the workers and peasants of Kronstadt (like that of the rest of Russia) as the class enemy (indeed, at the time, Lenin was publicly worrying whether the revolt was a White plot to sink these negotiations!).

The revolt was isolated and received no external support. The Petrograd workers were under martial law and could little or no action to support Kronstadt (assuming they refused to believe the Bolshevik lies about the uprising). The Communist government started to attack Kronstadt on March 7th. The first assault was a failure. “*After the Gulf had swallowed its first victims,*” Paul Avrich records, “*some of the Red soldiers, including a body of Peterhof **kursanty**, began to defect to the insurgents. Others refused to advance, in spite of threats from the machine gunners at the rear who had orders to shoot any wavers. The commissar of the northern group reported that his troops wanted to send a delegation to Kronstadt to find out the insurgents’ demands.*” [Avrich, **Op. Cit.**, pp. 153–4] After 10 days of constant attacks the Kronstadt revolt was crushed by the Red Army. On March 17th, the final assault occurred. Again, the Bolsheviks had to force their troops to fight. On the night of 16–17 March, for example, “*the extraordinary **troika** of Aleksei Nikolaev had arrested over 100 so-called instigators, 74 of whom he had publicly shot.*” [Getzler, **Op. Cit.**, p. 35] Once the Bolshevik forces finally entered the city of Kronstadt “*the attacking troops took revenge for their fallen comrades in an orgy of bloodletting.*” [Avrich, **Op. Cit.**, p. 211] The next day, as an irony of history, the Bolsheviks celebrated the fiftieth anniversary of the Paris Commune.

The repression did not end there. According to Serge, the “*defeated sailors belonged body and sole to the Revolution; they had voiced the suffering and the will of the Russian people*” yet “[h]undreds of prisoners were taken away to Petrograd; months later they were still being shot in small batches, a senseless and criminal agony” (particularly as they were “*prisoners of war . . . and the Government had for a long time promised an amnesty to its opponents on condition that they offered their support*”). “*This protracted massacre was either supervised or permitted by Dzerzhinsky*” (the head of the Cheka). The “*responsibilities of the Bolshevik Central Committee had been simply enormous*” and “*the subsequent repression . . . needlessly barbarous.*” [**Memoirs of a Revolutionary**, p. 131 and p. 348]

The Soviet forces suffered over 10,000 casualties storming Kronstadt. There are no reliable figures for the rebels loses or how many were later shot by the Cheka or sent to prison camps. The figures that exist are fragmentary. Immediately after the defeat of the revolt, 4,836 Kronstadt sailors were arrested

and deported to the Crimea and the Caucasus. When Lenin heard of this on the 19th of April, he expressed great misgivings about it and they were finally sent to forced labour camps in the Archangelsk, Vologda and Murmansk regions. Eight thousand sailors, soldiers and civilians escaped over the ice to Finland. The crews of the *Petropavlovsk* and *Sevastopol* fought to the bitter end, as did the cadets of the mechanics school, the torpedo detachment and the communications unit. A statistical communiqué of the Special Section of the Extraordinary **Troikas** of 1st May stated that 6,528 rebels had been arrested, of whom 2,168 had been shot (33%), 1,955 had been sentenced to forced labour (of whom 1,486 received a five year sentence), and 1,272 were released. A statistical review of the revolt made in 1935–6 listed the number arrested as 10,026 and stated that it had “not been possible to establish accurately the number of the repressed.” The families of the rebels were deported, with Siberia considered as “*undoubtedly the only suitable region*” for them. Significantly, one of the members of the **troika** judging the rebels complained that they had to rely exclusively on information provided by the Special Section of the **Vecheka** as “*neither commissars nor local Communists provided any material.*” [Israel Getzler, “*The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents*”, **Revolutionary Russia**, pp. 24–44, Vol. 15, No. 1, June 2002, pp. 35–7]

After the revolt had been put down, the Bolshevik government reorganised the fortress. While it had attacked the revolt in the name of defending “*Soviet Power*” Kronstadt’s newly appointed military commander “*abolish[ed] the [Kronstadt] soviet altogether*” and ran the fortress “*with the assistance of a revolutionary troika*” (i.e. an appointed three man committee). [Getzler, **Op. Cit.**, p. 244] Kronstadt’s newspaper was renamed **Krasnyi Kronshtadt** (from **Izvestiia**) and stated in an editorial that the “*fundamental features*” of Kronstadt’s restored “*dictatorship of the proletariat*” during its “*initial phases*” were “*[r]estrictions on political liberty, terror, military centralism and discipline and the direction of all means and resources towards the creation of an offensive and defensive state apparatus.*” [quoted by Getzler, **Op. Cit.**, p. 245] The victors quickly started to eliminate all traces of the revolt. Anchor square became “*Revolutionary Square*” and the rebel battleships *Petropavlovsk* and *Sevastopol* were renamed the *Marat* and the *Paris Commune*, respectively.

That, in a nutshell, was the Kronstadt revolt. Obviously we cannot cover all the details and we recommend readers to consult the books and articles we list at the end of this section for fuller accounts of the events. However, that presents the key points in the rebellion. Now we must analyse the revolt and indicate why it is so important in evaluating Bolshevism in both practice and as a revolutionary theory.

In the sections which follow, we indicate why the revolt is so important (section 1) and place it in historical context (section 2). We then present and discuss the Kronstadt demands, indicating their sources in working class rebellion and radicalism (see sections 3 and 4). We indicate the lies the Bolsheviks said about the rebellion at the time (section 5), whether it was, in fact, a White plot (section 6) and indicate the revolts real relationship to the Whites (section 7). We also disprove Trotskyist assertions that the sailors in 1921 were different from those in 1917 (section 8) or that their political perspectives had fundamentally changed (section 9). We indicate that state coercion and repression was the significant in why the Kronstadt revolt did not spread to the Petrograd workers

(section 10). Then we discuss the possibility of White intervention during and after the revolt (section 11). We follow this with a discussion of arguments that the country was too exhausted to allow soviet democracy (section 12) or that soviet democracy would have resulted in the defeat of the revolution (section 13). In the process, we will also show the depths to which supporters of Leninism will sink to defend their heroes (in particular, see section 14). Lastly, we discuss what the Kronstadt revolt tells us about Leninism (section 15)

As we will hope to prove, Kronstadt was a popular uprising from below by the same sailors, soldiers and workers that made the 1917 October revolution. The Bolshevik repression of the revolt **can** be justified in terms of defending the state power of the Bolsheviks but it cannot be defended in terms of socialist theory. Indeed, it indicates that Bolshevism is a flawed political theory which cannot create a socialist society but only a state capitalist regime based on party dictatorship. This is what Kronstadt shows above all else: given a choice between workers' power and party power, Bolshevism will destroy the former to ensure the latter (see section 15 in particular). In this, Kronstadt is no isolated event (as we indicate in section 2).

There are many essential resources on the revolt available. The best in depth studies of the revolt are Paul Avrich's **Kronstadt 1921** and Israel Getzler's **Kronstadt 1917–1921**. Anarchist works include Ida Mett's **The Kronstadt Uprising** (by far the best), Alexander Berkman's **The Kronstadt Rebellion** (which is a good introduction and included in his **The Russian Tragedy**), Voline's **The Unknown Revolution** has a good chapter on Kronstadt (and quotes extensively from the Kronstadters' paper *Izvestiia*) and volume two of Daniel Guerin's **No Gods, No Masters** has an excellent section on the rebellion which includes a lengthy extract from Emma Goldman's autobiography **Living my Life** on the events as well as extracts from the Kronstadters' paper. Anton Ciliga's (a libertarian socialist/Marxist) **Kronstadt Revolt** is also a good introduction to the issues relating to the uprising. Eye-witness accounts include chapters in Berkman's **The Bolshevik Myth** as well as Goldman's **My Disillusionment in Russia**. Goldman's autobiography **Living My Life** also has useful material on the events.

For the Leninist analysis, the anthology **Kronstadt** contains Lenin and Trotsky's articles on the revolt plus supplementary essays refuting anarchist accounts. This work is recommended for those seeking the official Trotskyist version of events as it contains all the relevant documents by the Bolshevik leaders. Emma Goldman's **Trotsky Protests Too Much** is a great reply to Trotsky's comments and one of his followers contained in this work. Victor Serge was another eye-witness to the Kronstadt revolt. An individualist anarchist turned Bolshevik, his **Memoirs of a Revolutionary** is worth looking at to discover why he supported what the Bolsheviks did, albeit reluctantly.

1 Why is the Kronstadt rebellion important?

The Kronstadt rebellion is important because, as Voline put it, it was *“the first entirely independent attempt of the people to liberate itself from all yokes and achieve the Social Revolution, an attempt made directly, resolutely, and boldly by the working masses themselves without political shepherds, without leaders or tutors. It was the first step towards the third and social revolution.”* [The

Unknown Revolution, pp. 537–8]

The Kronstadt sailors, soldiers and workers in 1917 had been the one of the first groups to support the slogan “*All power to the Soviets*” as well as one of the first towns to put it into practice. The focal point of the 1921 revolt — the sailors of the warships *Petropavlovsk* and *Sevastopol* — had, in 1917, been supporters of the Bolsheviks. The sailors had been considered, until those fateful days in 1921, the pride and glory of the revolution and considered by all to be thoroughly revolutionary in spirit and action. They were the staunchest supporters of the Soviet system but, as the revolt showed, they were opposed to the dictatorship of any political party.

Therefore Kronstadt is important in evaluating the honesty of Leninist claims to be in favour of soviet democracy and power. The civil war was effectively over, yet the regime showed no signs of stopping the repression against working class protest or rights. Opposing re-elections to soviets, the Bolshevik regime was repressing strikers in the name of “*soviet power*” and “*the political power of the proletariat*.” In the countryside, the Bolsheviks continued their futile, evil and counterproductive policies against the peasants (ignoring the fact that their government was meant to be at the head of a workers **and** peasants’ state). Occurring as it did after the end of the civil war, Kronstadt played a key role in opening the eyes of anarchists like Emma Goldman and Alexander Berkman to the real role of Bolshevism in the revolution. Until then, they (like many others) supported the Bolsheviks, rationalising their dictatorship as a temporary measure necessitated by the civil war. Kronstadt smashed that illusion, “*broke the last thread that held me to the Bolsheviks. The wanton slaughter they had instigated spoke more eloquently against than aught else. Whatever the pretences of the past, the Bolsheviks now proved themselves the most pernicious enemies of the Revolution. I would have nothing further to do with them.*” [Emma Goldman, **My Disillusionment in Russia**, p. 200]

The events at Kronstadt cannot be looked at in isolation, but rather as part of a general struggle of the Russian working people against “their” government. Indeed, as we indicate in the next section, this repression **after** the end of the Civil War followed the same pattern as that started **before** it. Just as the Bolsheviks had repressed soviet democracy in Kronstadt in 1921 in favour of party dictatorship, they had done so regularly elsewhere in early 1918.

The Kronstadt revolt was a popular movement from below aiming at restoring soviet power. As Alexander Berkman notes, the “*spirit of the Conference [of delegates which elected the Provisional Revolutionary Committee] was thoroughly Sovietist: Kronstadt demanded Soviets free from interference by any political party; it wanted non-partisan Soviets that should truly reflect the needs and express the will of the workers and peasants. The attitude of the delegates was antagonistic to the arbitrary rule of bureaucratic commissars, but friendly to the Communist Party as such. They were staunch adherents of the Soviet **system** and they were earnestly seeking to find, by means friendly and peaceful, a solution of the pressing problems*” facing the revolution. [**The Russian Tragedy**, p. 67] The attitude of the Bolsheviks indicated that, for them, soviet power was only useful in so far as it ensured their party’s power and if the two came into conflict then the latter must survive over the corpse of the former. Thus Berkman:

“But the ‘triumph’ of the Bolsheviks over Kronstadt held within it-

self the defeat of Bolshevism. It exposes the true character of the Communist dictatorship. The Communists proved themselves willing to sacrifice Communism, to make almost any compromise with international capitalism, yet refused the just demands of their own people — demands that voiced the October slogans of the Bolsheviks themselves: Soviets elected by direct and secret ballot, according to the Constitution of the Russian Socialist Federal Soviet Republic; and freedom of speech and press for the revolutionary parties.” [Op. Cit., p. 90]

Investigating the Kronstadt revolt forces intelligent and honest minds into a critical examination of Bolshevik theories and practices. It exploded the Bolshevik myth of the Communist State being the “Workers’ and Peasants’ Government”. It proved that the Communist Party dictatorship and the Russian Revolution are opposites, contradictory and mutually exclusive. While it may be justifiable to argue that the repression directed by the Bolsheviks against working class people **during** the civil war could be explained by the needs of the war, the same cannot be said for Kronstadt. Similarly, the Leninist justifications for their power and actions at Kronstadt have direct implications for current activity and future revolutions. As we argue in section 15, the logic of these rationales simply mean that modern day Leninists will, if in the same position, destroy soviet democracy to defend “soviet power” (i.e. the power of their party).

In effect, Kronstadt was the clash between the reality of Leninism and its image or rhetoric. It raises many important issues as regards Bolshevism and the rationale it has produced to justify certain actions. “*The Kronstadt experience,*” as Berkman argues, “*proves once more that government, the State — whatever its name or form — is ever the mortal enemy of liberty and popular self-determination. The state has no soul, no principles. It has but one aim — to secure power and hold it, at any cost. That is the political lesson of Kronstadt.*” [Op. Cit., p. 89]

Kronstadt is also important in that it, like most of the Russian Revolution and Civil War, confirmed anarchist analysis and predictions. This can be seen when *Izvestiia* (the paper produced during the rebellion by the Provisional Revolutionary Committee) argued that in Kronstadt “*there have been laid the foundations of the Third Revolution, which will break the last chains of the workers and lay open the new highway to socialist construction.*” [quoted by Voline, **The Unknown Revolution**, p. 508]

This confirmed the arguments of Russian anarchists in 1917, who had predicted that “*if the ‘transfer of power to the soviets’ comes in fact to signify the seizure of political authority by a new political party with the aim of guiding reconstruction from above, ‘from the centre’*” then “*there is no doubt that this ‘new power’ can in no way satisfy even the most immediate needs and demands of the people, much less begin the task of ‘socialist reconstruction’ . . . Then, after a more or less prolonged interruption, the struggle will inevitably be renewed. Then will begin a third and last stage of the Great Revolution. There will begin a struggle between the living forces arising from the creative impulse of the popular masses on the spot, on the one hand, namely the local workers’ and peasants’ organisations acting directly . . . and the centralist Social Democratic power defending its existence, on the other; a struggle between authority and freedom.*”

[quoted by Paul Avrich, **Anarchists in the Russian Revolution**, p. 94]

Thus Kronstadt is a symbol of the fact that state power cannot be utilised by the working class and always becomes a force for minority rule (in this case of former workers and revolutionaries, as Bakunin predicted).

There is another reason why the study of Kronstadt is important. Since the suppression of the revolt, Leninist and Trotskyist groups have continually **justified** the acts of the Bolsheviks. Moreover, they have followed Lenin and Trotsky in slandering the revolt and, indeed, have continually lied about it. When Trotskyist John Wright states that the supporters of Kronstadt have “*distort[ed] historical facts, monstrously exaggerat[ed] every subsidiary issue or question . . . and throw[n] a veil . . . over the **real** program and aims of the mutiny*” he is, in fact, describing his and his fellow Trotskyists. [Lenin and Trotsky, **Kronstadt**, p. 102] Indeed, as we will prove, anarchist accounts have been validated by later research while Trotskyist assertions have been exploded time and time again. Indeed, it would be a useful task to write a companion to Trotsky’s book **The Stalin School of Falsification** about Trotsky and his followers activities in the field of re-writing history.

Similarly, when Trotsky argues that anarchists like Goldman and Berkman “*do not have the slightest understanding of the criteria and methods of scientific research*” and just “*quote the proclamations of the insurgents like pious preachers quoting Holy Scriptures*” he is, in fact, just describing himself and his followers (as we shall see, the latter just repeat his and Lenin’s assertions regardless of how silly or refuted they are). Ironically, he states that “*Marx has said that it is impossible to judge either parties or peoples by what they say about themselves.*” [Lenin and Trotsky, **Op. Cit.**, p. 88] As Emma Goldman argued, “*[h]ow pathetic that he does not realise how much this applies to him!*” [**Trotsky Protests Too Much**] Kronstadt shows what the Bolsheviks said about their regime was the opposite of what it really was, as show by its actions.

What will also become clear from our discussion is the way Trotskyists have doctored the academic accounts to fit their ideological account of the uprising. The reason for this will become clear. Simply put, the supporters of Bolshevism cannot help lie about the Kronstadt revolt as it so clearly exposes the **real** nature of Bolshevik ideology. Rather than support the Kronstadt call for soviet democracy, the Bolsheviks crushed the revolt, arguing that in so doing they were defending “soviet power.” Their followers have repeated these arguments.

This expression of Leninist double-think (the ability to know two contradictory facts and maintain both are true) can be explained. Once it is understood that “*workers’ power*” and “*soviet power*” actually mean **party power** then the contradictions disappear. Party power had to be maintained at all costs, including the destruction of those who desired real soviet and workers’ power (and so soviet democracy).

For example, Trotsky argued that in 1921 “*the proletariat had to hold political power in its hands*” yet later Trotskyists argue that the proletariat was too exhausted, atomised and decimated to do so. [Lenin and Trotsky, **Kronstadt**, p. 81] Similarly, the Trotskyist Pierre Frank states that for the Bolsheviks, “*the dilemma was posed in these terms: either keep the workers’ state under their leadership, or see the counterrevolution begin, in one or other political disguise, ending in a counterrevolutionary reign of terror that would leave not the slightest room for democracy.*” [**Op. Cit.**, p. 15] Of course the fact that there was “*not the slightest room for democracy*” under Lenin is not mentioned, nor is the fact

that the “*dictatorship of the party*” had been a fundamental aspect of Bolshevik ideology since early 1919 and practice since mid-1918 (by the latest). Nor does Frank consider it important to note that a “*reign of terror*” did develop under Stalin from the terror, repression and dictatorship practised in 1921 by Lenin and Trotsky.

Most Leninists follow Frank and argue that the suppression of the rebellion was essential to defend the “*gains of the revolution.*” What exactly were these gains? Not soviet democracy, freedom of speech, assembly and press, trade union freedom and so on as the Kronstaders were crushed for demanding these. No, apparently the “gains” of the revolution was a Bolshevik government pure and simple. Never mind the fact it was a one-party dictatorship, with a strong and privileged bureaucratic machine and no freedom of speech, press, association or assembly for working people. The fact that Lenin and Trotsky were in power is enough for their followers to justify the repression of Kronstadt and subscribe to the notion of a “workers’ state” which excludes workers from power.

Thus the double-think of Bolshevism is clearly seen from the Kronstadt events. The Bolsheviks and their supporters argue that Kronstadt was suppressed to defend soviet power yet argue that the Kronstadt demand for free soviet elections was “*counter-revolutionary*”, “*backward*”, “*petty-bourgeois*” and so on. How soviet power could mean anything without free elections is never explained. Similarly, they argue that it was necessary to defend the “*workers state*” by slaughtering those who called for workers to have some kind of say in how that state operated. It appears that the role of workers in a workers’ state was simply that of following orders without question (indeed, Trotsky was arguing in the 1930s that the Russian working class was still the ruling class under Stalin — “*So long as the forms of property that have been created by the October Revolution are not overthrown, the proletariat remains the ruling class.*” [The Class Nature of the Soviet State]).

How can the Bolshevik repression be justified in terms of defending workers power when the workers were powerless? How can it be defended in terms of soviet power when the soviets were rubber stamps of the government?

The logic of the Bolsheviks and their latter-day apologists and supporters is the same character as that of the U.S. Officer during the Vietnam War who explained that in order to save the village, they first had to destroy it. In order to save soviet power, Lenin and Trotsky had to destroy soviet democracy.

One last point, while the Kronstadt revolt is a key event in the Russian Revolution, one that signified its end, we must not forget that it is just one in a long series of Bolshevik attacks on the working class. As we indicated in the appendix on “What happened during the Russian Revolution?” (and provide an overview in the next section), the Bolshevik state had proven itself to be anti-revolutionary continually since October 1917. However, Kronstadt is important simply because it so clearly pitted soviet democracy against “soviet power” and occurred **after** the end of the civil war. As it brings the Russian Revolution to an end, it deserves to be remembered, analysed and discussed by all revolutionaries who seek to understand the past in order not to repeat the same mistakes again.

2 What was the context of the Kronstadt revolt?

The Kronstadt revolt cannot be understood in isolation. Indeed, to do so misses the real reason why Kronstadt is so important. Kronstadt was the end result of four years of revolution and civil war, the product of the undermining of soviet democracy by a combination of Bolshevism and war. The actions of the Bolsheviks in 1921 and their ideological justifications for their actions (justifications, of course, when they got beyond lying about the revolt — see section 5) merely reproduced in concentrated form what had been occurring ever since they had seized power.

Therefore it is necessary to present a short summary of Bolshevik activities before the events of Kronstadt (see “What happened during the Russian Revolution?” for fuller details). In addition, we have to sketch the developing social stratification occurring under Lenin and the events immediate before the revolt which sparked it off (namely the strike wave in Petrograd). Once this has been done, we will soon see that Kronstadt was not an isolated event but rather an act of solidarity with the oppressed workers of Petrograd and an attempt to save the Russian Revolution from Communist dictatorship and bureaucracy.

Alexander Berkman provides an excellent overview of what had happened in Russia after the October Revolution:

“The elective system was abolished, first in the army and navy, then in the industries. The Soviets of peasants and workers were castrated and turned into obedient Communist Committees, with the dreaded sword of the Cheka [political para-military police] ever hanging over them. The labour unions governmentalised, their proper activities suppressed, they were turned into mere transmitters of the orders of the State. Universal military service, coupled with the death penalty for conscientious objectors; enforced labour, with a vast officialdom for the apprehension and punishment of ‘deserters’; agrarian and industrial conscription of the peasantry; military Communism in the cities and the system of requisitioning in the country . . . ; the suppression of workers’ protests by the military; the crushing of peasant dissatisfaction with an iron hand. . . .” [The Russian Tragedy, p. 27]

We discussed each of these features in more detail in the appendix on “What happened during the Russian Revolution?”. Here we will simply indicate that the Bolsheviks had systematically undermined the effective power of the soviets. Both locally and nationally, post-October power was centralised into the hands of the soviet executives rather than the general assemblies. At the top, power was concentrated even further with the creation of a Bolshevik government **above** the Central Executive Council elected by the (then) quarterly soviet congress. This is not all. Faced with growing opposition to their policies, the Bolsheviks responded in two ways. Either the soviet was gerrymandered to make the workplace soviet elections irrelevant (as in, say, Petrograd) or they simply disbanded any soviet elected with a non-Bolshevik majority (as in **all** provincial soviets for which records exist). So Bolshevik opposition to the soviet democracy demanded by the Kronstadt revolt had a long pedigree. It had started a few months after the Bolsheviks seizure of power in the name of the soviets.

They repressed opposition parties to maintain their position (for example, suppressing their newspapers). Similarly, the Bolsheviks attacked the anarchists in Moscow on the 11–12 of April, 1918, using armed detachments of the Cheka (the political police). The Kronstadt soviet, incidentally, condemned the action by a vote of 81 to 57 against (with 15 abstentions). [Getzler, **Kronstadt 1917–1921**, p. 186] This repression was political in nature, aiming to neutralise a potential political threat and was not the only example of political repression in this period (see the appendix on “What happened during the Russian Revolution?”).

This is just a summary of what was happening in Russia in early 1918 (see section 3 of the appendix on “What caused the degeneration of the Russian Revolution?” for more details). This Bolshevik assault on the soviets occurred during the spring of 1918 (i.e. in March, April and May). That is **before** the Czech rising and the onset of full scale civil war which occurred in late May. Clearly, any attempt to blame the Civil War for the elimination of soviet power and democracy seems woefully weak given the actions of the Bolsheviks in the spring of 1918. And, equally clearly, the reduction of local soviet influence cannot be fully understood without factoring in the Bolshevik prejudice in favour of centralisation (as codified in the Soviet Constitution of 1918) along with this direct repression. Indeed, the net effect of the Russian Civil War helped the Bolsheviks as it would make many dissident workers support the Bolsheviks during the war. This, however, did not stop mass resistance and strikes breaking out periodically during the war when workers and peasants could no longer put up with Bolshevik policies or the effects of the war (see section 5 of the appendix on “What caused the degeneration of the Russian Revolution?”).

Which, incidentally, answers Brian Bambery’s rhetorical question of “*why would the most militant working class in the world, within which there was a powerful cocktail of revolutionary ideas, and which had already made two revolutions (in 1905 and in February 1917), allow a handful of people to seize power behind its back in October 1917?*” [“*Leninism in the 21st Century*”, **Socialist Review**, no. 248, January 2001] Once the Russian workers realised that a handful of people **had** seized power they **did** protest the usurpation of their power and rights by the Bolsheviks. The Bolsheviks repressed them. With the start of the Civil War, the Bolsheviks played their trump card — “*Us or the Whites.*” This ensured their power as the workers had few choices but to agree. Indeed, it may explain why the Bolsheviks finally eliminated opposition parties and groups **after** the end of the Civil War and only repressed them during it. With the Whites gone, the opposition were rising in influence again and the “*White card*” could no longer be played.

Economically, the Bolshevik regime imposed a policy later called “*War Communism*” (although, as Victor Serge noted, “*any one who, like myself, went so far as to consider it purely temporary was looked upon with disdain.*” [**Memoirs of a Revolutionary**, p. 115] This regime was marked by extreme hierarchical and dictatorial tendencies. The leading lights of the Communist Party were expressing themselves on the nature of the “socialist” regime they desired. Trotsky, for example, put forward ideas for the “*militarisation of labour*” (as expounded in his infamous work **Terrorism and Communism**). Here are a few representative selections from that work:

“The very principle of compulsory labour service is for the Commu-

nist quite unquestionable... But hitherto it has always remained a mere principle. Its application has always had an accidental, impartial, episodic character. Only now, when along the whole line we have reached the question of the economic re-birth of the country, have problems of compulsory labour service arisen before us in the most concrete way possible. The only solution of economic difficulties that is correct from the point of view both of principle and of practice is to treat the population of the whole country as the reservoir of the necessary labour power ... and to introduce strict order into the work of its registration, mobilisation, and utilisation.” [Terrorism and Communism, p. 135]

“The introduction of compulsory labour service is unthinkable without the application, to a greater or less degree, of the methods of militarisation of labour.” [Op. Cit., p. 137]

“Why do we speak of militarisation? Of course, this is only an analogy — but an analogy very rich in content. No social organisation except the army has ever considered itself justified in subordinating citizens to itself in such a measure, and to control them by its will on all sides to such a degree, as the State of the proletarian dictatorship considers itself justified in doing, and does.” [Op. Cit., p. 141]

“Both economic and political compulsion are only forms of the expression of the dictatorship of the working class in two closely connected regions ... under Socialism there will not exist the apparatus of compulsion itself, namely, the State: for it will have melted away entirely into a producing and consuming commune. None the less, the road to Socialism lies through a period of the highest possible intensification of the principle of the State ... Just as a lamp, before going out, shoots up in a brilliant flame, so the State, before disappearing, assumes the form of the dictatorship of the proletariat, i.e., the most ruthless form of State, which embraces the life of the citizens authoritatively in every direction... No organisation except the army has ever controlled man with such severe compulsion as does the State organisation of the working class in the most difficult period of transition. It is just for this reason that we speak of the militarisation of labour.” [Op. Cit., pp. 169–70]

This account was written as a policy to be followed now that the *“internal civil war is coming to an end.”* [Op. Cit., p. 132] It was not seen as a temporary policy imposed upon the Bolsheviks by the war but rather, as can be seen, as an expression of *“principle”* (perhaps because Marx and Engels had written about the *“[e]stablishment of industrial armies”* in the **Communist Manifesto**? [Selected Writings, p. 53]).

In the same work, Trotsky justified the elimination of soviet power and democracy by party power and dictatorship (see sections 10 and 15). Thus we have the application of state serfdom by the Bolsheviks (indeed, Trotsky was allowed to apply his ideas on the militarisation of labour to the railways).

This vision of strict centralisation and top-down military structures built upon Bolshevik policies of the first months after the October revolution. The attempts at workers’ self-management organised by many factory committees

was opposed in favour of a centralised state capitalist system, with Lenin arguing for appointed managers with “dictatorial” powers (see Maurice Brinton’s **The Bolsheviks and Workers’ Control** for full details as well as “What happened during the Russian Revolution?”).

Strikes were repressed by force. In early May, 1918, a major wave of labour protest started which climaxed in early July. In Petrograd it included strikes, demonstrations and anti-Bolshevik factory meetings. Of the meetings unconnected to the Petrograd Soviet elections, “*the greatest number by far were protests against some form of Bolshevik repression: shootings, incidents of ‘terrorist activities’, and arrests.*” During the opposition organised strike of July 2nd, “*Zinoviev and others took quick counteraction . . . Any sign of sympathy for the strike was declared a criminal act. More arrests were made . . . On July 1 . . . machine guns were set up at main points throughout Petrograd and Moscow railroad junctions, and elsewhere in both cities as well. Controls were tightened in the factories. Meetings were forcefully dispersed.*” [William G. Rosenberg, **Russian Labour and Bolshevik Power**, pp. 123–4 and p. 127]

In 1918, workers who took strike action “*were afraid to lose their jobs*” as “*a strike inevitably led to a closure of the factory, a dismissal of the workers, and a careful screening of those rehired to determine their political preferences.*” By 1920, as well as these methods, workers also faced arrest by the Cheka and “*internment in a concentration camp.*” During the first six months of 1920 there were strikes in 77 percent of the medium- and large-size enterprises in Russia. As an example of the policies used to crush strikes, we can take the case of a strike by the workers of the Ryazan-Urals railroad in May 1921 (i.e. **after** the end of the Civil War). The authorities “*shut down the depot, brought in troops, and arrested another hundred workers*” in addition to the strikers delegates elected to demand the release of a railroad worker (whose arrest had provoked the strike). Ironically, those “*who had seized power in 1917 in the name of the politically conscious proletariat were in fact weeding out all these conscious workers.*” [V. Brovkin, **Behind the Front Lines of the Civil War**, pp. 287–8, pp. 290–1 and p. 298]

In the Red Army and Navy, anti-democratic principles were again imposed. At the end of March, 1918, Trotsky reported to the Communist Party that “*the principle of election is politically purposeless and technically inexpedient, and it has been, in practice, abolished by decree.*” Soldiers did not have to fear this system of top-down appointment as “*political power is in the hands of the same working class from whose ranks the Army is recruited*” (i.e. in the hands of the Bolshevik party). There could “*be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the **appointment** of members of the commanding staff by the organs of the Soviet Power.*” [**Work, Discipline, Order**] Of course, as any worker in struggle can tell you, they almost always come into conflict with the union’s bureaucracy (as Trotskyists themselves often point out).

In the Navy, a similar process occurred — much to the disgust and opposition of the sailors. As Paul Avrich notes, “*Bolshevik efforts to liquidate the ship committees and impose the authority of the centrally appointed commissars aroused a storm of protest in the Baltic Fleet. For the sailors, whose aversion to external authority was proverbial, any attempt to restore discipline meant a be-*

trayal of the freedoms for which they had struggles in 1917.” [Kronstadt 1921, p. 66] This process “began in earnest on 14 May 1918 with the **appointment** of Ivan Flerovsky as general commissar of the Baltic Fleet and chairman of its Council of Commissars, a body which replaced the disbanded elective Central Committee of the Baltic Fleet. Flerovsky promptly appointed bridge commissars to whom all ships’ committees were subordinated . . . Naval democracy was finally destroyed on 18 January 1919 when Trotsky . . . decreed the abolition of all ships’ committees, the appointment of commissars to all ships, and the setting up of revolutionary tribunals to maintain discipline, a function previously vested in elected ‘comradely courts.’” [I. Getzler, **Kronstadt 1917–1921**, p. 191]

In the countryside, grain requisitioning was resulting in peasant uprisings as food was taken from the peasants by force. While the armed detachments were “instructed to leave the peasants enough for their personal needs, it was common for the requisitioning squads to take at gun-point grain intended for personal consumption or set aside for the next sowing.” The villagers predictably used evasive tactics and cut back on the amount of land they tilled as well as practising open resistance. Famine was a constant problem as a result. [Avrich, **Op. Cit.**, pp. 9–10]

Thus Voline:

“the Bolshevik government evidently understood the slogan ‘power to the soviets’ in a peculiar way. It applied it in reverse. Instead of giving assistance to the working masses and permitting them to conquer and enlarge their own autonomous activity, it began by taking all ‘power’ from them and treating them like subjects. It bent the factories to its will and liberated the workers from the right to make their own decisions; it took arbitrary and coercive measures, without even asking the advice of the workers’ concerned; it ignored the demands emanating from the workers’ organisations. And, in particular, it increasingly curbed, under various pretexts, the freedom of action of the Soviets and of other workers’ organisations, everywhere imposing its will arbitrarily and even by violence.” [The Unknown Revolution, pp. 459–60]

From before the start of Civil War, the Russian people had been slowly but surely eliminated from any meaningful say in the progress of the revolution. The Bolsheviks undermined (when not abolishing) workers’ democracy, freedom and rights in the workplaces, the soviets, the unions, the army and the navy. Unsurprisingly, the lack of any real control from below heightened the corrupting effects of power. Inequality, privilege and abuses were everywhere in the ruling party and bureaucracy (“*Within the party, favouritism and corruption were rife. The Astoria Hotel, where many high officials lived, was the scene of debauchery, while ordinary citizens went without the bare necessities.*” [Paul Avrich, **Bolshevik Opposition to Lenin: G. T. Miasnikov and the Workers’ Group**]).

With the end of the Civil War in November 1920, many workers expected a change of policy. However, months passed and the same policies were followed. “*The Communist State,*” as Alexander Berkman summarised, “*showed no intention of loosening the yoke. The same policies continued, with labour militarisation still further enslaving the people, embittering them with added*

oppression and tyranny, and in consequence paralysing every possibility of industrial revival." [The Russian Tragedy, p. 61] Finally, in the middle of February, 1921, "a rash of spontaneous factory meetings" began in Moscow. Workers called for the immediate scrapping of War Communism. These meetings were "succeeded by strikes and demonstrations." Workers took to the streets demanding "free trade", higher rations and "the abolition of grain requisitions." Some demanded the restoration of political rights and civil liberties. Troops had to be called in to restore order. [Paul Avrich, **Op. Cit.**, pp. 35–6]

Then a far more serious wave of strikes and protests swept Petrograd. The Kronstadt revolt was sparked off by these protests. Like Moscow, these "street demonstrations were heralded by a rash of protest meetings in Petrograd's numerous but depleted factories and shops." Like Moscow, speakers "called for an end to grain requisitioning, the removal of roadblocks, the abolition of privileged rations, and permission to barter personal possessions for food." On the 24th of February, the day after a workplace meeting, the Trubochny factory workforce downed tools and walked out the factory. Additional workers from nearby factories joined in. The crowd of 2,000 was dispersed by armed military cadets. The next day, the Trubochny workers again took to the streets and visited other workplaces, bringing them out on strike too. [Avrich, **Op. Cit.**, pp. 37–8]

The strikers started to organise themselves. "As in 1918, workers from various plants elected delegates to the Petrograd Assembly of Plenipotentiaries." [V. Brovkin, **Behind the Front Lines of the Civil War**, p. 393]

A three-man Defence Committee was formed and Zinoviev "proclaimed martial law" on February 24th. [Avrich, **Op. Cit.**, p. 39] A curfew of 11pm was proclaimed, all meetings and gatherings (indoor and out) were banned unless approved of by the Defence Committee and all infringements would "be dealt with according to military law." [Ida Mett, **The Kronstadt Uprising**, p. 37]

The workers "were ordered to return to their factories, failing which they would be denied their rations. That, however, had no impact: but in addition, a number of trade unions was disbanded, their leaders and the most die-hard strikers tossed into prison." [Emma Goldman, **No Gods, No Masters**, vol. 2, p. 168]

As part of this process of repression, the Bolshevik government had to rely on the *kursanty* (Communist officer cadets) as the local garrisons had been caught up the general ferment and could not be relied upon to carry out the government's orders. Hundreds of *kursanty* were called in from neighbouring military academies to patrol the city. "Overnight Petrograd became an armed camp. In every quarter pedestrians were stopped and their documents checked . . . the curfew [was] strictly enforced." The Petrograd Cheka made widespread arrests. [Avrich, **Op. Cit.**, pp. 46–7]

The Bolsheviks also stepped up their propaganda drive. The strikers were warned not to play into the hands of the counterrevolution. As well as their normal press, popular party members were sent to agitate in the streets, factories and barracks. They also made a series of concessions such as providing extra rations. On March 1st (after the Kronstadt revolt had started) the Petrograd soviet announced the withdrawal of all road-blocks and demobilised the Red Army soldiers assigned to labour duties in Petrograd. [Avrich, **Op. Cit.**, pp. 48–9]

Thus a combination of force, propaganda and concessions was used to defeat the strike (which quickly reached a near general strike level). As Paul

Arvich notes, “there is no denying that the application of military force and the widespread arrests, not to speak of the tireless propaganda waged by the authorities had been indispensable in restoring order. Particularly impressive in this regard was the discipline shown by the local party organisation. Setting aside their internal disputes, the Petrograd Bolsheviks swiftly closed ranks and proceeded to carry out the unpleasant task of repression with efficiency and dispatch.” [Op. Cit., p. 50]

This indicates the immediate context of the Kronstadt rebellion. Yet Trotskyist J. G. Wright wonders whether the Kronstadt’s paper “*lied when in the very first issue . . . it carried a sensational headline: ‘General Insurrection in Petrograd’*” and states that people “*spread . . . lies about the insurrection in Petrograd.*” [Lenin and Trotsky, **Kronstadt**, p. 109] Yes, of course a near general strike, accompanied by mass meetings and demonstrations and repressed by force and martial law, is a everyday occurrence and has nothing in common with an “*insurrection*”! If such events occurred in a state not headed by Lenin and Trotsky it is unlikely Mr. Wright would have such difficulty in recognising them for what there were. Historian V. Brovkin states the obvious when he wrote “[t]o anyone who had lived through the events of February 1917, this chain of events appeared strikingly similar. It looked as if a popular insurrection had begun.” [Brovkin, **Op. Cit.**, p. 393]

It was these labour protests and their repression which started the events in Kronstadt. While many sailors had read and listened to the complaints of their relatives in the villages and had protested on their behalf to the Soviet authorities, it took the Petrograd strikes to be the catalyst for the revolt. Moreover, they had other political reasons for protesting against the policies of the government. Navy democracy had been abolished by decree and the soviets had been turned into fig-leaves of party dictatorship.

Unsurprisingly, the crew of the battleships *Petropavlovsk* and *Sevastopol* decided to act once “*the news of strikes, lockouts, mass arrests and martial law*” in Petrograd reached them. They “*held a joint emergency meeting in the face of protests and threats of their commissars . . . [and] elected a fact-finding delegation of thirty-two sailors which, on 27 February, proceeded to Petrograd and made the round of the factories. . . They found the workers whom they addressed and questioned too frightened to speak up in the presence of the hosts of Communist factory guards, trade union officials, party committee men and Chekists.*” [Gelzter, **Kronstadt 1917–1921**, p. 212]

The delegation returned the next day and reported its findings to a general meeting of the ship’s crews and adopted the resolutions which were to be the basis of the revolt (see next section). The Kronstadt revolt had started.

3 What was the Kronstadt Programme?

It is rare for a Trotskyist to actually list the demands of the Kronstadt revolt in their entirety. For example, John Rees does not provide even a summary of the 15 point programme. He asserts that the “*sailors represented the exasperated of the peasantry with the War Communism regime*” while, rather lamely, noting that “*no other peasant insurrection reproduced the Kronstadters demands.*” [“*In Defence of October*”, pp. 3–82, **International Socialism**, no. 52, p. 63] Similarly, it is only the “*Editorial Preface*” in the Trotskyist work **Kronstadt**

which presents even a summary of the demands. This summary states:

*“The resolution demanded free elections in the soviets with the participation of anarchists and Left SRs, legalisation of the socialist parties and the anarchists, abolition of the Political Departments [in the fleet] and the Special Purpose Detachments, removal of the **zagraditelnye ottyady** [Armed troops used to prevent unauthorised trade], restoration of free trade, and the freeing of political prisoners.” [Lenin and Trotsky, **Kronstadt**, pp. 5–6]*

They assert in the “Glossary” that it “demanded political and economic changes, many of which were soon realised with the adoption of the NEP.” [**Op. Cit.**, p. 148] Which, ironically enough, contradicts Trotsky who claimed that it was an “illusion” to think “it would have been sufficient to inform the sailors of the NEP decrees to pacify them.” Moreover, the “insurgents did not have a conscious program, and they could not have had one because of the very nature of the petty bourgeoisie. They themselves did not clearly understand that their fathers and brothers needed first of all was free trade.” [**Op. Cit.**, p. 91–2]

So we have a uprising which was peasant in nature, but whose demands did not have anything in common with other peasant revolts. It apparently demanded free trade and did not demand it. It was similar to the NEP, but the NEP decrees would not have satisfied it. It produced a platform of political and economic demands but did not, apparently, have a “conscious program.” The contradictions abound. Why these contradictions exist will become clear after we list the 15 demands.

The full list of demands are as follows:

1. *Immediate new elections to the Soviets. The present Soviets no longer express the wishes of the workers and peasants. The new elections should be by secret ballot, and should be preceded by free electoral propaganda.*
2. *Freedom of speech and of the press for workers and peasants, for the Anarchists, and for the Left Socialist parties.*
3. *The right of assembly, and freedom for trade union and peasant organisations.*
4. *The organisation, at the latest on 10th March 1921, of a Conference of non-Party workers, soldiers and sailors of Petrograd, Kronstadt and the Petrograd District.*
5. *The liberation of all political prisoners of the Socialist parties, and of all imprisoned workers and peasants, soldiers and sailors belonging to working class and peasant organisations.*
6. *The election of a commission to look into the dossiers of all those detained in prisons and concentration camps.*
7. *The abolition of all political sections in the armed forces. No political party should have privileges for the propagation of its ideas, or receive State subsidies to this end. In the place of the political sections various cultural groups should be set up, deriving resources from the State.*

8. *The immediate abolition of the militia detachments set up between towns and countryside.*
9. *The equalisation of rations for all workers, except those engaged in dangerous or unhealthy jobs.*
10. *The abolition of Party combat detachments in all military groups. The abolition of Party guards in factories and enterprises. If guards are required, they should be nominated, taking into account the views of the workers.*
11. *The granting to the peasants of freedom of action on their own soil, and of the right to own cattle, provided they look after them themselves and do not employ hired labour.*
12. *We request that all military units and officer trainee groups associate themselves with this resolution.*
13. *We demand that the Press give proper publicity to this resolution.*
14. *We demand the institution of mobile workers' control groups.*
15. *We demand that handicraft production be authorised provided it does not utilise wage labour.*" [quoted by Ida Mett, **The Kronstadt Revolt**, pp. 37–8]

This is the program described by the Soviet government as a “*SR-Black Hundreds resolution*”! This is the program which Trotsky maintains was drawn up by “*a handful of reactionary peasants and soldiers.*” [Lenin and Trotsky, **Kronstadt**, p. 65 and p. 98] As can be seen, it was nothing of the kind. Indeed, this resolution is largely in the spirit of the political slogans of the Bolsheviks before they seized of power in the name of the soviets. Moreover, it reflected ideals expounded in 1917 and were formalised in the Soviet State’s 1918 constitution. In the words of Paul Avrich, “[i]n effect, the **Petropavlovsk resolution** was an appeal to the Soviet government to live up to its own constitution, a bold statement of those very rights and freedom which Lenin himself had professed in 1917. In spirit, it was a throwback to October, evoking the old Leninist watchword of ‘All power to the soviets.’” [**Kronstadt 1921**, pp. 75–6] Hardly an example of “*reactionary*” politics, unless the slogans of 1917 and the 1918 constitution of the U.S.S.R. are also “*reactionary.*”

While these fifteen demands are central to the revolt, looking at the paper produced by the revolt helps us understand the nature of these demands and place them in a fuller political context. “*The pages of Izvestiia,*” as Voline argued, “*give abundant proof of th[e] general enthusiasm, which re-appeared once the masses felt they had regained, in the free Soviets, the true road to emancipation and the hope of achieving the real revolution.*” [**Unknown Revolution**, p. 495] For example, food rations were equalised, except for the sick and to children, who received a larger one. Left-wing political parties were legalised. The Provisional Revolutionary Committee was elected by a “*Conference of Delegates*” made up of over two hundred delegates from military units and workplaces. This body elected the Provisional Revolutionary Committee on March 2nd and enlarged it (again by election) on March 4th.

The March 4th Conference of Delegates also “*decided that all workers, without exception, should be armed and put in charge of guarding the interior of the city*” and to organise re-elections for “*the administrative commissions of*

all the unions and also of the Council of Unions” (which could “become the principle organ of the workers”). [*Izvestiia* quoted by Voline, **The Unknown Revolution**, p. 494]

In the article “*The Goals for Which We Fight*,” the rebels argue that “[w]ith the aid of state unions” the Communists have “chained the workers to the machines, and transformed work into a new slavery instead of making it pleasant.” Moreover, to the “protests of the peasants, which have gone so far as spontaneous revolts, to the demands of the workers, compelled by the very conditions of their life to resort to strikes, they reply with mass shootings and a ferocity that the Tsarist generals might have envied.” An “inevitable third revolution” was coming, shown by “increasing” workers’ strikes, which will be “achieved by the labouring masses themselves.” This would be based on “freely elected soviets” and the reorganisation of “the state unions into free associations of workers, peasants and intellectuals.” [*Izvestiia* quoted by Voline, **Op. Cit.**, pp. 507–8]

Thus the rebels saw clearly the real nature of nationalisation. Rather than being the basis of socialism, it simply produced more wage slavery, this time to the state (“From a slave of the capitalist the worker was transformed into a slave of state enterprises.” [*Izvestiia* quoted by Voline, **Op. Cit.**, p. 518]). They clearly saw the need to replace wage slavery to the state (via nationalised property) with free associations of free workers and peasants. Such a transformation would come from the collective direct action and self-activity of working people, as expressed in the strikes which had so recently swept across the country.

This transformation from the bottom up was stressed elsewhere. The unions, *Izvestiia* argued, would “fulfil the great and urgent task of educating the masses for an economic and cultural renovation of the country. . . . The Soviet Socialist Republic cannot be strong unless its administration be exercised by the working class, with the help of renovated unions.” These should “become real representatives of the interests of the people.” The current unions did “nothing” to promote “economic activity of a co-operative nature” or the “cultural education” of their members due centralised system imposed by the Communist regime. This would change with “true union activity by the working class.” [*Izvestiia* quoted by Voline, **Op. Cit.**, p. 510] A strong syndicalist perspective clearly can be seen here, urging self-managed unions to be at the forefront of transforming the economy into a free association of producers. They opposed any “socialist” system in which the peasant “has been transformed into a serf in the ‘soviet’ economy,” the worker “a simple wage-worker in the State factories” and those who protest are “thrown into the jails of the Cheka.” [*Izvestiia* quoted by Voline, **Op. Cit.**, p. 512]

The rebels saw that soviet power cannot exist while a political party dominated the soviets. They argued that Russia was just “State Socialism with Soviets of functionaries who vote docilely what the authorities and their infallible commissars dictate to them.” Without real working class power, without “the will of the worker” expressed in their free soviets, corruption had become rampant (“Communists . . . live in ease and the commissars get fat.”). Rather than a “time of free labour in the fields, factories and workshops,” where “power” was in “the hands of the workers,” the “Communists ha[d] brought in the rule of the commissars, with all the despotism of personal power.” [*Izvestiia*, quoted by Voline, **Op. Cit.**, p. 519, p. 518, p. 511 and p. 518]

In opposition to this, the rebels argued that “*Revolutionary Kronstadt . . . fights for the true Soviet Republic of the workers in which the producer himself will*

be owner of the products of his labour and can dispose of them as he wishes.” They desired “*a life animated by free labour and the free development of the individual*” and so proclaimed “*All power to the Soviets and not to the parties*” and “*the power of the free soviets.*” [*Izvestiia* quoted by Voline, **Op. Cit.**, p. 519]

As can be seen, while the 15 demands are the essence of the revolt, looking at *Izvestiia* confirms the revolutionary nature of the demands. The rebels of 1921, as in 1917, looked forward to a system of free soviets in which working people could transform their society into one based on free associations which would encourage individual freedom and be based on working class power. They looked to a combination of renewed and democratic soviets and unions to transform Russian society into a **real** socialist system rather than the system of state capitalism the Bolsheviks had imposed (see Maurice Brintin’s **The Bolsheviks and Workers’ Control** for details of Lenin’s commitment to building state capitalism in Russia from 1917 onwards).

Clearly, Kronstadt’s political programme was deeply socialist in nature. It opposed the new wage slavery of the workers to the state and argued for free associations of free producers. It was based on the key slogan of 1917, “*All power to the soviets*” but built upon it by adding the rider “*but not to parties.*” The sailors had learned the lesson of the October revolution, namely that if a party held power the soviets did not. The politics of the revolt were not dissimilar to those of libertarian socialists and, as we argue in section 9, identical to the dominant ideas of Kronstadt in 1917.

The question now arises, whose interests did these demands and politics represent. According to Trotskyists, it is the interests of the peasantry which motivated them. For anarchists, it is an expression of the interests of all working people (proletarian, peasant and artisan) against those who would exploit their labour and govern them (be it private capitalists or state bureaucrats). We discuss this issue in the next section.

4 Did the Kronstadt rebellion reflect “*the exasperation of the peasantry*”?

This is a common argument of Trotskyists. While rarely providing the Kronstadt demands, they always assert that (to use John Rees’ words) that the sailors “*represented the exasperation of the peasantry with the War Communist regime.*” [*In Defence of October*, **International Socialism** no. 52, p. 63]

As for Trotsky, the ideas of the rebellion “*were deeply reactionary*” and “*reflected the hostility of the backward peasantry toward the worker, the self-importance of the soldier or sailor in relation to ‘civilian’ Petrograd, the hatred of the petty bourgeois for revolutionary discipline.*” The revolt “*represented the tendencies of the land-owning peasant, the small speculator, the kulak.*” [Lenin and Trotsky, **Kronstadt**, p. 80 and p. 81]

How true is this? Even a superficial analysis of the events of the revolt and of the *Petropavlovsk* resolution (see last section) can allow the reader to dismiss Trotsky’s assertions.

Firstly, according to the definition of “*kulak*” proved by the Trotskyists’ themselves, we discover that kulak refers to “*well-to-do peasants who owned*

land and hired poor peasants to work it." [Lenin and Trotsky, **Op. Cit.**, p. 146] Point 11 of the Kronstadt demands explicitly states their opposition to rural wage labour. How could Kronstadt represent "*the kulak*" when it called for the abolition of hired labour on the land? Clearly, the revolt did not represent the "*small speculator, the kulak*" as Trotsky asserted. Did it represent the land-owning peasant? We will return to this issue shortly.

Secondly, the Kronstadt revolt started after the sailors at Kronstadt sent delegates to investigate the plight of striking workers in Petrograd. Their actions were inspired by solidarity for these workers and civilians. This clearly shows that Trotsky's assertion that the revolt "*reflected the hostility of the backward peasantry toward the worker, the self-importance of the soldier or sailor in relation to 'civilian' Petrograd*" to be utter and total nonsense.

As for the being "*deeply reactionary*," the ideas that motivated the revolt clearly were not. They were the outcome of solidarity with striking workers and called for soviet democracy, free speech, assembly and organisation for workers and peasants. These express the demands of most, if not all, Marxist parties (including the Bolsheviks in 1917) before they take power. They simply repeat the demands and facts of the revolutionary period of 1917 and of the Soviet Constitution. As Anton Ciliga argues, these demands were "*impregnated with the spirit of October; and no calumny in the world can cast a doubt on the intimate connection existing between this resolution and the sentiments which guided the expropriations of 1917.*" ["*The Kronstadt Revolt*", **The Raven**, no. 8, pp. 330–7, p. 333] If the ideas of the Kronstadt revolt are reactionary, then so is the slogan "*all power to the soviets.*"

Not that the Kronstadters had not been smeared before by their opponents. The ex-Bolshevik turned Menshevik Vladimir Voitinsky who had visited the base in May 1917 later remembered them as being "*degraded and demoralised*" and "*lack[ing] proletarian class-consciousness. It has the psychology of a Lumpenproletariat, a stratum that is a danger to a revolution rather than its support.*" They were "*material suitable for a rebellion a la Bakunin.*" [quoted by I. Getzler, **Kronstadt 1917–1921**, p. 253]

So did the demands represent the interests of the (non-kulak) peasantry? To do so we must see whether the demands reflected those of industrial workers or not. If the demands do, in fact, match those of striking workers and other proletarian elements then we can easily dismiss this claim. After all, if the demands of the Kronstadt rebellion reflected those of proletarians then it is impossible to say that they simply reflected the needs of peasants (of course, Trotskyists will argue that these proletarians were also "*backward*" but, in effect, they are arguing that any worker who did not quietly follow Bolshevik orders was "*backward*" — hardly a sound definition of the term!).

We can quickly note that demands echoed those raised during the Moscow and Petrograd strikes that preceded the Kronstadt revolt. For example, Paul Avrich records that the demands raised in the February strikes included "*removal of roadblocks, permission to make foraging trips into the countryside and to trade freely with the villagers, [and] elimination of privileged rations for special categories of working men.*" The workers also "*wanted the special guards of armed Bolsheviks, who carried out a purely police function, withdrawn from the factories*" and raised "*pleas for the restoration of political and civil rights.*" One manifesto which appeared (unsigned but bore earmarks of Menshevik origin) argued that "*the workers and peasants need freedom. They do not want to live*

by the decrees of the Bolsheviks. They want to control their own destinies.” It urged the strikers to demand the liberation of all arrested socialists and nonparty workers, abolition of martial law, freedom of speech, press and assembly for all who labour, free elections of factory committees, trade unions, and soviets. [Avrich, **Kronstadt 1921**, pp. 42–3]

In the strikes of 1921, according to Lashevich (a Bolshevik Commissar) the “basic demands are everywhere the same: free trade, free labour, freedom of movement, and so on.” Two key demands raised in the strikes dated back to at least 1920. These were “for free trade and an end to privilege.” In March 1919, “the Rechkin coach-building plant demanded equal rations for all **workers**” and that one of the “most characteristic demands of the striking workers at that time were for the free bringing-in of food.” [Mary McAuley, **Bread and Justice**, p. 299 and p. 302]

As can be seen, these demands related almost directly to points 1, 2, 3, 5, 8, 9, 10, 11 and 13 of the Kronstadt demands. As Paul Avrich argues, the Kronstadt demands “echoed the discontents not only of the Baltic Fleet but of the mass of Russians in towns and villages throughout the country. Themselves of plebeian stock, the sailors wanted relief for their peasant and worker kinfolk. Indeed, of the resolution’s 15 points, only one — the abolition of the political departments in the fleet — applied specifically to their own situation. The remainder . . . was a broadside aimed at the policies of War Communism, the justification of which, in the eyes of the sailors and of the population at large, had long since vanished.” Avrich argues that many of the sailors had returned home on leave to see the plight of the villagers with their own eyes played at part in framing the resolution (particularly of point 11, the **only** peasant specific demand raised) but “[b]y the same token, the sailors’ inspection tour of Petrograd’s factories may account for their inclusion of the workingmen’s chief demands — the abolition of road-blocks, of privileged rations, and of armed factory squads — in their program.” [Avrich, **Op. Cit.**, pp. 74–5] Simply put, the Kronstadt resolution “merely reiterated long standing workers’ demands.” [V. Brovkin, **Behind the Front Lines of the Civil War**, p. 395]

Which means, of course, that Ida Mett had been correct to argue that the “Kronstadt revolution had the merit of stating things openly and clearly. But it was breaking no new ground. Its main ideas were being discussed everywhere. For having, in one way or another, put forward precisely such ideas, workers and peasants were already filling the prisons and the recently set up concentration camps.” [**The Kronstadt Uprising**, p. 39]

Nor can it be claimed that these workers were non-proletarians (as if class is determined by thought rather than social position). Rather than being those workers with the closest relations with the countryside who were protesting, the opposite was the case. By 1921 “[a]ll who had relatives in the country had rejoined them. The authentic proletariat remained till the end, having the most slender connections with the countryside.” [Ida Mett, **Op. Cit.**, p. 36]

Thus the claims that the Kronstadt demands reflected peasant needs is mistaken. They reflected the needs of the whole working population, including the urban working class who raised these demands continually throughout the Civil War period in their strikes. Simply put, the policies of the Bolsheviks as regards food were not only evil, they did not work and were counter-productive. As many of the Russian working class recognised from the start and took strike action over again and again.

Moreover, by focusing on the “free trade” issue, Leninists distort the real reasons for the revolt. As Ida Mett points out, the Kronstadt rebellion did not call for “free trade” as the Trotskyists argue, but rather something far more important:

“In the Kronstadt Isvestia of March 14th we find a characteristic passage on this subject. The rebels proclaimed that ‘Kronstadt is not asking for freedom of trade but for genuine power to the Soviets.’ The Petrograd strikers were also demanding the reopening of the markets and the abolition of the road blocks set up by the militia. But they too were stating that freedom of trade by itself would not solve their problems.” [Op. Cit., p. 77]

Thus we have the Petrograd (and other) workers calling for “free trade” (and so, presumably, expressing their economic interests or those of their fathers and brothers) while the Kronstadt sailors were demanding first and foremost soviet power! Their programme called for the “granting to the peasants of freedom of action on their own soil, and of the right to own cattle, provided they look after them themselves and do not employ hired labour.” This was point 11 of the 15 demands, which showed the importance it ranked in their eyes. This would have been the basis of trade between town and village, but trade between worker and peasant and not between worker and kulak. So rather than call for “free trade” in the abstract (as many of the workers were) the Kronstadters (while reflecting the needs of both workers and peasants) were calling for the free exchange of products between workers, not workers and rural capitalists (i.e. peasants who hired wage slaves). This indicates a level of political awareness, an awareness of the fact that wage labour is the essence of capitalism.

Thus Ante Ciliga:

“People often believe that Kronstadt forced the introduction of the New Economic Policy (NEP) — a profound error. The Kronstadt resolution pronounced in favour of the defence of the workers, not only against the bureaucratic capitalism of the State, but also against the restoration of private capitalism. This restoration was demanded — in opposition to Kronstadt — by the social democrats, who combined it with a regime of political democracy. And it was Lenin and Trotsky who to a great extent realised it (but without political democracy) in the form of the NEP. The Kronstadt resolution declared for the opposite since it declared itself against the employment of wage labour in agriculture and small industry. This resolution, and the movement underlying, sought for a revolutionary alliance of the proletarian and peasant workers with the poorest sections of the country labourers, in order that the revolution might develop towards socialism. The NEP, on the other hand, was a union of bureaucrats with the upper layers of the village against the proletariat; it was the alliance of State capitalism and private capitalism against socialism. The NEP is as much opposed to the Kronstadt demands as, for example, the revolutionary socialist programme of the vanguard of the European workers for the abolition of the Versailles system, is opposed to the abrogation of the Treaty of Versailles achieved by Hitler.” [Op. Cit., pp. 334–5]

Point 11 did, as Ida Mett noted, “*reflected the demands of the peasants to whom the Kronstadt sailors had remained linked — as had, as a matter of fact, the whole of the Russian proletariat . . . In their great majority, the Russian workers came directly from the peasantry. This must be stressed. The Baltic sailors of 1921 were, it is true, closely linked with the peasantry. But neither more nor less than had been the sailors of 1917.*” To ignore the peasantry in a country in which the vast majority were peasants would have been insane (as the Bolsheviks proved). Mett stresses this when she argued that a “*workers and peasants’ regime that did not wish to base itself exclusively on lies and terror, had to take account of the peasantry.*” [Op. Cit., p. 40]

Given that the Russian industrial working class were also calling for free trade (and often without the political, anti-capitalist, riders Kronstadt added) it seems dishonest to claim that the sailors purely expressed the interests of the peasantry. Perhaps this explains why point 11 becomes summarised as “*restoration of free trade*” by Trotskyists. [“*Editorial Preface*”, Lenin and Trotsky, **Kronstadt**, p. 6] John Rees does not even mention any of the demands (which is amazing in a work which, in part, tries to analyse the rebellion).

Similarly, the working class nature of the resolution can be seen from who agreed to it. The resolution passed by the sailors on the battleships was ratified by a mass meeting and then a delegate meeting of workers, soldiers and sailors. In other words, by workers **and** peasants.

J.G. Wright, following his guru Trotsky without question (and using him as the sole reference for his “facts”), stated that “*the incontestable facts*” were the “*sailors composed the bulk of the insurgent forces*” and “*the garrison and the civil population remained passive.*” [Lenin and Trotsky, **Op. Cit.**, p. 123] This, apparently, is evidence of the peasant nature of the revolt. Let us contest these “*incontestable facts*” (i.e. assertions by Trotsky).

The first fact we should mention is that the meeting of 1st March in Anchor Square involved “*some fifteen to sixteen thousand sailors, soldiers and civilians.*” [Getzler, **Op. Cit.**, p. 215] This represented over 30% of Kronstadt’s total population. This hardly points to a “passive” attitude on behalf of the civilians and soldiers.

The second fact is that the conference of delegates had a “*membership that fluctuated between which two and three hundred sailors, soldiers, and working men.*” This body remained in existence during the whole revolt as the equivalent of the 1917 soviet and, like that soviet, had delegates from Kronstadt’s “*factories and military units.*” It was, in effect, a “*prototype of the ‘free soviets’ for which the insurgents had risen in revolt.*” In addition, a new Trade Union Council was created, free from Communist domination. [Avrich, **Op. Cit.**, p. 159 and p. 157] Trotsky expects us to believe that the soldiers and civilians who elected these delegates were “passive”? The very act of electing these delegates would have involved discussion and decision making and so active participation. It is extremely doubtful that the soldiers and civilians would have so apathetic and apolitical to not have taken an active part in the revolt.

Thirdly, the declarations by sailors, soldiers and workers printed in *Izvestiia* which expressed their support for the revolt and those which announced they had left the Communist Party also present evidence which clearly contests Trotsky’s and Wright’s “*incontestable facts.*” One declaration of the “*soldiers of the Red Army from the fort Krasnoarmeietz*” stated they were “*body and soul with the Revolutionary Committee.*” [quoted by Voline, **The Unknown Revolution**,

p. 500]

Lastly, given that the Red Army troops manned the main bastion and the outlying forts and gun emplacements at Kronstadt and that the Bolshevik troops had to take these forts by force, we can safely argue that the Red Army soldiers did not play a “passive” role during the rebellion. [Paul Avrich, **Op. Cit.**, p. 54 and pp. 205–6]

This is confirmed by later historians. Based on such facts, Paul Avrich states that the townspeople “*offered their active support*” and the Red Army troops “*soon fell into line.*” [**Op. Cit.**, p. 159] Fedotoff-White notes that the “*local land forces of the Kronstadt garrison . . . fell in and joined the seamen.*” [**The Growth of the Red Army**, p. 154] Getzler notes that elections were held for the Council of Trade Unions on the 7th and 8th of March and this was a “*Council committee consisting of representatives from all trade unions.*” He also notes that the Conference of Delegates “*had been elected by Kronstadt’s body politic at their places of work, in army units, factories, workshops and Soviet institutions.*” He adds that the revolutionary troikas (the equivalent of the commissions of the Executive Committee of the Soviet in 1917) were also “*elected by the base organisations.*” Likewise, “*the secretariats of the trade unions and the newly founded Council of Trade Unions were both elected by the entire membership of trade unions.*” [**Op. Cit.**, pp. 238–9 and p. 240]

That is a lot of activity for “passive” people.

In other words, the **Petropavlovsk** resolution not only reflected the demands of proletarians in Petrograd, it gained the support of proletarians in Kronstadt in the fleet, the army and the civilian workforce. Thus the claim that the Kronstadt resolution purely reflected the interests of the peasantry is, yet again, refuted.

As can be seen, the Kronstadters’ (like the Petrograd workers) raised economic and political demands in 1921 just as they had four years earlier when they overthrew the Tsar. Which, again, refutes the logic of defenders of Bolshevism. For example, Wright excelled himself when he argued the following:

“The supposition that the soldiers and sailors could venture upon an insurrection under an abstract political slogan of ‘free soviets’ is absurd in itself. It is doubly absurd in the view of the fact [!] that the rest of the Kronstadt garrison consisted of backward and passive people who could not be used in the civil war. These people could have been moved to an insurrection only by profound economic needs and interests. These were the needs and interests of the fathers and brothers of these sailors and soldiers, that is, of peasants as traders in food products and raw materials. In other words the mutiny was the expression of the petty bourgeoisie’s reaction against the difficulties and privations imposed by the proletarian revolution. Nobody can deny this class character of the two camps.” [Lenin and Trotsky, **Op. Cit.**, pp. 111–2]

Of course, no worker or peasant could possibly reach beyond a trade union consciousness by their own efforts, as Lenin so thoughtfully argued in **What is to be Done?**. Neither could the experience of two revolutions have an impact on anyone, nor the extensive political agitation and propaganda of years of struggle. Indeed, the sailors were so backward that they had no “*profound*

economic needs and interests” of their own but rather fought for their fathers and brothers interests! Indeed, according to Trotsky they did not even understand that (“*They themselves did not clearly understand that what their fathers and brothers needed first of all was free trade.*” [Lenin and Trotsky, **Op. Cit.**, p. 92])! And these were the sailors the Bolsheviks desired to man some of the most advanced warships in the world?

Sadly for Wright’s assertions history has proven him wrong time and time again. Working people have constantly raised political demands which were far in advance of those of the “professional” revolutionaries (a certain German and the Paris Commune springs to mind, never mind a certain Russian and the soviets). The fact that the Kronstadt sailors not only “*venture[d] upon an insurrection under an abstract political slogan of ‘free soviets’*” but actually **created** one (the conference of delegates) goes unmentioned. Moreover, as we prove in section 8, the majority of sailors in 1921 had been there in 1917. This was due to the fact that the sailors could not be quickly or easily replaced due to the technology required to operate Kronstadt’s defences and battleships.

Given that the “*a smaller proportion of the Kronstadt sailors were of peasant origin than was the case of the Red Army troops supporting the government,*” perhaps we will discover Trotskyists arguing that because “*ordinary Red Army soldiers . . . were reluctant and unreliable fighters against Red Kronstadt, although driven at gunpoint onto the ice and into battle*” that also proves the peasant nature of the revolt? [Sam Farber, **Op. Cit.**, p. 192; Israel Getzler, **Kronstadt 1917–1921**, p. 243] Given the quality of the previous arguments presented, it is only a matter of time before this one appears!

Indeed, Trotskyists also note this non-peasant nature of the Kronstadt demands (as indicated in the last section). Thus was have John Rees pathetically noting that “*no other peasant insurrection reproduced the Kronstadters’ demands.*” [Rees, **Op. Cit.**, p. 63] As we have indicated above, **proletarian** strikes, resolutions and activists all produced demands similar or identical to the Kronstadt demands. These facts, in themselves, indicate the truth of Trotskyist assertions on this matter. Rees mentions the strikes in passing, but fails to indicate that Kronstadt’s demands were raised after a delegation of sailors had returned from visiting Petrograd. Rather than their “*motivation*” being “*much closer to that of the peasantry*” that to the “*dissatisfaction of the urban working class*” the facts suggest the opposite (as can be seen from the demands raised). [Rees, **Op. Cit.**, p. 61] The motivation for the resolution was a product of the strikes in Petrograd and it also, naturally enough, included the dissatisfaction of the peasantry (in point 11). For the Kronstadters, it was a case of the needs of **all** the toilers and so their resolution reflected the needs and demands of both.

Unfortunately for Rees, another revolt **did** reproduce the Kronstadt demands and it was by urban workers, **not** peasants. This revolt took place in Ekaterinoslavl (in the Ukraine) in May, 1921. It started in the railway workshops and became “*quickly politicised,*” with the strike committee raising a “*series of political ultimatums that were very similar in content to the demands of the Kronstadt rebels.*” Indeed, many of the resolutions put to the meeting almost completely coincided with the Kronstadt demands. The strike “*spread to the other workshops*” and on June 1st the main large Ekaterinoslavl factories joined the strike. The strike was spread via the use of trains and telegraph and soon an area up to fifty miles around the town was affected. The strike was finally ended by the use of the Cheka, using mass arrests and shootings. Unsur-

prisingly, the local communists called the revolt a *little Kronstadt*.” [Jonathan Aves, **Workers Against Lenin**, pp. 171–3]

Therefore to claim that Kronstadt solely reflected the plight or interests of the peasantry is nonsense. Nor were the **economic** demands of Kronstadt alarming to the Bolshevik authorities. After all, Zinoviev was about to grant the removal of the roadblock detachments (point 8) and the government was drafting what was to become known as the New Economic Policy (NEP) which would satisfy point 11 partially (the NEP, unlike the Kronstadters, did not end wage labour and so, ironically, represented the interests of the Kulaks!). It was the **political** demands which were the problem. They represented a clear challenge to Bolshevik power and their claims at being the “*soviet power*.”

5 What lies did the Bolsheviks spread about Kronstadt?

From the start, the Bolsheviks lied about the uprising. Indeed, Kronstadt provides a classic example of how Lenin and Trotsky used slander against their political opponents. Both attempted to paint the revolt as being organised and led by the Whites. At every stage in the rebellion, they stressed that it had been organised and run by White guard elements. As Paul Avrich notes, “*every effort was made to discredit the rebels*” and that the “*chief object of Bolshevik propaganda was to show that the revolt was not a spontaneous outbreak of mass protest but a new counterrevolutionary conspiracy, following the pattern established during the Civil War. According to the Soviet press, the sailors, influenced by Mensheviks and SR’s in their ranks, had shamelessly cast their lot with the ‘White Guards,’ led by a former tsarist general named Kozlovsky . . . This, in turn, was said to be part of a carefully laid plot hatched in Paris by Russian emigres in league with French counterintelligence.*” [Op. Cit., p. 88 and p. 95]

Lenin, for example, argued in a report to the Tenth Congress of the Communist Party on March 8th that “*White Guard generals were very active over there. There is ample proof of this*” and that it was “*the work of Social Revolutionaries and White Guard emigres.*” [Lenin and Trotsky, **Kronstadt**, p. 44]

The first government statement on the Kronstadt events was entitled “*The Revolt of Ex-General Kozlovsky and the Warship Petropavlovsk*” and read, in part, that the revolt was “*expected by, and undoubtedly prepared by, French counterintelligence.*” It continues by stating that on the morning of March 2 “*the group around ex-General Kozlovsky . . . had openly appeared on the scene . . . [he] and three of his officers . . . have openly assumed the role of insurgents. Under their direction . . . a number of . . . responsible individuals, have been arrested. . . Behind the SRs again stands a tsarist general.*” [Op. Cit., pp. 65–6]

Victor Serge, a French anarchist turned Bolshevik, remembered that he was first told that “*Kronstadt is in the hands of the Whites*” and that “[s]mall posters stuck on the walls in the still empty streets proclaimed that the counter-revolutionary General Kozlovsky had seized Kronstadt through conspiracy and treason.” Later the “*truth seeped through little by little, past the smokescreen put out by the Press, which was positively berserk with lies*” (indeed, he states that the Bolshevik press “*lied systematically*”). He found out that the Bolshevik’s

official line was “*an atrocious lie*” and that “*the sailors had mutinied, it was a naval revolt led by the Soviet.*” However, the “*worse of it all was that we were paralysed by the official falsehoods. It had never happened before that our Party should lie to us like this. ‘It’s necessary for the benefit of the public,’ said some . . . the strike [in Petrograd] was now practically general*” (we should note that Serge, a few pages previously, mentions “*the strenuous calumnies put out by the Communist Press*” about Nestor Makhno, “*which went so far as to accuse him of signing pacts with the Whites at the very moment when he was engaged in a life-and-death struggle against them*” which suggests that Kronstadt was hardly the first time the Party had lied to them). [**Memoirs of a Revolutionary**, pp. 124–6 and p. 122] (In the interests of honesty, it should be noted that Serge himself contributed to the Bolshevik lie machine about Kronstadt. For example, in March 1922 he happily repeated the Soviet regime’s falsifications about the rebels. [**The Serge-Trotsky Papers**, pp. 18–9]).

Even Isaac Deutscher, Trotsky’s biographer said that the Bolsheviks “*denounced the men of Kronstadt as counter-revolutionary mutineers, led by a White general. The denunciation appears to have been groundless.*” [**The Prophet Armed**, p. 511]

Thus the claim that the Kronstadt rebellion was the work of Whites and led by a White/Tzarist General was a lie — a lie deliberately and consciously spread. This was concocted to weaken support for the rebellion in Petrograd and in the Red Army, to ensure that it did not spread. Lenin admitted as much on the 15th of March when he stated at the Tenth Party Conference that in Kronstadt “*they did not want the White Guards, and they do not want our power either.*” [quoted by Avrich, **Op. Cit.**, p. 129]

If you agree with Italian Marxist Antonio Gramsci that “*to tell the truth is a communist and revolutionary act*” then its clear that the Bolsheviks in 1921 (and for a long time previously) were not communist or revolutionary (and as the subsequent Leninist accounts of Kronstadt show, Bolshevism is still neither). In stark contrast to the Bolsheviks, the Kronstadt paper *Izvestiia* published Bolshevik leaflets, paper articles and radio broadcasts so that the inhabitants of the island could see exactly what lies the Bolsheviks were telling about them.

The Trotskyist editors of **Kronstadt** show the same contempt for their readers as the Bolsheviks showed for the truth. They include an “*Introduction*” to their work by Pierre Frank in which he argues that the Bolsheviks merely “*state that [White] generals, counterrevolutionaries, sought to manipulate the insurgents*” and that anarchists “*turn this into a claim that these generals had launched the rebellion and that ‘Lenin, Trotsky and the whole Party leadership knew quite well that this was no mere ‘generals’ revolt.’*” [quoting Ida Mett] This apparently shows how “[*a]nything having to do with the facts*” gets treated by such authors. He states that Mett and others “*merely distort the Bolsheviks’ positions.*” [Lenin and Trotsky, **Op. Cit.**, p. 22]

This is argued in the same work that quotes Lenin actually stating on March 8th, 1921, that “*the familiar figures of White Guard generals*” were “*very quickly revealed,*” that “*White generals were very active*” there, that it was “*quite clear that it is the work of Social Revolutionaries and White Guard emigres*” and that Kronstadt was “*bound up initially*” with “*the White Guards.*” Lenin is also quoted, on March 9th, arguing that “*the Paris newspapers reported the events two weeks before they actually occurred, and a White general appeared on the scene. That is what actually happened.*” [**Op. Cit.**, pp. 44–5 and p. 48] This

is stated in spite of presenting the government statement we have quoted above in which the Bolshevik government clearly argued that two Communist leaders had been arrested under Kozlovsky's "direction" and he "stands" behind the right-SRs whose agitation had started the revolt (according to the Bolsheviks).

Nor can it be said that Ida Mett claims that the Lenin and Trotsky had said a general had "launched" the revolt. She quotes Moscow radio as stating that the revolt ("Just like other White Guard insurrections") was in fact "the mutiny of ex-General Kozlovsky and the crew of the battle ship 'Petropavlovsk'" had been organised by Entene spies, while Socialist Revolutionaries had "prepared" the ground and that their real master was a "Tsarist general" on the page **before** that quoted by Frank, so indicating who the Bolsheviks did claim had launched the revolt. [Mett, **Op. Cit.**, p. 43] It seems strange that Frank complains that others "distort" the Bolsheviks position when, firstly, the person he quotes does not and, secondly, he distorts that persons' actual position.

Mett simply acknowledging the Bolshevik lies spewed out at the time. Then she said that "*Lenin, Trotsky and the whole Party leadership knew quite well that this was no mere 'generals' revolt.*" [**Op. Cit.**, p. 43] She **then** turns to General Kozlovsky whom the Bolsheviks indicated by name as the leader of the revolt and had outlawed in the statement of March 2nd quoted above. Who was he and what part did he play? Mett sums up the evidence:

"He was an artillery general, and had been one of the first to defect to the Bolsheviks. He seemed devoid of any capacity as a leader. At the time of the insurrection he happened to be in command of the artillery at Kronstadt. The communist commander of the fortress had defected. Kozlovsky, according to the rules prevailing in the fortress, had to replace him. He, in fact, refused, claiming that as the fortress was now under the jurisdiction of the Provisional Revolutionary Committee, the old rules no longer applied. Kozlovsky remained, it is true, in Kronstadt, but only as an artillery specialist. Moreover, after the fall of Kronstadt, in certain interviews granted to the Finnish press, Kozlovsky accused the sailors of having wasted precious time on issues other than the defence of the fortress. He explained this in terms of their reluctance to resort to bloodshed. Later, other officers of the garrison were also to accuse the sailors of military incompetence, and of complete lack of confidence in their technical advisers. Kozlovsky was the only general to have been present at Kronstadt. This was enough for the Government to make use of his name.

"The men of Kronstadt did, up to a point, make use of the military know how of certain officers in the fortress at the time. Some of these officers may have given the men advice out of sheer hostility to the Bolsheviks. But in their attack on Kronstadt, the Government forces were also making use of ex Tsarist officers. On the one side there were Kozlovsky, Salomianov, and Arkannihov; On the other, ex-Tsarist officers and specialists of the old regime, such as Toukhatchevsky. Kamenev, and Avrov. On neither side were these officers an independent force." [**Op. Cit.**, p. 44]

Not that this is good enough for Trotskyists. Wright, for example, will have

none of it. He quotes Alexander Berkman's statement that there was "a former general, Kozlovsky, in Kronstadt. It was Trotsky who had placed him there as an Artillery specialist. He played no role whatever in the Kronstadt events." [**The Russian Tragedy**, p. 69]

Wright protests that this is not true and, as evidence, quotes from an interview by Kozlovsky and states that "[f]rom the lips of the counterrevolutionary general himself . . . we get the unambiguous declaration that **from the very first day**, he and his colleagues had openly associated themselves with the mutiny, had elaborated the 'best' plans to capture Petrograd . . . If the plan failed it was only because Kozlovsky and his colleagues were unable to convince the 'political leaders', i.e. his SR allies [!], that the moment was propitious for exposing their true visage and program." [Lenin and Trotsky, **Kronstadt**, p. 119]

In other words, because the Provisional Revolutionary Committee **failed** to take the advice of the military specialists it proves that, in fact, they were in league! That is very impressive. We wonder if the Kronstadters **had** taken their advice then this would have proved that they were not, in fact, in league with them after all? Similarly, by failing to take over the command of the fortress Kozlovsky **must** have shown how he was leading the revolt as the Bolshevik radio said!

Every non-Leninist account agrees that Kozlovsky played no part in the revolt. Paul Avrich notes that when trouble erupted "the Bolsheviks at once denounced him as the evil genius of the movement," "outlawed" him and seized his family as hostages. He confirms that the military specialists "threw themselves into the task of planning military operations on behalf of the insurrection" and that Kozlovsky had refused to succeed as the commander of the fortress after the old one had fled to the mainland (as demanded by military rules). He stresses that "the officers remained in a purely advisory capacity throughout the rebellion. They had no share, as far as one can tell, in initiating or directing the revolt, or in framing its political program, which was alien to their way of thinking." Their role "was confined to providing technical advice, just as it had been under the Bolsheviks." The Provisional Revolutionary Committee "showed its distrust of the specialists by repeatedly rejecting their counsel, however sound and appropriate it might be." And, of course, we should mention that "[f]or all the government's accusations that Kronstadt was a conspiracy of White Guard generals, ex-tsarist officers played a much more prominent role in the attacking force than among the defenders." [**Op. Cit.**, p. 99, p. 100, p. 101 and p. 203]

Indeed, Kozlovsky "had served the Bolsheviks so loyally that on 20 October 1920 the chief commander of the Baltic Fleet . . . had awarded him a watch 'for courage and feat of arms in the battle against Yudenich'" [I. Getzler, **Kronstadt 1917–1921**, p. 219] This was simply officially confirming the award made on the 3rd of December, 1919, by the Petrograd Soviet "for military feats and energetic activities during the attack of the Yudenich bands on Petrograd." Indeed, he was one of the first generals who entered into service of the Bolsheviks and the Kronstadt soviet had elected him Chief-of-Staff of the fortress in the wake of the February revolution. All this did not stop the Bolsheviks claiming on March 3rd, 1921, that Kozlovsky was a "supporter of Yudenich and Kolchak"! [quoted by Israel Getzler, "The Communist Leaders' Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents", **Revolutionary Russia**, pp. 24–44, Vol. 15, No. 1, June 2002, p. 43 and p. 31]

Berkman was clearly correct. Kozlovsky took no role in the revolt. What he did do was offer his expertise to the Kronstadt rebels (just as he had to the Bolsheviks) and make plans which were rejected. If associating yourself with an event and making plans which are rejected by those involved equals a role in that event then Trotsky's role in the Spanish revolution equalled that of Durruti's!

Finally, it should be noted that Victor Serge reported that it "*was probably [the leading Bolshevik] Kalinin who, on his return to Petrograd [from attending the initial rebel meetings at Kronstadt], invented 'the White General Kozlovsky.'*" [**Memoirs of a Revolutionary**, p. 127] The ironic thing is, if the Kronstadt rebels **had** been following Kozlovsky and the other Bolshevik appointed "military specialists" then the defences of Kronstadt would have been strengthened considerably. However, as Kozlovsky later explained, the sailors refused to cooperate because of their congenital mistrust of officers. [Paul Avrich, **Op. Cit.**, pp. 138-9]

It is hard to find a Leninist who subscribes to this particular Bolshevik lie about Kronstadt. It has, for the main, been long abandoned by those who follow those who created it, despite the fact it was the cornerstone of the official Bolshevik account of the rebellion. As the obvious falseness of the claims became more and more well-known, Trotsky and his followers turned to other arguments to slander the uprising. The most famous is the assertion that "*Kronstadt sailors were quite a different group from the revolutionary heroes of 1917.*" [Wright, **Op. Cit.**, p. 129] We turn to this question in the section 8 and indicate that research as refuted it (and how Trotskyists have misused this research to present a drastically false picture of the facts). However, first we must discuss whether the Kronstadt revolt was, in fact, a White conspiracy (the next section) and its real relationship to the Whites (section 7).

6 Was the Kronstadt revolt a White plot?

At the time, the Bolsheviks portrayed the Kronstadt revolt as a White plot, organised by the counter-revolution (see last section for full details). In particular, they portrayed the revolt as a conspiracy, directed by foreign spies and executed by their SR and White Guardist allies.

For example, Lenin argued on March 8th that "*White Guard generals were very active*" at Kronstadt. "*There is ample proof of this. Two weeks before the Kronstadt events, the Paris newspapers reported a mutiny at Kronstadt. It is quite clear that it is the work of Social Revolutionaries and White Guard emigres.*" [Lenin and Trotsky, **Kronstadt**, p. 44]

Trotsky, on March 16th, made the same point, arguing that "*in a number of foreign newspapers . . . news of an uprising in Kronstadt appeared as far back as the middle of February . . . How [to] explain this? Very simply . . . The Russian counterrevolutionary organisers promised to stage a mutiny at a propitious moment, while the impatient yellow and financial press write about it as an already accomplished fact.*" [**Op. Cit.**, p. 68]

This appears to be the greatest "evidence" for Lenin and Trotsky as regards the White-Guardist nature of the revolt. Indeed, Trotsky on the "*basis of the dispatch . . . sent a warning to Petrograd to my naval colleagues.*" [**Ibid.**]

However, to see the truth of these claims it is simply a case of looking at how the Bolsheviks reacted to this announcement of an uprising in Kronstadt. They

did nothing. As the Trotskyist editors of a book justifying the repression note, the “*Red Army command was caught unprepared by the rebellion.*” [Op. Cit., p. 6] J.G. Wright, in his defence of Trotsky’s position (a defence recommended by Trotsky himself), acknowledged that the “*Red Army command*” was “[c]aught off guard by the mutiny.” [Op. Cit., p. 123] This clearly shows how little weight the newspaper reports were held **before** the rebellion. Of course, **during** and **after** the rebellion was a different matter and they quickly became a focal point for Bolshevik smears.

Moreover, as proof of a White plot, this evidence is pathetic. As Ida Mett argued out, the “*publication of false news about Russia was nothing exceptional. Such news was published before, during and after the Kronstadt events. . . To base an accusation on a ‘proof’ of this kind is inadmissible and immoral.*” [Mett, **The Kronstadt Uprising**, p. 76]

Even Trotsky admitted that “*the imperialist press . . . prints . . . a great number of fictitious reports about Russia*” but maintained that the reports on Kronstadt were examples of “*forecasts*” of “*attempts at overturns in specific centres of Soviet Russia*” (indeed, the “*journalistic agents of imperialism only ‘forecast’ that which is entrusted for execution to other agents of this very imperialism.*”). Lenin also noted, in an article entitled “*The Campaign of Lies*”, that “*the West European press [had] indulged in such an orgy of lies or engaged in the mass production of fantastic inventions about Soviet Russia in the last two weeks*” and listed some of them (such as “*Petrograd and Moscow are in the hands of the insurgents*”). [Lenin and Trotsky, **Kronstadt**, p. 69, p. 50 and p. 51]

Yet this same press can be used as evidence for a White conspiracy in Kronstadt? Unsurprisingly, as Mett notes, “[i]n 1938 Trotsky himself was to drop this accusation.” [Mett, **Op. Cit.**, p. 76] Little wonder, given its pathetic nature — although this does not stop his loyal follower John G. Wright from asserting these reports are the “*irrefutable facts*” of the “*connection between the counterrevolution and Kronstadt.*” [Lenin and Trotsky, **Op. Cit.**, p. 115] The question of **why** the counterrevolutionary plotters would give their enemies advance notice of their plans never crossed his mind.

As can be seen, at the time **no** evidence was forthcoming that the Whites organised or took part in the revolt. As Ida Mett argues:

“If, at the time the Bolshevik Government had proofs of these alleged contacts between Kronstadt and the counter-revolutionaries why did it not try the rebels publicly? Why did it not show the working masses of Russia the ‘real’ reasons for the uprising? If this wasn’t done it was because no such proofs existed.” [Mett, **Op. Cit.**, p. 77]

Unsurprisingly, the first soviet investigation into the revolt came to the conclusion that it was spontaneous. Iakov Agranov, a special plenipotentiary of the Secret-Operation Department of the **Vecheka** (and later to become its head), was sent the presidium of that body to Kronstadt soon after the crushing of the uprising. His mandate was “*to ascertain the role of various parties and groups in the start and development of the uprising and the ties of its organisers and inspirers with counter-revolutionary parties and organisations operating both in and outside Soviet Russia.*” He produced a report on the 5th of April, 1921, which expressed his considered opinion that the “*uprising was entirely spontaneous in origin and drew into its maelstrom almost the entire population and*

the garrison of the fortress. . . the investigation failed to show the outbreak of the mutiny was preceded by the activity of any counter-revolutionary organisation at work among the fortress's command or that it was the work of the entente. The entire course of the movement speaks against that possibility. Had the mutiny been the work of some secret organisation which predated its outbreak, then that organisation would not have planned it for a time when the reserves of fuel and provisions were hardly sufficient for two weeks and when the thawing of the ice was still far off." He notes that the "masses" in Kronstadt "were fully aware of the spontaneity of their movement." [quoted by Israel Getzler, "The Communist Leaders' Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents", **Revolutionary Russia**, pp. 24–44, Vol. 15, No. 1, June 2002, p. 25]

Agranov's conclusion was also that of Aleksei Nikolaev's, who, as chairman of the Extraordinary **Troika** of the First and Second Special Section, was given the double assignment of "the punishment of the mutineers and the unmasking of all the organisations that prepared and led the mutiny." He reported on April 20th, 1921, that "in spite of all efforts we have been unable to discover the presence of any organisation and to seize any agents." [quoted by Getzler, **Op. Cit.**, p. 26] Ironically enough, a prominent SR leader and head of the SR Administrative Centre in Finland wrote a letter on the 18th of March that stated the revolt was "absolutely spontaneous," that the "movement began spontaneously, without any organisation and quite unexpectedly. After all, a month later, Kronstadt would have been inaccessible to the Bolsheviks and a hundred times more dangerous to them." [quoted by Getzler, **Op. Cit.**, pp. 25–6]

This did not stop the Bolsheviks reiterating the official line that the revolt was a White plot, with SR help (nor has it stopped their latter-day supporters repeating these lies since). For example, Bukharin was still peddling the official lies in July 1921, stating that, as regards Kronstadt, the "documents which have since been brought to light show clearly that the affair was instigated by purely White Guard centres." [contained in **In Defence of the Russian Revolution**, Al Richardson (ed.), p. 192] It is redundant to note that said "documents" were not "brought to light" then or since.

It should be noted here that the Bolsheviks were quite willing to invent "evidence" of a conspiracy. Trotsky, for example, raised, on the 24th of March 1921, the possibility of a "*Political Trial of Kronstadters and Makhnovites.*" This show trial would be part of the "struggle" against "anarchism (Kronstadt and Makhno)." This was "presently an important task" and so it "seems . . . appropriate to organise trials of Kronstadters . . . and of Makhnovites." The "effect of the reports and the speeches of the prosecutor etcetera would be far more powerful than the effects of brochures and leaflets about . . . anarchism." [quoted by Getzler, **Op. Cit.**, pp. 39] While Trotsky's show trial was never staged, the fact that the idea was taken seriously can be seen from the invented summaries of the testimonies of three men considered by the Bolsheviks as ringleaders of the revolt. Perhaps the fact that the three (Kozlovsky, Petrichenko, Putilin) managed to escape to Finland ensured that Trotsky's idea was never carried out. Stalin, of course, utilised the "powerful" nature of such trials in the 1930s.

Decades later historian Paul Avrich **did** discover an unsigned hand written manuscript labelled "*Top Secret*" and entitled "*Memorandum on the Question of Organising an Uprising in Kronstadt.*" Trotskyist Pierre Frank considered

it “so convincing” that he “reproduced it in its entirety” to prove a White Conspiracy existed behind the Kronstadt revolt. Indeed, he considers it as an “indisputable” revelation and that Lenin and Trotsky “were not mistaken in their analysis of Kronstadt.” [Lenin and Trotsky, **Op. Cit.**, p. 26 and p. 32]

However, reading the document quickly shows that Kronstadt was not a product of a White conspiracy but rather that the White “National Centre” aimed to try and use a spontaneous “uprising” it thought was likely to “erupt there in the coming spring” for its own ends. The report notes that “among the sailors, numerous and unmistakable signs of mass dissatisfaction with the existing order can be noticed.” Indeed, the “Memorandum” states that “one must not forget that even of the French Command and the Russian anti-Bolshevik organisations do not take part in the preparation and direction of the uprising, a revolt in Kronstadt will take place all the same during the coming spring, but after a brief period of success it will be doomed to failure.” [quoted by Avrich, **Kronstadt 1921**, p. 235 and p. 240]

As Avrich notes, an “underlying assumption of the Memorandum is that the revolt would not occur until after the springtime thaw, when the ice had melted and Kronstadt was immune from an invasion from the mainland.” [**Kronstadt 1921**, pp. 106–7] Voline stated the obvious when he argued that the revolt “broke out spontaneously” for if it “had been the result of a plan conceived and prepared in advance, it would certainly not have occurred at the beginning of March, the least favourable time. A few weeks later, and Kronstadt, freed of ice, would have become an almost impregnable fortress . . . The greatest opportunity of Bolshevik government was precisely the spontaneity of the movement and the absence of any premeditation, of any calculation, in the action of the sailors.” [**The Unknown Revolution**, p. 487] As can be seen, the “Memorandum” also recognised this need for the ice to thaw and it was the basic assumption behind it. In other words, the revolt was spontaneous and actually undercut the assumptions behind the “Memorandum.”

Avrich rejects the idea that the “Memorandum” explains the revolt:

“Nothing has come to light to show that the Secret Memorandum was ever put into practice or that any links had existed between the emigres and the sailors before the revolt. On the contrary, the rising bore the earmarks of spontaneity . . . there was little in the behaviour of the rebels to suggest any careful advance preparation. Had there been a prearranged plan, surely the sailors would have waited a few weeks longer for the ice to melt . . . The rebels, moreover, allowed Kalinin [a leading Communist] to return to Petrograd, though he would have made a valuable hostage. Further, no attempt was made to take the offensive . . . Significant too, is the large number of Communists who took part in the movement. . .

“The Sailors needed no outside encouragement to raise the banner of insurrection. . . Kronstadt was clearly ripe for a rebellion. What set it off were not the machinations of emigre conspirators and foreign intelligence agents but the wave of peasant risings throughout the country and the labour disturbances in neighbouring Petrograd. And as the revolt unfolded, it followed the pattern of earlier outbursts against the central government from 1905 through the Civil War.” [**Op. Cit.**, pp. 111–2]

He explicitly argues that while the National Centre had “*anticipated*” the revolt and “*laid plans to help organise it,*” they had “*no time to put these plans into effect.*” The “*eruption occurred too soon, several weeks before the basic conditions of the plot . . . could be fulfilled.*” It “*is not true,*” he stresses, “*that the emigres had engineered the rebellion.*” The revolt was “*a spontaneous and self-contained movement from beginning to end.*” [Op. Cit., pp. 126–7]

Moreover, whether the Memorandum played a part in the revolt can be seen from the reactions of the White “*National Centre*” to the uprising. Firstly, they failed to deliver aid to the rebels nor get French aid to them. Secondly, Professor Grimm, the chief agent of the National Centre in Helsingfors and General Wrangel’s official representative in Finland, stated to a colleague after the revolt had been crushed that if a new outbreak should occur then their group must not be caught unawares again. Avrich also notes that the revolt “*caught the emigres off balance*” and that “*[n]othing . . . had been done to implement the Secret Memorandum, and the warnings of the author were fully borne out.*” [Paul Avrich, Op. Cit., p. 212 and p. 123]

If Kronstadt was a White conspiracy then how could the organisation of the conspiracy have been caught unawares?

Clearly, the attempts of certain later-day Trotskyists to justify and prove their heroes slanders against Kronstadt are pathetic. No evidence of a White-Guardist plot existed until 1970 when Paul Avrich produced his study of the revolt and the single document in question clearly does not support the claim that the Whites organised the revolt. Rather, the Whites aimed to use a sailors “*uprising*” to further their cause, an “*uprising*” which they predicted would occur in the spring (with or without them). The predicted revolt **did** take place, but earlier than expected and was not a product of a conspiracy. Indeed, the historian who discovered this document explicitly argues that it proves nothing and that the revolt was spontaneous in nature.

Therefore, the claim that Kronstadt was a White plot cannot be defended with anything but assertions. No evidence exists to back up such claims.

7 What was the real relationship of Kronstadt to the Whites?

As we proved in the last section, the Kronstadt revolt was not a White conspiracy. It was a popular revolt from below. However, some Trotskyists still try and smear the revolt by arguing that it was, in fact, really or “*objectively*” pro-White. We turn to this question now.

We must first stress that the Kronstadters’ rejected every offer of help from the National Centre and other obviously pro-White group (they did accept help towards the end of the rebellion from the Russian Red Cross when the food situation had become critical). Historian Israel Getzler stressed that “*the Kronstadters were extremely resentful of all gestures of sympathy and promises of help coming from the White-Guardist emigres.*” He quotes a Red Cross visitor who stated that Kronstadt “*will admit no White political party, no politician, with the exception of the Red Cross.*” [Getzler, **Kronstadt 1917–1921**, p. 235]

Avrich notes that the Kronstadter’s “*passionately hated*” the Whites and that “*both during and afterwards in exile*” they “*indignantly rejected all gov-*

ernment accusations of collaboration with counterrevolutionary groups either at home or abroad.” As the Communists themselves acknowledged, no outside aid ever reached the insurgents. [Avrich, **Op. Cit.**, p. 187, p. 112 and p. 123]

In other words, there was no relationship between the revolt and the Whites.

Needless to say, the Whites **were** extremely happy that Kronstadt revolted. There is no denying that. However, it would be weak politics indeed that based itself on the reactions of reactionaries to evaluate social struggles. If we did then we would have to conclude that the overthrow of Stalinism in 1989 was nothing more than a counter-revolution rather than a popular revolt against a specific form of capitalism (namely state capitalism). Indeed, many orthodox Trotskyists took this position (and supported the attempted coup organised by a section of the Stalinist bureaucracy to re-impose its dictatorship).

Indeed, the Kronstaders themselves acknowledged that the Whites were happy to support their actions (indeed, **any** actions against the Bolsheviks) but that this joy was for different reasons than theirs:

“The . . . Kronstadt sailors and workers have wrested the tiller from the Communists’ hands and have taken over the helm . . . Comrades, keep a close eye upon the vicinity of the tiller: enemies are even now trying to creep closer. A single lapse and they will wrest the tiller from you, and the soviet ship may go down to the triumphant laughter from tsarist lackeys and henchmen of the bourgeoisie.

“Comrades, right now you are rejoicing in the great, peaceful victory over the Communists’ dictatorship. Now, your enemies are celebrating too.

“Your grounds for such joy, and theirs, are quite contradictory.

*“You are driven by a burning desire to restore the authentic power of the soviets, by a noble hope of seeing the worker engage in free labour and the peasant enjoy the right to dispose, on his land, of the produce of his labours. **They** dream of bringing back the tsarist knout and the privileges of the generals.*

“Your interests are different. They are not fellow travellers with you.

“You needed to get rid of the Communists’ power over you in order to set about creative work and peaceable construction. Whereas they want to overthrow that power to make the workers and peasants their slaves again.

“You are in search of freedom. They want to shackle you as it suits them. Be vigilant! Don’t let the wolves in sheep’s clothing get near the tiller.” [**No Gods, No Masters**, vol. 2, pp. 187–8]

Of course, this is not enough for the followers of Lenin and Trotsky. John Rees, for example, quotes Paul Avrich to support his assertion that the Kronstadt revolt was, in fact, pro-White. He argues as follows:

“Paul Avrich . . . says there is ‘undeniable evidence’ that the leadership of the rebellion came to an agreement with the Whites after they had been crushed and that ‘one cannot rule out the possibility

that this was the continuation of a longstanding relationship.’ [Op. Cit., p. 64]

What Rees **fails** to mention is that Avrich **immediately** adds “[y]et a careful search has yielded no evidence to support such a belief.” He even states that “[n]othing has come to light to show that . . . any links had existed between the emigres and the sailors before the revolt.” [Avrich, Op. Cit., p. 111] How strange that Rees fails to quote or even mention Avrich’s conclusion to his own speculation! As for the post-revolt links between the “leadership” of the rebellion and the Whites, Avrich correctly argues that “[n]one of this proves that there were any ties between the [National] Centre and the Revolutionary Committee either before or during the revolt. It would seem, rather, that the mutual experience of bitterness and defeat, and a common determination to overthrow the Soviet regime, led them to join hands in the aftermath.” [Op. Cit., p. 129] Seeing you friends and fellow toilers murdered by dictators may affect your judgement, unsurprisingly enough.

Let us, however, assume that certain elements in the “leadership” of the revolt were, in fact, scoundrels. What does this mean when evaluating the Kronstadt revolt?

Firstly, we must point out that this “leadership” was elected by and under the control of the “conference of delegates,” which was in turn elected by and under the control of the rank-and-file sailors, soldiers and civilians. This body met regularly during the revolt *“to receive and debate the reports of the Revolutionary committee and to propose measures and decrees.”* [Getzler, Op. Cit., p. 217] The actions of the “leadership” were not independent of the mass of the population and so, regardless of their own agendas, had to work under control from below. In other words, the revolt cannot be reduced to a discussion of whether a few of the “leadership” were “bad men” or not. Indeed, to do so just reflects the elitism of bourgeois history.

And Rees does just that and reduces the Kronstadt revolt and its “ideology” down to just one person (Petrichenko). Perhaps we can evaluate Bolshevism with this method? Or Italian Socialism. After all, influential figures in both these movements ended up making contacts and deals with extremely suspect organisations and acting in ways we (and the movements they sprang from) would oppose. Does that mean we gain an insight into their natures by mentioning Stalin’s or Mussolini’s later activities? Or evaluating their revolutionary nature from such individuals? Of course not. Indeed, Rees’s article is an attempt to argue that objective circumstances rather than Bolshevism as such lead to Stalinism. Rather than do the same for Kronstadt, he prefers to concentrate on an individual. This indicates a distinctly bourgeois perspective:

“What passes as socialist history is often only a mirror image of bourgeois historiography, a percolation into the ranks of the working class movement of typically bourgeois methods of thinking. In the world of this type of ‘historian’ leaders of genius replace the kings and queens of the bourgeois world. . . The masses never appear independently on the historic stage, making their own history. At best they only ‘supply the steam’, enabling others to drive the locomotive, as Stalin so delicately put it . . . This tendency to identify working class history with the history of its organisations, institutions and leaders

*is not only inadequate — it reflects a typically bourgeois vision of mankind, divided in almost pre-ordained manner between **the few** who will manage and decide, and **the many**, the malleable mass, incapable of acting consciously on its own behalf . . . Most histories of the degeneration of the Russian Revolution rarely amount to more than this.* [“Solidarity’s Preface” to Ida Mett’s **The Kronstadt Uprising**, pp. 18–9]

Secondly, the question is one of whether workers are in struggle and what they aim for and definitely **not** one of whether some of the “leaders” are fine upstanding citizens. Ironically, Trotsky indicates why. In 1934, he had argued “[a]nyone who had proposed that we not support the British miners’ strike of 1926 or the recent large-scale strikes in the United States with all available means on the ground that the leaders of the strikes were for the most part scoundrels, would have been a traitor to the British and American workers.” [“No Compromise on the Russian Question”, **Writings of Leon Trotsky: Supplement (1934–40)**, p. 539]

The same applies to Kronstadt. Even if we assume that some of the “leadership” did have links with the National Centre (an assumption we must stress has no evidence to support it), this in no way invalidates the Kronstadt revolt. The movement was not produced by the so-called “leaders” of the revolt but rather came from below and so reflected the demands and politics of those involved. If it was proved, as KGB and other soviet sources argued, that some of the “leaders” of the Hungary uprising of 1956 had CIA links or were CIA agitators, would that make the revolution and its workers’ councils somehow invalid? Of course not. If some of the “leadership” were scoundrels, as Trotsky argued, this does not invalid the revolt itself. The class criteria is the decisive one.

(As an aside, we must point out that Trotsky was arguing against those claiming, correctly, that to unconditionally defend the Soviet Union was to give an endorsement to Stalinism. He stated immediately after the words we have quoted above: “*Exactly the same thing applies to the USSR!*” However, there was a few obvious differences which invalidates his analogy. Firstly, the Stalinist leadership was exploiting and oppressing the workers by means of state power. Trade Union bureaucrats, for all their faults, are not mass murdering butchers at a head of a dictatorship defended by troops and secret police. Secondly, strikes are examples of proletarian direct action which can, and do, get out of control of union structures and bureaucrats. They can be the focal point of creating new forms of working class organisation and power which can end the power of the union bureaucrats and replace it with self-managed strikers assemblies and councils. The Stalinist regime was organised to repress any attempts at unseating them and was not a form of working class self-defence in even the limited form that trade unions are.)

John Rees continues by arguing that:

“As it became clear that the revolt was isolated Petrichenko was forced to come to terms with the reality of the balance of class forces. On 13 March Petrichenko wired David Grimm, the chief of the National Centre and General Wrangel’s official representative in Finland, for help in gaining food. On 16 March Petrichenko accepted an offer of help from Baron P V Vilkin, an associate of Grimm’s

whom 'the Bolsheviks rightly called a White agent.' None of the aid reached the garrison before it was crushed, but the tide of events was pushing the sailors into the arms of the Whites, just as the latter had always suspected it would." [Op. Cit., p. 64]

We should note that it was due to the “*food situation in Kronstadt . . . growing desperate*” that Petrichenko contacted Grimm. [Avrich, **Op. Cit.**, p. 121] If the revolt had spread to Petrograd and the striking workers there, such requests would have been unnecessary. Rather than isolation being due to “*the reality of the balance of class forces*” it was due to the reality of coercive forces — the Bolsheviks had successfully repressed the Petrograd strikes and slandered the Kronstadt revolt (see section 10). As historian V. Brovkin notes, the “*key here is that the Communists suppressed the workers uprising in Petrograd in the first days of March. The sailors’ uprising in Kronstadt, which was an outgrowth of the uprising in Petrograd, was now cut off from its larger social base and localised on a small island. From this moment on the Kronstadt sailors were on the defensive.*” [**Behind the Lines during the Civil War**, pp. 396–7]

So, given that the Bolshevik dictatorship had lied to and repressed the Petrograd working class, the Kronstadters had few options left as regards aid. Rees’s argument smacks of the “logic” of Right as regards the Spanish Civil War, the Cuban revolution and the Sandinistas. Isolated, each of these revolts turned to the Soviet Union for aid thus proving what the Right had always known from the start, namely their objectively Communist nature and their part in the International Communist Conspiracy. Few revolutionaries would evaluate these struggles on such a illogical and narrow basis but Rees wants us to do so with Kronstadt.

The logic of Rees arguments was used by the Stalinists later. Indeed, he would have to agree with Stalinists that the fact the Hungarian revolution of 1956 called on Western aid against the Red Army shows that it was objectively counter-revolutionary and pro-capitalist, just as the Communist Party bureaucrats had argued. The fact that during that revolt many messages of support for the rebels also preached bourgeois values would also, according to Rees’s logic, damn that revolt in the eyes of all socialists. Similarly, the fact that the Polish union **Solidarity** got support from the West against the Stalinist regime does not mean that its struggle was counter-revolutionary. So the arguments used by Rees are identical to those used by Stalinists to support their repression of working class revolt in the Soviet Empire. Indeed, orthodox Trotskyists also called “*Solidarnosc*” a company union of the CIA, bankers, the Vatican and Wall Street for capitalist counterrevolution in Poland and considered the fall of the Soviet Union as a defeat for the working class and socialism, in other words, a counterrevolution. As evidence they pointed to the joy and support each generated in Western elite circles (and ignored the popular nature of those revolts).

In reality, of course, the fact that others sought to take advantage of these (and other) situations is inevitable and irrelevant. The important thing is whether working class people were in control of the revolt and what the main objectives of it were. By this class criteria, it is clear that the Kronstadt revolt was a **revolutionary** revolt as, like Hungary 1956, the core of the revolt was working people and their councils. It was they who were in control and called the tune. That Whites tried to take advantage of it is as irrelevant to evaluating

the Kronstadt revolt as the fact that Stalinists tried to take advantage of the Spanish struggle against Fascism.

Moreover, in his analysis of the “*balance of class forces*”, Rees fails to mention the class which had real power (and the related privileges) in Russia at the time — the state and party bureaucracy. The working class and peasantry were officially powerless. The only influence they exercised in the “workers’ and peasants state” was when they rebelled, forcing “their” state to make concessions or to repress them (sometimes both happened). The balance of class forces was between the workers and peasants and ruling bureaucracy. To ignore this factor means to misunderstand the problems facing the revolution and the Kronstadt revolt itself.

Lastly, we must comment upon the fact that members of Kronstadt’s revolutionary Committee took refuge in Finland along with “[s]ome 8,000 people (some sailors and the most active part of the civilian population).” [Mett, **Op. Cit.**, p. 57] This was as the Bolsheviks had predicted on March 5th (“*At the last minute, all those generals, the Kozlovskvs, the Bourksers, and all that riff raff, the Petrichenkos, and the Tourins will flee to Finland, to the White guards*” [cited by Mett, **Op. Cit.**, p. 50]). However, this does not indicate any “White guardist” connections. After all, where else **could** they go? Anywhere else would have been in Soviet Russia and so a Bolshevik prison and ultimately death. The fact that active participants in the revolt ended up in the only place they could end up to avoid death has no bearing to that nature of that revolt nor can it be used as “evidence” of a “white conspiracy.”

In other words, the attempts of Trotskyists to smear the Kronstadt sailors with having White links is simply false. The actions of some rebels **after** the Bolsheviks had crushed the revolt cannot be used to discredit the revolt itself. The real relationship of the revolt to the Whites is clear. It was one of hatred and opposition.

8 Did the rebellion involve new sailors?

The most common Trotskyist assertion to justify the repression of the Kronstadt revolt is that of Trotsky. It basically consists of arguing that the sailors in 1921 were different than those in 1917. Trotsky started this line of justification during the revolt when he stated on March 16th that the Baltic Fleet had been “*inevitably thinned out with respect to personnel*” and so a “*great many of the revolutionary sailors*” of 1917 had been “*transferred*” elsewhere. They had been “*replaced in large measure by accidental elements.*” This “*facilitated*” the work of the “*counterrevolutionary organisers*” who had “*selected*” Kronstadt. He repeated this argument in 1937 and 1938 [Lenin and Trotsky, **Kronstadt**, pp. 68–9, p. 79, p. 81 and p. 87]

His followers repeated his assertions. Wright argues that “*the personnel of the fortress could not possibly have remained static throughout the years between 1917 and 1921.*” He doubts that the revolutionary sailors of 1917 could have remained behind in the fortress while their comrades fought the Whites. [**Op. Cit.**, pp. 122–3] These sailors had been replaced by peasant conscripts. John Rees, continuing this line of rationale, argued that “*the composition of the garrison had changed . . . it seems likely that the peasants had increased their weight in the Kronstadt, as Trotsky suggested.*” [Rees, **Op. Cit.**, p. 61]

As can be seen, the allegation that the Kronstadt sailors were a “grey mass” and had changed in social composition is a common one in Trotskyist circles. What are we to make of these claims?

Firstly, we must evaluate what are the facts as regards the social composition and turnover of personnel in Kronstadt. Secondly, we must see how Trotskyists have misused these sources in order to indicate how far they will abuse the truth.

The first task is now, thanks to recent research, easy to do. Were the majority of the sailors during the uprising new recruits or veterans from 1917? The answer is that it was predominantly the latter. Academic Israel Getzler investigated this issue and demonstrated that of those serving in the Baltic fleet on 1st January 1921 at least 75.5% were drafted before 1918. Over 80% were from Great Russian areas, 10% from the Ukraine and 9% from Finland, Estonia, Latvia and Poland. He argues that the “*veteran politicised Red sailor still predominated in Kronstadt at the end of 1920*” and presents more “*hard statistical data*” like that just quoted. He investigated the crews of the two major battleships, the *Petropavlovsk* and the *Sevastopol* (both renown since 1917 for their revolutionary zeal and revolutionary allegiance and, in Paul Avrich’s words, “*the powder kegs of the rising.*” [Avrich, **Op. Cit.**, p. 93]). His findings are conclusive, showing that of the 2,028 sailors whose years of enlistment are known, 93.9% were recruited into the navy before and during the 1917 revolution (the largest group, 1,195, joined in the years 1914–16). Only 6.8% of the sailors were recruited in the years 1918–21 (including three who were conscripted in 1921) and they were the only ones who had not been there during the 1917 revolution. [Getzler, **Kronstadt 1917–1921**, pp. 207–8] Historian Fedotoff-White indicates that the cruiser **Rossiia** had joined in the decision to re-elect the Kronstadt Soviet and its “*crew consisted mostly of old seamen.*” [**The Growth of the Red Army**, p. 138]

Moreover, the majority of the revolutionary committee were veterans of the Kronstadt Soviet and the October revolution. [Ida Mett, **Op. Cit.**, p. 42] “*Given their maturity and experience, not to speak of their keen disillusionment as former participants in the revolution, it was only natural that these seasoned bluejackets should be thrust into the forefront of the uprising.*” [Avrich, **Op. Cit.**, p. 91]

Getzler stresses that it was “*certainly the case*” that the “*activists of the 1921 uprising had been participants of the 1917 revolutions*” for the “*1,900 veteran sailors of the Petropavlovsk and the Sevastopol who spearheaded it. It was certainly true of a majority of the Revolutionary Committee and of the intellectuals . . . Likewise, at least three-quarters of the 10,000 to 12,000 sailors — the mainstay of the uprising — were old hands who had served in the navy through war and revolution.*” [**Op. Cit.**, p. 226]

Little wonder, then, that Paul Avrich argues (in a review of Getzler’s book) that “*Getzler draws attention to the continuity in institutions, ideology, and personnel linking 1921 with 1917. In doing so he demolishes the allegation of Trotsky and other Bolshevik leaders that the majority of veteran Red sailors had, in the course of the Civil War, been replaced by politically retarded peasant recruits from the Ukraine and Western borderlands, thereby diluting the revolutionary character of the Baltic fleet. He shows, on the contrary, that no significant change had taken place in the fleet’s political and social composition, that at least three-quarters of the sailors on active duty in 1921 had been drafted*

before 1918 and were drawn predominantly from Great Russian areas.” [Soviet Studies, vol. XXXVI, 1984, pp. 139–40]

Other research confirms Getzler’s work. Evan Mawdsley argues that “it seems reasonable to challenge the previous interpretation” that there had been a “marked change in the composition of the men in the fleet . . . particularly . . . at the Kronstadt Naval Base.” “The composition of the DOT [Active Detachment],” he concludes, “had not fundamentally changed, and anarchistic young peasants did not predominate there. The available data suggests that the main difficulty was not . . . that the experienced sailors were being demobilised. Rather, they were not being demobilised rapidly enough.” The “relevant point is length of service, and available information indicates that as many as three-quarters of the DOT ratings — the Kronstadt mutineers — had served in the fleet at least since the World War.” In a nutshell, “the majority of men seem to have been veterans of 1917.” He presents data which shows that of the “2,028 ratings aboard the DOT battleships *Petropavlovsk* and *Sevastopol* at the time of the uprising, 20.2% had begun service before 1914, 59% between 1914 and 1916, 14% in 1917, and 6.8% from 1918 to 1921.” For the DOT as a whole on 1st January, 1921, 23.5% could have been drafted before 1911, 52% from 1911 to 1918 and 24.5% after 1918. [“The Baltic Fleet and the Kronstadt Mutiny”, pp. 506–521, **Soviet Studies**, vol. 24, no. 4, pp. 508–10]

This is not the end of the matter. Unfortunately for Trotsky recently released documents from the Soviet Archives also refutes his case. A report by Vasiliï Sevei, Plenipotentiary of the Special Section of the **Vecheka**, dated March 7th, 1921, stated that a “large majority” of the sailors of Baltic Fleet “were and still are professional revolutionaries and could well form the basis for a possible third revolution.” He notes that the “disease from which they suffer has been too long neglected.” What is significant about this social-political profile of the “large majority” of sailors was that it was **not** written in response of the Kronstadt revolt but that it was formulated well before. As its author put it in the report, “I stated these views more than a month ago in my memorandum to comrade *Krestinskiï*” (then secretary of the Communist Party). [quoted by Israel Getzler, “The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents”, **Revolutionary Russia**, pp. 24–44, Vol. 15, No. 1, June 2002, pp. 32–3]

In other words, some time in January, 1921, a leading member of the Cheka was of the opinion that the “large majority” of sailors in the Baltic fleet “were and still are professional revolutionaries.” No mention was made of new recruits, indeed the opposite is implied as the sailors’ “disease” had been “too long neglected.” And the recipient of this March 7th, 1921, report? Leon Trotsky. Unsurprisingly, Trotsky did not mention this report during the crisis or any time afterward.

Needless to say, this statistical information was unavailable when anarchists and others wrote their accounts of the uprising. All they could go on were the facts of the uprising itself and the demands of the rebels. Based on these, it is little wonder that anarchists like Alexander Berkman stressed the continuity between the Red Kronstadters of 1917 and the rebels of 1921. Firstly, the rebels in 1921 took action in **solidarity** with the striking workers in Petrograd. In the words of Emma Goldman, it was “after the report of their Committee of the real state of affairs among the workers in Petrograd that the Kronstadt sailors did in 1921 what they had done in 1917. They immediately made common cause

with the workers. The part of the sailors in 1917 was hailed as the red pride and glory of the Revolution. Their identical part in 1921 was denounced to the whole world as counter-revolutionary treason” by the Bolsheviks. [**Trotsky Protests Too Much**] Secondly, their demands were thoroughly in-line with the aspirations and politics of 1917 and clearly showed a socialist awareness and analysis. Thirdly, Emma Goldman spoke to some of those wounded in the attack on Kronstadt. She records how one “had realised that he had been duped by the cry of ‘counter-revolution.’ There were no Tsarist generals in Kronstadt, no White Guardists — he found only his own comrades, sailors and soldiers who had heroically fought for the Revolution.” [**My Disillusionment in Russia**, pp. 199–200]

The later research has just confirmed what is obvious from an analysis of such facts, namely that the rebels in 1921 were acting in the spirit of their comrades of 1917 and this implies a significant continuity in personnel (which perhaps explains the unwillingness of Leninists to mention that the revolt was in solidarity with the strikers or the demands of the rebels). Thus the research provides empirical evidence to support the political analysis of the revolt conducted by revolutionaries like Berkman, Voline and so on.

In summary, the bulk of the sailors at the start of 1921 had been there since 1917. Even if this was not the case and we assume that a majority of the sailors at Kronstadt were recent recruits, does this invalidate the rebellion? After all, the Red sailors of 1917 were once raw recruits. They had become politicised over time by debate, discussion and struggle. So had the workers in Petrograd and elsewhere. Would Leninists have denounced strikers in 1905 or 1917 if it was discovered that most of them were recent peasant arrivals in the city? We doubt it.

Indeed, the Bolsheviks were simply repeating old Menshevik arguments. Between 1910 and 1914, the industrial workforce grew from 1,793,000 workers to 2,400,000. At the same time, the influence of the Bolsheviks grew at Menshevik expense. The Mensheviks considered this a “consequence of the changes that were taking place in the character of urban Russia” with peasants joining the labour force. [*“introduction”*, **The Mensheviks in the Russian Revolution**, Abraham Archer (Ed.), p. 24] Somewhat ironically, given later Leninist arguments against Kronstadt, the Mensheviks argued that the Bolsheviks gained their influence from such worker-peasant industrial “raw recruits” and not from the genuine working class. [Orlando Figes, **A People’s Tragedy**, p. 830] As Robert Service noted in his study of the Bolshevik party during the 1917 revolution, “Menshevik critics were fond of carping that most Bolshevik newcomers were young lads fresh from the villages and wanting in long experience of industrial life and political activity. It was not completely unknown for Bolshevik spokesmen to come close to admitting this.” [**The Bolshevik Party in Revolution**, p. 44] And, of course, it was the industrial “raw recruits” who had taken part in the 1905 and 1917 revolutions. They helped formulate demands and organise soviets, strikes and demonstrations. They helped raised slogans which were to the left of the Bolsheviks. Does this process somehow grind to a halt when these “raw recruits” oppose Trotsky? Of course not.

Given the political aspects of the Kronstadt demands we can safely argue that even if the rebellion had been the work of recent recruits they obviously had been influenced by the veteran sailors who remained. They, like the peasant-workers of 1905 and 1917, would have been able to raise their own political

demands and ideas while, at the same time, listening to those among them with more political experience. In other words, the assumption that the sailors could not raise revolutionary political demands if they were “raw recruits” only makes sense if we subscribe to Lenin’s dictum that the working class, by its own efforts, can only reach a trade union consciousness (i.e. that toiling people cannot liberate themselves). In other words, this Trotsky inspired sociology misses the point. Sadly, we have to address it in order to refute Leninist arguments.

Therefore, Getzler’s research refutes the claims of Trotskyists such as Chris Harman who follow Trotsky and argue that “*Kronstadt in 1921 was not Kronstadt of 1917. The class composition of its sailors had changed. The best socialist elements had long ago gone off to fight in the army in the front line. They were replaced in the main by peasants whose devotion to the revolution was that of their class.*” [quoted by Sam Farber, **Before Stalinism**, p. 192] As can be seen, the ship crews were remarkably consistent over the period in question. It is, however, useful to discuss this question further in order to show what passes as analysis in Trotskyist circles.

Harman is, of course, following Trotsky. Writing in 1937 Trotsky argued that Kronstadt had “*been completely emptied of proletarian elements*” as “[*a*]ll the sailors” belonging to the ships’ crews “*had become commissars, commanders, chairmen of local soviets.*” Later, realising the stupidity of this claim, he changed it to Kronstadt being “*denuded of all revolutionary forces*” by “*the winter of 1919.*” He also acknowledged that “*a certain number of qualified workers and technicians*” remained to “*take care of the machinery*” but these were “*politically unreliable*” as proven by the fact they had not been selected to fight in the civil war. As evidence, he mentions that he had wired a “*request at the end of 1919, or in 1920, to ‘send a group of Kronstadt sailors to this or that point’*” and they had answered “*No one left to send.*” [Lenin and Trotsky, **Kronstadt**, p. 87, p. 90 and p. 81] Obviously, the Communist commander at Kronstadt had left his fortress and its ships totally unmanned! Such common sense is sadly lacking from Trotsky (as indicated above, the evidence supports the common sense analysis and not Trotsky’s claims).

Moreover, does this claim also apply to the Communist Party membership at Kronstadt? Is Trotsky **really** arguing that the Bolsheviks in Kronstadt after the winter of 1919 were not revolutionary? Given that the bulk of them had joined the CP during or after this time, we must obviously conclude that the recruiters let anyone join. Moreover, there had been a “*rigorous local purge*” of the party conducted in the autumn of 1920 by the commander of the Baltic Fleet. [I. Getzler, **Kronstadt 1917–1921**, p. 211 and p. 205] Must we also conclude that this purge did not have revolutionary politics as a factor when determining whether a party member should be expelled or not?

Trotsky claims too much. Based on his claims we must conclude one of two possibilities. The first possibility is that the Kronstadt Communist Party was not revolutionary and was made up of politically backward individuals, careerists and so on. If that was the case in Kronstadt then it must also have been the case elsewhere in Russia and this discredits any attempt to argue that the Bolshevik party dictatorship was revolutionary. The second possibility is that it **did** have revolutionary elements. If so, then the fact that hundreds of these members left the party during the revolt and only a minority of them opposed it makes the claim that the rebellion was “*counter-revolutionary*” difficult (indeed, impossible) to maintain (of the 2,900 members of the Communist Party in

Kronstadt, 784 officially resigned and 327 had been arrested). And it also makes Trotsky's claims that Kronstadt was "*denuded*" of revolutionary elements false.

J.G. Wright, as noted above, thought that it was "*impossible*" to believe that the sailors of 1917 could leave their comrades to fight the Whites while they stayed at Kronstadt. This may have been a valid argument **if** the Soviet armed forces were democratically run. However, as we indicated in section 2, it was organised in a typically bourgeois fashion. Trotsky had abolished democratic soldiers and sailors councils and the election of officers in favour of appointed officers and hierarchical, top-down, military structures. This meant that the sailors would have stayed in Kronstadt if they had been ordered to. The fact that they had to defend Petrograd combined with the level of technical knowledge and experience required to operate the battleships and defences at Kronstadt would have meant that the 1917 sailors would have been irreplaceable and so had to remain at Kronstadt. This is what, in fact, did happen. In the words of Israel Gelzter:

"One reason for the remarkable survival in Kronstadt of these veteran sailors, albeit in greatly diminished numbers, was precisely the difficulty of training, in war-time conditions, a new generation competent in the sophisticated technical skills required of Russia's ultra-modern battleships, and, indeed, in the fleet generally." [Op. Cit., p. 208]

We should also note here that "*by the end of 1919 thousands of veteran sailors, who had served on many fronts of the civil war and in the administrative network of the expanding Soviet state, had returned to the Baltic Fleet and to Kronstadt, most by way of remobilisation.*" [Getzler, Op. Cit., pp. 197-8] Thus the idea that the sailors left and did not come back is not a valid one.

Trotsky obviously felt that this (recently refuted) argument of changing social composition of the sailors would hold more water than claims White Guards organised it. He continued this theme:

"The best, most self-sacrificing sailors were completely withdrawn from Kronstadt and played an important role at the fronts and in the local soviets throughout the country. What was left was the grey mass with big pretensions ('We are from Kronstadt'), but without the political education and unprepared for revolutionary sacrifice. The country was starving. The Kronstadters demanded privileges. The uprising was dictated by a desire to get privileged food rations." [Lenin and Trotsky, **Kronstadt**, p. 79]

This was Trotsky's first comment on the uprising for 16 years and it contained a lie. As Ida Mett notes, "*[s]uch a demand was never put forward by the men of Kronstadt*" and so Trotsky "*started his public accusations with a lie.*" [The **Kronstadt Uprising**, p. 73] He repeated the claim again, six months later [Lenin and Trotsky, Op. Cit., p. 92] Unfortunately for him, the opposite was the case. Point 9 of the Kronstadt demands explicitly called for an **end** of privileges by the "*equalisation of rations for all workers.*" This was implemented during the uprising.

As an aside, Trotsky later states that "*[w]hen conditions became very critical in hungry Petrograd, the Political Bureau more than once discussed the*

possibility of securing an ‘internal loan’ from Kronstadt, where a quantity of old provisions still remained. But delegates of the Petrograd workers answered: ‘You will get nothing from them by kindness. They speculate in cloth, coal, and bread. At present in Kronstadt every kind of riffraff has raised its head.’” [Lenin and Trotsky, **Op. Cit.**, pp. 87–8] As Ida Mett pointed out, “[w]e should add that before the insurrection these ‘stores’ were in the hands of communist functionaries and that it was upon these people alone that consent to the proposed ‘loan’ depended. The rank and file sailor, who took part in the insurrection, had no means open to him whereby he could have opposed the loan, even if he had wanted to.” [**The Kronstadt Uprising**, pp. 74–5] If Trotsky’s words were true, then they were a crushing indictment of Bolshevik practice, **not** the Kronstadt sailors.

As for Trotsky’s claim of a “*lack of political education*,” the 15 point resolution voted upon by the sailors exposes this as nonsense and the fact the sailors fought the Red Army to the end indicates that there were prepared to die for their ideals. Similarly, Trotsky’s argument that “*in 1917–18, the Kronstadt sailor stood considerably higher than the average level of the Red Army*” but by 1921 they “*stood . . . on a level considerably lower, in general, than the average level of the Red Army.*” In fact, as we indicate in section 9, the political programme of the revolt was fundamentally the same as Kronstadt’s soviet democracy of 1917 and, we should note, opposed the introduction of wage labour, a basic socialist idea (and one missing from the Bolshevik’s NEP policies). Moreover, the mass meeting that agreed the resolution did so unanimously, meaning old and new sailors agreed to it. So much for Trotsky’s assertions.

Others have pointed out the weak nature of Trotsky’s arguments as regards the changing nature of the sailors. We will quote Emma Goldman’s evaluation of Trotsky’s assertions. As will be seen, Trotsky’s assertions seem to be based on expediency (and, significantly, were not uttered before the revolt):

“Now, I do not presume to argue what the Kronstadt sailors were in 1918 or 1919. I did not reach Russia until January, 1920. From that time on until Kronstadt was ‘liquidated’ the sailors of the Baltic fleet were held up as the glorious example of valour and unflinching courage. Time on end I was told not only by Anarchists, Mensheviks and social revolutionists, but by many Communists, that the sailors were the very backbone of the Revolution. On the 1st of May, 1920, during the celebration and the other festivities organised for the first British Labour Mission, the Kronstadt sailors presented a large clear-cut contingent, and were then pointed out as among the great heroes who had saved the Revolution from Kerensky, and Petrograd from Yudenich. During the anniversary of October the sailors were again in the front ranks, and their re-enactment of the taking of the Winter Palace was wildly acclaimed by a packed mass.

“Is it possible that the leading members of the party, save Leon Trotsky, were unaware of the corruption and the demoralisation of Kronstadt, claimed by him? I do not think so. Moreover, I doubt whether Trotsky himself held this view of the Kronstadt sailors until March, 1921. His story must, therefore, be an afterthought, or is it a rationalisation to justify the senseless ‘liquidation’ of Kronstadt?”

[**Trotsky Protests Too Much**]

Ante Ciliga quoted the testimony regarding Kronstadt of a fellow political prisoner in Soviet Russia:

“It is a myth that, from the social point of view, Kronstadt of 1921 had a wholly different population from that of 1917,” [a] man from Petrograd, Dv., said to me in prison. In 1921 he was a member of the Communist youth, and was imprisoned in 1932 as a ‘decist’ (a member of Sapronov’s group of ‘Democratic Centralists’).” [Op. Cit., pp. 335–6]

Since then, both Paul Avrich and Israel Gelzter have analysed this question and confirmed the arguments and accounts of Goldman and Ciliga. Moreover, continuity between the sailors of 1917 and 1921 can also be seen from their actions (rising in solidarity with the Petrograd workers) and in their politics (as expressed in their demands and in their paper).

Now we turn to our second reason for looking into this issue, namely the misuse of these sources to support their case. This indicates well the nature of Bolshevik ethics. *“While the revolutionaries,”* argued Ciliga with regards to the Bolsheviks, *“remaining such only in words, accomplished in fact the task of the reaction and counter-revolution, they were compelled, inevitably, to have recourse to lies, to calumny and falsification.”* [Op. Cit., p. 335] Defending these acts also pays its toll on those who follow this tradition, as we shall see.

Needless to say, such evidence as provided by Avrich and Getzler is rarely mentioned by supporters of Bolshevism. However, rather than ignore new evidence, the Trotskyists use it in their own way, for their own purposes. Every new work about Kronstadt has been selectively quoted from by Trotskyists to support their arguments, regardless of the honesty of such activity. We can point to two works, Paul Avrich’s **Kronstadt 1921** and **Kronstadt 1917–1921** by Israel Getzler, which have been used to support Bolshevik conclusions when, in fact, they do the opposite. The misuse of these references is quite unbelievable and shows the mentality of Trotskyism well.

Pierre Frank argues that Paul Avrich’s work has *“conclusions”* which are *“similar to Trotsky’s”* and *“confirms the changes in the composition of the Kronstadt garrison that took place during the civil war, although with a few reservations.”* [Lenin and Trotsky, Op. Cit., p. 25] A quick look at these reservations shows how false Frank is. It is worth quoting Avrich at length to show this:

“There can be little doubt that during the Civil War years a large turnover had indeed taken place within the Baltic Fleet, and that many of the old-timers had been replaced by conscripts from rural districts who brought with them the deeply felt discontent of the Russian peasantry. By 1921, according to official figures, more than three-quarters of the sailors were of peasant origin, a substantially higher proportion than in 1917 . . . Yet this does not necessarily mean that the behavioural patterns of the fleet had undergone any fundamental change. On the contrary, alongside the technical ratings, who were largely drawn from the working class, there had always been a large and unruly peasant element among the sailors . . . Indeed, in 1905 and 1917 it was these very youths from the countryside who had given Kronstadt its reputation as a hotbed of revolutionary extremism. And throughout the Civil War the Kronstadters had remained

an independent and headstrong lot, difficult to control and far from constant in their support for the government. It was for this reason so many of them . . . had found themselves transferred to new posts remote from the centres of Bolshevik powers. Of those who remained, many hankered for the freedoms they had won in 1917 before the new regime began to establish its one-party dictatorship throughout the country.

“Actually, there was little to distinguish the old-timers from the recent recruits in their midst. Both groups were largely of peasant background . . . Not unexpectedly, when the rebellion finally erupted, it was the older seamen, veterans of many years of service (dating in some cases before the First World War) who took the lead . . . Given their maturity and experience, not to speak of their keen disillusionment as former participants of the revolution, it was only natural that these seasoned bluejackets should be thrust into the forefront of the uprising . . . The proximity of Petrograd, moreover, with its intense intellectual and political life, had contributed towards sharpening their political awareness, and a good many had engaged in revolutionary activity during 1917 and after. . .

*“As late as the autumn of 1920, Emma Goldman recalled, the sailors were still held up by the Communists themselves as a glowing example of valour and unflinching courage; on November 7, the third anniversary of the Bolshevik seizure of power, they were in the front ranks of the celebrations . . . No one at the time spoke of any ‘class degeneration’ at Kronstadt. The allegation that politically retarded **muzhiks** had diluted the revolutionary character of the fleet, it would seem, was largely a device to explain away dissident movements among the sailors, and had been used as such as early as October 1918, following the abortive mutiny at the Petrograd naval station, when the social composition of the fleet could not yet have undergone any sweeping transformation.” [Kronstadt 1921, pp. 89–92]*

As can be seen, Avrich’s “reservations” are such as to make clear he does **not** share Trotsky’s “conclusions” as regards the class make-up of Kronstadt and, indeed, noted the ideological bias in this “explanation.”

Moreover, Avrich points to earlier revolts which the Bolsheviks had also explained in terms of a diluting of the revolutionary sailors of the Baltic Fleet by peasants. In April 1918 “the crews of several Baltic vessels passed a strongly worded resolution” which “went so far as to call for a general uprising to dislodge the Bolsheviks and install a new regime that would adhere more faithfully to the principles of the revolution.” In October that year, “a mass meeting at the Petrograd naval base adopted a resolution” which included the sailors going “on record against the Bolshevik monopoly of political power. Condemning the suppression of the anarchists and opposition socialists, they called for free elections to the soviets . . . [and] denounced the compulsory seizure of gain.” Their demands, as Avrich notes, “strikingly anticipated the Kronstadt programme of 1921, down to the slogans of ‘free soviets’ and ‘Away with the commissarocracy.’” He stresses that a “glance at the behaviour of the Baltic Fleet from 1905 to 1921 reveals many elements of continuity.” [Avrich, **Op. Cit.**, pp. 63–4]

However, a worse example of Trotskyist betrayal of the truth is provided by the British SWP's John Rees. The evidence Rees musters for the claim that the "composition" of the Kronstadt sailors "had changed" between 1917 and 1921 is a useful indication of the general Leninist method when it comes to the Russian revolution. Rees argues as follows:

"In September and October 1920 the writer and the Bolshevik party lecturer Ieronymus Yasinsky went to Kronstadt to lecture 400 naval recruits. They were 'straight from the plough'. And he was shocked to find that many, 'including a few party members, were politically illiterate, worlds removed from the highly politicised veteran Kronstadt sailors who had deeply impressed him'. Yasinsky worried that those steeled in the revolutionary fire' would be replaced by 'inexperienced freshly mobilised young sailors.'" [Op. Cit., p. 61]

This quote is referenced to Israel Getzler's **Kronstadt 1917–1921**. Rees account is a fair version of the first half of Yasinskys' report. The quote however continues exactly as reproduced below:

"Yasinsky was apprehensive about the future when, 'sooner or later, Kronstadt's veteran sailors, who were steeled in revolutionary fire and had acquired a clear revolutionary world-view would be replaced by inexperienced, freshly mobilised young sailors'. Still he comforted himself with the hope that Kronstadt's sailors would gradually infuse them with their 'noble spirit of revolutionary self-dedication' to which Soviet Russia owed so much. As for the present he felt reassured that 'in Kronstadt the red sailor still predominates.'" [Getzler, Op. Cit., p. 207]

Rees handy 'editing' of this quote transforms it from one showing that three months before the rising that Kronstadt had retained its revolutionary spirit to one implying the garrison had indeed been replaced.

Rees tries to generate "[f]urther evidence of the changing class composition" by looking at the "social background of the Bolsheviks at the base." However, he goes on to contradict himself about the composition of the Bolshevik party at the time. On page 61 he says the "same figures for the Bolshevik party as a whole in 1921 are 28.7% peasants, 41% workers and 30.8% white collar and others". On page 66 however he says the figures at the end of the civil war (also 1921) were 10% factory workers, 25% army and 60% in "the government or party machine". An endnote says even of those classed as factory workers "most were in administration." [Op. Cit., p. 61 and p. 78] The first set of figures is more useful for attacking Kronstadt and so is used.

What is the basis of Rees "further evidence"? Simply that in "September 1920, six months before the revolt, the Bolsheviks had 4,435 members at Kronstadt. Some 50 per cent of these were peasants, 40 percent workers and 10 percent intellectuals . . . Thus the percentage of peasants in the party was considerably higher than nationally . . . If we **assume** [our emphasis] that the Bolshevik party was more working class in composition than the base as a whole, then it seems **likely** [our emphasis] that the peasants had increased their weight in the Kronstadt, as Trotsky suggested." [Op. Cit., p. 61]

So on the basis of an assumption, it may be “*likely*” that Trotsky was correct! Impressive “*evidence*” indeed!

The figures Rees uses are extracted from D. Fedotoff-White’s **The Growth of the Red Army**. Significantly, Rees fails to mention that the Kronstadt communists had just undergone a “*re-registration*” which saw about a quarter of the 4,435 members in August 1920 voluntarily resigning. By March 1921, the party had half as many members as in the previous August and during the rebellion 497 members (again, about one-quarter of the total membership) voluntarily resigned, 211 were excluded after the defeat of the rebellion and 137 did not report for re-registration. [Fedotoff-White, **The Growth of the Red Army**, p. 140] It seems strange that the party leadership had not taken the opportunity to purge the Kronstadt party of “excessive” peasant influence in August 1920 when it had the chance.

Other questions arise from Rees’ argument. He uses the figures of Communist Party membership in an attempt to prove that the class composition of Kronstadt had changed, favouring the peasantry over the workers. Yet this is illogical. Kronstadt was primarily a military base and so its “class composition” would be skewed accordingly. Since the Bolshevik military machine was made up mostly of peasants, can we be surprised that the Communist Party in Kronstadt had a higher percentage of peasants than the national average? Significantly, Rees does not ponder the fact that the percentage of workers in the Kronstadt Communist Party was around the national average (indeed, Fedotoff-White notes that it “*compares favourably in that respect with some of the large industrial centres.*” [Op. Cit., p. 142]).

Also, given that Rees acknowledges that by December 1920 only 1,313 new recruits had arrived in the Baltic Fleet, his pondering of the composition of the Communist organisation at Kronstadt smacks more of desperation than serious analysis. By arguing that we “*do not know how many more new recruits arrived in the three months before Kronstadt erupted,*” Rees fails to see that this shows the irrelevance of his statistical analysis. [Op. Cit., p. 61] After all, how many of these “*new recruits*” would be allowed to join the Communist Party in the first place? Given that the Bolshevik membership had halved between August 1920 and March 1921, his analysis is simply pointless, a smokescreen to draw attention away from the weakness of his own case.

Moreover, as evidence of **changing** class composition these figures are not very useful. This is because they do not compare the composition of the Kronstadt Bolsheviks in 1917 to those in 1921. Given that the Kronstadt base always had a high percentage of peasants in its ranks, it follows that in 1917 the percentage of Bolsheviks of peasant origin could have been higher than normal as well. If this was the case, then Rees argument falls. Simply put, he is not comparing the appropriate figures.

It would have been very easy for Rees to inform his readers of the real facts concerning the changing composition of the Kronstadt garrison. He could quoted Getzler’s work on this subject. As noted above, Getzler demonstrates that the crew of the battleships *Petropavlovsk* and *Sevastopol*, which formed the core of the rising, were recruited into the navy before 1917, only 6.9% having been recruited between 1918 and 1921. These figures are on the same page as the earlier quotes Rees uses but are ignored by him. Unbelievably Rees even states “[w]e do not know how many new recruits arrived in the three months before Kronstadt erupted” in spite of quoting a source which indicates the composition

of the two battleships which started the revolt! [Op. Cit., p. 61]

Or, then again, he could have reported Samuel Farber's summary of Getzler's (and others) evidence. Rees rather lamely notes that Farber "*does not look at the figures for the composition of the Bolsheviks*" [Op. Cit., p. 62] Why should he when he has the appropriate figures for the sailors? Here is Farber's account of the facts:

*"this [Trotsky's class composition] interpretation has failed to meet the historical test of the growing and relatively recent scholarship on the Russian Revolution. . . In fact, in 1921, a smaller proportion of Kronstadt sailors were of peasant social origin than was the case of the Red Army troops supporting the government . . . recently published data strongly suggest that the class composition of the ships and naval base had probably remained unchanged since before the Civil War. We now know that, given the war-time difficulties of training new people in the technical skills required in Russia's ultra-modern battleships, very few replacements had been sent to Kronstadt to take the place of the dead and injured sailors. Thus, at the end of the Civil War in late 1920, no less than 93.9 per cent of the members of the crews of the **Petropavlovsk** and the **Sevastopol** . . . were recruited into the navy before and during the 1917 revolutions. In fact, 59 per cent of these crews joined the navy in the years 1914-16, while only 6.8 per cent had been recruited in the years 1918-21 . . . of the approximately 10,000 recruits who were supposed to be trained to replenish the Kronstadt garrison, only a few more than 1,000 had arrived by the end of 1920, and those had been stationed not in Kronstadt, but in Petrograd, where they were supposed to be trained."*
[Before Stalinism, pp. 192-3]

And Rees bemoans Farber for not looking at the Bolshevik membership figures! Yes, assumptions and "*likely*" conclusions drawn from assumptions are more important than hard statistical evidence!

After stating "*if, for the sake of argument, we accept Sam Farber's interpretation of the evidence*" (evidence Rees refuses to inform the reader of) Rees then tries to save his case. He states Farber's "*point only has any validity if we take the statistics in isolation. But in reality this change [!] in composition acted on a fleet whose ties with the peasantry had recently been strengthened in other ways. In particular, the Kronstadt sailors had recently been granted leave for the first time since the civil war. Many returned to their villages and came face to face with the condition of the countryside and the trials of the peasantry faced with food detachments.*" [Op. Cit., p. 62]

Of course, such an argument has **nothing to do with Rees original case**. Let us not forget that he argued that the class composition of the garrison had changed, **not** that its **political** composition had changed. Faced with overwhelming evidence against his case, he not only does not inform his readers of it, he changes his original argument! Very impressive.

So, what of this argument? Hardly an impressive one. Let us not forget that the revolt came about in response to the wave of strikes in Petrograd, **not** a peasant revolt. Moreover, the demands of the revolt predominantly reflected workers demands, **not** peasant ones (Rees himself acknowledges that the Kronstadt demands were not reproduced by any other "peasant" insurrection). The

political aspects of these ideas reflected the political traditions of Kronstadt, which were not, in the main, Bolshevik. The sailors supported soviet power in 1917, not party power, and they again raised that demand in 1921 (see section 9 for details). In other words, the **political** composition of the garrison was the same as in 1917. Rees is clearly clutching at straws.

The fact that the class composition of the sailors was similar in 1917 and in 1921 **and** that the bulk of the sailors at the heart of the revolt were veterans of 1917, means that Trotskyists can only fall back on their ideological definition of class. This perspective involves defining a specific “proletarian” political position (i.e. the politics of Bolshevism) and arguing that anyone who does not subscribe to that position is “petty-bourgeois” regardless of their actual position in society (i.e. their class position). As Ida Mett notes:

“When Trotsky asserts that all those supporting the government were genuinely proletarian and progressive, whereas all others represented the peasant counterrevolution, we have a right to ask of him that he present us with a serious factual analysis in support of his contention.” [Op. Cit., pp. 75–6]

As we show in the next section, the political composition of the Kronstadt rebels, like their class composition, was basically unchanged in 1921 when compared to that which pre-dominated in 1917.

9 Was Kronstadt different politically?

As we proved in the last section, the Kronstadt garrison had not fundamentally changed by 1921. On the two battleships which were the catalyst for the rebellion, over 90% of the sailors for whom years of enlistment are known had been there since 1917. However, given that most Leninists mean “support the party” by the term “class politics,” it is useful to compare the political perspectives of Kronstadt in 1917 to that expressed in the 1921 revolt. As will soon become clear, the political ideas expressed in 1921 were essentially similar to those in 1917. This similarly also proves the continuity between the Red sailors of 1917 and the rebels of 1921.

Firstly, we must point out that Kronstadt in 1917 was **never** dominated by the Bolsheviks. At Kronstadt, the Bolsheviks were always a minority and a “*radical populist coalition of Maximalists and Left SRs held sway, albeit precariously, within Kronstadt and its Soviet*” (“*externally Kronstadt was a loyal stronghold of the Bolshevik regime*”). [I. Getzler, **Kronstadt 1917–1921**, p. 179] In 1917 Trotsky even stated that the Kronstadters “*are anarchists.*” [quoted by Getzler, **Op. Cit.**, p. 98] Kronstadt was in favour of soviet power and, unsurprisingly, supported those parties which claimed to support that goal.

Politically, the climate in Kronstadt was “*very close to the politics of the Socialist Revolutionary Maximalists, a left-wing split-off from the SR Party, politically located somewhere between the Left SRs and the Anarchists.*” [Farber, **Before Stalinism**, p. 194] In Kronstadt this group was led by Anatolii Lamanov and according to Getzler, “*it rejected party factionalism*” and “*stood for pure sovietism*”. They sought an immediate agrarian and urban social revolution, calling for the “*socialisation of power, of the land and of the factories*” to be organised by a federation of soviets based on direct elections and instant

recall, as a first step towards socialism. [Getzler, **Op. Cit.**, p. 135] The similarities with anarchism are clear.

During the October revolution, the Bolsheviks did not prevail in the Kronstadt soviet. Instead, the majority was made up of SR Maximalists and Left SRs. Kronstadt's delegates to the third Congress of Soviets were an Left-SR (157 votes), a SR-Maximalist (147 votes) and a Bolshevik (109 votes). It was only in the January elections in 1918 that the Bolsheviks improved their position, gaining 139 deputies compared to their previous 96. In spite of gaining their highest ever vote during the era of multi-party soviets the Bolsheviks only gained 46 percent of seats in the soviet. Also elected at this time were 64 SRs (21 percent), 56 Maximalists (19 percent), 21 non-party delegates (7 percent), 15 Anarchists (5 percent) and 6 Mensheviks (2 percent). The soviet elected a Left SR as its chairman and in March it elected its three delegates to the Fourth Congress of Soviets, with the Bolshevik delegate receiving the lowest vote (behind a Maximalist and an anarchist with 124, 95 and 79 votes respectively). [I. Getzler, **Op. Cit.**, pp. 182–4]

By the April 1918 elections, as in most of Russia, the Bolsheviks found their support had decreased. Only 53 Bolsheviks were elected (29 per cent) as compared to 41 SR Maximalists (22 percent), 39 Left SRs (21 percent), 14 Menshevik Internationalists (8 percent), 10 Anarchists (5 percent) and 24 non-party delegates (13 percent). Indeed, Bolshevik influence at Kronstadt was so weak that on April 18th, the Kronstadt soviet denounced the Bolsheviks attack against the anarchists in Moscow, April 12th by a vote of 81 to 57. The "*Bolshevisation*" of Kronstadt "*and the destruction of its multi-party democracy was not due to internal developments and local Bolshevik strength, but decreed from outside and imposed by force.*" [Getzler, **Op. Cit.**, p. 186]

Thus the dominant political perspective in 1917 was one of "*sovietism*" — namely, all power to the soviets and not to parties. This was the main demand of the 1921 uprising. Politically, Kronstadt had not changed.

In addition to the soviet, there was the "*general meetings in Anchor square, which were held nearly every day.*" [Avrich, **Op. Cit.**, p. 57] The Kronstadt Soviet was itself constantly pressurised by mass meetings, generally held in Anchor Square. For example, on 25 May 1917, a large crowd, inspired by Bolshevik and anarchist speakers, marched to the Naval Assembly and forced the leaders of the Soviet to rescind their agreement with the more moderate Petrograd Soviet. In February 1921, the Kronstadt rebels met in Anchor square to pass the *Petropavlovsk* resolution — just as happened before in 1917. And as in 1917, they elected a "*conference of delegates*" to manage the affairs of the Kronstadt. In other words, the sailors re-introduced exactly the same political forms they practised in 1917.

These facts suggest that any claims that the majority of sailors, soldiers and workers in Kronstadt had changed ideas politically are unfounded. This, ironically enough, is confirmed by Trotsky.

Trotsky's memory (which, after all, seems to be the basis of most of his and his followers arguments) does play tricks on him. He states that there "*were no Mensheviks at all in Kronstadt.*" As for the anarchists, "*most*" of them "*represented the city petty bourgeoisie and stood at a lower level than the SRs.*" The Left SRs "*based themselves on the peasant part of the fleet and of the shore garrison.*" All in all, "*in the days of the October insurrection the Bolsheviks constituted less than one-half of the Kronstadt soviet. The majority consisted of*

SRs and anarchists." [Lenin and Trotsky, **Kronstadt**, p. 86]

So we have Trotsky arguing that the majority of the "*pride and glory*" of the revolution in 1917 voted for groups of a "*lower level*" than the Bolsheviks (and for a party, the Mensheviks, Trotsky said did not exist there!).

Looking at the politics of these groups, we discover some strange inconsistencies which undermine the validity of Trotsky's claims.

For example, in the beginning of 1918, "*the working population of Kronstadt, after debating the subject at many meetings, decided to proceed to socialise dwelling places. . . A final monster meeting definitely instructed several members of the Soviet — Left Social-Revolutionaries and Anarcho-Syndicalists — to raise the question at the next [soviet] plenary session.*" While the Bolshevik delegates tried to postpone the decision (arguing in the soviet that the decision was too important and should be decided by the central government) the "*Left Social-Revolutionaries, Maximalists and Anarcho-Syndicalists asked for an immediate discussion and carried the vote.*" [Voline, **The Unknown Revolution**, pp. 460–1]

This fits in exactly with the communist-anarchist programme of socialisation but it is hardly an expression of representatives of "*the city petty bourgeoisie.*"

Let us quote a "*representative*" of the "*city petty bourgeoisie*":

"I am an anarchist because contemporary society is divided into two opposing classes: the impoverished and dispossessed workers and peasants . . . and the rich men, kings and presidents . . .

"I am an anarchist because I scorn and detest all authority, since all authority is founded on injustice, exploitation and compulsion over the human personality. Authority dehumanises the individual and makes him a slave.

"I am an opponent of private property when it is held by individual capitalist parasites, for private property is theft. . .

"I am an anarchist because I believe only in the creative powers and independence of a united proletariat and not of the leaders of political parties of various kinds.

"I am an anarchist because I believe that the present struggle between the classes will end only when the toiling masses, organised as a class, gain their true interests and conquer, by means of a violent social revolution, all the riches of the earth . . . having abolished all institutions of government and authority, the oppressed class must proclaim a society of free producers . . . The popular masses themselves will conduct their affairs on equal and communal lines in free communities." [N. Petrov, cited by Paul Avrich, **Anarchists in the Russian Revolution**, pp. 35–6]

Very "petty bourgeois"! Of course Trotsky could argue that this represented the minority of "*real revolutionaries,*" the "*elements most closely linked to the Bolsheviks*" among the anarchists, but such an analysis cannot be taken seriously considering the influence of the anarchists in Kronstadt. [Lenin and Trotsky, **Op. Cit.**, p. 86] For example, a member of the Petrograd Committee and the Helsingfors party organisation in 1917 recalled that the Anarchist-Communists had great influence in Kronstadt. Moreover, according to historian Alexander

Rabinowitch, they had an “undeniable capacity to influence the course of events” and he speaks of “the influential Anarcho-Syndicalist Communists [of Kronstadt] under Iarchuk.” Indeed, anarchists “played a significant role in starting the July uprising” in 1917. [**Prelude to Revolution**, p. 62, p. 63, p. 187 and p. 138] This confirms Paul Avrich’s comments that the “influence of the anarchists . . . had always been strong within the fleet” and “the spirit of anarchism” had been “powerful in Kronstadt in 1917” (and “had by no means dissipated” in 1921). [Arvich, **Op. Cit.**, p. 168 and p. 169]

A similar analysis of the Maximalists would produce the same results for Trotsky’s claims. Paul Avrich provides a useful summary of their politics. He notes the Maximalists occupied “a place in the revolutionary spectrum between the Left SR’s and the anarchists while sharing elements of both.” They “preached a doctrine of total revolution” and called for a “‘toilers’ soviet republic’ founded on freely elected soviets, with a minimum of central state authority. Politically, this was identical with the objective of the Kronstadters [in 1921], and ‘Power to the soviets but not the parties’ had originally been a Maximalist rallying-cry.” [**Op. Cit.**, p. 171]

Economically, the parallels “are no less striking.” They denounced grain requisitioning and demanded that “all the land be turned over to the peasants.” For industry they rejected the Bolshevik theory and practice of “workers’ control” over bourgeois administrators in favour of the “social organisation of production and its systematic direction by representatives of the toiling people.” Opposed to nationalisation and centralised state management in favour of socialisation and workers’ self-management of production. Little wonder he states that the “political group closest to the rebels in temperament and outlook were the SR Maximalists.” [Paul Avrich, **Op. Cit.**, pp. 171–2]

Indeed, “[o]n nearly every important point the Kronstadt program, as set forth in the rebel **Izvestiia**, coincided with that of the Maximalists.” [Avrich, **Op. Cit.**, p. 171] This can be quickly seen from reading both the **Petropavlovsk** resolution and the Kronstadt newspaper **Izvestiia** (see **No Gods, No Masters**, vol. 2, pp. 183–204). The political continuity is striking between 1917 and 1921.

As can be seen, the Maximalists were in advance of the Bolsheviks too. They argued for soviet power, not party power, as well as workers’ self-management to replace the state capitalism of the Bolsheviks.

Clearly, the political outlook of the Kronstadt rebels had not changed dramatically. Heavily influenced by anarchist and semi-anarchists in 1917, in 1921 the same political ideas came to the fore again once the sailors, soldiers and civilians had freed themselves from Bolshevik dictatorship and created the “conference of delegates.”

According to the logic of Trotsky’s argument, the Kronstadt sailors were revolutionary simply because of the actions of the Bolshevik minority, as a “revolution is ‘made’ directly by a **minority**. The success of a revolution is possible, however, only where this minority finds more or less support . . . on the part of the majority. The shift in different stages of the revolution . . . is directly determined by changing political relations between the minority and the majority, between the vanguard and the class.” It is this reason that necessitates “the dictatorship of the proletariat” as the level of the masses cannot be “equal” and of “extremely high development.” Trotsky argued that the “political composition of the Kronstadt Soviet reflected the composition of the garrison and the crews.”

[Lenin and Trotsky, **Op. Cit.**, p. 85, p. 92 and p. 86]

In other words, with the vanguard (the minority of Bolsheviks) gone, the majority of the Kronstadters fell back to their less developed ways. So, if the political composition of the revolt reflected the composition of the crews, then Trotsky's argument suggests that this composition was remarkably unchanged! It also suggests that this "*composition*" had changed in the early months of 1918 as the Bolsheviks saw their vote nearly half between late January and April 1918!

Similarly, we find John Rees, in contradiction to his main argument, mentioning that the "*ideology of the Kronstadt garrison was one factor*" in the revolt because "*in its heroic days the garrison had an ultra-left air.*" [Rees, **Op. Cit.**, p. 62] If, as he maintains, the sailors **were** new, how could they had time to be influenced by this ideology, the ideology of sailors he claims were not there? And if the new recruits he claims were there **had** been influenced by the sailors of 1917 then it is hard to maintain that the revolt was alien to the spirit of 1917.

This can also be seen from Rees' comment that while we did not know the composition of the sailors, we did "*know about the composition of some of the other units based at Kronstadt, like the 2,5000 Ukrainians of the 160th Rifle Regiment, recruited from areas particularly friendly to the Makhno guerrillas and with less than 2 percent of Bolsheviks in its ranks.*" [**Op. Cit.**, p. 61] In other words, we know the origin of **one** other unit at Kronstadt, not the class "*composition*" of "*some of the other units*" there. However, Rees does not see how this fact undermines his argument. Firstly, Rees does not think it important to note that Communists numbered less than 2 per cent of metalworkers in Petrograd and only 4 per cent of 2,200 employed in metal works in Moscow. [D. Fedotoff-White, **The Growth of the Red Army**, p. 132] As such the low figure for Communists in the 160th Rifle Regiment does not tell us much about its class composition. Secondly, as Fedotoff-White (the source of Rees' information) notes, while "*the soldiers were also disaffected and had no love of the Communists and the commissars,*" they were "*unable to formulate their grievances clearly and delineate the issues at stake . . . They did not have it in them to formulate a plan of action. All that was done at Kronstadt was the work of the bluejackets [the sailors], who were the backbone of the movement.*" [**Op. Cit.**, p. 154]

If, as Rees argues, that "new recruits" explain the uprising, then how can we explain the differences between the army and navy? We cannot. The difference can be explained only in terms of what Rees is at pains to deny, namely the existence and influence of sailors who had been there since 1917. As Fedotoff-White speculates, "*the younger element among the seamen*" would "*easily [fall] under the spell of the . . . older men they served with on board ships*" and of the "*large number of old-ex-sea men, employed in the industrial enterprises of Kronstadt.*" He notes that "*a good many*" of the rebels "*had had ample experience in organisational and political work since 1917. A number had long-standing associations with Anarchists and the Socialist Revolutionaries of the Left.*" Thus the "*survival of the libertarian pattern of 1917 . . . made it possible for the bluejackets not only to formulate, but carry out a plan of action, no doubt under a certain amount of influence of the Anarchists, and those who had left the party in such great numbers during the September 1920 re-registration.*" [**Op. Cit.**, p. 155] The political continuity of the Kronstadt rebellion is clear from the way the revolt developed and who took a leading role in it.

All of which raises an interesting question. If revolutions are made by a minority who gain the support of the majority, what happens when the majority reject the vanguard? As we indicate in sections 13 and 15, Trotsky was not shy in providing the answer — party dictatorship. In this he just followed the logic of Lenin’s arguments. In 1905, Lenin argued (and using Engels as an authority) “*the principle, ‘only from below’ is an **anarchist** principle.*” For Lenin, Marxists must be in favour of “*From above as well as from below*” and “*renunciation of pressure also from above is **anarchism.***” According to Lenin, “[p]ressure from below is pressure by the citizens on the revolutionary government. Pressure from above is pressure by the revolutionary government on the citizens.” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 192, p. 196 and pp. 189–90]

As Kronstadt shows, “*pressure from above*” has a slight advantage over “*pressure from below*” as it has the full power of the state apparatus to use against the citizens. In other words, the seeds for Bolshevik dictatorship and the repression of Kronstadt lie in Trotsky’s argument and arguments like it (see section 15 for further details).

Simply put, the evidence shows that the political ideas dominant in Kronstadt, like the bulk of the personnel themselves, had not changed (indeed, it is these politics which visibly show the statistical evidence we present in the last section). The revolt of 1921 reflected the politics and aspirations of those active in 1917. It were these politics which had made Kronstadt the “*pride and glory*” of the revolution in 1917 and, four years later, made it so dangerous to the Bolsheviks.

10 Why did the Petrograd workers not support Kronstadt?

For Trotskyists, the inaction of the Petrograd workers during the revolt is a significant factor in showing its “*backward peasant*” character. Trotsky, for example, argued that from “*the class point of view*” it is “*extremely important to contrast the behaviour of Kronstadt to that of Petrograd in those critical days.*” He argues that the “*uprising did not attract the Petrograd workers. It repelled them. The stratification proceeded along class lines. The workers immediately felt that the Kronstadt mutineers stood on the opposite side of the barricades — and they supported the Soviet power. The political isolation of Kronstadt was the cause of its internal uncertainty and its military defeat.*” [Lenin and Trotsky, **Kronstadt**, pp. 90–1]

Firstly, it should be noted that Trotsky’s claims in 1937 are at odds with his opinion during the crisis. In a cable dated March 5th, 1921, to a member of the Council of Labour and Defence Trotsky insisted that “*only the seizure of Kronstadt will put an end to the political crisis in Petrograd.*” [quoted by Israel Getzler, “*The Communist Leaders’ Role in the Kronstadt Tragedy of 1921 in the Light of Recently Published Archival Documents*”, **Revolutionary Russia**, pp. 24–44, Vol. 15, No. 1, June 2002, p. 32] Thus, in 1921, Trotsky was well aware of the links between the Kronstadt revolt and the Petrograd strikes, seeing the destruction of the former as a means to defeating the latter. Simply put, the crushing of Kronstadt would give the rebel workers in Petrograd a clear message

of what to expect if they persisted in their protests.

Secondly, needless to say, Trotsky's later arguments leave a lot to be desired. For example, he fails to note (to use Victor Serge's words — see section 5) that the state and Communist Press "*was positively berserk with lies.*" The press and radio campaign directed against Kronstadt stated that the revolt had been organised by foreign spies and was led by ex-Tsarist generals.

On 5th March the Petrograd Defence Committee put out a call to the insurgents, inviting them to surrender. It stated:

"You are being told fairy tales when they tell you that Petrograd is with you or that the Ukraine supports you. These are impertinent lies. The last sailor in Petrograd abandoned you when he learned that you were led by generals like Kozlovskv. Siberia and the Ukraine support the Soviet power. Red Petrograd laughs at the miserable efforts of a handful of White Guards and Socialist Revolutionaries."
[cited by Mett, **The Kronstadt Uprising**, p. 50]

These lies would, of course, alienate many workers in Petrograd. Two hundred emissaries were sent from Kronstadt to distribute their demands but only a few avoided capture. The Party had brought the full weight of its propaganda machine to bear, lying about the revolt and those taking part in it. The government also placed a "*careful watch*" on the "*trains from Petrograd to mainland points in the direction of Kronstadt to prevent any contact with the insurgents.*" [Avrich, **Op. Cit.**, p. 140 and p. 141]

Unsurprising, in such circumstances many workers, soldiers and sailors would have been loath to support Kronstadt. Isolated from the revolt, the Petrograd workers had to rely on official propaganda (i.e. lies) and rumours to base any judgement on what was happening there. However, while this is a factor in the lack of active support, it is by no means the key one. This factor, of course, was state repression. Emma Goldman indicates the situation in Petrograd at the time:

"An exceptional state of martial law was imposed throughout the entire province of Petrograd, and no one except officials with special passes could leave the city now. The Bolshevik press launched a campaign of calumny and venom against Kronstadt, announcing that the sailors and soldiers had made common cause with the 'tsarist General Kozlovsky;' they were thereby declaring the Kronstadters outlaws." [No Gods, No Masters, vol. 2, p. 171]

Given what everyone knew what happened to people outlawed by the Bolsheviks, is it surprising that many workers in Petrograd (even if they knew they were being lied to) did not act? Moreover, the threat made against Kronstadt could be seen on the streets of Petrograd:

"On March 3 [the day after the revolt] the Petrograd Defence Committee, now vested with absolute power throughout the entire province, took stern measures to prevent any further disturbances. The city became a vast garrison, with troops patrolling in every quarter. Notices posted on the walls reminded the citizenry that all gatherings would be dispersed and those who resisted shot on the spot. During the day

the streets were nearly deserted, and, with the curfew now set at 9 p.m., night life ceased altogether." [Avrich, **Op. Cit.**, p. 142]

Berkman, an eyewitness to the repression, states that:

"The Petrograd committee of defence, directed by Zinoviev, its chairman, assumed full control of the city and Province of Petrograd. The whole Northern District was put under martial law and all meetings prohibited. Extraordinary precautions were taken to protect the Government institutions and machine guns were placed in the Astoria, the hotel occupied by Zinoviev and other high Bolshevik functionaries. The proclamations posted on the street bulletin boards ordered the immediate return of all strikers to the factories, prohibited suspension of work, and warned the people against congregating on the streets. 'In such cases', the order read, 'the soldiery will resort to arms. In case of resistance, shooting on the spot.'

*"The committee of defence took up the systematic 'cleaning of the city.' Numerous workers, soldiers and sailors suspected of sympathising with Kronstadt, placed under arrest. All Petrograd sailors and several Army regiments thought to be 'politically untrustworthy' were ordered to distant points, while the families of Kronstadt sailors living in Petrograd were taken into custody as **hostages.**"* [The Russian Tragedy, p. 71]

However, part of the Petrograd proletariat continued to strike during the Kronstadt events. Strikes were continuing in the biggest factories of Petrograd: Poutilov, Baltisky, Oboukhov, Nievskaia Manoufactura, etc. However, the Bolsheviks acted quickly shut down some of the factories and started the re-registration of the workers. For workers to be locked out of a factory meant to be "*automatically deprived of their rations.*" [Avrich, **Op. Cit.**, p. 41]

At the "Arsenal" factory, "*the workers organised a mass meeting on 7th March, (the day the bombardment of Kronstadt began). This meeting adopted a resolution of the mutinous sailors! It elected a commission which was to go from factory to factory, agitating for a general strike.*" [Mett, **Op. Cit.**, p. 52] The Cheka confirms this event, reporting to Zinoviev on March 8th that "*[a]t a rally of workers of the Arsenal Plant a resolution was passed to join the Kronstadt uprising. The general meeting had elected a delegation to maintain contact with Kronstadt.*" This delegation had already been arrested. This was a common practice and during this period the Cheka concentrated its efforts on the leaders and on disrupting communication: all delegates to other workplaces, all Mensheviks and SRs who could be found, all speakers at rallies were being arrested day after day. On the day the Bolsheviks attacked Kronstadt (March 7th) the Cheka reported that it was launching "*decisive actions against the workers.*" [quoted by Brovkin, **Behind the Front Lines of the Civil War**, p. 396]

These "*decisive actions*" involved a "*massive purge of Petrograd factories and plants.*" The Communists "*suppressed the workers' uprising in Petrograd in the first days of March.*" Unlike the Kronstadt sailors, the workers did not have weapons and "*were essentially defenceless vis-a-vis the Cheka.*" [Brovkin, **Op. Cit.**, p. 396]

The state of siege was finally lifted on the 22nd of March, five days after the crushing of Kronstadt.

In these circumstances, is it surprising that the Petrograd workers did not join in the rebellion?

Moreover, the Petrograd workers had just experienced the might of the Bolshevik state. As we noted in section 2, the events in Kronstadt were in solidarity with the strike wave in Petrograd at the end of February. Then the Bolsheviks had repressed the workers with “*arrests, the use of armed patrols in the streets and in the factories, and the closing and re-registration of an enterprise labour force.*” [Mary McAuley, **Op. Cit.**, p. 409]

A three-man Defence Committee was formed and Zinoviev “*proclaimed martial law*” on February 24th (this was later “*vested with absolute power throughout the entire province*” on March 3rd). [Avrich, **Op. Cit.**, p. 39 and p. 142] As part of this process, they had to rely on the *kursanty* (Communist officer cadets) as the local garrisons had been caught up the general ferment and could not be relied upon to carry out the government’s orders. Hundreds of *kursanty* were called in from neighbouring military academies to patrol the city. “*Overnight Petrograd became an armed camp. In every quarter pedestrians were stopped and their documents checked . . . the curfew [was] strictly enforced.*” The Petrograd Cheka made widespread arrests. [Avrich, **Op. Cit.**, pp. 46–7]

As can be seen, Trotsky is insulting the intelligence of his readers by arguing that the lack of support in Petrograd for Kronstadt reflected “*class lines.*” Indeed, by failing to mention (to use Emma Goldman’s words) “*the campaign of slander, lies and calumny against the sailors*” conducted by the Soviet Press (which “*fairly oozed poison against the sailors*”) or that “*Petrograd was put under martial law*” Trotsky, quite clearly, “*deliberately falsifies the facts.*” [**Trotsky Protests Too Much**]

Ida Mett states the obvious:

“Here again Trotsky is saying things which are quite untrue. Earlier on we showed how the wave of strikes had started in Petrograd and how Kronstadt had followed suit. It was against the strikers of Petrograd that the Government had to organise a special General Staff: the Committee of Defence. The repression was first directed against the Petrograd workers and against their demonstrations, by the despatch of armed detachments of Koursantys.

“But the workers of Petrograd had no weapons. They could not defend themselves as could the Kronstadt sailors. The military repression directed against Kronstadt certainly intimidated the Petrograd workers. The demarcation did not take place ‘along class lines’ but according to the respective strengths of the organs of repression. The fact that the workers of Petrograd did not follow those of Kronstadt does not prove that they did not sympathise with them. Nor, at a later date, when the Russian proletariat failed to follow the various ‘oppositions’ did this prove that they were in agreement with Stalin! In such instances it was a question of the respective strengths of the forces confronting one another.” [Mett, **Op. Cit.**, p. 73]

So, unlike the Kronstadt sailors, the Petrograd workers did not have arms and so could not take part in an “armed revolt” against the well armed Red

Army unless part of that force sided with the strikers. The Communist leaders recognised this danger, with untrustworthy troops being confined to their barracks and in place of regular troops they had shipped in *kursanty* (they had obviously learned the lessons of the 1917 February revolution!). Ultimately, the city was “*appeased by concessions and cowed by the presence of troops.*” [Avrich, **Op. Cit.**, p. 200]

Not that this was the first time Trotsky confused force with class. In his infamous work **Terrorism and Communism** he defended the fact of Communist Party dictatorship (i.e. “*of having substituted for the dictatorship of the Soviets the dictatorship of our party*”). He argued that “*it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party*” and that there is “*no substitution at all*” when the “*power of the party*” replaces that of the working class. The rule of the party “*has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour.*” [**Terrorism and Communism**, p. 109] He continued by arguing:

“But where is your guarantee, certain wise men ask us, that it is just your party that expresses the interests of historical development? Destroying or driving underground the other parties, you have thereby prevented their political competition with you, and consequently you have deprived yourselves of the possibility of testing your line of action.

“This idea is dictated by a purely liberal conception of the course of the revolution. In a period in which all antagonisms assume an open character, and the political struggle swiftly passes into a civil war, the ruling party has sufficient material standard by which to test its line of action, without the possible circulation of Menshevik papers. Noske crushes the Communists, but they grow. We have suppressed the Mensheviks and the S.R.s—and they have disappeared. This criterion is sufficient for us.” [**Op. Cit.**, pp. 109–10]

An interesting criterion, to say the least. The faulty logic he displayed with regards to Petrograd and Kronstadt had a long history. By this logic Hitler expressed the “*interests of historical development*” when the German Communists and Trotskyists “*disappeared*” by leaps and bounds. Similarly, the Trotskyists in Russia “*disappeared*” under Stalin. Is this a Trotskyist justification of Stalinism? All it proves is the power of the repressive system — just as the “*passivity*” of the Petrograd workers during the Kronstadt revolt indicates the power of the Bolshevik regime rather than the class basis of the Kronstadt uprising.

On this theme, we can see the depths which Trotskyists go to re-write history from Pierre Frank’s “*Introduction*” to the work **Kronstadt**. He decides to quote Paul Avrich’s work (after, of course, warning the reader that Avrich “*is not a Bolshevik or a Trotskyist*” and his “*political features are blurred*”). Frank states that Avrich “*done his work conscientiously, without skipping over the facts.*” It is a shame that the same cannot be said of Frank! Frank states that Avrich “*discusses the strikes in Petrograd preceding Kronstadt and comes to the following conclusion*”:

“For many intellectuals and workers, moreover, the Bolsheviks, with

all their faults, were still the most effective barrier to a White resurgence and the downfall of the revolution.

“For these reasons, the strikes in Petrograd were fated to lead a brief existence. Indeed, they ended almost as suddenly as they had begun, never having reached the point of armed revolt against the regime.”
[Lenin and Trotsky, **Op. Cit.**, pp. 24–35]

It is the “*moreover*” in the first paragraph that gives the game away. Avrich lists a few more reasons than the one listed by Frank. Here is what Avrich actually lists as the reasons for the end of the strike wave:

“after several days of tense excitement, the Petrograd disturbances petered out . . . The concessions had done their work, for more than anything else it was cold and hunger which had stimulated popular disaffection. Yet there is no denying that the application of military force and the widespread arrests, not to speak of the tireless propaganda waged by the authorities had been indispensable in restoring order. Particularly impressive in this regard was the discipline shown by the local party organisation. Setting aside their internal disputes, the Petrograd Bolsheviks swiftly closed ranks and proceeded to carry out the unpleasant task of repression with efficiency and dispatch . . .

“Then, too, the collapse of the movement would not have come so soon but for the utter demoralisation of Petrograd’s inhabitants. The workers were simply too exhausted to keep up any sustained political activity . . . What is more, they lacked effective leadership and a coherent program of action. In the past these had been supplied by the radical intelligentsia . . . [but they] were themselves in no condition to lend the workers any meaningful support, let alone active guidance . . . they now felt too weary and terrorised . . . to raise their voices in opposition. With most of their comrades in prison or exile, and some already executed, few of the survivors were willing to risk the same fate, especially when the odds against them were so overwhelming and when the slightest protest might deprive their families of their rations. For many intellectuals and workers, moreover, the Bolsheviks, with all their faults, were still the most effective barrier to a White resurgence and the downfall of the revolution.

“For these reasons, the strikes in Petrograd were fated to lead a brief existence. Indeed, they ended almost as suddenly as they had begun, never having reached the point of armed revolt against the regime.”
[Paul Avrich, **Kronstadt**, pp. 49–51]

As can be seen, Frank “*skips over*” most of Avrich’s argument and the basis of his conclusion. Indeed, what Frank calls Avrich’s “conclusion” cannot be understood by providing, as Frank does, the **last** reason Avrich gives for it.

*The dishonesty is clear, if not unexpected nor an isolated case. John Rees, to use another example, states that the revolt was “preceded by a wave of serious but quickly resolved strikes.” [Rees, **Op. Cit.**, p. 61] No mention that the strikes were “resolved” by force nor that the Kronstadt revolt was not only “preceded” by the strikes but was directly inspired by them, was in **solidarity with them** and raised many of the same demands!*

Similarly, he argues that the Kronstadters' "*insistence that they were fighting for a 'third revolution', freedom of expression and for 'soviets without parties' [although, in fact, they **never** raised that slogan and so we have to wonder who Rees is quoting here] has convinced many historians that this revolt was fundamentally distinct from the White Rebellions.*" But this, apparently, is not the case as "*one must be careful to analyse the difference between the conscious aims of the rebels and the possible outcome of their actions. The Bolshevik regime still rested on the shattered remnants of the working class. The Kronstadt sailors' appeals to the Petrograd workers had met with little or no response.*" [Op. Cit., p. 63]

One has to wonder what planet Rees is on. After all, **if** the Bolsheviks **had** rested on the "*shattered remnants of the working class*" then they would **not** have had to turn Petrograd into an armed camp, repress the strikes, impose martial law and arrest militant workers. The Kronstadt sailors appeals "*met with little or no response*" due to the Bolshevik coercion exercised in those fateful days. To not mention the Bolshevik repression in Petrograd is to deliberately deceive the reader. That the Kronstadt demands would have met with strong response in Petrograd can be seen from the actions of the Bolsheviks (who did not rest upon the workers but rather arrested them). Given that the Kronstadt demands simply reflected those raised by the Petrograd strikers **themselves** we can safely say that Rees is talking nonsense (see section 4). Moreover, the sailors' resolution **had** meet with strong support from the workers of Kronstadt. Thus Rees' "class analysis" of the Kronstadt revolt is pathetic and has no bearing to the reality of the situation in Petrograd nor to the history of the revolt itself.

As can be seen, any attempt to use the relative inaction of the Petrograd workers as evidence of the class nature of the revolt has to do so by ignoring all the relevant facts of the situation. This can go so far as to selectively quote from academic accounts to present a radically false conclusion to that of the misused author's.

11 Were the Whites a threat during the Kronstadt revolt?

The lack of foreign intervention during the Kronstadt revolt suggests more than just the fact that the revolt was not a "White conspiracy." It also suggests that the White forces were in no position to take advantage of the rebellion or even support it.

This is significant simply because the Bolsheviks and their supporters argue that the revolt had to be repressed simply because the Soviet State was in danger of White and/or foreign intervention. How much danger was there? According to John Rees, a substantial amount:

"The Whites, even though their armies had been beaten in the field, were still not finished — as the emigre response to the Kronstadt rising shows . . . They had predicted a rising at Kronstadt and the White National Centre abroad raised a total of nearly 1 million French Francs, 2 million Finnish marks, £5000, \$25,000 and 900 tons of flour in just two weeks; Indeed, the National Centre was already

making plans for the forces of the French navy and those of General Wrangel, who still commanded 70,000 men in Turkey, to land in Kronstadt if the revolt were to succeed.” [Op. Cit., pp. 63–4]

To back up his argument, Rees references Paul Avrigh’s book. We, in turn, will consult that work to evaluate his argument.

Firstly, the Kronstadt revolt broke out months after the end of the Civil War in Western Russia. Wrangel had fled from the Crimea in November 1920. The Bolsheviks were so afraid of White invasion that by early 1921 they demobilised half the Red Army (some 2,500,000 men). [Paul Avrigh, **Op. Cit.**, p. 13]

Secondly, the Russian emigres “*remained as divided and ineffectual as before, with no prospect of co-operation in sight.*” [Avrigh, **Op. Cit.**, p. 219]

Thirdly, as far as Wrangel, the last of the White Generals, goes, his forces were in no state to re-invade Russia. His troops were “*dispersed and their moral sagging*” and it would have taken “*months . . . merely to mobilise his men and transport them from the Mediterranean to the Baltic.*” A second front in the south “*would have meant almost certain disaster.*” Indeed, in a call issued by the Petrograd Defence Committee on March 5th, they asked the rebels: “*Haven’t you heard what happened to Wrangel’s men, who are dying like flies, in their thousands of hunger and disease?*” The call goes on to add “[*t*]*his is the fate that awaits you, unless you surrender within 24 hours.*” [Avrigh, **Op. Cit.**, p. 219, p. 146 and p. 105]

Clearly, the prospect of a White invasion was slim. This leaves the question of capitalist governments. Avrigh has this to say on this:

“Apart from their own energetic fund-raising campaign, the emigres sought the assistance of the Entene powers. . . the United States government, loath to resume the interventionist policies of the Civil War, turned a deaf ear to all such appeals. The prospects of British aid were even dimmer . . . The best hope of foreign support came from France . . . the French refused to interfere either politically or militarily in the crisis.” [Op. Cit., pp. 117–9]

The French government had also “*withdrew its recognition of Wrangel’s defunct government*” in November 1920 “*but continued to feed his troops on ‘humane grounds,’ meanwhile urging him to disband.*” [Op. Cit., p. 105]

Thus, the claim that foreign intervention was likely seems without basis. Indeed, the Communist radio was arguing that “*the organisation of disturbances in Kronstadt have the sole purpose of influencing the new American President and changing his policy toward Russia. At the same time the London Conference is holding its sessions, and the spreading of similar rumours must influence also the Turkish delegation and make it more submissive to the demands of the Entente. The rebellion the Petropavlovsk crew is undoubtedly part of a great conspiracy to create trouble within Soviet Russia and to injure our international position.*” [quoted by Berkman, **The Russian Tragedy**, p. 71] Lenin himself argued on March 16th that “*the enemies*” around the Bolshevik state were “*no longer able to wage their war of intervention*” and so were launching a press campaign “*with the prime object of disrupting the negotiations for a trade agreement with Britain, and the forthcoming trade agreement with America.*” [Lenin and Trotsky, **Op. Cit.**, p. 52] The demobilising of the Red Army seems to confirm this perspective.

Moreover, these governments had to take into account of its own working class. It was doubtful that they would, after years of war, been able to intervene, particularly if there was a clearly socialist revolt coming from below. Their own working class, in such a situation, would have prevented intervention by foreign capitalist states (a fact Lenin acknowledged in July 1921 [Lenin and Trotsky, *Op. Cit.*, p. 62]).

So in spite of massive social unrest and the revolt of a key fortress protecting Petrograd, the Western powers took no action. The Whites were disorganised and could only raise non-military supplies (none of which reached Kronstadt). Could this situation have changed if Kronstadt had spread to the mainland? It is doubtful simply because the Western governments, as Lenin argued, had to take into account the anti-interventionist position of their own working classes. The Whites had no military forces available (as the Bolsheviks themselves argued). Avrich notes it would have taken months for these forces to reach Kronstadt by which time soviet democracy would have been consolidated and ready to protect itself.

Even if we assume that Kronstadt had survived until the ice melted while Petrograd remained under Bolshevik dictatorship it, again, is doubtful that it would have been the basis for renewed White attacks. Neither Wrangel's troops nor foreign government forces would have been welcomed by Red Kronstadt. While non-military aid would have been welcome (i.e. food supplies and so on), it is hard to believe that the Conference of Delegates would have allowed troops to arrive or pass them by to attack Petrograd. Simply put, the Kronstadters were fighting for soviet power and were well aware that others may try to support the revolt for their own, anti-revolutionary, reasons (see section 7).

So it seems that the possibility of foreign intervention was not a real threat at the time. The arguments of Lenin at the time, plus the demobilisation of the Red Army, points in that direction. Moreover, the total lack of response by Western governments during the revolt indicates that they were unlikely to take advantage of continuing unrest in Kronstadt, Petrograd and other towns and cities. Their working classes, sick of war and class consciousness enough to resist another intervention in Russia, would have been a factor in this apathetic response. Wrangel's troops, as the Bolsheviks were aware, were not a threat.

The only real threat to Bolshevik power was internal — from the workers and peasants the Bolsheviks claimed to be representing. Many of the ex-soldiers swelled the ranks of peasant guerrilla forces, fighting the repressive (and counter-productive) food collection squads. In the Ukraine, the Bolsheviks were fighting the remnants of the Makhnovist army (a fight, incidentally, brought upon the Bolsheviks by themselves as they had betrayed the agreements made with the anarchist forces and attacked them once Wrangel had been defeated).

Thus the only potential danger facing the “soviet power” (i.e. Bolshevik power) was soviet democracy, a danger which had existed since the October revolution. As in 1918, when the Bolsheviks disbanded and repressed any soviet electorate which rejected their power, they met the danger of soviet democracy with violence. The Bolsheviks were convinced that their own dictatorship was equivalent to the revolution and that their power was identical to that of the working class. They considered themselves to be the embodiment of “soviet power” and it obviously did not bother them that the demand for free soviets can hardly be considered as actions against the power of the soviets.

In such circumstances, the Bolshevik government viewed the Kronstadt re-

volt **not** as socialists should but rather as a ruling class. It was suppressed for “reasons of state” and not to defend a revolutionary regime (which was, by this stage, revolutionary in name only). As Bakunin had argued decades before, the “workers’ state” would not remain controlled by the workers for long and would soon become a dictatorship **over** the proletariat by an elite which claimed to know the interests of the working class better than they did themselves (see section 15).

The only possible justification for maintaining the party dictatorship was the argument that soviet democracy would have lead to the defeat of the Communists at the polls (which would mean recognising it was a dictatorship **over** the proletariat and had been for some time). This would, it is argued, have resulted in (eventually) a return of the Whites and an anti-working class dictatorship that would have slaughtered the Russian workers and peasants en mass.

Such a position is self-serving and could have been used by Stalin to justify **his** regime. Unsurprisingly enough, the Hungarian Stalinists argued after crushing the 1956 revolution that “*the dictatorship of the proletariat, if overthrown, cannot be succeeded by any form of government other than fascist counter-revolution.*” [quoted by Andy Anderson, **Hungary ’56**, p. 101] And, of course, an even more anti-working class dictatorship than Lenin’s did appear which did slaughter the Russian workers and peasants en mass, namely Stalinism. No other option was possible, once party dictatorship was fully embraced in 1921 (repression against dissidents was **more** extreme after the end of the Civil War than during it). It is utopian in the extreme to believe that the good intentions of the dictators would have been enough to keep the regime within some kind of limits. Thus this argument is flawed as it seriously suggests that dictatorship and bureaucracy can reform itself (we discuss this in more detail in section 13).

12 Was the country too exhausted to allow soviet democracy?

Trotskyists have, in general, two main lines of attack with regards the Kronstadt revolt. The main one is the claim that the garrison in 1921 was not of the same class composition as the one in 1917. This meant that the 1921 revolt expressed the peasant counter-revolution and had to be destroyed. We have indicated that, firstly, the garrison was essentially the same in 1921 as it had been in 1917 (see section 8). Secondly, we have shown that politically the ideas expressed in its program were the same as those in 1917 (see section 9). Thirdly, that this program had many of the same points as strikers resolutions in Petrograd and, indeed, were **more** socialist in many cases by clearly calling for soviet democracy rather the constituent assembly (see section 4).

Now we turn to the second excuse, namely that the country was too exhausted and the working class was decimated. In such circumstances, it is argued, objective conditions meant that soviet democracy was impossible and so the Bolsheviks had to maintain their dictatorship at all costs to defend what was left of the revolution. Leninist Pat Stack of the British SWP is typical of this approach. It is worth quoting him at length:

“Because anarchists dismiss the importance of material reality, events

such as the 1921 Kronstadt rising against the Bolshevik government in Russia can become a rallying cry. The revolutionary Victor Serge was not uncritical of the Bolshevik handling of the rising, but he poured scorn on anarchist claims for it when he wrote, 'The third revolution it was called by certain anarchists whose heads were stuffed by infantile delusions.'

"This third revolution, it was argued, would follow the first one in February 1917 and the second in October. The second had swept away the attempts to create capitalist power, had given land to the peasants and had extracted Russia from the horrible imperialist carnage of the First World War. The revolution had introduced a huge literacy programme, granted women abortion rights, introduced divorce and accepted the rights of the various Russian republics to self-determination. It had done so, however, against a background of a bloody and horrendous civil war where the old order tried to regain power. Sixteen imperialist powers sent armies against the regime, and trade embargoes were enforced.

"The reality of such actions caused huge suffering throughout Russia. The regime was deprived of raw materials and fuel, transportation networks were destroyed, and the cities began running out of food. By 1919 the regime only had 10 percent of the fuel that was available in 1917, and the production of iron ore in the same year stood at 1.6 percent of that in 1914. By 1921 Petrograd had lost 57 percent of its population and Moscow 44.5 percent. Workers were either dead, on the frontline of the civil war, or were fleeing the starvation of the city. The force that had made the revolution possible was being decimated. . .

"The choice facing the regime in Russia was either to crush the uprising and save the revolution, or surrender to the rising and allow the forces of reaction to march in on their back. There was no material basis for a third way. A destroyed economy and infrastructure, a population faced with starvation and bloody war, and a hostile outside world were not circumstances in which the revolution could move forward. Great efforts would have to be made to solve these problems. There were no overnight solutions and preserving the revolutionary regime was crucial. Ultimately real solutions could only be found if the revolution were to spread internationally, but in the meantime to have any chance of success the regime had to survive. Only the right and the imperialist powers would have benefited from its destruction." ["Anarchy in the UK?", **Socialist Review**, no. 246, November 2000]

Anarchists, in spite of Stack's assertions, were and are well aware of the problems facing the revolution. Alexander Berkman (who was in Petrograd at the time) pointed out the "[l]ong years of war, revolution, and civil struggle" which "had bled Russia to exhaustion and brought her people to the brink of despair." [**The Russian Tragedy**, p. 61] Like every worker, peasant, sailor and soldier in Russia, anarchists knew (and know) that reconstruction would not take place "overnight." The Kronstadters' recognised this in the first issue

of their newspaper **Izvestiia**:

“Comrades and citizens, our country is passing through a tough time. For three years now, famine, cold and economic chaos have trapped us in a vice-like grip. The Communist Party which governs the country has drifted away from the masses and proved itself powerless to rescue them from a state of general ruination . . . All workers, sailors and Red soldiers today can clearly see that only concentrated efforts, only the concentrated determination of the people can afford the country bread, wood and coal, can clothe and shoe the people and rescue the Republic from the impasse in which it finds itself.” [cited in **No Gods, No Masters**, vol. 2, p. 183]

In the Kronstadt **Izvestiia** of March 8 they wrote that it was “*here in Kronstadt that the foundation stone was laid of the Third Revolution that will smash the last shackles on the toiler and open up before him the broad new avenue to socialist construction.*” They stress that the “*new revolution will rouse the toiling masses of the Orient and Occident. For it will offer the example of fresh socialist construction as opposed to mechanical, governmental ‘Communist’ construction.*” [**Op. Cit.**, p. 194] Clearly, the Kronstadt rebels knew that construction would take time and were arguing that the only means of rebuilding the country was via the participation of what of left of the working class and peasantry in free class organisations like freely elected soviets and unions.

The experience of the revolt provides evidence that this analysis was far from “utopian.” A Finish reporter at Kronstadt was struck by the “*enthusiasm*” of its inhabitants, by their renewed sense of purpose and mission. Avrich argues that for a “*fleeting interval Kronstadt was shaken out of its listlessness and despair.*” [**Kronstadt**, p. 159] The sailors, soldiers and civilians sent their delegates to delegates, started to re-organise their trade unions and so on. Freedom and soviet democracy was allowing the masses to start to rebuild their society and they took the opportunity. The Kronstadter’s faith in “*direct mass democracy of and by the common people through free soviets*” did seem to be justified in the response of the people of Kronstadt. This suggests that a similar policy implemented by the workers who had just organised general strikes, demonstrations and protest meetings all across Russia’s industrial centres was not impossible or doomed to failure.

Indeed, this wave of strikes refutes Stack’s claim that “[w]orkers were either dead, on the frontline of the civil war, or were fleeing the starvation of the city. The force that had made the revolution possible was being decimated.” Clearly, a sizeable percentage of the workers were still working and so not dead, on the frontline or fleeing the cities. As we discuss below, approximately one-third of factory workers were still in Petrograd (the overall decrease of urban working people throughout Russia exceeded 50 percent [Avrich, **Op. Cit.**, p. 24]). The working class, in other words, still existed and were able to organise strikes, meetings and mass demonstrations in the face of state repression. The fact, of course, is that the majority of what remained of the working class would not have voted Communist in free soviet elections. Thus political considerations have to be factored in when evaluating Stack’s arguments.

The question for anarchists, as for the Kronstadt rebels, was what the necessary pre-conditions for this reconstruction were. Could Russia be re-built in

a socialist way while being subject to a dictatorship which crushed every sign of working class protest and collective action? Surely the first step, as Kronstadt shows, would have to be the re-introduction of workers' democracy and power for only this would give allow expression to the creative powers of the masses and interest them in the reconstruction of the country. Continuing party dictatorship would never do this:

“by its very essence a dictatorship destroys the creative capacities of a people... The revolutionary conquest could only be deepened through a genuine participation of the masses. Any attempt to substitute an ‘elite’ for those masses could only be profoundly reactionary.

“In 1921 the Russian Revolution stood at the cross roads. The democratic or the dictatorial way, that was the question. By lumping together bourgeois and proletarian democracy the Bolsheviks were in fact condemning both. They sought to build socialism from above, through skilful manoeuvres of the Revolutionary General Staff. While waiting for a world revolution that was not round the corner, they built a state capitalist society, where the working class no longer had the right to make the decisions most intimately concerning it.”
[Mett, **Op. Cit.**, pp. 82–3]

The Russian revolution had faced economic crisis all through 1917 and 1918. Indeed, by the spring of 1918 Russia was living through an almost total economic collapse, with a general scarcity of all resources and mass unemployment. According to Tony Cliff (the leader of the SWP) in the spring of 1918 Russia's “[w]ar-damaged industry continued to run down. ‘The bony hand of hunger’ . . . gripped the whole population . . . One of the causes of the famine was the breakdown of transport. . . Industry was in a state of complete collapse. Not only was there no food to feed the factory workers; there was no raw materials or fuel for industry. The oilfields of the Baku, Grozny and Emba regions came to a standstill. The situation was the same in the coalfields. The production of raw materials was in no better a state . . . The collapse of industry meant unemployment for the workers.” [Lenin: **The Revolution Besieged**, vol. 3, pp. 67–9] The industrial workforce dropped to 40% of its 1917 levels. The similarities to Stack's description of the situation in early 1921 is striking.

Does this mean that, for Leninists, soviet democracy was impossible in early 1918 (of course, the Bolsheviks **in practice** were making soviet democracy impossible by suppressing soviets that elected the wrong people)? After all, in the start of 1918 the Russian Revolution also faced a “*destroyed economy and infrastructure, a population faced with starvation and bloody war, and a hostile outside world.*” If these “*were not circumstances in which the revolution could move forward*” then it also applied in 1918 as well as in 1921. And, if so, then this means admitting that soviet democracy is impossible during a revolution, marked as it will always be marked by exceptionally difficult circumstances. Which, of course, means to defend party power and not soviet power and promote the dictatorship of the party over the working class, positions Leninists deny holding.

Incredibly, Stack fails to even mention the power and privileges of the bureaucracy at the time. Officials got the best food, housing and so on. The lack of effective control or influence from below ensured that corruption was

widespread. One of the leaders of the Workers' Opposition gives us an insight of the situation which existed at the start of 1921:

“The rank and file worker is observant. He sees that so far . . . the betterment of the workers' lot has occupied the last place in our policy . . . We all know that the housing problem cannot be solved in a few months, even years, and that due to our poverty, its solution is faced with serious difficulties. But the facts of ever-growing inequality between the privileged groups of the population in Soviet Russia and the rank and file workers, ‘the frame-work of the dictatorship’, breed and nourish the dissatisfaction.

*“The rank and file worker sees how the Soviet official and the practical man lives and how he lives . . . [It will be objected that] ‘We could not attend to that; pray, there was the military front.’ And yet whenever it was necessary to make repairs to any of the houses occupied by the Soviet institutions, they were able to find both the materials and the labour.” [Alexandra Kollontai, **The Workers' Opposition**, p. 10]*

A few months earlier, the Communist Yoffe wrote to Trotsky expressing the same concerns. *“There is enormous inequality,”* he wrote, *“and one's material position largely depends on one's post in the party; you'll agree that this is a dangerous situation.”* [quoted by Orlando Figes, **A People's Tragedy**, p. 695] To talk about anarchists dismissing the importance of material reality and a *“revolutionary regime”* while ignoring the inequalities in power and wealth, and the bureaucratisation and despotism which were their root, is definitely a case of the pot calling the kettle black!

Under the harsh material conditions facing Russia at the time, it goes without saying that the bureaucracy would utilise its position to gather the best resources around it. Indeed, part of the factors resulting in Kronstadt was *“the privileges and abuses of commissars, senior party functionaries and trade union officials who received special rations, allocations and housing and . . . quite openly enjoying the good life.”* [Getzler, **Op. Cit.**, p. 210] Stack fails to mention this and instead talks about the necessity of defending a “workers' state” in which workers had no power and where bureaucratic abuses were rampant. If anyone is denying reality, it is him! Thus Ciliga:

*“The Soviet Government and the higher circles in the Communist Party applied their own solution [to the problems facing the revolution] of **increasing the power of the bureaucracy**. The attribution of powers to the ‘Executive Committees’ which had hitherto been vested in the soviets, the replacement of the dictatorship of the class by the dictatorship of the party, the shift of authority even within the party from its members to its cadres, the replacement of the double power of the bureaucracy and the workers in the factory by the sole power of the former — to do all this was to ‘save the Revolution!’ [...] The Bureaucracy prevented the bourgeois restoration . . . by eliminating the proletarian character of the revolution.” [Op. Cit., p. 331]*

Perhaps, in light of this, it is significant that, in his list of revolutionary gains from October 1917, Stack fails to mention what anarchists would consider the most important, namely workers' power, freedom, democracy and rights. But, then again, the Bolsheviks did not rate these gains highly either and were more than willing to sacrifice them to ensure their most important gain, state power (see section 15 for a fuller discussion of this issue). Again, the image of revolution gains a victory over its content!

When Stack argues that it was necessary to crush Kronstadt to “*save the revolution*” and “*preserv[e] the revolutionary regime*” we feel entitled to ask what was there left to save and preserve? The dictatorship and decrees of “Communist” leaders? In other words, party power. Yes, by suppressing Kronstadt Lenin and Trotsky saved the revolution, saved it for Stalin. Hardly something to be proud of.

Ironically, given Stack's assertions that anarchists ignore “*material reality*”, anarchists had predicted that a revolution would be marked by economic disruption. Kropotkin, for example, argued that it was “*certain that the coming Revolution . . . will burst upon us in the middle of a great industrial crisis . . . There are millions of unemployed workers in Europe at this moment. It will be worse when Revolution has burst upon us . . . The number of the out-of-works will be doubled as soon as barricades are erected in Europe and the United States . . . we know that in time of Revolution exchange and industry suffer most from the general upheaval . . . A Revolution in Europe means, then, the unavoidable stoppage of at least half the factories and workshops.*” He stressed that there would be “*the complete disorganisation*” of the capitalist economy and that during a revolution “[i]nternational commerce will come to a standstill” and “*the circulation of commodities and of provisions will be paralysed.*” [**The Conquest of Bread**, pp. 69–70 and p. 191]

Elsewhere, he argued that a revolution would “*mean the stoppage of hundreds of manufactories and workshops, and the impossibility of reopening them. Thousands of workmen will find no employment . . . The present want of employment and misery will be increased tenfold.*” He stressed that “*the reconstruction of Society in accordance with more equitable principles will necessitate a disturbed period*” and argued that any revolution will be isolated to begin with and so (with regards to the UK) “*the imports of foreign corn will decrease*” as will “*exports of manufactured wares.*” A revolution, he argued, “*is not the work of one day. It means a whole period, mostly lasting for several years, during which the country is in a state of effervescence.*” To overcome these problems he stressed the importance of reconstruction from the bottom up, organised directly by working people, with local action being the basis of wider reconstruction. The “*immense problem — the re-organisation of production, redistribution of wealth and exchange, according to new principles — cannot be solved by . . . any kind of government. It must be a natural growth resulting from the combined efforts of all interested in it, freed from the bonds of the present institutions. It must grow naturally, proceeding from the simplest up to complex federations; and it cannot be something schemed by a few men and ordered from above. In this last shape it surely would have no chance of living at all.*” [**Act for Yourselves**, pp. 71–2, p. 67, pp. 72–3, pp. 25–6 and p. 26]

Anarchists had predicted the problems facing the Russian Revolution decades previously and, given the lack of success of Bolshevik attempts to solve these problems via centralism, had also predicted the only way to solve them. Far

from ignoring “*material reality*” it is clear that anarchists have long been aware of the difficulties a revolution would face and had organised our politics around them. In contrast, Stack is arguing that these inevitable effects of a revolution create “*circumstances*” in which the revolution cannot “*move forward*”! If this is so, then revolution is an impossibility as it will always face economic disruption and isolation at some stage in its development, for a longer or shorter period. If we base our politics on the “best-case scenario” then they will soon be proven to be lacking.

Ultimately, Stack’s arguments (and those like it) are the ones which ignore “*material reality*” by arguing that Lenin’s state was a “*revolutionary regime*” and reconstruction could be anything but to the advantage of the bureaucracy without the active participation of what was left of the working class. Indeed, the logic of his argument would mean rejecting the idea of socialist revolution **as such** as the problems he lists will affect **every** revolution and had affected the Russian Revolution from the start.

The problems facing the Russian working class were difficult in the extreme in 1921 (some of which, incidentally, were due to the results of Bolshevik economic policies which compounded economic chaos via centralisation), but they could never be solved by someone else bar the thousands of workers taking strike action all across Russia at the time: “*And if the proletariat was that exhausted how come it was still capable of waging virtually total general strikes in the largest and most heavily industrialised cities?*” [Ida Mett, **Op. Cit.**, p. 81]

So, as far as “*material reality*” goes, it is clear that it is Stack who ignores it, not anarchists or the Kronstadt rebels. Both anarchists and Kronstadters recognised that the country was in dire straits and that a huge effort was required for reconstruction. The material basis at the time offered two possibilities for reconstruction — either from above or from below. Such a reconstruction could **only** be socialist in nature if it involved the direct participation of the working masses in determining what was needed and how to do it. In other words, the process had to start **from below** and no central committee utilising a fraction of the creative powers of the country could achieve it. Such a bureaucratic, top-down re-construction would rebuild the society in a way which benefited a few. Which, of course, was what happened.

John Rees joins his fellow party member by arguing that the working class base of the workers’ state had “*disintegrated*” by 1921. The working class was reduced “*to an atomised, individualised mass, a fraction of its former size, and no longer able to exercise the collective power that it had done in 1917.*” The “*bureaucracy of the workers’ state was left suspended in mid-air, its class base eroded and demoralised.*” He argues that Kronstadt was “*utopian*” as “*they looked back to the institutions of 1917 when the class which made such institutions possible no longer had the collective capacity to direct political life.*” [Rees, **Op. Cit.**, p. 65 and p. 70]

There are two problems with this kind of argument. Firstly, there are factual problems with it. Second, there are ideological problems with it. We will discuss each in turn.

The factual problems are clear. All across Russia in February 1921 the Russian working class were going on strike, organising meetings and demonstrations. In other words, **taking collective action** based on demands collectively agreed in workplace meetings. One factory would send delegates to others, urging them to join the movement which soon became a general strike in Petrograd

and Moscow. In Kronstadt, workers, soldiers and sailors went the next step and organised a delegate conference. In other places they tried to do so, with various degrees of success. During the strikes in Petrograd “*workers from various plants elected delegates to the Petrograd Assembly of Plenipotentiaries*” which raised similar demands as that of Kronstadt. Its activities and other attempts to organise collectively were obviously hindered by the fact the Cheka arrested “*all delegates to other enterprises*” the strikers sent. Brovkin states that following the example of Petrograd, “*workers in some cities set up assemblies of plenipotentiaries*” as well. In Saratov “*such a council grew out of a strike co-ordination committee.*” [V. Brovkin, **Behind the Lines of the Russian Civil War**, p. 393, p. 396 and p. 398]

Any claim that the Russian working class had no capacity for collective action seems invalidated by such events. Not that Rees is not unaware of these strikes. He notes that the Kronstadt revolt was “*preceded by a wave of serious but quickly resolved strikes.*” [Op. Cit., p. 61] An “*atomised, individualised mass*” which was “*no longer able to exercise the collective power*” being able to conduct a “*wave of serious . . . strikes*” all across Russia? That hardly fits. Nor does he mention the repression which “*quickly resolved*” the strikes and which, by its very nature, atomised and individualised the masses in order to break the collective action being practised.

The fact that these strikes did not last longer of course suggests that the strikers could not sustain this activity indefinitely. However, this was more a product of state repression and the lack of rations while on strike than any objectively predetermined impossibility of collective decision making. The workers may have been too exhausted to wage indefinite general strikes against a repressive state but that does not imply they could not practice continual collective decision making in less extreme circumstances in a soviet democracy.

Of course, these striking workers would have been unlikely to voted Communist en masse if free soviet elections were organised (in Kronstadt, Communists made up one-third of the conference of delegates). Thus there were pressing **political** reasons to deny free elections rather than an objective impossibility. Moreover, the actions of the Soviet state were designed to break the collective resistance of the working force. The use of armed patrols on the streets and in the factories, and the closing and re-registration of an enterprise labour force were designed to break the strike and atomise the workforce. These actions would not have been needed if the Russian working class was, in fact, atomised and incapable of collective action and decision making.

The size of the working class in 1921 **was** smaller in 1921 than it was in 1917. However, the figures for May 1918 and 1920 were nearly identical. In 1920, the number of factory workers in Petrograd was 148,289 (which was 34% of the population and 36% of the number of workers in 1910). [Mary McAuley, **Op. Cit.**, p. 398] In January 1917, the number was 351,010 and in April 1918, it was 148,710. [S.A. Smith, **Red Petrograd**, p. 245] Thus factory worker numbers were about 40% of the pre-Civil War number and remained so throughout the Civil War. A proletarian core remained in every industrial town or city in Russia.

Nor was this work force incapable of collective action or decision making. All through the civil war they organised strikes and protests for specific demands (and faced Bolshevik repression for so doing). In March 1919, for example, tens of thousands of workers went on strike in Petrograd. The strikes were broken

by troops. Strikes regularly occurred throughout 1919 and 1920 (and, again, usually met with state repression). In 1921, the strike wave resurfaced and became near general strikes in many cities, including Petrograd and Moscow (see section 2). If the workers could organise strikes (and near general strikes in 1921), protest meetings and committees to co-ordinate their struggles, what could stop them starting to manage their own destinies? Does soviet democracy become invalid once a certain number of workers is reached?

Given that Rees gets the key slogan of Kronstadt wrong (they called for all power to the soviets and not to parties rather than Rees' "*soviets without parties*") it is hard to evaluate whether Rees claims that without Bolshevik dictatorship the Whites would inevitably have taken power. After all, the Kronstadt delegate meeting had one-third Communists in it. Ultimately, he is arguing that working people cannot manage their own fates themselves without it resulting in a counter-revolution!

In addition, the logic of Rees' argument smacks of double-think. On the one hand, he argues that the Bolsheviks represented the "*dictatorship of the proletariat*." On the other hand, he argues that free soviet elections would have seen the Bolsheviks replaced by "*moderate socialists*" (and eventually the Whites). In other words, the Bolsheviks did not, in fact, represent the Russian working class and their dictatorship was **over**, not **of**, the proletariat. The basic assumption, therefore, is flawed. Rees and his fellow Trotskyists seriously want us to believe that a dictatorship will not become corrupt and bureaucratic, that it can govern in the interests of its subjects and, moreover, reform itself. And he calls the Kronstadters "*utopians*"!

Given these factors, perhaps the real reason for the lack of soviet democracy and political freedom and rights was that the Bolsheviks knew they would lose any free elections that would be held? As we noted in section 2, they had not been shy in disbanding soviets with non-Bolshevik majorities before the start of the civil war nor in suppressing strikes and workers' protests before, during and after the Civil War. In effect, the Bolsheviks would exercise the dictatorship of the proletariat over and above the wishes of that proletariat if need be (as Trotsky made clear in 1921 at the Tenth Party Congress). Thus the major factor restricting soviet democracy was Bolshevik power — this repressed working class collective action which promoted atomisation in the working class and the unaccountability of the Bolshevik leadership. The bureaucracy was "*left suspended in mid-air*" simply because the majority of the workers and peasants did not support it and when they protested against the party dictatorship they were repressed.

Simply put, objective factors do not tell the whole story.

Now we turn to these objective factors, the economic breakdown affecting Russia in 1921. This is the basis for the ideological problem with Rees' argument.

The ideological problem with this argument is that both Lenin and Trotsky had argued that revolution inevitably implied civil war, "*exceptional circumstances*" and economic crisis. For example, in **Terrorism and Communism** Trotsky argued that "[a]ll periods of transition have been characterised by . . . *tragic features*" of an "*economic depression*" such as exhaustion, poverty and hunger. Every class society "*is violently swept off [the arena] by an intense struggle, which immediately brings to its participants even greater privations and sufferings than those against which they rose.*" He gave the example of the

French Revolution “which attained its titanic dimensions under the pressure of the masses exhausted with suffering, itself deepened and rendered more acute their misfortunes for a prolonged period and to an extraordinary extent.” He asked: “Can it be otherwise?” [**Terrorism and Communism**, p. 7]

Indeed, he stressed that “revolutions which drag into their whirlpool millions of workers” automatically affect the “economic life of the country.” By “[d]ragging the mass of the people away from labour, drawing them for a prolonged period into the struggle, thereby destroying their connection with production, the revolution in all these ways strikes deadly blows at economic life, and inevitably lowers the standard which it found at its birth.” This affects the socialist revolution as the “more perfect the revolution, the greater are the masses it draws in; and the longer it is prolonged, the greater is the destruction it achieves in the apparatus of production, and the more terrible inroads does it make upon public resources. From this there follows merely the conclusion which did not require proof — that a civil war is harmful to economic life.” [**Ibid.**]

Lenin in 1917 argued the similarly, mocking those who argued that revolution was out of the question because “the circumstances are exceptionally complicated.” He noting that any revolution, “in its development, would give rise to exceptionally complicated circumstances” and that it was “the sharpest, most furious, desperate class war and civil war. Not a single great revolution in history has escaped civil war. No one who does not live in a shell could imagine that civil war is conceivable without exceptionally complicated circumstances. If there were no exceptionally complicated circumstances there would be no revolution.” [**Will the Bolsheviks Maintain Power?**, p. 80 and p. 81]

A few months early, Lenin argues that “[w]hen unavoidable disaster is approaching, the most useful and indispensable task confronting the people is that of organisation. Marvels of proletarian organisation — this is our slogan at the present, and shall become our slogan and our demand to an even greater extent, when the proletariat is in power. . . . There are many such talents [i.e. organisers] among the people. These forces lie dormant in the peasantry and the proletariat, for lack of application. They must be mobilised from below, by practical work . . .” [**The Threatening Catastrophe and how to avoid it**, pp. 49–50]

The problem in 1921 (as during the war), of course, was that when the proletariat **did** organise itself, it was repressed as counterrevolutionary by the Bolsheviks. The reconstruction from below, the organisation of the proletariat, automatically came into conflict with party power. The workers and peasants could not act because soviet and trade union democracy would have ended Bolshevik dictatorship.

Therefore, Rees’ and Stack’s arguments fail to convince. As noted, their ideological gurus clearly argued that revolution without civil war and economic exhaustion was impossible. Sadly, the means to mitigate the problems of Civil War and economic crisis (namely workers’ self-management and power) inevitably came into conflict with party power and could not be encouraged. If Bolshevism cannot meet the inevitable problems of revolution and maintain the principles it pays lip-service to (i.e. soviet democracy and workers’ power) then it clearly does not work and should be avoided.

Stack’s and Rees’ argument, in other words, represents the bankruptcy of Bolshevik ideology rather than a serious argument against the Kronstadt revolt.

13 Was there a real alternative to Kronstadt's "third revolution"?

Another Trotskyist argument against Kronstadt and in favour of the Bolshevik repression is related to the country was exhausted argument we discussed in the last section. It finds its clearest expression in Victor Serge's argument:

"the country was exhausted, and production practically at a standstill; there was no reserves of any kind, not even reserves of stamina in the hearts of the masses. The working-class elite that had been moulded in the struggle against the old regime was literally decimated. The Party, swollen by the influx of power-seekers, inspired little confidence . . . Soviet democracy lacked leadership, institutions and inspiration . . .

"The popular counter-revolution translated the demand for freely-elected soviets into one for 'Soviets without Communists.' If the Bolshevik dictatorship fell, it was only a short step to chaos, and through chaos to a peasant rising, the massacre of the Communists, the return of the emigres, and in the end, through the sheer force of events, another dictatorship, this time anti-proletarian." [Memoirs of a Revolutionary, pp. 128-9]

Serge supported the Bolsheviks, considering them as the only possible means of defending the revolution. Some modern day Leninists follow this line of reasoning and want us to believe that the Bolsheviks were defending the remaining gains of the revolution. What gains, exactly? The only gains that remained were Bolshevik power and nationalised industry — both of which excluded the real gains of the Russian Revolution (namely soviet power, the right to independent unions and to strike, freedom of assembly, association and speech for working people, the beginnings of workers' self-management of production and so on). Indeed, both "gains" were the basis for the Stalinist bureaucracy's power.

Anarchists and libertarian Marxists who defend the Kronstadt revolt and oppose the actions of the Bolsheviks are not foolish enough to argue that Kronstadt's "third revolution" would have definitely succeeded. Every revolution is a gamble and may fail. As Ante Ciliga correctly argues:

"Let us consider, finally, one last accusation which is commonly circulated: that action such as that at Kronstadt could have indirectly let loose the forces of the counter-revolution. It is possible indeed that even by placing itself on a footing of workers' democracy the revolution might have been overthrown; but what is certain is that it has perished, and that it has perished on account of the policy of its leaders. The repression of Kronstadt, the suppression of the democracy of workers and soviets by the Russian Communist party, the elimination of the proletariat from the management of industry, and the introduction of the NEP, already signified the death of the Revolution." [Op. Cit., p. 335]

No revolution is guaranteed to succeed. The same with Kronstadt's "Third Revolution." Its call for soviet power may have lead to defeat via renewed

intervention. That is possible — just as it was possible in 1917. One thing is sure, by maintaining the Bolshevik dictatorship the Russian Revolution **was** crushed.

The only alternative to the “*third revolution*” would have been self-reform of the party dictatorship and, therefore, of the soviet state. Such an attempt was made after 1923 by the **Left Opposition** (named “*Trotskyist*” by the Stalinists because Trotsky was its main leader). John Rees discusses the **Left Opposition**, arguing that “*without a revival of struggle in Russia or successful revolution elsewhere*” it “*was doomed to failure.*” [Op. Cit., p. 68] Given the logic of Serge’s arguments, this is the only option left for Leninists.

How viable was this alternative? Could the soviet dictatorship reform itself? Was soviet democracy more of a danger than the uncontrolled dictatorship of a party within a state marked by already serious levels of corruption, bureaucracy and despotism? History provides the answer with the rise of Stalin.

Unfortunately for the **Left Opposition**, the bureaucracy had gained experience in repressing struggle in breaking the wave of strikes in 1921 and crushing the Kronstadt rebellion. Indeed, Rees incredulously notes that by 1923 “*the well-head of renewal and thorough reform — the activity of the workers — had dried to a trickle*” and yet does not see that this decline was aided by the example of what had happened to Kronstadt and the repression of the 1921 strike wave. The **Left Opposition** received the crop that Lenin and Trotsky sowed the seeds of in 1921.

Ironically, Rees argues that the Stalinist bureaucracy could betray the revolution without “*an armed counter-revolutionary seizure of power*” (and so “*no martial law, no curfew or street battles*”) because of “*the atomisation of the working class.*” However, the atomisation was a product of the armed counter-revolutionary activities of Lenin and Trotsky in 1921 when they broke the strikes and crushed Kronstadt by means of martial law, curfew and street battles. The workers had no interest in which branch of the bureaucracy would govern and exploit them and so remained passive. Rees fails to see that the Stalinist coup simply built upon the initial counter-revolution of Lenin. There **was** martial law, curfew and street battles but they occurred in 1921, not 1928. The rise of Stalinism was the victory of one side of the new bureaucratic class over another but that class had defeated the working class in March 1921.

As for the idea that an external revolution could have regenerated the Soviet bureaucracy, this too was fundamentally utopian. In the words of Ida Mett:

“Some claim that the Bolsheviks allowed themselves such actions (as the suppression of Kronstadt) in the hope of a forthcoming world revolution, of which they considered themselves the vanguard. But would not a revolution in another country have been influenced by the spirit of the Russian Revolution? When one considers the enormous moral authority of the Russian Revolution throughout the world one may ask oneself whether the deviations of this Revolution would not eventually have left an imprint on other countries. Many historical facts allow such a judgement. One may recognise the impossibility of genuine socialist construction in a single country, yet have doubts as to whether the bureaucratic deformations of the Bolshevik regime would have been straightened out by the winds coming from revolutions in other countries.” [Op. Cit., p. 82]

The Bolsheviks had already been manipulating foreign Communist Parties in the interests of their state for a number of years. That is part of the reason why the Left-Communists around Pannekoek and Gorter broke with the Third International later in 1921. Just as the influence of Lenin had been a key factor in fighting the anti-Parliamentarian and libertarian communist tendencies in Communist Parties all across the world, so the example and influence of the Bolsheviks would have made its impact on any foreign revolution. The successful revolutionaries would have applied such “lessons” of October such as the dictatorship of the proletariat being impossible without the dictatorship of the communist party, centralism, militarisation of labour and so on. This would have distorted any revolution from the start (given how obediently the Communist Parties around the world followed the insane policies of Stalinism, can we doubt this conclusion?).

Not that the Left Opposition’s political platform could have saved the revolution. After all, it was utopian in that it urged the party and state bureaucracy to reform itself as well as contradictory. It did not get at the root of the problem, namely Bolshevik ideology. The theoretical limitations of the “Left Opposition” can be found in more detail in section 3 of the appendix on “Were any of the Bolshevik oppositions a real alternative?”. Here we will restrict ourselves to looking at **The Platform of the Opposition** written in 1927 (unless otherwise specified all quotes come from this document).

It urged a “consistent development of a workers’ democracy in the party, the trade unions, and the soviets” and to “convert the urban soviets into real institutions of proletarian power.” It states that “Lenin, as long ago as in the revolution of 1905, advanced the slogan of soviets as organs of the democratic dictatorship of the proletariat and the peasants.” The Kronstadt sailors argued the same, of course, and were branded “White Guardists” and “counter-revolutionary”. At the same time as this call for democracy, we find affirmation of the “Leninist principle” (“inviolable for every Bolshevik”) that “the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.” It repeats the principle by mentioning that “the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry.” It stresses that a “split in our party, the formation of two parties, would represent an enormous danger to the revolution.” This was because:

“Nobody who sincerely defends the line of Lenin can entertain the idea of ‘two parties’ or play with the suggestion of a split. Only those who desire to replace Lenin’s course with some other can advocate a split or a movement along the two-party road.

“We will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a single party. It demands a proletarian party — that is, a party whose policy is determined by the interests of the proletariat and carried out by a proletarian nucleus. Correction of the line of our party, improvement of its social composition — that is not the two-party road, but the strengthening and guaranteeing of its unity as a revolutionary party of the proletariat.”

We can note, in passing, the interesting notion of party (and so “proletarian” state) policy “*determined by the interests of the proletariat and carried out by a proletarian nucleus*” but which is **not** determined **by** the proletariat itself. Which means that the policy of the “workers’ state” must be determined by some other (unspecified) group and not by the workers. What possibility can exist that this other group actually knows what is in the interests of the proletariat? None, of course, as any form of democratic decision can be ignored when those who determine the policy consider the protests of the proletariat to be not “*in the interests of the proletariat.*”

This was the opinion of Trotsky, who argued against the Workers’ Opposition faction of the Communist Party who urged re-introducing some elements of democracy at the Tenth Party Conference at the time of the Kronstadt uprising (while, of course, keeping the Communist Party dictatorship intact). As he put it, they “*have come out with dangerous slogans. They have made a fetish of democratic principles. They have placed the workers’ right to elect representatives above the party. As if the Party were not entitled to assert its dictatorship even if that dictatorship clashed with the passing moods of the workers’ democracy!*” He continued by stating that the “*Party is obliged to maintain its dictatorship . . . regardless of temporary vacillations even in the working class . . . The dictatorship does not base itself at every moment on the formal principle of a workers’ democracy.*” [quoted by M. Brinton, **The Bolsheviks and Workers’ Control**, p. 78]

Thus the call for democracy is totally annulled by other arguments in the Platform, arguments which logically eliminates democracy and results in such acts as the repression of Kronstadt (see section 15).

The question, of course, arises as to how democracy can be introduced in the soviets and unions when party dictatorship is essential for the “*realisation*” of the “proletarian” dictatorship and there can only be **one** party? What happens if the proletariat vote for someone else (as they did in Kronstadt)? If “proletarian” dictatorship is impossible without the dictatorship of the party then, clearly, proletarian democracy becomes meaningless. All the workers would be allowed to do would be to vote for members of the same party, all of whom would be bound by party discipline to carry out the orders of the party leadership. Power would rest in the party hierarchy and definitively **not** in the working class, its unions or its soviets (both of which would remain mere fig-leaves for party rule). Ultimately, the only guarantee that the party dictatorship would govern in the interests of the proletariat would be the good intentions of the party. However, being unaccountable to the masses, such a guarantee would be worthless — as history shows.

Kronstadt is the obvious end result of such politics. The starting point was the disbanding of soviets which had been elected with a majority of “wrong” parties (as the Bolsheviks did in early 1918, **before** the start of the civil war). While the Platform may be useful as an expression of the usual Leninist double-think on the “workers’ state”, its practical suggestions are useless. Unlike the Kronstadt Platform, it was doomed to failure from the start. The new bureaucratic class could only be removed by a “third revolution” and while this, possibly, could have resulted in a bourgeois counter-revolution the alternative of maintaining Bolshevik dictatorship would **inevitably** have resulted in Stalinism. When supporters of Bolshevism argue that Kronstadt would have opened the gate to counter-revolution, they do not understand that the Bolsheviks **were**

the counter-revolution in 1921 and that by suppressing Kronstadt the Bolsheviks not only opened the gate to Stalinism but invited it in and gave it the keys to the house.

The Platform, moreover, smacks of the re-writing of history Trotsky correctly accused Stalinism of.

It argues, for example, that the urban soviets “*in recent years have been losing importance. This undoubtedly reflects a shift in the relation of class forces to the disadvantage of the proletariat.*” In fact, the soviets had lost their importance since the October revolution (see section 2 for details). The “*shift*” in the relation of class forces started immediately after the October revolution, when the **real** gains of 1917 (i.e. soviet democracy, workers’ rights and freedom) were slowly and surely eliminated by the bureaucratic class forming around the new state — a class who could justify their actions by claiming it was in the “*interests*” of the masses whose wishes they were ignoring.

As regards the Communist Party itself, it argues for introducing (“*in deeds and not words*”) “*a democratic regime. Do away with administrative pressure tactics. Stop the persecution and expulsion of those who hold independent opinions about party questions.*” No mention, of course, that these tactics were used by Lenin and Trotsky against Left-wing dissidents after the October revolution.

The Left-Communists in early 1918 were subject to such pressure. For example, they were ousted from leading positions in the Supreme Economic Council in March 1918. After their views were denounced by Lenin a “*campaign was whipped up in Leningrad which compelled **Kommunist** [their paper] to transfer publication to Moscow ... After the appearance of the first issue of the paper a hastily convened Leningrad Party Conference produced a majority for Lenin and ‘demanded that the adherents of **Kommunist** cease their separate organisational existence.’*” The paper lasted four issues, with the last having to be published as a private factional paper. The issue had been settled by a high pressure campaign in the Party organisation, backed by a barrage of violent invective in the Party press and in the pronouncements of the Party leaders. [Maurice Brinton, **Op. Cit.**, pp. 39–40]

Similarly, the Workers’ Opposition three years later also experienced them. At the Tenth Party congress, A. Kollontai (author of their platform) stated that the circulation of her pamphlet had been deliberately impeded. “*So irregular were some of these that the Moscow Party Committee at one stage voted a resolution **publicly** censuring the Petrograd organisation ‘for not observing the rules of proper controversy.’*” The success of the Leninist faction in getting control of the party machine was such that “*there is serious doubt as to whether they were not achieved by fraud.*” [Brinton, **Op. Cit.**, p. 75 and p. 77] Victor Serge witnessed the rigging of an election to ensure Lenin’s victory in the trade union debate. [**Memoirs of a Revolutionary**, p. 123] Kollontai herself mentions (in early 1921) that comrades “*who dare to disagree with decrees from above are **still** being persecuted.*” [our emphasis, **The Workers’ Opposition**, p. 22]

The Platform states that “*the dying out of inner-party democracy leads to a dying out of workers’ democracy in general — in the trade unions, and in all other nonparty mass organisations.*” In fact, the opposite causation is correct. The dying out of workers’ democracy in general leads to a dying out of inner-party democracy. The dictatorship of the party by necessity clashes with the “*democratic dictatorship of the working masses and the poor peasantry.*” As

the party dictatorship replaces the working masses, eliminating democracy by the dictatorship of a single party, democracy in that party must wither. If the workers can join that party and influence its policies then the same problems that arose in the soviets and unions appear in the party (i.e. voting for the wrong policies and people). This necessitates a corresponding centralisation in power within the party as occurred in the soviets and unions, all to the detriment of rank and file power and control.

As Ida Mett argued:

“There is no doubt that the discussion taking place within the [Communist] Party at this time [in early 1921] had profound effects on the masses. It overflowed the narrow limits the Party sought to impose on it. It spread to the working class as a whole, to the soldiers and to the sailors. Heated local criticism acted as a general catalyst. The proletariat had reasoned quite logically: if discussion and criticism were permitted to Party members, why should they not be permitted to the masses themselves who had endured all the hardships of the Civil War?”

“In his speech to the Tenth Congress — published in the Congress Proceedings — Lenin voiced his regret at having ‘permitted’ such a discussion. ‘We have certainly committed an error,’ he said, ‘in having authorised this debate. Such a discussion was harmful just before the Spring months that would be loaded with such difficulties.’”

[**The Kronstadt Uprising**, pp. 34–5]

Unsurprisingly, the Tenth Congress voted to ban factions within the Party. The elimination of discussion in the working class led to its ban in the party. Having the rank-and-file of the Party discuss issues would give false hopes to the working class as a whole who may attempt to influence policy by joining the party (and, of course, vote for the wrong people or policies).

Thus the only alternative to Kronstadt’s “*Third Revolution*” and free soviets was doomed to failure.

Lastly, we should draw some parallels between the fates of the Kronstadt sailors and the Left Opposition.

John Rees argues that the Left Opposition had “*the whole vast propaganda machine of the bureaucracy . . . turned against them,*” a machine used by Trotsky and Lenin in 1921 against Kronstadt. Ultimately, the Left Opposition “*were exiled, imprisoned and shot,*” again like the Kronstadters and a host of revolutionaries who defended the revolution but opposed the Bolshevik dictatorship. [Op. Cit., p. 68]

As Murray Bookchin argued:

“All the conditions for Stalinism were prepared for by the defeat of the Kronstadt sailors and Petrograd strikers.” [“Introduction”, Ida Mett, **The Kronstadt Uprising**, p. 13]

Thus, the argument that Kronstadt was “*utopian*” is false. The third revolution was the only **real** alternative in Bolshevik Russia. Any struggle from below post-1921 would have raised the same problems of soviet democracy and party dictatorship which Kronstadt raised. Given that the **Left Opposition** subscribed to the “*Leninist principle*” of “*the dictatorship of the party,*” they could

not appeal to the masses as they would not vote for them. The arguments raised against Kronstadt that soviet democracy would lead to counter-revolution are equally applicable to movements which appealed, as Rees desires, to the Russian working class post-Kronstadt.

In summary, the claim that Kronstadt would inevitably have led to an anti-proletarian dictatorship fails. Yes, it might have but the Bolshevik dictatorship itself was anti-proletarian (it had repressed proletarian protest, organisation, freedom and rights on numerous occasions) and it could never be reformed from within by the very logic of its “*Leninist principle*” of “*the dictatorship of the party*.” The rise of Stalinism was inevitable after the crushing of Kronstadt.

14 How do modern day Trotskyists misrepresent Kronstadt?

We have discussed how Trotskyists have followed their heroes Lenin and Trotsky in abusing the facts about the Kronstadt sailors and uprising in previous sections. In section 8, we have indicated how they have selectively quoted from academic accounts of the uprising and suppressed evidence which contradicts their claims. In section 7 we have shown how they have selectively quoted from Paul Avrich’s book on the revolt to paint a false picture of the connections between the Kronstadt sailors and the Whites. Here we summarise some of the other misrepresentations of Trotskyists about the revolt.

John Rees, for example, asserts that the Kronstadters were fighting for “*soviets without parties*.” Indeed, he makes the assertion twice on one page. [Op. Cit., p. 63] Pat Stack goes one further and asserts that the “*central demand of the Kronstadt rising though was ‘soviets without Bolsheviks’, in other words, the utter destruction of the workers’ state.*” [“*Anarchy in the UK?*”, **Socialist Review**, no. 246, November 2000] Both authors quote from Paul Avrich’s book **Kronstadt 1921** in their articles. Let us turn to that source:

“*‘Soviets without Communists’ was not, as is often maintained by both Soviet and non-Soviet writers, a Kronstadt slogan.*” [Kronstadt 1921, p. 181]

Nor did they agitate under the banner “*soviets without parties*.” They argued for “*all power to the soviets and not to parties*.” Political parties were not to be excluded from the soviets, simply stopped from dominating them and substituting themselves for them. As Avrich notes, the Kronstadt program “*did allow a place for the Bolsheviks in the soviets, alongside the other left-wing organisations . . . Communists . . . participated in strength in the elected conference of delegate, which was the closest thing Kronstadt ever had to the free soviets of its dreams.*” [Ibid.] The index for Avrich’s work handily includes this page in it, under the helpful entry “*soviets: ‘without Communists.’*”

The central demand of the uprising was simply soviet democracy and a return to the principles that the workers and peasants had been fighting the whites for. In other words, both Leninists have misrepresented the Kronstadt revolt’s demands and so misrepresented its aims.

Rees goes one step further and tries to blame the Bolshevik massacre on the sailors themselves. He argues “*in Petrograd Zinoviev had already essentially*

withdrawn the most detested aspects of War Communism in response to the strikes.” Needless to say, Zinoviev did not withdraw the **political** aspects of War Communism, just some of the **economic** ones and, as the Kronstadt revolt was mainly **political**, these concessions were not enough (indeed, the repression directed against workers rights and opposition socialist and anarchist groups **increased**). He then states the Kronstadders “*response [to these concessions] was contained in their **What We Are Fighting For***” and quotes it as follows:

“there is no middle ground in the struggle against the Communists . . . They give the appearance of making concessions: in Petrograd province road-block detachments have been removed and 10 million roubles have been allotted for the purchase of foodstuffs. . . But one must not be deceived . . . No there can be no middle ground. Victory or death!”

What Rees fails to inform the reader is that this was written on March 8th, while the Bolsheviks had started military operations on the previous evening. Moreover, the fact the “*response*” clearly stated “[w]ithout a single shot, without a drop of blood, the first step has been taken [of the “Third Revolution”]. The toilers do not need blood. They will shed it only at a moment of self-defence” is not mentioned. [Avrich, **Op. Cit.**, p. 243] In other words, the Kronstadt sailors reaffirmed their commitment to non-violent revolt. Any violence on their part was in self-defence against Bolshevik actions. Not that you would know that from Rees’ work. Indeed, as one of Rees’ sources indicates, the rebels “*had refrained from taking any communist lives. The Soviet Government, on the other hand, as early as March 3, already had executed forty-five seamen at Oranienbaum — a quite heavy proportion of the total personnel of the men at the Naval Aviation Detachment. These men had voted for the Kronstadt resolution, but did not take arms against the government. This mass execution was merely a prelude to those that took place after the defeat of the mutineers.*” These executions at Oranienbaum, it should be noted, exceeded the total of 36 seamen who had paid with their lives for the two large rebellions of the 1905 revolution at Kronstadt and Sveaborg. [D. Fedotoff-White, **The Growth of the Red Army**, p. 156]

Ted Grant, of the UK’s **Socialist Appeal** re-writes history significantly in his work **Russia: From revolution to counter-revolution**. For example, he claims (without providing any references) that the “*first lie*” of anti-Bolshevik writers on the subject “*is to identify the Kronstadt mutineers of 1921 with the heroic Red sailors of 1917.*” As we have indicated in section 8, research has **proven** that over 90% of the sailors on the two battleships which started the revolt had been recruited before and during the 1917 revolution and at least three-quarters of the sailors were old hands who had served in the navy through war and revolution. So was the majority of the Provisional Revolutionary Committee. Grant asserts that the sailors in 1917 and 1921 “*had nothing in common*” because those “*of 1917 were workers and Bolsheviks.*” In fact, as we indicated section 9, the Bolsheviks were a minority in Kronstadt during 1917 (a fact even Trotsky admitted in 1938). Moreover, the demands raised in the revolt matched the politics dominant in 1917.

Grant then claims that “*almost the entire Kronstadt garrison volunteered to fight in the ranks of the Red Army during the civil war.*” Are we to believe

that the Bolshevik commanders left Kronstadt (and so Petrograd) defenceless during the Civil War? Or drafted the skilled and trained (and so difficult to replace) sailors away from their ships, so leaving them unusable? Of course not. Common sense refutes Grant's argument (and statistical evidence supports this common sense position — on 1st January, 1921, at least 75.5% of the Baltic Fleet was likely to have been drafted before 1918 and over 80% were from Great Russian areas and some 10% from the Ukraine. [Gelzter, **Op. Cit.**, p. 208]).

Not to be outdone, he then states that the “*Kronstadt garrison of 1921 was composed mainly of raw peasant levies from the Black Sea Fleet. A cursory glance at the surnames of the mutineers immediately shows that they were almost all Ukrainians.*” According to Paul Avrich, “[s]ome three or four hundred names appear in the journal of the rebel movement . . . So far as one can judge from these surnames alone . . . Great Russians are in the overwhelming majority.” Of the 15 person Provisional Revolutionary Committee, “three . . . bore patently Ukrainian names and two others. . . Germanic names.” [Paul Avrich, **Op. Cit.**, pp. 92–3] Of the three Ukrainians, two were sailors of long standing and “*had fought on the barricades in 1917.*” [Avrich, **Op. Cit.**, p. 91] So much for a “*cursory glance at the surnames of the mutineers.*” To top it off, he states: “*That there were actual counter-revolutionary elements among the sailors was shown by the slogan ‘Soviets without Bolsheviks.’*” Which, of course, the Kronstadt sailors **never** raised as a slogan!

And **Grant** talks about the “[m]any falsifications. . . written about this event,” that it “*has been virtually turned into a myth*” and that “*these allegations bear no relation to the truth.*” Truly amazing. As can be seen, his words apply to his own inventions.

Another SWP member, Abbie Bakan, asserts that, for example, “*more than three quarters of the sailors*” at Kronstadt “*were recent recruits of peasant origin*” but refuses to provide a source for this claim. [“*A Tragic Necessity*”, **Socialist Worker Review**, no. 136, November 1990, pp. 18–21] As noted in section 8, such a claim is false. The likely source for the assertion is Paul Avrich, who noted that more than three-quarters of the sailors were of peasant origin but Avrich does **not** say they were all recent recruits. While stating that there could be “*little doubt*” that the Civil War produced a “*high turnover*” and that “*many*” old-timers had been replaced by conscripts from rural areas, he does not indicate that all the sailors from peasant backgrounds were new recruits. He also notes that “*there had always been a large and unruly peasant element among the sailors.*” [**Op. Cit.**, pp. 89–90]

Bakan asserts that anti-semitism “*was vicious and rampant*” yet fails to provide **any** official Kronstadt proclamations expressing this perspective. Rather, we are to generalise from the memoirs of **one** sailor and the anti-semitic remark of Vershinin, a member of the Revolutionary Committee. Let us not forget that the opinions of these sailors and others like them were irrelevant to the Bolsheviks when they drafted them in the first place. And, more importantly, this “*vicious and rampant*” anti-semitism failed to mark the demands raised nor the Kronstadt rebels’ newspaper or radio broadcasts. Nor did the Bolsheviks mention it at the time.

Moreover, it is true that the “*worse venom of the Kronstadt rebels was levelled against Trotsky and Zinoviev*” but it was **not** because, as Bakan asserts, they were “*treated as Jewish scapegoats.*” Their ethnical background was not mentioned by the Kronstadt sailors. Rather, they were strong **political** reasons

for attacking them. As Paul Avrich argues, "*Trotsky in particular was the living symbol of War Communism, of everything the sailors had rebelled against. His name was associated with centralisation and militarisation, with iron discipline and regimentation.*" As for Zinoviev, he had "*incurred the sailors' loathing as the party boss who had suppressed the striking workers and who had stooped to taking their own families as hostages.*" Good reasons to attack them and nothing to do with them being Jewish. [Op. Cit., p. 178 and p. 176]

Bakan states that the "*demands of the Kronstadt sailors reflected the ideas of the most backward section of the peasantry.*" As can be seen from section 3, such a comment cannot be matched with the actual demands of the revolt (which, of course, he does not provide). So what ideas did these demands of the "*most backward section of the peasantry*" state? Free elections to the Soviets, freedom of speech and of the press for workers and peasants, right of assembly, freedom for trade union and peasant organisations, a conference of workers, soldiers and sailors, liberation of all political, worker and peasant prisoners, equalisation of rations, freedom for peasants as long as they do not employ hired labour, and so on. What would, in other words, be included in most socialist parties programmes and was, in fact, key elements of Bolshevik rhetoric in 1917. And, of course, all of the political aspects of the Kronstadt demands reflected key aspects of the Soviet Constitution.

How "*backward*" can you get! Indeed, these "*backward*" peasants send a radio message marking International Woman's Day, hoping that women would "*soon accomplish*" their "*liberation from every form of violence and oppression.*" [quoted by Alexander Berkman, **The Russian Tragedy**, p. 85]

Bakan pathetically acknowledges that their demands included "*calls for greater freedoms*" yet looks at the "*main economic target*" (not mentioning they were points 8, 10 and 11 of the 15 demands, the bulk of the rest are political). These, apparently, were aimed at "*the programme of forced requisitioning of peasant produce and the roadblock detachments that halted the black market in grain.*" Given that he admits that the Bolsheviks were "*already discussing*" the end of these features (due to their lack of success) it must be the case that the Bolsheviks also "*reflected the ideas of the most backward section of the peasantry*"! Moreover, the demand to end the roadblocks was also raised by the Petrograd and Moscow workers during their strikes, as were most of the other demands raised by Kronstadt. [Paul Avrich, **Op. Cit.**, p. 42] Surely the "*most backward section of the peasantry*" was getting around in those days, appearing as they were in the higher reaches of the Bolshevik party bureaucracy and the factories of Petrograd and other major cities!

In reality, of course, the opposition to the forced requisitioning of food was a combination of ethical and practical considerations — it was evil and it was counterproductive. You did not have to be a peasant to see and know this (as the striking workers show). Similarly, the roadblocks were also a failure. Victor Serge, for example, recollected he would "*have died without the sordid manipulations of the black market.*" [**Memoirs of a Revolutionary**, p.79] He was a government official. Think how much worse it would have been for an ordinary worker. The use of roadblock detachments harmed the industrial workers — little wonder they struck for their end and little wonder the sailors expressed solidarity with them and included it in their demands. Therefore, **nothing** can be drawn from these demands about the class nature of the revolt.

In an interesting example of double-think, Bakan then states that the sailors

“called for the abolition of Bolshevik authority in the army, factories and mills.” What the resolution demanded was, in fact, *“the abolition Party combat detachments in all military groups”* as well as *“Party guards in factories and enterprises”* (point 10). In other words, to end the intimidation of workers and soldiers by armed communist units in their midst! When Bakan states that *“the real character of the rebellion”* can be seen from the opening declaration that *“the present soviets do not express the will of the workers and peasants”* he could not have made a truer comment. The Kronstadt revolt was a revolt for soviet democracy and against party dictatorship. And soviet democracy would only abolish *“Bolshevik authority”* if the existing soviets, as the resolution argued, did not express the will of their electors!

Similarly, he asserts that the Provisional Revolutionary Committee was *“non-elected”* and so contradicts every historian who acknowledges it was elected by the conference of delegates on March 2nd and expanded by the next conference a few days later. He even considers the fact the delegate meeting’s *“denial of party members’ usual role in chairing the proceedings”* as one of many *“irregularities”* while, of course, the **real** irregularity was the fact that **one** party (the government party) had such a *“usual role”* in the first place! Moreover, given that that Petrograd soviet meeting to discuss the revolt had Cheka guards (Lenin’s political police) on it, his notion that sailors guarded the conference of delegates meeting (a meeting held in opposition to the ruling party) was *“irregular”* seems ironic.

Lastly, he raises the issue of the *“Memorandum”* of the White *“National Centre”* and uses it as evidence that *“Lenin’s suspicion of an international conspiracy linked up with the Kronstadt events has been vindicated.”* Needless to say, he fails to mention that the historian who discovered the document rejected the notion that it proved that Kronstadt was linked to such a conspiracy (see section 6 for a full discussion). Ironically, he mentions that *“[t]wo weeks after the Kronstadt rebellion the ice was due to melt.”* Two weeks **after** the rebellion was crushed, of course, and he fails to mention that the *“Memorandum”* he uses as evidence assumes that the revolt would break out **after** the ice had melted, not before. While he claims that *“[h]olding out until the ice melted was identified as critical in the memorandum,”* this is not true. The Memorandum in fact, as Paul Avrich notes, *“assumes that the rising will occur after the ice has melted.”* [Op. Cit., p. 237f] No other interpretation can be gathered from the document.

Altogether, Bakan’s article shows how deeply the supporters of Leninism will sink to when attempting to discuss the Kronstadt rebellion. Sadly, as we have indicated many, many times, this is not an isolated occurrence.

15 What does Kronstadt tell us about Bolshevism?

The rationales used by Lenin, Trotsky and their followers are significant aids to getting to the core of the Bolshevik Myth. These rationales and activities allow us to understand the limitations of Bolshevik theory and how it contributed to the degeneration of the revolution.

Trotsky stated that the *“Kronstadt slogan”* was *“soviets without Commu-*

nists.” [Lenin and Trotsky, **Kronstadt**, p. 90] This, of course, is factually incorrect. The Kronstadt slogan was “*all power to the soviets but not to the parties*” (or “*free soviets*”). From this incorrect assertion, Trotsky argued as follows:

“to free the soviets from the leadership [!] of the Bolsheviks would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve as a bridge from the proletarian dictatorship. They could play no other role, regardless of the ‘ideas’ of their participants. The Kronstadt uprising thus had a counterrevolutionary character.” [Op. Cit., p. 90]

Interesting logic. Let us assume that the result of free elections would have been the end of Bolshevik “*leadership*” (i.e. dictatorship), as seems likely. What Trotsky is arguing is that to allow workers to vote for their representatives would “*only serve as a bridge from the proletarian dictatorship*”! This argument was made (in 1938) as a **general point** and is **not** phrased in terms of the problems facing the Russian Revolution in 1921. In other words Trotsky is clearly arguing for the dictatorship of the party and contrasting it to soviet democracy. So much for “*All Power to the Soviets*” or “*workers’ power*”!

Indeed, Trotsky was not shy in explicitly stating this on occasion. As we noted in section 13, the **Left Opposition** based itself on “*Leninist principle*” (“*inviolable for every Bolshevik*”) that “*the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.*” Trotsky stressed ten years later that the whole working class cannot determine policy in the so-called “workers’ state” (as well as indicating his belief that one-party dictatorship is an inevitable stage in a “proletarian” revolution):

“The revolutionary dictatorship of a proletarian party is for me not a thing that one can freely accept or reject: It is an objective necessity imposed upon us by the social realities — the class struggle, the heterogeneity of the revolutionary class, the necessity for a selected vanguard in order to assure the victory. The dictatorship of a party belongs to the barbarian prehistory as does the state itself, but we can not jump over this chapter, which can open (not at one stroke) genuine human history. . . The revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution . . . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the ‘dictatorship’ of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions. The reason for the revolution comes from the circumstance that capitalism does not permit the material and the moral development of the masses.” [Trotsky, **Writings 1936–37**, pp. 513–4]

This is the very essence of Bolshevism. Trotsky is clearly arguing that the working class, as a class, is incapable of making a revolution or managing society

itself — hence the party must step in on its behalf and, if necessary, ignore the wishes of the people the party claims to represent. To re-quote Trotsky's comments against the **Workers' Opposition** at the Tenth Party Congress in early 1921: "*They have made a fetish of democratic principles! They have placed the workers' right to elect representatives above the Party. As if the Party were not entitled to assert its dictatorship even if that dictatorship clashed with the passing moods of the workers' democracy!*" He stressed that the "*Party is obliged to maintain its dictatorship . . . regardless of temporary vacillations even in the working class . . . The dictatorship does not base itself at every moment on the formal principle of a workers' democracy.*" [quoted by M. Brinton, **The Bolsheviks and Workers' Control**, p. 78]

In 1957, after crushing the 1956 workers' revolution, the Hungarian Stalinists argued along **exactly** the same lines as Trotsky had after the Bolsheviks had crushed Kronstadt. The leader of the Hungarian Stalinist dictatorship argued that "*the regime is aware that the people do not always know what is good for them. It is therefore the duty of the leadership to act, not according to the will of the people, but according to what the leadership knows to be in the best interests of the people.*" [quoted by Andy Anderson, **Hungary '56**, p. 101]

Little wonder, then, that Samuel Farber notes that "*there is no evidence indicating that Lenin or any of the mainstream Bolshevik leaders lamented the loss of workers' control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921.*" [**Before Stalinism**, p. 44]

Such a perspective cannot help have disastrous consequences for a revolution (and explains why the Bolsheviks failed to pursue a peaceful resolution to the Kronstadt revolt). The logic of this argument clearly implies that when the party suppressed Kronstadt, when it disbanded non-Bolshevik soviets in early 1918 and robbed the workers and soviets of their power, the Bolsheviks were acting in the best interests of masses! The notion that Leninism is a revolutionary theory is invalidated by Trotsky's arguments. Rather than aim for a society based on workers' power, they aim for a "workers' state" in which workers **delegate** their power to the leaders of the party. Which confirmed Bakunin's argument that Marxism meant "*the highly despotic government of the masses by a new and very small aristocracy of real or pretended scholars. The people are not learned, so they will be liberated from the cares of government and included in entirety in the governed herd.*" [**Statism and Anarchy**, pp. 178–9]

Such an approach is doomed to failure — it cannot produce a socialist society as such a society (as Bakunin stressed) can only be built from below by the working class itself.

As Vernon Richards argues:

"The distinction between the libertarian and authoritarian revolutionary movements in their struggle to establish the free society, is the means which each proposes should be used to this end. The libertarian maintains that the initiative must come from below, that the free society must be the result of the will to freedom of a large section of the population. The authoritarian . . . believes that the will to freedom can only emerge once the existing economic and political system has been replaced by a dictatorship of the proletariat [as expressed by the dictatorship of the party, according to Trotsky] which,

as the awareness and sense of responsibility of the people grows, will wither away and the free society emerge.

*“There can be no common ground between such approaches. For the authoritarian argues that the libertarian approach is noble but ‘utopian’ and doomed to failure from the start, while the libertarian argues on the evidence of history, that the authoritarian **methods** will simply replace one coercive state by another, equally despotic and remote from the people, and which will no more ‘wither away’ than its capitalist predecessor.” [Lessons of the Spanish Revolution, p. 206]*

Modern day Leninists follow Trotsky’s arguments (although they rarely acknowledge where they logically led or that their heroes explicitly acknowledged this conclusion and justified it). They do not state this position as honestly as did Trotsky.

Chris Bambery of the British SWP, for example, argues in his article “*Leninism in the 21st century*” that “*in Lenin’s concept of the party, democracy is balanced by centralism*” and the first of three reasons for this is:

“The working class is fragmented. There are always those who wish to fight, those who will scab and those in between. Even in the soviets those divisions will be apparent. Revolutionary organisation does not aspire to represent the working class as a whole. It bases itself on those workers who want to challenge capitalism, and seeks to organise those to win the majority of workers to the need to take power.” [Socialist Review, no. 248, January 2001]

This, of course, has **exactly** the same basis of Trotsky’s defence of the need of party dictatorship and why Kronstadt was counterrevolutionary. Bambery notes that even “*in the soviets*” there will be “*divisions.*” Thus we have the basic assumption which, combined with centralisation, vanguardism and other aspects of Bolshevism, leads to events like Kronstadt and the destruction of soviet power by party power. The arguments for centralisation mean, in practice, the concentration of power in the centre, in the hands of the party leaders, as the working masses cannot be trusted to make the correct (“revolutionary”) decisions. This centralised power is then used to impose the will of the leaders, who use state power against the very class they claim to represent:

“Without revolutionary coercion directed against the avowed enemies of the workers and peasants, it is impossible to break down the resistance of these exploiters. On the other hand, revolutionary coercion is bound to be employed towards the wavering and unstable elements among the masses themselves.” [Lenin, Collected Works, vol. 42, p. 170]

In other words, whoever protests against the dictatorship of the party.

Of course, it will be replied that the Bolshevik dictatorship used its power to crush the resistance of the bosses (and “*backward workers*”). Sadly, this is not the case. First, we must stress that anarchists are **not** against defending a revolution or expropriating the power and wealth of the ruling class, quite the reverse as this is about **how** a revolution does this. Lenin’s argument is

flawed as it confuses the defence of the revolution with the defence of the party in power. These are two totally different things.

The “*revolutionary coercion*” Lenin speaks of is, apparently, directed against one part of the working class. However, this will also intimidate the rest (just as bourgeois repression not only intimidates those who strike but those who may think of striking). As a policy, it can have but one effect — to eliminate **all** workers’ power and freedom. It is the violence of an oppressive minority against the oppressed majority, not vice versa. Ending free speech harmed working class people. Militarisation of labour did not affect the bourgeoisie. Neither did eliminating soviet democracy or union independence. As the dissident (working class) Communist Gavrii Miasnokov argued in 1921 (in reply to Lenin):

“The trouble is that, while you raise your hand against the capitalist, you deal a blow to the worker. You know very well that for such words as I am now uttering hundreds, perhaps thousands, of workers are languishing in prison. That I myself remain at liberty is only because I am a veteran Communist, have suffered for my beliefs, and am known among the mass of workers. Were it not for this, were I just an ordinary mechanic from the same factory, where would I be now? In a Cheka prison or, more likely, made to ‘escape,’ just as I made Mikhail Romanov ‘escape.’ Once more I say: You raise your hand against the bourgeoisie, but it is I who am spitting blood, and it is we, the workers, whose jaws are being cracked.” [quoted by Paul Avrich, **G. T. Miasnikov and the Workers’ Group**]

This can be seen from the make-up of Bolshevik prisoners. Of the 17 000 camp detainees on whom statistical information was available on 1 November 1920, peasants and workers constituted the largest groups, at 39% and 34% respectively. Similarly, of the 40 913 prisoners held in December 1921 (of whom 44% had been committed by the Cheka) nearly 84% were illiterate or minimally educated, clearly, therefore, either peasants or workers. [George Leggett, **The Cheka: Lenin’s Political Police**, p. 178] Unsurprisingly, Miasnikov refused to denounce the Kronstadt insurgents nor would he have participated in their suppression had he been called upon to do so.

Thus, the ideas of centralisation supported by Leninists are harmful to the real gains of a revolution, namely working class freedom and power (as we noted in section 12, some of them do not even mention these when indicating the gains of 1917). Indeed, this can be seen all through the history of Bolshevism.

Bamberg states (correctly) that “*Lenin and the Bolsheviks initially opposed*” the spontaneously formed soviets of 1905. Incredulously, however, he assigns this opposition to the assertion that their “*model of revolution was still shaped by that of the greatest previous revolution in France in 1789.*” [**Ibid.**] In reality, it was because they considered, to quote a leading Bolshevik, that “*only a strong party along class lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent.*” [P. N. Gvozdev, quoted by, Oskar Anweiler, **The Soviets**, p. 77]

The soviet, in other words, could not represent the interests of the working class because it was elected by them! Trotsky repeated this argument almost word for word in 1920 when he argued that “*it can be said with complete*

justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party” and that there is “*no substitution at all*” when the “*power of the party*” replaces that of the working class. The party, he stressed, “*has afforded to the Soviets the possibility of becoming transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour.*” [Communism and Terrorism] How labour could express this “*supremacy*” when it could not even vote for its delegates (never mind manage society) is never explained.

In 1905, the Bolsheviks saw the soviets as a rival to their party and demanded it either accept their political program or simply become a trade-union like organisation. They feared that it pushed aside the party committee and thus led to the “*subordination of consciousness to spontaneity.*” [Oskar Anweiler, **Op. Cit.**, p. 78] This was following Lenin in **What is to be Done?**, where he had argued that the “*spontaneous development of the labour movement leads to it being subordinated to bourgeois ideology.*” [Essential Works of Lenin, p. 82] This perspective is at the root of all Bolshevik justifications for party power after the October revolution.

Such a combination of political assumptions inevitably leads to such events as Kronstadt. With the perception that spontaneous developments inevitably leads to bourgeois domination, any attempt to revoke Bolshevik delegates and elect others to soviets **must** represent counter-revolutionary tendencies. As the working class is divided and subject to “*vacillations*” due to “*wavering and unstable elements among the masses themselves,*” working class people simply cannot manage society themselves. Hence the need for “*the Leninist principle*” of “*the dictatorship of the party.*” And, equally logically, to events like Kronstadt.

Thus Cornelius Castoriadis:

“To manage the work of others — this is the beginning and the end of the whole cycle of exploitation. The ‘need’ for a specific social category to manage the work of others in production (and the activity of others in politics and in society), the ‘need’ for a separate business management and for a Party to rule the State — this is what Bolshevism proclaimed as soon as it seized power, and this is what it zealously laboured to impose. We know that it achieved its ends. Insofar as ideas play a role in the development of history — and, in the final analysis, they play an enormous role — the Bolshevik ideology (and with it, the Marxist ideology lying behind it) was a decisive factor in the birth of the Russian bureaucracy.” [Political and Social Writings, vol. 3, p. 104]

Moreover, the logic of the Bolshevik argument is flawed:

“if you consider these worthy electors as unable to look after their own interests themselves, how is it that they will know how to choose for themselves the shepherds who must guide them? And how will they be able to solve this problem of social alchemy, of producing a genius from the votes of a mass of fools? And what will happen to the minorities which are still the most intelligent, most active and radical part of a society?” [Malatesta, **Anarchy**, p. 53]

Hence the need for soviet democracy and self-management, of the demands of the Kronstadt revolt. As Malatesta put it, “[o]nly freedom or the struggle for freedom can be the school for freedom.” [Life and Ideas, p. 59] The “epic of Kronstadt” proves “**conclusively that what belongs really to the workers and peasants can be neither governmental nor statist, and what is governmental and statist can belong neither to the workers nor the peasants.**” [Voline, **The Unknown Revolution**, p. 503]

Anarchists are well aware that differences in political perspective exists within the working class. We are also aware of the importance of revolutionaries organising together to influence the class struggle, raising the need for revolution and the creation of working class organisations which can smash and replace the state with a system of self-managed communes and workers’ councils. However, we reject the Bolshevik conclusion for centralised power (i.e. power delegated to the centre) as doomed to failure. Rather, we agree with Bakunin who argued that revolutionary groups must “*not seek anything for themselves, neither privilege nor honour nor power*” and reject “*any idea of dictatorship and custodial control.*” The “*revolution everywhere must be created by the people, and supreme control must always belong to the people organised into a free federation of agricultural and industrial associations . . . organised from the bottom upwards by means of revolutionary delegations . . . [who] will set out to administer public services, not to rule over peoples.*” [Michael Bakunin: **Selected Writings**, p. 172]

Anarchists seek to influence working people directly, via their natural influence in working class organisations like workers’ councils, unions and so on. Only by discussion, debate and self-activity can the political perspectives of working class people develop and change. This is impossible in a centralised system based on party dictatorship. Debate and discussion are pointless if they have no effect on the process of the revolution nor if working people cannot elect their own delegates. Nor can self-activity be developed if the government uses “*revolutionary coercion*” against “*waving or unstable elements*” (i.e. those who do not unquestioningly follow the orders of the government or practice initiative).

In other words, the fact Bolshevism uses to justify its support for party power is, in fact, the strongest argument against it. By concentrating power in the hands of a few, the political development of the bulk of the population is hindered. No longer in control of their fate, of **their** revolution, they will become pray to counter-revolutionary tendencies.

Nor was the libertarian approach impossible to implement during a revolution or civil war. Anarchists applied their ideas very successfully in the Makhnovist movement in the Ukraine. In the areas they protected, the Makhnovists refused to dictate to the workers and peasants what to do:

“The freedom of the peasants and workers, said the Makhnovists, resides in the peasants and workers themselves and may not be restricted. In all fields of their lives it is up to the workers and peasants to construct whatever they consider necessary. As for the Makhnovists — they can only assist them with advice, by putting at their disposal the intellectual or military forces they need, but under no circumstances can the Makhnovists prescribe for them in advance.”
[Peter Arshinov, **The History of the Makhnovist Movement**,

The Makhnovists urged workers to form free soviets and labour unions and to use them to manage their own fates. They organised numerous conferences of workers' and peasants' delegates to discuss political and military developments as well as to decide how to re-organise society from the bottom up in a self-managed manner. After they had liberated Aleksandrovsk, for example, they "*invited the working population to participant in a general conferece of the workers of the city . . . and it was proposed that the workers organise the life in the city and the functioning of the factories with their own forces and their own organisations.*" [Op. Cit., p. 149] In contrast, the Bolsheviks tried to **ban** congresses of workers', peasants' and soldiers' delegates organised by the Makhnovists (once by Dybenko and once by Trotsky). [Op. Cit., pp. 98–104 and 120–5]

The Makhnovists replied by holding the conferences anyway, asking "[c]an there exist laws made by a few people who call themselves revolutionaries, which permit them to outlaw a whole people who are more revolutionary than they are themselves?" and "[w]hose interests should the revolution defend: those of the Party or those of the people who set the revolution in motion with their blood?" Makhno himself stated that he "*consider[ed] it an inviolable right of the workers and peasants, a right won by the revolution, to call conferences on their own account, to discuss their affairs.*" [Op. Cit., p. 103 and p. 129]

These actions by the Bolsheviks should make the reader ponder if the elimination of workers' democracy during the civil war can be fully explained by the objective conditions facing Lenin's government or whether Leninist ideology played an important role in it. Indeed, the Kronstadt revolt occurred, in part, because in February 1921 the administration of the Baltic Fleet and the Communist Party organisation had collapsed, so allowing "*unauthorised meetings of ships' crews . . . [to] tak[e] place behind the backs of their commissars, there being too few loyal rank and file party members left to nip them in the bud.*" [I. Getzler, **Kronstadt 1917–1921**, p. 212]

Thus, the anarchist argument is no utopian plan. Rather, it is one which has been applied successfully in the same circumstances which Trotskyists argue forced the Bolsheviks to act as they did. As can be seen, a viable alternative approach existed and was applied (see the appendix on "Why does the Makhnovist movement show there is an alternative to Bolshevism?" for more on the Makhnovists).

The terrible objective circumstances facing the revolution obviously played a key role in the degeneration of the revolution. However, this is not the whole story. The **ideas** of the Bolsheviks played a key role as well. The circumstances the Bolsheviks faced may have shaped certain aspects of their actions, but it cannot be denied that the impulse for these actions were rooted in Bolshevik theory.

In regards to this type of analysis, the Trotskyist Pierre Frank argues that anarchists think that bureaucratic conceptions "*beget bureaucracy*" and that "*it is ideas, or deviations from them, that determine the character of revolutions. The most simplistic kind of philosophical idealism has laid low historical materialism.*" This means, apparently, that anarchists ignore objective factors in the rise of the bureaucracy such as "*the country's backwardness, low cultural level, and the isolation of the revolution.*" [Lenin and Trotsky, **Kronstadt**, pp. 22–3]

Nothing could be further from the truth, of course. What anarchists argue (like Lenin before the October revolution) is that **every** revolution will suffer from isolation, uneven political development, economic problems and so on (i.e. “*exceptional circumstances*,” see section 12). The question is whether your revolution can survive them and whether your political ideas can meet these challenges without aiding bureaucratic deformations. As can be seen from the Russian Revolution, Leninism fails that test.

Moreover, Frank is being incredulous. If we take his argument seriously then we have to conclude that Bolshevik ideology played **no** role in how the revolution developed. In other words, he subscribes to the contradictory position that Bolshevik politics were essential to the success of the revolution and yet played no role in its outcome.

The facts of the matter is that people are faced with choices, choices that arise from the objective conditions they face. What decisions they make will be influenced by the ideas they hold — they will not occur automatically, as if people were on auto-pilot — and their ideas are shaped by the social relationships they experience. Thus, someone placed into a position of power over others will act in certain ways, have a certain world view, which would be alien to someone subject to egalitarian social relations.

So, obviously “ideas” matter, particularly during a revolution. Someone in favour of centralisation, centralised power and who equates party rule with class rule (like Lenin and Trotsky), will act in ways (and create structures) totally different from someone who believes in decentralisation and federalism. In other words, political ideas do matter in society. Nor do anarchists leave our analysis at this obvious fact, we also argue that the types of organisation people create and work in shapes the way they think and act. This is because specific kinds of organisation have specific authority relations and so generate specific social relationships. These obviously affect those subject to them — a centralised, hierarchical system will create authoritarian social relationships which shape those within it in totally different ways than a decentralised, egalitarian system. That Frank denies this obvious fact suggests he knows nothing of materialist philosophy and subscribes to the distinctly lobotomised (and bourgeois) “historical materialism” of Lenin (see Anton Pannekoek’s **Lenin as Philosopher** for details).

The attitude of Leninists to the Kronstadt event shows quite clearly that, for all their lip-service to history from below, they are just as fixated with leaders as is bourgeois history. As Cornelius Castoriadis argues:

*“Now, we should point out that it is not workers who write history. It is always the **others**. And these others, whoever they may be, have a historical existence only insofar as the masses are passive, or active simply to support them, and this is precisely what ‘the others’ will tell us at every opportunity. Most of the time these others will not even possess eyes to see and ears to hear the gestures and utterances that express people’s autonomous activity. In the best of instances, they will sing the praises of this activity so long as it **miraculously** coincides with their own line, but they will radically condemn it, and impute to it the basest motives, as soon as it strays therefrom. Thus Trotsky describes in grandiose terms the anonymous workers of Petrograd moving ahead of the Bolshevik party or*

*mobilising themselves during the Civil War, but later on he was to characterise the Kronstadt rebels as ‘stool pigeons’ and ‘hirelings of the French High Command.’ They lack the categories of thought — the brain cells, we might dare say — necessary to understand, or even to record, this activity as it really occurs: to them, an activity that is not instituted, that has neither boss nor program, has no status; it is not even clearly perceivable, except perhaps in the mode of ‘disorder’ and ‘troubles.’ The autonomous activity of the masses belongs by definition to what is **repressed** in history.” [Op. Cit., p. 91]*

The Trotskyist accounts of the Kronstadt revolt, with their continual attempts to portray it as a White conspiracy, proves this analysis is correct. Indeed, the possibility that the revolt was a spontaneous mass revolt with political aims was dismissed by one of them as “*absurd*” and instead was labelled the work of “*backward peasants*” being misled by SRs and spies. Like the capitalist who considers a strike the work of “outside agitators” and “communists” misleading their workers, the Trotskyists present an analysis of Kronstadt reeking of elitism and ideological incomprehension. Independence on behalf of the working class is dismissed as “backward” and to be corrected by the “proletarian dictatorship.” Clearly Bolshevik ideology played a key role in the rise of Stalinism.

Lastly, the supporters of Bolshevism argue that in suppressing the revolt “*the Bolsheviks only did their duty. They defended the conquests of the revolution against the assaults of the counterrevolution.*” [Wright, **Op. Cit.**, p. 123] In other words, we can expect more Kronstadts if these “revolutionaries” gain power. The “*temporary vacillations*” of future revolutions will, like Kronstadt, be rectified by bullets when the Party “*assert[s] its dictatorship even if its dictatorship clashes even with the passing moods of the workers’ democracy.*” [Trotsky, quoted by M. Brinton, **Op. Cit.**, p. 78] No clearer condemnation of Bolshevism as a socialist current is required.

And, we must ask, what, exactly, **were** these “conquests” of the revolution that must be defended? The suppression of strikes, independent political and labour organisations, elimination of freedom of speech, assembly and press and, of course, the elimination of soviet and union democracy in favour of part dictatorship? Which, of course, for all Leninists, is the **real** revolutionary conquest. Any one who attacks that is, of course, a counter-revolutionary (even if they are workers). Thus:

“Attitudes to the Kronstadt events, expressed . . . years after the event often provide deep insight into the political thinking of contemporary revolutionaries. They may in fact provide a deeper insight into their conscious or unconscious aims than many a learned discussion about economics, or philosophy or about other episodes of revolutionary history.

“It is a question of one’s basic attitude as to what socialism is all about. what are epitomised in the Kronstadt events are some of the most difficult problems of revolutionary strategy and revolutionary ethics: the problems of ends and means, of the relations between Party and masses, in fact whether a Party is necessary at all. Can

the working class by itself only develop a trade union consciousness?

...

*“Or can the working class develop a deeper consciousness and understanding of its interests than can any organisations allegedly acting on its behalf? When Stalinists or Trotskyists speak of Kronstadt as ‘an essential action against the class enemy’ when some more ‘sophisticated’ revolutionaries refer to it as a ‘tragic necessity,’ one is entitled to pause for thought. One is entitled to ask how seriously they accept Marx’s dictum that ‘the emancipation of the working class is the task of the working class itself.’ Do they take this seriously or do they pay mere lip service to the words? Do they identify socialism with the autonomy (organisational and ideological) of the working class? Or do they see themselves, with their wisdom as to the ‘historic interests’ of others, and with their judgements as to what should be ‘permitted,’ as the leadership around which the future elite will crystallise and develop? One is entitled not only to ask . . . but also to suggest the answer!” [“Preface”, Ida Mett’s **The Kronstadt Uprising**, pp. 26–7]*

The issue is simple — either socialism means the self-emancipation of the working class or it does not. Leninist justifications for the suppression of the Kronstadt revolt simply means that for the followers of Bolshevism, when necessary, the party will paternalistically repress the working class for their own good. The clear implication of this Leninist support of the suppression of Kronstadt is that, for Leninism, it is dangerous to allow working class people to manage society and transform it as they see fit as they will make wrong decisions (like vote for the wrong party). If the party leaders decide a decision by the masses is incorrect, then the masses are overridden (and repressed). So much for “*all power to the soviets*” or “*workers’ power*.”

Ultimately, Wright’s comments (and those like it) show that Bolshevism’s commitment to workers’ power and democracy is non-existent. What is there left of workers’ self-emancipation, power or democracy when the “workers state” represses the workers for trying to practice these essential features of any real form of socialism? It is the experience of Bolshevism in power that best refutes the Marxist claim that the workers’ state “will be democratic and participatory.” The suppression of Kronstadt was just one of a series of actions by the Bolsheviks which began, **before** the start of the Civil War, with them abolishing soviets which elected non-Bolshevik majorities, abolishing elected officers and soldiers soviets in the Red Army and Navy and replacing workers’ self-management of production by state-appointed managers with “*dictatorial*” powers (see sections H.4 and 2 for details).

As Bakunin predicted, the “workers’ state” did not, could not, be “participatory” as it was still a state. Kronstadt is part of the empirical evidence which proves Bakunin’s predictions on the authoritarian nature of Marxism. These words by Bakunin were confirmed by the Kronstadt rebellion and the justifications made at the time and afterwards by the supporters of Bolshevism:

“What does it mean, ‘the proletariat raised to a governing class?’ Will the entire proletariat head the government? The Germans number about 40 million. Will all 40 million be members of the govern-

ment? The entire nation will rule, but no one would be ruled. Then there will be no government, there will be no state; but if there is a state, there will also be those who are ruled, there will be slaves.

“In the Marxists’ theory this dilemma is resolved in a simple fashion. By popular government they mean government of the people by a small number of representatives elected by the people. So-called popular representatives and rulers of the state elected by the entire nation on the basis of universal suffrage — the last word of the Marxists, as well as the democratic school — is a lie behind which the despotism of a ruling minority is concealed, a lie all the more dangerous in that it represents itself as the expression of a sham popular will.

*“So . . . it always comes down to the same dismal result: government of the vast majority of the people by a privileged minority. But this minority, the Marxists say, will consist of workers. Yes, perhaps, of **former** workers, who, as soon as they become rulers or representatives of the people will cease to be workers and will begin to look upon the whole workers’ world from the heights of the state. They will no longer represent the people but themselves and their own pretensions to govern the people. . .*

“They say that this state yoke, this dictatorship, is a necessary transitional device for achieving the total liberation of the people: anarchy, or freedom, is the goal, and the state, or dictatorship, the means. Thus, for the masses to be liberated they must first be enslaved. . . They claim that only a dictatorship (theirs, of course) can create popular freedom. We reply that no dictatorship can have any other objective than to perpetuate itself, and that it can engender and nurture only slavery in the people who endure it. Liberty can only be created by liberty, by an insurrection of all the people and the voluntary organisation of the workers from below upward.” [Statism and Anarchy, pp. 178-9]

What caused the degeneration of the Russian Revolution?

As is well known, the Russian Revolution failed. Rather than produce socialism, the Bolshevik revolution gave birth to an autocratic party dictatorship residing over a state capitalist economy. In turn, this regime gave rise to the horrors of Stalin's system. While Stalinism was denounced by all genuine socialists, a massive debate has existed within the Marxist movement over when, exactly, the Russian Revolution failed and why it did. Some argue around 1924, others say around 1928, some (libertarian Marxists) argue from the Bolshevik seizure of power. The reasons for the failure tend to be more readily agreed upon: isolation, the economic and social costs of civil war, the "*backward*" nature of Russian society and economy are usually listed as the key factors. Moreover, what the Stalinist regime was is also discussed heatedly in such circles. Some (orthodox Trotskyists) claiming it was a "*degenerated workers state*," others (such as the neo-Trotskyist UK SWP) that it was "*state capitalist*."

For anarchists, however, the failure of Bolshevism did not come as a surprise. In fact, just as with the reformist fate of the Social Democrats, the failure of the Russian Revolution provided empirical evidence for Bakunin's critique of Marx. As Emma Goldman recounts in her memoirs

"Professor Harold Laski . . . expressed the opinion that I ought to take some comfort in the vindication anarchism had received by the Bolsheviks. I agreed, adding that not only their regime, but their stepbrothers as well, the Socialists in power in other countries, had demonstrated the failure of the Marxian State better than any anarchist argument. Living proof was always more convincing than theory. Naturally I did not regret the Socialist failure but I could not rejoice in it in the face of the Russian tragedy." [**Living My Life**, vol. 2, p. 969]

Given that Leninists claim that the Russian revolution was a success (at least initially) and so proves the validity of their ideology, anarchists have a special duty to analysis and understand what went wrong. Simply put, if the Russian Revolution was a "success," Leninism does not need "failures"

This section of the FAQ will discuss these explanations for the failure of Bolshevism. Simply put, anarchists are not convinced by Leninist explanations on why Bolshevism created a new class system, not socialism.

This subject is very important. Unless we learn the lessons of history we will be doomed to repeat them. Given the fact that many people who become interested in socialist ideas will come across the remnants of Leninist parties it is important that anarchists explain clearly and convincingly why the Russian Revolution failed and the role of Bolshevik ideology in that process. We need to account why a popular revolution became in a few short years a state capitalist party dictatorship. As Noam Chomsky put it:

*“In the stages leading up to the Bolshevik coup in October 1917, there **were** incipient socialist institutions developing in Russia — workers’ councils, collectives, things like that. And they survived to an extent once the Bolsheviks took over — but not for very long; Lenin and Trotsky pretty much eliminated them as they consolidated their power. I mean, you can argue about the **justification** for eliminating them, but the fact is that the socialist initiatives were pretty quickly eliminated.*

*“Now, people who want to justify it say, ‘The Bolsheviks had to do it’ — that’s the standard justification: Lenin and Trotsky had to do it, because of the contingencies of the civil war, for survival, there wouldn’t have been food otherwise, this and that. Well, obviously the question is, was that true. To answer that, you’ve got to look at the historical facts: I don’t think it was true. In fact, I think the incipient socialist structures in Russia were dismantled **before** the really dire conditions arose . . . But reading their own writings, my feeling is that Lenin and Trotsky knew what they were doing, it was conscious and understandable.” [Understanding Power, p. 226]*

As we discussed in the appendix on “What happened during the Russian Revolution?”, Chomsky’s feelings are more than supported by the historical record. The elimination of meaningful working class freedom and self-management started from the start and was firmly in place before the start of the civil war at the end of May, 1918. The civil war simply accelerated processes which had already started, strengthened policies that had already been applied. And it could be argued that rather than impose alien policies onto Bolshevism, the civil war simply brought the hidden (and not-so-hidden) state capitalist and authoritarian politics of Marxism and Leninism to the fore.

Which is why analysing the failure of the revolution is important. If the various arguments presented by Leninists on why Bolshevism failed (and, consequently, Stalinism developed) can be refuted, then we are left with the key issues of revolutionary politics — whether Bolshevik politics had a decisive negative impact on the development of the Russian Revolution and, if so, there is an alternative to those politics. As regards the first issue, as we discussed in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, anarchists argue that this was the case. Bolshevik ideology itself played a key role in the degeneration of the revolution. And as regards the second one, anarchists can point to the example of the Makhnovists, which proves that alternative policies were possible and could be applied with radically different outcomes (see the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?” for more on the Makhnovist movement).

This means that anarchists stress the interplay between the “objective factors” and the subjective one (i.e. party ideology). Faced with difficult circumstances, people and parties react in different ways. If they did not then it would imply what they thought has no impact at all on their actions. It also means that the politics of the Bolsheviks played no role in their decisions. As we discussed in the appendix on “What happened during the Russian Revolution?”, this position simply cannot be maintained. Leninist ideology itself played a key role in the rise of Stalinism. A conclusion Leninists reject. They, of course, try to distance themselves from Stalinism, correctly arguing that it was a brutal and undemocratic system. The problem is that it was Lenin and Trotsky rather than Stalin who first shot strikers, banned left papers, radical organisations and party factions, sent workers and revolutionaries to the gulags, advocated and introduced one-man management and piece-work in the workplace, eliminated democracy in the military and shut down soviets elected with the “wrong” (i.e. non-Bolshevik) delegates.

Many Leninists know nothing of these facts. Their parties simply do not tell them the whole story of when Lenin and Trotsky were in power. Others do know and attempt to justify these actions. When anarchists discuss why the Russian Revolution failed, these Leninists have basically one reply. They argue that anarchists never seem to consider the objective forces at play during the Russian revolution, namely the civil war, the legacy of World War One, the international armies of counter-revolution and economic disruption. These “*objective factors*” meant that the revolution was, basically, suffocated and where the overriding contribution to the rise of militarism and the crushing of democracy within the soviets.

For anarchists such “*objective factors*” do not (and must not) explain why the Russian Revolution failed. This is because, as we argue in the following sections, almost all revolutions will face the same, or similar, problems. Indeed, in sections 1 and 2 both anarchists like Kropotkin and Marxists like Lenin argued that this was the case. As we discussed in section H.2.1, Leninists like to claim that they are “*realistic*” (unlike the “*utopian*” anarchists) and recognise civil war is inevitable in a revolution. As section 3 indicates, any defence of Bolshevism based on blaming the impact of the civil war is both factually and logically flawed. As far as economic disruption goes, as we discuss in section 4 this explanation of Bolshevik authoritarianism is unconvincing as **every** revolution will face this problem. Then section 5 analyses the common Leninist argument that the revolution failed because the Russian working class became “*atomised*” or “*declassed*.” As that section indicates, the Russian working class was more than capable of collective action throughout the 1918 to 1921 period (and beyond). The problem was that it was directed **against** the Bolshevik party. Finally, section 6 indicates whether the Bolshevik leaders explained their actions in terms of the “objective factors” they faced.

It should be stressed that we are discussing these factors individually simply because it is easier to do so. In reality, it is less hard to do so. For example, civil war will, undoubtedly, mean economic disruption. Economic disruption will mean unemployment and that will affect the working class via unemployment and less goods available (for example). So just because we separate the specific issues for discussion purposes, it should not be taken to imply that we are not aware of their combined impact on the Russian Revolution.

Of course there is the slight possibility that the failure of Bolshevism can

be explained **purely** in these terms. Perhaps a future revolution will be less destructive, less isolated, less resisted than the Russian (although, as we noted in the section 2, leading Bolsheviks like Lenin, Trotsky and Bukharin doubted this). That **is** a possibility. However, should we embrace an ideology whose basic, underlying, argument is based on the hope that fate will be kinder to them this time? As Lenin argued against the Russian left-communists in early 1918:

“Yes, we shall see the world revolution, but for the time being it is a very good fairy-tale . . . But I ask, is it proper for a serious revolutionary to believe in fairy-tales? . . . [I]f you tell the people that civil war will break out in German and also guarantee that instead of a clash with imperialism we shall have a field revolution on a world-wide scale, the people will say you are deceiving them. In doing this you will be overcoming the difficulties with which history has confronted us only in your minds, by your wishes . . . You are staking everything on this card! If the revolution breaks out, everything is saved . . . But if it does not turn out as we desire, if it does not achieve victory tomorrow — what then? Then the masses will say to you, you acted like gamblers — you staked everything on a fortunate turn of events that did not take place . . . ” [**Collected Works**, vol. 27, p. 102]

Anarchists have always recognised that a revolution would face problems and difficult “objective factors” and has developed our ideas accordingly. We argue that to blame “*objective factors*” on the failure of the Russian Revolution simply shows that believing in fairy-tales is sadly far too common on the “*serious*” Leninist “revolutionary” left. And as we discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, the impact of Bolshevik ideology on the failure of the revolution was important and decisive. Even **if** the next revolution is less destructive, it cannot be argued that socialism will be the result if Bolshevik ideology is reapplied. And as Cornelius Castoriadis argues, “*this ‘response’ [of explaining the failure of the Russian Revolution on “objective factors”] teaches us nothing we could extend beyond the confines of the Russian situation in 1920. The sole conclusion to be drawn from this kind of ‘analysis’ is that revolutionaries should ardently hope that future revolutions break out in more advanced countries, that they should not remain isolated, and that civil wars should not in the least be devastating.*” [**The Role of Bolshevik Ideology in the Birth of the Bureaucracy**, p. 92] While this may be sufficient for the followers of Bolshevism, it cannot be sufficient for anyone who wants to learn from history, not to repeat it.

Ultimately, if difficult times back in 1918–21 justified suppressing working class freedom and self-management, imprisoning and shooting anarchists and other socialists, implementing and glorifying party dictatorship, what might we expect in difficult times in the future? Simply put, if your defence of the Bolsheviks rests simply on “difficult circumstances” then it can only mean one thing, namely if “difficult circumstances” occur again we can expect the same outcome.

One last point. We should stress that libertarians do not think any future revolution will suffer as terrible conditions as that experienced by the Russian

one. However, it might and we need to base our politics on the worse case possibility. That said, we argue that Bolshevik policies made things worse — by centralising economic and political power, they automatically hindered the participation of working class people in the revolution, smothering any creative self-activity under the dead-weight of state officialdom. As a libertarian revolution would be based on maximising working class self-activity (at all levels, locally and upwards) we would argue that it would be better placed to respond to even the terrible conditions facing the Russian Revolution.

That is not all. As we argue in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?” we are of the opinion that Bolshevism itself undermined the socialist potential of the revolution, irrespective of the actual circumstances involved (which, to some degree, will affect **any** revolution). For example, the Bolshevik preference for centralisation and nationalisation would negatively affect a revolution conducted in even the best circumstances, as would the seizure of state power rather than its destruction. As is clear from the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, only the elimination of what makes Bolshevism Bolshevik would ensure that a revolution would be truly libertarian. So anarchists stress that rather than be forced upon them by “*objective factors*” many of these policies were, in fact, in line with pre-civil war Bolshevik ideas. The Bolshevik vision of socialism, in other words, ensured that they smothered the (libertarian) socialist tendencies and institutions that existed at the time. As Chomsky summarises, “*Lenin and Trotsky, shortly after seizing state power in 1917, moved to dismantle organs of popular control, including factory committees and Soviets, thus proceeding to deter and overcome socialist tendencies.*” [Detering Democracy, p. 361] That they **thought** their system of state capitalism was a form of “socialism” is irrelevant — they systematically combated (real) socialist tendencies in favour of state capitalist ones and did so knowingly and deliberately (see sections H.3.1 and H.3.13 on the differences between real socialism and Marxism in its Bolshevik mode and, of course, “What happened during the Russian Revolution?” on Bolshevik practice itself).

So it is important to stress that even **if** the Russian Revolution had occurred in better circumstances, it is unlikely that Bolshevism would have resulted in socialism rather than state capitalism. Certain Bolshevik principles ensure that any revolution lead by a vanguard party would not have succeeded. This can be seen from the experience of Bolshevism immediately after it seized power, before the start of the civil war and major economic collapse. In the circumstances of post-world war I Russia, these principles were attenuated but their application in even the best of situations would have undermined socialist tendencies in the revolution. Simply put, a statist revolution will have statist, not libertarian, ends.

The focusing on “objective factors” (particularly the civil war) has become the traditional excuse for people with a romantic attachment to Leninism but who are unwilling to make a stand over what the Bolsheviks actually did in power. This excuse is not viable if you seek to build a revolutionary movement today: you need to choose between the real path of Lenin and the real, anarchist, alternative. As Lenin constantly stressed, a revolution will be difficult — fooling ourselves about what will happen now just undermines our chances of success in the future and ensure that history will repeat itself.

Essentially, the “objective factors” argument is not a defence of Leninism,

but rather one that seeks to evade having to make such a defence. This is very typical of Leninist parties today. Revolutionary politics would be much better served by confronting this history and the politics behind it head on. Perhaps, if Leninists did do this, they would probably remain Leninists, but at least then their party members and those who read their publications would have an understanding of what this meant. And they would have to dump Lenin's **State and Revolution** into the same place Lenin himself did when in power — into the rubbish bin — and admit that democracy and Bolshevik revolution do not go together.

It is precisely these rationalisations for Bolshevism based on “objective factors” which this section of the FAQ discusses and refutes. However, it is important to stress that it was **not** a case of the Bolshevik regime wanting to introduce communism but, being isolated, ended up imposing state capitalism instead. Indeed, the idea that “objective factors” caused the degeneration of the revolution is only valid if and only if the Bolsheviks were implementing socialist policies during the period immediately after the October revolution. That was not the case. Rather than objective factors undermining socialist policies, the facts of the matter are that the Bolsheviks pursued a statist and (state) capitalist policy from the **start**. As we discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?” the likes of Lenin explicitly argued for these policies as essential for building socialism (or, at best, the preconditions of socialism) in Russia and Bolshevik practice flowed from these comments. As we discuss in more detail in the appendix on “What happened during the Russian Revolution?”, the Bolsheviks happily introduced authoritarian and state capitalist policies **from the start**. Many of the policies denounced as “Stalinist” by Leninists were being advocated and implemented by Lenin in the spring of 1918, i.e. before the start of the civil war and massive economic chaos. In other words, the usual excuses for Bolshevik tyranny do not hold much water, both factually and logically — as this section of the FAQ seeks to show.

And, ironically, the framework which Leninists use in this discussion shows the importance of Bolshevik ideology and the key role it played in the outcome of the revolution. After all, pro-Bolsheviks argue that the “*objective factors*” forced the **Bolsheviks** to act as they did. However, the proletariat is meant to be the “*ruling class*” in the “*dictatorship of the proletariat*.” As such, to argue that the Bolsheviks were forced to act as they did due to circumstances means to implicitly acknowledge that the party held power in Russia, **not** the working class. That a ruling party could become a party dictatorship is not that unsurprising. Nor that **its** vision of what “socialism” was would be given preference over the desires of the working class in whose name it ruled.

Ultimately, the discussion on why the Bolshevik party failed shows the validity of Bakunin's critique of Marxism. As he put it:

“Nor can we comprehend talk of freedom of the proletariat or true deliverance of the masses within the State and by the State. State signifies domination, and all domination implies subjection of the masses, and as a result, their exploitation to the advantage of some governing minority.

“Not even as revolutionary transition will we countenance national Conventions, nor Constituent Assemblies, nor provisional govern-

ments, nor so called revolutionary dictatorships: because we are persuaded that revolution is sincere, honest and real only among the masses and that, whenever it is concentrated in the hands of a few governing individuals, it inevitably and immediately turns into reaction.” [No Gods, No Masters, vol. 1, p. 160]

The degeneration of the Russian Revolution can be traced from when the Bolsheviks seized power **on behalf of** the Russian working class and peasantry. The state implies the delegation of power and initiative into the hands of a few leaders who form the “revolutionary government.” Yet the power of any revolution, as Bakunin recognised, derives from the decentralisation of power, from the active participation of the masses in the collective social movement and the direct action it generates. As soon as this power passes out of the hands of the working class, the revolution is doomed: the counter-revolution has begun and it matters little that it is draped in a red flag. Hence anarchist opposition to the state.

Sadly, many socialists have failed to recognise this. Hopefully this section of our FAQ will show that the standard explanations of the failure of the Russian revolution are, at their base, superficial and will only ensure that history will repeat itself.

1 Do anarchists ignore the objective factors facing the Russian revolution?

It is often asserted by Leninists that anarchists simply ignore the “objective factors” facing the Bolsheviks when we discuss the degeneration of the Russian Revolution. Thus, according to this argument, anarchists present a basically idealistic analysis of the failure of Bolshevism, one not rooted in the material conditions facing (civil war, economic chaos, etc.) facing Lenin and Trotsky.

According to one Trotskyist, anarchists “do not make the slightest attempt at a serious analysis of the situation” and so “other considerations, of a different, ‘theoretical’ nature, are to be found in their works.” Thus:

“Bureaucratic conceptions beget bureaucracy just as opium begets sleep by virtue of its sleep-inducing properties. Trotsky was wrong to explain the proliferation and rise of the bureaucracy on the basis of the country’s backwardness, low cultural level, and the isolation of the revolution. No, what have rise to a social phenomenon like Stalinism was a conception or idea . . . it is ideas, or deviations from them, that determine the character of revolutions. The most simplistic kind of philosophical idealism has laid low historical materialism.”
[Pierre Frank, “Introduction,” Lenin and Trotsky, **Kronstadt**, pp. 22–3]

Many other Trotskyists take a similar position (although most would include the impact of the Civil War on the rise of Bolshevik authoritarianism and the bureaucracy). Duncan Hallas, for example, argues that the account of the Bolshevik counter-revolution given in the Cohn-Bendit brothers’ **Obsolete Communism** is marked by a “complete omission of any consideration of the

circumstances in which they [Bolshevik decisions] took place. The ravages of war and civil war, the ruin of Russian industry, the actual disintegration of the Russian working class: all of this, apparently, has no bearing on the outcome." [Towards a Revolutionary Socialist Party, p. 41] Thus the "degree to which workers can 'make their own history' depends on the weight of objective factors bearing down on them . . . To decide in any given circumstance the weight of the subjective and objective factors demands a concrete analysis of the balance of forces." The conditions in Russia meant that the "subjective factor" of Bolshevik ideology "was reduced to a choice between capitulation to the Whites or defending the revolution with whatever means were at hands. Within these limits Bolshevik policy was decisive. But it could not wish away the limits and start with a clean sheet. It is a tribute to the power of the Bolsheviks' politics and organisation that they took the measures necessary and withstood the siege for so long." [John Rees, "In Defence of October," pp. 3–82, **International Socialism**, no. 52, p. 30]

So, it is argued, by ignoring the problems facing the Bolsheviks and concentrating on their **ideas**, anarchists fail to understand **why** the Bolsheviks acted as they did. Unsurprisingly anarchists are not impressed with this argument. This is for a simple reason. According to anarchist theory the "objective factors" facing the Bolsheviks are to be expected in **any** revolution. Indeed, the likes of Bakunin and Kropotkin predicted that a revolution would face the very "objective factors" which Leninists use to justify and rationalise Bolshevik actions (see next section). As such, to claim that anarchists ignore the "objective factors" facing the Bolsheviks during the Russian Revolution is simply a joke. How can anarchists be considered to ignore what they consider to be the inevitable results of a revolution? Moreover, these Bolshevik assertions ignore the fact that the anarchists who wrote extensively about their experiences in Russia never failed to note that difficult objective factors facing it. Alexander Berkman in **The Bolshevik Myth** paints a clear picture of the problems facing the revolution, as does Emma Goldman in her **My Disillusionment in Russia**. This is not to mention anarchists like Voline, Arshinov and Maximoff who took part in the Revolution, experiencing the "objective factors" first hand (and in the case of Voline and Arshinov, participating in the Makhnovist movement which, facing the same factors, managed **not** to act as the Bolsheviks did).

However, as the claim that anarchists ignore the "objective circumstances" facing the Bolsheviks is relatively common, it is important to refute it once and for all. This means that while we have discussed this issue in association with Leninist justifications for repressing the Kronstadt revolt (see section 12 of the appendix "What was the Kronstadt Rebellion?"), it is worthwhile repeating them here. We are sorry for the duplication.

Anarchists take it for granted that, to quote Bakunin, revolutions "are not child's play" and that they mean "war, and that implies the destruction of men and things." The "Social Revolution must put an end to the old system of organisation based upon violence, giving full liberty to the masses, groups, communes, and associations, and likewise to individuals themselves, and destroying once and for all the historic cause of all violences, the power and existence of the State." This meant a revolution would be "spontaneous, chaotic, and ruthless, always presupposes a vast destruction of property." [**The Political Philosophy of Bakunin**, p. 372, p. 373, p. 380] In other words:

“The way of the anarchist social revolution, which will come from the people themselves, is an elemental force sweeping away all obstacles. Later, from the depths of the popular soul, there will spontaneously emerge the new creative forms of life.” [Bakunin on Anarchism, p. 325]

He took it for granted that counter-revolution would exist, arguing that it was necessary to “*constitute the federation of insurgent associations, communes and provinces . . . to organise a revolutionary force capable of defeating reaction*” and “*for the purpose of self-defence.*” [Selected Writings, p. 171]

It would, of course, be strange if this necessity for defence and reconstruction would have little impact on the economic conditions in the revolutionised society. The expropriation of the means of production and the land by a free federation of workers’ associations would have an impact on the economy. Kropotkin built upon Bakunin’s arguments, stressing that a **social** revolution would, by necessity, involve major difficulties and harsh objective circumstances. It is worth quoting one of his many discussions of this at length:

“Suppose we have entered a revolutionary period, with or without civil war — it does not matter, — a period when old institutions are falling into ruins and new ones are growing in their place. The movement may be limited to one State, or spread over the world, — it will have nevertheless the same consequence: an immediate slackening of individual enterprise all over Europe. Capital will conceal itself, and hundreds of capitalists will prefer to abandon their undertakings and go to watering-places rather than abandon their unfixed capital in industrial production. And we know how a restriction of production in any one branch of industry affects many others, and these in turn spread wider and wider the area of depression.

*“Already, at this moment, millions of those who have created all riches suffer from want of what must be considered **necessaries** for the life of a civilised man. . . Let the slightest commotion be felt in the industrial world, and it will take the shape of a general stoppage of work. Let the first attempt at expropriation be made, and the capitalist production of our days will at once come to a stop, and millions and millions of ‘unemployed’ will join the ranks of those who are already unemployed now.*

*“More than that . . . The very first advance towards a Socialist society will imply a thorough reorganisation of industry as **to what we have to produce**. Socialism implies . . . a transformation of industry so that it may be adapted to the needs of the customer, not those of the profit-maker. Many a branch of industry must disappear, or limits its production; many a new one must develop. We are now producing a great deal for export. But the export trade will be the first to be reduced as soon as attempts at Social Revolution are made anywhere in Europe . . .*

*“All that **can** be, and **will** be reorganised in time — not by the State, of course (why, then, not say by Providence?), but by the workers themselves. But, in the meantime, the worker . . . cannot wait for the gradual reorganisation of industry. . .*

*“The great problem of how to supply the wants of millions will thus start up at once in all its immensity. And the necessity of finding an **immediate solution** for it is the reason we consider that a step in the direction of [libertarian] Communism will be imposed on the revolted society — not in the future, but as soon as it applies its crowbar to the first stones of the capitalist edifice.” [Act for Yourselves, pp. 57–9]*

As noted in section 12 of the appendix on “What was the Kronstadt Uprising?”, the perspective was at the core of Kropotkin’s politics. His classic work **Conquest of Bread** was based on this clear understanding of the nature of a social revolution and the objective problems it will face. As he put it, while a “*political revolution can be accomplished without shaking the foundations of industry*” a revolution “*where the people lay hands upon property will inevitably paralyse exchange and production . . . This point cannot be too much insisted upon; the reorganisation of industry on a new basis . . . cannot be accomplished in a few days.*” Indeed, he considered it essential to “*show how tremendous this problem is.*” [**The Conquest of Bread**, pp. 72–3]

Therefore, “[*o*]ne of the great difficulties in every Revolution is the feeding of the large towns.” This was because the “*large towns of modern times are centres of various industries that are developed chiefly for the sake of the rich or for the export trade*” and these “*two branches fail whenever any crisis occurs, and the question then arises of how these great urban agglomerations are to be fed.*” This crisis, rather than making revolution impossible, spurred the creation of what Kropotkin terms “*the communist movement*” in which “*the Parisian proletariat had already formed a conception of its class interests and had found men to express them well.*” [Kropotkin, **The Great French Revolution**, vol. II, p. 457 and p. 504]

As for self-defence, he reproached the authors of classic syndicalist utopia **How we shall bring about the Revolution** for “*considerably attenuat[ing] the resistance that the Social Revolution will probably meet with on its way.*” He stressed that the “*check of the attempt at Revolution in Russia has shown us all the danger that may follow from an illusion of this kind.*” [“*preface,*” Emile Pataud and Emile Pouget, **How we shall bring about the Revolution**, p. xxxvi]

It must, therefore, be stressed that the very “*objective factors*” supporters of Bolshevism use to justify the actions of Lenin and Trotsky were predicted correctly by anarchists decades before hand. Indeed, rather than ignore them anarchists like Kropotkin based their political and social ideas on these difficulties. As such, it seems ironic for Leninists to attack anarchists for allegedly ignoring these factors. It is even more ironic as these very same Leninists are meant to know that **any** revolution will involve these exact same “*objective factors,*” something that Lenin and other leading Bolsheviks acknowledged (see next section).

Therefore, as noted, when anarchists like Emma Goldman and Alexander Berkman arrived in Russia they were aware of the problems it, like any revolution, would face. In the words of Berkman, “*what I saw and learned as in such crying contrast with my hopes and expectations as to shake the very foundation of my faith in the Bolsheviks. Not that I expected to find Russia a proletarian Eldorado. By no means. I knew how great the travail of a revolutionary period,*

how stupendous the difficulties to be overcome. Russia was besieged on numerous fronts; there was counter-revolution within and without; the blockade was starving the country and denying even medical aid to sick women and children. The people were exhausted by long war and civil strife; industry was disorganised, the railroads broken down. I fully realised the dire situation, with Russia shedding her blood on the altar of the Revolution." [The Bolshevik Myth, p. 329] Emma Goldman expressed similar opinions. [My Disillusionment in Russia, pp. xlvii-xlix]

Unsurprisingly, therefore this extremely realistic perspective can be found in their later works. Berkman, for example, stressed that "*when the social revolution had become thoroughly organised and production is functioning normally there will be enough for everybody. But in the first stages of the revolution, during the process of re-construction, we must take care to supply the people the best we can, and equally, which means rationing.*" This was because the "*first effect of the revolution is reduced production.*" This would be initially due to the general strike which is its "*starting point.*" However, "*[w]hen the social revolution begins in any land, its foreign commerce stops: the importation of raw materials and finished products is suspended. The country may even be blockaded by the bourgeois governments.*" In addition, he thought it important not to suppress "*small scale industries*" as they would be essential when "*a country in revolution is attacked by foreign governments, when it is blockaded and deprived of imports, when its large-scale industries threaten to break down or the railways do break down.*" [ABC of Anarchism, p. 67, p. 74 p. 78–9 and p. 79]

He, of course, considered it essential that to counteract isolation workers must understand "*that their cause is international*" and that "*the organisation of labour*" must develop "*beyond national boundaries.*" However, "*the probability is not to be discounted that the revolution may break out in one country sooner than in another*" and "*in such a case it would become imperative . . . not to wait for possible aid from outside, but immediately to exert all her energies to help herself supply the most essential needs of her people by her own efforts.*" [Op. Cit., p. 78]

Emma Goldman, likewise, noted that it was "*a tragic fact that all revolutions have sprung from the loins of war. Instead of translating the revolution into social gains the people have usually been forced to defend themselves against warring parties.*" "*It seems,*" she noted, "*nothing great is born without pain and travail*" as well as "*the imperative necessity of defending the Revolution.*" However, in spite of these inevitable difficulties she point to how the Spanish anarchists "*have shown the first example in history how **Revolutions should be made***" by "*the constructive work*" of "*socialising of the land, the organisation of the industries.*" [Vision on Fire, p. 218, p. 222 and p. 55–56]

These opinions were, as can be seen, to be expected from revolutionary anarchists schooled in the ideas of Bakunin and Kropotkin. Clearly, then, far from ignoring the "*objective factors*" facing the Bolsheviks, anarchists have based their politics around them. We have always argued that a social revolution would face isolation, economic disruption and civil war and have, for this reason, stressed the importance of mass participation in order to overcome them. As such, when Leninists argue that these inevitable "*objective factors*" caused the degeneration of Bolshevism, anarchists simply reply that if it cannot handle the inevitable then Bolshevism should be avoided. Just as we would avoid a submarine which worked perfectly well until it was placed in the sea or an

umbrella which only kept you dry when it was not raining.

Moreover, what is to be made of this Leninist argument against anarchism? In fact, given the logic of their claims we have to argue we have to draw the conclusion that the Leninists seem to think a revolution **could** happen **without** civil war and economic disruption. As such it suggests that the Leninists have the “*utopian*” politics in this matter. After all, if they argue that civil war is inevitable then how can they blame the degeneration of the revolution on it? Simply put, if Bolshevism cannot handle the inevitable it should be avoided at all costs.

Ironically, as indicated in the next section, we can find ample arguments to refute the Trotskyist case against the anarchist analysis in the works of leading Bolsheviks like Lenin, Trotsky and Bukharin. Indeed, their arguments provide a striking confirmation of the anarchist position as they, like Kropotkin, stress that difficult “*objective factors*” will face **every** revolution. This means to use these factors to justify Bolshevik authoritarianism simply results in proving that Bolshevism is simply non-viable or that a liberatory social revolution is, in fact, impossible (and, as a consequence, genuine socialism).

There are, of course, other reasons why the Leninist critique of the anarchist position is false. The first is theoretical. Simply put, the Leninist position is the crudest form of economic determinism. Ideas **do** matter and, as Marx himself stressed, can play a key in how a social process develops. As we discuss in the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”, Marxist ideology played a key role in the degeneration of the revolution and in laying the groundwork for the rise of Stalinism.

Ultimately, any Leninist defence of Bolshevism based purely on stressing the “*objective factor*” implies that Bolshevik ideology played **no role** in the decisions made by the party leaders, that they simply operated on autopilot from October 1917 onwards. Yet, at the same time, they stress the importance of Leninist ideology in ensuring the “victory” of the revolution. They seek to have it both ways. However, as Samuel Farber puts it:

“determinism’s characteristic and systemic failure is to understand that what the masses of people do and think politically is as much part of the process determining the outcome of history as are the objective obstacles that most definitely limit peoples’ choices.” [Before Stalinism, p. 198]

This is equally applicable when discussing the heads of a highly centralised state who have effectively expropriated political, economic and social power from the working class and are ruling in their name. Unsurprisingly, rather than just select policies at random the Bolshevik leadership pursued consistently before, during and after the civil war policies which reflected their ideology. Hence there was a preference in policies which centralised power in the hands of a few (politically **and** economically), that saw socialism as being defined by nationalisation rather than self-management, that stressed that role and power of the vanguard above that of the working class, that saw class consciousness as being determined by how much a worker agreed with the party leadership rather than whether it expressed the actual needs and interests of the class as a whole.

Then there is the empirical evidence against the Trotskyist explanation.

As we indicate in section 3, soviet democracy and workers' power in the workplace was **not** undermined by the civil war. Rather, the process had began before the civil war started and, equally significantly, continued after its end in November 1920. Moreover, the "gains" of October Trotskyists claim that Stalinism destroyed were, in fact, long dead by 1921. Soviet democracy, working class freedom of speech, association and assembly, workers' self-management or control in the workplace, trade union freedom, the ability to strike, and a host of other, elementary, working class rights had been eliminated long before the end of the civil war (indeed, often before it started) and, moreover, the Bolsheviks did not lament this. Rather, "there is no evidence indicating that Lenin or any mainstream Bolshevik leaders lamented the loss of workers' control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921." [Samuel Farber, **Op. Cit.**, p. 44]

And then there is the example of the Makhnovist movement. Operating in the same "objective circumstances," facing the same "objective factors," the Makhnovists did **not** implement the same policies as the Bolsheviks. As we discussed in the appendix on "Why does the Makhnovist movement show there is an alternative to Bolshevism?", rather than undermine soviet, soldier and workplace democracy and replace all with party dictatorship, the Makhnovists applied these as fully as they could. Now, if "objective factors" explain the actions of the Bolsheviks, then why did the Makhnovists not pursue identical policies?

Simply put, the idea that Bolshevik policies did not impact on the outcome of the revolution is a false assertion, as the Makhnovists show. Beliefs are utopian if subjective ideas are not grounded in objective reality. Anarchists hold that part of the subjective conditions required before socialism can exist is the existence of free exchange of ideas and working class democracy (i.e. self-management). To believe that revolution is possible without freedom, to believe those in power can, through their best and genuine intentions, impose socialism from above, as the Bolsheviks did, is indeed utopian. As the Bolsheviks proved. The Makhnovists shows that the received wisdom is that there was no alternative open to the Bolsheviks is false.

So while it cannot be denied that objective factors influenced how certain Bolshevik policies were shaped and applied, the inspiration of those policies came from Bolshevik ideology. An acorn will grow and develop depending on the climate and location it finds itself in, but regardless of the "objective factors" it will grow into an oak tree. Similarly with the Russian revolution. While the circumstances it faced influenced its growth, Bolshevik ideology could not help but produce an authoritarian regime with no relationship with **real** socialism.

In summary, anarchists do not ignore the objective factors facing the Bolsheviks during the revolution. As indicated, we predicted the problems they faced and developed our ideas to counter them. As the example of the Makhnovists showed, our ideas were more than adequate for the task. Unlike the Bolsheviks.

2 Can “*objective factors*” really explain the failure of Bolshevism?

As noted in the previous section Leninists tend to argue that anarchists downplay (at best) or ignore (at worse) the “*objective factors*” facing the Bolsheviks during the Russian Revolution. As noted in the same section, this argument is simple false. For anarchists have long expected the “*objective factors*” usually used to explain the degeneration of the revolution.

However, there is more to it than that. Leninists claim to be revolutionaries. They claim to know that revolutions face problems, the civil war is inevitable and so forth. It therefore strikes anarchists as being somewhat hypocritical for Leninists to blame these very same “*objective*” but allegedly inevitable factors for the failure of Bolshevism in Russia.

Ironically enough, Lenin and Trotsky agree with these anarchist arguments. Looking at Trotsky, he dismissed the CNT’s leaderships’ arguments in favour of collaborating with the bourgeois state:

“The leaders of the Spanish Federation of Labour (CNT) . . . became, in the critical hour, bourgeois ministers. They explained their open betrayal of the theory of anarchism by the pressure of ‘exceptional circumstances.’ But did not the leaders of the German social democracy invoke, in their time, the same excuse? Naturally, civil war is not a peaceful and ordinary but an ‘exceptional circumstance.’ Every serious revolutionary organisation, however, prepares precisely for ‘exceptional circumstances’ . . . We have not the slightest intention of blaming the anarchists for not having liquidated the state with the mere stroke of a pen. A revolutionary party, even having seized power (of which the anarchist leaders were incapable in spite of the heroism of the anarchist workers), is still by no means the sovereign ruler of society. But all the more severely do we blame the anarchist theory, which seemed to be wholly suitable for times of peace, but which had to be dropped rapidly as soon as the ‘exceptional circumstances’ of the . . . revolution had begun. In the old days there were certain generals — and probably are now — who considered that the most harmful thing for an army was war. Little better are those revolutionaries who complain that revolution destroys their doctrine.”

[Stalinism and Bolshevism]

Thus to argue that the “*exceptional circumstances*” caused by the civil war are the only root cause of the degeneration of the Russian Revolution is a damning indictment of Bolshevism. After all, Lenin did not argue in **State and Revolution** that the application of soviet democracy was dependent only in “*times of peace*.” Rather, he stressed that they were for the “*exceptional circumstance*” of revolution and the civil war he considered its inevitable consequence. As such, we must note that Trotsky’s followers do not apply this critique to their own politics, which are also a form of the “*exceptional circumstances*” excuse. Given how quickly Bolshevik “*principles*” (as expressed in **The State and Revolution**) were dropped, we can only assume that Bolshevik ideas are also suitable purely for “*times of peace*” as well. As such, we must note the irony of Leninist claims that “*objective circumstances*” explains the failure of the Bolshevik

revolution.

Saying that, we should not that Trotsky was not above using such arguments himself (making later-day Trotskyists at least ideologically consistent in their hypocrisy). In the same essay, for example, he justifies the prohibition of other Soviet parties in terms of a “*measure of defence of the dictatorship in a backward and devastated country, surrounded by enemies on all sides.*” In other words, an appeal to the exceptional circumstances facing the Bolsheviks! Perhaps unsurprisingly, his followers have tended to stress this (contradictory) aspect of his argument rather than his comments that those “*who propose the abstraction of Soviets to the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat. The Bolshevik party achieved in the civil war the correct combination of military art and Marxist politics.*” [Op. Cit.] Which, of course, suggests that the prohibition of other parties had little impact on levels of soviet “democracy” allowed under the Bolsheviks (see section 6 of the appendix on “What happened during the Russian Revolution; for more on this).

This dismissal of the “*exceptional circumstances*” argument did not originate with Trotsky. Lenin repeatedly stressed that any revolution would face civil war and economic disruption. In early January, 1918, he was pointing to “*the incredibly complications of war and economic ruin*” in Russia and noting that “*the fact that Soviet power has been established . . . is why civil war has acquired predominance in Russia at the present time.*” [Collected Works, vol. 26, p. 453 and p. 459]

A few months later he states quite clearly that “*it will never be possible to build socialism at a time when everything is running smoothly and tranquilly; it will never be possible to realise socialism without the landowners and capitalists putting up a furious resistance.*” He reiterated this point, acknowledging that the “*country is poor, the country is poverty-stricken, and it is impossible just now to satisfy all demands; that is why it is so difficult to build the new edifice in the midst of disruption. But those who believe that socialism can be built at a time of peace and tranquillity are profoundly mistake: it will be everywhere built at a time of disruption, at a time of famine. That is how it must be.*” [Op. Cit., vol. 27, p. 520 and p. 517]

As regards civil war, he noted that “*not one of the great revolutions of history has take place*” without one and “*without which not a single serious Marxist has conceived the transition from capitalism to socialism.*” Moreover, “*there can be no civil war — the inevitable condition and concomitant of socialist revolution — without disruption.*” [Op. Cit., p. 496 and p. 497] He considered this disruption as being applicable to advanced capitalist nations as well:

“In Germany, state capitalism prevails, and therefore the revolution in Germany will be a hundred times more devastating and ruinous than in a petty-bourgeois country — there, too, there will be gigantic difficulties and tremendous chaos and imbalance.” [Op. Cit., vol. 28, p. 298]

And from June, 1918:

“We must be perfectly clear in our minds about the new disasters that civil war brings for every country. The more cultured a country

is the more serious will be these disasters. Let us picture to ourselves a country possessing machinery and railways in which civil war is raging., and this civil war cuts off communication between the various parts of the country. Picture to yourselves the condition of regions which for decades have been accustomed to living by the interchange of manufactured goods and you will understand that every civil war brings forth disasters.” [Op. Cit., vol. 27, p. 463]

As we discuss in section 4, the economic state of Germany immediately after the end of the war suggests that Lenin had a point. Simply put, the German economy was in a serious state of devastation, a state equal to that of Russia during the equivalent period of its revolution. If economic conditions made party dictatorship inevitable in Bolshevik Russia (as pro-Leninists argue) it would mean that soviet democracy and revolution cannot go together.

Lenin reiterated this point again and again. He argued that “*we see famine not only in Russia, but in the most cultured, advanced countries, like Germany . . . it is spread over a longer period than in Russia, but it is famine nevertheless, still more severe and painful than here.*” In fact, “*today even the richest countries are experiencing unprecedented food shortages and that the overwhelming majority of the working masses are suffering incredible torture.*” [Op. Cit., vol. 27, p. 460 and p. 461]

Lenin, unlike many of his latter day followers, did not consider these grim objective conditions are making revolution impossible. Rather, for him, there was “*no other way out of this war*” which is causing the problems “*except revolution, except civil war . . . a war which always accompanies not only great revolutions but every serious revolution in history.*” He continued by arguing that we “*must be perfectly clear in our minds about the new disasters that civil war brings for every country. The more cultured a country is the more serious will be these disasters. Let us picture to ourselves a country possessing machinery and railways in which civil war is raging, and this civil war cuts communication between the various parts of the country. Picture to yourselves the condition of regions which for decades have been accustomed to living by interchange of manufactured goods and you will understand that every civil war brings fresh disasters.*” [Op. Cit., p. 463] The similarities to Kropotkin’s arguments made three decades previously are clear (see section 1 for details).

Indeed, he mocked those who would argue that revolution could occur with “*exceptional circumstances*”:

“A revolutionary would not ‘agree’ to a proletarian revolution only ‘on the condition’ that it proceeds easily and smoothly, that there is, from the outset, combined action on the part of proletarians of different countries, that there are guarantees against defeats, that the road of the revolution is broad, free and straight, that it will not be necessary during the march to victory to sustain the heaviest casualties, to ‘bide one’s time in a besieged fortress,’ or to make one’s way along extremely narrow, impassable, winding and dangerous mountain tracks. Such a person is no revolutionary.” [Selected Works, vol. 2, p. 709]

He then turned his fire on those who failed to recognise the problems facing a revolution and instead simply blamed the Bolsheviks:

“The revolution engendered by the war cannot avoid the terrible difficulties and suffering bequeathed it by the prolonged, ruinous, reactionary slaughter of the nations. To blame us for the ‘destruction’ of industry, or for the ‘terror’, is either hypocrisy or dull-witted pedantry; it reveals an inability to understand the basic conditions of the fierce class struggle, raised to the highest degree of intensity, that is called revolution.” [Op. Cit., pp. 709–10]

Thus industrial collapse and terrible difficulties would face any revolution. It goes without saying that if it was “*hypocrisy*” to blame Bolshevik politics for these problems, it would be the same to blame these problems for Bolshevik politics. As Lenin noted, “*in revolutionary epochs the class struggle has always, inevitably, and in every country, assumed the form of **civil war**, and civil war is inconceivable without the severest destruction, terror and the restriction of formal democracy in the interests of this war.*” Moreover, “[*w*]e know that fierce resistance to the socialist revolution on the part of the bourgeoisie is inevitable in all countries, and that this resistance will **grow** with the growth of the revolution.” [Op. Cit., p. 710 and p. 712] To blame the inevitable problems of a revolution for the failings of Bolshevism suggests that Bolshevism is simply not suitable for revolutionary situations.

At the 1920 Comintern Congress Lenin lambasted a German socialist who argued against revolution because “*Germany was so weakened by the War*” that if it had been “*blockaded again the misery of the German masses would have been even more dreadful.*” Dismissing this argument, Lenin argued as follows:

“A revolution . . . can be made only if it does not worsen the workers’ conditions ‘too much.’ Is it permissible, in a communist party, to speak in a tone like this, I ask? This is the language of counter-revolution. The standard of living in Russia is undoubtedly lower than in Germany, and when we established the dictatorship, this led to the workers beginning to go more hungry and to their conditions becoming even worse. The workers’ victory cannot be achieved without sacrificing, without a temporary deterioration of their conditions. . . If the German workers now want to work for the revolution, they must make sacrifices and not be afraid to do so . . . The labour aristocracy, which is afraid of sacrifices, afraid of ‘too great’ impoverishment during the revolutionary struggle, cannot belong to the party. Otherwise the dictatorship is impossible, especially in western European countries.” [Proceedings and Documents of the Second Congress 1920, pp. 382–3]

In 1921 he repeated this, arguing that “*every revolution entails enormous sacrifice on the part of the class making it. . . The dictatorship of the proletariat in Russia has entailed for the ruling class — the proletariat — sacrifices, want and privation unprecedented in history, and the case will, in all probability, be the same in every other country.*” [Collected Works, vol. 32, p. 488] Thus Lenin is on record as saying these “objective factors” will always be the circumstances facing a socialist revolution. Indeed, in November 1922 he stated that “*Soviet rule in Russia is celebrating its fifth anniversary, It is now sounder than ever.*” [Op. Cit., vol. 33, p. 417]

All of which must be deeply embarrassing to Leninists. After all, here is Lenin arguing that the factors Leninist's list as being responsible for the degeneration of the Russian Revolution were inevitable side effects of **any** revolution!

Nor was this perspective limited to Lenin. The inevitability of economic collapse being associated with a revolution was not lost on Trotsky either (see section 12 of the appendix on "What was the Kronstadt Rebellion?"). Nikolai Bukharin even wrote the (infamous) **The Economics of the Transition Period** to make theoretical sense of (i.e. rationalise and justify) the party's changing policies and their social consequences since 1918 in terms of the inevitability of bad "objective factors" facing the revolution. While some Leninists like to paint Bukharin's book (like most Bolshevik ideas of the time) as "*making a virtue out of necessity*," Bukharin (like the rest of the Bolshevik leadership) did not. As one commentator notes, Bukharin "*believe[d] that he was formulating universal laws of proletarian revolution.*" [Stephan F. Cohen, **In Praise of War Communism: Bukharin's The Economics of the Transition Period**, p. 195]

Bukharin listed four "*real costs of revolution*," namely "*the physical destruction or deterioration of material and living elements of production, the atomisation of these elements and of sectors of the economy, and the need for unproductive consumption (civil war materials, etc.). These costs were interrelated and followed sequentially. Collectively they resulted in 'the curtailment of the process of reproduction' (and 'negative expanded reproduction')* and Bukharin's main conclusion: "*the production "anarchy" . . . , "the revolutionary disintegration of industry," is an historically inevitable stage which no amount of lamentation will prevent.*" This was part of a general argument and his "*point was that great revolutions were always accompanied by destructive civil wars . . . But he was more intent on proving that a proletarian revolution resulted in an even greater temporary fall in production than did its bourgeois counterpart.*" To do this he formulated the "*costs of revolution*" as "*a law of revolution.*" [Op. Cit., pp. 195–6 and p. 195]

Cohen notes that while this "*may appear to have been an obvious point, but it apparently came as something of a revelation to many Bolsheviks. It directly opposed the prevailing Social Democratic assumption that the transition to socialism would be relatively painless . . . Profound or not, Bolsheviks generally came to accept the 'law' and to regard it as a significant discovery by Bukharin.*" [Op. Cit., p. 196] To quote Bukharin:

"during the transition period the labour apparatus of society inevitably disintegrates, that reorganisation presupposes disorganisation, and that there the temporary collapse of productive forces is a law inherent to revolution." [quoted by Cohen, Op. Cit., p. 196]

It would appear that this "*obvious point*" would **still** come "*as something of a revelation to many Bolsheviks*" today! Significantly, of course, Kropotkin had formulated this law decades previously! How the Bolsheviks sought to cope with this inevitable law is what signifies the difference between anarchism and Leninism. Simply put, Bukharin endorsed the coercive measures of war communism as the means to go forward to socialism. As Cohen summarises, "*force and coercion . . . were the means by which equilibrium was to be forged out of disequilibrium.*" [Op. Cit., p. 198] Given that Bukharin argued that a

workers' state, by definition, could not exploit the workers, he opened up the possibility for rationalising all sorts of abuses as well as condoning numerous evils because they were "*progressive*." Nor was Bukharin alone in this, as Lenin and Trotsky came out with similar nonsense.

It should be noted that Lenin showed "*ecstatic praise for the most 'war communist' sections*" of Bukharin's work. "*Almost every passage,*" Cohen notes, "*on the role of the new state, statisation in general, militarisation and mobilisation met with 'very good,' often in three languages, . . . Most striking, Lenin's greatest enthusiasm was reserved for the chapter on the role of coercion . . . at the end [of which] he wrote, 'Now this chapter is superb!'*" [Op. Cit., pp. 202-3] Compare this to Kropotkin's comment that the "*revolutionary tribunal and the guillotine could not make up for the lack of a constructive communist theory.*" [**The Great French Revolution**, vol. II, p. 519]

Ultimately, claims that "objective factors" caused the degeneration of the revolution are mostly attempts to let the Bolsheviks off the hook for Stalinism. This approach was started by Trotsky and continued to this day. Anarchists, unsurprisingly, do not think much of these explanations. For anarchists, the list of "objective factors" listed to explain the degeneration of the revolution are simply a list of factors **every** revolution would (and has) faced — as Lenin, Bukharin and Trotsky all admitted at the time!

So we have the strange paradox of Leninists dismissing and ignoring the arguments of their ideological gurus. For Trotsky, just as for Lenin, it was a truism that revolutionary politics had to handle "*objective*" factors and "*exceptional circumstances*." And for both, they thought they had during the Russian revolution. Yet for their followers, these explain the failure of Bolshevism. Tony Cliff, one of Trotsky's less orthodox followers, gives us a means of understanding this strange paradox. Discussing the **Platform of the United Opposition** he notes that it "*also suffered from the inheritance of the exceptional conditions of the civil war, when the one-party system was transformed from a necessity into a virtue.*" [**Trotsky**, vol. 3, pp. 248-9] Clearly, "*exceptional circumstances*" explain nothing and are simply an excuse for bad politics while "*exceptional conditions*" explain everything and defeat even the best politics!

As such, it seems to us extremely ironic that Leninists blame the civil war for the failure of the revolution as they continually raise the inevitability of civil war in a revolution to attack anarchism (see section H.2.1 for an example). Did Lenin not explain in **State and Revolution** that his "*workers' state*" was designed to defend the revolution and suppress capitalist resistance? If it cannot do its proclaimed task then, clearly, it is a flawed theory. Ultimately, if "*civil war*" and the other factors listed by Leninists (but considered inevitable by Lenin) preclude the implementation of the radical democracy Lenin argued for in 1917 as the means to suppress the resistance of the capitalists then his followers should come clean and say that that work has no bearing on their vision of revolution. Therefore, given that the usual argument for the "*dictatorship of the proletariat*" is that it is required to repress counter-revolution, it seems somewhat ironic that the event it was said to be designed for (i.e. revolution) should be responsible for its degeneration!

As such, anarchists tend to think these sorts of explanations of Bolshevik dictatorship are incredulous. After all, as **revolutionaries** the people who expound these "*explanations*" are meant to know that civil war, imperialist invasion and blockade, economic disruption, and a host of other "*extremely*

difficult circumstances” are part and parcel of a revolution. They seem to be saying, “*if only the ruling class had not acted as our political ideology predicts they would then the Bolshevik revolution would have been fine*”! As Bertrand Russell argued after his trip to Soviet Russia, while since October 1917 “*the Soviet Government has been at war with almost all the world, and has at the same time to face civil war at home*” this was “*not to be regarded as accidental, or as a misfortune which could not be foreseen. According to Marrian theory, what has happened was bound to happen.*” [**The Theory and Practice of Bolshevism**, p. 103]

In summary, anarchists are not at all convinced by the claims that “*objective factors*” can explain the failure of the Russian Revolution. After all, according to Lenin and Trotsky these factors were to be expected in **any** revolution — civil war and invasion, economic collapse and so forth were not restricted to the Russian revolution. That is why they say they want a “*dictatorship of the proletariat*,” to defend against counter-revolution (see section H.3.8 on how, once in power, Lenin and Trotsky revised this position). Now, if Bolshevism cannot handle what it says is inevitable, then it should be avoided. To use an analogy:

Bolshevik: “*Join with us, we have a great umbrella which will keep us dry.*”

Anarchist: “*Last time it was used, it did not work. We all got soaked!*”

Bolshevik: “*But what our anarchist friend fails to mention is that it was raining at the time!*”

Not very convincing! Yet, sadly, this is the logic of the common Leninist justification of Bolshevik authoritarianism during the Russian Revolution.

3 Can the civil war explain the failure of Bolshevism?

One of the most common assertions against the anarchists case against Bolshevism is that while we condemn the Bolsheviks, we fail to mention the civil war and the wars of intervention. Indeed, for most Leninists the civil war is usually considered the key event in the development of Bolshevism, explaining and justifying all anti-socialist acts conducted by them after they seized power.

For anarchists, such an argument is flawed on two levels, namely logical and factual. The logical flaw is that Leninist argue that civil war is inevitable after a revolution. They maintain, correctly, that it is unlikely that the ruling class will disappear without a fight. Then they turn round and complain that because the ruling class did what the Marxists predicted, the Russian Revolution failed! And they (incorrectly) harp on about anarchists ignoring civil war (see section H.2.1).

So, obviously, this line of defence is nonsense. If civil war is inevitable, then it cannot be used to justify the failure of the Bolshevism. Marxists simply want to have their cake and eat it to. You simply cannot argue that civil war is inevitable and then blame it for the failure of the Russian Revolution.

The other flaw in this defence of Bolshevism is the factual one, namely the awkward fact that Bolshevik authoritarianism started **before** the civil war broke out. Simply put, it is difficult to blame a course of actions on an event which had not started yet. Moreover, Bolshevik authoritarianism **increased** after the civil war finished. This, incidentally, caused anarchists like Alexander Berkman to re-evaluate their support for Bolshevism. As he put it, *“I would not concede the appalling truth. Still the hope persisted that the Bolsheviks, though absolutely wrong in principle and practice, yet grimly held on to **some** shreds of the revolutionary banner. ‘Allied interference,’ ‘the blockade and civil war,’ ‘the necessity of the transitory stage’ — thus I sought to placate my outraged conscience . . . At last the fronts were liquidated, civil war ended, and the country at peace. But Communist policies did not change. On the contrary . . . The party groaned under the unbearable yoke of the Party dictatorship. . . Then came Kronstadt and its simultaneous echoes throughout the land . . . Kronstadt was crushed as ruthlessly as Thiers and Gallifet slaughtered the Paris Communards. And with Kronstadt the entire country and its last hope. With it also my faith in the Bolsheviks.”* [The Bolshevik Myth, p. 331]

If Berkman had been in Russia in 1918, he may have realised that the Bolshevik tyranny during the civil war (which climaxed, post civil war, with the attack on Kronstadt — see the appendix on “What was the Kronstadt Rebellion?” for more on the Kronstadt rebellion) was not at odds with their pre-civil war activities to maintain their power. The simple fact is that Bolshevik authoritarianism was **not** caused by the pressures of the civil war, rather they started before then. All the civil war did was strengthen certain aspects of Bolshevik ideology and practice which had existed from the start (see the appendix on “How did Bolshevik ideology contribute to the failure of the Revolution?”).

While we discuss the Russian Revolution in more detail in the appendix on “What happened during the Russian Revolution?”, it is useful to summarise the Bolshevik attacks on working class power and autonomy before the civil war broke out (i.e. before the end of May 1918).

The most important development during this period was the suppression of soviet democracy and basic freedoms. As we discuss in section 6 of the appendix on “What happened during the Russian Revolution?”, the Bolsheviks pursued a policy of systematically undermining soviet democracy from the moment they seized power. The first act was the creation of a Bolshevik government over the soviets, so marginalising the very organs they claimed ruled in Russia. The process was repeated in the local soviets, with the executive committees holding real power while the plenary sessions become infrequent and of little consequence. Come the spring of 1918, faced with growing working class opposition they started to delay soviet elections. When finally forced to hold elections, the Bolsheviks responded in two ways to maintain their power. Either they gerrymandered the soviets, packing them with representatives of Bolshevik dominated organisation or they simply disbanded them by force if they lost the soviet elections (and repressed by force any protests against this). This was the situation at the grassroots. At the summit of the soviet system, the Bolsheviks simply marginalised the Central Executive Committee of the soviets. Real power was held by the Bolshevik government. The power of the soviets had simply become a fig-leaf for a “soviet power” — the handful of Bolsheviks who made up the government and the party’s central committee.

It should be stressed that the Bolshevik assault on the soviets occurred in

March, April and May 1918. That is, **before** the Czech uprising and the onset of full-scale civil war. So, to generalise, it cannot be said that it was the Bolshevik party that alone whole-heartedly supported Soviet power. The facts are that the Bolsheviks only supported “*Soviet power*” when the soviets were Bolshevik. As recognised by the left-Menshevik Martov, who argued that the Bolsheviks loved Soviets only when they were “*in the hands of the Bolshevik party.*” [quoted by Getzler, **Martov**, p. 174] If the workers voted for others, “*soviet power*” was quickly replaced by party power (the real aim). The Bolsheviks had consolidated their position in early 1918, turning the Soviet State into a de facto one party state by gerrymandering and disbanding of soviets before the start of the Civil War.

Given this legacy of repression, Leninist Tony Cliff’s assertion that it was only “*under the iron pressure of the civil war [that] the Bolshevik leaders were forced to move, as the price of survival, to a one-party system*” needs serious revising. Similarly, his comment that the “*civil war undermined the operation of the local soviets*” is equally inaccurate, as his is claim that “*for some time — i.e. until the armed uprising of the Czechoslovak Legion — the Mensheviks were not much hampered in their propaganda work.*” Simply put, Cliff’s statement that “*it was about a year after the October Revolution before an actual monopoly of political power was held by one party*” is false. Such a monopoly existed **before** the start of the civil war, with extensive political repression existing **before** the uprising of the Czechoslovak Legion which began it. There was a **de facto** one-party state by the spring of 1918. [**Lenin**, vol. 3, p. 163, p. 150, p. 167 and p. 172]

The suppression of Soviet democracy reached its logical conclusion in 1921 when the Kronstadt soviet, heart of the 1917 revolution, was stormed by Bolshevik forces, its leaders executed or forced into exile and the rank and file imprisoned, and scattered all over the USSR. Soviet democracy was not just an issue of debate but one many workers died in fighting for. As can be seen, similar events to those at Kronstadt had occurred three years previously.

Before turning to other Bolshevik attacks on working class power and freedom, we need to address one issue. It will be proclaimed that the Mensheviks (and SRs) were “*counter-revolutionaries*” and so Bolshevik actions against them were justified. However, the Bolsheviks’ started to suppress opposition soviets **before** the civil war broke out, so at the time neither group could be called “*counter-revolutionary*” in any meaningful sense of the word. The Civil War started on the 25th of May and the SRs and Mensheviks were expelled from the Soviets on the 14th of June. While the Bolsheviks “*offered some formidable fictions to justify the expulsions*” there was “*of course no substance in the charge that the Mensheviks had been mixed in counter-revolutionary activities on the Don, in the Urals, in Siberia, with the Czechoslovaks, or that they had joined the worst Black Hundreds.*” [Getzler, **Op. Cit.**, p. 181] The charge that the Mensheviks “*were active supporters of intervention and of counter-revolution*” was “*untrue . . . and the Communists, if they ever believed it, never succeeded in establishing it.*” [Schapiro, **Op. Cit.**, p. 193] The Bolsheviks expelled the Mensheviks in the context of political losses before the Civil War. As Getzler notes the Bolsheviks “*drove them underground, just on the eve of the elections to the Fifth Congress of Soviets in which the Mensheviks were expected to make significant gains.*” [**Op. Cit.**, p. 181]

Attacks on working class freedoms and democracy were not limited to the

soviets. As well as the gerrymandering and disbanding of soviets, the Bolsheviks had already presented economic visions much at odds with what most people consider as fundamentally socialist. Lenin, in April 1918, was arguing for one-man management and “[o]bedience, and unquestioning obedience at that, during work to the one-man decisions of Soviet directors, of the dictators elected or appointed by Soviet institutions, vested with dictatorial powers.” [Six Theses on the Immediate Tasks of the Soviet Government, p. 44] His support for a new form of wage slavery involved granting state appointed “individual executives dictatorial powers (or ‘unlimited’ powers).” Large-scale industry (“the foundation of socialism”) required “thousands subordinating their will to the will of one,” and so the revolution “demands” that “the people **unquestioningly** obey the single will of the leaders of labour.” Lenin’s “superior forms of labour discipline” were simply hyper-developed capitalist forms. The role of workers in production was the same, but with a novel twist, namely “unquestioning obedience to the orders of individual representatives of the Soviet government during the work.” [Lenin, **Selected Writings**, vol. 2, p. 610, p. 611, p. 612]

This simply replaced private capitalism with **state** capitalism. “In the shops where one-man management (Lenin’s own preference) replaced collegial management,” notes Diane Koenker, “workers faced the same kinds of authoritarian management they thought existed only under capitalism.” [Labour Relations in Socialist Russia, p. 177] If, as many Leninists claim, one-man management was a key factor in the rise of Stalinism and/or “state-capitalism” in Russia, then, clearly, Lenin’s input in these developments cannot be ignored. After advocating “one-man management” and “state capitalism” in early 1918, he remained a firm supporter of them. In the light of this it is bizarre that some later day Leninists claim that the Bolsheviks only introduced one-man management because of the Civil War. Clearly, this was **not** the case. It was **this** period (before the civil war) that saw Lenin advocate and start to take the control of the economy out of the hands of the workers and placed into the hands of the Bolshevik party and the state bureaucracy.

Needless to say, the Bolshevik undermining of the factory committee movement and, consequently, genuine worker’s self-management of production in favour of state capitalism cannot be gone into great depth here (see the appendix on “What happened during the Russian Revolution?”, for a fuller discussion). Suffice to say, the factory committees were deliberately submerged in the trade unions and state control replaced workers’ control. This involved practising one-man management and, as Lenin put in at the start of May 1918, “our task is to study the state capitalism of the Germans, to spare **no effort** in copying it and not to shrink from adopting **dictatorial** methods to hasten the copying of it.” He stressed that this was no new idea, rather he “gave it **before** the Bolsheviks seized power.” [Selected Writings, vol. 2, p. 635 and p. 636]

It will be objected that Lenin advocated “workers’ control.” This is true, but a “workers’ control” of a **very** limited nature. As we discuss in section H.3.14, rather than seeing “workers’ control” as workers managing production directly, he always saw it in terms of workers’ “controlling” those who did and his views on this matter were **radically** different to those of the factory committees. This is not all, as Lenin always placed his ideas in a statist context — rather than base socialist reconstruction on working class self-organisation from below, the Bolsheviks started “to build, from the top, its ‘unified administration’” based on central bodies created by the Tsarist government in 1915

and 1916. [Maurice Brinton, **The Bolsheviks and Workers' Control**, p. 36] The institutional framework of capitalism would be utilised as the principal (almost exclusive) instruments of "socialist" transformation. Lenin's support for "*one-man management*" must be seen in this context, namely his vision of "*socialism*."

Bolshevik advocating and implementing of "*one-man management*" was not limited to the workplace. On March 30th Trotsky, as Commissar of Military Affairs, set about reorganising the army. The death penalty for disobedience under fire was reintroduced, as was saluting officers, special forms of address, separate living quarters and privileges for officers. Officers were no longer elected. Trotsky made it clear: "*The elective basis is politically pointless and technically inexpedient and has already been set aside by decree.*" [quoted by Brinton, **Op. Cit.**, pp. 37–8] The soldiers were given no say in their fate, as per bourgeois armies.

Lenin's proposals also struck at the heart of workers' power in other ways. For example, he argued that "*we must raise the question of piece-work and apply it . . . in practice.*" [**The Immediate Tasks Of The Soviet Government**, p. 23] As Leninist Tony Cliff (of all people) noted, "*the employers have at their disposal a number of effective methods of disrupting th[e] unity [of workers as a class]. Once of the most important of these is the fostering of competition between workers by means of piece-work systems.*" He notes that these were used by the Nazis and the Stalinists "*for the same purpose.*" [**State Capitalism in Russia**, pp. 18–9] Obviously piece-work is different when Lenin introduces it!

Finally, there is the question of general political freedom. It goes without saying that the Bolsheviks suppressed freedom of the press (for left-wing opposition groups as well as capitalist ones). It was also in this time period that the Bolsheviks first used the secret police to attack opposition groups. Unsurprisingly, this was not directed against the right. The anarchists in Moscow were attacked on the night of April 11–12, with armed detachments of the Cheka raiding 26 anarchist centres, killing or wounding 40 and jailing 500. Shortly afterwards the Cheka carried out similar raids in Petrograd and in the provinces. In May **Burevestnik**, **Anarkhiia**, **Golos Truda** and other leading anarchist periodicals closed down. [Paul Avrich, **The Russian Anarchists**, pp. 184–5] It must surely be a coincidence that there had been a "*continued growth of anarchist influence among unskilled workers*" after the October revolution and, equally coincidentally, that "*[b]y the spring of 1918, very little was heard from the anarchists in Petrograd.*" [David Mandel, **The Petrograd Workers and the Soviet Seizure of Power**, p. 357]

All this **before** the Trotsky provoked revolt of the Czech legion at the end of May, 1918, and the consequent "democratic counter-revolution" in favour of the Constituent Assembly (which the right-Socialist Revolutionaries led). This, to repeat, was months before the rise of the White Armies and Allied intervention. In summary, it was **before** large-scale civil war took place, in an interval of relative peace, that we see the introduction of most of the measures Leninists now try and pretend were necessitated by the Civil War itself.

So if anarchists appear to "downplay" the effects of the civil war it is not because we ignore. We simply recognise that if you think it is inevitable, you cannot blame it for the actions of the Bolsheviks. Moreover, when the Bolsheviks eliminated military democracy, undermined the factory committees, started to disband soviets elected with the "wrong" majority, repress the anarchists and

other left-wing opposition groups, and so on, **the civil war had not started yet**. So the rot had started before civil war (and consequent White Terror) and “imperialist intervention” started. Given that Lenin said that civil war was inevitable, blaming the inevitable (which had not even started yet!) for the failure of Bolshevism is **not** very convincing.

This factual problem with the “*civil war caused Bolshevik authoritarianism*” is the best answer to it. If the Bolsheviks pursued authoritarian policies before the civil war started, it is hard to justify their actions in terms of something that had not started yet. This explains why some Leninists have tried to muddy the waters somewhat by obscuring when the civil war started. For example, John Rees states that “[m]ost historians treat the revolution and the civil war as separate processes” yet “[i]n reality they were one.” He presents a catalogue of “armed resistance to the revolution,” including such “precursors of civil war before the revolution” as the suppression after the July days and the Kornilov revolt in 1917. [John Rees, “*In Defence of October*,” pp. 3–82, **International Socialism**, no. 52, p. 31–2]

Ironically, Rees fails to see how this blurring of when the civil war started actually **harms** Leninism. After all, most historians place the start of the civil war when the Czech legion revolted **because** it marked large-scale conflict between armies. It is one thing to say that authoritarianism was caused by large-scale conflict, another to say **any** form of conflict caused it. Simply put, if the Bolshevik state could not handle relatively minor forms of counter-revolution then where does that leave Lenin’s **State and Revolution**? So while the period from October to May of 1918 was not trouble free, it was not one where the survival of the new regime looked to be seriously threatened as it was after that, particularly in 1919 and 1920. Thus “civil war” will be used, as it is commonly done, to refer to the period from the Czech revolt (late May 1918) to the final defeat of Wrangel (November 1920).

So, the period from October to May of 1918, while not trouble free, was not one where the survival of the new regime looked to be seriously threatened as it was to be in 1919 and 1920. This means attempts to push the start of the civil war back to October 1917 (or even earlier) simply weakens the Leninist argument. It still leaves the major problem for the “*blame it on the civil war*” Leninists, namely to explain why the months **before** May of 1918 saw soviets being closed down, the start of the suppression of the factory committees, restrictions on freedom of speech and association, plus the repression of opposition groups (like the anarchists). Either any level of “civil war” makes Lenin’s **State and Revolution** redundant or the source of Bolshevik authoritarianism must be found elsewhere.

That covers the period **before** the start of the civil war. we now turn to the period **after** it finished. Here we find the same problem, namely an **increase** of authoritarianism even after the proclaimed cause for it (civil war) had ended.

After the White General Wrangel was forced back into the Crimea, he had to evacuate his forced to Constantinople in November 1920. With this defeat the Russian civil war had come to an end. Those familiar with the history of the revolution will realise that it was some 4 months **later** that yet another massive strike wave occurred, the Kronstadt revolt took place and the 10th Party Congress banned the existence of factions within the Bolshevik party itself. The repression of the strikes and Kronstadt revolt effectively destroying hope for mass pressure for change from below and the latter closing off the very

last “legal” door for those who opposed the regime from the left.

It could be argued that the Bolsheviks were still fighting peasant insurrections and strikes across the country, but this has everything to do with Bolshevik policies and could only be considered “*counter-revolutionary*” if you think the Bolsheviks had a monopoly of what socialism and revolution meant. In the case of the Makhnovists in the Ukraine, the Bolsheviks started that conflict by betraying them once Wrangel had been defeated. As such, any resistance to Bolshevik rule by the working class and peasantry of Russia indicated the lack of democracy within the country rather than some sort of “*counter-revolutionary*” conflict.

So even the end of the Civil War causes problems for this defence of the Bolsheviks. Simply put, with the defeat of the Whites it would be expected that some return to democratic norms would happen. It did not, in fact the reverse happened. Factions were banned, even the smallest forms of opposition was finally eliminated from both the party and society as a whole. Those opposition groups and parties which had been tolerated during the civil war were finally smashed. Popular revolts for reform, such as the Kronstadt rebellion and the strike wave which inspired it, were put down by force (see “What was the Kronstadt Rebellion?” on these events). No form of opposition was tolerated, no freedom allowed. If civil war **was** the cause of Bolshevik authoritarianism, it seems strange that it got worse after it was finished.

So, to conclude. Bolshevik authoritarianism did not begun with the start of the civil war. Anti-socialist policies were being implemented before it started. Similarly, these policies did not stop when the civil war ended, indeed the reverse happened. This, then, is the main factual problem with the “*blame the civil war*” approach. Much of the worst of the suppression of working class democracy either happened **before** the Civil War started or **after** it had finished.

As we discuss in “How did Bolshevik ideology contribute to the failure of the Revolution?”, the root causes for Bolshevik authoritarian post-October was Bolshevik ideology combined with state power. After all, how “democratic” is it to give all power to the Bolshevik party central committee? Surely socialism involves more than voting for a new government? Is it not about mass participation, the kind of participation centralised government precludes and Bolshevism fears as being influenced by “*bourgeois ideology*”? In such circumstances, moving from party rule to party dictatorship is not such leap.

That “civil war” cannot explain what happened can be shown by a counter-example which effectively shows that civil war did not inevitably mean party dictatorship over a state capitalist economy (and protesting workers and peasants!). The Makhnovists (an anarchist influenced partisan army) managed to defend the revolution and encourage soviet democracy, freedom of speech, and so on, while doing so (see the appendix “Why does the Makhnovist movement show there is an alternative to Bolshevism?” discusses the Makhnovists in some detail). In fact, the Bolsheviks tried to **ban** their soviet congresses. Which, of course, does not really fit in with the Bolsheviks being forced to be anti-democratic due to the pressures of civil war.

So, in summary, civil war and imperialist intervention cannot be blamed for Bolshevik authoritarianism simply because the latter had started before the former existed. Moreover, the example of the Makhnovists suggests that Bolshevik policies during the civil war were also not driven purely by the need for survival. As Kropotkin argued at the time, “*all foreign armed intervention*

necessarily strengthens the dictatorial tendencies of the government . . . The evils inherent in a party dictatorship have been accentuated by the conditions of war in which this party maintains its power. This state of war has been the pretext for strengthening dictatorial methods which centralise the control of every detail of life in the hands of the government, with the effect of stopping an immense part of the ordinary activity of the country. The evils natural to state communism have been increased ten-fold under the pretext that all our misery is due to foreign intervention.” [Kropotkin’s Revolutionary Pamphlets, p. 253]

In other words, while the civil war may have increased Bolshevik authoritarianism, it did not create it nor did it end with the ending of hostilities.

4 Did economic collapse and isolation destroy the revolution?

One of the most common explanations for the failure revolution is that the Bolsheviks faced a terrible economic conditions, which forced them to be less than democratic. Combined with the failure of the revolution to spread to more advanced countries, party dictatorship, it is argued, was inevitable. In the words of one Leninist:

*“In a country where the working class was a minority of the population, where industry had been battered by years of war and in conditions of White and imperialist encirclement, the balance gradually tilted towards greater coercion. Each step of the way was forced on the Bolsheviks by dire and pressing necessities.” [John Rees, “In Defence of October,” **International Socialism**, no. 52, p. 41]*

He talks of “*economic devastation*” [p. 31] and quotes various sources, including Victor Serge. According to Serge, the “*decline in production was uninterrupted. It should be noted that this decline had already begun before the revolution. In 1916 the output of agricultural machinery, for example, was down by 80 per cent compared with 1913. The year 1917 had been marked by a particularly general, rapid and serious downturn. The production figures for the principal industries in 1913 and 1918 were, in millions of **poods**: coal, from 1,738 to 731 (42 per cent); iron ore, from 57, 887 to 1,686; cast-iron, from 256 to 31.5 (12.3 per cent); steel, from 259 to 24.5; rails, from 39.4 to 1.1. As a percentage of 1913 production, output of linen fell to 75 per cent, of sugar to 24 per cent, and tobacco to 19 per cent.*” Moreover, production continued “*to fall until the end of civil war . . . For 1920, the following indices are given as a percentage of output in 1913: coal, 27 per cent; cast iron, 2.4 per cent; linen textiles, 38 per cent.*” [**Year One of the Russian Revolution**, p. 352 and p. 425]

According to Tony Cliff (another of Rees’s references), the war-damaged industry “*continued to run down*” in the spring of 1918: “*One of the causes of famine was the breakdown of transport . . . Industry was in a state of complete collapse. Not only was there no food to feed the factory workers; there was no raw material or fuel for industry . . . The collapse of industry meant unemployment for the workers.*” Cliff provides economic indexes. For large scale industry, taking 1913 as the base, 1917 saw production fall to 77%. In 1918, it was at

35% of the 1913 figure, 1919 it was 26% and 1920 was 18%. Productivity per worker also fell, from 85% in 1917, to 44% in 1918, 22% in 1919 and then 26% in 1920. [Lenin, vol. 3, pp. 67–9, p. 86 and p. 85]

In such circumstances, it is argued, how can you expect the Bolsheviks to subscribe to democratic and socialist norms? This meant that the success or failure of the revolution depended on whether the revolution spread to more advanced countries. Leninist Duncan Hallas argues that the “*failure of the German Revolution in 1918–19 . . . seems, in retrospect, to have been decisive . . . for only substantial economic aid from an advanced economy, in practice from a socialist Germany, could have reversed the disintegration of the Russian working class.*” [“Towards a revolutionary socialist party,” pp. 38–55, **Party and Class**, Alex Callinicos (ed.), p. 44]

Anarchists are not convinced by these arguments. This is for two reasons.

Firstly, we are aware that revolutions are disruptive no matter where they occur (see section 1) Moreover, Leninists are meant to know this too. Simply put, there is a certain incredulous element to these arguments. After all, Lenin himself had argued that “[e]very revolution . . . by its very nature implies a crisis, and a very deep crisis at that, both political and economic. This is irrespective of the crisis brought about by the war.” [Collected Works, vol. 30, p. 341] Serge also considered crisis as inevitable, arguing that the “*conquest of production by the proletariat was in itself a stupendous victory, one which saved the revolution’s life. Undoubtedly, so thorough a recasting of all the organs of production is impossible without a substantial decline in output; undoubtedly, too, a proletariat cannot labour and fight at the same time.*” [Op. Cit., p. 361] As we discussed in detail in section 2, this was a common Bolshevik position at the time (which, in turn, belatedly echoed anarchist arguments — see section 1). And if we look at other revolutions, we can say that this is the case.

Secondly, and more importantly, every revolution or near revolutionary situation has been accompanied by economic crisis. For example, as we will shortly prove, Germany itself was in a state of serious economic collapse in 1918 and 1919, a collapse which would have got worse if a Bolshevik-style revolution had occurred there. This means that if Bolshevik authoritarianism is blamed on the state of the economy, it is not hard to conclude that **every** Bolshevik-style revolution will suffer the same fate as the Russian one.

As we noted in section 1, Kropotkin had argued from the 1880s that a revolution would be accompanied by economic disruption. Looking at subsequent revolutions, he has been vindicated time and time again. Every revolution has been marked by economic disruption and falling production. This suggests that the common Leninist idea that a successful revolution in, say, Germany would have ensured the success of the Russian Revolution is flawed. Looking at Europe during the period immediately after the first world war, we discover great economic hardship. To quote one Trotskyist editor:

“In the major imperialist countries of Europe, production still had not recovered from wartime destruction. A limited economic upswing in 1919 and early 1920 enabled many demobilised soldiers to find work, and unemployment fell somewhat. Nonetheless, in ‘victorious’ France overall production in 1920 was still only two-thirds its pre-war level. In Germany industrial production was little more than half its 1914 level, human consumption of grains was down 44

per cent, and the economy was gripped by spiralling inflation. Average per capita wages in Prague in 1920, adjusted for inflation, were just over one-third of pre-war levels. [John Riddell, "Introduction," **Proceedings and Documents of the Second Congress, 1920**, vol. I, p. 17]

Now, if economic collapse was responsible for Bolshevik authoritarianism and the subsequent failure of the revolution, it seems hard to understand why an expansion of the revolution into similarly crisis ridden countries would have had a major impact in the development of the revolution. Since most Leninists agree that the German Revolution, we will discuss this in more detail before going onto other revolutions.

By 1918, Germany was in a bad state. Victor Serge noted "*the famine and economic collapse which caused the final ruin of the Central Powers.*" [**Op. Cit.**, p. 361] The semi-blockade of Germany during the war badly effected the economy, the "*dynamic growth*" of which before the war "*had been largely dependent on the country's involvement in the world market*". The war "*proved catastrophic to those who had depended on the world market and had been involved in the production of consumer goods ... Slowly but surely the country slithered into austerity and ultimately economic collapse.*" Food production suffered, with "*overall food production declined further after poor harvests in 1916 and 1917. Thus grain production, already well below its prewar levels, slumped from 21.8 million to 14.9 million tons in those two years.*" [V. R. Berghahn, **Modern Germany**, p. 47, pp. 47-8, p. 50]

The parallels with pre-revolution Russia are striking and it is hardly surprising that revolution did break out in Germany in November 1918. Workers' councils sprang up all across the country, inspired in part by the example of the Russian soviets (and what people **thought** was going on in Russia under the Bolsheviks). A Social-Democratic government was founded, which used the Free Corps (right-wing volunteer troops) to crush the revolution from January 1919 onwards. This meant that Germany in 1919 was marked by extensive civil war within the country. In January 1920, a state of siege was re-introduced across half the country.

This social turmoil was matched by economic turmoil. As in Russia, Germany faced massive economic problems, problems which the revolution inherited. Taking 1928 as the base year, the index of industrial production in Germany was slightly lower in 1913, namely 98 in 1913 to 100 in 1928. In other words, Germany effectively lost 15 years of economic activity. In 1917, the index was 63 and by 1918 (the year of the revolution), it was 61 (i.e. industrial production had dropped by nearly 40%). In 1919, it fell again to 37, rising to 54 in 1920 and 65 in 1921. Thus, in 1919, the "*industrial production reached an all-time low*" and it "*took until the late 1920s for [food] production to recover its 1912 level ... In 1921 grain production was still ... some 30 per cent below the 1912 figure.*" Coal production was 69.1% of its 1913 level in 1920, falling to 32.8% in 1923. Iron production was 33.1% in 1920 and 25.6% in 1923. Steel production likewise fell to 48.5% in 1920 and fell again to 36% in 1923. [V. R. Berghahn, **Op. Cit.**, p. 258, pp. 67-8, p. 71 and p. 259]

Significantly, one of the first acts of the Bolshevik government towards the new German government was to "*the offer by the Soviet authorities of two train-loads of grain for the hungry German population. It was a symbolical gesture*

and, in view of desperate shortages in Russia itself, a generous one." The offer, perhaps unsurprisingly, was rejected in favour of grain from America. [E.H. Carr, **The Bolshevik Revolution**, vol. 3, p. 106]

The similarities between Germany and Russia are clear. As noted above, in Russia, the index for large scale industry fell to 77 in 1917 from 100 in 1913, falling again to 35 in 1918, 26 in 1919 and 18 in 1920. [Tony Cliff, **Lenin**, vol. 3, p. 86] In other words, a fall of 23% between 1913 and 1917, 54.5% between 1917 and 1918, 25.7% in 1918 and 30.8% in 1919. A similar process occurred in Germany, where the fall production was 37.7% between 1913 and 1917, 8.2% between 1917 and 1918 and 33.9% between 1918 and 1919 (the year of revolution). While production did rise in 1920 by 45.9%, production was still around 45% less than before the war.

Thus, comparing the two countries we discover a similar picture of economic collapse. In the year the revolution started, production had fallen by 23% in Russia (from 1913 to 1917) and by 43% in Germany (from 1913 to 1918). Once revolution had effectively started, production fell even more. In Russia, it fell to 65% of its pre-war level in 1918, in Germany it fell to 62% of its pre-war level in 1919. Of course, in Germany revolution did not go as far as in Russia, and so production did rise somewhat in 1920 and afterwards. What is significant is that in 1923, production fell dramatically by 34% (from around 70% of its pre-war level to around 45% of that level). This economic collapse did not deter the Communists from trying to provoke a revolution in Germany that year, so suggesting that economic disruption played no role in their evaluation of the success of a revolution.

This economic chaos in Germany is never mentioned by Leninists when they discuss the "*objective factors*" facing the Russian Revolution. However, once these facts are taken into account, the superficiality of the typical Leninist explanation for the degeneration of the revolution becomes obvious. The very problems which, it is claimed, forced the Bolsheviks to act as they did also were rampant in Germany. If economic collapse made socialism impossible in Russia, it would surely have had the same effect in Germany (and any social revolution would also have faced more disruption than actually faced post 1919 in Germany). This means, given that the economic collapse in both 1918/19 and 1923 was as bad as that facing Russia in 1918 and that the Bolsheviks had started to undermine soviet and military democracy along with workers' control by spring and summer of that year (see section 5), to blame Bolshevik actions on economic collapse would mean that any German revolution would have been subject to the same authoritarianism **if** the roots of Bolshevik authoritarianism were forced by economic events rather than a product of applying a specific political ideology via state power. Few Leninists draw this obvious conclusion from their own arguments although there is no reason for them not to.

So the German Revolution was facing the same problems the Russian one was. It seems unlikely, therefore, that a successful German revolution would have been that much aid to Russia. This means that when John Rees argues that giving machinery or goods to the peasants in return for grain instead of simply seizing it required "*revolution in Germany, or at least the revival of industry*" in Russia, he completely fails to indicate the troubles facing the German revolution. "*Without a successful German revolution,*" he writes, "*the Bolsheviks were thrown back into a bloody civil war with only limited resources. The revolution was under siege.*" [John Rees, "*In Defence of October,*" pp. 3-82,

International Socialism, no. 52, p. 40 and p. 29] Yet given the state of the German economy at the time, it is hard to see how much help a successful German revolution would have been. As such, his belief that a successful German Revolution would have mitigated Bolshevik authoritarianism seems exactly that, a belief without any real evidence to support it (and let us not forget, Bolshevik authoritarianism had started before the civil war broke out — see section 3). Moreover, if the pro-Bolshevik argument Rees is expounding is correct, then the German Revolution would have been subject to the same authoritarianism as befell the Bolshevik one simply because it was facing a similar economic crisis. Luckily, anarchists argue, that this need not be the case if libertarian principles are applied in a revolution:

“The first months of emancipation will inevitably increase consumption of goods and production will diminish. And, furthermore, any country achieving social revolution will be surrounded by a ring of neighbours either unfriendly or actually enemies . . . The demands upon products will increase while production decreases, and finally famine will come. There is only one way of avoiding it. We should understand that as soon as a revolutionary movement begins in any country the only possible way out will consist in the workingmen [and women] and peasants from the beginning taking the whole national economy into their hands and organising it themselves . . . But they will not be convinced of this necessity except when all responsibility for national economy, today in the hands of a multitude of ministers and committees, is presented in a simple form to each village and city, in every factory and shop, as their own affair, and when they understand that they must direct it themselves.” [Kropotkin’s **Revolutionary Pamphlets**, pp. 77–8]

So, as regards the Russian and German revolution, Kropotkin’s arguments were proven correct. The same can be said of other revolutions as well. Basing himself on the actual experiences of both the French Revolution and the Paris Commune, we can see why Kropotkin argued as he did. The Paris Commune, for example, was born after a four-month-long siege “had left the capital in a state of economic collapse. The winter had been the severest in living memory. Food and fuel had been the main problems . . . Unemployment was widespread. Thousands of demobilised soldiers wandered loose in Paris and joined in the general hunt for food, shelter and warmth. For most working men the only source of income was the 1.50 francs daily pay of the National Guard, which in effect had become a form of unemployment pay.” The city was “near starving” and by March it was “in a state of economic and political crisis.” [Stewart Edwards, “Introduction,” **The Communards of Paris, 1871**, p. 23] Yet this economic collapse and isolation did not stop the commune from introducing and maintaining democratic forms of decision making, both political and economic. A similar process occurred during the French Revolution, where mass participation via the “sections” was not hindered by economic collapse. It was finally stopped by state action organised by the Jacobins to destroy popular participation and initiative (see Kropotkin’s **The Great French Revolution** for details).

During the Spanish Revolution, “overall Catalan production fell in the first year of war by 30 per cent, and in the cotton-working sector of the textile industry by twice as much. Overall unemployment (complete and partial) rose

by nearly a quarter in the first year, and this despite the military mobilisation decreed in September 1936. The cost of living quadrupled in just over two years; wages . . . only doubled.” [Ronald Fraser, **Blood of Spain**, p. 234] Markets, both internally and externally, for goods and raw materials were disrupted, not to mention the foreign blockade and the difficulties imposed in trying to buy products from other countries. These difficulties came on top of problems caused by the great depression of the 1930s which affected Spain along with most other countries. Yet, democratic norms of economic and social decision making continued in spite of economic disruption. Ironically, given the subject of this discussion, it was only once the Stalinist counter-revolution got going were they fatally undermined or destroyed.

Thus economic disruption need not automatically imply authoritarian policies. And just as well, given the fact that revolution and economic disruption seem to go hand in hand.

Looking further afield, even **revolutionary** situations can be accompanied with economic collapse. For example, the Argentine revolt which started in 2001 took place in the face of massive economic collapse. The economy was a mess, with poverty and unemployment at disgusting levels. Four years of recession saw the poverty rate balloon from 31 to 53 percent of the population of 37 million, while unemployment climbed from 14 to 21.4 percent, according to official figures. Yet in the face of such economic problems, working class people acted collectively, forming popular assemblies and taking over workplaces.

The Great Depression of the 1930s in America saw a much deeper economic contradiction. Indeed, it was as bad as that associated with revolutionary Germany and Russia after the first world war. According to Howard Zinn, after the stock market crash in 1929 “the economy was stunned, barely moving. Over five thousand banks closed and huge numbers of businesses, unable to get money, closed too. Those that continued laid off employees and cut the wages of those who remained, again and again. Industrial production fell by 50 percent, and by 1933 perhaps 15 million (no knew exactly) — one-fourth or one-third of the labour force — were out of work.” [**A People’s History of the United States**, p. 378]

Specific industries were badly affected. For example, total GNP fell to 53.6% in 1933 compared to its 1929 value. The production of basic goods fell by much more. Iron and Steel saw a 59.3% decline, machinery a 61.6% decline and “*non-ferrous metals and products*” a 55.9% decline. Transport was also affected, with transportation equipment declining by 64.2% railroad car production dropping by 73.6% and locomotion production declining by 86.4%. Furniture production saw a decline of 57.9%. The workforce was equally affected, with unemployment reaching 25% in 1933. In Chicago 40% of the workforce was unemployed. Union membership, which had fallen from 5 million in 1920 to 3.4 million in 1929 fell to less than 3 million by 1933. [Lester V. Chandler, **America’s Greatest Depression, 1929–1941**, p. 20, p. 23, p. 34, p. 45 and p. 228]

Yet in the face of this economic collapse, no Leninist proclaimed the impossibility of socialism. In fact, the reverse what the case. Similar arguments could apply to, say, post-world war two Europe, when economic collapse and war damage did not stop Trotskyists looking forward to, and seeking, revolutions there. Nor did the massive economic that occurred after the fall of Stalinism in Russia in the early 1990s deter Leninist calls for revolution. Indeed, you can rest assured that any drop in economic activity, no matter how large or small, will

be accompanied by Leninist articles arguing for the immediate introduction of socialism. And this was the case in 1917 as well, when economic crisis had been a fact of Russian life throughout the year. Lenin, for example, argued at the end of September of that “*Russia is threatened with an inevitable catastrophe . . . A catastrophe of extraordinary dimensions, and a famine, are unavoidably threatening . . . Half a year of revolution has passed. The catastrophe has come still closer. Things have come to a state of mass unemployment. Think of it: the country is suffering from a lack of commodities.*” [**The Threatening Catastrophe and how to Fight It**, p. 5] This did not stop him calling for revolution and seizing power. Nor did this crisis stop the creation of democratic working class organisations, such as soviets, trade unions and factory committees being formed. It did not stop mass collective action to combat those difficulties. It appears, therefore, that while the economic crisis of 1917 did not stop the development of socialist tendencies to combat it, the seizure of power by a socialist party did.

Given that no Leninist has argued that a revolution could take place in Germany after the war or in the USA during the darkest months of the Great Depression, the argument that the grim economic conditions facing Bolshevik Russia made soviet democracy impossible seem weak. By arguing that both Germany and the USA could create a viable socialist revolution in economic conditions just as bad as those facing Soviet Russia, the reasons why the Bolsheviks created a party dictatorship must be looked for elsewhere. Given this support for revolution in 1930s America and post-world war I and II Europe, you would have to conclude that, for Leninists, economic collapse only makes socialism impossible once **they** are in power! Which is hardly convincing, or inspiring.

5 Was the Russian working class atomised or “*de-classed*”?

A standard Leninist explanation for the dictatorship of the Bolshevik party (and subsequent rise of Stalinism) is based on the “*atomisation*” or “*declassing*” of the proletariat. John Rees summarises this argument as follows:

“The civil war had reduced industry to rubble. The working class base of the workers’ state, mobilises time and again to defeat the Whites, the rock on which Bolshevik power stood, had disintegrated. The Bolsheviks survived three years of civil war and wars in intervention, but only at the cost of reducing the working class to an atomised, individualised mass, a fraction of its former size, and no longer able to exercise the collective power that it had done in 1917 . . . The bureaucracy of the workers’ state was left suspended in mid-air, its class base eroded and demoralised. Such conditions could not help but have an effect on the machinery of the state and organisation of the Bolshevik Party.” [*“In Defence of October,”* pp. 3–82, **International Socialism**, no. 52, p. 65]

It is these objective factors which, it is argued, explain why the Bolshevik party substituted itself for the Russian working class. “*Under such conditions,*”

argues Tony Cliff, *“the class base of the Bolshevik Party disintegrated — not because of some mistakes in the policies of Bolshevism, not because of one or another conception of Bolshevism regarding the role of the party and its relation to the class — but because of mightier historical factors. The working class had become declassed . . . Bolshevik ‘substitutionism’ . . . did not jump out of Lenin’s head as Minerva out of Zeus’s, but was born of the objective conditions of civil war in a peasant country, where a small working class, reduced in weight, became fragmented and dissolved into the peasant masses.”* [Trotsky **on Substitutionism**, pp. 62–3] In other words, because the working class was so decimated the replacement of class power by party power was inevitable.

Before discussing this argument, we should point out that this argument dates back to Lenin. For example, he argued in 1921 that the proletariat, *“owing to the war and to the desperate poverty and ruin, has become declassed, i.e. dislodged from its class groove, and had ceased to exist as proletariat . . . the proletariat has disappeared.”* [Collected Works, vol. 33, p. 66] However, unlike his later-day followers, Lenin was sure that while it *“would be absurd and ridiculous to deny that the fact that the proletariat is declassed is a handicap”* it could still *“fulfil its task of winning and holding state power.”* [Op. Cit., vol. 32, p. 412] As we will see, the context in which Lenin started to make these arguments is important.

Anarchists do not find these arguments particularly convincing. This is for two reasons. Firstly, it seems incredulous to blame the civil war for the *“substitution”* of Bolshevik power for working class power as party power had been Lenin’s stated aim in 1917 and October saw the seizure of power by the Bolsheviks, **not** the soviets. As we saw in section 3, the Bolsheviks started to gerrymander and disband soviets to remain in power **before** the civil war started. As such, to blame the civil war and the problems it caused for the usurpation of power by the Bolsheviks seems unconvincing. Simply put, the Bolsheviks had *“substituted”* itself for the proletariat from the start, from the day it seized power in the October revolution.

Secondly, the fact is the Russian working class was far from *“atomised.”* Rather than being incapable of collective action, as Leninists assert, Russia’s workers were more than capable of taking collective action throughout the civil war period. The problem is, of course, that any such collective action was directed **against** the Bolshevik party. This caused the party no end of problems. After all, if the working class **was** the ruling class under the Bolsheviks, then who was it striking against? Emma Goldman explains the issue well:

“In my early period the question of strikes had puzzled me a great deal. People had told me that the least attempt of that kind was crushed and the participants sent to prison. I had not believed it, and, as in all similar things, I turned to Zorin [a Bolshevik] for information. ‘Strikes under the dictatorship of the proletariat!’ he had proclaimed; ‘there’s no such thing.’ He had even upbraided me for crediting such wild and impossible tales. Against whom, indeed, should the workers strike in Soviet Russia, he argued. Against themselves? They were the masters of the country, politically as well as industrially. To be sure, there were some among the toilers who were not yet fully class-conscious and aware of their own true interests. These were sometimes disgruntled, but they were elements incited by

... *self-seekers and enemies of the Revolution.*" [Living My Life, vol. 2, p. 872]

This, unfortunately, still seems to be the case in pro-Bolshevik accounts of the Revolution and its degeneration. After the Bolshevik seizure of power, the working class as an active agent almost immediately disappears from the accounts. This is unsurprising, as it does not bode well for maintaining the Bolshevik Myth to admit that workers were resisting the so-called "*proletarian dictatorship*" from the start. The notion that the working class had "*disappeared*" fits into this selective blindness well. Why discuss the actions of a class which did not exist? Thus we have a logical circle from which reality can be excluded: the working class is "*atomised*" and so cannot take industrial action, evidence of industrial action need not be looked for because the class is "*atomised*."

This can be seen from Lenin. For example, he proclaimed in October 1921 that "*the proletariat had disappeared.*" Yet this non-existent class had, in early 1921, taken collective action which "*encompassed most of the country's industrial regions.*" [J. Aves, **Workers Against Lenin**, p. 111] Significantly, the Communists (then and now) refused to call the movement a strike, preferring the word "*volynka*" which means "*go-slow.*" The Menshevik leader Dan explained why: "*The Bolshevik press carefully tried, at first, to hush up the movement, then to hide its real size and character. Instead of calling the strike a strike, they thought up various new terms — yolynka, buza and so on.*" [quoted by Aves, **Op. Cit.**, p. 112] As Russian anarchist Ida Mett succinctly put it: "*And if the proletariat was that exhausted how come it was still capable of waging virtually total general strikes in the largest and most heavily industrialised cities?*" [Ida Mett, **The Kronstadt Rebellion**, p. 81]

The year after Lenin proclaimed the proletariat "*disappeared*" we discover similar evidence of working class collective action. Ironically, it is Leninist Tony Cliff who presents the evidence that "*the number of workers involved in labour conflicts was three and a half million, and in 1923, 1,592,800.*" Strikes in state-owned workplaces in 1922 involved 192,000 workers. [**State Capitalism in Russia**, p. 28] Given that Cliff states that in 1921 there was only "*one and a quarter million*" industrial workers "*proper*" (compared to over three million in 1917), this level of strikes is extremely large — particular for members of a class which did not, according to Lenin which had "*disappeared*"!

Before providing more evidence for the existence of working class collective struggle throughout the period 1918 to 1923, it is necessary to place Lenin's comments on the "*declassing*" of the working class in context. Rather than being the result of a lack of industrial protest, Lenin's arguments were the product of its opposite — the rise in collective struggle by the Russian working class. As one historian notes: "*As discontent amongst workers became more and more difficult to ignore, Lenin . . . began to argue that the consciousness of the working class had deteriorated . . . workers had become 'declassed.'*" "*Lenin's analysis,*" he continues, "*had a superficial logic but it was based on a false conception of working-class consciousness. There is little evidence to suggest that the demands that workers made at the end of 1920 . . . represented a fundamental change in aspirations since 1917 . . . [Moreover] an analysis of the industrial unrest in 1921 shows that long-standing workers were prominent in protest.*" [J. Aves, **Op. Cit.**, p. 90 and pp. 90–1]

Lenin's pessimistic analysis of 1921 is in sharp contrast to the optimistic mood of early 1920, reproduced by the defeat of the White armies, in Bolshevik ranks. For example, writing in May, 1920, Trotsky seemed oblivious to the "atomisation" of the Russian working class, arguing that "*in spite of political tortures, physical sufferings and horrors, the labouring masses are infinitely distinct from political decomposition, from moral collapse, or from apathy . . . Today, in all branches of industry, there is going on an energetic struggle for the establishment of strict labour discipline, and for the increase of the productivity of labour. The party organisations, the trade unions, the factory and workshop administrative committees, rival each one another in this respect, with the undivided support of the working class as a whole.*" Indeed, they "concentrate their attention and will on collective problems" ("*Thanks to a regime which . . . given their life a pursue!*"). Needless to say, the party had "*the undivided support of the public opinion of the working class as a whole.*" [**Terrorism and Communism**, p. 6]

The turn around in perspective after this period did not happen by accident, independently of the working class resistance to Bolshevik rule. After all, the defeat of the Whites in early of 1920 saw the Bolsheviks take "*victory as a sign of the correctness of its ideological approach and set about the task of reconstruction on the basis of an intensification of War Communism policies with redoubled determination.*" This led to "*an increase in industrial unrest in 1920,*" including "*serious strikes.*" The resistance was "*becoming increasingly politicised.*" Thus, the stage was set for Lenin's turn around and his talk of "*declassing.*" In early 1921 "*Lenin argued that workers, who were no more demoralised than they were in early 1920, had become 'declassed' in order to justify a political clamp-down.*" [J. Aves, **Op. Cit.**, p. 37, p. 80 and p. 18]

Other historians also note this context. For example, while the "*working class had decreased in size and changed in composition, . . . the protest movement from late 1920 made clear that it was not a negligible force and that in an inchoate way it retained a vision of socialism which was not identified entirely with Bolshevik power . . . Lenin's arguments on the declassing of the proletariat was more a way of avoiding this unpleasant truth than a real reflection of what remained, in Moscow at least, a substantial physical and ideological force.*" [Richard Sakwa, **Soviet Communists in Power**, p. 261] In the words of Diane Koenker, "*[i]f Lenin's perceptions of the situation were at all representative, it appears that the Bolshevik party made deurbanisation and declassing the scapegoat for its political difficulties, when the party's own policies and its unwillingness to accept changing proletarian attitudes were also to blame.*" Ironically, this was not the first time that the Bolsheviks had blamed its problems on the lack of a "*true*" proletariat and its replacement by "*petty-bourgeois*" elements, "*[t]his was the same argument used to explain the Bolsheviks' lack of success in the early months of 1917 — that the cadres of conscious proletarians were diluted by non-proletarian elements.*" ["*Urbanisation and Deurbanisation in the Russian Revolution and Civil War,*" pp. 424–450, **The Journal of Modern History**, vol. 57, no. 3, p. 449 and p. 428]

It should be noted that the "*declassing*" argument does have a superficial validity if you accept the logic of vanguardism. After all, if you accept the premise that the party alone represents socialist consciousness and that the working class, by its own efforts, can only reach a reformist level of political conscious (at best), then any deviation in working class support for the party

obviously represents a drop in class consciousness or a “*declassing*” of the proletariat (see section H.5.1 — “*Why are vanguard parties anti-socialist?*”). Thus working class protest against the party can be dismissed as evidence of “*declassing*” which has to be suppressed rather than what it really is, namely evidence of working class autonomy and collective struggle for what it considers **its** interests to be against a new master class. In fact, the “*declassing*” argument is related to the vanguardist position which, in turn, justifies the dictatorship of the party **over** the class (see section H.5.3 — “*Why does vanguardism imply party power?*”).

So the “*declassing*” argument is not some neutral statement of fact. It was developed as a weapon on the class struggle, to justify Bolshevik repression of collective working class struggle. To justify the continuation of Bolshevik party dictatorship **over** the working class. This in turn explains why working class struggle during this period generally fails to get mentioned by later day Bolsheviks — it simply undermines their justifications for Bolshevik dictatorship. After all, how can they say that the working class could not exercise “*collective power*” when it was conducting mass strikes throughout Russia during the period 1918 to 1923?

As such, it does not seem that strange that in most Leninist account of the revolution post-October rarely, if ever, mention what the working class was actually doing. We do get statistics on the drop of the numbers of industrial workers in the cities (usually Petrograd and Moscow), but any discussion on working class protest and strikes is generally, at best, mentioned in passing or, usually, ignored utterly. Given this was meant to be a “*proletarian*” dictatorship, it seems strange this silence. It could be argued that this silence is due to the working class being decimated in number and/or “*declassified*” in terms of itself perspective. This, however, seems unlikely, as collective working class protest was common place in Bolshevik Russia. The silence can be better understood by the fact this protest was directed **against** the Bolsheviks.

Which shows the bankruptcy of what can be called the “*statistical tendency*” of analysing the Russian working class. While statistics can tell us how many workers remained in Russia in, say, 1921, it does not prove any idea of their combativeness or their ability to take collective decisions and action. If numbers alone indicated the ability of workers to take part in collective struggle, then the massive labour struggles in 1930s American would not have taken place. Millions had been made redundant. At the Ford Motor Company, 128,000 workers had been employed in the spring of 1929. There were only 37,000 by August of 1931 (only 29% of the 1929 figure). By the end of 1930, almost half of the 280,000 textile mill workers in New England were out of work. [Howard Zinn, **A People’s History of the United States**, p. 378] Yet in the face of these massive redundancies, the workers organised themselves and fought back. As we will indicate, the reduction in the number of Russian workers did not restrict their ability to make collective decisions and act collectively on them — Bolshevik repression **did**.

Moreover, while Leninists usually point to the fall in population in Petrograd and Moscow during the civil war, concentrating on these cities can be misleading. “*Using the Petrograd figures,*” notes Daniel R. Bower, “*historians have painted a lurid picture of flight from the cities. In 1918 alone the former capital lost 850,000 people and was by itself responsible for one-half of the total urban population decline of the Civil War years. If one sets aside aggregate*

figures to determine the trend characteristic of most cities, however, the experiences of Petrograd appears exception. Only a handful of cities . . . lost half their population between 1917 and 1920, and even Moscow, which declined by over 40 percent, was not typical of most towns in the northern, food-importing areas. A study of all cities . . . found that the average decline in the north (167 towns in all, excluding the capital cities) amounted to 24 percent between 1917 and 1920. Among the towns in the food-producing areas in the southern and eastern regions of the Russian Republic (a total of 128), the average decline came to only 14 percent.” [“The city in danger’: *The Civil War and the Russian Urban Population*,” **Party, State, and Society in the Russian Civil War**, Diane P. Koenker, William G. Rosenberg and Ronald Grigor Suny (eds.), p. 61] Does this mean that the possibility of soviet democracy declined less in these towns? Yet the Bolsheviks applied their dictatorships even there, suggesting that declining urban populations was not the source of their authoritarianism.

Equally, what are we to make of towns and cities which increased their populations? Some towns and cities actually grew in size. For example, Minsk, Samara, Khar’kov, Tiflis, Baku, Rostov-on-don, Tsaritsyn and Perm all grew in population (often by significant amounts) between 1910 and 1920 while other cities shrunk. [Diane Koenker, “*Urbanisation and Deurbanisation in the Russian Revolution and Civil War*,” pp. 424–450, **The Journal of Modern History**, vol. 57, no. 3, p. 425] Does that mention soviet democracy was possible in those towns but not in Petrograd or Moscow? Or does the fact that the industrial workforce grew by 14.8% between October 1920 and April 1921 mean that the possibility for soviet democracy also grew by a similar percentage? [J. Aves, **Workers Against Lenin**, p. 159]

Then there is the question of when the reduction of workers makes soviet democracy impossible. After all, between May 1917 and April 1918 the city of Moscow lost 300,000 of its two million inhabitants. Was soviet democracy impossible in April 1918 because of this? During the civil war, Moscow lost another 700,000 by 1920 (which is basically the same amount per year). [Diane Koenker, **Op. Cit.**, p. 424] When did this fall in population mean that soviet democracy was impossible? Simply put, comparing figures of one year to another simply fails to understand the dynamics at work, such as the impact of “*reasons of state*” and working class resistance to Bolshevik rule. It, in effect, turns the attention away from the state of working class autonomy and onto number crunching.

Ultimately, the question of whether the working class was too “*atomised*” to govern can only be answered by looking at the class struggle in Russia during this period, by looking at the strikes, demonstrations and protests that occurred. Something Leninists rarely do. Needless to say, certain strike waves just cannot be ignored. The most obvious case is in Petrograd just before the Kronstadt revolt in early 1921. After all, the strikes (and subsequent Bolshevik repression) inspired the sailors to revolt in solidarity with them. Faced with such events, the scale of the protest and Bolshevik repression is understated and the subject quickly changed. As we noted in section 10 of the appendix on “What was the Kronstadt Rebellion?”, John Rees states that Kronstadt was “*preceded by a wave of serious but quickly resolved strikes.*” [Rees, **Op. Cit.**, p. 61] Needless to say, he does not mention that the strikes were “*resolved*” by “*serious*” force. Nor does he explain how “*an atomised, individualised mass*” **could** conduct such “*serious*” strikes, strikes which required martial law to break. Little wonder,

then, Rees does expound on the strikes and what they meant in terms of the revolution and his own argument.

Similarly, we find Victor Serge arguing that the “*working class often fretted and cursed; sometimes it lent an ear to the Menshevik agitators, as in the great strikes at Petrograd in the spring of 1919. But once the choice was posed as that between the dictatorship of the White Generals and the dictatorship of its own party — and there was not and could not be any other choice — every fit man . . . came to stand . . . before the windows of the local party offices.*” [**Year One of the Russian Revolution**, pp. 365–6] An exhausted and atomised working class capable of “*great strikes*”? That seems unlikely. Significantly, Serge does not mention the Bolshevik acts of repression used against the rebel workers (see below). This omission cannot help distort any conclusions to be drawn from his account.

Which, incidentally, shows that the civil war was not all bad news for the Bolsheviks. Faced with working class protest, they could play the “*White card*” — unless the workers went back to work, the Whites would win. This explains why the strikes of early 1921 were larger than before and explains why they were so important. As the “*White card*” could no longer be played, the Bolshevik repression could not be excused in terms of the civil war. Indeed, given working class opposition to the party, it would be fair to say that civil war actually **helped** the Bolsheviks remain in power. Without the threat of the Whites, the working class would **not** have tolerated the Bolsheviks longer than the Autumn of 1918.

The fact is that working class collective struggle against the new regime and, consequently, Bolshevik repression, started before the outbreak of the civil war. It continued throughout the civil war period and reached a climax in the early months of 1921. Even the repression of the Kronstadt rebellion did not stop it, with strikes continuing into 1923 (and, to a lesser degree, afterward). Indeed, the history of the “*workers’ state*” is a history of the state repressing the revolt of the workers.

Needless to say, it would be impossible to give a full account of working class resistance to Bolshevism. All we can do here is give a flavour of what was happening and the sources for further information. What should be clear from our account is that the idea that the working class in this period was incapable of collective organisation and struggle is false. As such, the idea that Bolshevik “*substitutionism*” can be explained in such term is also false. In addition, it will become clear that Bolshevik repression explicitly aimed to break the ability of workers to organise and exercise collective power. As such, it seems hypocritical for modern-day Leninists to blame Bolshevik power on the “*atomisation*” of the working class when Bolshevik power was dependent on smashing working class collective organisation and resistance. Simply put, to remain in power Bolshevism, from the start, had to crush working class power. This is to be expected, given the centralised nature of the state and the assumptions of vanguardism. If you like, October 1917 did not see the end of “*dual power.*” Rather the Bolshevik state replaced the bourgeois state and working class power (as expressed in its collective struggle) came into conflict with it.

This struggle of the “*workers’ state*” against the workers started early in 1918. “*By the early summer of 1918,*” records one historian, “*there were widespread anti-Bolshevik protests. Armed clashes occurred in the factory dis-*

tricts of Petrograd and other industrial centres. Under the aegis of the Conference of Factory and Plant Representatives . . . a general strike was set for July 2.” [William Rosenberg, “Russian labour and Bolshevik Power,” pp. 98–131, **The Workers’ revolution in Russia**, 1917, Daniel H. Kaiser (ed.), p. 107] According to another historian, economic factors “were soon to erode the standing of the Bolsheviks among Petrograd workers . . . These developments, in turn, led in short order to worker protests, which then precipitated violent repressions against hostile workers. Such treatment further intensified the disenchantment of significant segments of Petrograd labour with Bolshevik-dominated Soviet rule.” [Alexander Rabinowitch, **Early Disenchantment with Bolshevik Rule**, p. 37]

The reasons for these protest movement were both political and economic. The deepening economic crisis combined with protests against Bolshevik authoritarianism to produce a wave of strikes aiming for political change. Feeling that the soviets were distant and unresponsive to their needs (with good reason, given Bolshevik postponement of soviet elections and gerrymandering of the soviets), workers turned to direct action and the initially Menshevik inspired “Conference of Factory and Plant Representatives” (also known as the “Extraordinary Assembly of Delegates from Petrograd Factories and Plants”) to voice their concerns. At its peak, reports “estimated that out of 146,000 workers still in Petrograd, as many as 100,000 supported the conference’s goals.” [Op. Cit., p. 127] The aim of the Conference (as per Menshevik policy) was to reform the existing system “from within” and, as such, the Conference operated openly. As Alexander Rabinowitch notes, “[F]or the Soviet authorities in Petrograd, the rise of the Extraordinary Assembly of Delegates from Petrograd Factories and Plants was an ominous portent of worker defection.” [Op. Cit., p. 37]

The first wave of outrage and protests occurred after Bolshevik Red Guards opened fire on a demonstration for the Constituent Assembly in early January (killing 21, according to Bolshevik sources). This demonstration “was notable as the first time workers came out actively against the new regime. More ominously, it was also the first time forces representing soviet power used violence against workers.” [David Mandel, **The Petrograd Workers and the Soviet Seizure of Power**, p. 355] It would not be the last — indeed repression by the “workers’ state” of working class protest became a recurring feature of Bolshevism.

By April “it appeared that the government was now ready to go to whatever extremes it deemed necessary (including sanctioning the arrest and even shooting of workers) to quell labour unrest. This in turn led to intimidation, apathy, lethargy and passivity of other workers. In these circumstances, growth in support of the Assembly slowed down.” [Rabinowitch, Op. Cit., p. 40] The Assembly aborted its plans for a May Day demonstration to protest the government’s policies were cancelled because of workers did not respond to the appeals to demonstrate (in part because of “Bolshevik threats against ‘protesters’” [Op. Cit., pp. 40–1]).

This apathy did not last long. After early May events “served to reinvigorate and temporarily radicalise the Assembly. These developments included yet another drastic drop in food supplies, the shooting of protesting housewives and workers in the Petrograd suburb of Kolpino, the arbitrary arrest and abuse of workers in another Petrograd suburb, Sestroresk, the closure of newspapers and the arrests of individuals who had denounced the Kolpino and Sestroresk

events, the intensification of labour unrest and conflict with the authorities in the Obukhov plant and in other Petrograd factories and districts.” [Op. Cit., p. 41]

So the next major protest wave occurred in early May, 1918, after armed guards opened fire on protesting workers in Kolpino — “*while the incident was hardly the first of its kind, it triggered a massive wave of indignation.*” Work temporarily stopped in a number of plants. Between Kolpino and early July, more than seventy incidents occurred in Petrograd, including strikes, demonstrations and anti-Bolshevik meetings. Many of these meetings “*were protests against some form of Bolshevik repression: shootings, incidents of ‘terroristic activities,’ and arrests.*” In some forty incidents “*worker’s protests focused on these issues, and the data is surely understate the actual number by a wide margin. There were as well some eighteen separate strikes or some other work stoppages with an explicitly anti-Bolshevik character.*” [Rosenberg, Op. Cit., p. 123 and pp. 123–4] Then, “[a]t the very end of May and the beginning of June, when a wave of strikes to protest at bread shortages broke out in the Nevskii district, a majority of Assembly delegates . . . resolved to call on striking Nevskii district workers to return to work and continue preparation for a general city-wide strike.” [Rabinowitch, Op. Cit., p. 42] Unfortunately, for the Assembly postponing the strikes until a “*better time*” rather than encouraging them gave the authorities time to prepare.

Things came to a head during and after the soviet elections in June. On June 20th the Obukhov works issued an appeal to the Conference of Factory and Plant Representatives “*to declare a one-day strike of protest on June 25th*” against Bolshevik reprisals for the assassination of a leading Bolshevik. “*The Bolsheviks responded by ‘invading’ the whole Nevskii district with troops and shutting down Obukhov completely. Meetings everywhere were forbidden.*” The workers were not intimidated and “[i]n scores of additional factories and shops protests mounted and rapidly spread along the railroads.” At the June 26th “*extraordinary session*” of the Conference a general strike was declared for July 2nd. Faced with this, the Bolsheviks set up “*machine guns . . . at main points throughout the Petrograd and Moscow railroad junctions, and elsewhere in both cities as well. Controls were tightened in factories. Meetings were forcefully dispersed.*” [Rosenberg, Op. Cit., pp. 126–7 and p. 127] In other words, “*as a result of extreme government intimidation, the response to the Assembly’s strike call on 2 July was negligible.*” [Rabinowitch, Op. Cit., p. 42] This repression was not trivial:

“Among other things, all newspapers were forced to print on their front pages Petrograd soviet resolutions condemning the Assembly as part of the domestic and foreign counter-revolution. Factories participating in the strike were warned that they would be shut down and individual strikers were threatened with the loss of work — threats that were subsequently made good. Printing plants suspected of opposition sympathies were sealed, the offices of hostile trade unions were raided, martial law declared on rail lines, and armed strike-breaking patrols with authority to take whatever action was necessary to prevent work stoppages were formed and put on 24-hour duty at key points throughout Petrograd.” [Op. Cit., p. 45]

Needless to say, “the Petrograd authorities drew on the dubious mandate provided by the stacked soviet elections to justify banning the Extraordinary Assembly.” [Op. Cit., p. 42] While the Bolsheviks had won around 50% of workplace votes, as we note in section 6 of the appendix on “What happened during the Russian Revolution?” they had gerrymandered the soviet making the election results irrelevant. The fact the civil war had started undoubtedly aided the Bolsheviks during this election and the fact that the Mensheviks and SRs had campaigned on a platform to win the soviet elections as the means of replacing soviet democracy by the Constituent Assembly. Many workers still viewed the soviets as **their** organisations and aimed for a functioning soviet system rather than its end.

The Bolsheviks turned on the Conference, both locally and nationally, and arrested its leading activists, so decapitating the only independent working class organisation left in Russia. As Rabinowitch argues, “the Soviet authorities were profoundly worried by the threat posed by the Assembly and fully aware if their growing isolation from workers (their only real social base) . . . Petrograd Bolsheviks developed a siege mentality and a corresponding disposition to consider any action — from suppression of the opposition press and manipulation of elections to terror even against workers — to be justified in the struggle to retain power until the start of the imminent world revolution.” [Op. Cit., pp. 43–4]

Similar events happened in other cities. As we discuss in section 6 of the appendix on “What happened during the Russian Revolution?”, the Bolsheviks had disbanded soviets elected with non-Bolshevik majorities all across Russia and suppressed the resulting working class protest. In Moscow, workers also organised a “Conference” movement and “[r]esentment against the Bolsheviks was expressed through strikes and disturbances, which the authorities treated as arising from supply difficulties, from ‘lack of consciousness,’ and because of the ‘criminal demagoguery’ of certain elements. Lack of support for current Bolshevik practices was treated as the absence of worker consciousness altogether, but the causes of the unrest was more complicated. In 1917 political issues gradually came to be perceived through the lens of party affiliation, but by mid-1918 party consciousness was reversed and a general consciousness of workers’ needs restored. By July 1918 the protest movement had lost its momentum in the face of severe repression and was engulfed by the civil war.” In the light of the fate of workers’ protest, the May 16th resolution by the Bogatyr’ Chemical Plant calling (among other things) for “freedom of speech and meeting, and an end to the shooting of citizens and workers” seems to the point. Unsurprisingly, “[f]aced with political opposition within the soviets and worker dissatisfaction in the factories Bolshevik power increasingly came to rely on the party apparatus itself.” [Richard Sakwa, “The Commune State in Moscow in 1918,” pp. 429–449, **Slavic Review**, vol. 46, no. 3/4, p. 442–3, p. 442 and p. 443]

Repression occurred elsewhere: “In June 1918 workers in Tula protested a cut in rations by boycotting the local soviet. The regime declared martial law and arrested the protestors. Strikes followed and were suppressed by violence. In Sormovo, when a Menshevik-Social Revolutionary newspaper was closed, 5,000 workers went on strike. Again firearms were used to break the strike.” Other techniques were used to break resistance. For example, the regime often threatened rebellious factories with a lock out, which involved numerous layoffs, new rules of discipline, purges of workers’ organisations and the introduction of piece work. [Thomas F. Remington, **Building Socialism in Bolshevik Russia**, p.

105 and p. 107]

Rather than the Civil War disrupting the relationship between the vanguard party and the class it claimed to lead, it was in fact the Bolsheviks who did so in face of rising working class dissent and disillusionment in the spring of 1918. In fact, “*after the initial weeks of ‘triumph’ . . . Bolshevik labour relations after October*” changed and “*soon lead to open conflict, repression, and the consolidation of Bolshevik dictatorship over the proletariat in place of proletarian dictatorship itself.*” [Rosenberg, **Op. Cit.**, p. 117]

Given this, the outbreak of the civil war consolidated workers support for the Bolsheviks and saved it from even more damaging workers’ unrest. As Thomas F. Remington puts it:

“At various times groups of workers rebelled against Bolshevik rule But for the most part, forced to choose between ‘their’ regime and the unknown horrors of a White dictatorship, most willingly defended the Bolshevik cause. The effect of this dilemma may be seen in the periodic swings in the workers’ political temper. When Soviet rule stood in peril, the war simulated a spirit of solidarity and spared the regime the defection of its proletarian base. During lulls in the fighting, strikes and demonstrations broke out.” [**Op. Cit.**, p. 101]

Which, as we will discuss, explains the increased repression in 1921 and onwards. Without the Whites, the Bolsheviks had to enforce their rule directly onto workers who did not want it. Ironically, the Whites **helped** the Bolsheviks remain in power. Without the start of the civil war, labour protest would have either ended Bolshevik rule or exposed it as a dictatorial regime.

This process of workers protest and state repression continued in 1919 and subsequent years. It followed a cyclical pattern. There was a “*new outbreak of strikes in March 1919 after the collapse of Germany and the Bolshevik reconquest of the Ukraine. The pattern of repression was also repeated. A strike at a galosh factory in early 1919 was followed by the closing of the factory, the firing of a number of workers, and the supervised re-election of its factory committee. The Soviet garrison at Astrakhan mutinied after its bread ration was cut. A strike among the city’s workers followed in support. A meeting of 10,000 Astrakhan workers was suddenly surrounded by loyal troops, who fired on the crowd with machine guns and hand grenades, killing 2,000. Another 2,000, taken prisoner, were subsequently executed. In Tula, when strikes at the defence factories stopped production for five days, the government responded by distributing more grain and arresting the strike organisers . . . strikes at Putilov again broke out, at first related to the food crisis . . . The government treated the strike as an act of counter-revolution and responded with a substantial political purge and re-organisation. An official investigation . . . concluded that many shop committees were led by [Left] Social Revolutionaries . . . These committees were abolished and management representatives were appointed in their stead.*” [Remington, **Op. Cit.**, pp. 109–10]

The strikes in Petrograd centred around the Putilov shows the response of the authorities to the “*atomised*” workers who were taking collective action. “*In March fifteen factories struck together (roughly 35,000 workers were involved) . . . workers at Putilov assembled and sent a delegation to the works committee . . . and put forward a number of demands . . . On 12 March Putilov stopped work.*”

Its workers called to others to join them, and some of them came out in a demonstration where they were fired upon by Cheka troops. Strikes then broke out at fourteen other enterprises . . . On Sunday 16 March an appeal was made to the Putilovtsy to return to normal working the following day or . . . the sailors and soldiers would be brought in. After a poor showing on the Monday, the sailor went in, and 120 workers were arrested; the sailors remained until the 21st and by the 22nd normal work had been resumed.” In July strikes broke out again in response to the cancellation of holidays which involved 25,000 workers in 31 strikes. [Mary McAuley, **Bread and Justice**, pp. 251–253 and p. 254]

In the Moscow area, while it is “*impossible to say what proportion of workers were involved in the various disturbances,*” following the lull after the defeat of the workers’ conference movement in mid-1918 “*each wave of unrest was more powerful than the last, culminating in the mass movement from late 1920.*” For example, at the end of June 1919, “*a Moscow committee of defence (KOM) was formed to deal with the rising tide of disturbances . . . KOM concentrated emergency power in its hands, overriding the Moscow Soviet, and demanding obedience from the population. The disturbances died down under the pressure of repression.*” [Richard Sakwa, **Soviet Communists in Power**, p. 94 and pp. 94–5]

Vladimir Brovkin summarises the data he provides in his essay “*Workers’ Unrest and the Bolshevik Response in 1919*” (reproduced along with data from other years in his book **Behind the Front Lines of the Civil War**) as follows:

“Data on one strike in one city may be dismissed as incidental. When, however, evidence is available from various sources on simultaneous independent strikes in different cities and overall picture begins to emerge . . . Workers’ unrest took place in Russia’s biggest and most important industrial centres: Moscow, Petrograd, Tver’, Tula, Briansk, and Sormovo. Strikes affected the largest industries . . . Workers’ demands reflected their grievances . . . The greatest diversity was in workers’ explicitly political demands or expression of political opinion . . . all workers’ resolutions demanded free and fair elections to the soviets . . . some workers . . . demanded the Constituent Assembly . . .

“The strikes of 1919 . . . fill an important gap in the development of the popular movement between October 1917 and February 1921. On the one hand, they should be seen as antecedents of similar strikes in February 1921, which forced the Communists to abandon war communism. In the capitals, workers, just as the Kronstadt sailors had, still wanted fairly elected soviets and not a party dictatorship. On the other hand, the strikes continued the protests that had began in the summer of 1918. The variety of behavioural patterns displayed during the strikes points to a profound continuity. . .

“In all known cases the Bolsheviks’ initial response to strikes was to ban public meetings and rallies . . . In several cities . . . the authorities confiscated strikers’ food rations in order to suppress the strike. In at least five cities . . . the Bolsheviks occupied the striking plant and dismissed the strikers en masse . . . In all known cases the Bolsheviks arrested strikers . . . In Petrograd, Briansk, and Astrakhan’ the Bol-

sheviks executed striking workers.” [Slavic Review, vol. 49, no. 3, pp. 370–2]

Nor was this collective struggle stop in 1919 — “*strike action remained endemic in the first nine months of 1920*” and “*in the first six months of 1920 strikes had occurred in seventy-seven per cent of middle-sized and large works.*” For the Petrograd province, soviet figures state that in 1919 there were 52 strikes with 65,625 participants and in 1920 73 strikes with 85,645, both high figures as according to one set of figures, which are by no means the lowest, there were 109,100 workers there. “*Strikes in 1920,*” recounts Aves, “*were frequently a direct protest against the intensification of War Communist labour policies, the militarisation of labour, the implementation of one-man management and the struggle against absenteeism, as well as food supply difficulties. The Communist Party press carried numerous articles attacking the slogan of ‘free labour.’*” [J. Aves, **Workers Against Lenin**, p. 69 and p. 74]

The spring of 1920 “*saw discontent on the railways all over the country.*” This continued throughout the year. For example, the Aleksansrovskii locomotive works at the end of August, workers sent three representatives to the works commissar who had them arrested. Three days later, the workers stopped work and demanded their release. The authorities locked the workers out of the works and a guard of 70 sailors were placed outside the enterprise. The Cheka arrested the workers’ soviet delegates (who were from the SR (Minority) list) as well as thirty workers. “*The opportunity was taken to carry out a general round-up*” and arrests were made at other works. After the arrests, “*a meeting was held to elect new soviet delegates but the workers refused to co-operate and a further 150 were arrested and exiled to Murmansk or transferred to other workshops.*” [Aves, **Op. Cit.**, p. 44 and pp. 46–7]

Strikes occurred in other places, such as Tula were the workforce “*contained a high proportion of skilled, long-standing, hereditary workers.*” The “*all-out strike*” started at the start of June and on 8 June the local newspaper published a declaration from the Tula soviet threatening the strikers with “*the most repressive measures, including the application of the highest measure of punishment*” (i.e. executions). The following day the city was declared to be under a “*state of siege*” by the local military authorities. The strikers lost ration cards and by 11 June there had been a return to work. Twenty-three workers were sentenced to a forced labour camp until the end of the war. However, the “*combined impact of these measures did not prevent further unrest and the workers put forward new demands.*” On 19 June, the soviet approved “*a programme for the suppression of counter-revolution*” and “*the transfer of Tula to the position of an armed camp.*” The Tula strike “*highlights the way in which workers, particularly skilled workers who were products of long-standing shop-floor subcultures and hierarchies, retained the capability as well as the will to defend their interests.*” [Aves, **Op. Cit.**, p. 50–55]

While strike activity “*was most common in Petrograd, where there had been 2.5 strikers for every workman,*” the figure for Moscow was 1.75 and 1.5 in Kazan. In early March “*a wave of strikes hit the Volga town of Samara*” when a strike by printers in spread to other enterprises. “*Strike action in Moscow did not just include traditionally militant male metal workers.*” Textile workers, tram workers and printers all took strike action. [Aves, **Op. Cit.**, p. 69, p. 72 and pp. 77–8]

Thus strike action was a constant feature of civil war Bolshevik Russia. Rather than being an “atomised” mass, the workers repeatedly organised themselves, made their demands and took collective action to achieve them. In response, the Bolshevik regime used state repression to break this collective activity. As such, if the rise of Stalinism can, as modern-day Leninists argue, be explained by the “atomisation” of the working class during the civil war then the Bolshevik regime and its repression should be credited with ensuring this happened.

The end of the civil war did not see the end of working class protest. Quite the reverse. In February and March 1921 “*industrial unrest broke out in a nation-wide wave of discontent . . . General strikes, or very widespread unrest, hit Petrograd, Moscow, Saratov and Ekaterinoslavl.*” Only one major industrial region was unaffected. As noted above, the Bolsheviks refused to call this movement a strike wave, preferring the term **volynka** (which means “go-slow”), yet “*the continued use of the term can be justified not to hide its significance but to show that workers’ protest consisted not just of strikes but also of factory occupations, ‘Italian strikes,’ demonstrations, mass meetings, the beating up of communists and so on.*” [Aves, **Op. Cit.**, p. 109 and p. 112]

In Petrograd in the beginning of February “*strikes were becoming an everyday occurrence*” and by “*the third week of February the situation rapidly deteriorated.*” The city was rocked by strikes, meetings and demonstrations. In response to the general strike the Bolsheviks replied with a “*military clamp-down, mass arrests and other coercive measures, such as the closure of enterprises, the purging of the workforce and stopping of rations which accompanied them.*” As we discuss in “What was the Kronstadt Rebellion?”, these strikes produced the Kronstadt revolt (and, as noted in section 10 of that appendix, the Bolshevik repression ensured the Petrograd workers did not act with the sailors). [Aves, **Op. Cit.**, p. 113, p. 120]

A similar process of workers revolt and state repression occurred in Moscow at the same time. There “*industrial unrest*” also “*turned into open confrontation and protest spilled on to the streets.*” Meetings were held, followed by demonstrations and strikes. Over the next few days strikes spread to other districts. Workers demanded now elections to the soviets be held. Striking railway workers sent emissaries along the railway to spread the strike and strikes spread to outside Moscow city itself and into the surrounding provinces. Unsurprisingly, Moscow and Moscow province were put under martial law and SR and menshevik leaders were arrested. [Aves, **Op. Cit.**, p. 130 pp. 139–144] However, “*military units called in*” against striking workers “*refused to open fire, and they were replaced by the armed communist detachments*” who did. “*The following day several factories went on strike*” and troops “*disarmed and locked in as a precaution*” by the government against possible fraternising. On February 23rd, “*Moscow was placed under martial law with a 24-hour watch on factories by the communist detachments and trustworthy army units.*” [Richard Sakwa, **Soviet Communists in Power**, p. 94 and pp. 94–5 and p. 245] The mixture of (economic) concessions and coercion broke the will of the strikers.

Strikes and protests occurred all across Russia at this time (see Aves, **Op. Cit.**). In Saratov, the strike started on March 3 when railroad shop workers did not return to their benches and instead rallied to discuss an anticipated further reduction in food rations. “*Led by a former Communist, the railroad workers debated resolutions recently carried by the Moscow proletariat . . . The next day*

the strike spread to the metallurgical plants and to most other large factories, as Saratov workers elected representatives to an independent commission charged with evaluating the functioning of all economic organs. When it convened, the body called for the re-election of the soviets and immediate release of political prisoners.” The ration cut “represent[ed] the catalyst, but not the cause, of the labour unrest.” While “the turmoil touched all strata of the proletariat, male and female alike, the initiative for the disturbances came from the skilled stratum that the Communists normally deemed the most conscious.” The Communists shut down the commission and they “expected workers to protest the dissolution of their elected representatives” and so they “set up a Provincial Revolutionary Committee . . . which introduced martial law both in the city and the garrison. It arrested the ringleaders of the workers’ movement . . . the police crackdown depressed the workers’ movement and the activities of the rival socialist parties.” The Cheka sentenced 219 people to death. [Donald J. Raleigh, **Experiencing Russia’s Civil War**, p. 379, p. 387, p. 388, pp. 388–9]

A similar “*little Kronstadt*” broke out in the Ukrainian town of Ekaterinoslavl at the end of May. The workers there “clearly had strong traditions of organisation” and elected a strike committee of fifteen which “put out a series of political ultimatums that were very similar in content to the demands of the Kronstadt rebels.” On 1 June, “by a pre-arranged signal” workers went on strike throughout the town, with workers joining a meeting of the railway workers. The local Communist Party leader was instructed “to put down the rebellion without mercy . . . Use Budennyi’s cavalry.” The strikers prepared a train and its driver instructed to spread the strike throughout the network. Telegraph operators were told to send messages throughout the Soviet Republic calling for “free soviets” and soon an area up to fifty miles around the town was affected. The Communists used the Cheka to crush the movement, carrying out mass arrests and shooting 15 workers (and dumping their bodies in the River Dnepr). [Aves, **Op. Cit.**, pp. 171–3]

So faced with an “atomised” working class during the period of 1918 and 1921, the Bolsheviks had to respond with martial law, mass arrests and shootings:

“It is not possible to estimate with any degree of accuracy how many workers were shot by the Cheka during 1918–1921 for participation in labour protest. However, an examination of individual cases suggests that shootings were employed to inspire terror and were not simply used in the occasional extreme case.” [Aves, **Op. Cit.**, p. 35]

Post-Kronstadt, similar Bolshevik responses to labour unrest continued. The economic crisis of 1921 which accompanied the introduction of the NEP saw unemployment rise yet “[d]espite the heavy toll of redundancies, the ability to organise strikes did not disappear. Strike statistics for 1921 continue to provide only a very rough indicator of the true scale of industrial unrest and appear not to include the first half of the year.” The spring of 1922 saw Soviet Russia “hit by a new strike wave” and the strikes “continued to reflect enterprise traditions.” That year saw 538 strikes with 197,022 participants recorded. [Aves, **Op. Cit.**, p. 183 and p. 184]

The following year saw more strikes: “In July 1923 more than 100 enterprises employing a total of some 50,000 people were on strike. In August figures totalled

some 140 enterprises and 80,000 workers. In September and November the strike wave continued unabated.” As in the civil war, the managers shut down plants, fired the workers and rehired them on an individual basis. In this way, trouble-makers were dismissed and “order” restored. “The pattern of workers’ action and Bolshevik reaction played itself out frequently in dozens of other strikes. The Bolsheviks acted with the explicit purpose of rooting out the possibility of further protest. They tried to condition workers that labour protest was futile.” The GPU “used force to disperse workers demonstrating with the arrested strike leaders.” [Vladimir Brovkin, **Russia After Lenin**, p. 174, pp. 174–5 and p. 175]

In Moscow, for example, “[b]etween 1921 and 1926, all branches of industry and transport . . . experienced wildcat strikes or other spontaneous labour disturbances. Strike waves peaked in the winter of 1920–21 . . . and in the summer and fall of 1922 and 1923 . . . during July–December 1922, for example, 65 strikes and 209 other industrial disturbances were recorded in Moscow’s state enterprises.” Metalworkers were arguably the most active sector at this time while “a number of large strikes” took place in the textile industry (where “strikes were sometimes co-ordinated by spontaneously organised strike committees or ‘parallel’ factory committees”). And in spite of repression, “politicisation continued to characterise many labour struggles” and, as before, “spontaneous labour activism hindered not only the party’s economic program but also the political and social stabilisation of the factories.” [John B. Hatch, **Labour Conflict in Moscow, 1921–1925**, p. 62, p. 63, p. 65, pp. 66–7 and p. 67]

Given this collective rebellion all across the industrial centres of Russia throughout the Civil War and after, it hard to take seriously claims that Bolshevik authoritarian was the product of an “atomisation” or “declassing” of the working class or that it had ceased to exist in any meaningful sense. Clearly it had and was capable of collective action and organisation — until it was repressed by the Bolsheviks and even then it keep returning. This implies that a key factor in rise of Bolshevik authoritarian was political — the simple fact that the workers would not vote Bolshevik in free soviet and union elections and so they were not allowed to. As one Soviet Historian put it, “taking the account of the mood of the workers, the demand for free elections to the soviets [raised in early 1921] meant the implementation in practice of the infamous slogan of soviets without communists,” although there is little evidence that the strikers actually raised that “infamous” slogan. [quoted by Aves, **Op. Cit.**, p. 123] It should also be noted that Bolshevik orthodoxy at the time stressed the necessity of Party dictatorship **over** the workers (see section H.1.2 for details).

Nor can it be said that this struggle can be blamed on “declassified” elements within the working class itself. In her study of this question, Diane Koenker notes that 90% of the change in the number of workers in Moscow “is accounted for by men. Working women did not leave the city,” their numbers dropping from 90,000 in 1918 to 80,000 in 1920. Why these 80,000 women workers should be denied a say in their own revolution is not clear, given the arguments of the pro-Bolshevik left. After all, the same workers remained in roughly the same numbers. Looking at the male worker population, their numbers fell from 215,000 to 124,000 during the same period. However, “the skilled workers whose class consciousness and revolutionary zeal had helped win the October revolution did not entirely disappear, and the women who remained were likely to be family members of these veterans of 1917.” It was “the loss of young activists

rather than all skilled and class conscious urban workers that caused the level of Bolshevik support to decline during the civil war.” Indeed “the workers who remained in the city were among the most urbanised elements.” In summary, “the deurbanisation of those years represented a change in quantity but not entirely in quality in the cities. The proletariat declined in the city, but it did not wither away . . . a core of the city’s working class remained.” [Op. Cit., p. 440, p. 442, p. 447 and p. 449]

As Russian anarchist Ida Mett argued decades before in relation to the strikes in early 1921:

“The population was drifting away from the capital. All who had relatives in the country had rejoined them. The authentic proletariat remained till the end, having the most slender connections with the countryside.

“This fact must be emphasised, in order to nail the official lies seeking to attribute the Petrograd strikes that were soon to break out to peasant elements, ‘insufficiently steeled in proletarian ideas.’ The real situation was the very opposite. A few workers were seeking refuge in the countryside. The bulk remained. There was certainly no exodus of peasants into the starving towns! . . . It was the famous Petrograd proletariat, the proletariat which had played such a leading role in both previous revolutions, that was finally to resort to the classical weapon of the class struggle: the strike.” [The Kronstadt Uprising, p. 36]

In terms of struggle, links between the events in 1917 and those during the civil war also exist. For example Jonathan Aves writes that there were “distinct elements of continuity between the industrial unrest in 1920 and 1917. This is not surprising since the form of industrial unrest in 1920, as in the pre-revolutionary period and in 1917, was closely bound up with enterprise traditions and shop-floor sub-cultures. The size of the Russian industrial workforce had declined steeply during the Civil War but where enterprises stayed open . . . their traditions of industrial unrest in 1920 shows that such sub-cultures were still capable of providing the leaders and shared values on which resistance to labour policies based on coercion and Communist Party enthusiasm could be organised. As might be anticipated, the leaders of unrest were often to be found amongst the skilled male workers who enjoyed positions of authority in the informal shop-floor hierarchies.” Moreover, “despite intense repression, small groups of politicised activists were also important in initiating protest and some enterprises developed traditions of opposition to the communists.” [Op. Cit., p. 39]

Looking at the strike wave of early 1921 in Petrograd, the “strongest reason for accepting the idea that it was established workers who were behind the **volynka** [i.e. the strike wave] is the form and course of protest. Traditions of protest reaching back through the spring of 1918 to 1917 and beyond were an important factor in the organisation of the **volynka**. . . There was also a degree of organisation . . . which belies the impression of a spontaneous outburst.” [Aves, Op. Cit., p. 126]

Clearly, then, the idea that the Russian working class was atomised or de-classed cannot be defended given this series of struggles and state repression. In fact, as noted, the notion that the workers were “declassed” was used to

justify state repression of collective working class struggle. *“The thought oppressed me,”* wrote Emma Goldman, *“that what [the Bolsheviks] called ‘defence of the Revolution’ was really only the defence of [their] party in power.”* [**My Disillusionment in Russia**, p. 57] She was right — the class struggle in Bolshevik Russia did not stop, it continued except the ruling class had changed from bourgeoisie to Bolshevik dictatorship.

Faced with this collective resistance to Bolshevism, the Leninist could argue that while the working class was capable of collective decision making and action, the nature of that action was suspect. This argument rests on the premise that the *“advanced”* workers (i.e. party members) left the workplace for the front or for government posts, leaving the *“backward”* workers behind. This argument is often used, particularly in regard to the Kronstadt revolt of 1921 (see section 8 of the appendix on *“What was the Kronstadt Rebellion?”*).

Of course, this argument raises more problems than it solves. In **any** revolution the *“most politically consciousness”* tend to volunteer to go to the front first and, of course, tend to be elected as delegates to committees of various kinds (local, regional and national). There is little that can be done about it. Needless to say, if *“soviet democracy”* depends on the *“advanced”* workers being there in order for it to work, then it suggests that the commitment to democracy is lacking in those who argue along these lines. It suggests that if the *“backward”* masses reject the *“advanced”* ones then the latter have the right, even the duty, to impose their will on the former. And it also begs the question of who determines what constitutes *“backward”* — if it means *“does not support the party”* then it becomes little more than a rationale for party dictatorship (as it did under Lenin and Trotsky).

Writing in 1938, Trotsky inadvertently exposes the logic of this position. Asserting that a *“revolution is ‘made’ directly by a **minority**,”* he argued that the *“success”* of a revolution is *“possible”* when *“this minority finds more or less support, or at least friendly neutrality, on the part of the majority.”* So what happens if the majority expresses opposition to the party? Unfortunately Trotsky does not raise this question, but he does answer it indirectly. As we discuss in section 15 of the appendix on *“What was the Kronstadt Rebellion?”*, Trotsky argues that *“to free the soviets from the leadership [sic!] of the Bolsheviks would have meant within a short time to demolish the soviets themselves. The experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats, proved this. Social Revolutionary-anarchist soviets could only serve as a bridge from the proletarian dictatorship. They could play no other role, regardless of the ‘ideas’ of their participants.”* [Lenin and Trotsky, **Kronstadt**, p. 85 and p. 90]

Thus to let the working masses (the *“majority”*) have free soviet elections and reject the vanguard (the *“minority”*) would mean the end of soviet power. Thus allowing the proletariat a say in progress of the revolution means the end of the *“proletarian dictatorship”*! Which, of course, is interesting logic. The authoritarian core of the Bolshevik vision of revolution is thus exposed.

Victor Serge also presents an insight into the Bolshevik perspective on the revolution. He states that *“[a]gitation conducted by the SRs and Mensheviks called demonstrations in the streets and prepared for a general strike. The demands were: free trade, wage increases, payment of wages one, two or three months in advance and ‘democracy.’ The intention was to incite the working*

class itself against the revolution.” Which only makes sense once you realise that by “*the revolution*” Serge simply meant “*the Bolsheviks*” and the obvious truth that the working class was **not** managing the revolution at all, was **not**, in any sense, “in power.” “*The best elements among the workers,*” explains Serge, “*were away fighting; those in the factories were precisely the less energetic, less revolutionary sections, along with the petty folk, yesterday’s small shopkeepers and artisans, who had come there to find refuge. This proletariat of the reserve often allowed itself to fall under the sway of Menshevik propaganda.*” [Year **One of the Russian Revolution**, p. 229]

Given that Serge is discussing the period **before** the Czechoslovak revolt, a greater indictment of Bolshevism cannot be found. After all, what does “*workers’ democracy*” mean unless the proletariat can vote for its own delegates? Little wonder Daniel Guerin described Serge’s book as “*largely a justification of the liquidation of the soviets by Bolshevism.*” [Anarchism, p. 97] After all, what point is there having genuine soviet elections if the “*less revolutionary sections*” (i.e. Trotsky’s “*majority*”) will not vote for the vanguard? And can socialism exist without democracy? Can we expect an unaccountable vanguard to govern in the interests of anyone but its own? Of course not!

Thus the Bolsheviks did not solve the answer the questions Malatesta raised in 1891, namely “*if you consider these worthy electors as unable to look after their own interests themselves, how is it that they will know how to choose for themselves the shepherds who must guide them? And how will they be able to solve this problem of social alchemy, of producing the election of a genius from the votes of a mass of fools?*” [Anarchy, p. 53]

Given this, is it surprising that the Bolsheviks revised the Marxist theory of the state to justify elite rule? As discussed in section H.3.8, once in power Lenin and Trotsky stressed that the “workers’ state” had to be independent of the working class in order to overcome the “*wavering*” and “*vacillation of the masses themselves.*” Or, to quote Serge, the “*party of the proletariat must know, at hours of decision, how to break the resistance of the backward elements among the masses; it must know how to stand firm sometimes against the masses . . . it must know how to go against the current, and cause proletarian consciousness to prevail against lack of consciousness and against alien class influences.*” [Op. Cit., p. 218] Of course, by definition, **every** group is “*backward*” compared to the vanguard and so Serge’s argument amounts to little more than a justification for party dictatorship **over** the proletariat.

The reason why such a system would not result in socialism does not take long to discover. For anarchists, freedom is not just a goal, a noble end to be achieved, but rather a necessary part of the process of creating socialism. Eliminate freedom (and, as a necessary result, workplace and community self-management) and the end result will be anything **but** socialism. Ultimately, as Malatesta argued, “*the only way that the masses can raise themselves*” is by freedom “*for it is only through freedom that one educates oneself to be free.*” [Op. Cit., p. 52] Ironically, by using state repression to combat “*backward*” elements, the Bolsheviks ensured that they stayed that way and, more importantly, disempowered the **whole** working class so ensuring that Bolshevik dictatorship came into constant conflict with it and its continuing struggle for autonomy. Rather than base itself on the creative powers of the masses, Bolshevism crushed it as a threat to its power and so ensured that the economic and social problems affecting Russia increased.

And need it be pointed out that “*low*” culture and/or “*backward*” social life have been used by numerous imperialist and authoritarian states to justify their rule over a given population? It matters little whether the population are of the same nationality of the rulers or from a subjugated people, the arguments and the logic are the same. Whether dressed up in racist or classist clothing, the same elitist pedigree lies behind the pro-Bolshevik argument that democracy would have brought “*chaos*” or “*capitalist restoration*.” The implicit assumption that working class people are not fit for self-government is clear from these rationales. Equally obvious is the idea that the party knows better than working class people what is best for them.

Sounding like Bolshevik Henry Kissingers, the Leninists argue that Lenin and Trotsky had to enforce their dictatorship **over** the proletariat to stop a “*capitalist restoration*” (Kissinger was the US state’s liaison with the Chilean military when it helped their coup in 1973 and infamously stated that the country should not be allowed to turn communist due to the stupidity of its own people). Needless to say, anarchists argue that even if the Bolshevik regime had not already need capitalist (specifically, **state** capitalist) this logic simply represents an elitist position based on “*socialism from above*.” Yes, soviet democracy **may** have resulted in the return of (private) capitalism but by maintaining party dictatorship the possibility of socialism was automatically nullified. Simply put, the pro-Leninist argument implies that socialism can be implemented from above as long as the right people are in power. The authoritarian core of Leninism is exposed by these arguments and the repression of working class revolt which they justified.

Given this, it seems incredulous for Leninists like Chris Harman to argue that it was the “*decimation of the working class*” which caused (by “*necessity*”) the “*Soviet institutions*” to take “*on a life independently of the class they had arisen from. Those workers and peasants who fought the Civil War could not govern themselves collectively from their places in the factories.*” [**How the revolution was lost**] Given that this “*independent*” life is required to allow the party to “*go against the current*,” Harman simply fails to understand the dynamics of the revolution, the position of the vanguard and the resistance of the working class subject to it. Moreover, the reason **why** the “*workers and peasants*” could not govern themselves collectively was because the party had seized power for itself and systematically destroyed soviet, workplace and military democracy to remain there. Then there is the way the Bolsheviks reacted to such collective unrest. Simply put, they sought to break the workers as a collective force. The use of lockouts, re-registration was typical, as was the arresting of “*ringleaders*.” It seems ironic, therefore, to blame “*objective factors*” for the “*atomisation*” of the working class when, in fact, this was a key aim of Bolshevik repression of labour protest.

Little wonder, then, that the role of the masses in the Russian Revolution after October 1917 is rarely discussed by pro-Bolshevik writers. Indeed, the conclusion to be reached is simply that their role is to support the party, get it into power and then do what it tells them. Unfortunately for the Bolsheviks, the Russian working class refused to do this. Instead they practised collective struggle in defence of their economic **and** political interests, struggle which inevitably brought them into conflict both with the “*workers’ state*” and their role in Bolshevik ideology. Faced with this collective action, the Bolshevik leaders (starting with Lenin) started to talk about the “*declassing*” of the proletariat

to justify their repression of (and power **over**) the working class. Ironically, it was the aim of Bolshevik repression to “*atomise*” the working class as, fundamentally, their rule depended on it. While Bolshevik repression did, in the end, win out it cannot be said that the working class in Russia did not resist the usurpation of power by the Bolshevik party. As such, rather than “*atomisation*” or “*declassing*” being the cause for Bolshevik power and repression, it was, in fact, one of **results** of them.

6 Did the Bolsheviks blame “*objective factors*” for their actions?

In a word, no. At the time of the revolution and for some period afterwards, the idea that “*objective factors*” were responsible for their policies was one which few, if any, Bolshevik leaders expressed. As we discussed in section 2, Bolsheviks like Lenin, Trotsky and Bukharin argued that **any** revolution would face civil war and economic crisis. Lenin **did** talk about the “*declassing*” of the proletariat from 1920 onwards, but that did not seem to affect the proletarian and socialist character of his regime (as we noted in section 5, Lenin’s argument was developed in the context of **increasing** working class collective action, **not** its absence).

This is not to say that the Bolshevik leaders were 100% happy with the state of their revolution. Lenin, for example, expressed concern about the rising bureaucratic deformations he saw in the soviet state (particularly after the end of the civil war). Yet Lenin, while concerned about the bureaucracy, was not concerned about the Party’s monopoly of power. Unsurprisingly, he fought the bureaucracy by “top-down” and, ironically, bureaucratic methods, the only ones left to him. A similar position was held by Trotsky, who was quite explicit in supporting the party dictatorship throughout the 1920s (and, indeed, the 1930s). Needless to say, both failed to understand how bureaucracy arises and how it could be effectively fought.

This position started to change, however, as the 1920s drew on and Trotsky was increasingly sidelined from power. Then, faced with the rise of Stalinism, Trotsky had to find a theory which allowed him to explain the degeneration of the revolution and, at the same time, absolve Bolshevik ideology (and his own actions and ideas!) from all responsibility for it. He did so by invoking the objective factors facing the revolution. Since then, his various followers have utilised this argument, with various changes in emphasis, to attack Stalinism while defending Bolshevism.

The problem with this type of argument is that all the major evils usually associated with Stalinism already existed under Lenin and Trotsky. Party dictatorship, one-man management, repression of opposition groups and working class protest, state bureaucracy and so on all existed before Stalin manoeuvred himself into absolute power. And with the exception of state bureaucracy, none of the mainstream Bolshevik leaders found anything to complain about. Indeed, the reverse. Whether it is Lenin or Trotsky, the sad fact of the matter is that a party dictatorship presiding over an essentially state capitalism economy was not considered a bad thing. Which, of course, causes problems for those who seek to distance Lenin and Trotsky from Stalinism and claim that Bolshevism

is fundamentally “*democratic*” in nature.

The knots Leninists get into to do this can be ludicrous. A particularly crazy example of this can be seen from the UK’s Socialist Workers’ Party. For John Rees, it is a truism that “*it was overwhelmingly the force of circumstance which obliged the Bolsheviks to retreat so far from their own goals. They travelled this route in opposition to their own theory, not because of it — no matter what rhetorical justifications were given at the time.*” [“*In Defence of October,*” pp. 3–82, **International Socialism**, no. 52, p. 70]

However, this sort of position has little substance to it. It is both logically and factually flawed. Logically, it simply makes little sense as anything but an attempt to narrow political discussion and whitewash Bolshevik practice and politics. Rees, in effect, is saying that not only are we **not** to judge the Bolsheviks by their actions, we must also discount what they said — unless it was something modern day Leninists approve of! Given that Leninists constantly quote from Lenin’s (and Trotsky’s) post-1918 works, it seems strange that they try to stop others so doing! Strange, but not surprising, given their task is to perpetuate the Bolshevik Myth. Where that leaves revolutionary politics is left unsaid, but it seems to involve worshipping at the shrine of October and treating as a heretic anyone who dares suggest we analysis it in any depth and perhaps learn lessons from it and the Bolshevism that dominated it.

Of course Rees’ comments are little more than assertions. Given that he dismisses the idea that we can actually take what any Bolshevik says at face value, we are left with little more than a mind reading operation in trying to find out what the likes of Lenin and Trotsky “*really*” thought. Perhaps the root explanation of Rees’ position is the awkward fact that there are no quotes from any of the leading Bolsheviks which support it? After all, if they were quotes from the hallowed texts expounding the position Rees says the Bolshevik leaders “*really*” held then he would have provided them. The simple fact is that Lenin and Trotsky, like all the Bolshevik leaders, considered a one-party dictatorship ruling over a state capitalist economy as some form of “*socialism.*” That was certainly Trotsky’s position and he was **not** shy in expressing. But, of course, we can dismiss this simply as “*rhetorical justifications*” rather than an expression of “*their own theory*”! We will never know, as they never expressed “*their own theory*” and instead made do with the “*rhetorical justifications*” Rees is at such pains for us to ignore!

Which shows that a major problem in discussing the failure of the Russian Revolution is the attitude of modern day Leninists. Rees presents us with another example when he asserts that “*what is required of historians, particularly Marxists, is to separate phrase from substance.*” The Bolsheviks, Rees argues, were “*inclined to make a virtue of necessity, to claim that the harsh measures of the civil war were the epitome of socialism.*” Thus the Bolsheviks cannot be blamed either for what they did or what they said. Indeed, he states that non-Leninists “*take Lenin or Trotsky’s shouts of command in the midst of battle and portray them as considered analyses of events.*” [**Op. Cit.**, p. 46]

This argument is simply incredulous. After all, neither Lenin nor Trotsky could be said to be anything **but** political activists who took the time to consider events and analyse them in detail. Moreover, they defended their arguments in terms of Marxism. Would Rees consider Lenin’s **State and Revolution** as an unimportant work? After all, this was produced in the midst of the events of 1917, in often difficult circumstances. If so, then why not his other, less appeal-

ing, political proclamations (never mind actions)? Moreover, looking at some of the works produced in this period it is clear that they are anything **but** “*shouts of command in the midst of battle.*” Trotsky’s **Terrorism and Communism** is a substantial book, for example It was not an ad hoc comment made during a conference or “*in the midst of battle.*” Quite the reverse, it was a detailed, substantial and thought-out reply to the criticism by the influential German social democrat Karl Kaustky (and, before Lenin, the most internationally respected Marxist thinker). Indeed, Trotsky explicitly asks the question “[i]s there still *theoretical necessity to justify revolutionary terrorism?*” and answers yes, his “*book must serve the ends of an irreconcilable struggle against the cowardice, half-measures, and hypocrisy of Kautskianism in all countries.*” [**Terrorism and Communism**, p. 9 and p. 10]

Therefore, on the face of it, Rees’s comments are hard to take seriously. It is even harder to take when it becomes clear that Rees does not apply his comments consistently or logically. He does not object to quoting Lenin and Trotsky during this period when they say something he **approves** of, regardless of how well it fits into their actions. It would be no exaggeration to say that his “*argument*” is simply an attempt to narrow the area of debate, marking off limits any comments by his heroes which would place his ideology in a bad light. It is hardly convincing, particularly when their “*good*” quotes are so at odds with their practice and their “*bad*” quotes so in line with them. And as Marx argued, we should judge people by what they do, **not** by what they say. This seems a basic principle of scientific analysis and it is significant, if not surprising, that Leninists like Rees want to reject it.

Ultimately, the theoretical problem with this position is that it denies the importance of implementing ideas. After all, even if it were true that the “*theory*” of Bolshevism was different to its practice and the justifications for that practice, it would leave us with the conclusion that this “*theory*” was not sufficient when faced with the rigours of reality. In other words, that it is impractical. A conclusion that Leninists do not want to draw, hence the stress on “*objective factors*” to explain the failure of Bolshevism. As Marx said, judge people by what they do, not what they say (unless, of course, as with the Bolsheviks post-October, what they said reflects what they did!)

Similarly, there seems to be an idealist tint to Leninist accounts of the Russian Revolution. After all, they seem to think that the Lenin of 1921 was, essentially, the same person as the Lenin of 1917! That seems to violate the basic ideas of materialism. As Herbert Read points out, “*the phrase ‘the dictatorship of the proletariat’ . . . became fatal through the interventions of two political expedients — the identification of the proletariat with the Bolshevik Party, and the use of the State as an instrument of revolution. Expedients and compromises may have been necessary for the defeat of the reactionary forces; but there is no doubt whatsoever that what took place was a progressive brutalisation of Lenin’s own mind under the corrupting influence of the exercise of power.*” [**A One-Man Manifesto**, p. 51] It seems common sense that if a political strategy exposes its followers to the corrupting effects of power we should factor this into any evaluation of it. Sadly, Leninists fail to do this — even worse, they attempt to whitewash the post-October Lenin (and Trotsky) by excluding the “*bad*” quotes which reflect their practice, a practice which they are at pains to downplay (or ignore)!

Then, of course, there is the attitude of the Bolshevik leaders themselves

to these so-called “*shouts of command in the midst of battle.*” Rather than dismiss them as irrelevant, they continued to subscribe to them years later. For example, Trotsky was still in favour of party dictatorship in the late 1930s (see section H.1.2). Looking at his justly infamous **Terrorism and Communism**, we discover Trotsky in the 1930s reiterating his support for his arguments of 1920. His preface to the 1936 French edition sees him state that it was “*devoted to a clarification of the methods of the proletariat’s revolutionary policy in our epoch.*” He concluded as follows: “*Victory is conceivable only on the basis of Bolshevik methods, to the defence of which the present work is devoted.*” The previous year, in his introduction to the second English edition, he was equally unrepentant. “*The British proletariat,*” he argued, “*will enter upon a period of political crisis and theoretical criticism . . . The teachings of Marx and Lenin for the first time will find the masses as their audience. Such being the case, it may be also that the present book will turn out to be not without its use.*” He dismissed the “*consoling illusion*” that “*the arguments of this book [were] true for backward Russia*” but “*utterly without application to advanced lands.*” The “*wave of Fascist or militarised police dictatorships*” in the 1920s and 1930s was the reason. It seems ironic that Trotsky’s self-proclaimed followers are now repeating the arguments of what he termed “*incurable Fabians.*” [**Terrorism and Communism**, p. xix, p. xxxv, p. xlvi and p. xxxix]

Rather than distance himself from the authoritarian and state capitalist policies modern day Leninists claim were thrust upon an unwilling Bolshevik party by “*objective factors,*” Trotsky defends them! Moreover, as we noted in section 12 of the appendix on “*What was the Kronstadt Rebellion?*”, Trotsky himself argues that these “*objective factors*” would face **every** revolution. As it is, he argues that it was only the “*slow development of the revolution in the West*” which stopped “*a direct passage from military Communism to a Socialist system of production.*” Rather than admit to “*illusions*” caused by the “*iron necessity*” of wiling the civil war, he talks about “*those economic hopes which were bound up with the development of the world revolution.*” He even links Bolshevik practice with Stalinism, noting that the “*idea of five-year plans was not only formulated in that period [1918–1920], but in some economic departments it was also technically worked out.*” [**Op. Cit.**, p. xliii]

Even his essay outlining what he considers the differences between Stalinism and Bolshevism does not see him fundamentally distancing himself from the positions modern day Leninists like to explain by “*objective factors.*” He stated that the “*Bolshevik party achieved in the civil war the correct combination of military art and Marxist politics.*” What did that involve? Immediately before making that claim he argued that the “*Bolshevik party has shown the entire world how to carry out armed insurrection and the seizure of power. Those who propose the abstraction of the Soviets from the party dictatorship should understand that only thanks to the party dictatorship were the Soviets able to lift themselves out of the mud of reformism and attain the state form of the proletariat.*” Thus the “*party dictatorship*” is seen as being an example of “*Marxist politics*” being successfully applied and not something to be opposed. Moreover, “*the Bolshevik party was able to carry on its magnificent ‘practical’ work only because it illuminated all its steps with theory.*” [**Stalinism and Bolshevism**] Clearly, rather than denounce the power of the party as being against Bolshevik theory, as Rees claims, for Trotsky it represented its application. While he excuses some Bolshevik actions (such as the banning of opposition groups) as a

product of “*objective factors*,” he clearly sees the degeneration of the revolution coming **after** the civil war and its “*correct combination*” of “*Marxist politics*” and “*military art*,” which included “*party dictatorship*” over the soviets.

This lack of distancing is to be expected. After, the idea that “objective factors” caused the degeneration of the Russian Revolution was first developed by Trotsky to explain, after his fall from power) the rise of Stalinism. While **he** was head of the Soviet state no such “objective” factors seemed to be required to “explain” the party dictatorship over the working class. Indeed, quite the reverse. As he argued in 1923 “[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party.” [Leon Trotsky Speaks, p. 158]

Trotsky was just stating mainstream Bolshevik ideology, echoing a statement made in March 1923 by the Central Committee (of which he and Lenin were members) to mark the 25th anniversary of the founding of the Communist Party. It sums up the lessons gained from the revolution and states that “*the party of the Bolsheviks proved able to stand out fearlessly against the vacillations within its own class, vacillations which, with the slightest weakness in the vanguard, could turn into an unprecedented defeat for the proletariat.*” Vacillations, of course, are expressed by workers’ democracy. Little wonder the statement rejects it: “*The dictatorship of the working class finds its expression in the dictatorship of the party.*” [“*To the Workers of the USSR*” in G. Zinoviev, **History of the Bolshevik Party**, p. 213, p. 214] It should be noted that Trotsky had made identical comments before and immediately after the civil war — as well as long after (see section H.3.8 for details).

So, as with all the leading Bolsheviks, he considered the party dictatorship as an inevitable result of any proletarian revolution. Moreover, he did not question the social relationships within production either. One-man management held no fears for him and he called the state capitalist regime under himself and Lenin as “*socialist*” and defended it as such. He was fully supportive of one-man management. Writing in 1923, he argued that the “*system of actual one-man management must be applied in the organisation of industry from top to bottom. For leading economic organs of industry to really direct industry and to bear responsibility for its fate, it is essential for them to have authority over the selection of functionaries and their transfer and removal.*” These economic organs must “*in actual practice have full freedom of selection and appointment.*” [quoted by Robert V. Daniels, **A Documentary History of Communism**, vol. 1, p. 237]

All of these post-civil war opinions of course, fit in well with his civil war opinions on the matter. Which, incidentally, explains why, to quote a Leninist, Trotsky “*continued to his death to harbour the illusion that somehow, despite the lack of workers’ democracy, Russia was a ‘workers’ state.’*” Simply put, there had been no workers’ democracy under Lenin and Trotsky and he considered that regime a “*workers’ state.*” The question arises why Harman thinks Lenin’s Russia was some kind of “workers’ state” if workers’ democracy is the criteria by which such things are to be judged. But, then again, he thinks Trotsky’s **Left Opposition** “*framed a policy along [the] lines*” of “*returning to genuine workers’ democracy*”! [Chris Harman, **Bureaucracy and Revolution in Eastern Europe**, p. 20 and p. 19]

Now, it seems strange that rather than present what he “*really*” thought,

Trotsky expounded what presumably is the **opposite** of it. Surely the simplistic conclusion to draw is that Trotsky said what he really did think and that this was identical to his so-called “*shouts of command*” made during the civil war? But, of course, all these comments can be dismissed as “*rhetorical justifications*” and not reflective of Trotsky’s real “*theory*.” Or can they? Ultimately, either you subscribe to the idea that Lenin and Trotsky were able to express their ideas themselves or you subscribe to the notion that they hid their “*real*” politics and only modern-day Leninists can determine what they, in fact, “*really*” meant to say and what they “*really*” stood for. And as for all those “*awkward*” quotes which express the **opposite** of the divined true faith, well, they can be ignored.

Which is, of course, hardly a convincing position to take. Particularly as Lenin and Trotsky were hardly shy in justifying their authoritarian policies and expressing a distinct lack of concern over the fate of any **meaningful** working class conquest of the revolution like, say, soviet democracy. As Samuel Farber notes that “*there is no evidence indicating that Lenin or any of the mainstream Bolshevik leaders lamented the loss of workers’ control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921.*” [**Before Stalinism**, p. 44]

The sad fact is that the inter-party conflicts of the 1920s were **not** about “*workers’ democracy*,” rather party democracy. The Bolsheviks simply re-labelled “*party democracy*” as “*workers’ democracy*.” Little wonder in 1925 that Max Eastman, one of Trotsky’s main supporters at the time, stated “*this programme of democracy within the party [was] called ‘Workers’ Democracy’ by Lenin*” and that “*Trotsky merely revived this original plea.*” [**Since Lenin Died**, p. 35] Trotsky held this position throughout the 1920s and 1930s. As we noted in section 13 of the appendix on “*What was the Kronstadt Rebellion?*”, the 1927 **Platform of the Opposition** restated its belief in party dictatorship and argued that Stalin was undermining it in favour of rule by the bureaucracy. Ironically, Trotskyists in soviet prisons in the early 1930s “*continued to consider that ‘Freedom to choose one’s party — that is Menshevism’*” and this was their “*final verdict.*” [Ante Ciliga, **The Russian Enigma**, p. 280] No wonder they seemed surprised to be there!

Trotsky’s issue with Stalinism was not based on **real** socialist principles, such as meaningful working class freedoms and power. Rather it was a case of “*the political centre of gravity ha[ving] shifted from the proletarian vanguard to the bureaucracy*” and this caused “*the party*” to change “*its social structure as well as in its ideology.*” [**Stalinism and Bolshevism**] The party dictatorship had been replaced by the dictatorship of the state bureaucracy, in other words. Once this happened, Trotsky sought to explain it. As analysing the impact of Bolshevik ideology and practice were, by definition, out of the question, that left the various objective factors Trotsky turned to to explain developments after 1923. Now the concern for “*objective factors*” appeared, to explain Stalinism while keeping true to Bolshevik ideology **and** practice.

So, in summary, the leading Bolsheviks did not view “*objective factors*” as explaining the failure of the revolution. Indeed, until Trotsky was squeezed out of power they did not think that the revolution **had** failed. Party dictatorship and one-man management were **not** considered as expressions of a failed revolution, rather a successful one. Trotsky’s issue with Stalinism was simply that the bureaucracy had replaced the “*the proletarian vanguard*” (i.e. himself and

his followers) as the dominant force in the Soviet State and it had started to use the techniques of political repression developed against opposition parties and groups against him. The idea that “objective factors” caused the failure of the revolution was not used until the late 1920s and even then not used to explain the party dictatorship but rather the usurpation of **its** power by the bureaucracy.

How did Bolshevik ideology contribute to the failure of the Revolution?

It is a truism of Leninism that Stalinism has nothing to do with the ideas of Bolshevism. Moreover, most are at pains to stress that these ideas have no relation to the actual practice of the Bolshevik Party after the October Revolution. To re-quote one Leninist:

“it was overwhelmingly the force of circumstance which obliged the Bolsheviks to retreat so far from their own goals. They travelled this route in opposition to their own theory, not because of it — no matter what rhetorical justifications were given at the time.” [John Rees, *“In Defence of October,”* pp. 3–82, **International Socialism**, no. 52, p. 70]

His fellow party member Duncan Hallas argued that it was *“these desperate conditions”* (namely terrible economic situation combined with civil war) which resulted in *“the Bolshevik Party [coming] to substitute its own rule for that of a decimated, exhausted working class”* anarchists disagree. [**Towards a Revolutionary Socialist Party**, p. 43]

We have discussed in the appendix on “What caused the degeneration of the Russian Revolution?” why the various *“objective factors”* explanations favoured by Leninists to explain the defeat of the Russian Revolution are unconvincing. Ultimately, they rest on the spurious argument that if only what most revolutionaries (including, ironically, Leninists!) consider as inevitable side effects of a revolution did not occur, then Bolshevism would have been fine. It is hard to take seriously the argument that if only the ruling class disappeared without a fight, if the imperialists had not intervened and if the economy was not disrupted then Bolshevism would have resulted in socialism. This is particularly the case as Leninists argue that only **their** version of socialism recognises that the ruling class will **not** disappear after a revolution, that we will face counter-revolution and so we need a state to defend the revolution! As we argued in section H.2.1, this is not the case. Anarchists have long recognised that a revolution will require defending and that it will provoke a serious disruption in the economic life of a country.

Given the somewhat unrealistic tone of these kinds of assertions, it is necessary to look at the ideological underpinnings of Bolshevism and how they played

their part in the defeat of the Russian Revolution. This section, therefore, will discuss why such Leninist claims are not true. Simply put, Bolshevik ideology **did** play a role in the degeneration of the Russian Revolution. This is obvious once we look at most aspects of Bolshevik ideology as well as the means advocated by the Bolsheviks to achieve their goals. Rather than being in opposition to the declared aims of the Bolsheviks, the policies implemented by them during the revolution and civil war had clear relations with their pre-revolution ideas and visions. To quote Maurice Brinton's conclusions after looking at this period:

“there is a clear-cut and incontrovertible link between what happened under Lenin and Trotsky and the later practices of Stalinism. We know that many on the revolutionary left will find this statement hard to swallow. We are convinced however that any honest reading of the facts cannot but lead to this conclusion. The more one unearths about this period the more difficult it becomes to define — or even to see — the ‘gulf’ allegedly separating what happened in Lenin’s time from what happened later. Real knowledge of the facts also makes it impossible to accept . . . that the whole course of events was ‘historically inevitable’ and ‘objectively determined’. Bolshevik ideology and practice were themselves important and sometimes decisive factors in the equation, at every critical stage of this critical period. Now that more facts are available self-mystification on these issues should no longer be possible. Should any who have read these pages remain ‘confused’ it will be because they want to remain in that state — or because (as the future beneficiaries of a society similar to the Russian one) it is their interest to remain so.” [**The Bolsheviks and Workers’ Control**, p. 84]

This is unsurprising. The Leninist idea that politics of the Bolsheviks had no influence on the outcome of the revolution, that their policies during the revolution were a product purely of objective forces, is unconvincing. The facts of the matter is that people are faced with choices, choices that arise from the objective conditions that they face. What decisions they make will be influenced by the ideas they hold — they will **not** occur automatically, as if people were on auto-pilot — and their ideas are shaped by the social relationships they experience. Thus, someone who favours centralisation and sees nationalisation as the defining characteristic of socialism will make different decisions than someone who favours decentralising power and sees self-management as the key issue. The former will also create **different** forms of social organisation based on their perceptions of what “socialism” is and what is “efficient.” Similarly, the different forms of social organisation favoured will also impact on how a revolution develops and the political decisions they make. For example, if you have a vision which favours centralised, hierarchical organisation then those placed into a position of power over others within such structures will act in certain ways, have a certain world view, which would be alien to someone subject to egalitarian social relations.

In summary, the ideas in people's heads matter, including during a revolution. Someone in favour of centralisation, centralised power and who equates party rule with class rule (like Lenin and Trotsky), will act in ways (and create structures) totally different from someone who believes in decentralisation and

federalism. The organisation they create will create specific forms of social relationships which, in turn, will shape the ideas of those subject to them. This means that a centralised, hierarchical system will create authoritarian social relationships and these will shape those within them and the ideas they have in totally different ways than a decentralised, egalitarian system.

Similarly, if Bolshevik policies hastened the alienation of working class people and peasants from the regime which, in turn, resulted in resistance to them then some of the “objective factors” facing Lenin’s regime were themselves the products of earlier political decisions. Unwelcome and unforeseen (at least to the Bolshevik leadership) consequences of specific Bolshevik practices and actions, but still flowing from Bolshevik ideology all the same. So, for example, when leading Bolsheviks had preconceived biases against decentralisation, federalism, “petty-bourgeois” peasants, “declassed” workers or “anarcho-syndicalist” tendencies, this would automatically become an ideological determinant to the policies decided upon by the ruling party. While social circumstances may have limited Bolshevik options, these social circumstances were also shaped by the results of Bolshevik ideology and practice and, moreover, possible solutions to social problems were also limited by Bolshevik ideology and practice.

So, **political ideas do matter**. And, ironically, the very Leninists who argue that Bolshevik politics played no role in the degeneration of the revolution accept this. Modern day Leninists, while denying Bolshevik ideology had a negative on the development of the revolution also subscribe to the contradictory idea that Bolshevik politics were essential for its “success”! Indeed, the fact that they **are** Leninists shows this is the case. They obviously think that Leninist ideas on centralisation, the role of the party, the “*workers’ state*” and a host of other issues are correct and, moreover, essential for the success of a revolution. They just dislike the results when these ideas were applied in practice within the institutional context these ideas promote, subject to the pressures of the objective circumstances they argue **every** revolution will face!

Little wonder anarchists are not convinced by Leninist arguments that their ideology played no role in the rise of Stalinism in Russia. Simply put, if you use certain methods then these will be rooted in the specific vision you are aiming for. If you think socialism is state ownership and centralised planning then you will favour institutions and organisations which facilitate that end. If you want a highly centralised state and consider a state as simply being an “*instrument of class rule*” then you will see little to worry about in the concentration of power into the hands of a few party leaders. However, if you see socialism in terms of working class managing their own affairs then you will view such developments as being fundamentally in opposition to your goals and definitely **not** a means to that end.

So part of the reason why Marxist revolutions yield such anti-working class outcomes is to do with its ideology, methods and goals. It has little to do with the will to power of a few individuals (important a role as that can play, sometimes, in events). In a nutshell, the ideology and vision guiding Leninist parties incorporate hierarchical values and pursue hierarchical aims. Furthermore, the methods and organisations favoured to achieve (their vision of) “socialism” are fundamentally hierarchical, aiming to ensure that power is centralised at the top of pyramidal structures in the hands of the party leaders.

It would be wrong, as Leninists will do, to dismiss this as simply a case of “idealism.” After all, we are talking about the ideology of a ruling party.

As such, these ideas are more than just ideas: after the seizure of power, they became a part of the real social situation within Russia. Individually, party members assumed leadership posts in all spheres of social life and started to apply their ideology. Then, overtime, the results of this application ensured that the party could not be done otherwise as the framework of exercising power had been shaped by its successful application (e.g. Bolshevik centralism ensured that all its policies were marked by centralist tendencies, simply because Bolshevik power had become centralised). Soon, the only real instance of power is the Party, and very soon, only the summits of the Party. This cannot help but shape its policies and actions. As Castoriadis argues:

“If it is true that people’s real social existence determines their consciousness, it is from that moment illusory to expect the Bolshevik party to act in any other fashion than according to its real social position. The real social situation of the Party is that of a directorial organ, and its point of view toward this society henceforth is not necessarily the same as the one this society has toward itself.” [**The role of Bolshevik Ideology in the birth of the Bureaucracy**, p. 97]

As such, means and ends are related and cannot be separated. As Emma Goldman argued, there is *“no greater fallacy than the belief that aims and purposes are one thing, while methods and tactics are another. This conception is a potent menace to social regeneration. All human experience teaches that methods and means cannot be separated from the ultimate aim. The means employed become, through individual habit and social practice, part and parcel of the final purpose; they influence it, modify it, and presently the aims and means become identical. . . The great and inspiring aims of the Revolution became so clouded with and obscured by the methods used by the ruling political power that it was hard to distinguish what was temporary means and what final purpose. Psychologically and socially the means necessarily influence and alter the aims. The whole history of man is continuous proof of the maxim that to divest one’s methods of ethical concepts means to Sink into the depths of utter demoralisation. In that lies the real tragedy of the Bolshevik philosophy as applied to the Russian Revolution. May this lesson not be in vain.”* In summary, *“[n]o revolution can ever succeed as a factor of liberation unless the MEANS used to further it be identical in spirit and tendency with the PURPOSES to be achieved.”* [**My Disillusionment in Russia**, pp. 260–1]

If this analysis of the anarchists against Bolshevism is true then it follows that the Bolsheviks were not just wrong on one or two issues but their political outlook right down to the core was wrong. Its vision of socialism was flawed, which produced a flawed perspective on the potentially valid means available to achieve it. Leninism, we must never forget, does not aim for the same kind of society anarchism does. As we discussed in section H.3.1, the short, medium and long term goals of both movements are radically different. While both claim to aim for “communism,” what is meant by that word is radically different in details if somewhat similar in outline. The anarchist ideal of a classless, stateless and free society is based on a decentralised, participatory and bottom-up premise. The Leninist ideal is the product of a centralised, party ruled and top-down paradigm.

This explains why Leninists advocate a democratic-centralist “Revolutionary Party.” It arises from the fact that their programme is the capture of state power in order to abolish the “*anarchy of the market.*” Not the abolition of wage labour, but its universalisation under the state as one big boss. Not the destruction of alienated forces (political, social and economic) but rather their capture by the party on behalf of the masses. In other words, this section of the FAQ is based on the fact that Leninists are not (libertarian) communists; they have not broken sufficiently with Second International orthodoxy, with the assumption that socialism is basically state capitalism (“*The idea of the State as Capitalist, to which the Social-Democratic fraction of the great Socialist Party is now trying to reduce Socialism.*” [Peter Kropotkin, **The Great French Revolution**, vol. 1, p. 31]). Just as one cannot abolish alienation with alienated means, so we cannot attack Leninist “*means*” also without distinguishing our libertarian “*ends*” from theirs.

This means that both Leninist means and ends are flawed. Both will fail to produce a socialist society. As Kropotkin said at the time, the Bolsheviks “*have shown how the Revolution is not to be made.*” [quoted by Berkman, **The Bolshevik Myth**, p. 75] If applied today, Leninist ideas will undoubtedly fail from an anarchist point of view while, as under Lenin, “succeeding” from the limited perspective of Bolshevism. Yes, the party may be in power and, yes, capitalist property may be abolished by nationalisation but, no, a socialist society would be no nearer. Rather we would have a new hierarchical and class system rather than the classless and free society which non-anarchist socialists claim to be aiming for.

Let us be perfectly clear. Anarchists are **not** saying that Stalinism will be the inevitable result of any Bolshevik revolution. What we are saying is that some form of class society will result from any such a revolution. The exact form this class system will take will vary depending on the objective circumstances it faces, but no matter the specific form of such a post-revolutionary society it will not be a socialist one. This is because of the ideology of the party in power will shape the revolution in specific ways which, by necessity, form new forms of hierarchical and class exploitation and oppression. The preferred means of Bolshevism (vanguardism, statism, centralisation, nationalisation, and so on) will determine the ends, the ends being not communist anarchism but some kind of bureaucratic state capitalist society labelled “*socialism*” by those in charge. Stalinism, in this perspective, was the result of an interaction of certain ideological goals and positions as well as organisational principles and preferences with structural and circumstantial pressures resulting from the specific conditions prevalent at the time. For example, a Leninist revolution in an advanced western country would not require the barbaric means used by Stalinism to industrialise Russia.

This section of the FAQ will, therefore, indicate the key areas of Bolshevik ideology which, when applied, will undermine any revolution as they did the Russian. As such, it is all fine and well for Trotskyist Max Shachtman (like so many others) to argue that the Bolsheviks had “*convert[ed] the expediencies and necessities of the civil war period into virtues and principles which had never been part of their original program.*” Looking at this “*original program*” we can see elements of what was latter to be applied. Rather than express a divergence it could be argued that it was this that undermined the more democratic aspects of their original program. In other words, perhaps the use of state power

and economic nationalisation came into conflict with, and finally destroyed, the original proclaimed socialist principles? And, perhaps, the “*socialist*” vision of Bolshevism was so deeply flawed that even attempting to apply it destroyed the aspirations for liberty, equality and solidarity that inspired it? For, after all, as we indicated in section H.3.1, the anarchist and mainstream Marxist visions of socialism and how to get there **are** different. Can we be surprised if Marxist means cannot achieve anarchist (i.e. authentic socialist) ends? To his credit, Shachtman acknowledges that post-civil war salvation “*required full democratic rights*” for all workers, and that this was “*precisely what the Bolsheviks . . . were determined not to permit.*” Sadly he failed to wonder **why** the democratic principles of the “*original program*” were only “*honoured in the breach*” and why “*Lenin and Trotsky did not observe them.*” The possibility that Bakunin was right and that statism and socialism cannot go together was not raised. [“*Introduction*” to Trotsky’s **Terrorism and Communism**, p. xv]

Equally, there is a tendency of pro-Leninists to concentrate on the period between the two revolutions of 1917 when specifying what Bolshevism “really” stood for, particularly Lenin’s book **State and Revolution**. To use an analogy, when Leninists do this they are like politicians who, when faced with people questioning the results of their policies, ask them to look at their election manifesto rather than what they have done when in power. As we discuss in section 4 of the appendix “What happened during the Russian Revolution?” Lenin’s book was never applied in practice. From the very first day, the Bolsheviks ignored it. After 6 months **none** of its key ideas had been applied. Indeed, in all cases the exact opposite had been imposed. As such, to blame (say) the civil war for the reality of “Bolshevik in power” (as Leninists do) seems without substance. Simply put, **State and Revolution** is no guide to what Bolshevism “really” stood for. Neither is their position **before** seizing power if the realities of their chosen methods (i.e. seizing state power) quickly changed their perspective, practice **and** ideology (i.e. shaped the desired ends). Assuming of course that most of their post-October policies were radically different from their pre-October ones, which (as we indicate here) they were not.

With that said, what do anarchists consider the key aspects of Bolshevik ideology which helped to ensure the defeat of the Russian Revolution and had, long before the civil war started, had started its degeneration into tyranny? These factors are many and so we will, by necessity, concrete on the key ones. These are believe in centralisation, the confusion of party power with popular power, the Marxist theory of the state, the negative influence of Engels’ infamous essay “*On Authority*”, the equation of nationalisation and state capitalism with socialism, the lack of awareness that working class economic power was a key factor in socialism, the notion that “big” was automatically “more efficient,” the identification of class consciousness with supporting the party, how the vanguard party organises itself and, lastly, the underlying assumptions that vanguardism is based on.

Each one of these factors had a negative impact on the development of the revolution, combined they were devastating. Nor can it be a case of keeping Bolshevism while getting rid of some of these positions. Most go to the heart of Bolshevism and could only be eliminated by eliminating what makes Leninism Leninist. Thus some Leninists now pay lip service to workers’ control of production and recognise that the Bolsheviks saw the form of property (i.e., whether private or state owned) as being far more important than workers’ management

of production. Yet revising Bolshevism to take into account this flaw means little unless the others are also revised. Simply put, workers' management of production would have little impact in a highly centralised state ruled over by an equally centralised vanguard party. Self-management in production or society could not co-exist with a state and party power nor with "centralised" economic decision making based on nationalised property. In a nutshell, the only way Bolshevism could result in a genuine socialist society is if it stopped being Bolshevik!

1 How did the Marxist historical materialism affect Bolshevism?

As is well known, Marx argued that history progressed through distinct stages. After his death, this "materialist conception of history" became known as "historical materialism." The basic idea of this is that the "totality of [the] relations of production constitutes the economic structure of society, the real foundation, on which arises a legal and political superstructure and to which correspond definite forms of social consciousness . . . At a certain stage of development, the material productive forces of society come into conflict with the existing relations of production or — this merely expresses the same thing in legal terms — with the property relations within the framework of which they have operated hitherto. From forms of development of productive forces these relations turn into their fetters. Then begins an era of social revolution." [**A Contribution to the Critique of Political Economy**, pp. 20–1]

Thus slavery was replaced by feudalism, feudalism with capitalism. For Marx, the "bourgeois mode of production is the last antagonistic form of the social process of production" and "the productive forces developing within bourgeois society create also the material conditions for a solution of this antagonism." [**Op. Cit.**, p. 21] In other words, after capitalism there would be socialism:

"The monopoly of capital becomes a fetter upon the mode of production which has flourished alongside and under it. The centralisation of the means of production and the socialisation of labour reach a point at which they become incompatible with their capitalist integument. The integument is burst asunder. The knell of capitalist private property sounds. The expropriators are expropriated." [Karl Marx, **Capital**, vol. 1, p. 929]

Socialism replaces capitalism once the "**proletariat seized political power and turns the means of production into state property.**" By so doing, "it abolishes itself as proletariat, abolishes all class distinctions and class antagonisms, abolishes also the state as state." [Engels, **The Marx-Engels Reader**, p. 713]

Most Marxists subscribe to this schema of historical progress. For example, Tony Cliff noted that, "[f]or Lenin, whose Marxism was never mechanical or fatalistic, the definition of the dictatorship of the proletariat as a **transition period** meant that there could be **two** outcomes of this phase: going forward to socialism, or backsliding to capitalism. The policy of the party would tip the balance." [**Revolution Besieged**, p. 364]

Marxists, like Marx, argue that socialism was the society which would come after capitalism. Thus the Bolsheviks had the mindset that whatever they did there was only two possibilities: (their version of) socialism or the restoration of capitalism. However, this is based on a false premise. Is it valid to assume that there is only one possible post-capitalist future, one that, by definition, is classless? If so, then any action or structure could be utilised to fight reaction as after victory there can be only one outcome. However, if there is more than one post-capitalist future then the question of means becomes decisive. If we assume just two possible post-capitalist futures, one based on self-management and without classes and another with economic, social and political power centralised in a few hands, then the means used in a revolution become decisive in determining which possibility will become reality.

If we accept the Marxist theory and assume only one possible post-capitalist system, then all that is required of revolutionary anti-capitalist movements is that they only need to overthrow capitalism and they will wind up where they wish to arrive as there is no other possible outcome. But if the answer no, then in order to wind up where we wish to arrive, we have to not only overthrow capitalism, we have use means that will push us toward the desired future society. As such, **means** become the key and they cannot be ignored or downplayed in favour of the ends — particularly as these ends will never be reached if the appropriate means are not used.

This is no abstract metaphysical or ideological/theoretical point. The impact of this issue can be seen from the practice of Bolshevism in power. For Lenin and Trotsky, **any** and **all** means could and were used in pursuit of their ends. They simply could not see how the means used shaped the ends reached. Ultimately, there was only two possibilities — socialism (by definition classless) or a return to capitalism.

Once we see that because of their flawed perspective on what comes after capitalism we understand why, for the Bolsheviks, the means used and institutions created were meaningless. We can see one of the roots for Bolshevik indifference to working class self-management. As Samuel Farber notes that “*there is no evidence indicating that Lenin or any of the mainstream Bolshevik leaders lamented the loss of workers’ control or of democracy in the soviets, or at least referred to these losses as a retreat, as Lenin declared with the replacement of War Communism by NEP in 1921.*” [Before Stalinism, p. 44] There was no need, for such means had no impact on achieving the ends Bolshevik power had set itself. As we discuss in section 6, such questions of meaningful working class participation in the workplace or the soviets were considered by the likes of Trotsky as fundamentally irrelevant to whether Bolshevik Russia was socialist or whether the working class was the ruling class or not, incredible as it may seem.

So if we accept Marx’s basic schema, then we simply have to conclude that what means we use are, ultimately, irrelevant as there is only one outcome. As long as property is nationalised and a non-capitalist party holds state power, then the basic socialist nature of the regime automatically flows. This was, of course, Trotsky’s argument with regard to Stalinist Russia and why he defended it against those who recognised that it was a new form of class society. Yet it is precisely the rise of Stalinism out of the dictatorship of the Bolsheviks which exposes the limitations in the Marxist schema of historical development.

Simply put, there is no guarantee that getting rid of capitalism will result in a

decent society. As anarchists like Bakunin argued against Marx, it is possible to get rid of capitalism while not creating socialism, if we understand by that term a free, classless society of equals. Rather, a Marxist revolution would “*concentrate all the powers of government in strong hands, because the very fact that the people are ignorant necessitates strong, solicitous care by the government. [It] will create a single State bank, concentrating in its hands all the commercial, industrial, agricultural, and even scientific production; and they will divide the mass of people into two armies — industrial and agricultural armies under the direct command of the State engineers who will constitute the new privileged scientific-political class.*” [The Political Philosophy of Bakunin, p. 289] As Bolshevism proved, there **was** always an alternative to socialism or a reversion to capitalism, in this case **state** capitalism.

So libertarians have long been aware that actually existing capitalism could be replaced by another form of class society. As the experience of Bolshevik tyranny proves beyond doubt, this perspective is the correct one. And that perspective ensured that during the Russian Revolution the Makhnovists **had** to encourage free soviets and workers’ self-management, freedom of speech and organisation in order for the revolution to remain socialist (see the appendix on “Why does the Makhnovist movement show there is an alternative to Bolshevism?”). In contrast, the Bolsheviks implemented party dictatorship, nationalisation and one-man management while proclaiming this had something to do with socialism. Little wonder Trotsky had such difficulties understanding the obvious truth that Stalinism has **nothing** to do with socialism.

2 Why did the Marxist theory of the state undermine working class power?

As discussed in section H.3.7, anarchists and Marxists have fundamentally different definitions of what constitutes a state. These different definitions resulted, in practice, to the Bolsheviks undermining **real** working class power during the Russian Revolution in favour of an abstract “*power*” which served as little more than a fig-leaf for Bolshevik power.

For anarchists, the state is marked by centralised power in the hands of a few. The state, we argue, is designed to ensure minority rule and, consequently, cannot be used by the majority to manage their own affairs. Every bourgeois revolution, moreover, has been marked by a conflict between centralised power and popular power and, unsurprisingly, the bourgeois favoured the former over the latter. As such, we would expect centralised power (i.e. a state) to be the means by which a minority class seized power **over** the masses and never the means by which the majority managed society themselves. It was for this reason that anarchists refuse to confuse a federation of self-managed organisations with a state:

“The reader knows by now that the anarchists refused to use the term ‘State’ even for a transitional situation. The gap between authoritarians and libertarians has not always been very wide on this score. In the First International the collectivists, whose spokesman was Bakunin, allowed the terms ‘regenerate State,’ ‘new and revolutionary State,’ or even ‘socialist State’ to be accepted as synonyms

for 'social collective.' The anarchists soon saw, however, that it was rather dangerous for them to use the same word as the authoritarians while giving it a quite different meaning. They felt that a new concept called for a new word and that the use of the old term could be dangerously ambiguous; so they ceased to give the name 'State' to the social collective of the future. [Daniel Guerin, **Anarchism**, pp. 60–1]

This is no mere semantics. The essence of statism is the removal of powers that should belong to the community as whole (though they may for reasons of efficiency delegate their actual implementation to elected, mandated and recallable committees) into the hands of a tiny minority who claim to act on our behalf and in our interests but who are not under our direct control. In other words it continues the division into rulers and ruled. Any confusion between two such radically different forms of organisation can only have a seriously negative effect on the development of any revolution. At its most basic, it allows those in power to develop structures and practices which disempower the many while, at the same time, taking about extending working class “power.”

The roots of this confusion can be found at the root of Marxism. As discussed in section H.3.7, Marx and Engels had left a somewhat contradictory inheritance on the nature and role of the state. Unlike anarchists, who clearly argued that only confusion would arise by calling the organs of popular self-management required by a revolution a “state,” the founders of Marxism confused two radically different ideas. On the one hand, there is the idea of a radical and participatory democracy (as per the model of the Paris Commune). On the other, there is a centralised body with a government in charge (as per the model of the democratic state). By using the term “state” to cover these two radically different concepts, it allowed the Bolsheviks to confuse party power with popular power and, moreover, replace the latter by the former without affecting the so-called “proletarian” nature of the state. The confusion of popular organs of self-management with a state ensured that these organs **were** submerged by state structures and top-down rule.

By confusing the state (delegated power, necessarily concentrated in the hands of a few) with the organs of popular self-management Marxism opened up the possibility of a “workers’ state” which is simply the rule of a few party leaders over the masses. The “truth of the matter,” wrote Emma Goldman, “is that the Russian people have been **locked out** and that the Bolshevik State — even as the bourgeois industrial master — uses the sword and the gun to keep the people out. In the case of the Bolsheviks this tyranny is masked by a world-stirring slogan ... Just because I am a revolutionist I refuse to side with the master class, which in Russia is called the Communist Party.” [**My Disillusionment in Russia**, p. xlix] In this, she simply saw in practice that which Bakunin had predicted would happen. For Bakunin, like all anarchists, “every state power, every government, by its nature and by its position stands outside the people and above them, and must invariably try to subject them to rules and objectives which are alien to them.” It was for this reason “we declare ourselves the enemies of every government and state every state power ... the people can only be happy and free when they create their own life, organising themselves from below upwards.” [**Statism and Anarchy**, p. 136]

The “workers’ state” proved no exception to that generalisation. The roots

of the problem, which expressed itself from the start during the Russian revolution, was the fatal confusion of the state with organs of popular self-management. Lenin argued in *“State and Revolution”* that, on the one hand, *“the armed proletariat itself shall become the government”* while, on the other, that *“[w]e cannot imagine democracy, not even proletarian democracy, without representative institutions.”* If, as Lenin asserts, democracy *“means equality”* he has reintroduced inequality into the “proletarian” state as the representatives have, by definition, more power than those who elected them. [Essential Works of Lenin, p. 363, p. 306 and p. 346] Yet, as noted in section H.1.2, representative bodies necessarily place policy-making in the hands of deputies and do not (and cannot) mean that the working class **as a class** can manage society. Moreover, such bodies ensure that popular power can be usurped without difficulty by a minority. After all, a minority already **does** hold power.

True equality implies the abolition of the state and its replacement by a federation of self-managed communes. The state, as anarchists have long stressed, signifies a power **above** society, a concentration of power into a few hands. Lenin, ironically, quotes Engels on the state being marked by *“the establishment of a public power, which is no longer directly identical with the population organising itself as an armed power.”* [quoted by Lenin, **Op. Cit.**, p. 275] As Lenin supported **representative** structures rather than one based on elected, mandated and recallable **delegates** then he has created a *“public power”* no longer identical with the population.

Combine this with an awareness that bureaucracy must continue to exist in the “proletarian” state then we have the ideological preconditions for dictatorship **over** the proletariat. *“There can be no thought,”* asserted Lenin, *“of destroying officialdom immediately everywhere, completely. That is utopia. But to smash the old bureaucratic machine at once and to begin immediately to construct a new one that will enable all officialdom to be gradually abolished is not utopia.”* In other words, Lenin expected *“the gradual ‘withering away’ of all bureaucracy.”* [**Op. Cit.**, p. 306 and p. 307]

Yet why expect a “new” bureaucracy to be as easy to control as the old one? Regular election to posts does not undermine the institutional links, pressures and powers a centralised *“officialdom”* will generate around itself, even a so-called *“proletarian”* one. Significantly, Lenin justified this defence of temporary state bureaucracy by the kind of straw man argument against anarchism *“State and Revolution”* is riddled with. *“We are not utopians,”* asserted Lenin, *“we do not indulge in ‘dreams’ of dispensing at once with all administration, with all subordination: these anarchist dreams . . . are totally alien to Marxism, and, as a matter of fact, serve only to postpone the socialist revolution until human nature has changed. No, we want the socialist revolution with human nature as it is now, with human nature that cannot dispense with subordination, control and ‘managers.’”* [**Op. Cit.**, p. 307] Yet anarchists do not wish to *“dispense”* with *“all administration,”* rather we wish to replace government **by** administration, hierarchical positions (*“subordination”*) with co-operative organisation. Equally, we see the revolution as a process in which *“human nature”* is changed by the struggle itself so that working class people become capable of organising itself and society without bosses, bureaucrats and politicians. If Lenin says that socialism *“cannot dispense”* with the hierarchical structures required by class society why should we expect the same kinds of structures and social relationships to have different ends just because *“red”* managers are in power?

Thus Lenin's work is deeply ambiguous. He is confusing popular self-management with a state structure. Anarchists argue that states, by their very nature, are based on concentrated, centralised, alienated power in the hands of a few. Thus Lenin's "*workers' state*" is just the same as any other state, namely rule by a few over the many. This is confirmed when Lenin argues that "[u]nder socialism, **all** will take part in the work of government in turn and will soon become accustomed to no one governing." In fact, once the "overwhelming majority" have "learned to administer the state **themselves**, have taken this business into their own hands . . . the need for government begins to disappear. The more complete democracy becomes, the nearer the moment approaches when it becomes unnecessary. The more democratic the 'state' of the armed workers — which is 'no longer a state in the proper sense of the word' — becomes, the more rapidly does **the state** begin to wither away." Moreover, "[u]ntil the 'higher' phase of communism arrives, the Socialists demand the **strictest** control, by society **and by the state**, of the amount of labour and of consumption." [Op. Cit., p. 361, p. 349 and p. 345]

Clearly, the "proletarian" state is **not** based on direct, mass, participation by the population but, in fact, on giving power to a few representatives. It is **not** identical with "*society*," i.e. the armed, self-organised people. Rather than look to the popular assemblies of the French revolution, Lenin, like the bourgeoisie, looked to representative structures — structures designed to combat working class power and influence. (at one point Lenin states that "*for a certain time not only bourgeois right, but even the bourgeois state remains under communism, without the bourgeoisie!*") This was because "*bourgeois right in regard to the distribution of articles of consumption inevitably presupposes the existence of the bourgeois state, for right is nothing without an apparatus capable of enforcing the observance of the standards of right.*" [Op. Cit., p. 346]).

Can we expect the same types of organs and social relationships to produce different results simply because Lenin is at the head of the state? Of course not.

As the Marxist theory of the state confused party/vanguard power with working class power, we should not be surprised that Lenin's "*State and Revolution*" failed to discuss the practicalities of this essential question in anything but a passing and ambiguous manner. For example, Lenin notes that "[b]y educating the workers' party, Marxism educates the vanguard of the proletariat which is capable of assuming power and of **leading the whole people** to socialism, of directing and organising the new order." [Op. Cit., p. 288] It is not clear whether it is the vanguard or the proletariat as a whole which assumes power. Later, he states that "*the dictatorship of the proletariat*" was "*the organisation of the vanguard of the oppressed as the ruling class for the purpose of crushing the oppressors.*" [Op. Cit., p. 337] Given that this fits in with subsequent Bolshevik practice, it seems clear that it is the vanguard which assumes power rather than the whole class. The negative effects of this are discussed in section 8.

However, the assumption of power by the party highlights the key problem with the Marxist theory of the state and how it could be used to justify the destruction of popular power. It does not matter in the Marxist schema whether the class or the party is in power, it does not impact on whether the working class is the "*ruling class*" or not. As Lenin put it. "*democracy is **not** identical with the subordination of the minority to the majority. Democracy is a **state** which recognises the subordination of the minority to the majority, i.e. an organisation*

for the systematic use of **violence** by one class against the other, by one section of the population against another.” [Op. Cit., p. 332] Thus the majority need not actually “rule” (i.e. make the fundamental decisions) for a regime to be considered a “democracy” or an instrument of class rule. That power can be delegated to a party leadership (even dictatorship) without harming the “class nature” of the state. This results of such a theory can be seen from Bolshevik arguments in favour of party dictatorship during the civil war period (and beyond).

The problem with the centralised, representative structures Lenin favours for the “*dictatorship of the proletariat*” is that they are rooted in the inequality of power. They constitute in fact, if not initially in theory, a power **above** society. As Lenin put it, “the **essence** of bureaucracy” is “*privileged persons divorced from the masses and superior to the masses.*” [Op. Cit., p. 360] In the words of Malatesta, a “government, that is a group of people entrusted with making laws and empowered to use the collective power to oblige each individual to obey them, is already a privileged class and cut off from the people. As any constituted body would do, it will instinctively seek to extend its powers, to be beyond public control, to impose its own policies and to give priority to its special interests. Having been put in a privileged position, the government is already at odds with the people whose strength it disposes of.” [Anarchy, p. 34] As we discussed in appendix “What happened during the Russian Revolution?”, Lenin’s regime provides more than enough evidence to support such an analysis.

This is the fatal flaw in the Marxist theory of the state. As Bakunin put it, “the theory of the state” is “based on this fiction of pseudo-popular representation — which in actual fact means the government of the masses by an insignificant handful of privileged individuals, elected (or even not elected) by mobs of people rounded up for voting and never knowing what or whom they are voting for — on this imaginary and abstract expression of the imaginary thought and will of the all the people, of which the real, living people do not have the faintest idea.” Thus the state represents “government of the majority by a minority in the name of the presumed stupidity of the one and the presumed intelligence of the other.” [Op. Cit., pp. 136–7]

By confusing popular participation with a state, by ignoring the real inequalities of power in any state structure, Marxism allowed Lenin and the Bolsheviks to usurp state power, implement party dictatorship **and** continue to talk about the working class being in power. Because of Marxism’s metaphysical definition of the state (see section H.3.7), actual working class people’s power over their lives is downplayed, if not ignored, in favour party power.

As parties represent classes in this schema, if the party is in power then, by definition, so is the class. This raises the possibility of Lenin asserting the “*working class*” held power even when his party was exercising a dictatorship **over** the working class and violently repressing any protests by it. As one socialist historian puts it, “while it is true that Lenin recognised the different functions and democratic *raison d’être* for both the soviets and his party, in the last analysis it was the party that was more important than the soviets. In other words, the party was the final repository of working-class sovereignty. Thus, Lenin did not seem to have been reflected on or have been particularly perturbed by the decline of the soviets after 1918.” [Samuel Farber, **Before Stalinism**, p. 212] This can be seen from how the Marxist theory of the state was changed **after** the Bolsheviks seized power to bring into line with its new role as the

means by which the vanguard ruled society (see section H.3.8).

This confusion between two radically different concepts and their submersion into the term “state” had its negative impact from the start. Firstly, the Bolsheviks constantly equated rule by the Bolshevik party (in practice, its central committee) with the working class as a whole. Rather than rule by all the masses, the Bolsheviks substituted rule by a handful of leaders. Thus we find Lenin talking about “*the power of the Bolsheviks — that is, the power of the proletariat*” as if these things were the same. Thus it was a case of “*the Bolsheviks*” having “*to take the whole governmental power into their own hands,*” of “*the complete assumption of power by the Bolsheviks alone,*” rather than the masses. Indeed, Russia had been “*ruled by 130,000 landowners*” and “*yet they tell us that Russia will not be able to be governed by the 240,000 members of the Bolshevik Party — governing in the interests of the poor and against the rich.*” [Will the Bolsheviks Maintain Power?, p. 102, p. 7 and pp. 61–2]

However, governing in the “*interests*” of the poor is **not** the same as the poor governing themselves. Thus we have the first key substitution that leads to authoritarian rule, namely the substitution of the power of the masses by the power of a few members who make up the government. Such a small body will require a centralised state system and, consequently, we have the creation of a hierarchical body around the new government which, as we discuss in section 7, will become the real master in society.

The preconditions for a new form of class society have been created and, moreover, they are rooted in the basic ideas of Marxism. Society has been split into two bodies, the masses and those who claim to rule in their name. Given this basic inequality in power we would, according to anarchist theory, expect the interests of the masses and the rulers to separate and come into conflict. While the Bolsheviks had the support of the working class (as they did in the first few months of their rule), this does not equal mass participation in running society. Quite the reverse. So while Lenin raised the vision of mass participation in the “*final*” stage of communism, he unfortunately blocked the means to get there.

Simply put, a self-managed society can only be created by self-managed means. To think we can have a “*public power*” separate from the masses which will, slowly, dissolve itself into it is the height of naivety. Unsurprisingly, once in power the Bolsheviks held onto power by all means available, including gerrymandering and disbanding soviets, suppressing peaceful opposition parties and violently repressing the very workers it claimed ruled in “*soviet*” Russia (see section 6 of the appendix “What happened during the Russian Revolution?”). Significantly, this conflict developed before the start of the civil war (see section 3 of the appendix on “What caused the degeneration of the Russian Revolution?” for details). So when popular support was lost, the basic contradictions in the Bolshevik position and theory became clear. Rather than be a “*soviet*” power, the Bolshevik regime was simply rule over the workers in their name, nothing more. And equally unsurprising, the Leninists revised their theory of the state to take into account the realities of state power and the need to justify minority power **over** the masses (see section H.3.8).

Needless to say, even electoral support for the Bolsheviks should not and cannot be equated to working class management of society. Echoing Marx and Engels at their most reductionist (see section H.3.9), Lenin stressed that the state was “*an organ or machine for the subjection of one class by another*”

...when the State has become proletarian, when it has become a machine for the domination of the proletariat over the bourgeoisie, then we shall fully and unreservedly for a strong government and centralism." [Op. Cit., p. 75] The notions that the state could have interests of its own, that it is not simply an instrument of class rule but rather **minority** class rule are nowhere to be found. The implications of this simplistic analysis had severe ramifications for the Russian Revolution and Trotskyist explanations of both Stalinism and its rise.

Which brings us to the second issue. It is clear that by considering the state simply as an instrument of class rule Lenin could downplay, even ignore, such important questions of **how** the working class can "rule" society, how it can be a "ruling" class. Blinded by the notion that a state could not be anything **but** an instrument of class rule, the Bolsheviks simply were able to justify any limitation of working class democracy and freedom and argue that it had no impact on whether the Bolshevik regime was really a "dictatorship of the proletariat" or not. This can be seen from Lenin's polemic with German Social-Democrat Karl Kautsky, where he glibly stated that "[t]he form of government, has absolutely nothing to do with it." [Collected Works, vol. 28, p. 238]

Yet the idea that there is a difference between **who** rules in a revolutionary situation and **how** they rule is a key one, and one raised by the anarchists against Marxism. After all, if the working class is politically expropriated how can you maintain that a regime is remotely "proletarian"? Ultimately, the working class can only "rule" society through its collective participation in decision making (social, economic and "political"). If working class people are not managing their own affairs, if they have delegated that power to a few party leaders then they are **not** a ruling class and could never be. While the bourgeoisie can, and has, ruled economically under an actual dictatorship, the same cannot be said to be the case with the working class. Every class society is marked by a clear division between order takers and order givers. To think that such a division can be implemented in a socialist revolution and for it to remain socialist is pure naivety. As the Bolshevik revolution showed, representative government is the first step in the political expropriation of the working class from control over their fate.

This can best be seen by Trotsky's confused analyses of Stalinism. He simply could not understand the nature of Stalinism with the simplistic analytical tools he inherited from mainstream Marxism and Bolshevism. Thus we find him arguing in 1933 that:

"The dictatorship of a class does not mean by a long shot that its entire mass always participates in the management of the state. This we have seen, first of all, in the case of the propertied classes. The nobility ruled through the monarchy before which the noble stood on his knees. The dictatorship of the bourgeoisie took on comparatively developed democratic forms only under the conditions of capitalist upswing when the ruling class had nothing to fear. Before our own eyes, democracy has been supplanted in Germany by Hitler's autocracy, with all the traditional bourgeois parties smashed to smithereens. Today, the German bourgeoisie does not rule directly; politically it is placed under complete subjection to Hitler and his bands. Never-

theless, the dictatorship of the bourgeoisie remains inviolate in Germany, because all the conditions of its social hegemony have been preserved and strengthened. By expropriating the bourgeoisie politically, Hitler saved it, even if temporarily, from economic expropriation. The fact that the bourgeoisie was compelled to resort to the fascist regime testifies to the fact that its hegemony was endangered but not at all that it had fallen." [Trotsky, **The Class Nature Of The Soviet State**]

Yet Trotsky is confusing the matter. He is comparing the actions of class society with those of a socialist revolution. While a minority class need not "*participate*" **en masse** the question arises does this apply to the transition from class society to a classless one? Can the working class **really** be "*expropriated*" politically and still remain "*the ruling class*"? Moreover, Trotsky fails to note that the working class was **economically** and **politically** expropriated under Stalinism as well. This is unsurprising, as both forms of expropriation had occurred when he and Lenin held the reins of state power. Yet Trotsky's confused ramblings do serve a purpose in showing how the Marxist theory of the state can be used to rationalise the replacement of popular power by party power. With such ideological baggage, can it be a surprise that the Bolshevik replacement of workers' power by party power could be a revolutionary goal? Ironically, the Marxist theory of the state as an instrument of class rule helped ensure that the Russian working class did **not** become the ruling class post-October. Rather, it ensured that the Bolshevik party did.

To conclude, by its reductionist logic, the Marxist theory of the state ensured that the substitution of popular power by party power could go ahead and, moreover, be justified ideologically. The first steps towards party dictatorship can be found in such apparently "libertarian" works as Lenin's "*State and Revolution*" with its emphasis on "representation" and "centralisation." The net effect of this was to centralise power into fewer and fewer hands, replacing the essential constructive working class participation and self-activity required by a social revolution with top-down rule by a few party leaders. Such rule could not avoid becoming bureaucratized and coming into conflict with the real aspirations and interests of those it claimed to represent. In such circumstances, in a conflict between the "*workers' state*" and the actual workers the Marxist theory of the state, combined with the assumptions of vanguardism, made the shift to party dictatorship inevitable. As we discussed in section 3 of the appendix on "What caused the degeneration of the Russian Revolution?", authoritarian tendencies had surfaced before the civil war began.

The strange paradox of Leninism, namely that the theoretical dictatorship of the proletariat was, in practice, a dictatorship **over** the proletariat comes as no surprise. In spite of Lenin announcing "*all power to the soviets*" he remained committed to a disciplined party wielding centralised power. This regime soon expropriated the soviets while calling the subsequent regime "Soviet." Rather than create the authoritarian tendencies of the Bolshevik state the "objective factors" facing Lenin's regime simply increased their impact. The preconditions for the minority rule which the civil war intensified to extreme levels already existed within Marxist theory. Consequently, a Leninist revolution which avoided the (inevitable) problems facing a revolution would still create some kind of class society simply because it reproduces minority rule by creating a "*workers'*

state” as its first step. Sadly, Marxist theory confuses popular self-government with a state so ensuring the substitution of rule by a few party leaders for the popular participation required to ensure a successful revolution.

3 How did Engels’ essay “*On Authority*” affect the revolution?

We have discussed Engels’ infamous diatribe against anarchism already (see section H.4 and subsequent sections). Here we discuss how its caricature of anarchism helped disarm the Bolsheviks theoretically to the dangers of their own actions, so helping to undermine the socialist potential of the Russian revolution. While the Marxist theory of the state, with its ahistoric and ambiguous use of the word “state” undermined popular autonomy and power in favour of party power, Engels’ essay “*On Authority*” helped undermine popular self-management.

Simply put, Engels essay contained the germs from which Lenin and Trotsky’s support for one-man management flowed. He provided the Marxist orthodoxy required to undermine real working class power by confusing all forms of organisation with “*authority*” and equating the necessity of self-discipline with “*subordination*” to one will. Engels’ infamous essay helped Lenin to destroy self-management in the workplace and replace it with appointed “*one-man management*” armed with “*dictatorial powers*.”

For Lenin and Trotsky, familiar with Engels’ “*On Authority*,” it was a truism that any form of organisation was based on “*authoritarianism*” and, consequently, it did not really matter **how** that “*authority*” was constituted. Thus Marxism’s agnostic attitude to the patterns of domination and subordination within society was used to justify one-man management and party dictatorship. Indeed, “*Soviet socialist democracy and individual management and dictatorship are in no way contradictory . . . the will of a class may sometimes be carried by a dictator, who sometimes does more alone and is frequently more necessary.*” [Lenin, **Collected Works**, vol. 30, p. 476]

Like Engels, Lenin defended the principle of authority. The dictatorship of the Party over the proletariat found its apology in this principle, thoroughly grounded in the practice of bureaucracy and modern factory production. Authority, hierarchy, and the need for submission and domination is inevitable given the current mode of production, they argued. And no foreseeable change in social relations could ever overcome this blunt necessity. As such, it was (fundamentally) irrelevant **how** a workplace is organised as, no matter what, it would be “*authoritarian*.” Thus “*one-man management*” would be, basically, the same as worker’s self-management via an elected factory committee.

For Engels, any form of joint activity required as its “*first condition*” a “*dominant will that settles all subordinate questions, whether this will is represented by a single delegate or a committee charged with the execution of the resolutions of the majority of persons interested. In either case there is very pronounced authority.*” Thus the “*necessity of authority, and of imperious authority at that.*” Collective life, he stressed, required “*a certain authority, no matter how delegated*” and “*a certain subordination, are things which, independently of all social organisation, are imposed upon us.*” [The Marx-Engels Reader, p. 732]

Lenin was aware of these arguments, even quoting from this essay in his

State and Revolution. Thus he was aware that for Engels, collective decisions meant “*the will of the single individual will always have to subordinate itself, which means that questions are settled in an authoritarian way.*” Thus there was no difference if “*they are settled by decision of a delegate placed at the head of each branch of labour or, if possible, by a majority vote.*” The more advanced the technology, the greater the “*despotism*”: “*The automatic machinery of a big factory is much more despotic than the small capitalist who employ workers ever have been.*” [Op. Cit., p. 731] Thus Engels had used the modern factory system of mass production as a direct analogy to argue against the anarchist call for workers’ councils and self-management in production, for workers’ autonomy and participation. Like Engels, Lenin stressed the necessity of central authority in industry.

It can be argued that it was this moment that ensured the creation of state capitalism under the Bolsheviks. This is the moment in Marxist theory when the turn from economics to technics, from proletarian control to technocracy, from workers’ self-management to appointed state management was ensured. Henceforth the end of any critique of alienation in mainstream Marxism was assured. Submission to technique under hierarchical authority effectively prevents active participation in the social production of values. And there was no alternative.

As noted in section 8 of the appendix “What happened during the Russian Revolution?”). and section H.3.14, during 1917 Lenin did not favour workers’ self-management of production. He raised the idea of “*workers’ control*” after the workers spontaneously raised the idea and practice themselves during the revolution. Moreover, he interpreted that slogan in his own way, placing it within a statist context and within institutions inherited from capitalism (see section H.3.12). Once in power, it was (unsurprisingly) **his** vision of socialism and workers’ control that was implemented, **not** the workers’ factory committees. The core of that vision he repeatedly stressed had been raised **before** the October revolution.

This vision can be best seen in **The Immediate Tasks of the Soviet Government**, written by Lenin and published on the 25th of April 1918. This occurred before the start of the civil war and, indeed, he starts by arguing that “[t]hanks to the peace which has been achieved” the Bolsheviks had “*gained an opportunity to concentrate its efforts for a while on the most important and most difficult aspect of the socialist revolution, namely the task of organisation.*” The Bolsheviks, who had “*managed to complete the conquest of power,*” now faced “*the principal task of convincing people*” and doing “**practical organisational work.**” Only when this was done “*will it be possible to say that Russia has become not only a Soviet, but also a socialist, republic.*” [**The Immediate Tasks of the Soviet Government**, p. 2 and p. 8]

Sadly, this “*organisation*” was riddled with authoritarianism and was fundamentally top-down in nature. His “socialist” vision was simply state capitalism (see section 10 of the appendix “What happened during the Russian Revolution?”). However, what interests us here is that his arguments to justify the “socialist” policies he presented are similar to those put forward by Engels in “*On Authority.*” As such, we can only reach the following conclusions. Firstly, that the “*state capitalist*” vision of socialism imposed upon Russia by the Bolsheviks was what they had always intended to introduce. It was their limited support for workers’ control in 1917 that was atypical and not part of their

tradition, **not** their policies once in power (as modern day Leninists assert). Secondly, that this vision had its roots in classical Marxism, specifically Engels' "On Authority" and the identification of socialism with nationalised property (see section H.3.13 for more on this).

That Engels diatribe had a negative impact on the development of the Russian revolution can easily be seen from Lenin's arguments. For example, Lenin argues that the "tightening of discipline" and "harmonious organisation" calls "for coercion — coercion precisely in the form of dictatorship." He did not object to granting "individual executives dictatorial power (or 'unlimited' powers)" and did not think "the appointment of individual, dictators with unlimited power" was incompatible with "the fundamental principles of the Soviet government." After all, "the history of revolutionary movements" had "shown" that "the dictatorship of individuals was very often the expression, the vehicle, the channel of the dictatorship of revolutionary classes." He notes that "[u]ndoubtedly, the dictatorship of individuals was compatible with bourgeois democracy." [Op. Cit., p. 28 and p. 32] It would be churlish to note that previous revolutionary movements had not been **socialist** in nature and did not aim to **abolish** classes. In such cases, the government appointing people with dictatorial powers would not have harmed the nature of the revolution, which was transferring power from one minority class to another.

Lenin mocked the "exceedingly poor arguments" of those who objected, saying that they "demand of us a higher democracy than bourgeois democracy and say: personal dictatorship is absolutely incompatible with your, Bolshevik (i.e. not bourgeois, **but socialist**) Soviet democracy." As the Bolsheviks were "not anarchists," he admitted the need "coercion" in the "transition from capitalism to socialism," its form being determined "by the degree of development of the given revolutionary class, and also by special circumstances." In general, he stressed, there was "absolutely **no** contradiction in principle between Soviet (**that is**, socialist) democracy and the exercise of dictatorial powers by individuals." [Op. Cit., pp. 32–3 and p. 33] Which is, of course, sophistry as dictatorship by a few people in some aspects of life will erode democracy in others. For example, being subject to the economic power of the capitalist during work harms the individual and reduces their ability to participate in other aspects of social life. Why should being subject to "red" bosses be any different?

In particular, Lenin argued that "individual dictatorial power" was required because "large-scale machine industry" (which is the "foundation of socialism") calls for "absolute and strict **unity of will**, which directs the joint labours of hundreds, thousands and tens of thousands of people. . . But how can strict unity of will be ensured? By thousands subordinating their will to the will of one." He reiterated that the "**unquestioning subordination** to a single will is absolutely necessary for the success of processes organised on the pattern of large-scale machine industry." The people must "**unquestioningly obey the single will** of the leaders of labour." And so it was a case (for the workers, at least) of "[o]bedience, and unquestioning obedience at that, during work to the one-man decisions of Soviet directors, of the dictators elected or appointed by Soviet institutions, vested with dictatorial powers." [Op. Cit., p. 33, p. 34 and p. 44]

The parallels with Engels' "On Authority" could not be clearer, as are the fallacies of Lenin's assertions (see, for example, section H.4.4). Lenin, like Engels, uses the example of modern industry to bolster his arguments. Yet the net

effect of Lenin's argument was to eliminate working class economic power at the point of production. Instead of socialist social relationships, Lenin imposed capitalist ones. Indeed, no capitalist would disagree with Lenin's workplace regime — they try to create such a regime by breaking unions and introducing technologies and techniques which allow them to control the workers. Unsurprisingly, Lenin also urged the introduction of two such techniques, namely “*piece-work*” and “*applying much of what is scientific and progressive in the Taylor system.*” [Op. Cit., pp. 23–4] As Trotskyist Tony Cliff reminds us, “*the employers have at their disposal a number of effective methods of disrupting th[e] unity [of workers as a class]. Once of the most important of these is the fostering of competition between workers by means of piece-work systems.*” He notes that these were used by the Nazis and the Stalinists “*for the same purpose.*” [State Capitalism in Russia, pp. 18–9] Obviously piece-work is different when Lenin introduces it! Similarly, when Trotsky notes that “[b]lind obedience is not a thing to be proud of in a revolutionary,” it is somewhat different when Lenin calls upon workers to do so (or, for that matter, Trotsky himself when in power — see section 6 for Trotsky's radically different perspective on blind obedience of the worker to “his” state in 1920!). [Terrorism and Communism, p. xlvii]

The **economic** dominance of the bourgeoisie ensures the political dispossession of the working class. Why expect the introduction of capitalist social relations in production to have different outcomes just because Lenin was the head of the government? In the words of libertarian socialist Maurice Brinton:

“We hold that the ‘relations of production’ — the relations which individuals or groups enter into with one another in the process of producing wealth — are the essential foundations of any society. A certain pattern of relations of production is the common denominator of all class societies. This pattern is one in which the producer does not dominate the means of production but on the contrary both is ‘separated from them’ and from the products of his own labour. In all class societies the producer is in a position of subordination to those who manage the productive process. Workers’ management of production — implying as it does the total domination of the producer over the productive process — is not for us a marginal matter. It is the core of our politics. It is the only means whereby authoritarian (order-giving, order-taking) relations in production can be transcended and a free, communist or anarchist, society introduced.

“We also hold that the means of production may change hands (passing for instance from private hands into those of a bureaucracy, collectively owning them) with out this revolutionising the relations of production. Under such circumstances — and whatever the formal status of property — the society is still a class society for production is still managed by an agency other than the producers themselves. Property relations, in other words, do not necessarily reflect the: relations of production. They may serve to mask them — and in fact they often have.” [The Bolsheviks and Workers’ Control, p. vii-viii]

The net effect of Lenin's arguments, as anarchist Peter Arshinov noted a few years later, was that the “*fundamental fact*” of the Bolshevik revolution

was “that the workers and the peasant labourers remained within the earlier situation of ‘working classes’ — producers managed by authority from above.” He stressed that Bolshevik political and economic ideas may have “remov[ed] the workers from the hands of individual capitalists” but they “delivered them to the yet more rapacious hands of a single ever-present capitalist boss, the State. The relations between the workers and this new boss are the same as earlier relations between labour and capital . . . Wage labour has remained what it was before, except that it has taken on the character of an obligation to the State. . . It is clear that in all this we are dealing with a simple substitution of State capitalism for private capitalism.” [**The History of the Makhnovist Movement**, p. 35 and p. 71] Moreover, Lenin’s position failed to understand that unless workers have power at the point of production, they will soon lose it in society as a whole. Which, of course, they soon did in Bolshevik Russia, even in the limited form of electing a “revolutionary” government.

So while the causes of the failure of the Russian Revolution were many fold, the obvious influence of Engels’ “*On Authority*” on the fate of the workers’ control movement should be noted. After all, Engels’ argument confuses the issues that Bakunin and other anarchists were trying to raise (namely on the nature of the organisations we create and our relationships with others). If, as Engels’ argues, all organisation is “*authoritarian*,” then does this mean that there no real difference between organisational structures? Is a dictatorship just the same as a self-managed group, as they are both organisations and so both “*authoritarian*”? If so, surely that means the kinds of organisation we create are irrelevant and what **really** matters is state ownership? Such logic can only lead to the perspective that working class self-management of production is irrelevant to socialism and, unfortunately, the experience of the Russian Revolution tends to suggest that for mainstream Marxism this is the case. The Bolsheviks imposed distinctly authoritarian social structures while arguing that they were creating socialism.

Like Engels, the Bolsheviks defended the principle of authority. The dictatorship of the Party over the proletariat in the workplace (and, indeed, elsewhere) ultimately found its apology in this principle, thoroughly grounded in the practice of bureaucracy and modern factory production. Authority, hierarchy, and the need for submission and domination is inevitable, given the current mode of production, they argued. And, as Engels had stressed, no foreseeable change in social relations could ever overcome this blunt necessity. As such, it was (fundamentally) irrelevant for the leading Bolsheviks **how** a workplace is organised as, no matter what, it would be “*authoritarian*.” Thus “*one-man management*” would be, basically, the same as worker’s self-management via an elected factory committee. As Trotsky made clear in 1920, for the Bolsheviks the “*dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy over the whole Soviet mechanism of the collective will of the workers [i.e. the party, which Trotsky cheerfully admits is exercising a **party** dictatorship], and not at all in the form in which individual economic enterprises are administered.*” Thus, it “*would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of the factories.*” [**Terrorism and Communism**, p. 162]

By equating “*organisation*” with “*authority*” (i.e. hierarchy) and dismissing the importance of revolutionising the social relationships people create between themselves, Engels opened the way for the Bolsheviks’ advocacy of “*one-man*

management.” His essay is at the root of mainstream Marxism’s agnostic attitude to the patterns of domination and subordination within society and was used to justify one-man management. After all, if Engels was right, then it did not matter **how** the workplace was organised. It would, inherently, be “*authoritarian*” and so what mattered, therefore, was who owned property, **not** how the workplace was run. Perhaps, then, “*On Authority*” was a self-fulfilling prophecy — by seeing any form of organisation and any form of advanced technology as needing hierarchy, discipline and obedience, as being “*authoritarian,*” it ensured that mainstream Marxism became blinded to the key question of **how** society was organised. After all, if “*despotism*” was a fact of life within industry regardless of how the wider society was organised, then it does not matter if “*one-man management*” replaces workers’ self-management. Little wonder then that the continued alienation of the worker was widespread long before Stalin took power and, more importantly, before the civil war started.

As such, the dubious inheritance of classical Marxism had started to push the Bolshevik revolution down an authoritarian path and create economic structures and social relationships which were in no way socialist and, moreover, laid the foundations for Stalinism. Even if the civil war had not occurred, capitalist social relationships would have been dominant within “socialist” Russia — with the only difference being that rather than private capitalism it would have been state capitalism. As Lenin admitted, incidentally. It is doubtful that this state capitalism would have been made to serve “*the whole people*” as Lenin naively believed.

In another way Engels identification of organisation with authority affected the outcome of the revolution. As **any** form of organisation involved, for Engels, the domination of individuals and, as such, “*authoritarian*” then the nature of the socialist state was as irrelevant as the way workplaces were run. As both party dictatorship and soviet democracy meant that the individual was “*dominated*” by collective decisions, so both were “*authoritarian.*” As such, the transformation of the soviet state into a party dictatorship did not fundamentally mean a change for the individuals subject to it. Little wonder that no leading Bolshevik called the end of soviet democracy and its replacement by party dictatorship as a “retreat” or even as something to be worried about (indeed, they all argued the opposite, namely that party dictatorship was essential and not an issue to be worried about).

Perhaps this analogy by the SWP’s Tony Cliff of the relationship between the party and the working class provides an insight:

“In essence the dictatorship of the proletariat does not represent a combination of abstract, immutable elements like democracy and centralism, independent of time and space. The actual level of democracy, as well as centralism, depends on three basic factors: 1. the strength of the proletariat; 2. the material and cultural legacy left to it by the old regime; and 3. the strength of capitalist resistance. The level of democracy feasible must be indirect proportion to the first two factors, and in inverse proportion to the third. The captain of an ocean liner can allow football to be played on his vessel; on a tiny raft in a stormy sea the level of tolerance is far lower.” [Lenin, vol. 3, p. 179]

Ignoring the obvious points (such as comparing working class freedom and

democracy to a game!), we can see shades of Engels in Cliff's words. Let us not forget that Engels argued that "a ship on the high seas" at a "time of danger" required "the necessity of authority, and of imperious authority at that." [Op. Cit., p. 732] Here Cliff is placing the party into the Captain's role and the workers as the crew. The Captain, in Engels argument, exercised "imperious authority." In Cliff's, the party decides the freedoms which working class people are allowed to have — and so subjects them to its "imperious authority."

Little wonder Bolshevism failed. By this simple analogy Cliff shows the authoritarian essence of Bolshevism and who really has "all power" under that system. Like the crew and passengers dominated by the will of the captain, the working class under Leninism will be dominated by the party. It does not bode well that Cliff thinks that democracy can be "feasible" in some circumstances, but not others and it is up to those in power (i.e. the party leaders) to determine when it was. In his rush to justify Bolshevik party dictatorship in terms of "objective conditions" he clearly forgot his earlier comments that the "liberation of the working class can only be achieved through the action of the working class. Hence one can have a revolution with more or less violence, with more or less suppression of civil rights of the bourgeoisie and its hangers-on [a general catch-all category which, if Bolshevik practice is anything to go by, can include rebel workers, indeed the whole working class!], with more or less political freedom, but one **cannot** give a revolution, as the history of Russia conclusively demonstratives, without workers' democracy — even if restricted and distorted. Socialist advance must be gauged by workers' freedom, by their power to shape their own destiny . . . Without workers' democracy the immediate means leads to a very different end, to an end that is prefigured in these same means." [Op. Cit., p. 110] Obviously if Lenin and Trotsky are the captains of the ship of state, such considerations are less important. When it is Lenin wielding "imperious authority" then workers' democracy can be forgotten and the regime remain a "workers' state"!

By ignoring the key issue Bakunin and other anarchists drew attention to by attacking "authority" (and let us not forget that by that they meant hierarchical organisations in which power is concentrated at the top in a few hands — see section H.4), Engels opened up the way of seeing democratic decision as being less than important. This is **not** to suggest that Engels favoured dictatorship. Rather we are suggesting that by confusing two radically different forms of organisation as self-management and hierarchy he blunted latter Marxists to the importance of participation and collective decision making from below. After all, if all organisation is "authoritarian" then it matters little, in the end, how it is structured. Dictatorship, representative democracy and self-management were all equally "authoritarian" and so the issues raised by anarchism can safely be ignored (namely that electing bosses does not equate to freedom). Thus the Bolshevik willingness to equate their dictatorship with rule by the working class is not such a surprise after all.

To conclude, rather than the anti-authoritarians not knowing "what they are talking about," "creating nothing but confusion," "betraying the movement of the proletariat" and "serv[ing] the reaction," it was Engels' essay that aided the Bolshevik counter-revolution and helped, in its own small way, to lay the foundations for Leninist tyranny and state capitalism. [Engels, Op. Cit., p. 733] Ultimately, Engels "On Authority" helped give Lenin the ideological premises by which to undermine workers' economic power during the revolution

and recreate capitalist social relations and call it “socialism.” His ill thought out diatribe had ramifications even he would never have guessed (but were obvious at the time to libertarians). His use of the modern factory system to argue against the anarchist call for workers’ councils, federalism and workers’ autonomy, for participation, for self-management, became the basis for re-imposing **capitalist** relations of production in revolutionary Russia.

4 How did the Bolshevik vision of “democracy” affect the revolution?

As discussed in section H.3.2, Marx and Engels had left their followers which a contradictory legacy as regards “*socialism from below*.” On the one hand, their praise for the Paris Commune and its libertarian ideas pointed to a participatory democracy run from below. On the other, Marx’s comments during the German Revolution in 1850 that the workers must “*strive for . . . the most determined centralisation of power in the hands of the state authority*” because “*the path of revolutionary activity*” can “*proceed only from the centre*” suggests a top-down approach. He stressed that centralisation of power was essential to overcome local autonomy, which would allow “*every village, every town and every province*” to put “*a new obstacle in the path*” the revolution due to “*local and provincial obstinacy*.” [Marx-Engels Reader, p. 509]

Building upon this contradictory legacy, Lenin unambiguously stressed the “*from above*” aspect of it (see section H.3.3 for details). The only real exception to this perspective occurred in 1917, when Lenin was trying to win mass support for his party. However, even this support for democracy from below was always tempered by reminding the reader that the Bolsheviks stood for centralisation and strong government once they were in power (see section 7).

Once in power, the promises of 1917 were quickly forgotten. Unsurprisingly, modern day Leninists argue that this was due to the difficult circumstances facing the Bolsheviks at the time. They argue that the words of 1917 represent the true democratic vision of Bolshevism. Anarchists are not impressed. After all, for an idea to be useful it must be practical — even in “exceptional circumstances.” If the Bolshevik vision is not robust enough to handle the problems that have affected every revolution then we have to question the validity of that vision or the strength of commitment its supporters hold it.

Given this, the question becomes which of these two aspects of Marxism was considered its “essence” by Lenin and the Bolsheviks. Obviously, it is hard to isolate the real Bolshevik vision of democracy from the influence of “objective factors.” However, we can get a taste by looking at how the Bolsheviks acted and argued during the first six months in power. During this period, the problems facing the revolution were hard but not as bad as those facing it after the Czech revolt at the end of May, 1918. Particularly after March, 1918, the Bolsheviks were in a position to start constructive work as in the middle of that month Lenin claimed that the “*Soviet Government has triumphed in the Civil War*.” [quoted by Maximoff, **The Guillotine at Work**, p. 53]

So the question as to whether the Bolsheviks were forced into authoritarian and hierarchical methods by the practical necessities of the civil war or whether all this was inherent in Leninism all along, and the natural product of Leninist

ideology, can be answered by looking at the record of the Bolsheviks prior to the civil war. From this we can ascertain the effect of the civil war. And the obvious conclusion is that the record of the initial months of Bolshevik rule point to a less than democratic approach which suggests that authoritarian policies were inherent in Leninism and, as such, pointed the revolution into a path where further authoritarian policies were not only easy to implement, but had to be as alternative options had been eliminated by previous policies. Moreover, Bolshevik ideology itself made such policies easy to accept and to justify.

As discussed in section 6 of the appendix “What happened during the Russian Revolution?”, it was during this period that the Bolsheviks started to gerrymander soviets and disband any they lost elections to. As we indicate in section 9 of the appendix “What happened during the Russian Revolution?”, they undermined the factory committees, stopping them federating and basically handed the factories to the state bureaucracy. Lenin argued for and implemented one-man management, piecework, Taylorism and other things Stalinism is condemned for (see section 3, for example). In the army, Trotsky disbanded the soldier committees and elected officers by decree.

How Trotsky defended this policy of appointing officers is significant. It mirrors Lenin’s argument in favour of appointed one-man management and, as such, reflects the basic Bolshevik vision of democracy. By looking at his argument we can see how the Bolshevik vision of democracy fatally undermined the Russian Revolution and its socialist content. The problems of the civil war simply deepened the abscess in democracy created by Lenin and Trotsky in the spring of 1918.

Trotsky acknowledged that that “*the soldier-workers and soldier-peasants*” needed “*to elect commanders for themselves*” in the Tzarist army “*not [as] military chiefs, but simply [as] representatives who could guard them against attacks of counter-revolutionary classes.*” However, in the new Red Army this was not needed as it was the “*workers’ and peasants’ Soviets, i.e. the same classes which compose the army*” which is building it. He blandly asserted that “[*h]ere no internal struggle is possible.*” To illustrate his point he pointed to the trade unions. “*The metal workers,*” he noted, “*elect their committee, and the committee finds a secretary, a clerk, and a number of other persons who are necessary. Does it ever happen that the workers should say: ‘Why are our clerks and treasurers appointed, and not elected?’ No, no intelligent workers will say so.*” [Leon Trotsky Speaks, p. 112–3]

Thus in less than six months, Lenin’s call in “*State and Revolution*” that “[*a*]ll officials, without exception, [would be] elected and subject to recall **at any time**” was dismissed as the demand that “*no intelligent workers*” would raise! [Essential Works of Lenin, p. 302] But, then again, Trotsky **was** in the process of destroying another apparent “*principle*” of Leninism, namely (to quote, like Lenin, Marx) “*the suppression of the standing army, and the substitution for it of the armed people.*” [quoted by Lenin, Op. Cit., p. 300]

Trotsky continues his argument. The Trade union committee, he asserts, would say “*You yourselves have chosen the committee. If you don’t like us, dismiss us, but once you have entrusted us with the direction of the union, then give us the possibility of choosing the clerk or the cashier, since we are better able to judge in the matter than you, and if our way of conducting business is bad, then throw us out and elect another committee.*” After this defence of elected dictatorship, he states that the “*Soviet government is the same as the*

committee of a trade union. It is elected by the workers and peasants, and you can at the All-Russian Congress of the Soviets, at any moment you like, dismiss that government and appoint another." Until that happens, he was happy to urge blind obedience by the sovereign people to their servants: "*But once you have appointed it, you must give it the right to choose the technical specialists, the clerks, the secretaries in the broad sense of the word, and in military affairs, in particular.*" He tried to calm the nerves of those who could see the obvious problems with this argument by asking whether it was "*possible for the Soviet government to appoint military specialists against the interests of the labouring and peasant masses?*" [Op. Cit., p. 113]

And the answer to that question is, of course, an empathic yes. Even looking at his own analogy, namely that of a trade union committee, it is obvious that an elected body can have interests separate from and in opposition to those who elected it. The history of trade unionism is full of examples of committees betraying the membership of the unions. And, of course, the history of the Soviet government under Lenin and Trotsky (never mind Stalin!) shows that just because it was once elected by a majority of the working people does not mean it will act in their best interests.

Trotsky even went one better. "*The army is now only in the process of formation,*" he noted. "*How could the soldiers who have just entered the army choose the chiefs! Have they have any vote to go by? They have none. And therefore elections are impossible.*" [Op. Cit., p. 113] If only the Tsar had thought of that one! If he had, he would still be in power. And, needless to say, Trotsky did not apply that particular logic to himself. After all, he had no experience of holding governmental office or building an army (or even being in combat). Nor did any of the other Bolshevik leaders. By the logic of his argument, not only should the workers not been allowed to vote for a soviet government, he and his fellow Bolsheviks should not have assumed power in 1917. But, clearly, sauce for the goose is definitely **not** sauce for the gander.

For all his talk that the masses could replace the Bolsheviks at the All-Russian Congress of Soviets, Trotsky failed to realise that these proposals (and other ones like it) ensured that this was unlikely to happen. Even assuming that the Bolsheviks had not gerrymandered and disbanded soviets, the fact is that the Bolshevik vision of "democracy" effectively hollowed out the grassroots participation required to make democracy at the top anything more than a fig-leaf for party power. He honestly seemed to believe that eliminating mass participation in other areas of society would have no effect on the levels of participation in soviet elections. Would people subjected to one-man management in the workplace and in the army really be truly free and able to vote for parties which had not appointed their bosses? Could workers who were disenfranchised economically and socially remain in political power (assuming you equate voting a handful of leaders into power with "*political power*")? And does being able to elect a representative every quarter to the All-Russian congress really mean that the working class was really in charge of society? Of course not.

This vision of top-down "democracy" can, of course, be traced back to Marx's arguments of 1850 and Lenin's comments that the "*organisational principle of revolutionary Social-Democracy*" was "*to proceed from the top downward.*" (see sections H.3.2 and H.3.3). By equating centralised, top-down decision making by an elected government with "democracy," the Bolsheviks had the ideological justification to eliminate the functional democracy associated with the factory

committees and soldiers committees. In place of workers' and soldiers' direct democracy and self-management, the Bolsheviks appointed managers and officers and justified because a workers' party was in power. After all, had not the masses elected the Bolsheviks into power? This became the means by which **real** democracy was eliminated in area after area of Russian working class life. Needless to say, a state which eliminates functional democracy in the grassroots will not stay democratic in any meaningful sense for long. At best, it will be like a bourgeois republic with purely elections where people elect a party to misrepresent them every four or so years while real economic, political and social power rests in the hands of a few. At worst, it would be a dictatorship with "elections" whose results are known before hand.

The Leninist vision of "democracy" is seen purely as a means of placing the party into power. Thus power in society shifts to the top, to the leaders of the centralised party in charge of the centralised state. The workers' become mere electors rather than actual controllers of the revolution and are expected to carry out the orders of the party without comment. In other words, a decidedly bourgeois vision of "democracy." Anarchists, in contrast, seek to dissolve power back into the hands of society and empower the individual by giving them a direct say in the revolution through their workplace and community assemblies and their councils and conferences.

This vision was not a new development. Far from it. While, ironically enough, Lenin's and Trotsky's support for the appointment of officers/managers can be refuted by looking at Lenin's **State and Revolution**, the fact is that the undemocratic perspectives they are based on can be found in Lenin's **What is to be Done?**. This suggests that his 1917 arguments were the aberration and against the true essence of Leninism, not his and Trotsky's policies once they were in power (as Leninists like to argue).

Forgetting that he had argued against "*primitive democracy*" in **What is to Be Done?**, Lenin had lambasted the opportunists and "*present Kautskyists*" for "*repeat[ing] the vulgar bourgeois jeers at 'primitive' democracy.*" Now, in 1917, it was a case that "*the transition from capitalism to socialism is impossible without some 'reversion' to 'primitive' democracy (how else can the majority, even the whole population, proceed to discharge state functions?)*" [Op. Cit., p. 302] Very true. As Leninism in power showed, the conscious elimination of "*primitive democracy*" in the army and workplace ensured that socialism was "*impossible.*" And this elimination was not justified in terms of "difficult" circumstances but rather in terms of principle and the inability of working people to manage their own affairs directly.

Particularly ironic, given Trotsky's trade union committee analogy was Lenin's comment that "*Bernstein [the arch revisionist and reformist] combats 'primitive democracy' . . . To prove that 'primitive democracy' is worthless, Bernstein refers to the experience of the British trade unions, as interpreted by the Webbs. Seventy years of development . . . convinced the trade unions that primitive democracy was useless, and they substituted ordinary democracy, i.e. parliamentarism, combined with bureaucracy, for it.*" Lenin replied that because the trade unions operated "*in absolute capitalist slavery*" a "*number of concessions to the prevailing evil, violence, falsehood, exclusion of the poor from the affairs of the 'higher' administration 'cannot be avoided.'* Under socialism much of the '*primitive*' democracy will inevitably be revived, since, for the first time in history of civilised society, the **mass** of the population will rise to **independent** partici-

pation, not only in voting and elections, but also in the everyday administration of affairs” [Op. Cit., p. 361] Obviously things looked a bit different once he and his fellow Bolshevik leaders were in power. Then the exclusion of the poor from the affairs of the “higher” administration was seen as normal practice, as proven by the practice of the trade unions! And as we note in section H.3.8, this “exclusion” was taken as a key lesson of the revolution and built into the Leninist theory of the state.

This development was not unexpected. After all, as we noted in section H.5.5, over a decade before Lenin had been less than enthralled by “primitive democracy” and more in agreement with Bernstein than he lets on in **State and Revolution**. In **What is to Be Done?**, he based his argument for centralised, top-down party organisation on the experiences of the labour movement in democratic capitalist regimes. He quotes the same book by the Webb’s to defend his position. He notes that “in the first period of existence in their unions, the British workers thought it was an indispensable sign of democracy for all members to do all the work of managing the unions.” This involved “all questions [being] decided by the votes of all the members” and all “official duties” being “fulfilled by all the members in turn.” He dismisses “such a conception of democracy” as “absurd” and “historical experience” made them “understand the necessity for representative institutions” and “full-time professional officials.” Ironically, Lenin records that in Russia the “‘primitive’ conception of democracy” existed in two groups, the “masses of the students and workers” and the “Economists of the Bernstein persuasion.” [Op. Cit., pp. 162–3]

Thus Trotsky’s autocratic and top-down vision of democracy has its roots within Leninism. Rather than being forced upon the Bolsheviks by difficult circumstances, the eroding of grassroots, functional (“primitive”) democracy was at the core of Bolshevism. Lenin’s arguments in 1917 were the exception, not his practice after he seized power.

This fundamentally undemocratic perspective can be found today in modern Leninism. As well as defending the Bolshevik dictatorship during the civil war, modern Leninists support the continuation of party dictatorship after its end. In particular, they support the Bolshevik repression of the Kronstadt rebellion (see appendix “What was the Kronstadt Rebellion?” for more details). As Trotsky put it in 1937, if the Kronstadt demand for soviet elections had been implemented then “to free the soviets from the leadership [sic!] of the Bolsheviks would have meant within a short time to demolish the soviets themselves . . . Social-Revolutionary-anarchist soviets would serve only as a bridge from the proletarian dictatorship [sic!] to capitalist restoration.” He generalised this example, by pointing to the “experience of the Russian soviets during the period of Menshevik and SR domination and, even more clearly, the experience of the German and Austrian soviets under the domination of the Social Democrats.” [Lenin and Trotsky, **Kronstadt**, p. 90] Modern day Leninists repeat this argument, failing to note that they sound like leftist Henry Kissingers (Kissinger, let us not forget, ensured US aid for Pinochet’s coup in Chile and argued that “I don’t see why we need to stand by and watch a country go communist due to the irresponsibility of its own people”).

Today we have Leninists combining rhetoric about democratic socialism, with elections and recall, with a mentality which justifies the suppression of working class revolt because they are not prepared to stand by and watch a country go capitalist due to the irresponsibility of its own people. Perhaps,

unsurprisingly, previously in 1937 Trotsky expressed his support for the “*objective necessity*” of the “*revolutionary dictatorship of a proletarian party*” and, two years later, that the “*vanguard of the proletariat*” must be “*armed with the resources of the state in order to repel dangers, including those emanating from the backward layers of the proletariat itself.*” (see section H.3.8). If only modern day Leninists were as honest!

So the Bolshevik contempt for working class self-government still exists. While few, however, explicitly proclaim the logic of this position (namely party dictatorship) most defend the Bolsheviks implementing this conclusion in practice. Can we not conclude that, faced with the same problems the Bolsheviks faced, these modern day Leninists will implement the same policies? That they will go from party power to party dictatorship, simply because they know better than those who elected them on such matters? That answer seems all too obvious.

As such, the Bolshevik preference for centralised state power and of representative forms of democracy involved the substitution of the party for the class and, consequently, will facilitate the dictatorship **over** the proletariat when faced with the inevitable problems facing any revolution. As Bakunin put it, a “*people’s administration, according to [the Marxists], must mean a people’s administration by virtue of a small number of representatives chosen by the people . . . [I]t is a deception which would conceal the despotism of a governing minority, all the more dangerous because it appears as a sham expression of the people’s will . . . [T]he vast majority, the great mass of people, would be governed by a privileged minority . . . [of] **former** workers, who would stop being workers the moment they became rulers or representatives, and would then come to regard the whole blue-collared world from governmental heights, and would not represent the people but themselves and their pretensions.*” So the Marxist state would be “*the reign of the **scientific mind**, the most aristocratic, despotic, arrogant and contemptuous of all regimes. There will be a new class, a new hierarchy of real of bogus learning, and the world will be divided into a dominant, science-based minority and a vast, ignorant majority. And then let the ignorant masses beware!*” [Michael Bakunin: Selected Writings, p. 268, pp. 268–9 and p. 266]

In summary, Trotsky’s deeply undemocratic justification for appointing officers, like Lenin’s similar arguments for appointing managers, express the logic and reality of Bolshevism far better than statements made before the Bolsheviks seized power and never implemented. Sadly, modern Leninists concentrate on the promises of the election manifesto rather than the grim reality of Bolshevik power and its long standing top-down vision of “democracy.” A vision which helped undermine the revolution and ensure its degeneration into a party dictatorship presiding over a state capitalist economy.

5 What was the effect of the Bolshevik vision of “socialism”?

As we discussed in section H.3.1, anarchists and most Marxists are divided not only by **means** but also by **ends**. Simply put, libertarians and Leninist do **not** have the same vision of socialism. Given this, anarchists are not surprised at the

negative results of the Bolshevik revolution — the use of anti-socialist means to attain anti-socialist ends would obviously have less than desirable results.

The content of the Bolshevik vision of “socialism” is criticised by anarchists on two main counts. Firstly, it is a top-down, centralised vision of “socialism.” This can only result in the destruction of working class economic power at the point of production in favour of centralised bureaucratic power. Secondly, for Bolshevism nationalisation, **not** workers’ self-management, was the key issue. We will discuss the first issue here and the second in the following section.

The Bolshevik vision of “socialism” was inherently centralised and top-down. This can be seen from the organisational schemas and arguments made by leading Bolsheviks before and immediately after the Revolution. For example, we discover Trotsky arguing in March 1918 that workplaces “*will be subject to policies laid down by the local council of workmen’s deputies*” who, in turn, had “*their range of discretion . . . limited in turn by regulations made for each class of industry by the boards or bureaux of the central government.*” He dismissed Kropotkin’s communalist ideas by saying local autonomy was not “*suited to the state of things in modern industrial society*” and “*would result in endless frictions and difficulties.*” As the “*coal from the Donets basin goes all over Russia, and is indispensable in all sorts of industries*” you could not allow “*the organised people of that district [to] do what they pleased with the coal mines*” as they “*could hold up all the rest of Russia.*” [contained in Al Richardson (ed.), **In Defence of the Russian Revolution**, p. 186]

Lenin repeated this centralised vision in June of that year, arguing that “*Communism requires and presupposes the greatest possible centralisation of large-scale production throughout the country. The all-Russian centre, therefore, should definitely be given the right of direct control over all the enterprises of the given branch of industry. The regional centres define their functions depending on local conditions of life, etc., in accordance with the general production directions and decisions of the centre.*” He continued by explicitly arguing that “[t]o deprive the all-Russia centre of the right to direct control over all the enterprises of the given industry . . . would be regional anarcho-syndicalism, and not communism.” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 292]

Thus the Bolshevik economic ideal was centralised and top-down. This is not unsurprising, as Lenin had promised precisely this when the Bolsheviks got into power. As in the Bolshevik party itself, the lower organs were controlled by the higher ones (and as we will discuss, these higher ones were not directly elected by the lower ones). The problems with this vision are many fold.

Firstly, to impose an “ideal” solution would destroy a revolution — the actions and decisions (**including what others may consider mistakes**) of a free people are infinitely more productive and useful than the decisions and decrees of the best central committee. Moreover, a centralised system by necessity is an imposed system (as it excludes by its very nature the participation of the mass of the people in determining their own fate). Thus **real** socialisation must proceed from below, reflecting the real development and desires of those involved. Centralisation can only result in replacing socialisation with nationalisation and the elimination of workers’ self-management with hierarchical management. Workers’ again would be reduced to the level of order-takers, with control over their workplaces resting not in their hands but in those of the state.

Secondly, Trotsky seems to think that workers at the base of society would be so unchanged by a revolution that they would hold their fellow workers ransom. And, moreover, that other workers would let them. That, to say the least, seems a strange perspective. But not as strange as thinking that giving extensive powers to a central body will **not** produce equally selfish behaviour (but on a wider and more dangerous scale). The basic fallacy of Trotsky's argument is that the centre will not start to view the whole economy as its property (and being centralised, such a body would be difficult to effectively control). Indeed, Stalin's power was derived from the state bureaucracy which ran the economy in its own interests. Not that did not suddenly arise with Stalin. It was a feature of the Soviet system from the start. Samuel Farber, for example, notes that, "*in practice, [the] hypercentralisation [pursued by the Bolsheviks from early 1918 onwards] turned into infighting and scrambles for control among competing bureaucracies*" and he points to the "*not untypical example of a small condensed milk plant with few than 15 workers that became the object of a drawn-out competition among six organisations including the Supreme Council of National Economy, the Council of People's Commissars of the Northern Region, the Vologda Council of People's Commissars, and the Petrograd Food Commissariat.*" [**Before Stalinism**, p. 73]

In other words, centralised bodies are not immune to viewing resources as their own property and doing as they please with it. Compared to an individual workplace, the state's power to enforce its viewpoint against the rest of society is considerably stronger and the centralised system would be harder to control. The requirements of gathering and processing the information required for the centre to make intelligent decisions would be immense, thus provoking a large bureaucracy which would be hard to control and soon become the **real** power in the state. A centralised body, therefore, effectively excludes the mass participation of the mass of workers — power rests in the hands of a few people which, by its nature, generates bureaucratic rule. If that sounds familiar, it should. It is precisely what **did** happen in Lenin's Russia and laid the basis for Stalinism.

Thirdly, to eliminate the dangers of workers' self-management generating "propertarian" notions, the workers' have to have their control over their workplace reduced, if not eliminated. This, by necessity, generates bourgeois social relationships and, equally, appointment of managers from above (which the Bolsheviks did embrace). Indeed, by 1920 Lenin was boasting that in 1918 he had "*pointed out the necessity of recognising the dictatorial authority of single individuals for the pursue of carrying out the Soviet idea*" and even claimed that at that stage "*there were no disputes in connection with the question*" of one-man management. [quoted by Brinton, **Op. Cit.**, p. 65] While the first claim is true (Lenin argued for one-man management appointed from above before the start of the Civil War in May 1918) the latter one is not true (excluding anarchists, anarcho-syndicalists and Maximalists, there were also the dissent "*Left Communists*" in the Bolshevik party itself).

Fourthly, centralism was not that efficient. The central bodies the Bolsheviks created had little knowledge of the local situation and often gave orders that contradicted each other or had little bearing to reality, so encouraging factories to ignore the centre: "*it seems apparent that many workers themselves . . . had now come to believe . . . that confusion and anarchy [sic!] at the top were the major causes of their difficulties, and with some justification. The fact was that Bolshevik administration was chaotic . . . Scores of competitive and conflicting*

Bolshevik and Soviet authorities issued contradictory orders, often brought to factories by armed Chekists. The Supreme Economic Council... issu[ed] dozens of orders and pass[ed] countless directives with virtually no real knowledge of affairs.” [William G. Rosenberg, **Russian Labour and Bolshevik Power**, p. 116] The Bolsheviks, as Lenin had promised, built from the top-down their system of “*unified administration*” based on the Tsarist system of central bodies which governed and regulated certain industries during the war. [Brinton, **Op. Cit.**, p. 36] This was very centralised and very inefficient (see section 7 for more discussion).

Moreover, having little real understanding of the circumstances on the ground they could not compare their ideological assumptions and preferences to reality. As an example, the Bolshevik idea that “big” was automatically “more efficient” and “better” had a negative impact on the revolution. In practice, as Thomas F. Remington notes, this simply resulted generated waste:

“The waste of scarce materials at [the giant] Putilov [plant] was indeed serious, but not only political unrest had caused it. The general shortage of fuel and materials in the city took its greatest toll on the largest enterprises, whose overhead expenditures for heating the plant and firing the furnaces were proportionally greater than those for smaller enterprises. This point — explained by the relative constant proportions among needed inputs to producers at any given point in time — only was recognised latter. Not until 1919 were the regime’s leaders prepared to acknowledge that small enterprises, under the conditions of the time, might be more efficient in using resources: and not until 1921 did a few Bolsheviks theorists grasp the economic reasons for this apparent violation of their standing assumption that larger units were inherently more productive. Thus not only were the workers accused of politically motivated resistance, but the regime blamed them for the effects of circumstances which the workers had no control.” [**Building Socialism in Bolshevik Russia**, p. 106]

All in all, the Bolshevik vision of socialism was a disaster. Centralism was a source of massive economic mismanagement and, moreover, bureaucratisation from the start. As anarchists had long predicted. As we discuss in section 12 of the appendix “What happened during the Russian Revolution?”, there was an alternative in the form of the factory committees and the federation. Sadly this was not part of the Bolshevik vision. At best they were tacked onto this vision as a (very) junior partner (as in 1917) or they were quickly marginalised and then dumped when they had outlived their usefulness in securing Bolshevik power (as in 1918).

While some Leninists like to paint the economic policies of the Bolsheviks in power as being different from what they called for in 1917, the truth is radically different. For example, Tony Cliff of the UK’s “Socialist Workers Party” asserts, correctly, that in April 1918 the “*defence of state capitalism constituted the essence of his economic policy for this period.*” However, he also states that this was “*an entirely new formulation,*” which was not the case in the slightest. [Cliff, **Op. Cit.**, p. 69] As Lenin himself acknowledged.

Lenin had always confused state capitalism with socialism. “*State capitalism,*” he wrote, “*is a complete material preparation for socialism, the threshold*

of socialism, a rung on the ladder of history between which and the rung called socialism **there are no gaps.**” He argued that socialism “*is nothing but the next step forward from state capitalist monopoly. In other words, Socialism is merely state capitalist monopoly made to benefit the whole people; by this token it ceases to be capitalist monopoly.*” [The Threatening Catastrophe and how to avoid it, p. 38 and p. 37] This was in May, 1917. A few months later, he was talking about how the institutions of state capitalism could be taken over and used to create socialism (see section H.3.12). Unsurprisingly, when defending Cliff’s “*new formulation*” against the “*Left Communists*” in the spring of 1918 he noted that he gave his “*‘high’ appreciation of state capitalism*” “*before the Bolsheviks seized power.*” [Selected Works, vol. 2, p. 636]

And, indeed, his praise for state capitalism and its forms of social organisation can be found in his **State and Revolution**:

“the post-office [is] an example of the socialist system . . . At present . . . [it] is organised on the lines of a state capitalist monopoly. Imperialism is gradually transforming all trusts into organisations of a similar type . . . the mechanism of social management is here already to hand. Overthrow the capitalists . . . Our immediate object is to organise the whole of national economy on the lines of the postal system . . . It is such a state, standing on such an economic basis, that we need.” [Essential Works of Lenin, pp. 307–8]

Given this, Lenin’s rejection of the factory committee’s model of socialism comes as no surprise (see section 10 of the appendix “What happened during the Russian Revolution?” for more details). As we noted in section H.3.14, rather than promote workers’ control, Lenin effectively undermined it. Murray Bookchin points out the obvious:

“In accepting the concept of worker’s control, Lenin’s famous decree of November 14, 1917, merely acknowledged an accomplished fact; the Bolsheviks dared not oppose the workers at this early date. But they began to whittle down the power of the factory committees. In January 1918, a scant two months after ‘decreeing’ workers’ control, Lenin began to advocate that the administration of the factories be placed under trade union control. The story that the Bolsheviks ‘patiently’ experimented with workers’ control, only to find it ‘inefficient’ and ‘chaotic,’ is a myth. Their ‘patience’ did not last more than a few weeks. Not only did Lenin oppose direct workers’ control within a matter of weeks . . . even union control came to an end shortly after it had been established. By the summer of 1918, almost all of Russian industry had been placed under bourgeois forms of management.” [Post-Scarcity Anarchism, pp. 200–1]

Significantly, even his initial vision of workers’ control was hierarchical, centralised and top-down. In the workplace it was to be exercised by factory committees. The “*higher workers’ control bodies*” were to be “*composed of representatives of trade unions, factory and office workers’ committees, and workers’ co-operatives.*” The decisions of the lower bodies “*may be revoked only by higher workers’ control bodies.*” [quoted by Cliff, **Op. Cit.**, p. 10] As Maurice Brinton notes:

“there [was] . . . a firm hierarchy of control organs . . . each Committee was to be responsible to a ‘Regional Council of Workers’ Control’, subordinated in turn to an ‘All-Russian Council of Workers’ Control’. The composition of these higher organs was decided by the Party.

“The trade unions were massively represented in the middle and higher strata of this new pyramid of ‘institutionalised workers’ control.’ For instance the All-Russian Council of Workers’ Control was to consist of 21 ‘representatives’: 5 from the All-Russian Central Executive Committee of the Soviets, 5 from the Executive of the All-Russian Council of Trade Unions, 5 from the Association of Engineers and Technicians, 2 from the Association of Agronomists, 2 from the Petrograd Trade Union Council, 1 from each All-Russian Trade Union Federation numbering fewer than 100,000 members (2 for Federations of over this number). . . and 5 from the All-Russian Council of Factory Committees! The Factory Committees often under anarcho-syndicalist influence had been well and truly ‘cut down to size.’” [Op. Cit., p. 18]

As we note in section 10 of the appendix “What happened during the Russian Revolution?”, this was a conscious preference on Lenin’s part. The factory committees had started to federate, creating their own institutional framework of socialism based on the workers own class organisation. Lenin, as he had explained in 1917, favoured using the institutions created by “*state capitalism*” and simply tacked on a form of “*workers’ control*” distinctly at odds with the popular usage of the expression. He **rejected** the suggestions of factory committees themselves. The Supreme Economic Council, established by the Soviet government, soon demonstrated how to really mismanage the economy.

As such, the economic developments proposed by Lenin in early 1918 and onwards were **not** the result of the specific problems facing the Russian revolution. The fact is while the dire problems facing the Russian revolution undoubtedly made many aspects of the Bolshevik system worse, they did not create them. Rather, the centralised, bureaucratic and top-down abuses Leninists like to distance themselves from where, in fact, built into Lenin’s socialism from the start. A form of socialism Lenin and his government explicitly favoured and created in opposition to other, authentically proletarian, versions.

The path to state capitalism was the one Lenin wanted to trend. It was not forced upon him or the Bolsheviks. And, by re-introducing wage slavery (this time, to the state) the Bolshevik vision of socialism helped undermine the revolution, workers’ power and, sadly, build the foundations of Stalinism.

6 How did Bolshevik preference for nationalisation affect the revolution?

As noted in the last section, unlike anarchism, for Bolshevism nationalisation, **not** workers’ self-management, was the key issue in socialism. As noted in section 3, Lenin had proclaimed the necessity for appointed one-man managers and implementing “*state capitalism*” in April 1918. Neither policy was thought to harm the socialist character of the regime. As Trotsky stressed in 1920,

the decision to place a manager at the head of a factory instead of a workers' collective had no political significance:

“It would be a most crying error to confuse the question as to the supremacy of the proletariat with the question of boards of workers at the head of factories. The dictatorship of the proletariat is expressed in the abolition of private property in the means of production, in the supremacy of the collective will of the workers and not at all in the form in which individual economic organisations are administered.”
[**Terrorism and Communism**, p. 162]

Nor was this considered a bad thing or forced upon the Bolsheviks as a result of terrible circumstances. Quite the reverse: *“I consider if the civil war had not plundered our economic organs of all that was strongest, most independent, most endowed with initiative, we should undoubtedly have entered the path of one-man management in the sphere of economic administration much sooner and much less painfully.”* [Op. Cit., pp. 162–3] As discussed in the previous section, this evaluation fits perfectly into Bolshevik ideology and practice before and after they seized power. One can easily find dozens of quotations from Lenin expressing the same idea.

Needless to say, Trotsky's *“collective will of the workers”* was simply a euphemism for the Party, whose dictatorship **over** the workers Trotsky glibly justified:

“We have more than once been accused of having substituted for the dictatorship of the Soviets the dictatorship of the party. Yet it can be said with complete justice that the dictatorship of the Soviets became possible only by means of the dictatorship of the party. It is thanks to the ... party ... [that] the Soviets ... [became] transformed from shapeless parliaments of labour into the apparatus of the supremacy of labour. In this ‘substitution’ of the power of the party for the power of the working class there is nothing accidental, and in reality there is no substitution at all. The Communists express the fundamental interests of the working class.” [Op. Cit., p. 109]

While Trotsky's honesty on this matter is refreshing (unlike his followers today who hypocritically talk about the “leadership” of the Bolshevik party) we can say that this was a **fatal** position to take. Indeed, for Trotsky **any** system (including the militarisation of labour) was acceptable as the key *“differences ... is defined by a fundamental test: who is in power?”* — the capitalist class or the proletariat (i.e. the party) [Op. Cit., pp. 171–2] Thus working class control over their own affairs was of little importance: *“The worker does not merely bargain with the Soviet State; no, he is subordinated to the Soviet State, under its orders in every direction — for it is **his** State.”* [Op. Cit., p. 168] This, of course, echoed his own arguments in favour of appointment (see section 4) **and** Lenin's demands for the *“exercise of dictatorial powers by individuals”* in the workplace (see section 3) in early 1918. Cornelius Castoriadis points out the obvious:

“The role of the proletariat in the new State was thus quite clear. It was that of enthusiastic and passive citizens. And the role of the

proletariat in work and in production was no less clear. On the whole, it was the same as before — under capitalism — except that workers of ‘character and capacity’ [to quote Trotsky] were to be chosen to replace factory managers who had fled.” [The Role of the Bureaucracy in the birth of the Bureaucracy, p. 99]

Trotsky’s position, it should be noted, remained consistent. In the early 1930s he argued (in respect to Stalin’s regime) that *“anatomy of society is determined by its economic relations. So long as the forms of property that have been created by the October Revolution are not overthrown, the proletariat remains the ruling class.”* [The Class Nature of The Soviet State] Obviously, if the prime issue is property and not who **manages** the means of production (or even *“the state”*) then having functioning factory-committees becomes as irrelevant as having democratic soviets when determining whether the working class is in power or not.

(As an aside, we should not be surprised that Trotsky could think the workers were the *“ruling class”* in the vast prison-camp which was Stalin’s USSR, given that he thought the workers were the *“ruling class”* when he and Lenin headed the Bolshevik party dictatorship! Thus we have the strange division Leninists make between Lenin’s dictatorship and Stalin’s (and those of Stalin’s followers). When Lenin presides over a one-party dictatorship, breaks up strikes, bans political parties, bans Bolshevik factions, and imprisons and shoots political dissidents these are all regrettable but necessary steps in the protection of the *“proletarian state.”* When Stalin does the exact same thing, a few years later, they are all terrible examples of the deformation of this same *“proletarian state”*!)

For anarchists (and other libertarian socialists) this was and is nonsense. Without workers’ self-management in production, socialism cannot exist. To focus attention of whether individuals own property or whether the state does is fundamentally a red-herring. Without workers’ self-management of production, private capitalism will simply have been replaced by **state** capitalism. As one anarchist active in the factory committee movement argued in January, 1918, it is *“not the liberation of the proletariat when many individual plunders are changed for one very powerful plunder — the state. The position of the proletariat remains the same.”* Therefore, *“[w]e must not forget that the factory committees are the nuclei of the future socialist order”* nor must we forget *“that the state . . . will try to maintain its own interests at the expense of the interests of the workers. There is no doubt that we will be witnesses of a great conflict between the state power in the centre and the organisations composed exclusively of workers which are found in the localities.”* He was proved right. Instead of centralised the Bolshevik vision of state capitalism, the anarchists argued that factory committees *“be united on the basis of federalism, into industrial federations . . . [and] poly-industrial soviets of national economy.”* Only in that way could **real** socialism be created. [quoted by Frederick I. Kaplan, **Bolshevik Ideology and the Ethics of Soviet Labour**, p. 163 and p. 166] (see section 7 of the appendix *“What happened during the Russian Revolution?”* for more on the factory committee movement).

The reason is obvious. It is worth quoting Cornelius Castoriadis at length on why the Bolshevik system was doomed to failure:

“So we end up with the uncontested power of managers in the fac-

tories, and the Party's exclusive 'control' (in reality, what kind of control was it, anyway?). And there was the uncontested power of the Party over society, without any control. From that point on, nobody could prevent these two powers from merging, could anyone stop the two strata embodying them from merging, nor could the consolidation of an irremovable bureaucracy ruling over all sectors of social life be halted. The process may have been accelerated or magnified by the entry of non-proletarian elements into the Party, as they rushed to jump on the bandwagon. But this was a consequence, and not a cause, of the Party's orientation . . .

"Who is to manage production . . . ? . . . the correct answer [is] the collective organs of labouring people. What the party leadership wanted, what it had already imposed — and on this point there was no difference between Lenin and Trotsky — was a hierarchy directed from above. We know that this was the conception that triumphed. We know, too, where this 'victory' led . . .

"In all Lenin's speeches and writings of this period, what recurs again and again like an obsession is the idea that Russia ought to learn from the advanced capitalist countries; that there are not a hundred and one different ways of developing production and labour productivity if one wants to emerge from backwardness and chaos; that one must adopt capitalist methods of 'rationalisation' and management as well as capitalist forms of work 'incentives.' All these, for Lenin, are just 'means' that apparently could freely be placed in the service of a radically different historical end, the building of socialism.

"Thus Trotsky, when discussing the merits of militarism, came to separate the army itself, its structure and its methods, from the social system it serves. What is criticisable in bourgeois militarism and in the bourgeois army, Trotsky says in substance, is that they are in the service of the bourgeoisie. Except for that, there is nothing in them to be criticised. The sole difference, he says, lies in this: '**Who is in power?**' Likewise, the dictatorship of the proletariat is not expressed by the 'form in which individual economic enterprises are administered.'

"The idea that like means cannot be placed indifferently into the service of different ends; that there is an intrinsic relationship between the instruments used and the result obtained; that, especially, neither the army nor the factory are simple 'means' or 'instruments,' but social structures in which are organised two fundamental aspects of human relations (production and violence); that in them can be seen in condensed form the essential expression of the type of social relations that characterise an era — this idea, though perfectly obvious and banal for Marxists, was totally 'forgotten.' It was just a matter of developing production, using proven methods and structures. That among these 'proofs' the principal one was the development of capitalism as a social system and that a factory produces not so much cloth or steel but proletariat and capital were facts that were utterly ignored.

*“Obviously, behind this ‘forgetfulness’ is hidden something else. At the time, of course, there was the desperate concern to revive production as soon as possible and to put a collapsing economy back on its feet. This preoccupation, however, does not fatally dictate the choice of ‘means.’ If it seemed obvious to Bolshevik leaders that the sole effective means were capitalist ones, it was because they were imbued with the conviction that capitalism was the only effective and rational system of production. Faithful in this respect to Marx, they wanted to abolish private property and market anarchy, but not the type of organisation capitalism had achieved at the point of production. They wanted to modify the **economy**, not the relations between people at work or the nature of labour itself.*

“At a deeper level still, their philosophy was to develop the forces of production. Here too they were the faithful inheritors of Marx — or at least one side of Marx, which became the predominant one in his mature writings. The development of the forces of production was, if not the ultimate goal, at any rate the essential means, in the sense that everything else would follow as a by-product and that everything else had to be subordinated to it. . .

*“To manage the work of others — this is the beginning and the end of the whole cycle of exploitation. The ‘need’ for a specific social category to manage the work of others in production (and the activity of others in politics and in society), the ‘need’ for a separate business management and for a Party to rule the State — this is what Bolshevism proclaimed as soon as it seized power, and this is what it zealously laboured to impose. We know that it achieved its ends. Insofar as ideas play a role in the development of history — and, **in the final analysis**, they play an enormous role — the Bolshevik ideology (and with it, the Marxist ideology lying behind it) was a decisive factor in the birth of the Russian bureaucracy.” [Op. Cit., pp. 100–4]*

Therefore, we “*may therefore conclude that, contrary to the prevailing mythology, it was not in 1927, or in 1923, or even in 1921 that the game was played and lost, but much earlier, during the period from 1918 to 1920. . . [1921 saw] the beginning of the reconstruction of the productive apparatus. This reconstruction effort, however, was already firmly set in the groove of bureaucratic capitalism.*” [Op. Cit., p. 99] In this, they simply followed the economic ideas Lenin had expounded in 1917 and 1918, but in an even more undemocratic way. Modern-day Leninism basically takes the revolutionised Russia of the Bolsheviks and, essentially, imposes upon it a more democratic form of government rather than Lenin’s (and then Stalin’s). Anarchists, however, still oppose the economy.

Ironically, proof that libertarians are right on this issue can be found in Trotsky’s own work. In 1936, he argued that the “*demobilisation of the Red Army of five million played no small role in the formation of the bureaucracy. The victorious commanders assumed leading posts in the local Soviets, in economy, in education, and they persistently introduced everywhere that regime which had ensured success in the civil war. Thus on all sides the masses were pushed away gradually from actual participation in the leadership of the country.*” [The

Revolution Betrayed] Needless to say, he failed to note who had abolished the election of commanders in the Red Army in March 1918, namely himself (see section 4). Similarly, he failed to note that the “masses” had been “*pushed . . . from actual participation in the leadership of the country*” well before the end of the civil war and that, at the time, he was not concerned about it. Equally, it would be churlish to note that back in 1920 he thought that “*‘Military’ qualities . . . are valued in every sphere. It was in this sense that I said that every class prefers to have in its service those of its members who, other things being equal, have passed through the military school . . . This experience is a great and valuable experience. And when a former regimental commissary returns to his trade union, he becomes not a bad organiser.*” [**Terrorism and Communism**, p. 173]

In 1937 Trotsky asserted that “*liberal-anarchist thought closes its eyes to the fact that the Bolshevik revolution, with all its repressions, meant an upheaval of social relations in the interests of the masses, whereas Stalin’s Thermidorian upheaval accompanies the reconstruction of Soviet society in the interest of a privileged minority.*” [Trotsky, **Stalinism and Bolshevism**] Yet Stalin’s “*upheaval*” was built upon the social relations created when Lenin and Trotsky held power. State ownership, one-man management, and so on where originally advocated and implemented by Lenin and Trotsky. The bureaucracy did not have to expropriate the working class economically — “real” Bolshevism had already did so. Nor can it be said that the social relations associated with the political sphere had fundamentally changed under Stalin. He had, after all, inherited the one-party state from Lenin and Trotsky. In a nutshell, Trotsky is talking nonsense.

Simply put, as Trotsky himself indicates, Bolshevik preference for nationalisation helped ensure the creation and subsequent rise of the Stalinist bureaucracy. Rather than be the product of terrible objective circumstances as his followers suggest, the Bolshevik state capitalist economic system was at the heart of their vision of what socialism was. The civil war simply brought the underlying logic of vision into the fore.

7 How did Bolshevik preference for centralism affect the revolution?

The next issue we will discuss is centralisation. Before starting, it is essential that it be stressed that anarchists are **not** against co-ordinated activity and organisation on a large scale. Anarchists stress the need for federalism to meet the need for such work (see section A.2.9, for example). As such, our critique of Bolshevik centralism is **not** a call for “localism” or isolation (as many Leninists assert). Rather, it is a critique of **how** the social co-operation essential for society will be conducted. Will it be in a federal (and so bottom-up) way or will it be in a centralised (and so top-down) way?

It goes almost without saying that Bolshevik ideology was centralist in nature. Lenin repeatedly stressed the importance of centralisation, arguing constantly that Marxism was, by its very nature, centralist (and top-down — section H.3.3). Long before the revolution, Lenin had argued that within the party it was a case of “*the transformation of the power of ideas into the power of author-*

ity, the subordination of lower Party bodies to higher ones.” [Collected Works, vol. 7, p. 367] Such visions of centralised organisation were the model for the revolutionary state. In 1917, he repeatedly stressed that after it the Bolsheviks would be totally in favour of “centralism” and “strong state power.” [Lenin, Selected Works, vol. 2, p. 374] Once in power, they did not disappoint.

Anarchists argue that this prejudice in favour of centralisation and centralism is at odds with Leninist claims to be in favour of mass participation. It is all fine and well for Trotskyist Tony Cliff to quote Lenin arguing that under capitalism the “talent among the people” is “merely suppressed” and that it “must be given an opportunity to display itself” and that this can “save the cause of socialism,” it is something else for Lenin (and the Leninist tradition) to favour organisational structures that allow that to happen. Similarly, it is fine to record Lenin asserting that “living, creative socialism is the product of the masses themselves” but it is something else to justify the barriers Leninist ideology placed in the way of it by its advocacy of centralism. [quoted by Tony Cliff, Lenin, vol. 3, p. 20 and p. 21]

The central contradiction of Leninism is that while it (sometimes) talks about mass participation, it has always preferred an organisational form (centralism) which hinders, and ultimately destroys, the participation that real socialism needs.

That centralism works in this way should come as no surprise. After all, it is based on centralising power at the top of an organisation and, consequently, into a few hands. It was for this precise reason that every ruling class in history has utilised centralisation against the masses. As we indicated in section B.2.5, centralisation has always been the tool of minority classes to disempower the masses. In the American and French revolutions, centralisation of state power was the means used to destroy the revolution, to take it out of the hands of the masses and concentrate it into the hands of a minority. In France:

“From the moment the bourgeoisie set themselves against the popular stream they were in need of a weapon that could enable them to resist pressure from the bras nus [working people]; they forced one by strengthening the central power . . . [This was] the formation of the state machinery through which the bourgeoisie was going to enslave the proletariat. Here is the centralised state, with its bureaucracy and police . . . [it was] a conscious attempt to reduce . . . the power of the people.” [Daniel Guerin, **Class Struggle in the First French Republic**, p. 176]

The reason is not hard to understand — mass participation and class society do not go together. Thus, “the move towards bourgeois dictatorship” saw “the strengthening of the central power against the masses.” [Guerin, **Op. Cit.**, pp. 177–8] “To attack the central power,” argued Kropotkin, “to strip it of its prerogatives, to decentralise, to dissolve authority, would have been to abandon to the people the control of its affairs, to run the risk of a truly popular revolution. That is why the bourgeoisie sought to reinforce the central government even more.” [Words of a Rebel, p. 143]

Can we expect a similar concentration of the central power under the Bolsheviks to have a different impact? And, as discussed in appendix “What happened during the Russian Revolution?” we find a similar marginalisation of the working class from its own revolution. Rather than being actively participating in

the transformation of society, they were transformed into spectators who simply were expected to implement the decisions made by the Bolsheviks on their behalf. Bolshevik centralisation quickly ensured the disempowerment of working class people. Unsurprisingly enough, given its role in class society and in bourgeois revolutions.

In this section of the FAQ, we will indicate why this process happened, why Bolshevik centralisation undermined the socialist content of the revolution in favour of new forms of oppression and exploitation.

Therefore, anarchists argue, centralism cannot help but generate minority rule, not a classless society. Representative, and so centralised, democracy, argued Malatesta, “*substitutes the will of a few for that of all . . . and in the name of a fictitious collective interest, rides roughshod over every real interests, and by means of elections and the vote, disregards the wishes of each and everyone.*” [Life and Ideas, p. 147]

This is rooted in the nature of the system, for democracy does not mean, in practice, “*rule by all the people.*” Rather, as Malatesta pointed out, it “*would be closer to the truth to say ‘government of the majority of the people.’*” And even this is false, as “*it is never the case that the representatives of the majority of the people are in the same mind on all questions; it is therefore necessary to have recourse again to the majority system and thus we will get closer still to the truth with ‘government of the majority of the elected by the majority of the electors.’*” This, obviously, “*is already beginning to bear a strong resemblance to minority government.*” And so, “*it is easy to understand what has already been proven by universal historical experience: even in the most democratic of democracies it is always a small minority that rules and imposes its will and interests by force.*” And so centralism turns democracy into little more than picking masters. Therefore, anarchists argue, “*those who really want ‘government of the people’ . . . must abolish government.*” [The Anarchist Revolution, p. 78]

The Russian Revolution is a striking confirmation of this libertarian analysis. By applying centralism, the Bolsheviks disempowered the masses and concentrated power into the hands of the party leadership. This places power in a distinct social class and subject to the pervasive effects of their concrete social circumstances within their institutional position. As Bakunin predicted with amazing accuracy:

“The falsehood of the representative system rests upon the fiction that the executive power and the legislative chamber issuing from popular elections must, or even can for that matter, represent the will of the people . . . the instinctive aims of those who govern . . . are, because of their exceptional position diametrically opposed to the instinctive popular aspirations. Whatever their democratic sentiments and intentions may be, viewing society from the high position in which they find themselves, they cannot consider this society in any other way but that in which a schoolmaster views the pupils. And there can be no equality between the schoolmaster and the pupils. . . Whoever says political power says domination. And where domination exists, a more or less considerable section of the population is bound to be dominated by others. . . those who do the dominating necessarily must repress and consequently oppress those who are subject to the domination . . . [This] explains why and how men who were democrats and

rebels of the reddest variety when they were a part of the mass of governed people, became exceedingly moderate when they rose to power. Usually these backslidings are attributed to treason. That, however, is an erroneous idea; they have for their main cause the change of position and perspective . . . if there should be established tomorrow a government . . . made up exclusively of workers, those . . . staunch democrats and Socialists, will become determined aristocrats, bold or timid worshippers of the principle of authority, and will also become oppressors and exploiters.” [The Political Philosophy of Bakunin, p. 218]

However, due to the inefficiencies of centralised bodies, this is not the end of the process. Around the new ruling bodies inevitably springs up officialdom. This is because a centralised body does not know what is happening in the grass-roots. Therefore it needs a bureaucracy to gather and process that information and to implement its decisions. In the words of Bakunin:

“where is the head, however brilliant it may be, or if one wishes to speak of a collective dictatorship, were it formed of many hundreds of individuals endowed with superior faculties, where are those brains powerful enough and wide-ranging enough to embrace the infinite multiplicity and diversity of the real interests, aspirations, wishes and needs whose sum total constitutes the collective will of a people, and to invent a social organisation can which can satisfy everybody? This organisation will never be anything but a Procrustean bed which the more or less obvious violence of the State will be able to force unhappy society to lie down on. . . Such a system . . . would lead inevitably to the creation of a new State, and consequently to the formation of a governmental aristocracy, that is, an entire class of people, having nothing in common with the mass of people . . . [and would] exploit the people and subject them.” [Michael Bakunin: Selected Writings, pp. 204–6]

As the bureaucracy is permanent and controls information and resources, it soon becomes the main source of power in the state. The transformation of the bureaucracy from servant to the master soon results. The “official” government is soon controlled by it, shaping its activities in line with its interests. Being highly centralised, popular control is even more limited than government control — people would simply not know where real power lay, which officials to replace or even what was going on within the distant bureaucracy. Moreover, if the people did manage to replace the correct people, the newcomers would be subject to the same institutional pressures that corrupted the previous members and so the process would start again (assuming they did not come under the immediate influence of those who remained in the bureaucracy). Consequently, a new bureaucratic class develops around the centralised bodies created by the governing party. This body would soon become riddled with personal influences and favours, so ensuring that members could be sheltered from popular control. As Malatesta argued, they “*would use every means available to those in power to have their friends elected as the successors who would then in turn support and protect them. And thus government would be passed to and fro in the same hands, and **democracy**, which is the alleged government of all, would end up,*

as usual, in an **oligarchy**, which is the government of a few, the government of a class.” [Anarchy, p. 34]

This state bureaucracy, of course, need not be dictatorial nor the regime it rules/administers be totalitarian (for example, bourgeois states combine bureaucracy with many real and important liberties). However, such a regime is still a class one and socialism would still not exist — as proven by the state bureaucracies and nationalised property within bourgeois society.

So the danger to liberty of combining political **and** economic power into one set of hands (the state’s) is obvious. As Kropotkin argued:

*“the state was, and continues to be, the chief instrument for permitting the few to monopolise the land, and the capitalists to appropriate for themselves a quite disproportionate share of the yearly accumulated surplus of production. Consequently, while combating the present monopolisation of land, and capitalism altogether, the anarchists combat with the same energy the state, as the main support of that system. Not this or that special form, but the state altogether . . . The state organisation, having always been, both in ancient and modern history . . . the instrument for establishing monopolies in favour of the ruling minorities, cannot be made to work for the destruction of these monopolies. The anarchists consider, therefore, that to hand over to the state all the main sources of economical life — the land, the mines, the railways, banking, insurance, and so on — as also the management of all the main branches of industry, in addition to all the functions already accumulated in its hands (education, state-supported religions, defence of the territory, etc.), would mean to create a new instrument of tyranny. State capitalism would only increase the powers of bureaucracy and capitalism. True progress lies in the direction of decentralisation, both **territorial** and **functional**, in the development of the spirit of local and personal initiative, and of free federation from the simple to the compound, **in lieu** of the present hierarchy from the centre to the periphery.”*
[Kropotkin’s Revolutionary Pamphlets, p. 286]

Thus we have the basic argument **why** centralism will result in the continuation of class society. Does the Bolshevik experience contradict this analysis? Essentially, it confirms to Kropotkin’s predictions on the uselessness of “revolutionary” government:

“Instead of acting for themselves, instead of marching forward, instead of advancing in the direction of the new order of things, the people confiding in their governors, entrusted to them the charge of taking initiative. This was the first consequence of the inevitable result of elections. . . Shut up in the city hall, charged to proceed after the forms established by the preceding governments, these ardent revolutionists, these reformers found themselves smitten with incapacity and sterility. . . but it was not the men who were the cause for this failure — it was the system. . .

“The will of the bulk of the nation once expressed, the rest would submit to it with a good grace, but this is not how things are done.

The revolution bursts out long before a general understanding has come, and those who have a clear idea of what should be done the next day are only a very small minority. The great mass of the people have as yet only a general idea of the end which they wish realised, without knowing much how to advance towards that end, and without having much confidence in the direction to follow. The practical solution will not be found, will not be made clear until the change will have already begun. It will be the product of the revolution itself, of the people in action, — or else it will be nothing, incapable of finding solutions which can only spring from the life of the people. . . The government becomes a parliament with all the vices of a middle-class parliament. Far from being a ‘revolutionary’ government it becomes the greatest obstacle to the revolution and at last the people find themselves compelled to put it out of the way, to dismiss those that but yesterday they acclaimed as their children.

“But it is not so easy to do so. The new government which has hastened to organise a new administration in order to extend its domination and make itself obeyed does not understand giving up so easily. Jealous of maintaining its power, it clings to it with all the energy of an institution which has yet had time to fall into senile decay. It decides to oppose force with force, and there is only one means then to dislodge it, namely, to take up arms, to make another revolution in order to dismiss those in whom the people had placed all their hopes.” [Op. Cit., pp. 240–2]

By the spring and summer of 1918, the Bolshevik party had consolidated its power. It had created a new state, marked as all states are by the concentration of power in a few hands and bureaucracy. Effective power became concentrated into the hands of the executive committees of the soviets from top to bottom. Faced with rejection at soviet election after soviet election, the Bolsheviks simply disbanded them and gerrymandered the rest. At the summit of the new state, a similar process was at work. The soviets had little real power, which was centralised in Lenin’s new government. This is discussed in more detail in section 6 of the appendix “What happened during the Russian Revolution?”. Thus centralisation quickly displaced popular power and participation. As predicted by Russia anarchists in November 1917:

“Once their power is consolidated and ‘legalised’, the Bolsheviks — who are Social Democrats, that is, men of centralist and authoritarian action — will begin to rearrange the life of the country and of the people by governmental and dictatorial methods, imposed by the centre. The[y] . . . will dictate the will of the party to all Russia, and command the whole nation. Your Soviets and your other local organisations will become little by little, simply executive organs of the will of the central government. In the place of healthy, constructive work by the labouring masses, in place of free unification from the bottom, we will see the installation of an authoritarian and statist apparatus which would act from above and set about wiping out everything that stood in its way with an iron hand. The Soviets and other organisations will have to obey and do its will. That will be

called 'discipline.'" [quoted by Voline, **The Unknown Revolution**, p. 235]

From top to bottom, the new party in power systematically undermined the influence and power of the soviets they claimed to be ensuring the power of. This process had begun, it should be stressed **before** the start of the civil war in May, 1918. Thus Leninist Tony Cliff is wrong to state that it was "*under the iron pressure of the civil war*" which forced the Bolshevik leaders "*to move, as the price of survival, to a **one-party system.***" [**Revolution Besieged**, p. 163] From the summer of 1918 (i.e. before the civil war even started), the Bolsheviks had turned from the first of Kropotkin's "revolutionary" governments (representative government) to the other, dictatorship, with sadly predictable results.

So far, the anarchist predictions on the nature of centralised revolutionary governments had been confirmed. Being placed in a new social position and, therefore, different social relationships, produced a dramatic revision on the perspectives of the Bolsheviks. They went from being in favour of party power to being in favour of party dictatorship. They acted to ensure their power by making accountability and recall difficult, if not impossible, and simply ignored any election results which did not favour them.

What of the second prediction of anarchism, namely that centralisation will recreate bureaucracy? That, too, was confirmed. After all, some means were required to gather, collate and provide information by which the central bodies made their decisions. Thus a necessary side-effect of Bolshevik centralism was bureaucracy, which, as is well known, ultimately fused with the party and replaced Leninism with Stalinism. The rise of a state bureaucracy started immediately with the seizure of power by the Bolsheviks. Instead of the state starting to "*wither away*" from the start it grew:

"The old state's political apparatus was 'smashed,' but in its place a new bureaucratic and centralised system emerged with extraordinary rapidity. After the transfer of government to Moscow in March 1918 it continued to expand . . . As the functions of the state expanded so did the bureaucracy, and by August 1918 nearly a third of Moscow's working population were employed in offices [147,134 employed in state institutions and 83,886 in local ones. This was 13.7% of the total adult population and 29.6% of the independent population of 846,095]. The great increase in the number of employees . . . took place in early to mid-1918 and, thereafter, despite many campaigns to reduce their number, they remained a steady proportion of the falling population . . . At first the problem was dismissed by arguments that the impressive participation of the working class in state structures was evidence that there was no 'bureaucratism' in the bureaucracy. According to the industrial census of 31 August 1918, out of 123,578 workers in Moscow, only 4,191 (3.4 percent) were involved in some sort of public organisation . . . Class composition is a dubious criterion of the level of bureaucratism. Working class participation in state structures did not ensure an organisation against bureaucratism, and this was nowhere more true than in the new organisations that regulated the economic life of the country."

[Richard Sakwa, “*The Commune State in Moscow in 1918*,” pp. 429–449, **Slavic Review**, vol. 46, no. 3/4, pp. 437–8]

The “*bureaucracy grew by leaps and bounds. Control over the new bureaucracy constantly diminished, partly because no genuine opposition existed. The alienation between ‘people’ and ‘officials,’ which the soviet system was supposed to remove, was back again. Beginning in 1918, complaints about ‘bureaucratic excesses,’ lack of contact with voters, and new proletarian bureaucrats grew louder and louder.*” [Oskar Anweiler, **The Soviets**, p. 242]

Overtime, this permanent collection of bodies would become the real power in the state, with the party members nominally in charge really under the control of an unelected and uncontrolled officialdom. This was recognised by Lenin in the last years of his life. As he noted in 1922:

“Let us look at Moscow . . . Who is leading whom? The 4,700 responsible Communists the mass of bureaucrats, or the other way round? I do not believe that you can say that the Communists are leading this mass. To put it honestly, they are not the leaders, but the led.” [quoted by Chris Harman, **Bureaucracy and Revolution in Eastern Europe**, p. 13]

By the end of 1920, there were five times more state officials than industrial workers. 5, 880,000 were members of the state bureaucracy. However, the bureaucracy had existed since the start. As noted above, the 231,000 people employed in offices in in Moscow in August 1918 represented 30 per cent of the workforce there. “*By 1920 the general number of office workers . . . still represented about a third of those employed in the city.*” In November, 1920, they were 200 000 office workers in Moscow, compared to 231 000 in August, 1918. By July, 1921 (in spite of a plan to transfer 10,000 away) their numbers had increased to 228,000 and by October 1922, to 243,000. [Richard Sakwa, **Soviet Communists in Power**, p. 192, p. 191 and p. 193]

This makes perfect sense as “*on coming to power the Bolsheviks smashed the old state but rapidly created their own apparatus to wage the political and economic offensive against the bourgeois and capitalism. As the functions of the state expanded, so did the bureaucracy . . . following the revolution the process of institutional proliferation reached unprecedented heights.*” [Op. Cit., p. 191] And with bureaucracy came the abuse of it simply because it held **real** power:

“The prevalence of bureaucracy, of committees and commissions . . . permitted, and indeed encouraged, endless permutations of corrupt practices. These raged from the style of living of communist functionaries to bribe-taking by officials. With the power of allocation of scarce resources, such as housing, there was an inordinate potential for corruption.” [Op. Cit., p. 193]

The growth in **power** of the bureaucracy should not, therefore, come as a major surprise given that had existed from the start in sizeable numbers. However, for the Bolsheviks “*the development of a bureaucracy*” was a puzzle, “*whose emergence and properties mystified them.*” However, it should be noted that, “[f]or the Bolsheviks, bureaucratism signified the escape of this bureaucracy from the will of the party as it took on a life of its own.” [Sakwa, **Op. Cit.**,

p. 182 and p. 190] This was the key. They did not object the usurpation of power by the party (indeed they placed party dictatorship at the core of their politics and universalised it to a general principle for **all** “*socialist*” revolutions). Nor did they object to the centralisation of power and activity (and so the bureaucratisation of life). They only objected to it when the bureaucracy was not doing what the party wanted it to. Indeed, this was the basic argument of Trotsky against Stalinism (see section 3 of the appendix on “Were any of the Bolshevik oppositions a real alternative?”).

Faced with this bureaucracy, the Bolsheviks tried to combat it (unsuccessfully) and explain it. As they failed to achieve the latter, they failed in the former. Given the Bolshevik fixation for all things centralised, they simply added to the problem rather than solve it. Thus we find that “[o]n the eve of the VIII Party Congress Lenin had argued that centralisation was the only way to combat bureaucratism.” [Sakwa, **Op. Cit.**, p. 196]

Unsurprisingly, Lenin’s “anti-bureaucratic” policies in the last years of his life were “organisational ones. He purposes the formation of the Workers’ and Peasants’ Inspection to correct bureaucratic deformations in the party and state — and this body falls under Stalin’s control and becomes highly bureaucratic in its own right. Lenin then suggests that the size of the Workers’ and Peasants’ Inspection be reduced and that it be merged with the Control Commission. He advocates enlarging the Central Committee. Thus it rolls along; this body to be enlarged, this one to be merged with another, still a third to be modified or abolished. The strange ballet of organisational forms continues up to his very death, as though the problem could be resolved by organisational means.” [Murray Bookchin, **Post-Scarcity Anarchism**, p. 205]

Failing to understand the links between centralism and bureaucracy, Lenin had to find another source for the bureaucracy. He found one. He “argued that the low cultural level of the working class prevented mass involvement in management and this led to bureaucratism . . . the new state could only reply on a minuscule layer of workers while the rest were backward because of the low cultural level of the country.” However, such an explanation is by no means convincing: “Such culturalist assertions, which could neither be proved or disproved but which were politically highly effective in explaining the gulf, served to blur the political and structural causes of the problem. The working class was thus held responsible for the failings of the bureaucracy. At the end of the civil war the theme of the backwardness of the proletariat was given greater elaboration in Lenin’s theory of the declassing of the proletariat.” [Sakwa, **Op. Cit.**, p. 195] Given that the bureaucracy had existed from the start, it is hard to say that a more “cultured” working class would have been in a better position to control the officials of a highly centralised state bureaucracy. Given the problems workers in “developed” nations have in controlling their (centralised) union bureaucracies, Lenin’s explanation seems simply inadequate and, ultimately, self-serving.

Nor was this centralism particularly efficient. You need only read Goldman’s or Berkman’s accounts of their time in Bolshevik Russia to see how inefficient and wasteful centralisation and its resultant bureaucracy was in practice (see **My Disillusionment in Russia** and **The Bolshevik Myth**, respectively). This can be traced, in part, to the centralised economic structures favoured by the Bolsheviks. Rejecting the alternative vision of socialism advocated and, in part created, by the factory committees (and supported wholeheartedly by the Russian Anarchists at the time), the Bolsheviks basically took over and used the

“state capitalist” organs created under Tsarism as the basis of their “socialism” (see section 5). As Lenin promised **before** seizing power:

“Forced syndicalisation — that is, forced fusion into unions [i.e. trusts] under the control of the State — this is what capitalism has prepared for us — this is what the Banker State has realised in Germany — this is what will be completely realisable in Russia by the Soviets, by the dictatorship of the proletariat.” [**Will the Bolsheviks Maintain Power?**, p. 53]

In practice, Lenin’s centralised vision soon proved to be a disaster (see section 11 of the appendix “What happened during the Russian Revolution?” for details). It was highly inefficient and simply spawned a vast bureaucracy. There was an alternative, as we discuss in section 12 of the appendix “What happened during the Russian Revolution?”, the only reason that industry did not totally collapse in Russia during the early months of the revolution was the activity of the factory committees. However, such activity was not part of the Bolshevik vision of centralised socialism and so the factory committees were **not** encouraged. At the very moment when mass participation and initiative is required (i.e. during a revolution) the Bolsheviks favoured a system which killed it. As Kropotkin argued a few years later:

“production and exchange represented an undertaking so complicated that the plans of the state socialists, which lead to a party directorship, would prove to be absolutely ineffective as soon as they were applied to life. No government would be able to organise production if the workers themselves through their unions did not do it in each branch of industry; for in all production there arise daily thousands of difficulties which no government can solve or foresee . . . Only the efforts of thousands of intelligences working on the problems can cooperate in the development of a new social system and find the best solutions for the thousands of local needs.” [**Kropotkin’s Revolutionary Pamphlets**, pp. 76–7]

No system is perfect. Any system will take time to develop fully. Of course the factory committees made mistakes and, sometimes, things were pretty chaotic with different factories competing for scarce resources. But that does not prove that factory committees and their federations were not the most efficient way of running things under the circumstances. Unless, of course, you share the Bolsheviks a dogmatic belief that central planning is always more efficient. Moreover, attacks on the factory committees for lack of co-ordination by pro-Leninists seem less than sincere, given the utter lack of encouragement (and, often, actual barriers) the Bolsheviks placed in the way of the creation of federations of factory committees (see section 9 of the appendix “What happened during the Russian Revolution?” for further details).

Lastly, Bolshevik centralism (as well as being extremely inefficient) also ensured that the control of production and the subsequent surplus would be in the hands of the state and, so, class society would continue. In Russia, capitalism became state capitalism under Lenin and Trotsky (see sections 5 and 6 for more discussion of this).

So Bolshevik support for centralised power ensured that minority power replaced popular power, which, in turn, necessitated bureaucracy to maintain it. Bolshevism retained statist and capitalist social relations and, as such, could not develop socialist ones which, by their very nature, imply egalitarianism in terms of social influence and power (i.e. the abolition of concentrated power, both economic and political). Ironically, by being centralists, the Bolsheviks systematically eliminated mass participation and ensured the replacement of popular power with party power. This saw the rebirth of non-socialist social relationships within society, so ensuring the defeat of the socialist tendencies and institutions which had started to grow during 1917.

It cannot be said that this centralism was a product of the civil war. As best it could be argued that the civil war extenuated an existing centralist spirit into ultra-centralism, but it did not create it. After all, Lenin was stressing that the Bolsheviks were “*convinced centralists . . . by their programme and the tactics of the whole of their party*” in 1917. Ironically, he never realised (nor much cared, after the seizure of power) that this position precluded his call for “*the deepening and extension of democracy in the administration of a State of the proletarian type.*” [Can the Bolsheviks Maintain Power?, p. 74 and p. 55] Given that centralism exists to ensure minority rule, we should not be to surprised that party power replaced popular participation and self-government quickly after the October Revolution. Which it did. Writing in September 1918, a Russian anarchist portrays the results of Bolshevik ideology in practice:

“Within the framework of this dictatorship [of the proletariat] . . . we can see that the centralisation of power has begun to crystallise and grow firm, that the apparatus of the state is being consolidated by the ownership of property and even by an anti-socialist morality. Instead of hundreds of thousands of property owners there is now a single owner served by a whole bureaucratic system and a new ‘statished’ morality.

“The proletariat is gradually being enserfed by the state. The people are being transformed into servants over whom there has risen a new class of administrators — a new class . . . Isn’t this merely a new class system looming on the revolutionary horizon . . .

“The resemblance is all too striking . . . And if the elements of class inequality are as yet indistinct, it is only a matter of time before privileges will pass to the administrators. We do not mean to say . . . that the Bolshevik party set out to create a new class system. But we do say that even the best intentions and aspirations must inevitably be smashed against the evils inherent in any system of centralised power. The separation of management from labour, the division between administrators and workers flows logically from, centralisation. It cannot be otherwise . . . we are presently moving not towards socialism but towards state capitalism.

“Will state capitalism lead us to the gates of socialism? Of this we see not the slightest evidence . . . Arrayed against socialism are . . . thousands of administrators. And if the workers . . . should become a powerful revolutionary force, then it is hardly necessary to point out that the class of administrators, wielding the state apparatus, will

be a far from weak opponent. The single owner and state capitalism form a new dam before the waves of our social revolution. . .

“Is it at all possible to conduct the social revolution through a centralised authority? Not even a Solomon could direct the revolutionary struggle or the economy from one centre . . .” [M. Sergven, cited by Paul Avrich, **Anarchists in the Russian Revolution**, pp. 123–5]

Subsequent developments proved this argument correct. Working class revolts were crushed by the state and a new class society developed. little wonder, then, Alexander Berkman’s summary of what he saw first hand in Bolshevik Russia a few years later:

*“Mechanical centralisation, run mad, is paralysing the industrial and economic activities of the country. Initiative is frowned upon, free effort systematically discouraged. The great masses are deprived of the opportunity to shape the policies of the Revolution, or take part in the administration of the affairs of the country. The government is monopolising every avenue of life; the Revolution is divorced from the people. A bureaucratic machine is created that is appalling in its parasitism, inefficiency and corruption. In Moscow alone this new class of **sovburs** (Soviet bureaucrats) exceeds, in 1920, the total of office holders throughout the whole of Russia under the Tsar in 1914 . . . The Bolshevik economic policies, effectively aided by this bureaucracy, completely disorganise the already crippled industrial life of the country. Lenin, Zinoviev, and other Communist leaders thunder philippics against the new Soviet bourgeoisie, — and issue ever new decrees that strengthen and augment its numbers and influence.”*
[**The Russian Tragedy**, p. 26]

Bakunin would not have been remotely surprised. As such, the Bolshevik revolution provided a good example to support Malatesta’s argument that *“if . . . one means government action when one talks of social action, then this is still the resultant of individual forces, but only of those individuals who form the government . . . it follows. . . that far from resulting in an increase in the productive, organising and protective forces in society, it would greatly reduce them, limiting initiative to a few, and giving them the right to do everything without, of course, being able to provide them with the gift of being all-knowing.”* [**Anarchy**, pp. 36–7]

By confusing “state action” with collective working class action, the Bolsheviks effectively eliminated the latter in favour of the former. The usurpation of all aspects of life by the centralised bodies created by the Bolsheviks left workers with no choice but to act as isolated individuals. Can it be surprising, then, that Bolshevik policies aided the atomisation of the working class by replacing collective organisation and action by state bureaucracy? The potential for collective action **was** there. You need only look at the strikes and protests directed **against** the Bolsheviks to see that was the case (see section 5 of the appendix on “What caused the degeneration of the Russian Revolution?” for details). Ironically, Bolshevik policies and ideology ensured that the collective effort and action of workers was directed not at solving the revolution’s problems but resisting Bolshevik tyranny.

That centralism concentrates power in a few hands can be seen even in Leninist accounts of the Russian revolution. To take one example, Tony Cliff may assert that the “*mistakes of the masses were themselves creative*” but when push comes to shove, he (like Lenin) simply does not allow the masses to make such mistakes and, consequently, learn from them. Thus he defends Lenin’s economic policies of “*state capitalism*” and “*one-man management*” (and in the process misleadingly suggests that these were **new** ideas on Lenin’s part, imposed by objective factors, rather than, as Lenin acknowledged, what he had advocated all along — see section 5). Thus we discover that the collapse of industry (which had started in the start of 1917) meant that “[d]rastic measures had to be taken.” But never fear, “*Lenin was not one to shirk responsibility, however unpleasant the task.*” He called for “*state capitalism,*” and there “*were more difficult decisions to be accepted. To save industry from complete collapse, Lenin argued for the need to impose one-man management.*” So much for the creative self-activity of the masses, which was quickly dumped — precisely at the time when it was most desperately needed. And it is nice to know that in a workers’ state it is not the workers who decide things. Rather it is Lenin (or his modern equivalent, like Cliff) who would have the task of not shirking from the responsibility of deciding which drastic measures are required. [Op. Cit., p. 21, p. 71 and p. 73] So much for “workers’ power”!

Ultimately, centralism is designed to exclude the mass participation anarchists have long argued is required by a social revolution. It helped to undermine what Kropotkin considered the key to the success of a social revolution — “*the people becom[ing] masters of their destiny.*” [Op. Cit., p. 133] In his words:

*“We understand the revolution as a widespread popular movement, during which in every town and village within the region of revolt, the masses will have to take it upon themselves **the work of construction upon communistic bases**, without awaiting any orders and directions from above . . . As to representative government, whether self-appointed or elected . . . , we place in it no hopes whatever. We know beforehand that it will be able to do nothing to accomplish the revolution as long as the people themselves do not accomplish the change by working out on the spot the necessary new institutions . . . nowhere and never in history do we find that people carried into government by a revolutionary wave, have proved equal to the occasion.*

“In the task of reconstructing society on new principles, separate men . . . are sure to fail. The collective spirit of the masses is necessary for this purpose . . . a socialist government . . . would be absolutely powerless without the activity of the people themselves, and that, necessarily, they would soon begin to act fatally as a bridle upon the revolution.” [Op. Cit., pp. 188–190]

The Bolshevik revolution and its mania for centralism proved him right. The use of centralisation helped ensure that workers’ lost any meaningful say in their revolution and helped alienate them from it. Instead of the mass participation of all, the Bolsheviks ensured the top-down rule of a few. Unsurprisingly, as mass participation is what centralism was designed to exclude. Wishful thinking on behalf of the Bolshevik leaders (and their later-day followers) could not (and can

not) overcome the structural imperatives of centralisation and its role in society. Nor could it stop the creation of a bureaucracy around these new centralised institutions.

8 How did the aim for party power undermine the revolution?

As well as a passion for centralisation and state capitalism, Bolshevism had another aim which helped undermine the revolution. This was the goal of party power (see section 5 of the appendix “What happened during the Russian Revolution?” for details). Given this, namely that the Bolsheviks had, from the start, aimed for party power it should not come as too surprising that Bolshevik dictatorship quickly replaced soviet democracy.

Given this obvious fact, it seems strange for modern day Leninists to blame the civil war for the Bolsheviks substituting their rule for the masses. After all, when strange for modern day Leninists to blame the civil war for the Bolsheviks substituting their rule for the masses. After all, when the Bolshevik Party took power in October 1917, it did “substitute” itself for the working class and did so deliberately and knowingly. As we note in section 2, this usurpation of power by a minority was perfectly acceptable within the Marxist theory of the state, a theory which aided this process no end.

Thus the Bolshevik party would be in power, with the “*conscious workers*” ruling over the rest. The question instantly arises of what happens if the masses turn against the party. If the Bolsheviks embody “*the power of the proletariat,*” what happens if the proletariat reject the party? The undermining of soviet power by party power and the destruction of soviet democracy in the spring and summer of 1918 answers that specific question (see section 6 of the appendix “What happened during the Russian Revolution?”). This should have come as no surprise, given the stated aim (and implementation) of party power plus the Bolshevik identification of party power with workers’ power. It is not a great step to party dictatorship **over** the proletariat from these premises (particularly if we include the underlying assumptions of vanguardism — see section H.5.3). A step, we must stress, that the Bolsheviks quickly took when faced with working class rejection in the soviet elections of spring and summer of 1918.

Nor was this destruction of soviet democracy by party power just the result of specific conditions in 1917–8. This perspective had been in Russian Marxist circles well before the revolution. As we discuss in section H.5, vanguardism implies party power (see, as noted, section H.5.3 in particular). The ideas of Lenin’s **What is to be Done?** give the ideological justification for party dictatorship over the masses. Once in power, the logic of vanguardism came into its own, allowing the most disgraceful repression of working class freedoms to be justified in terms of “Soviet Power” and other euphemisms for the party.

The identification of workers’ power with party power has deeply undemocratic results, as the experience of the Bolshevik proves. However, these results were actually articulated in Russian socialist circles before hand. At the divisive 1903 congress of the Russian Social Democrats, which saw the split into two factions (Bolshevik and Menshevism) Plekhanov, the father of Russian Marxism, argued as follows:

*“Every particular democratic principle must be considered not in itself, abstractly, . . . the success of the revolution is the highest law. And if, for the success of the revolution’s success, we need temporarily to restrict the functioning of a particular democratic principle, then it would be criminal to refrain from imposing that restriction. . . . And we must take the same attitude where the question of the length of parliaments is concerned. If, in an outburst of revolutionary enthusiasm, the people elect a very good parliament . . . it would suit us to try and make that a **long Parliament**; but if the elections turned out badly for us, we should have to try and disperse the resulting parliament not after two years but, if possible, after two weeks.”* [RSDLP, **Minutes of the Second Congress of the RSDLP**, p. 220]

Another delegate argued that “[t]here is not a single one among the principles of democracy which we ought not to subordinate **to the interests of our Party** . . . we must consider democratic principles exclusively from the standpoint of the most rapid achievement of that aim [i.e. revolution], from the standpoint of the interests of our Party. If any particular demand is against our interests, we must not include it.” To which, Plekhanov replied, “I fully associate myself with what Comrade Posadovksy has said.” [Op. Cit., p. 219 and p. 220] Lenin “agreed unreservedly with this subordination of democratic principles to party interests.” [Oskar Anweiler, **The Soviets**, p. 211]

Plekhanov at this time was linked with Lenin, although this association lasted less than a year. After that, he became associated with the Mensheviks (before his support for Russia in World War I saw him form his own faction). Needless to say, he was mightily annoyed when Lenin threw his words back in his face in 1918 when the Bolsheviks disbanded the Constituent Assembly. Yet while Plekhanov came to reject this position (perhaps because the elections had not “turned out badly for” his liking) it is obvious that the Bolsheviks embraced it and keenly applied it to elections to soviets and unions as well as Parliaments once in power (see section 6 of the appendix “What happened during the Russian Revolution?” for example). But, at the time, he sided with Lenin against the Mensheviks and it can be argued that the latter applied these teachings of that most respected pre-1914 Russian Marxist thinker.

This undemocratic perspective can also be seen when, in 1905, the St. Petersburg Bolsheviks, like most of the party, opposed the soviets. They argued that “*only a strong party along class lines can guide the proletarian political movement and preserve the integrity of its program, rather than a political mixture of this kind, an indeterminate and vacillating political organisation such as the workers council represents and cannot help but represent.*” [quoted by Oskar Anweiler, **The Soviets**, p. 77] Thus the soviets could not reflect workers’ interests because they were elected by the workers!

The Bolsheviks saw the soviets as a rival to their party and demanded it either accept their political program or simply become a trade-union like organisation. They feared that it pushed aside the party committee and thus led to the “*subordination of consciousness to spontaneity*” and under the label “*non-party*” allow “*the rotten goods of bourgeois ideology*” to be introduced among the workers. [quoted by Anweiler, **Op. Cit.**, p. 78 and p. 79] In this, the St. Petersburg Bolsheviks were simply following Lenin’s **What is to be Done?**, in which Lenin had argued that the “*spontaneous development*

of the labour movement leads to it being subordinated to bourgeois ideology.” [Essential Works of Lenin, p. 82] Lenin in 1905, to his credit, rejected these clear conclusions of his own theory and was more supportive of the soviets than his followers (although “he sided in principle with those who saw in the soviet the danger of amorphous nonpartisan organisation.” [Anweiler, *Op. Cit.*, p. 81]).

This perspective, however, is at the root of all Bolshevnik justifications for party power after the October revolution. The logical result of this position can be found in the actions of the Bolshevniks in 1918 and onwards. For the Bolshevniks in power, the soviets were less than important. The key for them was to maintain Bolshevnik party power and if soviet democracy was the price to pay, then they were more than willing to pay it. As such, Bolshevnik attitudes in 1905 are significant:

*“Despite the failure of the Bolshevnik assault on the non-partisanship of the [St.] Petersburg Soviet, which may be dismissed as a passing episode . . . the attempt . . . is of particular significance in understanding the Bolshevnik’s mentality, political ambitions and **modus operandi**. First, starting in [St.] Petersburg, the Bolshevnik campaign was repeated in a number of provincial soviets such as Kostroma and Tver, and, possibly, Sormovo. Second, the assault reveals that from the outset the Bolshevniks were distrustful of, if not hostile towards the Soviets, to which they had at best an instrumental and always party-minded attitude. Finally, the attempt to bring the [St.] Petersburg Soviet to heel is an early and major example of Bolshevnik take-over techniques hitherto practised within the narrow confines of the underground party and now extended to the larger arena of open mass organisations such as soviets, with the ultimate aim of controlling them and turning them into one-party organisations, or, failing that, of destroying them.”* [Israel Getzler, “The Bolshevnik Onslaught on the Non-Party ‘Political Profile’ of the Petersburg Soviet of Workers’ Deputies October-November 1905”, **Revolutionary History**, pp. 123–146, vol. 5, no. 2, pp. 124–5]

The instrumentalist approach of the Bolshevniks post-1917 can be seen from their arguments and attitudes in 1905. On the day the Moscow soviet opened, a congress of the northern committees of the Social Democratic Party passed a resolution stating that a “council of workers deputies should be established only in places where the party organisation has no other means of directing the proletariat’s revolutionary action . . . The soviet of workers deputies must be a technical instrument of the party for the purpose of giving political leadership to the masses through the RSDWP [the Social-Democratic Party]. It is therefore imperative to gain control of the soviet and prevail upon it to recognise the program and political leadership of the RSDWP.” [quoted by Anweiler, *Op. Cit.*, p. 79]

This perspective that the party should be given precedence can be seen in Lenin’s comment that while the Bolshevniks should “go along with the unpoliticalised proletarians, but on no account and at no time should we forget that animosity among the proletariat toward the Social Democrats is a remnant of bourgeois attitudes . . . Participation in unaffiliated organisations can be permitted to socialists only as an exception . . . only if the independence of the workers

party is guaranteed and if within unaffiliated organisations or soviets individual delegates or party groups are subject to unconditional control and guidance by the party executive.” [quoted by Anweiler, **Op. Cit.**, p. 81] These comments have clear links to Lenin’s argument in 1920 that working class protest against the Bolsheviks showed that they had become “*declassed*” (see section 5 of the appendix on “What caused the degeneration of the Russian Revolution?”). It similarly allows soviets to be disbanded if Bolsheviks are not elected (which they were, see section 6 of the appendix “What happened during the Russian Revolution?”). It also ensures that Bolshevik representatives to the soviets are not delegates from the workplace, but rather a “*transmission belt*” (to use a phrase from the 1920s) for the decisions of the party leadership. In a nutshell, Bolshevik soviets would represent the party’s central committee, not those who elected them. As Oskar Anweiler summarised:

*“The ‘revolutionary genius’ of the people, which Lenin had mentioned and which was present in the soviets, constantly harboured the danger of ‘anarcho-syndicalist tendencies’ that Lenin fought against all his life. He detected this danger early in the development of the soviets and hoped to subdue it by subordinating the soviets to the party. The drawback of the new ‘soviet democracy’ hailed by Lenin in 1906 is that he could envisage the soviets only as **controlled** organisations; for him they were the instruments by which the party controlled the working masses, rather than true forms of a workers democracy.”* [**Op. Cit.**, p. 85]

As we noted in section H.3.11, Lenin had concluded in 1907 that while the party could “*utilise*” the soviets “*for the purpose of developing the Social-Democratic movement,*” the party “*must bear in mind that if Social-Democratic activities among the proletarian masses are properly, effectively and widely organised, such institutions may actually become superfluous.*” [Marx, Engels and Lenin, **Anarchism and Anarcho-Syndicalism**, p. 210] Thus the means by which working class can manage their own affairs would become “*superfluous*” once the party was in power. As Samuel Farber argues, Lenin’s position before 1917 was “*clearly implying that the party could normally fulfil its revolutionary role without the existence of broad class organisations . . . Consequently, Lenin’s and the party’s eventual endorsement of the soviets in 1905 seems to have been tactical in character. That is, the Bolshevik support for the soviets did not at the time signify a theoretical and/or principled commitment to these institutions as revolutionary organs to overthrow the old society, let alone as key structural ingredients of the post-revolutionary order. Furthermore, it is again revealing that from 1905 to 1917 the concept of soviets did not play an important role in the thinking of Lenin or of the Bolshevik Party . . . [T]hese strategies and tactics vis-a-vis the soviets . . . can be fairly seen as expressing a predisposition favouring the party and downgrading the soviets and other non-party class organisations, at least in relative terms.*” [**Before Stalinism**, p. 37] Such a perspective on the soviets can be seen once the party was in power when they quickly turned them, without concern, into mere fig-leaves for party power (see section 6 of the appendix “What happened during the Russian Revolution?” for more details).

It cannot be mere coincidence that the ideas and rhetoric against the soviets in 1905 should resurface again once the Bolsheviks were in power. For example, in 1905, in St. Petersburg “*the Bolsheviks pressed on*” with their campaign

and, “according to the testimony of Vladimir Voitinskii, then a young Bolshevik agitator, the initial thrust of the Bolshevik ‘plan’ was to push the SRs [who were in a minority] out of the Soviet, while ‘the final blow’ would be directed against the Mensheviks. Voitinskii also recalled the heated argument advanced by the popular agitator Nikolai Krylenko (‘Abram’) for the ‘dispersal of the Soviet’ should it reject the ‘ultimatum’ to declare its affiliation with the RSDP.” [Getzler, **Op., Cit.**, pp. 127–8] This mirrored events in 1918. Then “at the local political level” Bolshevik majorities were attained (“by means fair, foul and terrorist”) “in the plenary assemblies of the soviets, and with the barring of all those not ‘completely dedicated to Soviet power’ [i.e. Mensheviks and SRs] from the newly established network of soviet administrative departments and from the soviet militias. Soviets where Bolshevik majorities could not be achieved were simply disbanded.” A similar process occurred at the summit (see section 7). Thus “the October revolution marked [the soviets] transformation from agents of democratisation into regional and local administrative organs of the centralised, one-party Soviet state.” [Israel Getzler, **Soviets as Agents of Democratisation**, p. 27 and pp. 26–7]

Can such an outcome really have **no** link at all with the Bolshevik position and practice in period before 1917 and, in particular, during the 1905 revolution? Obviously not. As such, we should not be too surprised or shocked when Lenin replied to a critic who assailed the “dictatorship of one party” in 1919 by clearly and unashamedly stating: “Yes, the dictatorship of one party! We stand upon it and cannot depart from this ground, since this is the party which in the course of decades has won for itself the position of vanguard of the whole factory and industrial proletariat.” [quoted by E.H. Carr, **The Bolshevik Revolution**, vol. 1, p. 236] Or when he replied to a critic in 1920 that “[h]e says we understand by the words dictatorship of proletariat what is actually the dictatorship of its determined and conscious minority. And that is the fact.” This “minority . . . may be called a party,” Lenin stressed. [quoted by Arthur Ransome, **The Crisis in Russia 1920**, p. 35]

This perspective can be traced back to the underlying ideology expounded by the Bolsheviks before and during 1917. For example, mere days after seizing power in the October Revolution Lenin was stressing that the Bolsheviks’ “present slogan is: No compromise, i.e. for a homogeneous Bolshevik government.” He did not hesitate to use the threat to “appeal to the sailors” against the other socialist parties, stating “[i]f you get the majority, take power in the Central Executive Committee and carry one. But we will go to the sailors.” [quoted by Tony Cliff, **Lenin**, vol. 3, p. 26] Clearly soviet power was far from Lenin’s mind, rejecting soviet democracy if need be in favour of party power. Strangely, Cliff (a supporter of Lenin) states that Lenin “did not visualise one-party rule” and that the “first decrees and laws issued after the October revolution were full of repetitions of the word ‘democracy.’” [**Op. Cit.**, p. 161 and p. 146] He goes on to quote Lenin stating that “[a]s a democratic government we cannot ignore the decision of the masses of the people, even though we disagree with it.” Cliff strangely fails to mention that Lenin also applied this not only to the land decree (as Cliff notes) but also to the Constituent Assembly. “And even if,” Lenin continued, “the peasants continue to follow the Socialist Revolutionaries, even if they give this party a majority in the Constituent Assembly, we shall still say — what of it?” [Lenin, **Collected Works**, vol. 26, pp. 260–1] But the Bolsheviks disbanded the Constituent Assembly after one session. The peasants

had voted for the SRs and the Assembly went the same way as Lenin's promises. And if Lenin's promises of 1917 on the Assembly proved to be of little value, then why should his various comments to soviet democracy be considered any different? In a clash between soviet democracy and party power, the Bolsheviks consistently favoured the latter.

Thus Bolshevik ideology had consistently favoured party power and had a long term ideological preference for it. Combine this aim of party power with a vanguardism position (see section H.5) and party dictatorship will soon result. Neil Harding summarises the issue well:

“There were a number of very basic axioms that lay at the very heart of the theory and practice of Leninism with regard to the party . . . It was the party that disposed of scientific or objective knowledge. Its analysis of the strivings of the proletariat was, therefore, privileged over the proletariat's own class goals and a single discernible class will was, similarly, axiomatic to both Marxism and Leninism. Both maintained that it was the communists who alone articulated these goals and this will — that was the party's principal historical role.

*“At this point, Leninism (again faithful to the Marxist original) resorted to a little-noticed definitional conjuring trick — one that proved to be of crucial importance for the mesmeric effect of the ideology. The trick was spectacularly simple and audacious — the class was defined as class only to the extent that it conformed to the **party's** account of its objectives, and mobilised itself to fulfil them. . . The messy, real proletarians — the aggregation of wage workers with all their diverse projects and aspirations — were to be judged by their progress towards a properly class existence by the party that had itself devised the criteria for the class existence.”*

[**Leninism**, pp. 173–4]

This authoritarian position, which allows “socialism” to be imposed by force upon the working class, lies at the core of Leninism. Ironically, while Bolshevism claims to be **the** party of the working class, representing it essentially or exclusively, they do so in the name of possessing a theory that, qua theory, can be the possession of intellectuals and, therefore, has to be “introduced” to the working class from outside (see section H.5.1 for details).

This means that Bolshevism is rooted in the identification of “class consciousness” with supporting the party. Given the underlying premises of vanguardism, unsurprisingly the Bolsheviks took “class consciousness” to mean this. If the workers protested against the policies of the party, this represented a fall in class consciousness and, therefore, working class resistance placed “class” power in danger. If, on the other hand, the workers remained quiet and followed the party's decision then, obviously, they showed high levels of class consciousness. The net effect of this position was, of course, to justify party dictatorship. Which, of course, the Bolsheviks did create **and** justified ideologically.

Thus the Bolshevik aim for party power results in disempowering the working class in practice. Moreover, the assumptions of vanguardism ensure that only the party leadership is able to judge what is and is not in the interests of the working class. Any disagreement by elements of that class or the whole class itself can be dismissed as “*wavering*” and “*vacillation*.” While this is

perfectly acceptable within the Leninist “*from above*” perspective, from an anarchist “*from below*” perspective it means little more than pseudo-theoretical justification for party dictatorship **over** the proletariat and the ensuring that a socialist society will **never** be created. Ultimately, socialism without freedom is meaningless — as the Bolshevik regime proved time and time again.

As such, to claim that the Bolsheviks did not aim to “substitute” party power for working class power seems inconsistent with both Bolshevik theory and practice. Lenin had been aiming for party power from the start, identifying it with working class power. As the party was the vanguard of the proletariat, it was duty bound to seize power and govern on behalf of the masses and, moreover, take any actions necessary to maintain the revolution — even if these actions violated the basic principles required to have any form of meaningful workers’ democracy and freedom. Thus the “*dictatorship of the proletariat*” had long become equated with party power and, once in power, it was only a matter of time before it became the “*dictatorship of the party.*” And once this did occur, none of the leading Bolsheviks questioned it. The implications of these Bolshevik perspectives came clear after 1917, when the Bolsheviks raised the need for party dictatorship to an ideological truism.

Thus it seems strange to hear some Leninists complain that the rise of Stalinism can be explained by the rising “independence” of the state machine from the class (i.e. party) it claimed to in service of. Needless to say, few Leninists ponder the links between the rising “*independence*” of the state machine from the proletariat (by which most, in fact, mean the “*vanguard*” of the proletariat, the party) and Bolshevik ideology. As noted in section H.3.8, a key development in Bolshevik theory on the state was the perceived need for the vanguard to ignore the wishes of the class it claimed to represent and lead. For example, Victor Serge (writing in the 1920s) considered it a truism that the “*party of the proletariat must know, at hours of decision, how to break the resistance of the backward elements among the masses; it must know how to stand firm sometimes against the masses . . . it must know how to go against the current, and cause proletarian consciousness to prevail against lack of consciousness and against alien class influences.*” [Year One of the Russian Revolution, p. 218]

The problem with this is that, by definition, **everyone** is backward in comparison to the vanguard party. Moreover, in Bolshevik ideology it is the party which determines what is and is not “*proletarian consciousness.*” Thus we have the party ideologue presenting self-justifications for party power **over** the working class. Now, if the vanguard is to be able to ignore the masses then it must have power **over** them. Moreover, to be independent of the masses the machine it relies on to implement its power must also, by definition, be independent of the masses. Can we be surprised, therefore, with the rise of the “independent” state bureaucracy in such circumstances? If the state machine is to be independent of the masses then why should we expect it not to become independent of the vanguard? Surely it must be the case that we would be far more surprised if the state machine did **not** become “independent” of the ruling party?

Nor can it be said that the Bolsheviks learned from the experience of the Russian Revolution. This can be seen from Trotsky’s 1937 comments that the “*proletariat can take power only through its vanguard. In itself the necessity for state power arises from the insufficient cultural level of the masses and their heterogeneity.*” Thus “*state power*” is required **not** to defend the revo-

lution against reaction but from the working class itself, who do not have a high enough “*cultural level*” to govern themselves. At best, their role is that of a passive supporter, for “[w]ithout the confidence of the class in the vanguard, without support of the vanguard by the class, there can be no talk of the conquest of power.” While soviets “are the only organised form of the tie between the vanguard and the class” it does not mean that they are organs of self-management. No, a “revolutionary content can be given . . . only by the party. This is proved by the positive experience of the October Revolution and by the negative experience of other countries (Germany, Austria, finally, Spain).” [**Stalinism and Bolshevism**]

Sadly, Trotsky failed to explicitly address the question of what happens when the “masses” stop having “*confidence in the vanguard*” and decides to support some other group. After all, if a “*revolutionary content*” can only be given by “*the party*” then if the masses reject the party then the soviets can no longer be revolutionary. To save the revolution, it would be necessary to destroy the democracy and power of the soviets. Which is **exactly** what the Bolsheviks did do in 1918. By equating popular power with party power Bolshevism not only opens the door to party dictatorship, it invites it in, gives it some coffee and asks it to make itself a home! Nor can it be said that Trotsky ever appreciated Kropotkin’s “*general observation*” that “*those who preach dictatorship do not in general perceive that in sustaining their prejudice they only prepare the way for those who later on will cut their throats.*” [**Kropotkin’s Revolutionary Pamphlets**, p. 244]

In summary, it cannot be a coincidence that once in power the Bolsheviks acted in ways which had clear links to the political ideology it had been advocating before hand. As such, the Bolshevik aim for party power helped undermine the real power of working class people during the Russian revolution. Rooted in a deeply anti-democratic political tradition, it was ideologically predisposed to substitute party power for soviet power and, finally, to create — and justify — the dictatorship **over** the proletariat. The civil war may have shaped certain aspects of these authoritarian tendencies but it did not create them.

Were any of the Bolshevik oppositions a real alternative?

The real limitations in Bolshevism can best be seen by the various oppositions to the mainstream of that party. That Bolshevik politics were not a suitable instrument for working class self-liberation can be seen by the limited way which opposition groups questioned Bolshevik orthodoxy — even, in the case of the opposition to the rising Stalinist bureaucracy. Each opposition was fundamentally in favour of the Bolshevik monopoly of power, basically seeking reforms on areas which did not question it (such as economic policy). This does not mean that the various oppositions did not have valid points, just that they shared most of the key assumptions of Bolshevism which undermined the Russian revolution either by their application or their use to justify specific (usually highly authoritarian) practice.

We will not cover all the various oppositions with the Bolshevik party here (Robert V. Daniels' **The Conscience of the Revolution** discusses all of them in some detail, as does Leonard Schapiro's **The Origin of the Communist Autocracy**). We will concentrate on the "*Left Communists*" of 1918, the "*Workers' Opposition*" of 1920/1 and the Trotsky-led "*Left Opposition*" of 1923–7. It can be said that each opposition is a pale reflection of the one before it and each had clear limitations in their politics which fatally undermined any liberatory potential they had. Indeed, by the time of the "*Left Opposition*" we are reduced to simply the more radical sounding faction of the state and party bureaucracy fighting it out with the dominant faction.

To contrast these fake "oppositions" with a genuine opposition, we will discuss (in section 4) the "*Workers' Group*" of 1923 which was expelled from the Communist Party and repressed because it stood for (at least until the Bolshevik party seized power) traditional socialist values. This repression occurred, significantly, under Lenin and Trotsky in 1922/3. The limited nature of the previous oppositions and the repression of a **genuine** dissident working class group within the Communist Party shows how deeply unlibertarian the real Bolshevik tradition is. In fact, it could be argued that the fate of all the non-Trotskyist oppositions shows what will inevitably happen when someone takes the more democratic sounding rhetoric of Lenin at face value and compares it to his authoritarian practice, namely Lenin will turn round and say unambiguously that he had already mentioned his practice before hand and the reader simply had not been paying attention.

1 Were the “*Left Communists*” of 1918 an alternative?

The first opposition of note to Lenin’s state capitalist politics was the “*Left Communists*” in early 1918. This was clustered around the Bolshevik leader Bukharin. This grouping was focused around opposition to the Brest-Litovsk peace treaty with Germany and Lenin’s advocacy of “*state capitalism*” and “*one-man management*” as the means of both achieving socialism and getting Russia out of its problems. It is the latter issue that concerns us here.

The first issue of their theoretical journal **Kommunist** was published in April 1920 and it argued vigorously against Lenin’s advocacy of “*one-man management*” and state capitalism for “socialist” Russia. They correctly argued “*for the construction of the proletarian society by the class creativity of the workers themselves, not by the Ukases of the captains of industry . . . If the proletariat itself does not know how to create the necessary prerequisites for the socialist organisation of labour, no one can do this for it and no one can compel it to do this. The stick, if raised against the workers, will find itself in the hands of a social force which is either under the influence of another social class or is in the hands of the soviet power; but the soviet power will then be forced to seek support against the proletariat from another class (e.g. the peasantry) and by this it will destroy itself as the dictatorship of the proletariat. Socialism and socialist organisation will be set up by the proletariat itself, or they will not be set up at all: something else will be set up — state capitalism.*” [Osinsky, quoted by Brinton, **The Bolsheviks and Workers’ Control**, p. 39]

Lenin reacted sharply, heaping insult upon insult on the Left Communists and arguing against their ideas on workers’ self-management. Rather than see self-management (or even workers’ control) as the key, he argued forcefully in favour of one-man management and state capitalism as both the means of solving Russia’s immediate problems **and** building socialism. Moreover, he linked this with his previous writings, correctly noting his “*‘high’ appreciation of state*” had been given “*before the Bolsheviks seized power.*” For Lenin, “*Socialism [was] inconceivable without large scale capitalist engineering . . . [and] without planned state organisation, which keeps tens of millions of people to the strictest observance of a unified standard in production and distribution.*” Thus “*our task is to study the state capitalism of the Germans, to spare **no effort** in copying it and not shrink from adopting **dictatorial** methods to hasten the copying of it.*” [**Selected Works**, vol. 2, p. 636 and p. 635] This required appointing capitalists to management positions, from which the vanguard could learn.

So, as long as a workers’ party held power, the working class need not fear “*state capitalism*” and the lack of economic power at the point of production. Of course, without economic power, working class political power would be fatally undermined. In practice, Lenin simply handed over the workplaces to the state bureaucracy and created the social relationships which Stalinism thrived upon. Unfortunately, Lenin’s arguments carried the day (see section 9 of the appendix “What happened during the Russian Revolution?”). How this conflict was resolved is significant, given that the banning of factions (which is generally seen as a key cause in the rise of Stalinism) occurred in 1921 (a ban, incidentally, Trotsky defended throughout the 1920s). As one historian notes:

“The resolution of the party controversy in the spring of 1918 set

a pattern that was to be followed throughout the history of the Communist Opposition in Russia. This was the settlement of the issues not by discussion, persuasion, or compromise, but by a high-pressure campaign in the party organisations, backed by a barrage of violent invective in the party press and in the pronouncements of the party leaders. Lenin's polemics set the tone, and his organisational lieutenants brought the membership into line. [Daniels, **Op. Cit.**, p. 87]

Indeed, “[s]oon after the party congress had approved the peace [in the spring of 1918], a Petrograd city party conference produced a majority for Lenin. It ordered the suspension of the newspaper **Kommunist** which had been serving as a Left Communist organ . . . The fourth and final issue of the Moscow **Kommunist** had to be published as a private factional paper rather than as the official organ of a party organisation.” Ultimately, “[u]nder the conditions of party life established by Lenin, defence of the Opposition position became impossible within the terms of Bolshevik discipline.” [**Op. Cit.**, p. 88 and p. 89] So much for faction rights — three years **before** they were officially prohibited in the 10th Party Congress!

However, the “Left Communists,” while correct on socialism needing workers’ economic self-management, were limited in other ways. The major problems with the “Left Communists” were two-fold.

Firstly, by basing themselves on Bolshevik orthodoxy they allowed Lenin to dominate the debate. This meant that their more “libertarian” reading of Lenin’s work could be nullified by Lenin himself pointing to the authoritarian and state capitalist aspects of those very same works. Which is ironic, as today most Leninists tend to point to these very same democratic sounding aspects of Lenin’s ideas while downplaying the more blatant anti-socialist ones. Given that Lenin had dismissed such approaches himself during the debate against the Left Communists in 1918, it seems dishonest for his latter day followers to do this.

Secondly, their perspective on the role of the party undermined their commitment to true workers’ power and freedom. This can be seen from the comments of Sorin, a leading Left Communist. He argued that the Left Communists were “*the most passionate proponents of soviet power, but . . . only so far as this power does not degenerate . . . in a petty-bourgeois direction.*” [quoted by Ronald I. Kowalski, **The Bolshevik Party in Conflict**, p. 135] For them, like any Bolshevik, the party played the key role. The only true bastion of the interests of the proletariat was the party which “*is in every case and everywhere superior to the soviets . . . The soviets represent labouring democracy in general; and its interest, and in particular the interests of the petty bourgeois peasantry, do not always coincide with the interests of the proletariat.*” [quoted by Richard Sakwa, **Soviet Communists in Power**, p. 182] This support for party power can also be seen in Osinsky’s comment that “*soviet power*” and the “*dictatorship of the proletariat*” could “*seek support*” from other social classes, so showing that the class did not govern directly.

Thus soviet power was limited to approval of the party line and any deviation from that line would be denounced as “*petty bourgeois*” and, therefore, ignored. “*Ironically,*” the historian Kowalski notes, “*Sorin’s call for a revived soviet democracy was becoming vitiated by the dominant role assigned, in the final*

analysis, to the party.” [Op. Cit., p. 136] Thus their politics were just as authoritarian as the mainstream Bolshevism they attacked on other issues:

“Ultimately, the only criterion that they appeared able to offer was to define ‘proletarian’ in terms of adherence to their own policy prescriptions and ‘non-proletarian’ by non-adherence to them. In consequence, all who dared to oppose them could be accused either of being non-proletarian, or at the very least suffering from some form of ‘false consciousness’ — and in the interests of building socialism must recant or be purged from the party. Rather ironically, beneath the surface of their fine rhetoric in defence of the soviets, and of the party as ‘a forum for all of proletarian democracy,’ there lay a political philosophy that was arguably as authoritarian as that of which they accused Lenin and his faction.” [Kowalski, Op. Cit., pp. 136–7]

This position can be traced back to the fundamentals of Bolshevism (see section H.5 on vanguardism). “According to the Left Communists, therefore,” notes Richard Sakwa, “the party was the custodian of an interest higher than that of the soviets. Earlier theoretical considerations on the vanguard role of the party, developed in response to this problem, were confirmed by the circumstances of Bolshevism in power. The political dominance of the party over the soviets encouraged an administrative one as well. Such a development was further encouraged by the emergence of a massive and unwieldy bureaucratic apparatus in 1918 . . . The Left Communists and the party leadership were therefore in agreement that . . . the party should play a tutelary role over the soviets.” Furthermore, “[w]ith such a formulation it proved difficult to maintain the vitality of the soviet plenum as the soviet was controlled by a party fraction, itself controlled by a party committee outside the soviet.” [Op. Cit., p. 182 and p. 182–3]

With this ideological preference for party power and the ideological justification for ignoring soviet democracy, it is doubtful that their (correct) commitment to workers’ economic self-management would have been successful. An economic democracy combined with what amounts to a party dictatorship would be an impossibility that could never work in practice (as Lenin in 1921 argued against the “Workers’ Opposition”).

As such, the fact that Bukharin (one time “Left Communist”) “continued to eulogise the party’s dictatorship, sometimes quite unabashedly” during and after the civil war becomes understandable. In this, he was not being extreme: “Bolsheviks no longer bothered to disclaim that the dictatorship of the proletariat as the ‘dictatorship of the party.’” [Stephen F. Cohen, **Bukharin and the Bolshevik Revolution**, p. 145 and p. 142] All the leading Bolsheviks had argued this position for some time (see section H.1.2, for example). Bukharin even went so far as to argue that “the watchword” taken up by some workers (“even metal workers”!) of “For class dictatorship, but against party dictatorship!” showed that the proletariat “was declassed.” This also indicated that a “misunderstanding arose which threatened the whole system of the proletarian dictatorship.” [contained in Al Richardson (ed.), **In Defence of the Russian Revolution**, p. 192] The echoes of the positions argued before the civil war can be seen in Bukharin’s glib comment that proletarian management of the revolution meant the end of the “proletarian” dictatorship!

Lastly, the arguments of the Left Communists against “*one-man management*” were echoed by the Democratic Centralists at the Ninth Party Congress. One member of this grouping (which included such “*Left Communists*” as Osinsky) argued against Lenin’s dominate position in favour of appointed managers inside and outside the party as follows:

“The Central Committee finds that the [local] party committee is a bourgeois prejudice, is conservatism bordering on the province of treason, and that the new form is the replacement of party committees by political departments, the heads of which by themselves replace the elected committees . . . You transform the members of the party into an obedient gramophone, with leaders who order: go and agitate; but they haven’t the right to elect their own committee, their own organs.

“I then put the question to comrade Lenin: Who will appoint the Central Committee? You see, there can be individual authority here as well. Here also a single commander can be appointed.” [Sapronov, quoted by Daniels, **Op. Cit.**, p. 114]

Obviously a man before his time. As Stalin proved, if one-man management was such a good idea then why wasn’t it being practised in the Council of People’s Commissars. However, we should not be surprised by this party regime. After all, Trotsky had imposed a similar regime in the Army in 1918, as had Lenin in industry in the same year. As discussed in section 3 of the appendix “What caused the degeneration of the Russian Revolution?”, the Bolshevik preference for centralised “*democracy*” effectively hollowed out the real democracy at the base which makes democracy more than just picking masters.

2 What were the limitations of the “*Workers’ Opposition*” of 1920?

The next major opposition group were the “*Workers’ Opposition*” of 1920 and early 1921. Significantly, the name “Workers’ Opposition” was the label used by the party leadership to describe what latter became a proper grouping within the party. This group was more than happy to use the label given to it. This group is generally better known than other oppositions simply because it was the focus for much debate at the tenth party congress and its existence was a precipitating factor in the banning of factions within the Communist Party.

However, like the “*Left Communists*,” the “*Workers’ Opposition*” did not extend their economic demands to political issues. Unlike the previous opposition, however, their support for party dictatorship was more than logically implied, it was taken for granted. Alexandra Kollontai’s pamphlet, for example, expounding the position of the “*Workers’ Opposition*” fails to mention political democracy at all, instead discussing exclusively economic and party democracy. Thus it was a case of the “*Workers’ Opposition*” expressing the “*basis on which, in its opinions, the dictatorship of the proletariat must rest in the sphere of industrial reconstruction.*” Indeed, the “*whole controversy boils down to one basic question: who shall build the communist economy, and how shall it be build?*” [Selected Writings of Alexandra Kollontai, p. 161 and p. 173]

Kollontai was right to state that the working class “*can alone by the creator of communism*” and to ask the question of “*shall we achieve communist through the workers or over their heads, by the hands of Soviet officials.*” As she argued, “*it is impossible to decree communism.*” However, her list of demand were purely economic in nature and she wondered “[w]hat shall we do then in order to destroy bureaucracy in the party and replace it by workers’ democracy?” She stressed that the “Workers’ Opposition” struggle was “for establishing democracy in the party, and for the elimination of all bureaucracy.” [Op. Cit., p. 176, p. 174, p. 187, p. 192 and p. 197] Thus her demands were about the internal regime of the party, **not** a call for wider democratic reforms in the state or society as a whole.

As one historian notes, the “arguments of Kollontai were . . . strictly limited in their appeal to the communist party . . . Nor did they in any form criticise the domination of the communist minority over the majority of the proletariat. The fundamental weakness of the case of the Workers’ Opposition was that, while demanding more freedom of initiative for the workers, it was quite content to leave untouched the state of affairs in which a few hundred thousand imposed their will on many millions. ‘And since when have we [the Workers’ Opposition] been enemies of *komitetchina* [manipulation and control by communist party committees], I should like to know?’ Shlyapnikov asked at the Tenth Party Congress. He went on to explain that the trade union congress in which, as he and his followers proposed, all control of industry should be vested would ‘of course’ be composed of delegates nominated and elected ‘through the party cells, as we always do.’ But he argued that the local trade union cells would ensure the election of men qualified by experience and ability in pace of those who are ‘imposed on us at present’ by the centre. Kollontai and her supporters had no wish to disturb the communist party’s monopoly of political power.” [Leonard Schapiro, **The Origin of the Communist Autocracy**, p. 294]

Even this extremely limited demand for more economic democracy were too much for Lenin. In January, 1921, Lenin was arguing that the Bolsheviks had to “add to our platform the following: we must combat the ideological confusion of those unsound elements of the opposition who go to the lengths of repudiating all ‘militarisation of economy,’ of repudiating not only the ‘method of appointing’ which has been the prevailing method up to now, but **all** appointments. In the last analysis this means repudiating the leading role of the Party in relation to the non-Party masses. We must combat the syndicalist deviation which will kill the Party if it is not completely cured of it.” Indeed, “the syndicate deviation leads to the fall of the dictatorship of the proletariat.” [quoted by Brinton, **Op. Cit.**, pp. 75–6] Maurice Brinton correctly notes that by this Lenin meant that “working class power (‘the dictatorship of the proletariat’) is impossible if there are militants in the Party who think the working class should exert more power in production (‘the syndicalist deviation’).” Moreover, “Lenin here poses quite clearly the question of ‘power of the Party’ or ‘power of the class.’ He unambiguously opts for the former — no doubt rationalising his choice by equating the two. But he goes even further. He not only equates ‘workers power’ with the rule of the Party. He equates it with acceptance of the ideas of the Party leaders!” [Op. Cit., p. 76]

At the tenth party congress, the “Workers’ Opposition” were labelled “petty-bourgeois,” “syndicalist” and even “anarchist” simply because they called for limited participation by workers in the rebuilding of Russia. The group was

“caused in part by the entry into the ranks of the Party of elements which had still not completely adopted the communist world view.” Significantly, those who **had** the “communist world view” did not really debate the issues raised and instead called the opposition “genuinely counter-revolutionary,” “objectively counter-revolutionary” as well as “too revolutionary.” [quoted by Brinton, **Op. Cit.**, p. 79]

For Lenin, the idea of industrial democracy was a nonsense. In this he was simply repeating the perspective he had held from spring 1918. As he put it, it was “a term that lends itself to misinterpretations. It may be read as a repudiation of dictatorship and individual authority.” Industry, he argued, “is indispensable, democracy is not” and “on no account must we renounce dictatorship either.” Indeed, “[i]ndustry is indispensable, democracy is a category proper only to the political sphere.” He did admit “[t]hat [the opposition] has been penetrating into the broad masses is evident” however it was the duty of the party to ignore the masses. The “bidding for or flirtation with the non-Party masses” was a “radical departure from Marxism.” “Marxism teaches,” Lenin said, “and this tenet has not only been formally endorsed by the whole Communist International in the decisions of the Second (1920) Congress of the Comintern on the role of the political party of the proletariat, but has also been confirmed in practice by our revolution — that only the political party of the working class, i.e. the Communist Party, is capable of uniting, training and organising a vanguard of the proletariat . . . that alone will be capable of withstanding the inevitable petty-bourgeois vacillation of this mass . . . Without this the dictatorship of the proletariat is impossible.” [**Collected Works**, vol. 31, p. 82, p. 27, p. 26, p. 197 and p. 246] In other words, “Marxism” teaches that workers’ democracy and protest (the only means by which “vacillation” can be expressed) is a danger to the “dictatorship of the proletariat”! (see also section H.5.3 on why this position is the inevitable outcome of vanguardism).

It should be stressed that this opposition and the debate it provoked occurred after the end of the Civil War in the west. The Whites under Wrangel had been crushed in November, 1920, and the Russian revolution was no longer in immediate danger. As such, there was an opportunity for constructive activity and mass participation in the rebuilding of Russia. The leading Bolsheviks rejected such demands, even in the limited form advocated by the “Workers’ Opposition.” Lenin and Trotsky clearly saw **any** working class participation as a danger to their power. Against the idea of economic participation under Communist control raised by the “Workers’ Opposition,” the leading Bolsheviks favoured the NEP. This was a return to the same kind of market-based “state capitalist” strategy Lenin had advocated against the “Left Communists” **before** the outbreak of the civil war in May 1918 (and, as noted, he had argued for in 1917). This suggests a remarkable consistency in Lenin’s thoughts, suggesting that claims his policies he advocated and implemented in power were somehow the opposite of what he “really” wanted are weak.

As with the “Left Communists” of 1918, Lenin saw his opposition to the “Workers’ Opposition” as reflecting the basic ideas of his politics. “If we perish,” he said privately at the time according to Trotsky, “it is all the more important to preserve our ideological line and give a lesson to our continuators. This should **never** be forgotten, even in **hopeless** circumstances.” [quoted by Daniels, **Op. Cit.**, p. 147]

In summary, like the “Left Communists”, the “Workers’ Opposition” pre-

sented a platform of economic demands rooted in the assumption of Bolshevik party domination. It is, therefore, unsurprising that leading members of the “*Workers’ Opposition*” took part in the attack on Kronstadt and that they wholeheartedly rejected the consistent demands for political **and** economic that the Kronstadt rebels had raised (see appendix “What was the Kronstadt Rebellion?” for more information). Such a policy would be too contradictory to be applied. Either the economic reforms would remain a dead letter under party control or the economic reforms would provoke demands for political change. This last possibility may explain Lenin’s vitriolic attacks on the “*Workers’ Opposition*.”

This opposition, like the “*Left Communists*” of 1918, was ultimately defeated by organisational pressures within the party and state. Victor Serge “*was horrified to see the voting rigged for Lenin’s and Zinoviev’s ‘majority’*” in late 1920. [**Memoirs of a Revolutionary**, p. 123] Kollantai complained that while officially one and a half million copies of the “*Workers’ Opposition*” manifesto was published, in fact only 1500 were “*and that with difficulty*.” [quoted by Schapiro, **Op. Cit.**, p. 291] This applied even more after the banning of factions, when the party machine used state power to break up the base of the opposition in the trade unions as well as its influence in the party.

“*Victimisation of supporters of the Workers’ Opposition*,” notes Schapiro, “*began immediately after the Tenth Party Congress. ‘The struggle,’ as Shlyapnikov later recounted, ‘took place not along ideological lines but by means . . . of edging out from appointments, of systematic transfers from one district to another, and even expulsion from the party.’ . . . the attack was levelled not for heretical opinions, but for criticism of any kind of party shortcomings. ‘Every member of the party who spoke in defence of the resolution on workers’ democracy [in the party — see next section] was declared a supporter of the Workers’ Opposition and guilty of disintegrating the party,’ and was accordingly victimised.*” [**Op. Cit.**, pp. 325–6] Thus “*the party Secretariat was perfecting its technique of dealing with recalcitrant individuals by the power of removal and transfer, directed primarily at the adherents of the Workers’ Opposition. (Of the 37 Workers’ Opposition delegates to the Tenth Congress whom Lenin consulted when he was persuading Shlyapnikov and Kutuzov to enter the Central Committee, only four managed to return as voting delegates to the next congress.)*” [Daniels, **Op. Cit.**, p. 161]

A similar process was at work in the trade unions. For example, “[*w*]hen the metalworkers’ union held its congress in May 1921, the Central Committee of the party handed it a list of recommended candidates for the union leadership. The metalworkers’ delegates voted down the party-backed list, but this gesture proved futile: the party leadership boldly appointed their own men to the union offices.” This was “*a show of political force*” as the union was a centre of the Workers’ Opposition. [Daniels, **Op. Cit.**, p. 157]

This repression was practised under Lenin and Trotsky, using techniques which were later used by the Stalinists against Trotsky and his followers. Lenin himself was not above removing his opponents from the central committee by undemocratic methods. At the Tenth Party Congress he had persuaded Shlyapnikov to be elected to the Central Committee in an attempt to undermine the opposition. A mere “*five months later, Lenin was demanding his expulsion for a few sharp words of criticism of the bureaucracy, uttered at a private meeting of a local party cell. If he was looking for a pretext, he could scarcely have picked a*

weaker one.” [Schapiro, **Op. Cit.**, p. 327] Lenin failed by only one vote short of the necessary two thirds majority of the Committee.

In summary, the “*Workers’ Opposition*” vision was limited. Politically, it merely wanted democracy within the party. It did not question the party’s monopoly of power. As such, it definitely did not deserve the labels “*anarchist*” and “*syndicalist*” which their opponents called them. As far as its economic policy goes, it, too, was limited. Its demands for economic democracy were circumscribed by placing it under the control of the communist cells within the trade unions.

However, Kollontai was right to state that only the working class “*can alone by the creator of communism,*” that it was impossible to “*achieve communism . . . over [the workers’] heads, by the hands of Soviet officials*” and that “*it is impossible to decree communism.*” As Kropotkin put it decades before:

“Communist organisation cannot be left to be constructed by legislative bodies called parliaments, municipal or communal council. It must be the work of all, a natural growth, a product of the constructive genius of the great mass. Communism cannot be imposed from above.” [Kropotkin’s **Revolutionary Pamphlets**, p. 140]

3 What about Trotsky’s “*Left Opposition*” in the 1920s?

Finally, there is Trotsky’s opposition between 1923 and 1927. Since 1918 Trotsky had been wholeheartedly in favour of the party dictatorship and its economic regime. This position started to change once his own power came under threat and he suddenly became aware of the necessity for reform. Unsurprisingly, his opposition was the last and by far the weakest politically. As Cornelius Castoriadis points out:

*“From the beginning of 1918 until the banning of factions in March 1921, tendencies within the Bolshevik party were formed that, with farsightedness and sometimes an astonishing clarity, expressed opposition to the Party’s bureaucratic line and to its very rapid bureaucratisation. These were the ‘Left Communists’ (at the beginning of 1918), then the ‘Democratic Centralist’ tendency (1919), and finally the ‘Workers’ Opposition’ (1920–21). . . these oppositions were defeated one by one . . . The very feeble echoes of their critique of the bureaucracy that can be found later in the (Trotskyist) ‘Left Opposition’ after 1923 do not have the same signification. Trotsky was opposed to the **bad policies** of the bureaucracy and to the excesses of its power. He never put into question its essential nature. Until practically the end of his life, he never brought up the questions raised by the various oppositions of the period from 1918 to 1921 (in essence: ‘Who manages production?’ and ‘What is the proletariat supposed to do during the ‘dictatorship of the proletariat,’ other than work and follow the orders of ‘its’ party?’).”* [Political and Social Writings, vol. 3, p. 98]

While the “*Left Communists*” and “*Workers’ Opposition*” had challenged Lenin’s state capitalist economic regime while upholding the Bolshevik monopoly of power (implicitly or explicitly), Trotsky did not even manage that. His opposition was firmly limited to internal reforms to the party which he hoped would result in wider participation in the soviets and trade unions (he did not bother to explain why continuing party dictatorship would reinvigorate the soviets or unions).

Politically, Trotsky was unashamedly in favour of party dictatorship. Indeed, his basic opposition to Stalinism was because he considered it as the end of that dictatorship by the rule of the bureaucracy. He held this position consistently during the civil war and into the 1920s (and beyond — see section H.3.8). For example, in April 1923, he asserted quite clearly that “[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party.” [Leon Trotsky Speaks, p. 158] And was true to his word. In “*The New Course*” (generally accepted as being the first public expression of his opposition), he stated that “[w]e are the only party in the country, and in the period of the dictatorship it could not be otherwise.” Moreover, it was “incontestable that factions [within the party] are a scourge in the present situation” and so the party “does not want factions and will not tolerate them.” [The Challenge of the Left Opposition (1923–25), p. 78, p. 80 and p. 86] In May 1924, he even went so far as to proclaim that:

“Comrades, none of us wishes or is able to be right against his party. The party in the last analysis is always right, because the party is the sole historical instrument given to the proletariat for the solution of its basic problems . . . I know that one cannot be right against the party. It is only possible to be right with the party and through the party, for history has not created other ways for the realisation of what is right.” [quoted by Daniels, **The Conscience of the Revolution**, p. 240]

However, confusion creeps into the politics of the Left Opposition simply because they used the term “*workers’ democracy*” a lot. However, a close reading of Trotsky’s argument soon clarifies this issue. Trotsky, following the Communist Party itself, had simply redefined what “*workers’ democracy*” meant. Rather than mean what you would expect it would mean, the Bolsheviks had changed its meaning to become “*party democracy*.” Thus Trotsky could talk about “*party dictatorship*” and “*workers’ democracy*” without contradiction. As his support Max Eastman noted in the mid-1920s, Trotsky supported the “*programme of democracy within the party — called ‘Workers’ Democracy’ by Lenin.*” This “*was not something new or especially devised . . . It was part of the essential policy of Lenin for going forward toward the creation of a Communist society — a principle adopted under his leadership at the Tenth Congress of the party, immediately after the cessation of the civil war.*” [Since Lenin Died, p. 35] In the words of historian Robert V. Daniels:

“The Opposition’s political ideal was summed up in the slogan ‘workers’ democracy,’ which referred particularly to two documents [from 1920 and 1923] . . . Both these statements concerned the need to com-

bat 'bureaucratism' and implement party democracy." [Op. Cit., p. 300]

That this was the case can be seen from the Fourth All-Russian Congress of Trade Unions in 1921:

"At the meeting of delegates who were party members, Tomsky submitted for routine approval a set of these on the tasks of trade unions. The approval was a matter of form, but an omission was noted, The theses made no reference to the formula of 'proletarian democracy' with which the Tenth Congress had tried to assuage the rank and file. Riazanov . . . offered an amendment to fill the breach, in language almost identical with the Tenth Congress resolution: 'The party must observe with special care the normal methods of proletarian democracy, particularly in the trade unions, where most of all the selection of leaders should be done by the organised party masses themselves.' . . . The party leadership reacted instantaneously to this miscarriage of their plans for curtailing the idea of union autonomy. Tomksy was summarily ejected from the trade union congress. Lenin put in appearance together with Bukharin and Stalin to rectify the unionists' action." [Daniels, Op. Cit., p. 157]

The "New Course Resolution" passed in December, 1923, stresses this, stating that "Workers' democracy means the liberty of frank discussion of the most important questions of party life by all members, and the election of all leading party functionaries and commissions . . . It does not . . . imply the freedom to form factional groupings, which are extremely dangerous for the ruling party." [Trotsky, Op. Cit., p. 408] It made it clear that "workers' democracy" was no such thing:

"Worker's democracy signifies freedom of open discussion by all members of the party of the most important questions of party life, freedom of controversy about them, and also electiveness of the leading official individuals and collegia from below upwards. However, it does not at all suggest freedom of factional groupings . . . It is self-evident that within the party . . . it is impossible to tolerate groupings, the ideological contents of which are directed against the party as a whole and against the dictatorship of the proletariat (such as, for example, the 'Workers' Truth' and the 'Workers' Group')." [quoted by Robert V. Daniels, Op. Cit., p. 222]

As "Left Oppositionist" Victor Serge himself pointed out, "the greatest reach of boldness of the Left Opposition in the Bolshevik Party was to demand the restoration of inner-Party democracy, and it never dared dispute the theory of single-party government — by this time, it was too late." Trotsky had "ever since 1923 [been] for the renovation of the party through inner party democracy and the struggle against bureaucracy." [The Serge-Trotsky Papers, p. 181 and p. 201]

Thus Trotsky's opposition was hardly democratic. In 1926, for example, he took aim at Stalin's dismissal of the idea of "the dictatorship of the party" as "nonsense" the previous year. If he were the heroic defender of genuine

workers democracy modern day Trotskyists assert, he would have agreed with Stalin while exposing his hypocrisy. Instead he defended the concept of “*the dictatorship of the party*” and linked it to Lenin (and so Leninist orthodoxy):

“Of course, the foundation of our regime is the dictatorship of a class. But this in turn . . . assumes it is class that has come to self-consciousness through its vanguard, which is to say, through the party. Without this, the dictatorship could not exist . . . Dictatorship is the most highly concentrated function of function of a class, and therefore the basic instrument of a dictatorship is a party. In the most fundamental aspects a class realises its dictatorship through a party. That is why Lenin spoke not only of the dictatorship of the class but also the dictatorship of the party and, in a certain sense, made them identical.” [Trotsky, **The Challenge of the Left Opposition (1926–27)**, pp. 75–6]

Trotsky argued that Stalin’s repudiation of the “dictatorship of the party” was, in fact, a ploy to substitute the dictatorship of the party “*apparatus*” for the dictatorship of the party (a theme which would be raised in the following year’s **Platform of the Opposition**). Such a substitution, he argued, had its roots in a “*disproportion*” between workers’ democracy and peasants’ democracy (or “*the private sector of the economy*” in general). As long as there was a “*proper ‘proportion’*” between the two and “*the advance of democratic methods in the party and working class organisations,*” then “*the identification of the dictatorship of the class with that of the party is fully and completely justified historically and politically.*” Needless to say, Trotsky did not bother to ask how much democracy (of **any** kind) was possible under a party dictatorship nor how a class could run society or have “*democratic*” organisations if subjected to such a dictatorship. For him it was a truism that the “*dictatorship of a party does not contradict the dictatorship of the class either theoretically or practically, but is an expression of it.*” [**Op. Cit.**, p. 76] Needless to say, the obvious conclusion to draw from Trotsky’s argument is that if a revolution occurred in a country without a peasantry then the “*dictatorship of the party*” would be of no real concern!

This was no temporary (7 year!) aberration. As indicated in section H.3.8, Trotsky repeated this support for party dictatorship ten years later (and after). Furthermore, Trotsky’s defence of party dictatorship against Stalin was included in the 1927 **Platform of the Opposition**. This included the same contradictory demands for workers’ democracy and the revitalising of the soviets and trade unions with deeply rooted ideological support for party dictatorship. This document made his opposition clear, attacking Stalin for **weakening** the party’s dictatorship. In its words, the “*growing replacement of the party by its own apparatus is promoted by a ‘theory’ of Stalin’s which denies the Leninist principle, inviolable for every Bolshevik, that the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.*” It repeats this principle by arguing that “*the dictatorship of the proletariat demands a single and united proletarian party as the leader of the working masses and the poor peasantry.*” As such, “[*w*]e will fight with all our power against the idea of two parties, because the dictatorship of the proletariat demands as its very core a single proletarian party. It demands a single party.” [**The Platform of the**

Opposition] Even in the prison camps in the late 1920s and early 1930s, “almost all the Trotskyists continued to consider that ‘freedom of party’ would be ‘the end of the revolution.’ ‘Freedom to choose one’s party — that is Menshevism,’ was the Trotskyists’ final verdict.” [Ante Ciliga, **The Russian Enigma**, p. 280]

Once we understand that “workers’ democracy” had a very specific meaning to the Communist Party, we can start to understand such apparently contradictory demands as the “consistent development of a workers’ democracy in the party, the trade unions, and the soviets.” Simply put, this call for “workers’ democracy” was purely within the respective party cells and **not** a call for **genuine** democracy in the unions or soviets. Such a position in no way undermines the dictatorship of the party.

Economically, Trotsky’s opposition was far more backward than previous oppositions. For Trotsky, economic democracy was not an issue. It played no role in determining the socialist nature of a society. Rather state ownership did. Thus he did not question one-man management in the workplace nor the capitalist social relationships it generated. For Trotsky, it was “necessary for each state-owned factory, with its technical director and with its commercial director, to be subjected not only to control from the top — by the state organs — but also from below, by the market which will remain the regulator of the state economy for a long time to come.” In spite of the obvious fact that the workers did not control their labour or its product, Trotsky asserted that “[n]o class exploitation exists here, and consequently neither does capitalism exist.” Moreover, “socialist industry . . . utilises methods of development which were invented by capitalist economy.” Ultimately, it was not self-management that mattered, it was “the growth of Soviet state industry [which] signifies the growth of socialism itself, a direct strengthening of the power of the proletariat”! [**The First 5 Years of the Communist International**, vol. 2, p. 237 and p. 245]

Writing in 1923, he argued that the “system of actual one-man management must be applied in the organisation of industry from top to bottom. For leading economic organs of industry to really direct industry and to bear responsibility for its fate, it is essential for them to have authority over the selection of functionaries and their transfer and removal.” These economic organs must “in actual practice have full freedom of selection and appointment.” He also tied payment to performance (just as he did during the civil war), arguing that “the payment of the directors of enterprises must be made to depend on their balance sheets, like wages depend on output.” [quoted by Robert V. Daniels, **A Documentary History of Communism**, vol. 1, p. 237]

Moreover, Trotsky’s key idea during the 1920s was to industrialise Russia. As the 1927 Platform argued, it was a case that the “present tempo of industrialisation and the tempo indicated for the coming years are obviously inadequate” and so the “necessary acceleration of industrialisation” was required. In fact, the “Soviet Union must not fall further behind the capitalist countries, but in the near future must overtake them.” Thus industrialisation “must be sufficient to guarantee the defence of the country and in particular an adequate growth of war industries.” [**The Platform of the Opposition**]

In summary, Trotsky’s “opposition” in no way presented any real alternative to Stalinism. Indeed, Stalinism simply took over and applied Trotsky’s demands for increased industrialisation. At no time did Trotsky question the fundamental social relationships within Soviet society. He simply wished the ruling elite to

apply different policies while allowing him and his followers more space and freedom within the party structures. Essentially, as the 1927 Platform noted, he saw Stalinism as the victory of the state bureaucracy over the party and its dictatorship. Writing ten years after the Platform, Trotsky reiterated this: “*The bureaucracy won the upper hand. It cowed the revolutionary vanguard, trampled upon Marxism, prostituted the Bolshevik party . . . To the extent that the political centre of gravity has shifted from the proletarian vanguard to the bureaucracy, the party has changed its social structure as well as its ideology.*” [Stalinism and Bolshevism] He simply wanted to shift the “*political centre of gravity*” back towards the party, as it had been in the early 1920s when he and Lenin were in power. He in no significant way questioned the nature of the regime or the social relationships it was rooted in.

This explains his continual self-imposed role after his exile of loyal opposition to Stalinism in spite of the violence applied to him and his followers by the Stalinists. It also explains the lack of excitement by the working class over the “*Left Opposition.*” There was really not that much to choose between the two factions within the ruling party/elite. As Serge acknowledged: “*Outraged by the Opposition, they [the bureaucrats] saw it as treason against them; which in a sense it was, since the Opposition itself belonged to the ruling bureaucracy.*” [Memoirs of a Revolutionary, p. 225]

This may come as a shock to many readers. This is because Trotskyists are notorious for their rewriting of the policies of Trotsky’s opposition to the rise of what became known as Stalinism. This revisionism can take extreme forms. For example, Chris Harman (of the UK’s SWP) in his summary of the rise Stalinism asserted that after “*Lenin’s illness and subsequent death*” the “*principles of October were abandoned one by one.*” [Bureaucracy and Revolution in Eastern Europe, p. 14] Presumably, in that case, the “*principles of October*” included the practice of, and ideological commitment to, party dictatorship, one-man management, banning opposition groups/parties (as well as factions within the Communist Party), censorship, state repression of working class strikes and protests, piece-work, Taylorism, the end of independent trade unions and a host of other crimes against socialism implemented under Lenin and normal practice at the time of his death.

Harman is correct to say that “*there was always an alternative to Stalinism. It meant, in the late 1920s, returning to genuine workers’ democracy and consciously linking the fate of Russia to the fate of world revolution.*” Yet this alternative was not Trotsky’s. Harman even goes so far as to assert that the “*historical merit of the Left Opposition*” was that it “*did link the question of the expansion of industry with that of working-class democracy and internationalism.*” [Op. Cit., p. 19]

However, in reality, this was **not** the case. Trotsky, nor the Left Opposition, supported “*genuine*” working-class democracy, unless by “*genuine*” Harman means “*party dictatorship presiding over.*” This is clear from Trotsky’s writings for the period in question. The Left Opposition did **not** question the Bolshevik’s monopoly of power and explicitly supported the idea of party dictatorship. This fact helps explain what Harman seems puzzled by, namely that Trotsky “*continued to his death to harbour the illusion that somehow, despite the lack of workers’ democracy, Russia was a ‘workers’ state.’*” [Op. Cit., p. 20] Strangely, Harman does not explain why Russia was a “*workers’ state*” under Lenin and Trotsky, given its “*lack of workers’ democracy.*” But illusions are

hard to dispel, sometimes.

So, for Trotsky, like all leading members of the Communist Party and its “*Left Opposition*”, “*workers’ democracy*” was **not** considered important and, in fact, was (at best) applicable only within the party. Thus the capitulation of many of the Left Opposition to Stalin once he started a policy of forced industrialisation comes as less of a surprise than Harman seems to think it was. As Ante Ciliga saw first hand in the prison camps, “*the majority of the Opposition were . . . looking for a road to reconciliation; whilst criticising the Five Year Plan, they put stress not on the part of exploited class played by the proletariat, but on the technical errors made by the Government qua employer in the matter of insufficient harmony within the system and inferior quality of production. This criticism did not lead to an appeal to the workers against the Central Committee and against bureaucratic authority; it restricted itself to proposing amendments in a programme of which the essentials were approved. The socialist nature of State industry was taken for granted. They denied the fact that the proletariat was exploited; for ‘we were in a period of proletarian dictatorship.’*” [The Russian Enigma, p. 213]

As Victor Serge noted, “[f]rom 1928–9 onwards, the Politbureau turned to its own use the great fundamental ideas of the now expelled Opposition (excepting, of course, that of working-class democracy) and implemented them with ruthless violence.” While acknowledging that the Stalinists had applied these ideas in a more extreme form than the Opposition planned, he also acknowledged that “[b]eginning in those years, a good many Oppositionists rallied to the ‘general line’ and renounced their errors since, as they put it, ‘After all, it is our programme that is being applied.’” Nor did it help that at “the end of 1928, Trotsky wrote to [the Opposition] from his exile . . . to the effect that, since the Right represented the danger of a slide towards capitalism, we had to support the ‘Centre’ — Stalin — against it.” [Op. Cit., p. 252 and p. 253]

However, Serge’s comments on “*working-class democracy*” are somewhat incredulous, given that he knew fine well that the Opposition did not stand for it. His summary of the 1927 Platform was restricted to it aiming “*to restore life to the Soviets . . . and above all to revitalise the Party and the trade unions. . . In conclusion, the Opposition openly demanded a Congress for the reform of the Party, and the implementation of the excellent resolutions on internal democracy that had been adopted in 1921 and 1923.*” [Op. Cit., pp. 224–5] Which is essentially correct. The Platform was based on redefining “workers’ democracy” to mean “party democracy” within the context of its dictatorship.

We can hardly blame Harman, as it was Trotsky himself who started the process of revising history to exclude his own role in creating the evils he (sometimes) denounced his opponents within the party for. For example, the 1927 Platform states that “[n]ever before have the trade unions and the working mass stood so far from the management of socialist industry as now” and that “[p]re-revolutionary relations between foremen and workmen are frequently found.” Which is hardly surprising, given that Lenin had argued for, and implemented, appointed one-man management armed with “*dictatorial powers*” from April 1918 and that Trotsky himself also supported one-man management (see section 10 of the appendix “What happened during the Russian Revolution?”).

Even more ironically, Harman argues that the Stalinist bureaucracy became a ruling class in 1928 when it implemented the first five year plan. This industrialisation was provoked by military competition with the west, which forced

the “drive to accumulate” which caused the bureaucracy to attack “the living standards of peasants and workers.” He quotes Stalin: “to slacken the pace (of industrialisation) would mean to lag behind; and those who lag behind are beaten . . . We must make good this lag in ten years. Either we do so or they crush us.” Moreover, the “environment in which we are placed . . . at home and abroad . . . compels us to adopt a rapid rate of industrialisation.” [Harman, **Op. Cit.**, pp. 15–6] Given that this was exactly the same argument as Trotsky in 1927, it seems far from clear that the “Left Opposition” presented any sort of alternative to Stalinism. After all, the “Left Opposition took the stand that large-scale new investment was imperative, especially in heavy industry, and that comprehensive planning and new sources of capital accumulation should be employed immediately to effect a high rate of industrial expansion . . . They also stressed the necessity of rapidly overtaking the capitalist powers in economic strength, both as a guarantee of military security and as a demonstration of the superiority of the socialist system.” [Robert V. Daniels, **The Conscience of the Revolution**, p. 290]

Would the Left Opposition’s idea of “primitive socialist accumulation” been obtained by any means other than politically enforced exploitation and the repression of working class and peasant protest? Of course not. Faced with the same objective pressures and goals, would it have been any different if that faction had become dominant in the party dictatorship? It is doubtful, unless you argue that who is in charge rather than social relationships that determine the “socialist” nature of a regime. But, then again, that is precisely what Trotskyists like Harman do when they look at Lenin’s Russia.

As for Harman’s assertion that the Left Opposition stood for “internationalism,” that is less straight forward than he would like. As noted, it favoured the industrialisation of Russia to defend the regime against its foreign competitors. As such, the Left Opposition were as committed to building “socialism” in the USSR as were the Stalinist promoters of “socialism in one country.” The difference was that the Left Opposition also argued for spreading revolution externally as well. For them, this was the **only** means of assuring the lasting victory of “socialism” (i.e. stasised industry) in Russia. So, for the Left Opposition, building Russia’s industrial base was part and parcel of supporting revolution internationally rather, as in the case of the Stalinists, an alternative to it.

The contradictions in Trotsky’s position may best be seen from the relations between Lenin’s Russia and the German military. Negotiations between the two states started as early as 1920 with an important aide of Trotsky’s. The fruit of the German military’s negotiations were “secret military understandings.” By September 1922 German officers and pilots were training in Russia. An organisation of German military and industrial enterprises in Russia was established and under it’s auspices shells, tanks and aircraft were manufactured in Russia for the German army (an attempt to produce poison gas failed). [E.H. Carr, **The Bolshevik Revolution**, vol. 3, p. 327 and pp. 431–2] In April, 1923, the German High Command ordered 35 million gold marks worth of war material. [Aberdeen Solidarity, **Spartakism to National Bolshevism**, p. 24]

These relations had their impact on the politics of the German Communist Party who enforced its so-called “Schlageter Line” of co-operation with nationalist and fascist groups. This policy was first promoted in the Comintern by leading Communist Radek and inspired by Zinoviev. According to Radek,

“national Bolshevism” was required as the “strong emphasis on the nation in Germany is a revolutionary act.” [quoted in E.H. Carr, **The Interregnum 1923–1924**, p. 177] During the summer of 1923, joint meetings with them were held and both communist and fascist speakers urged an alliance with Soviet Russia against the Entente powers. So, for several months, the German Communists worked with the Nazis, going so far as to stage rallies and share podiums together. The Communist leader Ruth Fischer even argued that “*he who denounces Jewish capital . . . is already a warrior in the class war, even though he does not know it*” (she latter said her remarks had been distorted). [quoted in E.H. Carr, **Op. Cit.**, p. 182f] This continued until “*the Nazis leadership placed a ban on further co-operation.*” [E.H. Carr, **Op. Cit.**, p. 183] Thus the activities of the German communists were tailored to fit into the needs of Lenin’s regime and Trotsky played a key role in the negotiations which started the process.

How “internationalist” was it to arm and train the very forces which had crushed the German revolutionary workers between 1919 and 1921? How sensible was it, when pressing for world revolution, to enhance the power of the army which would be used to attack any revolution in Germany? Which, of course, was what happened in 1923, when the army repressed the Comintern inspired revolt in November that year. Trotsky was one of the staunchest in favour of this insurrection, insisting that it be fixed for the 7th of that month, the anniversary of the Bolshevik seizure of power. [E.H. Carr, **Op. Cit.**, p. 205] The attempted revolt was a dismal failure. Rather than a revolution in Berlin on the 7th of November, there was a dinner at the Russian embassy for German officers, industrialists and officials to celebrate the anniversary of the Russian revolution. [Carr, **Op. Cit.**, p. 226] The big question is how many Communists and workers killed in the revolt had been at the receiving end of weapons and training supplied to the German army by Trotsky’s Red Army?

Moreover, the **nature** of any such revolution is what counts. The Left Opposition would have encouraged revolutions which followed (to re-quote the **Platform of the Opposition**) the “*Leninist principle*” (“*inviolable for every Bolshevik*”) that “*the dictatorship of the proletariat is and can be realised only through the dictatorship of the party.*” It would have opposed workers’ self-management in favour of nationalisation and one-man management. In other words, the influence of the Left Opposition would have been as detrimental to the global workers’ movement and other revolutions as Stalin’s was (or, for that matter, Lenin’s) although, of course, in a different way. Generalising Lenin’s state capitalism would not have resulted in socialism, no matter how many revolutions in the west the Left Opposition encouraged.

Finally, the fate of the “*Left Opposition*” should be noted. As befell the previous oppositions, the party machine was used against it. Ironically, the Stalinists began by using the very techniques the Trotskyists had used against their opponents years before. For example, the Eighth Party Congress in December 1919 agreed that “*[a]ll decisions of the higher jurisdiction are absolutely binding for the lower.*” Moreover, “*[e]ach decision must above all be fulfilled, and only after this is an appeal to the corresponding party organ permissible.*” Centralism was reaffirmed: “*The whole matter of assignment of party workers is in the hands of the Central Committee of the party. Its decision is binding for everyone. . .*” These decisions were used as a weapon against the opposition: “*Translating this principle into practice, the Secretariat under Krestinsky*

[a Trotsky supporter] began deliberately to transfer party officials for political reasons, to end personal conflicts and curb opposition.” In 1923, the Secretariat “brought into play its power of transfer, which had already proven to be an effective political weapon against the Ukrainian Leftists and the Workers’ Opposition.” [Robert V. Daniels, **Op. Cit.**, p. 113 and p. 229]

The party itself had been reorganised, with “the replacement of local party committees, which were at least democratic in form, by bureaucratically constituted ‘political departments.’ With the institution of such bodies, all political activity . . . was placed under rigid control from above. This innovation was taken from the army; as its origin suggests, it was strictly a military, authoritarian institution, designed for transmitting propaganda downward rather than opinion upward.” [**Op. Cit.**, p. 114] Needless to say, it was Trotsky himself who implemented that regime in the army to begin with.

It should also be remembered that when, in early in 1922, the “Workers’ Opposition” had appealed to the Communist abroad in the form of a statement to a Comintern Congress, Trotsky defended the party against its claims. These claims, ironically, included the accusation that the “party and trade-union bureaucracy . . . ignore the decisions of our congresses on putting workers’ democracy [inside the party] into practice.” Their “effort to draw the proletarian masses closer to the state is declared to be ‘anarcho-syndicalism,’ and its adherents are subjected to persecution and discrediting.” They argued that the “tutelage and pressure by the bureaucracy goes so far that it is prescribed for members of the party, under threat of exclusion and other repressive measures, to elect not those whom the Communists want themselves, but those whom the ignorant high places want.” [quoted by Daniels, **Op. Cit.**, p. 162]

Even more ironically, the dominant faction of the bureaucracy heaped upon Trotsky’s opposition faction similar insults to those he (and Lenin) had heaped upon previous oppositions inside and outside the party. In 1924, the Trotskyist opposition was accused of having “clearly violated the decision of the Tenth Congress . . . which prohibited the formation of factions within the party” and has “enlivened the hopes of all enemies of the party, including the West-European bourgeoisie, for a split in the ranks of the Russian Communist Party.” In fact, it was a “direct departure of Leninism” and “also a clearly expressed **petty-bourgeois deviation**” reflecting “the pressure of the petty bourgeois on the position of the proletarian party and its policy.” [contained in Daniels, **A Documentary History of Communism**, vol. 1, pp. 247–8] In 1927 the “United Opposition” was “[o]bjectively . . . a tool of the bourgeois elements.” [quoted by Daniels, **The Conscience of the Revolution**, p. 318]

One of the ways which supporters of Leninism seek to differentiate it from Stalinism is on the issue of repression within the Communist Party itself. However, the suppression of opposition currents within Bolshevism did not start under Stalinism, it had existed to some degree from the start. Ironically, Trotsky’s belated opposition faced exactly the same measures he had approved for use against groups like the “Workers’ Opposition” within a party regime he himself had helped create.

Of course, the Stalinists did not stop there. Once the “Left Opposition” was broken its members were brutally repressed. Some were simply murdered, many more arrested and placed into prison camps where many died. Which shows, in its own way, a key difference between Lenin’s and Stalin’s regime. Under Lenin, the opposition **outside** the party was brutally repressed. Stalin simply applied

the methods used by Lenin outside the party to oppositions within it.

4 What do these oppositions tell us about the essence of Leninism?

The history and ideas of these oppositions are important in evaluating the claims of pro-Bolsheviks. If, as modern-day supporters of Bolshevism argue, Leninism is inherently democratic and that before the revolution it stood for basic civil liberties for the working class then we have to come to the conclusion that none of the party oppositions represented the “*true*” Leninist tradition. Given that many Trotskyists support the “*Left Opposition*” as the only “*real*” opposition to Stalin, defending the true essence of Bolshevism, we can only wonder what the “*real*” Bolshevik tradition is. After all, the “*Left Opposition*” wholeheartedly supported party dictatorship, remained silent on workers’ control and urged the speeding up of industrialisation to meet competition from the west.

However, there are groups which did raise more substantial critiques of mainstream Bolshevism. They raised their ideas between 1921 and 1923. How Lenin and Trotsky responded to them is significant. Rather than embrace them as expressing what the (according to Leninists) **really** stood for, they used state repression to break them and they were kicked out of the Communist Party. All with the approval of Lenin and Trotsky.

The only groups associated with the Bolshevik party which advocated democracy and freedom for working people were the dissidents of the “*Workers’ Truth*” and “*Workers’ Group*.” Material on both is hard to come by. The “*Workers’ Truth*” group was labelled “*Menshevik*” by the ruling party while the “*Workers’ Group*” was dismissed as “*anarcho-syndicalist*.” Both were expelled from the party and their members arrested by the Bolsheviks. The latter group is better known than the former and so, by necessity, we will concentrate on that. It was also the largest, boldest and composed mainly of workers. We find them labelled the NEP the “*New Exploitation of the Proletariat*” and attacking, like the “*Workers’ Opposition*”, the “*purely bureaucratic way*” industry was run and urging “*the direct participation of the working class*” in it. However, unlike the “*Workers’ Opposition*”, the “*Workers’ Group*” extended their call for workers’ democracy to beyond the workplace and party. They wondered if the proletariat might not be “*compelled once again to start anew the struggle ... for the overthrow of the oligarchy*.” They noted that ruling clique in the party “*will tolerate no criticism, since it considers itself just as infallible as the Pope of Rome*.” [quoted by E.H. Carr, **The Interregnum 1923–1924**, p. 82, p. 269]

The “*Workers’ Group*” is associated with the old worker Bolshevik G. T. Miasnikov, its founder and leading thinker (see Paul Avrich’s essay **Bolshevik Opposition to Lenin: G. T. Miasnikov and the Workers’ Group** for more details — any non-attributed quotes can be found in this essay). As Ante Ciliga recounted in his experiences of political debate in the prison camps in the late 1920s and early 1930s (ironically, there had always been more freedom of expression in prison than in Bolshevik society):

“In the criticism of the Lenin of the revolutionary period the tone was set by ... the Workers Group ... [It was], in origin, from the Bolshevik old guard. But ... they criticised Lenin’s course of action

from the beginning, and not on details but as a whole. The Workers Opposition denounced Lenin's economic line. The Workers Group went even farther and attacked the political regime and the single party established by Lenin prior to the NEP . . .

“Having put as the basis of its programme Marx's watchword for the 1st International — ‘The emancipation of the workers must be the task of the workers themselves’ — the Workers Group declared war from the start on the Leninist concept of the ‘dictatorship of the party’ and the bureaucratic organisation of production, enunciated by Lenin in the initial period of the revolution's decline. Against the Leninist line, they demanded organisation of production by the masses themselves, beginning with factory collectives. Politically, the Workers Group demanded the control of power and of the party by the worker masses. These, the true political leaders of the country, must have the right to withdraw power from any political party, even from the Communist Party, if they judged that that party was not defending their interests. Contrary to . . . the majority of the Workers' Opposition, for whom the demand for ‘workers' democracy’ was practically limited to the economic domain, and who tried to reconcile it with the ‘single party,’ the Workers Group extended its struggle for workers' democracy to the demand for the workers to choose among competing political parties of the worker milieu. Socialism could only be the work of free creation by the workers. While that which was being constructed by coercion, and given the name of socialism, was for them nothing but bureaucratic State capitalism from the very beginning.” [Op. Cit., pp. 277–8]

Years before, Miasnikov had exposed the abuses he has seen first hand under Lenin's regimed. In 1921, he stated the obvious that “[i]t stands to reason that workers' democracy presupposes not only the right to vote but also freedom of speech and press. If workers who govern the country, manage factories, do not have freedom of speech, we get a highly abnormal state.” He urged total freedom of speech for all. He discussed corruption within the party, noting that a “special type of Communist is evolving. He is forward, sensible, and, what counts most, he knows how to please his superiors, which the latter like only too much.” Furthermore, “[i]f one of the party rank and file dares to have an opinion of his own, he is looked upon as a heretic and people scoff at him saying, ‘Wouldn't Ilyitch (Lenin) have come to this idea if it were timely now? So you are the only clever man around, eh, you want to be wiser than all? Ha, ha, ha! You want to be clever than Ilyitch!’ This is the typical ‘argumentation’ of the honourable Communist fraternity.” “Any one who ventures a critical opinion of his own,” he noted, “will be labelled a Menshevik of Social-Revolutionist, with all the consequences that entails.” [quoted by G. P. Maximoff, **The Guillotine at Work**, p. 269 and p. 268]

Lenin tried to reply to Miasnikov's demand for freedom of speech. Freedom of the press, Lenin argued, would, under existing circumstances, strengthen the forces of counter-revolution. Lenin rejected “freedom” in the abstract. Freedom for whom? he demanded. Under what conditions? For which class? “We do not believe in ‘absolutes.’ We laugh at ‘pure democracy,’” he asserted. “Freedom of press in the RSFSR,” Lenin maintained, “surrounded by bourgeois enemies ev-

everywhere means freedom for the bourgeoisie” and as “we do not want to commit suicide and that is why we will never do this” (i.e. introduce freedom of speech). According to Lenin, freedom of speech was a “non-party, anti-proletarian slogan” as well as a “flagrant political error.” After sober reflection, Lenin hoped, Miasnikov would recognise his errors and return to useful party work.

Miasnikov was not convinced by Lenin’s arguments. He drafted a strong reply. Reminding Lenin of his revolutionary credentials, he wrote: “You say that I want freedom of the press for the bourgeoisie. On the contrary, I want freedom of the press for myself, a proletarian, a member of the party for fifteen years, who has been a party member in Russia and not abroad. I spent seven and a half of the eleven years of my party membership before 1917 in prisons and at hard labour, with a total of seventy-five days in hunger strikes. I was mercilessly beaten and subjected to other tortures . . . I escaped not abroad, but for party work here in Russia. To me one can grant at least a little freedom of press. Or is it that I must leave or be expelled from the party as soon as I disagree with you in the evaluation of social forces? Such simplified treatment evades but does not tackle our problems.” [quoted by Maximoff, **Op. Cit.**, pp. 270–1] Lenin said, Miasnikov went on, that the jaws of the bourgeoisie must be cracked:

“To break the jaws of international bourgeoisie, is all very well, but the trouble is that, you raise your hand against the bourgeoisie and you strike at the worker. Which class now supplies the greatest numbers of people arrested on charges of counter-revolution? Peasants and workers, to be sure. There is no Communist working class. There is just a working class pure and simple.” [quoted by Maximoff, **Op. Cit.**, p. 271]

“Don’t you know,” he asked Lenin, “that thousands of proletarians are kept in prison because they talked the way I am talking now, and that bourgeois people are not arrested on this score for the simple reason that they are never concerned with these questions? If I am still at large, that is so because of my standing as a Communist. I have suffered for my Communist views; moreover, I am known by the workers; were it not for these facts, were I just an ordinary Communist mechanic from the same factory, where would I be now? In the Che-Ka [prison] . . . Once more I say: you raise your hand against the bourgeoisie, but it is I who am spitting blood, and it is we, the workers, whose jaws are being cracked.” [quoted by Maximoff, **Ibid.**]

After engaging in political activity in his home area, Miasnikov was summoned to Moscow and placed under the control of the Central Committee. In defiance of the Central Committee, he returned to the Urals and resumed his agitation. At the end of August he appeared before a general meeting of Motovilikha party members and succeeded in winning them over to his side. Adopting a resolution against the Orgburo’s censure of Miasnikov, they branded his transfer to Moscow a form of “banishment” and demanded that he be allowed “full freedom of speech and press within the party.”

On November 25 he wrote to a sympathiser in Petrograd urging a campaign of agitation in preparation for the 11th party congress. By now Miasnikov was being watched by the Cheka, and his letter was intercepted. For Lenin, this was the last straw: “We must devote greater attention to Miasnikov’s agitation,” he

wrote to Molotov on December 5, “*and to report on it to the Politburo twice a month.*” To deal with Miasnikov, meanwhile, the Orgburo formed a new commission. This commission recommended his expulsion from the party, which was agreed by the Politburo on February 20, 1922. This was the first instance, except for the brief expulsion of S. A. Lozovsky in 1918, where Lenin actually expelled a well-known Bolshevik of long standing.

By the start of 1923, he had organised a clandestine opposition and formed (despite his expulsion) the “*Workers’ Group of the Russian Communist Party.*” He claimed that it, and not the Bolshevik leadership, represented the authentic voice of the proletariat. Joining hands in the venture were P. B. Moiseev, a Bolshevik since 1914, and N. V. Kuznetsov, the former Workers’ Oppositionist. The three men, all workers, constituted themselves as the “*Provisional Central Organisational Bureau*” of the group. Their first act, in February 1923, was to draw up a statement of principles in anticipation of the Twelfth Party Congress called the “*Manifesto of the Workers’ Group of the Russian Communist Party.*” The manifesto was “*denouncing the New Exploitation of the Proletariat and urging the workers to fight for soviet democracy,*” according to Trotskyist historian I. Deutscher. [**The Prophet Unarmed**, p.107]

The manifesto recapitulated the program of Miasnikov’s earlier writings: workers’ self-determination and self-management, the removal of bourgeois specialists from positions of authority, freedom of discussion within the party, and the election of new soviets centred in the factories. It protested against administrative high-handedness, the expanding bureaucracy, the predominance of non-workers within the party, and the suppression of local initiative and debate. The manifesto denounced the New Economic Policy (NEP) as the “*New Exploitation of the Proletariat.*” In spite of the abolition of private ownership, the worst features of capitalism had been preserved: wage slavery, differences of income and status, hierarchical authority, bureaucratism. In the words of the manifesto, the “*organisation of this industry since the Ninth Congress of the RCP(b) is carried out without the direct participation of the working class by nominations in a purely bureaucratic way.*” [quoted by Daniels, **Op. Cit.**, p. 204]

The manifesto wondered whether the Russian proletariat might not be compelled “*to start anew the struggle — and perhaps a bloody one — for the overthrow of the oligarchy.*” Not that it contemplated an immediate insurrection. Rather it sought to rally the workers, Communist and non-Communist alike, to press for the elimination of bureaucratism and the revival of proletarian democracy. Within the party the manifesto defended the right to form factions and draw up platforms. “*If criticism does not have a distinct point of view,*” Miasnikov wrote to Zinoviev, “*a platform on which to rally a majority of party members, on which to develop a new policy with regard to this or that question, then it is not really criticism but a mere collection of words, nothing but chatter.*” He went even further, calling into question the very Bolshevik monopoly of power. Under a single-party dictatorship, he argued, elections remained “*an empty formality.*” To speak of “*workers’ democracy*” while insisting on one-party government, he told Zinoviev, was to entwine oneself in a contradiction, a “*contradiction in terms.*”

Miasnikov was arrested by the GPU (the new name for the Cheka) on May 25, 1923, a month after the Twelfth Party Congress (the rest of the group’s leadership was soon to follow). Miasnikov was released from custody and permitted

to leave the country and left for Germany (this was a device not infrequently used by the authorities to rid themselves of dissenters). In Berlin he formed ties with the council communists of the German Communist Workers' Party (KAPD) and with the left wing of the German Communist Party. With the aid of these groups, Miasnikov was able to publish the manifesto of the Workers' Group, prefaced by an appeal drafted by his associates in Moscow. The appeal concluded with a set of slogans proclaiming the aims of the Workers' Group: "*The strength of the working class lies in its solidarity. Long live freedom of speech and press for the proletarians! Long live Soviet Power! Long live Proletarian Democracy! Long live Communism!*"

Inside Russia the manifesto was having its effect. Fresh recruits were drawn into the Workers' Group. It established ties with discontented workers in several cities and began negotiations with leaders of the now defunct Workers' Opposition. The group won support within the Red Army garrison quartered in the Kremlin, a company of which had to be transferred to Smolensk. By summer of 1923 the group had some 300 members in Moscow, as well as a sprinkling of adherents in other cities. Many were Old Bolsheviks, and all, or nearly all, were workers. Soon an unexpected opportunity for the group to extend its influence arrived. In August and September 1923 a wave of strikes (which recalled the events of February 1921) swept Russia's industrial centres. An economic crisis (named the "*scissors' crisis*") had been deepening since the beginning of the year, bringing cuts in wages and the dismissal of large numbers of workers. The resulting strikes, which broke out in Moscow and other cities, were spontaneous and no evidence existed to connect them with any oppositionist faction. The Workers' Group, however, sought to take advantage of the unrest to oppose the party leadership. Stepping up its agitation, it considered calling a one-day general strike and organising a mass demonstration of workers, on the lines of Bloody Sunday 1905, with a portrait of Lenin (rather than the Tzar!) at the lead.

The authorities became alarmed. The Central Committee branded the Workers' Group as "*anti-Communist and anti-Soviet*" and ordered the GPU to suppress it. By the end of September its meeting places had been raided, literature seized, and leaders arrested. Twelve members were expelled from the party and fourteen others received reprimands. As one Trotskyist historian put it, the "*party leaders*" were "*determined to suppress the Workers' Group and the Workers' Truth.*" [I. Deutscher, **Op. Cit.**, p. 108] Miasnikov was considered such a threat that in the autumn of 1923 he was lured back to Russia on assurances from Zinoviev and Krestinsky, the Soviet ambassador in Berlin, that he would not be molested. Once in Russia he was immediately placed behind bars. The arrest was carried out by Dzerzhinsky himself (the infamous creator and head of the Cheka), a token of the gravity with which the government viewed the case.

This response is significant, simply because Trotsky was still an influential member of the Communist Party leadership. As Paul Avrich points out, "*[i]n January 1924, Lenin died. By then the Workers' Group had been silenced. It was the last dissident movement within the party to be liquidated while Lenin was still alive. It was also the last rank-and-file group to be smashed with the blessing of all the top Soviet leaders, who now began their struggle for Lenin's mantle.*" [**Bolshevik Opposition To Lenin: G. Miasnikov and the Workers Group**]

The response of Trotsky is particularly important, given that for most modern day Leninists he raised the banner of “authentic” Leninism against the obvious evils of Stalinism. What was his reaction to the state repression of the Workers’ Group? As Deutscher notes, Trotsky “*did not protest when their adherents were thrown into prison . . . Nor was he inclined to countenance industrial unrest . . . Nor was he at all eager to support the demand for Soviet democracy in the extreme form in which the Workers’ Opposition and its splinter groups [like the Workers’ Group] had raised it.*” [Op. Cit., pp. 108–9] Dzerzhinsky was given the task of breaking the opposition groups by the central committee. He “*found that even party members of unquestioned loyalty regarded them as comrades and refused to testify against them. He then turned to the Politburo and asked it to declare it was the duty of any party member to denounce to the GPU people inside the party engaged aggressive action against the official leaders.*” Trotsky “*did not tell the Politburo plainly that it should reject Dzerzhinsky’s demand. He evaded the question.*” [Op. Cit., p. 108 and p. 109]

Trotskyist Tony Cliff presents a similar picture of Trotsky’s lack of concern for opposition groups and his utter failure to support working class self-activity or calls for **real** democracy. He notes that in July and August 1923 Moscow and Petrograd “*were shaken by industrial unrest . . . Unofficial strikes broke out in many places . . . In November 1923, rumours of a general strike circulated throughout Moscow, and the movement seems at the point of turning into a political revolt. Not since the Kronstadt rising of 1921 had there been so much tension in the working class and so much alarm in the ruling circles.*” The ruling elite, including Trotsky, acted to maintain their position and the secret police turned on any political group which could influence the movement. The “*strike wave gave a new lease of life to the Mensheviks*” and so “*the GPU carried out a massive round up of Mensheviks, and as many as one thousand were arrested in Moscow alone.*” When it was the turn of the Workers Group and Workers Truth, Trotsky “*did not condemn their persecution*” and he “*did not support their incitement of workers to industrial unrest.*” Moreover, “[*n*]or was Trotsky ready to support the demand for workers’ democracy in the extreme form to which the Workers Group and Workers Truth raised it.” [Trotsky, vol. 3, p. 25, p. 26 and pp. 26–7]

By “*extreme,*” Cliff obviously means “*genuine*” as Trotsky did not call for workers’ democracy in any meaningful form. Indeed, his “*New Course Resolution*” even went so far as to say that “*it is obvious that there can be no toleration of the formation of groupings whose ideological content is directed against the party as a whole and against the dictatorship of the proletariat. as for instance the Workers’ Truth and Workers’ Group.*” Trotsky himself was at pains to distance himself from Myainikov. [The Challenge of the Left Opposition (1923–25), p. 408 and p. 80] The resolution made it clear that it considered “*the dictatorship of the proletariat*” to be incompatible with **real** workers democracy by arguing “*it is impossible to tolerate groupings, the ideological contents of which are directed against the party as a whole and against the dictatorship of the proletariat (such as, for example, the ‘Workers’ Truth’ and the ‘Workers’ Group’).*” [quoted by Robert V. Daniels, Op. Cit., p. 222] Given that both these groups advocated actual soviet and trade union democracy, the Politburo was simply indicating that **actual** “*workers’ democracy*” was “*against*” the dictatorship of the proletariat (i.e. the dictatorship of the

party).

Thus we come to the strange fact that it was Lenin and Trotsky themselves who knowingly destroyed the groups which represent what modern day Leninists assert is the “*real*” essence of Leninism. Furthermore, modern day Leninists generally ignore these opposition groups when they discuss alternatives to Stalinism or the bureaucratisation under Lenin. This seems a strange fate to befall tendencies which, if we take Leninists at their word, expressed what their tradition stands for. Equally, in spite of their support for party dictatorship, the “*Workers’ Opposition*” did have some constructive suggestions to make as regards combating the economic bureaucratisation which existed under Lenin. Yet almost all modern Leninists (like Lenin and Trotsky) dismiss them as “*syndicalist*” and utopian. Which is, of course, significant about the **real** essence of Leninism.

Ultimately, the nature of the various oppositions within the party and the fate of such real dissidents as the “*Workers’ Group*” says far more about the real reasons the Russian revolution than most Trotskyist books on the matter. Little wonder there is so much silence and distortion about these events. They prove that the “*essence*” of Bolshevism is not a democratic one but rather a deeply authoritarian one hidden (at times) behind libertarian sounding rhetoric. Faced with opposition which were somewhat libertarian, the response of Lenin and Trotsky was to repress them. In summary, they show that the problems of the revolution and subsequent civil war did not create but rather revealed Bolshevism’s authoritarian core.

Why does the Makhnovist movement show there is an alternative to Bolshevism?

The key Leninist defence of the actions of the Bolsheviks in the Russian revolution is that they had no other choice. Complaints against the Bolshevik attacks on the gains of the revolution and the pro-revolutionary Left in Russia are met with a mantra involving the white terror, the primitive state of Russia and the reactionary peasantry, the invading imperialist armies (although the actual number can, and does, vary depending on who you are talking to) and other such “*forces of nature*” which we are to believe could only be met by a centralised authoritarian regime that would flinch at nothing in order to survive.

However, this is not the case. This is for three reasons.

Firstly, there is the slight problem that many of the attacks on the revolution (disbanding soviets, undermining the factory committees, repressing socialists and anarchists, and so on) started **before** the start of the civil war. As such, its difficult to blame the degeneration of the revolution on an event which had yet to happen (see section 3 of the appendix “What caused the degeneration of the Russian Revolution?” for details).

Secondly, Leninists like to portray their ideology as “realistic,” that it recognises the problems facing a revolution and can provide the necessary solutions. Some even claim, flying in the face of the facts, that anarchists think the ruling class will just “*disappear*” (see section H.2.1) or that we think “*full-blown*” communism will appear “*overnight*” (see section H.2.5). Only Bolshevism, it is claimed, recognises that civil war is inevitable during a revolution and only it provides the necessary solution, namely a “*workers state*.” Lenin himself argued that “[n]ot a single great revolution in history has escaped civil war. No one who does not live in a shell could imagine that civil war is conceivable without exceptionally complicated circumstances.” [**Will the Bolsheviks Maintain Power?**, p. 81] As such, its incredulous that modern day followers of Lenin blame the degeneration of the Russian Revolution on the very factors (civil war and exceptional circumstances) that they claim to recognise an inevitable!

Thirdly, and even more embarrassingly for the Leninists, numerous examples exist both from revolutionary Russia at the time and from earlier and later revolutions that suggest far from Bolshevik tactics being the most efficient way of defending the revolution other methods existed which looked to the massive creative energies of the working masses unleashed by the revolution.

During the Russian Revolution the biggest example of this is found in South-

Eastern Ukraine. For much of the Civil War this area operated without a centralised state apparatus of the Bolshevik type and was, instead, based on the anarchist idea of Free Soviets. There “*the insurgents raised the black flag of anarchism and set forth on the anti-authoritarian road of the free organisation of the workers.*” [Arshinov, **The History of the Makhnovist Movement**, p. 50] The space in which this happened was created by a partisan force that instead of using the “*efficiency*” of executions for desertion, tsarist officers appointed over the rank and file soldiers’ wishes and saluting so loved by the Bolsheviks instead operated as a volunteer army with elected officers and voluntary discipline. This movement was the Makhnovists, named after its leader, the Ukrainian anarchist Nestor Makhno. The Black Flag which floated over the lead wagon of the Insurgent Army was inscribed with the slogans “*Liberty or Death*” and “*The Land to the Peasants, the Factories to the Workers.*” These slogans summarised what the Makhnovist were fighting for — a libertarian socialist society. At its height in the autumn of 1919, the Makhnovists numbered around 40,000 and its extended area of influence corresponded to nearly one third of the Ukrainian Soviet Republic, comprising a population of over seven million.

It is this that explains the importance of the Makhnovists. As historian Christopher Reed notes, the “*Bolsheviks’ main claim to legitimacy rested on the argument that they were the only ones capable of preventing a similar disaster [counter-revolution] for the workers and peasants of Russia and that their harsh methods were necessary in the face of a ruthless and unrelenting enemy.*” However, Reed argues that “*the Makhno movement in the Ukraine suggests that there was more than one way to fight against the counter-revolution.*” [From **Tsar to Soviets**, pp. 258–9] This is why the Makhnovist movement is so important, why it shows that there was, and is, an alternative to the ideas of Bolshevism. Here we have a mass movement operating in the same “*exceptional circumstances*” as the Bolsheviks which did **not** implement the same policies. Indeed, rather than suppress soviet, workplace and military democracy in favour of centralised, top-down party power and modify their political line to justify their implementation of party dictatorship, the Makhnovists did all they could to implement and encourage working-class self-government.

As such, it is difficult to blame the development of Bolshevik policies towards state-capitalist and party-dictatorship directions on the problems caused during the revolution when the Makhnovists, facing similar conditions, did all they could to protect working-class autonomy and freedom. Indeed, it could be argued that the problems facing the Makhnovists were greater in many ways. The Ukraine probably saw more fighting in the Russian Civil War than any other area. Unlike the Bolsheviks, the Makhnovists lost the centre of their movement and had to re-liberate it. To do so they fought the Austrian and German armies, Ukrainian Nationalists, Bolsheviks and the White Armies of Denikin and then Wrangel. There were smaller skirmishes involving Cossacks returning to the Don and independent “*Green*” bands. The anarchists fought all these various armies over the four years their movement was in existence. This war was not only bloody but saw constant shifts of fronts, advances and retreats and changes from near conventional war to mobile partisan war. The consequences of this was that no area of the territory was a safe “*rear*” area for any period of time and so little constructive activity was possible. Section 4 presents a summary of the military campaigns of these years. A brief idea of

the depth of fighting in these years can be seen by considering the town at the centre of the Makhnovists, Hulyai Pole which changed hands no less than 16 times in the period from 1917–1921.

Clearly, in terms of conflict (and the resulting disruption caused by it), the Makhnovists did not have the relative peace the Bolsheviks had (who never once lost their main bases of Petrograd or Moscow, although they came close). As such, the problems used to justify the repressive and dictatorial policies of the Bolsheviks also apply to the Makhnovists. Despite this, the activity of the Makhnovists in the Ukraine demonstrated that an alternative to the supposedly necessary methods of the Bolsheviks did exist. Where the Bolsheviks suppressed freedom of speech, assembly and press, the Makhnovists encouraged it. Where the Bolsheviks turned the soviets into mere cyphers of their government and undermined soviet power, the Makhnovists encouraged working-class participation and free soviets. As we discuss in section 7, the Makhnovists applied their ideas of working class self-management whenever and wherever they could.

Sadly, the Makhnovist movement is a relatively unknown event during the revolution. There are few non-anarchist accounts of it and the few histories which do mention it often simply slander it. However, as the Cohn-Bendit brothers correctly argue, the movement, “*better perhaps than any other movement, shows that the Russian Revolution could have been a great liberating force.*” Equally, the reason why it has been almost totally ignored (or slandered, when mentioned) by Stalinist and Trotskyist writers is simple: “*It shows the Bolsheviks stifling workers and peasants with lies and calumnies, and then crushing them in a bloody massacre.*” [Daniel and Gabriel Cohn-Bendit, **Obsolete Communism: The Left-Wing Alternative**, p. 200]

This section of our FAQ will indicate the nature and history of this important social movement. As we will prove, “*the Makhnovshchina . . . was a true popular movement of peasants and workers, and . . . its essential goal was to establish the freedom of workers by means of revolutionary self-activity on the part of the masses.*” [Arshinov, **The History of the Makhnovist Movement**, p. 209] They achieved this goal in extremely difficult circumstances and resisted all attempts to limit the freedom of the working class, no matter where it came from. As Makhno himself once noted:

“Our practice in the Ukraine showed clearly that the peasant problem had very different solutions from those imposed by Bolshevism. If our experience had spread to the rest of Russia, a pernicious division between country and city would not have been created. Years of famine would have been avoided and useless struggles between peasant and workers. And what is more important, the revolution would have grown and developed along very different lines . . . We were all fighters and workers. The popular assembly made the decisions. In military life it was the War Committee composed of delegates of all the guerrilla detachments which acted. To sum up, everyone took part in the collective work, to prevent the birth of a managing class which would monopolise power. And we were successful. Because we had succeeded and gave lie to Bolshevik bureaucratic practices, Trotsky, betraying the treaty between the Ukraine and the Bolshevik authorities, sent the Red Army to fight us. Bolshevism triumphed militarily over the Ukraine and at Kronstadt, but revolutionary his-

tory will acclaim us one day and condemn the victors as counter-revolutionary grave-diggers of the Russian Revolution.” [quoted by Abel Paz, **Durruti: The People Armed**, p. 88–9]

Two distinct aspects of the anarchist movement existed in the Ukraine at this time, a political and non-military structure called the Nabat (Alarm) federation which operated through the soviets and collectives and a military command structure usually known after its commander Nestor Makhno as the ***Makhnovshchina*** (which means the “*Makhno movement*”) although its proper name was the ***Revolutionary Insurgent Army of the Ukraine***. This section of the FAQ will cover both, although the Makhnovshchina will be the main focus.

For more information on the Makhnovist movement, consult the following books. Anarchist accounts of the movement can be found in Peter Arshinov’s excellent **The History of the Makhnovist Movement** and Voline’s **The Unknown Revolution** (Voline’s work is based on extensive quotes from Arshinov’s work, but does contain useful additional material). For non-anarchist accounts, Michael Malet’s **Nestor Makhno in the Russian Revolution** is essential reading as it contains useful information on both the history of the movement, its social basis and political ideas. Malet considers his work as a supplement to Michael Palij’s **The Anarchism of Nestor Makhno, 1918–1921** which is primarily a military account of the movement but which does cover some of its social and political aspects. Unfortunately, both books are rare. Paul Avrich’s **The Russian Anarchists** contains a short account of the movement and his **Anarchist Portraits** has a chapter on Nestor Makhno. Makhnovist source material is included in Avrich’s **The Anarchists in the Russian Revolution**. Daniel Guerin includes a section on Makhno and the Makhnovist Movement in volume 2 of **No Gods, No Masters**. As well as extracts from Arshinov’s book, it has various manifestos from the movement as well as Makhno’s account of his meeting with Lenin. Christopher Read’s **From Tsar to Soviets** has an excellent section on the Makhnovists. Serge Cipko presents an excellent overview of works on the Makhnovists in his “*Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921*” (**The Raven**, no. 13). Alexander Skirda presents an overview of perestroika soviet accounts of Makhno in his essay “*The Rehabilitation of Makhno*” (**The Raven**, no. 8). Skirda’s biography **Nestor Makhno: Le Cosaque de l’anarchie** is by far the best account of the movement available.

Lastly, a few words on names. There is a large variation on the spelling of names within the source material. For example, Makhno’s home town has been translated as Gulyai Pole, Gulyai Polye Huliai-Pole and Hulyai Pole. Similarly, with other place names. The bandit Grigor’ev has been also translated as Hryhor’iv and Hryhoriyiv. We generally take Michael Malet’s translations of names as a basis (i.e. we use Hulyai Pole and Hryhoriyiv, for example).

1 Who was Nestor Makhno?

The Makhnovist movement was named after Nestor Makhno, a Ukrainian anarchist who played a key role in the movement from the start. Indeed, Makhnovshchina literally means “*Makhno movement*” and his name is forever linked with the revolution in the South-East of the Ukraine. So who was Makhno?

Nestor Ivanovich Makhno was born on the 27th of October, 1889 in Hulyai Pole, which is situated in Katerynoslav province, in the south east of the Ukraine between the Dnieper River and the Sea of Azov. While it seems to be conventional for many historians to call Hulyai Pole a “village,” it was in fact a town with a population of about 30,000 and boasted several factories and schools.

Makhno was the son of a poor peasant family. His father died when he was ten months old, leaving him and his four brothers in the care of their mother. Due to the extreme poverty of his family, he had to start work as a shepherd at the age of seven. At eight he started to attend the Second Hulyai Pole primary school in winter and worked for local landlords during the summer. He left school when he was twelve and took up full-time employment as a farmhand on the estates of nobles and on the farms of the German colonist **kulaks**. At the age of seventeen, he started to work in Hulyai Pole itself, first as an apprentice painter, then as an unskilled worker in a local iron foundry and, finally, as a founder in the same establishment.

It was when he was working in the iron foundry that he became involved in revolutionary politics. In the stormy years following the 1905 revolution, Makhno got involved in revolutionary politics. This decision was based on his experiences of injustice at work and seeing the terror of the Russian regime during the 1905 events (in Hulyai Pole there had been no serious disorder, yet the regime sent a detachment of mounted police to suppress gatherings and meetings in the town, terrorising the population by whipping those caught in the streets and beating prisoners with rifle butts). In 1906, Makhno decided to join the anarchist group in Hulyai Pole (which had been formed the previous year and consisted mainly of sons of poorer peasants).

At the end of 1906 and in 1907, Makhno was arrested and accused of political assassinations, but was released due to lack of evidence. In 1908, due to the denunciation of a police spy within the anarchist group, he was arrested and put in jail. In March, 1910, Makhno and thirteen others were tried by a military court and sentenced to death by hanging. Due to his youth and the efforts of his mother, the death penalty was commuted to life imprisonment with hard labour. He served his time at the Butyrki prison in Moscow, resisting the prison authorities by every means available to him. Due to this resistance, he spent much of his time in chains or in damp and freezing confinement. This experience ensured that Makhno developed an intense hatred of prisons (later, during the revolution, his first act in entering a town or city was to release all prisoners and destroy the prison).

It was during his time in Butyrki that Makhno met Peter Arshinov, a fellow anarchist prisoner and later activist and historian of the Makhnovist movement. Arshinov was born in 1887 in the Ukrainian industrial town of Katerinoslav. His father was a factory worker and he was a metal worker. Originally a Bolshevik, he had become an anarchist in 1906, taking a leading part in organising factory workers and actions against the regime. In 1907 he was arrested and sentenced to death, escaping to Western Europe. In 1909, he returned to Russia and was again arrested and again escaped. In 1910, he was arrested and placed in the Butyrki prison where he met Makhno. The two anarchists established a close personal and political friendship, with Arshinov helping Makhno develop and deepen his anarchist ideas.

On March 2nd, 1917, after eight years and eight months in prison, Makhno was released along with all other political prisoners as a result of the February

Revolution. After spending three weeks in Moscow with the Moscow anarchists, Makhno returned to Hulyai Pole. As the only political prisoner who was returned to his family by the revolution, Makhno became very well-respected in his home town. After years of imprisonment, suffering but learning, Makhno was no longer an inexperienced young activist, but a tested anarchist militant with both a powerful will and strong ideas about social conflict and revolutionary politics. Ideas which he immediately set about applying.

Once home in Hulyai Pole, Makhno immediately devoted himself to revolutionary work. Unsurprisingly, the remaining members of the anarchist group, as well as many peasants, came to visit him. After discussing ideas with them, Makhno proposed beginning organisational work immediately in order to strengthen links between the peasants in Hulyai Pole and its region with the anarchist group. On March 28–29, a Peasant Union was created with Makhno as its chairman. Subsequently, he organised similar unions in other villages and towns in the area. Makhno also played a large part in a successful strike by wood and metal workers at a factory owned by his old boss (this defeat led to the other bosses capitulating to the workers as well). At the same time, peasants refused to pay their rent to the landlords. [Michael Malet, **Nestor Makhno in the Russian Civil War**, p. 4] Regional assemblies of peasants were called, both at Hulyai Pole and elsewhere, and on August 5–7, the provincial congress at Katerinoslav decided to reorganise the Peasant Unions into Soviets of Peasants' and Workers' Deputies.

In this way, *“Makhno and his associates brought socio-political issues into the daily life of the people, who in turn supported his efforts, hoping to expedite the expropriation of large estates.”* [Michael Palij, **The Anarchism of Nestor Makhno**, p. 71] In Hulyai Pole, the revolution was moving faster than elsewhere (for example, while the Aleksandrovsk soviet supported the actions of the Provisional Government during the July days in Petrograd, a meeting in Hulyai Pole saluted the rebellious soldiers and workers). Peasants were drawn to Hulyai Pole for advice and help from the neighbouring **volosts** (administrative districts). The peasantry wanted to seize the land of the large landowners and the kulaks (rich peasants). Makhno presented this demand at the first sessions of the regional Soviet, which were held in Hulyai Pole. In August, Makhno called all the local landlords and rich peasants (kulaks) together and all documents concerning ownership (of land, livestock and equipment) were taken from them. An inventory of this property was taken and reported to the session of the local soviet and then at a regional meeting. It was agreed that all land, livestock and equipment was to be divided equally, the division to include the former owners. This was the core of the agrarian program of the movement, namely the liquidation of the property of the landowners and kulaks. No-one could own more land than they could work with their own labour. All this was in flat defiance to the Provisional Government which was insisting that all such questions be left to the Constituent Assembly. Free communes were also created on ex-landlord estates.

Unsurprisingly, the implementation of these decisions was delayed because of the opposition of the landlords and kulaks, who organised themselves and appealed to the provisional authorities. When General Kornilov tried to march on Petrograd and take power, the Hulyai Pole soviet took the initiative and formed a local *“Committee for the Salvation of the Revolution”* headed by Makhno. The real aim was to disarm the potential local enemy — the landlords, bour-

geoisie, and kulaks — as well as to expropriate their ownership of the people's wealth: the land, factories, plants, printing shops, theatres and so on. On 25 September a volost congress of Soviets and peasant organisations in Hulyai Pole proclaimed the confiscation of the landowners' land and its transformation into social property. Raids on the estates of landlords and rich peasants, including German colonists, began and the expropriation of the expropriators began.

Makhno's activities came to a halt the following spring when Lenin's government signed the Treaty of Brest-Litovsk. This treaty gave sizeable parts of the Russian Empire, including the Ukraine, to Germany and Austria in return for peace. The Treaty also saw the invasion of the Ukraine by large numbers of German and Austrian troops, who conquered the entire country in less than three months. Makhno succeeded in forming several military units, consisting of 1700 men, but could not stop Hulyai Pole being taken. After an anarchist congress at the end of April in Taganrog, it was decided to organise small combat units of five to ten peasants and workers, to collect arms from the enemy and to prepare for a general peasant uprising against the Austro-German troops and, finally, to send a small group to Soviet Russia to see at first hand what was happening there to both the revolution and to the anarchists under Bolshevik rule. Makhno was part of that group.

By June, Makhno had arrived in Moscow. He immediately visited a number of Russian anarchists (including his old friend Peter Arshinov). The anarchist movement in Moscow was cowed, due to a Cheka raid in April which broke the backbone of the movement, so ending a political threat to the Bolsheviks from the left. To Makhno, coming from an area where freedom of speech and organisation was taken for granted, the low level of activity came as a shock. He regarded Moscow as the capital of the "*paper revolution*," whose red tape and meaninglessness had affected even the anarchists. Makhno also visited Peter Kropotkin, asking his advice on revolutionary work and the situation in the Ukraine. To Makhno, "*Moscow appeared as 'the capital of the Paper Revolution,' a vast factory turning out empty resolutions and slogans while one political party, by means of force and fraud, elevated itself into the position of a ruling class.*" [David Footman, **Op. Cit.**, p. 252]

While in Moscow, Makhno met with Lenin. This meeting came about by chance. Visiting the Kremlin to obtain a permit for free board and lodging, he met the chairman of the All-Russian Central Executive Committee of the Soviets, Jakov M. Sverdlov, who arranged for Makhno to meet Lenin. Lenin asked Makhno, "*How did the peasants of your region understand the slogan ALL POWER TO THE SOVIETS IN THE VILLAGES?*" Makhno states that Lenin "*was astonished*" at his reply:

"The peasants understood this slogan in their own way. According to their interpretation, all power, in all areas of life, must be identified with the consciousness and will of the working people. The peasants understand that the soviets of workers and peasants of village, country and district are neither more nor less than the means of revolutionary organisation and economic self-management of working people in the struggle against the bourgeoisie and its lackeys, the Right socialists and their coalition government."

To this Lenin replied: "*Well, then, the peasants of your region are infected with anarchism!*" [Nestor Makhno, **My Visit to the Kremlin**, p. 18] Later

in the interview, Lenin stated: “Do the anarchists ever recognise their lack of realism in present-day life? Why, they don’t even think of it.” Makhno replied:

“But I must tell you, comrade Lenin, that your assertion that the anarchists don’t understand ‘the present’ realistically, that they have no real connection with it and so forth, is fundamentally mistaken. The anarchist-communists in the Ukraine . . . the anarchist-communists, I say, have already given many proofs that they are firmly planted in ‘the present.’ The whole struggle of the revolutionary Ukrainian countryside against the Central Rada has been carried out under the ideological guidance of the anarchist-communists and also in part by the Socialist Revolutionaries . . . Your Bolsheviks have scarcely any presence in our villages. Where they have penetrated, their influence is minimal. Almost all the communes or peasant associations in the Ukraine were formed at the instigation of the anarchist-communists. The armed struggle of the working people against the counter-revolution in general and the Austro-German invasion in particular has been undertaken with the ideological and organic guidance of the anarchist-communists exclusively.

“Certainly it is not in your party’s interest to give us credit for all this, but these are the facts and you can’t dispute them. You know perfectly well, I assume, the effective force and the fighting capacity of the free, revolutionary forces of the Ukraine. It is not without reason that you have evoked the courage with which they have heroically defended the common revolutionary conquests. Among them, at least one half have fought under the anarchist banner. . .

“All this shows how mistaken you are, comrade Lenin, in alleging that we, the anarchist-communists, don’t have our feet on the ground, that our attitude towards ‘the present’ is deplorable and that we are too fond of dreaming about the future. What I have said to you in the course of this interview cannot be questioned because it is the truth. The account which I have made to you contradicts the conclusions you expressed about us. Everyone can see we are firmly planted in ‘the present,’ that we are working and searching for the means to bring about the future we desire, and that we are in fact dealing very seriously with this problem.”

Lenin replied: “Perhaps I am mistaken.” [Makhno, **Op. Cit.**, pp. 24–5]

The Bolsheviks helped Makhno to return to the Ukraine. The trip was accomplished with great difficulty. Once Makhno was almost killed. He was arrested by Austro-German troops and was carrying libertarian pamphlets at the time. A Jewish inhabitant of Hulyai Pole, who had know Makhno for some time, succeeded in saving him by paying a considerable sum of money for his liberation. Once back in Hulyai-Pole, he started to organise resistance to the occupying forces of the Austro-Germans and their puppet regime led by Hetman Skoropadsky. With the resistance, the Makhno movement can be said to have arisen (see section 3 on way it was named after Makhno). From July 1918 to August 1921, Makhno led the struggle for working class freedom against all oppressors, whether Bolshevik, White or Nationalist. During the course of this struggle, he proved himself to be “a guerrilla leader of quite outstanding ability.”

[David Footman, **Civil War in Russia**, p. 245] The military history of this movement is discussed in section 4, while other aspects of the movement are discussed in other sections.

After the defeat of the Makhnovist movement in 1921, Makhno was exiled in Western Europe. In 1925 he ended up in Paris, where he lived for the rest of his life. While there, he remained active in the anarchist movement, with the pen replacing the sabre (to use Alexander Skirda's colourful expression). Makhno contributed articles to various anarchist journals and in particular to **Delo Truda**, an anarchist-communist paper started in Paris by Peter Arshinov (many of these articles have been published in the book **The Struggle Against the State and Other Essays**). He remained active in the anarchist movement to the end.

In Paris, Makhno met the famous Spanish anarchists Buenaventura Durruti and Francisco Ascaso in 1927. He argued that in Spain "*conditions for a revolution with a strong anarchist content are better than in Russia*" because not only was there "*a proletariat and a peasantry with a revolutionary tradition whose political maturity is shown in its reactions,*" the Spanish anarchists had "*a sense of organisation which we lacked in Russia. It is organisation which assures the success in depth of all revolutions.*" Makhno recounted the activities of the Hulyai Pole anarchist group and the events in revolutionary Ukraine:

"Our agrarian commune was at once the economic and political vital centre of our social system. These communities were not based on individual egoism but rested on principles of communal, local and regional solidarity. In the same way that the members of a community felt solidarity among themselves, the communities were federated with each other . . . It is said against our system that in the Ukraine, that it was able to last because it was based only on peasant foundations. It isn't true. Our communities were mixed, agricultural-industrial, and, even, some of them were only industrial. We were all fighters and workers. The popular assembly made the decisions. In military life it was the War Committee composed of delegates of all the guerrilla detachments which acted. To sum up, everyone took part in the collective work, to prevent the birth of a managing class which would monopolise power. And we were successful." [quoted by Abel Paz, **Durruti: The People Armed**, p. 88–9]

As can be seen from the social revolution in Aragon, Durruti took Makhno's advice seriously (see section I.8 for more on the Spanish Revolution). Unsurprisingly, in 1936 a number of veterans of Makhno's Insurgent Army went to fight in the Durruti column. Sadly, Makhno's death in 1934 prevented his own concluding statement to the two Spaniards: "*Makhno has never refused to fight. If I am alive when you start your struggle, I will be with you.*" [quoted by Paz, **Op. Cit.**, p. 90]

Makhno's most famous activity in exile was his association with, and defence of, the **Organisational Platform of the Libertarian Communists** (known as the "*Platform*"). As discussed in section J.3.3, the Platform was an attempt to analyse what had gone wrong in the Russian Revolution and suggested a much tighter anarchist organisation in future. This idea provoked intense debate after its publication, with the majority of anarchists rejecting

it (for Makhno's discussion with Malatesta on this issue, see **The Anarchist Revolution** published by Freedom Press). This debate often resulted in bitter polemics and left Makhno somewhat isolated as some of his friends, like Voline, opposed the Platform. However, he remained an anarchist to his death in 1934.

Makhno died on the morning of July 25th and was cremated three days later and his ashes placed in an urn within Pere Lachaise, the cemetery of the Paris Commune. Five hundred Russian, French, Spanish and Italian comrades attended the funeral, at which the French anarchist Benar and Voline spoke (Voline used the occasion to refute Bolshevik allegations of anti-Semitism). Makhno's wife, Halyna, was too overcome to speak.

So ended the life of one great fighters for working-class freedom. Little wonder Durruti's words to Makhno:

"We have come to salute you, the symbol of all those revolutionaries who struggled for the realisation of Anarchist ideas in Russia. We also come to pay our respects to the rich experience of the Ukraine."
[quoted by Abel Paz, **Op. Cit.**, p. 88]

For fuller details of Makhno's life, see the accounts by Peter Arshinov (**The History of the Makhnovist Movement**), Paul Avrich ("*Nestor Makhno: The Man and the Myth*," in **Anarchist Portraits**), Michael Paliy, (**The Anarchism of Nestor Makhno**) and Michael Malet (**Nestor Makhno in the Russian Revolution**).

2 Why was the movement named after Makhno?

Officially, the Makhnovist movement was called the **Revolutionary Insurrectionary Army of the Ukraine**. In practice, it was usually called the "*Makhno movement*" ("**Makhnovshchina**" in Russian) or the Makhnovists. Unsurprisingly, Trotsky placed great significance on this:

"The anti-popular character of the Makhno movement is most clearly revealed in the fact that the army of Hulyai Pole is actually called 'Makhno's Army'. There, armed men are united not around a programme, not around an ideological banner, but around a man." [The Makhno Movement]

Ignoring the irony of a self-proclaimed Marxist (and later Leninist and founder of Trotskyism!) making such a comment, we can only indicate why the Makhnovists called themselves by that name:

"Because, first, in the terrible days of reaction in the Ukraine, we saw in our ranks an unfailing friend and leader, MAKHNO, whose voice of protest against any kind of coercion of the working people rang out in all the Ukraine, calling for a battle against all oppressors, pillagers and political charlatans who betray us; and who is now marching together with us in our common ranks unwavering toward the final goal: liberation of the working people from any kind of oppression." [contained in Arshinov, **Op. Cit.**, p. 272]

The two of the anarchists who took part in the movement and later wrote its history concur. Voline argues that the reason why the movement was known as the “Makhnovist movement” was because the “most important role in this work of unification [of the peasant masses] and in the general development of the revolutionary insurrection in the southern Ukraine was performed by the detachment of partisans guided by a peasant native to the region: Nestor Makhno.” [The Unknown Revolution, p. 551] “From the first days of the movement,” Arshinov notes, “up to its culminating point, when the peasants vanquished the landowners, Makhno played a preponderant and central role to such an extent that the whole insurgent region and the most heroic moments of the struggle are linked to his name. Later, when the insurrection had triumphed completely over the Skoropadsky counter-revolution and the region was threatened by Denikin, Makhno became the rallying point for millions of peasants in several regions.” [Op. Cit., p. 50]

It must be stressed that Nestor Makhno was not the boss of the Makhnovista. He was not their ruler or general. As such, the fact that the Makhnovists were (unofficially) named after Makhno does not imply that it was his personal fiefdom, nor that those involved followed him as an individual. Rather, the movement was named after him because he was universally respected within it as a leading militant. This fact also explains why Makhno was nicknamed “Batko” (see next section).

This can be seen from how the movement was organised and was run. As we discuss in section 5, it was organised in a fundamentally democratic way, by means of mass assemblies of insurgents, elected officers, regular insurgent, peasant and worker congresses and an elected “Revolutionary Military Soviet.” The driving force in the Makhnovist movement was not, therefore, Makhno but rather the anarchist ideas of self-management. As Trotsky himself was aware, the Makhnovists were influenced by anarchist ideas:

“Makhno and his companions-in-arms are not non-party people at all. They are all of the Anarchist persuasion, and send out circulars and letters summoning Anarchists to Hulyai Pole so as to organise their own Anarchist power there.” [Trotsky, Op. Cit.]

As part of this support for anarchist theory, the Makhnovists organised insurgent, peasant and worker conferences to discuss key issues in the revolution and the activities of the Makhno movement itself. Three such conferences had been before Trotsky wrote his diatribe **The Makhno Movement** on June 2nd, 1919. A fourth one was called for June 15th, which Trotsky promptly banned (on pain of death) on June 4th (see section 13 for full details). Unlike the Bolshevik dictatorship, the Makhnovists took every possibility of ensuring the participation of the working people they were fighting for in the revolution. The calling of congresses by the Makhnovists shows clearly that the movement did not, as Trotsky asserted, follow a man, but rather ideas.

As Voline argued, “the movement would have existed without Makhno, since the living forces, the living masses who created and developed the movement, and who brought Makhno forward merely as their talented military leader, would have existed without Makhno.” Ultimately, the term “Makhnovshchina” is used “to describe a unique, completely original and independent revolutionary movement of the working class which gradually becomes conscious of itself and steps out

on the broad arena of historical activity.” [“preface,” Arshinov, *Op. Cit.*, p. 19]

3 Why was Makhno called “*Batko*”?

Nestor Makhno was often called in the movement “*Batko*”, which is Ukrainian for “*father*.” Peter Arshinov explains how and in what circumstances Makhno was given this name:

*“It was . . . in September 1918, that Makhno received the nickname **Batko** — general leader of the revolutionary insurrection in the Ukraine. This took place in the following circumstances. Local **pomeshchiks** [landed gentry] in the major centres, the **kulaks** [rich peasants], and the German authorities [the Ukraine being occupied by them at the time], decided to eliminate Makhno and his detachment [of partisans] at any cost. The **pomeshchiks** created a special volunteer detachment consisting of their own sons and those of **kulaks** for the decisive struggle against Makhno. On the 30th of September this detachment, with the help of the Austro-Germans, cornered Makhno in the region of Bol’shaya Mihhailovka, setting up strong military posts on all roads. At this time Makhno found himself with only 30 partisans and one machine gun. He was forced to make a fighting retreat, manoeuvring in the midst of numerous enemy forces. Arriving in the forest of Dibriivki, Makhno found himself in an extremely difficult situation. The paths of retreat were occupied by the enemy. It was impossible for the detachment to break through, and escaping individually was beneath their revolutionary dignity. No one in the detachment would agree to abandon their leader so as to save himself. After some reflection, two days later, Makhno decided to return to the village of Bol’shaya Mikhailovka (Dibriivki). Leaving the forest the partisans met peasants who came to warn them that there were large enemy forces in Dibriivki and that they should make haste to go elsewhere. This information did not stop Makhno and his partisans . . . [and] they set out for Bol’shaya Mikhailovka. They approached the village guardedly. Makhno himself and a few of his comrades went on reconnaissance and saw a large enemy camp on the church square, dozens of machine guns, hundreds of saddle horses, and groups of cavalry. Peasants informed them that a battalion of Austrians and a special **pomeshchik** detachment were in the village. Retreat was impossible. Then Makhno, with his usual stubbornness and determination, said to his companions: ‘Well, my friends! We should all be ready to die on this spot . . .’ The movement was ominous, the men were firm and full of enthusiasm. All 30 saw only one path before them — the path toward the enemy, who had about a thousand well-armed men, and they all realised that this meant certain death for them. All were moved, but none lost courage.*

“It was at this movement that one of the partisans, Shchus’, turned to Makhno and said:

“From now on you will be **Batko** to all of us, and we vow to die with you in the ranks of the insurgents.’

“Then the whole detachment swore never to abandon the insurgent ranks, and to consider Makhno the general **Batko** of the entire revolutionary insurrection. Then they prepared to attack. Shchus’ with five to seven men was assigned to attack the flank of the enemy. Makhno with the others attacked from the front. With a ferocious ‘Hurrah!’ the partisans threw themselves headlong against the enemy, smiting the very centre with sabres, rifles and revolvers. The attack had a shattering effect. The enemy, who were expecting nothing of the kind, were bowled over and began to flee in panic, saving themselves in groups and individually, abandoning arms, machine guns and horses. Without leaving them time to come to themselves, to become aware of the number of attacking forces, and to pass to a counter-attack, the insurgents chased them in separate groups, cutting them down in full gallop. A part of the **pomeshchik** detachment fled to the Volchya River, where they were drowned by peasants who had joined the battle. The enemy’s defeat was complete.

“Local peasants and detachments of revolutionary insurgents came from all directions to triumphantly acclaim the heroes. They unanimously agreed to consider Makhno as **Batko** of the entire revolutionary insurrection in the Ukraine.” [Arshinov, **Op. Cit.**, pp. 59–60]

This was how Makhno acquired the nickname “*Batko*,” which stuck to him thereafter.

It should be stressed that “*Batko*” was a nickname and did not signify any form of autocratic or hierarchical position within the movement:

“During the civil war, it signified the leadership and control of a specific area and its population in both civil and military fields. The central point of the use of the word, rather than ‘leader’ or ‘dictator’ is that the leadership is usually based on respect, as in Makhno’s case, and always on intimate knowledge of the home territory.” [Michael Malet, **Op. Cit.**, p. 17]

That this was a nickname can be seen from the fact that “[a]fter 1920 he was usually called ‘*Malyi*’ (‘*Shorty*’), a nickname referring to his short stature, which was introduced by chance by one of the insurgents.” [Peter Arshinov, **Op. Cit.**, p. 226] To attach significance to the fact that the peasants called Makhno “*Batko*” (as the Bolsheviks did) simply signifies an ignorance of the Makhnovist movement and its social environment.

4 Can you give a short overview of the Makhnovist movement?

This section of the FAQ gives a short overview of the Makhnovists from July 1918 (when Makhno returned to the Ukraine) and August 1921, when it was finally defeated by Bolshevik armed force. It will be primarily a military history,

with the socio-political aspects of the movement discussed in sections 6 (its theory) and 7 (its practice). For details of the rise of influence of Makhno after his release from prison in 1917, see section 1.

The history of the Makhno movement can be broken up into roughly four periods — from July 1918 to February 1919, then the rest of 1919, then January to October 1920 and, finally, from October 1920 to August 1921. This section will give an overview of each period in turn.

By the time Makhno arrived back in the Ukraine in July, 1918, opposition to the German-backed Hetman's regime was mounting and was frequently met with brutal repression, including reprisal executions. Makhno was forced to live underground and on the move, secretly meeting with others, with the Austrians always close behind. Voline recounts Makhno's activities at this time:

“Back in Hulyai Pole, Makhno came to the decision to die or obtain victory for the peasants . . . He did not delay starting his mission openly among the great masses of peasants, speaking at improvised meetings, writing and distributing letters and tracts. By pen and mouth, he called on the peasants for a decisive struggle against the power of Skoropadsky and the landlords. He declared tirelessly that the workers should now take their fates into their own hands and not let their freedom to act be taken from them . . .

“Besides his appeals, Makhno proceeded immediately to direct action. His first concern was to form a revolutionary military unit, sufficiently strong to guarantee freedom of propaganda and action in the villages and towns and at the same time to begin guerrilla operations. This unit was quickly organised . . .

“His first unit undertook two urgent tasks, namely, pursuing energetically the work of propaganda and organisation among the peasants and carrying out a stubborn armed struggle against all their enemies. The guiding principle of this merciless struggle was as follows. No lord who persecuted the peasants, no policeman of the Hetman, no Russian or German officer who was an implacable enemy of the peasants, deserved any pity; he must be destroyed. All who participated in the oppression of the poor peasants and workers, all who sought to suppress their rights, to exploit their labour, should be executed.

“Within two or three weeks, the unit had already become the terror, not only of the local bourgeoisie, but also of the Austro-German authorities.” [The Unknown Revolution, p. 558]

The night of 26 September saw Hulyai Pole briefly liberated from Hetman and Austrian troops by the actions of Makhno's troops in association with local people. On the retreat from this Makhno's small band grew when he met the partisan troops headed by Schus. When the Austrians cornered them, they launched a surprise counter attack and routed the opposition. This became known as the battle of Dibrivki and it is from this date, 5 October 1918 that Makhno is given the nickname 'Batko', meaning “father” (see section 3 for details). For the next two months already-existing partisan groups sought out and joined the growing army.

In this period, Makhno, with portable printing equipment, was raiding the occupying garrisons and troop trains in the Southern Ukraine. Normal practice was to execute the officers and free the troops. In this period the moral of the occupying troops had crumbled and revolutionary propaganda had made inroads into many units. This was also affecting the nationalist troops and on 20 November the first nationalist unit defected to the Makhnovists. This encouraged them to return to Hulyai Pole on 27 December and there the insurrectionary Staff was formed, this body was to lead the army in the coming years and consisted initially of four old and trusted friends and three political comrades. The Makhnovist presence allowed the setting up of a local soviet and the re-opening of the anarchist clubs. German forces started pulling back to the major cities and on December 14 the Hetman fled Kiyiv. In the resulting vacuum, the Makhnovists rapidly expanded taking in most of the South East Ukraine and setting up fronts against local whites. The Ukrainian nationalists had taken power in the rest of the Ukraine under Petliura and on the 15th December the Makhnovists agreed to make common cause with them against the Whites. In return for arms and ammunition they allowed the nationalists to mobilise in the Makhnovist area (while engaging in propaganda directed at the mobilised troops on their way by train to Katerynoslav).

This was a temporary and pragmatic arrangement directed against the greater enemy of the Whites. However, the nationalists were no friends of working-class autonomy. The nationalists banned elections to the Katerynoslav soviet on 6th of December and the provincial soviet at Kharkiv meet with a similar fate on the 22nd. [Malet, **Op. Cit.**, p. 22] At the same time as their agreement with the nationalists, the Makhnovists had set up links with Bolshevik partisans to the south and before dawn on the 26th the Bolshevik and Makhnovist forces launched a joint attack on the nationalists at Katerynoslav. The city was taken but held only briefly when a nationalist attack on the 29th drove out all the insurgent forces with heavy losses. In the south, White reinforcements led to the insurgents being pushed North and losing Hulyai Pole.

1919 opened with the Makhnovists organising a congress of front-unit delegates to discuss the progress of the struggle. Over forty delegates attended and a committee of five was elected, along with an operational staff to take charge of the southern front and its rear. It was agreed that local soviets were to be supported in every way, with no military violence directed towards them permitted. [Malet, **Op. Cit.**, p. 25]

By the end of January, white reinforcements were landing in the ports of the south. On January 22nd, a worker, peasant and insurgent congress was held at Velyka Mykhailivka. A resolution was passed urging an end to conflict between Makhnovists, Nationalists and Bolsheviks. An alliance was signed between the Makhnovists and the Bolsheviks in early February. This agreement ensured that the Partisan units entered the Red Army as distinct formations, with their internal organisation (including the election of commanders) intact, and the Red Army in the area formed a brigade to be known as "*the third Transdnieper Batko Makhno brigade*" with Makhno as commander. The Whites were repulsed and Hulyai Pole retaken and the front pushed some distance eastwards.

Thus the military situation had improved by the time of the second worker, peasant and insurgent congress held at Hulyai Pole on February 12th. This congress set up a "*Revolutionary Military Soviet*" to co-ordinate civilian affairs and execute its decisions. The congress resolved that "*the land belongs to no-*

body” and should be cultivated without the use of hired labour. It also accepted a resolution opposing anti-Jewish pogroms. Also passed was a resolution which sharply attacked the Bolsheviks, caused by their behaviour since their arrival in the Ukraine. [Palij, **Op. Cit.**, pp. 154–5] A report by the commander of the 2nd Red Army, Skatchco, indicates the nature of this behaviour:

“Little local Chekas are undertaking a relentless campaign against the Makhnovists, even when they are shedding their blood at the front. They are hunting them down from the rear and persecuting them solely for belonging to the Makhnovist movement . . . It cannot continue like this: the activity of the local Chekas is deliberately ruining the front, reducing all military successes to nothing, and contributing to the creation of a counter-revolution that neither Denikin nor Krasnov [Hetman of the Don Cossacks] could have achieved. . . ” [quoted by Alexander Skirda, **The Rehabilitation of Makhno**, p. 346]

Unsurprisingly, the peasants reacted strongly to the Bolshevik regime. Their *“agricultural policy and terrorism”* ensured that *“by the middle of 1919, all peasants, rich and poor, distrusted the Bolsheviks.”* [Palij, **Op. Cit.**, p. 156] In April alone, there were 93 separate armed rebellions against the Bolsheviks in the Ukraine. The *“more oppressive the Bolshevik policy, the more the peasants supported Makhno. Consequently, the Bolsheviks began to organise more systematically against the Makhno movement, both as an ideology and as a social movement.”* [Palij, **Op. Cit.**, p. 157]

In mid-March the Red Army attacked eastwards. In the course of this Dybenko, commander of the Trandneiper division, recommended one of Makhno’s commanders for a medal. Then the Makhnovists attacked the Donbas (east) to relieve the pressure on the Soviet 8th Army caused by a White advance. They took Mariupol following a White incursion at the beginning of April. A White counter-offensive resulted in the Red 9th division panicking, allowing the Whites into Makhno’s rear. Red Commander Dybenko refused orders to come to the Makhnovists aid as he was more interested in the Crimea (south). [Malet, **Op. Cit.**, p. 31]

This period saw the most sustained freedom for the region around Hulyai Pole. It had been free of enemy occupation since January, allowing constructive activity to restart. The inhabitants of the free region *“created new forms of social organisation: free workers’ communes and Soviets.”* [Voline, **Op. Cit.**, p. 574] The Revolutionary Military Soviet (RMS) called a third regional worker, peasant and insurgent congresses had on April 10th to review progress and to look forward. This was the largest congress to date, with delegates from 72 volosts containing two million people. The Bolshevik military commander Dybenko tried to ban it. The Makhnovists, needless to say, ignored him and the RMS made a famous reply to his arrogance (see section 13 for more details).

It was during this period (late 1918 and early 1919), that the **Nabat** anarchist federation was organised. *“Anarchist influence was reported from Aleksandrovsk and other centres,”* notes David Footman, *“Anarchists were holding a conference in Kursk at about the same time and in one of their resolutions it was stated that ‘the Ukrainian Revolution will have great chances of rapidly becoming Anarchist in its ideas.’ The position called for renewed Bolshevik measures against the Anarchists. Nabat, the main Anarchist newspaper in the Ukraine,*

was suppressed, and its editorial board dispersed under threat of arrest.” [Op. Cit., p. 270] Daniel Guerin has reproduced two documents from the Nabat federation in volume II of his **No Gods, No Masters**.

The anarchist influence in and around Hulyai Pole also worried the Bolsheviks. They started a slander campaign against the Makhnovists, to the alarm of Antonov, the overall front commander, who replied in response to an article in Kharkiv Izvestiya:

“The article is the most perverted fiction and does not in the least correspond to the existing situation. The insurgents fighting the whites are on a level with the Red Army men, but are in a far worse condition for supplies.” [quoted by Malet, **Op. Cit.**, p. 33]

In a postscript, Antonov added that the press campaign had certainly helped turn Makhno anti-Soviet (i.e. anti-Bolshevik, as Makhno supported free soviets).

At the beginning of May, another partisan commander, Hryhoriyiv, revolted against the Bolsheviks in the central Ukraine. Hryhoriyiv, like the Makhnovists, had joined with the Bolsheviks when they had re-entered the Ukraine, however his social and political background was totally different. Hryhoriyiv was a former Tsarist officer, who had commanded numerous troops under the Petliurist authority and joined the Bolsheviks once that that regime’s armed forces had disintegrated. Arshinov notes that he had “*never been a revolutionary*” and that there had been a “*great deal of adventurism in his joining the ranks of the Petliurists and then the ranks of the Red Army.*” His temperament was mixed, consisting of “*a certain amount of sympathy for oppressed peasants, authoritarianism, the extravagance of a Cossack chieftain, nationalist sentiments and anti-Semitism.*” [Op. Cit., p. 110]

Hryhoriyov started his revolt by issuing a Universal, or declaration to the Ukrainian people, which contained a virulent attack on the Bolsheviks as well as one explicit anti-Semitic reference, but without mention of Makhno. The height of the revolt was his appearance in the suburbs of Katerynoslav, which he was stopped from taking. He started a pogrom in Yelyzavethrad which claimed three thousand victims.

Once the Makhnovists had been informed of this rebellion, an enlarged staff and RMS meeting was held. A telegram was sent to the soldiers at the front urging them to hold the front and another to the Bolsheviks with a similar message. A few days latter, when more information had been received, a proclamation was issued against Hyyhoriyiv attacking him for seeking to impose a new authority on the working class, for encouraging toiling people to attack each other, and for inciting pogroms. [Arshinov, **Op. Cit.**, p. 112 and pp. 114–7]

While it took a fortnight for Red forces to contain Hryhoriyiv without trouble, this involved using all available reserves of all three Ukrainian armies. This left none for Makhno’s hard-pressed forces at the front. In addition, Dybenko withdrew a front-line regiment from Makhno for use against the revolt and diverted reinforcements from the Crimea which were intended for Makhno. Despite this Makhnos forces (now numbering 20,000) were ordered to resume the attack on the whites. This was due to “*unremitting pressure from Moscow to take Taganrog and Rostov.*” [Malet, **Op. Cit.**, p. 36] The Makhnovist advance stopped due to the non-fulfilment of an urgent order for ammunition.

On the 19th of May, a White counter-attack not only stopped the advance of the Red Army, it forced the 9th division (and then the Makhnovists) to retreat. On the 29th, the Whites launched a further offensive against the northern Donbas, opening a gap between the 13th and 8th Red Armies. Due to the gravity of the situation, the RSV summoned a fourth congress for June 15th. Trotsky not only banned this congress but took the lead in slandering the Makhnovists and calling for their elimination (see section 13 for details). As well as “*this deliberately false agitational campaign, the [Bolshevik] blockade of the region was carried to the limit . . . The provisioning of shells, cartridges and other indispensable equipment which was used by daily at the front, ceased completely.*” [Arshinov, **Op. Cit.**, p. 118] Palij confirms this, noting that “*the supplies of arms and other war material to Makhno was stopped, thus weakening the Makhno forces vis-a-vis the Denikin troops.*” [Op. Cit., p. 175] David Footman also notes that the Bolshevik “*hold-back of supplies for the Insurgents developed into a blockade of the area. Makhnovite units at the front ran short of ammunition.*” He also mentions that “[i]n the latter part of May the **Cheka** sent over two agents to assassinate Makhno.” [Civil War in Russia, p. 271]

Needless to say, Trotsky blamed this White success to the Makhnovists, arguing it was retreating constantly before even the slightest attack by the Whites. However, this was not the case. Analysing these events in July 1919, Antonov (the commander of the Southern Front before Trotsky replaced him) wrote:

“Above all, the facts witness that the affirmations about the weakness of the most contaminated region — that from Hulyai Pole to Berdiansk — are without foundation . . . It is not because we ourselves have been better organised militarily, but because those troops were directly defending their native place . . . Makhno stayed at the front, in spite of the flight of the neighbouring 9th division, following by the whole of the 13th army . . . The reasons for the defeat on the southern front do not rest at all in the existence of ‘Ukrainian partisans’ . . . above all it must be attributed to the machinery of the southern front, in not keeping its fighting spirit and reinforcing its revolutionary discipline.” [quoted by Alexander Skirda, **The Rehabilitation of Makhno**, p. 348]

This, incidentally, tallies with Arshinov’s account that “*hordes of Cossacks had overrun the region, not through the insurrectionary front but from the left flank where the Red Army was stationed.*” [Op. Cit., p. 126] For what it is worth, General Denikin himself concurs with this account of events, noting that by the 4th of June his forces “*repulsed the routed and demoralised contingents of the Eight and Thirteenth Soviet Armies . . . The resistance of the Thirteenth Army being completely broken.*” He notes that an attempt by the Fourteenth Army (which Makhno’s troops were part of) to attack on the flank came to nothing. He only mentions Makhno when he recounts that “*General Shkuro’s division routed Makhno at Hulyai Pole.*” [The White Armies, p. 272] With Whites broken through on their flank and with limited ammunition and other supplies (thanks to the Bolsheviks), the Makhnovists had no choice but to retreat.

It was around this time that Trotsky, in a public meeting in Kharkov, “*announced that it were better to permit the Whites to remain in the Ukraine than*

to suffer Makhno. The presence of the Whites, he said, would influence the Ukrainian peasantry in favour of the Soviet Government, whereas Makhno and his *povstantsi*, would never make peace with the Bolsheviks; they would attempt to possess themselves of some territory and to practise their ideas, which would be a constant menace to the Communist Government." [Emma Goldman, *My Disillusionment in Russia*, p. 63]

Due to this Bolshevik betrayal, the Makhnovist sector was in very grave danger. At Hulyai Pole, a peasant regiment was scraped together in 24 hours in an attempt to save the town. It encountered White Cossacks ten miles away from the town and was mown down. The Whites entered Hulyai Pole the next day (June 6th) and gave it a good going over. On the same day, the Bolsheviks issued an order for Makhno's arrest. Makhno was warned and put in his resignation, arguing that it was "*an inviolable right of the workers and peasants, a right won by the revolution, to call congresses on their own account, to discuss their affairs.*" Combined with the "*hostile attitude*" of the Bolshevik authorities towards him, which would lead "*unavoidably to the creation of a special internal front,*" Makhno believed it was his duty to do what he could to avert it, and so he left his post. [quoted by Arshinov, *Op. Cit.*, p. 129] While Makhno escaped, his staff was not so lucky. Five of them were arrested the same day and shot as a result of Trotsky's order to ban the fourth congress.

Leaving his troops in the frontline, Makhno left with a small cavalry detachment. While leaving the rest under Red command, Makhno made a secret agreement with his regimental commanders to await a message from him to leave the Red Army and join up against with the partisans. On the 9th and 10th of June, Hulyai Pole was retaken by Bolshevik forces, who took the opportunity to attack and sack the Makhnovist communes. [Arshinov, *Op. Cit.*, p. 86f]

After intense fighting, the Whites finally split the Southern Front into three on June 21st. Needless to say, Trotsky and the Bolsheviks blamed this on the partisan forces (even stating that they had "*opened the front*" to the Whites). This was nonsense, as noted above.

After leaving the front, Makhno took refuge in the Chorno-Znamenski forest before continuing the retreat north and skirmishing with Red Army units. This brought him into the territory held by Hryhoriyiv and this, in turn, meant they had to proceed carefully. While the Makhnovists had made a public denunciation of Hryhoriyiv, Makhno was approaching the centre of Hryhoriyov's remaining influence. Surrounded by enemies, Makhno had little choice but to begin discussions with Hryhoriyiv. This was problematic to say the least. Hryhoriyiv's revolt had been tinged with anti-Semitism and had seen at least one major pogrom. Being faced with Hryhoriyov's anti-Semitism and his proposal for an alliance with the Whites against the Reds led the Makhnovists to plot his downfall at a meeting planned for the 27th July.

This meeting had originally been called to discuss the current tasks of the insurgents in the Ukraine and was attended by nearly 20,000 insurgents and local peasants. Hryhoriyiv spoke first, arguing that the most urgent task was to chase out the Bolsheviks and that they should ally themselves with any anti-Red forces available (a clear reference to the Whites under Denikin). The Makhnovist Chubenko spoke next, declaring that the "*struggle against the Bolsheviks could be revolutionary only if it were carried out in the name of the social revolution. An alliance with the worst enemies of the people — with generals — could only*

be a counter-revolutionary and criminal adventure.” Following him, Makhno “demanded before the entire congress” that Hryhoriyiv “immediately answer for the appalling pogrom of Jews he had organised in Elisavetgrad in May, 1919, as well as other anti-Semitic actions.” [Arshinov, **Op. Cit.**, p. 136]

Seeing that things were going badly, Hryhoriyiv went for his revolver, but was shot by a Makhnovist. Makhno finished him off. Makhnovist guards disarmed the leading Hryhoriyivists. Then Makhno, Chubenko and others justified the killing before the mass meeting, which approved the act passing a resolution that stated that Hryhoriyiv’s death was “an historical and necessary fact, for his policy, acts and aims were counter-revolutionary and mainly directed to helping Denikin and other counter-revolutionaries, as is proved by his Jewish pogroms.” [quoted by Malet, **Op. Cit.**, p. 42] The troops under Hryhoriyiv became part of the general Insurrectionary Army.

At the end of July, Makhno recalled the troops he had earlier left in the Red Army and by mid-August the forces met up, becoming an army of some 15,000. At Mykolaiv, the Red Army units were defecting to Makhno in large numbers due in part to the feeling that the Red Army were abandoning the defence of the Ukraine. This was the start of Denikin’s massive push north and Petliura’s push east. By the end of August, Makhno felt strong enough to go on the offensive against the Whites. Superior White forces pushed the Makhnovists further and further west, away from their home region. “Denikin,” in Voline’s words, “not only made war on the army as such, but also on the whole peasant population. In addition to the usual persecutions and beatings, the villages he occupied were burnt and wrecked. The greater part of the peasants’ dwellings were looted and wrecked. Hundreds of peasants were shot. The women maltreated, and nearly all the Jewish women . . . were raped.” This repression “obliged the inhabitants of the villages threatened by the approach of the Denikinists to abandon their hearths and flee. Thus the Makhnovist army was joined and followed in their retreat by thousands of peasant families in flight from their homes with their livestock and belongings. It was a veritable migration. An enormous mass of men, women and children trailed after the army in its slow retreat towards the west, a retreat which gradually extended over hundreds of kilometres.” [**Op. Cit.**, p. 607]

Meeting the Nationalists in mid-September, it was agreed on both sides that fighting would only aid the Whites and so the Makhnovists entered a non-aggression pact with Petliura. This enabled them to offload over 1,000 wounded. The Makhnovists continued their propaganda campaign against the Nationalists, however. By the 24th of September, intelligence reports suggested that White forces had appeared to the west of their current position (i.e. where the Nationalists were). The Makhnovists concluded that the only way this could have happened was if the Nationalists had allowed the Whites to cross their territory (the Nationalists disputed this, pointing to the fighting that had started two days before between them and the Whites).

This meant that the Makhnovists were forced to fight the numerically superior Whites. After two days of desperate fighting, the Whites were routed and two regiments were destroyed at the battle of Peregonovka village. Makhno’s forces then conducted an incredibly rapid advance in three directions helped by their mobile cart-transported infantry, in three days smashing three reserve regiments and at the greatest point advancing 235 miles east. On the 6th October a drive to the south started which took key White ports and captured a huge quantity of equipment including 600 trucks of British-supplied ammunition and

an aeroplane. This was disastrous for Denikin whose forces had reached the northernmost point on their advance on Moscow, for these ports were key for his supply routes. The advance continued, cutting the railway route and so stopping all shells reaching Denikin's Moscow front.

Denikin was forced to send some of his best troops from the Moscow front to drive back the Makhnovists and British boats were sent to towns on the coast where Makhno might retreat through. The key city of Katerinoslav was taken with the aid of a workers' uprising on November 9th and held for a month before the advancing Whites and a typhoid epidemic which was to devastate the Makhnovista ranks by the end of the year forced them out of the city. In December, the Red Army advance made possible by Makhno's devastation of Denikin's supply lines continued.

Thus Voline:

"It is necessary to emphasise here the historic fact that the honour of having annihilated the Denikinist counter-revolution in the autumn of 1919, belongs entirely to the Makhnovist Insurrectionary Army. If the insurgents had not won the decisive victory of Peregonovka, and had not continued to sap the bases in Denikin's rear, destroying his supply service for artillery, food and ammunition, the Whites would probably have entered Moscow in December 1919 at the latest." [Op. Cit., p. 625]

In December the Red Army advance made possible by Makhno's devastation of Denikin's supply lines continued. By early January the Reds had split White forces into three and their troops had reached Katerynoslav. The attitude of the Bolsheviks to the Makhnovists had already been decided. On December 12th, 1919, Trotsky stated that when the two forces met, the Bolsheviks had "*an order . . . from which we must not retreat one single step.*" While we discuss this secret order in more depth in section 13, we will note here that it gave partisans the option of becoming "*fully subordinate to [Bolshevik] command*" or "*be subjected to ruthless punishment.*" [How the Revolution Armed, vol. II., pp. 110-1 and p. 442] Another secret order to the 45th division issued on January 4th instructed them to "*annihilate Makhnovist bands*" and "*disarm the population.*" The 41st was sent "*into reserve*" to the Hulyai Pole region. This was "*five days before Makhno was outlawed, and shows that the Bolshevik command had a clear view of Makhno's future, even if the latter did not.*" [Malet, Op. Cit., p. 54]

Unaware of this, the Makhnovista put out propaganda leaflets directed at the Red Army rank and file, appealing to them as comrades. At Aleksandrovsk on December 5th talks occurred between a representative of the Makhnovists and the commander of the 45th division's 1st brigade. These broke down when Makhno was ordered to the Polish front, which the Makhnovists refused. On January 9th, Yegorov, commander of the Red Army southern front, used this pretext to outlaw Makhno. This outlawing was engineered deliberately by the Bolsheviks:

"The author of the order realised at that time there was no real war between the Poles and the Bolsheviks at that time and he also knew that Makhno would not abandon his region . . . Uborevich [the author] explained that 'an appropriate reaction by Makhno to this order would give us the chance to have accurate grounds for our next

steps' ... [He] concluded: 'The order is a certain political manoeuvre and, at the very least, we expect positive results from Makhno's realisation of this.' [Palij, **Op. Cit.**, p. 210]

In addition, war with Poland did not break out until the end of April, over three months later.

Needless to say, the Makhnovists **did** realise the political motivations behind the order. As Arshinov notes, “[s]ending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this.” Moreover, the Makhnovists considered the move “physically impossible” as “half the men, the entire staff and the commander himself were in hospital with typhus.” [Op. Cit., p. 163]

This was the signal for nine months of bitter fighting between the Red Army and the Makhnovists. Military events in this period are confused, with the Red Army claiming victory again and again, only for the Makhnovists to appear somewhere else. Hulyai Pole changed hands on a couple of occasions. The Bolsheviks did not use local troops in this campaign, due to fear of fraternisation. In addition, they used “new tactics,” and “attacked not only Makhno's partisans, but also the villages and towns in which the population was sympathetic toward Makhno. They shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their properties and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved.” They also set up “Committees of the Poor” as part of the Bolshevik administrative apparatus, which acted as “informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans.” [Palij, **Op. Cit.**, pp. 212–3]

In addition to this suffering, the Bolshevik decision to attack Makhno rather than push into the Crimea was also to prolong the civil war by nine more months. The Whites re-organised themselves under General Wrangel, who began a limited offensive in June. Indeed, the Bolshevik “policy of terror and exploitation turned almost all segments of Ukrainian society against the Bolsheviks, substantially strengthened the Makhno movement, and consequently facilitated the advance of the reorganised anti-Bolshevik force of General Wrangel from the Crimea into South Ukraine, the Makhno region.” [Palij, **Op. Cit.**, p. 214]

It was widely believed on the White side that Makhno was ready to cooperate with them and, desperate for men, Wrangel decided to appeal to the Makhnovists for an alliance. Their response was simple and direct, they decided to immediately execute his delegate and publish both his letter and a response in the Makhnovist paper “*The Road to Freedom*.” [Malet, **Op. Cit.**, p. 60] Of course, this did not stop the Bolsheviks later claiming such an alliance existed!

Ironically enough, at a general assembly of insurgents, it was decided that “the destruction of Wrangel” would “eliminate a threat to the revolution” and so free “all of Russia” from “the counter-revolutionary barrage.” The mass of workers and peasants “urgently needed an end to all those wars” and so they proposed “to the Communists that hostilities between them and the Makhnovists be suspended in order that they might wipe out Wrangel. In July and August,

1920, telegrams to this effect were sent to Moscow and Kharkov.” There was no reply and the Bolsheviks “continued their war against the Makhnovists, and they also continued their previous campaign of lies and calumnies against them.” [Arshinov, **Op. Cit.**, p. 176]

In July and August the Makhnovists went on the offensive, raiding the Bolsheviks in three provinces and attacking the Red Army infrastructure. Wrangel began another offensive in September, driving the Red Army back again and again and threatening the Makhnovist area. Faced with Wrangel’s success, the Bolsheviks started to rethink their position on Makhno, although on the 24th of September the Bolshevik commander-in-chief Kamenev was still declaring the need for “*the final liquidation of the Makhno band.*” [Malet, **Op. Cit.**, p. 62] A few days later, the Bolsheviks changed their mind and negotiations began.

So, by October 1920, the success of the Wrangel offensive was again forcing the Bolsheviks and Makhnovists to put aside their differences and take on the common enemy. A deal was reached and on October 2nd, Frunze, the new Red Army commander of the Southern Front, ordered a cessation of hostilities against the Makhnovists. A statement from the Soviet of the Revolutionary Insurgent Army of the Ukraine (Makhnovists) explained the treaty as necessitated by the White offensive but also representing a victory over the “*high-handed communists and commissars*” in forcing them to recognise the “*free insurrection.*” [Malet, **Op. Cit.**, p. 64]

The agreement was signed between October 10th and 15th. It consisted of two parts, a Political and a Military agreement (see section 13 for full details). The Political agreement simply gave the Makhnovists and anarchists the rights they should have had according to the Soviet Constitution. The Military agreement resulted in the Makhnovists becoming part of the Red Army, keeping their established internal structure and, significantly, stopped them from accepting into their ranks any Red Army detachments or deserters therefrom. According to Bolshevik sources, “*there was never the slightest intention on the Bolshevik side of keeping to the agreement once its military value had passed.*” [David Footman, **Op. Cit.**, p. 296]

Even before the agreement came into effect, the Makhnovists were fighting alongside the Bolsheviks and between October 4 and 17, Hulyai Pole was retaken by the Aleksandrovsk group, which included 10,000 Makhnovista. On October 22, Aleksandrovsk was taken with 4,000 white prisoners and from then to early November the Makhnovists cut through Wrangel’s rear, hoping to cut off his retreat by seizing the Crimean passes. The Whites fought a skilful rearguard which together with the new White fortifications on the peninsula held up the advance. But by the 11th, his hold in the Crimea gone, Wrangel had no choice but to order a general retreat to the ports and an evacuation. Even the Bolsheviks had to acknowledge that the “*Makhnovist units fulfilled their military tasks with no less heroism than the Red Army units.*” [quoted by Malet, **Op. Cit.**, p. 69]

On hearing this success on 16th November, the reaction of the Makhnovista still at Hulyai Pole was cynical but realistic: “*It’s the end of the agreement. I’ll bet you anything that the Bolsheviks will be on us within the week.*” [quoted by Malet, **Op. Cit.**, p. 70] They were not wrong. Already Frunze, the Red Army commander, had ordered two entire cavalry armies to concentrate near Hulyai Pole at the same time as he ordered the Makhnovist forces to the Caucasus Front! By 24th November Frunze was preparing for the treachery to come, in

Order 00149 (which was not sent to the Makhnovist units) saying if they had not departed to the Caucasus front by the 26th “*the Red regiments of the front, who have now finished with Wrangel, will start speaking a different language to these Makhnovist youths.*” [quoted by Malet, **Op. Cit.**, p. 71]

Of course this treachery went right to the top, just before the 26th “*deadline*” (which Makhno, not having seen the orders, was unaware of), Lenin urged Rakovski, head of the Ukrainian government to “[*k*]eep a close watch on all anarchists and prepare documents of a criminal nature as soon as possible, on the basis of which charges can be preferred against them.” [quoted by Malet, **Op. Cit.**, p. 71] Indeed, it later appeared the treachery had been prepared from at least 14th or 16th November, as prisoners captured later stated they had received undated anti-Makhnovist proclamations on that date. [Malet, **Ibid.**]

At 3am on the 26th the attacks on the Makhnovists started. Alongside this one of the Makhnovist commanders was lured to a meeting by the Bolsheviks, seized and shot. Some Makhnovist forces managed to break through the encircling Bolsheviks but only after taking heavy losses — of the 2,000–4,000 cavalry at Simferopol, only 250 escaped. By the 1st December, Rakovski reported the imminent demise of the Makhnovists to the Kharkiv soviet only to have to eat his words when Makhno routed the 42nd division on the 6th, retaking Hulyai Pole and 6,000 prisoners, of whom 2,000 joined his forces. [Malet, **Op. Cit.**, p. 72] Simultaneously with the attack on the Makhnovists, the Bolsheviks rounded up all known anarchists in the Ukraine (many of whom were in Kharkiv waiting for a legally organised **Nabat** conference to begin).

In the resulting struggle between the two forces, as Palij notes, the “*support of the population was a significant advantage to Makhno, for they supplied the partisans with needed material, including horses and food, while the Red troops operated among a foreign and hostile people.*” The Bolsheviks found that the peasants not only refused to supply them with goods, they also refused to answer their questions or, at best, gave answers which were vague and confusing. “*In contrast to the Bolsheviks, Makhno partisans received detailed, accurate information from the population at all times.*” [Palij, **Op. Cit.**, pp. 236–7]

Frunze brought in extra forces and ordered both the “*annihilation of the Makhnovists*” and total disarming of the region. Plagued by desertions, it was also ordered that all Makhnovist prisoners were to be shot, to discourage the local population and Red Army soldiers thinking of joining them. There is also evidence of unrest in the Azov fleet, with acts of sabotage being carried out by sailors to prevent their weapons being used against the Makhnovists. [Malet, **Op. Cit.**, p. 73] While it was common practice for the Bolsheviks to shoot all Makhnovist prisoners, the “*existence of roundup detachments at the end of 1920, whose task was to re-collect prisoners freed by the Makhnovists*” shows that the Makhnovists did not reciprocate in kind. [Malet **Op. Cit.**, p. 129]

At the end of 1920, the Makhnovists had ten to fifteen thousand troops and the “*growing strength of the Makhno army and its successes caused serious concern in the Bolshevik regime, so it was decided to increase the number of troops opposing Makhno.*” [Palij, **Op. Cit.**, p. 237] All the pressure exerted by the Bolsheviks was paying off. Although Makhno repeatedly broke through numerous mass encirclements and picked up deserters from the Red Army, his forces were being eroded by the far greater numbers employed against them. In addition, “*the Red command worked out new plans to fight Makhno by stationing whole regiments, primarily cavalry, in the occupied villages, to terrorise the*

peasants and prevent them from supporting Makhno... Also the Cheka punitive units were constantly trailing the partisans, executing Makhno's sympathisers and the partisans' families." [Palij, **Op. Cit.**, p. 238] In spite of the difficult conditions, Makhno was still able to attract some Red Army soldiers and even whole units to his side. For example, "when the partisans were fighting Budenny's Fourth Cavalry Division, their First Brigade, commanded by Maslak, joined Makhno." [Palij, **Op. Cit.**, p. 239]

Makhno was forced to leave his home areas of operations and flee east, then west again. By early January his forces had fought 24 battles in 24 days. This pattern continued throughout March and April into May. In June, the Bolsheviks changed their strategy to one of predicting where Makhno was heading and garrisoning troops in that area. In one battle on 15 June, Frunze himself was almost captured. Despite this, the insurgents were very weak and their peasant base was exhausted by years of war and civil war. In the most sympathetic areas, Red Army troops were garrisoned on the peasants. Thus Palij:

"[T]hrough combat losses, hardship, and sickness, the number of Makhno partisans was diminishing and they were cut off from their main sources of recruits and supplies. The Ukrainian peasants were tried of the endless terror caused by successive occupation of village after village by the Red troops and the Cheka. The continuous fighting and requisitions were leaving the peasants with little food and horses for the partisans. They could not live in a state of permanent revolution. Moreover, there was extreme drought and consequently a bad harvest in Ukraine, especially in the region of the Makhno movement." [**Op. Cit.**, pp. 240–1]

The state terrorism and the summer drought caused Makhno to give up the struggle in mid-August and instead fight his way to the Dniester with the last of his forces and cross into Romania on August 26. Some of his forces which stayed behind were still active for a short time. In November 1921 the Cheka seized 20 machine guns and 2,833 rifles in the new Zaporizhya province alone.

For more details of the history of the movement, Michael Malet's **Nestor Makhno in the Russian Revolution** is an excellent summary. Michael Palij's **The Anarchism of Nestor Makhno** is also worth consulting, as are the anarchist histories of Voline and Arshinov.

5 How were the Makhnovists organised?

Being influenced by anarchist ideas, the Makhnovists were organised along libertarian lines. This meant that in both civilian and military areas, self-management was practised. This section discusses the military organisation, while the next discusses the social aspect of the movement.

By practising self-management, the Makhnovists offered a completely different model of military organisation to that of both the Red Army and traditional military forces. While the army structure changed depending on its circumstances, the core ideas remained. These were as follows:

"The Makhnovist insurrectionary army was organised according to three fundamental principles: voluntary enlistment, the electoral principle, and self-discipline."

“Voluntary enlistment meant that the army was composed only of revolutionary fighters who entered it of their own free will.

“The electoral principle meant that the commanders of all units of the army, including the staff, as well as all the men who held other positions in the army, were either elected or accepted by the insurgents of the unit in question or by the whole army.

“Self-discipline meant that all the rules of discipline were drawn up by commissions of insurgents, then approved by general assemblies of the various units; once approved, they were rigorously observed on the individual responsibility of each insurgent and each commander.” [Op. Cit., p. 96]

Voline paints a similar picture. He also notes that the electoral principle was sometimes violated and commanders appointed *“in urgent situations by the commander himself,”* although such people had to be *“accepted without reservation”* by *“the insurgents of the unit in question or by the whole army.”* [Op. Cit., p. 584]

Thus the Makhnovist army, bar some deviation provoked by circumstances, was a fundamentally democratic organisation. The guerrillas elected the officers of their detachments, and, at mass assemblies and congresses, decided policy and discipline for the army. In the words of historian Michael Palij:

“As the Makhno army gradually grew, it assumed a more regular army organisation. Each tactical unit was composed of three subordinate units: a division consisted of three brigades; a brigade, of three regiments; a regiment, of three battalions. Theoretically commanders were elected; in practice, however, the top commanders were usually carefully selected by Makhno from among his close friends. As a rule, they were all equal and if several units fought together the top commanders commanded jointly. The army was nominally headed by a Revolutionary Military Council of about ten to twenty members . . . Like the commanders, the council members were elected, but some were appointed by Makhno . . . There also was an elected cultural section in the army. Its aim was to conduct political and ideological propaganda among the partisans and peasants.” [Palij, Op. Cit., pp. 108–9]

The Revolutionary Military Council was elected and directly accountable to the regional workers, peasants and insurgent congresses. It was designed to co-ordinate the local soviets and execute the decisions of the regional congresses. Hence Voline:

*“This council embraced the whole free region. It was supposed to carry out all the economic, political, social and military decisions made at the congress. It was thus, in a certain sense, the supreme executive of the whole movement. **But it was not at all an authoritarian organ.** Only strictly executive functions were assigned to it. It confined itself to carrying out the instructions and decisions of the congress. At any moment, it could be dissolved by the congress and cease to exist.”* [Op. Cit., p. 577]

As such, when Palij notes that this council “*had no decisive voice in the army’s actions,*” he misses the point of the council. [Palij, **Ibid.**] It did not determine the military affairs of the army, but rather the interaction of the military and civilians and made sure that the decisions of congresses were executed. Thus the whole army was nominally under the control of the regional congresses of workers, peasants and insurgents. At these congresses, delegates of the toiling people decided upon the policy to be pursued by the Makhnovist Army. The Revolutionary Military Soviet existed to oversee that decisions were implemented, not to determine the military activities of the troops.

It should also be noted that women not only supported the Makhnovists, they also “*fought alongside the men.*” [Arshinov, **Op. Cit.**, p. 145] However, “*the participation of women in the movement (by all accounts, quite substantial)*” needs “*further investigation.*” [Serge Cipko, “*Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921,*” pp. 57–75, **The Raven**, no. 13, p. 75]

At its height, the army was made up of infantry, cavalry, artillery, machine-gun units, and special branches, including an intelligence service. As the success of partisan warfare depends upon mobility, the army gradually mounted its infantry in light carts (called “*tachanka*”) during 1918–19. As Michael Malet notes, this was a “*novel tactic*” and Makhno “*could be described as the inventor of the motorised division before the car came into general use.*” [**Op. Cit.**, p. 85] The tachanka was used to transport as many troops as possible, giving the Makhnovists mobile infantry which could keep up with the cavalry. In addition, a machine-gun was sometimes mounted in the rear (in autumn 1919, the 1st machine-gun regiment consisted of 120 guns, all mounted on tachanki).

For the most part the Makhnovist army was a volunteer army, unlike all others operating in the Russian Civil War. However, at times of crisis attempts were made to mobilise troops. For example, the Second regional congress agreed that a “*general voluntary and equalitarian mobilisation*” should take place. This meant that this appeal, “*sanctioned by the moral authority of the congress, emphasised the need for fresh troops in the insurrectionary army, no-one was compelled to enlist.*” [Voline, **Op. Cit.**, p. 577] The Congress itself passed a resolution after a long and passionate debate that stated it “*rejected ‘compulsory’ mobilisation, opting for an ‘obligatory’ one; that is, each peasant who is able to carry arms, should recognise his obligation to enlist in the ranks of the partisans and to defend the interests of the entire toiling people of Ukraine.*” [quoted by Palij, **Op. Cit.**, p. 155] There were far more volunteers than arms, the opposite of what occurred to both the Reds and Whites during the Civil War. [Malet, **Op. Cit.**, p. 106]

The third Congress decided to conduct a voluntary mobilisation all those born between 1889 and 1898. This congress told them to assemble at certain points, organise themselves and elect their officers. Another mobilisation decided at the Aleksandrovska congress never took place. How far the Makhnovists were forced to conscript troops is still a matter of debate. Paul Avrich, for example, states that “*voluntary mobilisation*” in reality “*meant outright conscription, as all able-bodied men were required to serve.*” [**Op. Cit.**, p. 114] On the other side, surviving leaflets from 1920 “*are in the nature of appeals to join up, not instructions.*” [Malet, **Op. Cit.**, p. 105] Trotsky, ironically, noted that “*Makhno does not have general mobilisations, and indeed these would be impossible, as he lacks the necessary apparatus.*” [quoted by Malet, **Op. Cit.**, p. 106] It is

probably right to say that the Congresses desired that every able-bodied man join the Makhnovist army, but they simply did not have the means to enforce that desire and that the Makhnovists tried their best to avoid conscription by appealing to the peasants' revolutionary conscience, with some success.

As well as the military organisation, there was also an explicitly anarchist federation operating in the Ukraine at the same time. The first conference to organise a "*Confederation of Anarchist Organisations of the Ukraine*" was held between November 12th to 16th, 1918. The new federation was named "*Nabat*" (Alarm) and had a six-person Secretariat. Kharkiv was chosen as its headquarters, while it had groups in other major Ukrainian cities (including Kyiv, Odessa and Katerynoslav). The final organisation of the Nabat was accomplished at a conference held in April 2–7, 1919. The federation aimed to form a "*united anarchism*" and guaranteed a substantial degree of autonomy for every participating group and individual. A number of newspapers appeared in a Ukrainian towns and cities (mostly entitled **Nabat**), as did leaflets and pamphlets. There was a main weekly paper (called **Nabat**) which was concerned largely with anarchist theory. This completed the Makhnovist papers **Road to Freedom** (which was often daily, sometimes weekly and dealt with libertarian ideas, everyday problems and information on partisan activities) and **The Makhnovist Voice** (which dealt primarily with the interests, problems, and tasks of the Makhnovist movement and its army). The Nabat organisation was also published a pamphlet dealing with the Makhnovist movement's problems, the economic organisation of the region, the free soviets, the social basis of the society that was to be built, and the problem of defence.

Unsurprisingly, the Nabat federation and the Makhnovists worked together closely, with Nabat members worked in the army (particularly its cultural section). Some of its members were also elected to the Makhnovist Revolutionary Military Soviet. It should be noted that the Nabat federation gained a number of experienced anarchists from Soviet Russia, who fled to the Ukraine to escape Bolshevik repression. The Nabat shared the fortunes of the Makhno movement. It carried on its work freely as long as the region was controlled by the Makhnovist Army, but when Bolshevik or White forces prevailed, the anarchists were forced underground. The movement was finally crushed in November 1920, when the Bolsheviks betrayed the Makhnovists.

As can be seen, the Makhnovists implemented to a large degree the anarchist idea of self-managed, horizontally federated associations (when possible, of course). Both the two major organisational layers to the Makhnovist structure (the army and the congresses) were federated horizontally and the "top" structure was essentially a mass peasant, worker and guerrilla decision-making coalition. In other words, the masses took decisions at the "top" level that the Revolutionary Military Soviet and the Makhnovist army were bound to follow. The army was answerable to the local Soviets and to the congresses of soviets and, as we discuss in section 7, the Makhnovists called working-people and insurgent congresses whenever they could.

The Makhnovist movement was, fundamentally, a working class movement. It was "*one of the very few revolutionary movements to be led and controlled throughout by members of 'the toiling masses.'*" [David Footman, **Op. Cit.**, p. 245] It applied its principles of working class autonomy and self-organisation as far as it could. Unlike the Red Army, it was predominantly organised from the bottom up, rejecting the use of Tsarist officers, appointed commanders, and

other “top-down” ways of the Red Army (see section 14 for further discussion of the differences between the two forces).

The Makhnovist army was not by any means a perfect model of anarchist military organisation. However, compared to the Red Army, its violations of principle are small and hardly detract from their accomplishment of applying anarchist ideas in often extremely difficult circumstances.

6 Did the Makhnovists have a constructive social programme?

Yes, they did. The Makhnovists spent a great deal of energy and effort in developing, propagating and explaining their ideas on how a free society should be created and run. As Michael Malet noted, the “*leading Makhnovists had definite ideas about the ideal form of social organisation.*” [**Nestor Makhno in the Russian Civil War**, p. 107] Moreover, as we discuss in the next section, they also successfully applied these ideas when and where they could.

So what was their social programme? Being anarchists, it comprised two parts, namely political and economic aspects. The Makhnovists aimed for a true social revolution in which the working classes (both urban and rural) could actively manage their own affairs and society. As such, their social programme reflected the fact that oppression has its roots in both political and economic power and so aimed at eliminating both the state and private property. As the core of their social ideas was the simple principle of working-class autonomy, the idea that the liberation of working-class people must be the task of the working-class people themselves. This vision is at the heart of anarchism and was expressed most elegantly by Makhno:

“Conquer or die — such is the dilemma that faces the Ukrainian peasants and workers at this historic moment . . . But we will not conquer in order to repeat the errors of the past years, the error of putting our fate into the hands of new masters; we will conquer in order to take our destinies into our own hands, to conduct our lives according to our own will and our own conception of the truth.”
[quoted by Peter Arshinov, **The History of the Makhnovist Movement**, p. 58]

As such, the Makhnovists were extremely hostile to the idea of state power, recognising it simply as a means by which the majority are ruled by the few. Equally, they were opposed to wage slavery (to private or state bosses), recognising that as long as the workers do not manage their own work, they can never be free. As they put it, their goals could only be achieved by an “*implacable revolution and consistent struggle against all lies, arbitrariness and coercion, wherever they come from, a struggle to the death, a struggle for free speech, for the righteous cause, a struggle with weapons in hand. Only through the abolition of all rulers, through the destruction of the whole foundation of their lies, in state affairs as well as in political and economic affairs. And only through the social revolution can the genuine Worker-Peasant soviet system be realised and can we arrive at SOCIALISM.*” [contained in Arshinov, **Op. Cit.**, p. 273] They, like other anarchists and the Kronstadt rebels, termed this programme of working class self-management the “*third revolution.*”

We will discuss the political aspect of the Makhnovist programme first, then its economic one. However, the Makhnovists considered (correctly) that both aspects could not be separated. As they put it: “*We will not lay down our arms until we have wiped out once and for all every political and economic oppression and until genuine equality and brotherhood is established in the land.*” [contained in Arshinov, **Op. Cit.**, p. 281] We split the aspects simply to aid the presentation of their ideas.

At the core of their ideas was what they termed the “**Free Soviet System**” (or “**free soviets**” for short). It was this system which would allow the working class to create and run a new society. As they put it:

“[The] Makhnovists realise that the working people are no longer a flock of sheep to be ordered about by anyone. We consider the working people capable of building, on their own and without parties, commissars or generals, their own FREE SOVIET SYSTEM, in which those who are elected to the Soviet will not, as now [under the Bolsheviks], command and order us, but on the contrary, will be only the executors of the decisions made in our own workers’ gatherings and conferences.” [contained in Peter Arshinov, **Op. Cit.**, pp. 280–1]

Thus the key idea advocated by the leading Makhnovista for social organisation and decision-making was the “*free toilers’ soviet of peasant and worker organisations.*” This meant they were to be independent of all central authority and composed of those who worked, and not political parties. They were to federate on a local, then regional and then national level, and power within the federation was to be horizontal and not vertical. [Michael Malet, **Op. Cit.**, p. 107] Such a system was in opposition to the Bolshevik practice of Soviets defined and dominated by political parties with a vertical decision-making structure that reached its highest point in the Bolshevik Central Committee.

Thus, for the Makhnovists, the soviet system would be a “bottom-up” system, one designed not to empower a few party leaders at the centre but rather a means by which working people could manage their own affairs. As they put it, the “*soviet system is not the power of the social-democratic Communist-Bolsheviks who now call themselves a soviet power; rather it is the supreme form of non-authoritarian anti-state socialism, which expresses itself in the organisation of a free, happy and independent system of social life for the working people.*” This would be based on the “*principles of solidarity, friendship and equality.*” This meant that in the Makhnovist system of free soviets, the “*working people themselves must freely choose their own soviets, which will carry out the will and desires of the working people themselves, that is to say, ADMINISTRATIVE, not ruling soviets.*” [contained in Arshinov, **Op. Cit.**, pp. 272–3]

As David Footman summarises, Makhno’s “*ultimate aims were simple. All instruments of government were to be destroyed. All political parties were to be opposed, as all of them were working for some or other form of new government in which the party members would assume the role of a ruling class. All social and economic affairs were to be settled in friendly discussion between freely elected representatives of the toiling masses.*” [**Op. Cit.**, p. 247]

Hence the Makhnovist social organisation was a federation of self-managed workers’ and peasants’ councils (soviets), which would “*be only the executors of*

the decisions made in our workers' gatherings and conferences." [contained in Arshinov, **Op. Cit.**, p. 281] In other words, an anarchist system based on mass assemblies and decision-making from the bottom up.

Economically, as is to be expected, the Makhnovists opposed private property, capitalism and wage-slavery. Their economic ideas were summarised in a Makhnovist declaration as follows:

"The lands of the service gentry, of the monasteries, of the princes and other enemies of the toiling masses, with all their livestock and goods, are passed on to the use of those peasants who support themselves solely through their own labour. This transfer will be carried out in an orderly fashion determined in common at peasant assemblies, which must remember in this matter not only each of their own personal interests, but also bear in mind the common interest of all the oppressed, working peasantry.

"Factories, workshops, mines and other tools and means of production become the property of the working class as a whole, which will run all enterprises themselves, through their trade unions, getting production under way and striving to tie together all industry in the country in a single, unitary organisation." [contained in Arshinov, **Op. Cit.**, p. 266]

They continually stressed that the *"land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised."* This meant a system of use-rights, as *"the land, the mines, the factories, the workshops, the railroads, and so on, will belong neither to individuals nor to the government, but solely to those who work with them."* [**Op. Cit.**, p. 273 and p. 281]

In industry, such a system clearly implied a system of worker's self-management within a system of federated factory committees or union branches. On the land, it meant the end of landlordism, with peasants being entitled to as much land and equipment as they could cultivate without the use of hired labour. As a Makhnovist congress in 1919 resolved:

"The land question should be decided on a Ukraine-wide scale at an all-Ukrainian congress of peasants on the following basis: in the interests of socialism and the struggle against the bourgeoisie, all land should be transferred to the hands of the toiling peasants. According to the principle that 'the land belongs to nobody' and can be used only by those who care about it, who cultivate it, the land should be transferred to the toiling peasantry of Ukraine for their use without pay according to the norm of equal distribution." [quoted by Palij, **Op. Cit.**, p. 155]

In addition to advocating the abolition of private property in land and the end of wage labour by distributing land to those who worked it, the Makhnovists also supported the forming of *"free"* or *"working"* communes. Like their policy of land distribution, it also aimed to benefit the poorer peasants and rural wage labourers. The *"free commune"* was a voluntary association of rural workers

who took over an expropriated estate and managed the land in common. The commune was managed by a general meeting of all its members and based on the liberty, equality and solidarity of its members.

Clearly, in terms of their economic policies, the Makhnovists proposed a clear and viable alternative to both rural and urban capitalism, namely workers' self-management. Industry and land would be socialised, with the actual management of production resting in the hands of the workers themselves and co-ordinated by federated workers' organisations. On the land, they proposed the creation of voluntary communes which would enable the benefits of co-operative labour to be applied. Like their political ideas, their economic ideas were designed to ensure the freedom of working people and the end of hierarchy in all aspects of society.

In summary, the Makhnovist had a constructive social ideas which aimed to ensure the total economic and political emancipation of the working people. Their vision of a free society was based on a federation of free, self-managed soviets, the socialisation of the means of life and workers' self-management of production by a federation of labour unions or factory committees. As the black flags they carried into battle read, "*liberty or death*" and "*the land to the peasants, the factories to the workers.*"

7 Did they apply their ideas in practice?

Yes, the Makhnovists consistently applied their political and social ideas when they had the opportunity to do so. Unlike the Bolsheviks, who quickly turned away from their stated aims of soviet democracy and workers' control in favour of dictatorship by the Bolshevik party, the Makhnovists did all in their power to encourage, create and defend working-class freedom and self-management (see section 14 for further discussion). In the words of historian Christopher Reed:

"there can be no question that the anarchists did everything they could to free the peasants and workers and give them the opportunity to develop their own forms of collective control over land and factories ... [T]he Ukrainian anarchists fought under the slogan of land to the peasants, factories to the workers and power to the soviets. Wherever they had influence they supported the setting up of communes and soviets. They introduced safeguards intended to protect direct self-government from organised interference ... They conducted relentless class war against landlords, officers, factory owners and the commercial classes could expect short shrift from Makhno and his men, especially if they had taken up arms against the people or, like the Whites ..., had been responsible for looting, pogroms and vicious reprisals against unarmed peasants on a colossal scale."
[From *Tsar to Soviets*, p. 263]

As we discussed in the last section, the core ideas which inspired the Makhnovists were working-class self-determination and self-management. They aimed at the creation of a "*free soviet system*" and the end of capitalism by rural and industrial self-management. It is to the credit of the Makhnovists that they applied these ideas in practice rather than talking about high principles and doing the exact opposite.

In practice, of course, the war left little room for much construction work. As Voline pointed out, one of the key disadvantages of the movement was the “*almost continual necessity of fighting and defending itself against all kinds of enemies, without being able to concentrate on peaceful and truly positive works.*” [The Unknown Revolution, p. 571] However, in the disruption of the Civil War the Makhnovists applied their ideas when and where they could.

Within the army, as we discussed in section 5, the insurgent troops elected their own commanders and had regular mass assemblies to discuss policy and the agreed norms of conduct within it. In civilian matters, the Makhnovists **from the start** encouraged working-class self-organisation and self-government. By late 1917, in the area around Hulyai Pole “*the toiling masses proceeded . . . to consolidate their revolution. The little factories functioned . . . under the control of the workers. The estates were split up . . . among the peasants . . . a certain number of agricultural communes were formed.*” [David Footman, **Op. Cit.**, p. 248]

The aim of the Makhnovists was to “*transfer all the lands owned by the gentry, monasteries, and the state into the hands of peasants or to organise, if they wished, peasant communes.*” [Palij, **Op. Cit.**, p. 70] This policy was introduced from the start, and by the autumn of 1917, all land, equipment and livestock around Hulyai Pole had been expropriated from the gentry and kulaks and placed in the hands of working peasants. Land reform had been achieved by the direct action of the peasantry.

However, “*many of the peasants understood that the task was not finished, that it was not enough to appropriate a plot of land and be content with it. From the hardships of their lives they learned that enemies were watching from all sides, and that they must stick together. In several places there were attempts to organise social life communally.*” [Arshinov, **Op. Cit.**, p. 86]

In line with social anarchist theory, the Makhnovists also tried to introduce collective forms of farming. These experiments in collective working and living were called “*free communes.*” Despite the difficult military situation communes were established, principally near Hulyai Pole, in the autumn of 1917. This activity was resumed in February to March of 1918. They re-appeared in early 1919, once the threat of counter-revolution had been (temporarily) defeated.

There were four of these communes within five miles of Hulyai Pole itself and many more further afield. According to Makhno, these agricultural communes “*were in most cases organised by peasants, though sometimes their composition was a mixture of peasants and workmen [sic!]. Their organisation was based on equality and solidarity of the members. All members of these communes — both men and women — applied themselves willingly to their tasks, whether in the field or the household.*” Unlike many communes, people were given the personal space they desired, so “*any members of the commune who wanted to cook separately for themselves and their children, or to take food from the communal kitchens and eat it in their own quarters, met with no objection from the other members.*” The management of each commune “*was conducted by a general meeting of all its members.*” In addition, the communes decided to introducing anarchist schooling based on the ideas of Francisco Ferrer (see section J.5.13 for details). Makhno himself worked on one for two days a week for a period. [Makhno, quoted by Paul Avrich, **Anarchists in the Russian Revolution**, pp. 131]

They were set up on the former estates of landlords, and consisted of around 10 families or 100 to 300 people and although each had peasant anarchist members not all the members were anarchists. Makhno worked on Commune No. 1, which was on the estate of former landlord Klassen. When re-founded in 1919 this commune was named after Rosa Luxemburg, the Marxist revolutionary who had recently been murdered in the German revolution. It was a success, for by the spring sowing it had grown from nine families to 285 members working 340 acres of land. The communes represented a way that poor and middle peasants could pool resources to work estates that they could not have worked otherwise and, as Michael Malet points out, “*they were organised from the bottom up, not the top down.*” [Op. Cit., p. 121]

However, as Makhno himself acknowledged, while the “*majority of the toiling population saw in the organisation of rural communes the healthy germ of a new social life*” which could provide a “*model of a free and communal form of life,*” the “*mass of people did not go over to it.*” They cited as their reasons “*the advance of the German and Austrian armies, their own lack of organisation, and their inability to defend this order against the new ‘revolutionary’ [Bolshevik] and counter-revolutionary authorities. For this reason the toiling population of the district limited their revolutionary activity to supporting in every way those bold springs.*” [Makhno, quoted by Avrich, Op. Cit., p. 132] Given that the communes were finally destroyed by White and Red forces in June 1919, their caution was justified. After this, peace did not return long enough for the experiment to be restarted.

As Michael Malet argues:

“Very few peasant movements in history have been able to show in practice the sort of society and type of landholding they would like to see. The Makhnovist movement is proof that peasant revolutionaries can put forward positive, practical ideas.” [Op. Cit., p. 121]

The Makhnovist experiments, it should be noted, have strong similarities to the rural revolution during the Spanish Revolution of 1936 (see sections I.8.5 and I.8.6 for more details).

As well as implementing their economic ideas on workers’ self-management, land reform and free communes, the Makhnovists also organised regional congresses as well as local soviets. Most of the activity happened in and around Hulyai Pole, the focal point of the movement. This was in accord with their vision of a “*free soviet system.*” Needless to say, the congresses could only be called during periods of relative calm (i.e. the Makhnovist home area was not occupied by hostile forces) and so congresses of insurgents, peasants and workers were called in early 1919 and another in October of that year. The actual dates of the regional congresses were:

23 January 1919 at Velyka Mykhailivka

12 February 1919 at Hulyai Pole

10 April 1919 at Hulyai Pole

20 October 1919 at Aleksandrovska

A congress for the fifteenth of June 1919 never met because Trotsky unilaterally banned it, under pain of death to anyone even **discussing** it, never mind

calling for it or attending as a delegate. Unlike the third congress, which ignored a similar ban by Dybenko, the fourth congress could not go ahead due to the treacherous attack by the Red Army that preceded it. Four Makhnovist commanders were executed by the Red Army for advertising this congress. Another congress planned for Aleksandrovska in November 1920 was also prevented by Bolshevik betrayal, namely the attack after Wrangel had been defeated. [Malet, **Op. Cit.**, p. 108] See section 13 for further details.

The reason for these regional congresses was simple, to co-ordinate the revolution. *“It was indispensable,”* Arshinov notes, *“to establish institutions which unified first a district composed of various villages, and then the districts and departments which composed the liberated region. It was indispensable to find general solutions for problems common to the entire region. It was indispensable to create organs suitable for these tasks. And the peasants did not fail to create them. These organs were the regional congresses of peasants and workers.”* [Op. Cit., pp. 87–8] These congresses *“were composed of delegates of peasants, workers and of the insurgent army, and were intended to clarify and record the decisions of the toiling masses and to be regarded as the supreme authority for the liberated area.”* [David Footman, **Op. Cit.**, p. 266]

The first congress, which was the smallest, discussed the strengthening of the front, the adoption of a common nomenclature for popular organisations (soviets and the like) and to send a delegation to convince the draftees in the Nationalist forces to return home. It was also decided to organise a second congress. The second congress was larger, having 245 delegates from 350 districts. This congress *“was strongly anti-Bolshevik and favoured a democratic socio-political way of life.”* [Palij, **Op. Cit.**, p. 153] One delegate made the issue clear:

“No party has a right to usurp governmental power into its own hands . . . We want life, all problems, to be decided locally, not by order from any authority above; and all peasants and workers should decide their own fate, while those elected should only carry out the toilers’ wish.” [quoted by Palij, **Op. Cit.**, p. 154]

A general resolution was passed, which acknowledged the fact that the Bolshevik party was *“demanding a monopoly of the Revolution.”* It also stated:

“With deep regret the Congress must also declare that apart from external enemies a perhaps even greater danger, arising from its internal shortcomings, threatens the Revolution of the Russian and Ukrainian peasants and workers. The Soviet Governments of Russia and of the Ukraine, by their orders and decrees, are making efforts to deprive local soviets of peasants and workers’ deputies of their freedom and autonomy.” [quoted by Footman, **Op. Cit.**, p. 267]

As noted in section 5, the congress also decided to issue an *“obligatory”* mobilisation to gather troops for the Army. It also accepted a resolution on land reform, stating that the land *“belongs to nobody”* and could be used by anyone as long as they did not use wage labour (see section 6 for the full resolution). The congress accepted a resolution against plunder, violence, and anti-Jewish pogroms, recognising it as an attempt by the Tsarist government to *“turn the attention of all toiling people away from the real reason for their poverty,”* namely the Tsarist regime’s oppression. [quoted by Palij, **Op. Cit.**, p. 155]

The second congress also elected the Revolutionary Military Soviet of Peasants, Workers and Insurgents, which had “no powers to initiate policy but designed merely to implement the decisions of the periodic congresses.” [Footman, **Op. Cit.**, p. 267]

The third congress was the largest and most representative, with delegates from 72 volosts (in which two million people lived). This congress aimed to “clarify the situation and to consider the prospects for the future of the region.” It decided to conduct a voluntary mobilisation of men to fight the Whites and “rejected, with the approval of both rich and poor peasants, the Bolshevik expropriations.” [Palij, **Op. Cit.**, p. 158] Toward the end of the congress, it received a telegram from the Bolshevik commander Dybenko calling it “counter-revolutionary,” its organisers “outlaws” and dissolving it by his order. The congress immediately voted an indignant resolution in reply. This corrected Dybenko’s factual mistakes on who called it, informed him why it was called, gave him a history lesson on the Makhnovist region and asked him:

“Can there exist laws made by a few people who call themselves revolutionaries which permit them to outlaw a whole people who are more revolutionary than they are themselves? . . .

“Is it permissible, is it admissible, that they should come to the country to establish laws of violence, to subjugate a people who have just overthrown all lawmakers and all laws?

“Does there exist a law according to which a revolutionary has the right to apply the most severe penalties to a revolutionary mass, of which he calls himself the defender, simply because this mass has taken the good things which the revolution promised them, freedom and equality, without his permission?

“Should the mass of revolutionary people perhaps be silent when such a revolutionary takes away the freedom which they have just conquered?

“Do the laws of the revolution order the shooting of a delegate because he believes he ought to carry out the mandate given him by the revolutionary mass which elected him?

“Whose interests should the revolutionary defend; those of the Party or those of the people who set the revolution in motion with their blood?” [quoted by Arshinov, **Op. Cit.**, p. 103]

As we discuss in section 13, Trotsky’s order to ban the fourth congress indicates that such laws do exist, with the “entire peasant and labouring population are declared guilty of high treason if they dare participate in their own free congress.” [Arshinov, **Op. Cit.**, p. 123]

The last congress was held between 20th and 26th of October in Aleksandrovsk. One delegate was to be elected per 3000 people and one delegate per military unit. This gave 270 mostly peasant delegates. Only 18 were workers, of which 6 were Mensheviks, who walked out after Makhno called them “lapdogs of the bourgeoisie” during the discussion on “free socio-economic organisations”! [Malet, **Op. Cit.**, p. 109] The congress passed a number of resolutions, concentrating on the care of the wounded and the poorest part of the population,

a voluntary mobilisation, voluntary peasant contributions to feed the army and forced levies on the bourgeoisie.

According to Voline, the chairman, Makhnovist ideas were freely discussed:

“The idea of free Soviets, genuinely functioning in the interests of the working population; the question of direct relationships between peasants and city workers, based on mutual exchange of the products of their labour; the launching of a libertarian and egalitarian social organisation in the cities and the country; all these questions were seriously and closely studied by the delegates themselves, with the assistance and co-operation of qualified comrades.” [Op. Cit., p. 640]

He notes that the congress “decided that the workers, without any authority, would organise their economic, political and administrative life for themselves, by means of their own abilities, and through their own direct organs, united on a federative basis.” [Op. Cit., p. 641]

It is significant to note that the congress also discussed the activities of the Makhnovists within the city itself. One delegate raised the issue of the activities of the Kontrrazvedka, the Makhnovist “counter-intelligence” section. As noted in section 5, the Makhnovists, like all the armies in the Russian Civil War, had its intelligence service. It combined a number of functions, such as military reconnaissance, arrest and holding of prisoners, counter-insurgency (“Originally it had a punitive function, but because of improper treatment of prisoners of war, it was deprived of its punitive function.” [Palij, Op. Cit., p. 300]). The delegate stated that this “counter-espionage service” was engaged in “arbitrary acts and uncontrolled actions — of which some are very serious, rather like the Bolshevik Cheka.” [quoted by Voline, Op. Cit., p. 643] Immediately a commission of several delegates was created to investigate the situation. Voline argues that “[s]uch an initiative on the part of workers’ delegates would not have been possible under the Bolshevik regime. It was by activity of this kind that the congress gave a preview of the way in which a society should function from the beginning if it is based on a desire for progress and self-realisation.” [Voline, Ibid.] Sadly, the commission could not complete its work due to the city being evacuated soon after the congress.

Another incident shows that under the Makhnovists the civilian population was in control. A delegate noted that Klein, the Makhnovist military commander in the city, had become publicly and riotously drunk after issuing proclamations against drunkenness. Klein was called before the congress, which accepted his apology and his request to be sent to the front, away from the boredom of desk work which had driven him to drink! This, according to Voline, showed that the workers and their congress were the masters and the army its servant. [Voline, Op. Cit., pp. 645–7]

Outside of the congresses the work of local Soviets was to be co-ordinated through the Revolutionary Military Soviet (RMS), the first RMS was set up by the 2nd congress and consisted of one delegate for each of the 32 volsts the Makhnovists had liberated. The RMS was to be answerable to the congresses and limited to implementing their decisions but the difficult military situation meant this seldom happened. When it did (the 3rd Congress) the Congress had no problems with its actions in the previous period. After the Aleksandrovsk

congress, the RMS consisted of 22 delegates including three known Bolsheviks and four known Makhnovists, the Bolsheviks considered the remaining delegates “*anarchists or anarchist sympathisers*”.

The military chaos of 1920 saw the RMS dissolved and replaced by the Soviet of Revolutionary Insurgents of the Ukraine, which consisted of seven members elected by the insurgent army. Its secretary was a left Socialist Revolutionary. The RMS in addition to making decisions between Congresses carried out propaganda work including the editing of the Makhnovist paper “*The Road to Freedom*” and collected and distributed money.

Lastly, we must discuss what happened when the Makhnovists applied their ideas in any cities they liberated as this gives a clear idea of the way they applied their ideas in practice. Anarchist participant Yossif the Emigrant stated that it was “*Makhno’s custom upon taking a city or town to call the people together and announce to them that henceforth they are free to organise their lives as they think best for themselves. He always proclaims complete freedom of speech and press; he does not fill the prisons or begin executions, as the Communists do.*” He stressed it was “*the expression of the toilers themselves*” and “*the first great mass movement that by its own efforts seeks to free itself from government and establish economic self-determination. In that sense it is thoroughly Anarchistic.*” [Alexander Berkman, **The Bolshevik Myth**, pp. 193–5]

Arshinov paints a similar picture:

“As soon as they entered a city, they declared that they did not represent any kind of authority, that their armed forces obliged no one to any sort of obligation and had no other aim than to protect the freedom of the working people. The freedom of the peasants and the workers, said the Makhnovists, resides in the peasants and workers themselves and may not be restricted. In all fields of their lives it is up to the workers and peasants themselves to construct whatever they consider necessary. As for the Makhnovists — they can only assist them with advice, by putting at their disposal the intellectual or military forces they need, but under no circumstances can the Makhnovists prescribe for them in any manner.” [Arshinov, **Op. Cit.**, p. 148]

In addition, the Makhnovists “*fully applied the revolutionary principles of freedom of speech, of thought, of the press, and of political association. In all cities and towns occupied by the Makhnovists, they began by lifting all the prohibitions and repealing all the restrictions imposed on the press and on political organisations by one or another power.*” Indeed, the “*only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist-Revolutionaries and other statists was a prohibition on the formation of those ‘revolutionary committees’ which sought to impose a dictatorship over the people.*” They also took the opportunity to destroy every prison they got their hands on, believing that free people “*have no use for prisons*” which are “*always built only to subjugate the people, the workers and peasants.*” [**Op. Cit.**, p. 153, p. 154 and p. 153]

The Makhnovists encouraged self-management. Looking at Aleksandrovsk:

“They immediately invited the working population to participate in

a general conference of the workers of the city. When the conference met, a detailed report was given on the military situation in the region and it was proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations, basing themselves on the principles of labour and equality. The workers enthusiastically acclaimed all these suggestions; but they hesitated to carry them out, troubled by their novelty, and troubled mainly by the nearness of the front, which made them fear that the situation of the town was uncertain and unstable. The first conference was followed by a second. The problems of organising life according to principles of self-management by workers were examined and discussed with animation by the masses of workers, who all welcomed these ideas with the greatest enthusiasm, but who only with difficulty succeeded in giving them concrete forms. Railroad workers took the first step in this direction. They formed a committee charged with organising the railway network of the region . . . From this point, the proletariat of Aleksandrovsk began to turn systematically to the problem of creating organs of self-management.” [Op. Cit., p. 149]

Unfortunately, the Makhnovists occupied only two cities (Alexandrovsk for four weeks and Katerinoslav for two periods of one and five weeks respectively). As a rule the Makhnovist rank and file had little or no experience of life in the cities and this placed severe limits on their ability to understand the specific problems of the workers there. In addition, the cities did not have a large anarchist movement, meaning that the Mensheviks and Bolsheviks had more support than they did. Both parties were, at best, neutral to the Makhnovists and anarchists, so making it likely that they would influence the city workers against the movement. As Voline noted, the “*absence of a vigorous organised workers’ movement which could support the peasant insurgents*” was a disadvantage. [Op. Cit., p. 571]

There were minor successes in both cities. In Alexandrovsk, some trains were got running and a few factories reopened. In Katerinoslav (where the city was under a state of siege and constant bombardment by the Whites), the tobacco workers won a collective agreement that had long been refused and the bakers set themselves to preparing the socialisation of their industry and drawing up plans to feed both the army and the civilian population. Unsurprisingly, the bakers had long been under anarcho-syndicalist influence. [Malet, Op. Cit., p. 124]

Clearly, whenever they could, the Makhnovists practised their stated goals of working-class self-management and supported the organisational structures to ensure the control of and participation in the social revolution by the toiling masses. Equally, when they liberated towns and cities they did not impose their own power upon the working-class population but rather urged it to organise itself by setting up soviets, unions and other forms of working-class power. They urged workers to organise self-management of industry. True to the anarchist vision of a free society, they advocated and practised freedom of assembly, speech and organisation. In the words of historian Christopher Reed:

“Makhno’s Insurgent Army . . . was the quintessence of a self-administered, people’s revolutionary army. It arose from the peasants, it was com-

*posed of peasants, it handed power to the peasants. It encouraged the growth of communes, co-operatives and soviets but distrusted all permanent elites attempting to take hold within them. It would be foolish to think that Makhno was supported by every peasant or that he and his followers could not, on occasions, direct their cruelty towards dissidents within their own ranks, but, on the whole, the movement perhaps erred on the side of being too self-effacing, of handing too much authority to the population at key moments.” [From **Tsar to Soviets**, p. 260]*

As such, Makhnovist practice matched its theory. This can be said of few social movements and it is to their credit that this is the case.

8 Weren't the Makhnovists just Kulaks?

According to Trotsky (and, of course, repeated by his followers), “*Makhno created a cavalry of peasants who supplied their own horses. These were not the downtrodden village poor whom the October revolution first awakened, but the strong and well-fed peasants who were afraid of losing what they had. The anarchist ideas of Makhno (ignoring of the state, non-recognition of the central power) corresponded to the spirit of this kulak cavalry as nothing else could.*” He argued that the Makhnovist struggle was not the anarchist struggle against the state and capitalism, but rather “*a struggle of the infuriated petty property owner against the proletarian dictatorship.*” The Makhno movement, he stressed, was just an example of the “*convulsions of the peasant petty bourgeoisie which desired, of course, to liberate itself from capital but at the same time did not consent to subordinate itself to the dictatorship of the proletariat.*” [Lenin and Trotsky, **Kronstadt**, p. 80, p. 89 and pp. 89–90]

Unfortunately for those who use this kind of argument against the Makhnovists, it fails to stand up to any kind of scrutiny. Ignoring the sophistry of equating the Bolshevik party's dictatorship with the “dictatorship of the proletariat,” we can easily refute Trotsky's somewhat spurious argument concerning the background of the Makhnovists.

Firstly, however, we should clarify what is meant by the term “*kulak*.” According to one set of Trotskyist editors, it was “*popularly used to refer to well-to-do peasants who owned land and hired poor peasants to work it.*” [“*glossary*,” Lenin and Trotsky, **Kronstadt**, p. 146] The term itself derives from the Russian for “*fist*,” with appropriate overtones of grasping and meanness. In other words, a rural small-scale capitalist (employer of wage labour and often the renter of land and loaner of money as well) rather than a well-off peasant as such. Trotsky, however, muddies the water considerably by talking about the “*peasant petty bourgeoisie*” as well. Given that a peasant is “*petty*” (i.e. petit) bourgeois (i.e. own and use their own means of production), Trotsky is blurring the lines between rural capitalist (kulak) and the middle peasantry, as occurred so often under Bolshevik rule.

Secondly, we could just point to the eyewitness accounts of the anarchists Arshinov and Voline. Both stress that the Makhno movement was a mass revolutionary movement of the peasant and working poor in the Southern Ukraine. Arshinov states that after Denikin's troops had been broken in 1919, the Makhnovists “*literally swept through villages, towns and cities like an enormous broom*”

and the “returned *pomeshchiks* [landlords], the *kulaks*, the police, the priests” were destroyed, so refuting the “the myth spread by the Bolsheviks about the so-called *kulak* character of the Makhnovshchina.” Ironically, he states that “wherever the Makhnovist movement developed, the *kulaks* sought the protection of the Soviet authorities, and found it there.” [Op. Cit., p. 145] Yossif the Emigrant, another anarchist active in the movement, told anarchist Alexander Berkman that while there was a “kulak” element within it, “the great majority are not of that type.” [quoted by Berkman, *The Bolshevik Myth*, p. 187] According to Gallina Makhno (Makhno’s wife), when entering a town or village it was “always Makhno’s practice to compel the rich peasants, the *kulaki*, to give up their surplus wealth, which was then divided among the poor, Makhno keeping a share for his army. Then he would call a meeting of the villagers, address them on the purposes of the *povstantsi* [partisan] movement, and distribute his literature.” [Emma Goldman, *My Disillusionment in Russia*, p. 149]

However, this would be replying to Trotsky’s assertions with testimony which was obviously pro-Makhnovist. As such, we need to do more than this, we need to refute Trotsky’s assertions in depth, drawing on as many non-anarchist sources and facts as possible.

The key to refuting Trotsky’s argument that the Makhnovists were just kulaks is to understand the nature of rural life before and during 1917. Michael Malet estimates that in 1917, the peasantry could be divided into three broad categories. About 40 percent could no longer make a living off their land or had none, another 40 per cent who could make ends meet, except in a bad year, and 20 per cent who were relatively well off, with a fraction at the very top who were very well off. [Op. Cit., p. 117] Assuming that “kulak” simply meant “rich” or “well-off” peasant, then Trotsky is arguing that the Makhnovist movement represented and was based on this top 20 per cent. However, if we take the term “kulak” to mean “small rural capitalist” (i.e. employer of wage labour) then this figure would be substantially smaller as few within this group would employ hired labour or rent land. In fact, the percentage of peasant households in Russia employing permanent wage-labour was 3.3% in 1917, falling to 1% in 1920. [Teodor Shanin, *The Awkward Class*, p. 171]

In 1917, the peasants all across the Russian Empire took back the land stolen by the landlords. This led to two developments. Firstly, there was a “powerful levelling effect” in rural life. [Shanin, Op. Cit., p. 159] Secondly, the peasants would only support those who supported their aspirations for land reform (which was why the Bolsheviks effectively stole the Socialist-Revolutionary land policy in 1917). The Ukraine was no different. In 1917 the class structure in the countryside changed when the Hulyai Pole peasants were amongst the first to seize the landlords’ land. In August 1917 Makhno assembled all the landed gentry (“*pomeshchiks*”) of the region “and made them give him all the documents relating to lands and buildings.” After making an exact inventory of all this property and presenting a report to the local and then district congress of soviets, he “proceeded to equalise the rights of the *pomeshchiks* and *kulaks* with those of the poor peasant labourers in regard to the use of the land . . . the congress decided to let the *pomeshchiks* and *kulaks* have a share of the land, as well as tools and livestock, equal to that of the labourers.” Several other peasant congresses nearby followed this example and adopted the same measure. [Peter Arshinov, Op. Cit., pp. 53–4]

Most of this land, tools and livestock was distributed to poor peasants, the rest was used to set up voluntary communes where the peasants themselves (and not the state) self-managed the land. Thus the peasants' "*economic conditions in the region of the Makhno movement were greatly improved at the expense of the landlords, the church, monasteries, and the richest peasants.*" [Palij, **Op. Cit.**, p. 214] This redistribution was based on the principle that every peasant was entitled to as much land as their family could cultivate without the use of hired labour. The abolition of wage labour in the countryside was also the method the anarchists were to use in Spain to divide up the land some 20 years later.

We should also note that the Makhnovist policy of land reform based on the abolition of wage labour was, as we noted in section 7, the position agreed at the second regional congress called in 1919. The Makhnovists specifically argued with regards to the kulaks:

"We are sure that . . . the kulak elements of the village will be pushed to one side by the very course of events. The toiling peasantry will itself turn effortlessly on the kulaks, first by adopting the kulak's surplus land for general use, then naturally drawing the kulak elements into the social organisation." [cited by Michael Malet, **Op. Cit.**, pp. 118–9]

As such, when Trotsky talks about the "*downtrodden village poor whom the October revolution first awakened,*" he is wrong. In the area around Hulyai Pole it was **not** the October revolution which "*first awakened*" them into action, it was the activities of Makhno and the anarchists during the summer and autumn of 1917 which had done that (or, more correctly, it was their activities which aided this process as the poor peasants and landless workers needed no encouragement to expropriate the landlords).

Needless to say, this land redistribution reinforced Makhno's popularity with the people and was essential for the army's later popularity and its ability to depend on the peasants for support. However, the landlords and richer kulaks did not appreciate it and, unsurprisingly, tried to crush the movement when they could. Once the Austro-Germans invaded, the local rich took the opportunity to roll back the social revolution and the local **pomeshchiks** and **kulaks** formed a "*special volunteer detachment*" to fight Makhno once he had returned from exile in July 1918. [Arshinov, **Op. Cit.**, p. 59]

This system of land reform did not seek to divide the village. Indeed, the Makhnovist approach is sometimes called the "*united village*" theory. Rather than provoke unnecessary and damaging conflict behind the frontlines, land reform would be placed in the hands of the village community, which would ensure that even the kulaks would have a fair stake in the post-revolutionary society as everyone would have as much land as they could till without using hired labour. The Bolshevik policy, as we will see, aimed at artificially imposing "class conflict" upon the villages from without and was a disaster as it was totally alien to the actual socio-economic situation. Unsurprisingly, peasant communities **as a whole** rose up against the Bolsheviks all across Russia.

As such, the claim that the Makhnovists were simply "*kulaks*" is false as it fails to, firstly, acknowledge the actual pre-revolutionary composition of the peasantry and, secondly, to understand the social-revolution that had happened

in the region of Hulyai Pole in 1917 and, thirdly, totally ignores the actual Makhnovist position on land reform. As Michael Malet argues, the Bolsheviks “*totally misconstrued the nature of the Makhno movement. It was not a movement of kulaks, but of the broad mass of the peasants, especially the poor and middle peasants.*” [Op. Cit., p. 122]

This was sometimes acknowledged by Bolsheviks themselves. Iakovlev acknowledged in 1920 that in 1919 Makhno “*was a real peasant idol, an expression of all peasant spontaneity against . . . Communists in the cities and simultaneously against city capitalists and landowners. In the Makhno movement it is difficult to distinguish where the poor peasant begins [and] the ‘kulak’ ends. It was a spontaneous peasant movement . . . In the village we had no foothold, there was not one element with which we could join that would be our ally in the struggle against the bandits [sic!].*” [quoted by Palij, Op. Cit., p. 157]

According to a Soviet author present at the Makhnovist regional congresses on January 23 and February 12: “*In 1919 when I asked the chairman of the two Congresses (a Jewish farmer) whether the ‘kulaks’ were allowed to participate in the Congress, he angrily responded: ‘When will you finally stop talking about kulaks? Now we have no kulaks among us: everybody is tilling as much land as he wishes and as much as he can.’*” [quoted by Palij, Op. Cit., p. 293]

According to Christian Rakovskii, the Bolshevik ruler of Ukraine, “*three-fourths of the membership of the [partisan] bands were poor peasants.*” He presented a highly original and inventive explanation of this fact by arguing that “*rich peasants stayed in the village and paid poor ones to fight. Poor peasants were the hired army of the kulaks.*” [Vladimir N. Brovkin, **Behind the Front the Lines of the Civil War**, p. 112 and p. 328]

Even Trotsky (himself the son of a rich peasant!) let the cat out of the bag in 1919:

“The liquidation of Makhno does not mean the end of the Makhnovschyna, which has its roots in the ignorant popular masses.” [quoted by Malet, Op. Cit., p. 122]

Ultimately, all sources (including Bolshevik ones) accept that in the autumn of 1919 (at the very least) Makhno’s support was overwhelming and came from all sections of the population.

Even ignoring the fact there was a social revolution and the eye-witness Bolshevik accounts (including Trotsky’s!) which contradict Trotsky’s assertions, Trotsky can be faulted for other reasons.

The most important issue is simply that the Makhnovist movement could not have survived four years if (at best) 20 per cent of the population supported it. As Christopher Reed notes, when the Makhnovists were “*in retreat they would abandon their weapons and merge with the local population. The fact that they were able to succeed shows how closely they were linked with the ordinary peasants because such tactics made Makhno’s men very vulnerable to informers. There were very few examples of betrayal.*” [Op. Cit., p. 260] If Makhno’s social base was as weak as claimed there would have been no need for the Bolsheviks to enter into alliances with him, particularly in the autumn of 1920 when the Makhnovists held no significant liberated area. Even after the defeat of Wrangel and the subsequent Bolshevik betrayal and repression, Makhno’s mass base allowed him to remain active for months. Indeed, it was only when the

peasants themselves had become exhausted in 1921 due to worsening economic conditions and state repression, were the Makhnovists finally forced into exile.

In the attempt to “*eradicate his influence in the countryside*” the Bolsheviks “*by weight of numbers and consistent ruthlessness they achieved a partial success.*” This was achieved by state terrorism:

*“On the occupation of a village by the Red Army the **Cheka** would hunt out and hang all active Makhnovist supporters; an amenable Soviet would be set up; officials would be appointed or imported to organise the poor peasants . . . and three or four Red militia men left as armed support for the new village bosses.”* [David Footman, **Op. Cit.**, p. 292]

Moreover, in these “*military operations the Bolsheviks shot all prisoners. The Makhnovists shot all captured officers unless the Red rank and file strongly interceded for them. The rank and file were usually sent home, though a number volunteered for service with the Insurgents. Red Army reports complain of poor morale . . . The Reds used a number of Lettish and Chinese troops to decrease the risk of fraternisation.*” [Footman, **Op. Cit.**, p. 293] If the Makhnovists were made up of kulaks, why would the Bolsheviks fear fraternisation? Equally, if the Makhnovists were “kulaks” then how could they have such an impact on Red Army troops (who were mostly poor peasants)? After all, Trotsky had been complaining that “Makhnovism” had been infecting nearby Red Army troops and in August 1919 was arguing that it was “*still a poison which has infected backward units in the Ukrainian army.*” In December 1919, he noted that “*disintegration takes place in unstable units of our army when they come into contact with Makhno’s forces.*” It seems unlikely that a movement made up of “kulaks” could have such an impact. Moreover, as Trotsky noted, not all Makhnovists were anarchists, “*some of them wrongly regard themselves as Communists.*” Again, why would people who regarded themselves as Communists join a movement of “kulaks”? [**How the Revolution Armed**, vol. II, p. 367, p. 110 and p. 137]

In addition, it seems highly unlikely (to say the least!) that a movement which is alleged to be either made up of or supported by the kulaks could have had a land policy which emphasised and implemented an equal share for the poorest peasantry, not just of land but also of live and dead stock as well as opposing the hiring of labour. This fact is reinforced when we look at the peasant reaction to the Bolshevik (and, presumably, anti-kulak and pro-“downtrodden village poor”) land policy. Simply put, their policies resulted in massive peasant unrest directed against the Bolsheviks.

The Bolshevik land decrees of the 5th and 11th of February, 1919, stated that large landlord holdings would become state farms and all stock was to be taken over by the Ministry of Agriculture, with only between one third and one half of the land being reserved for poor peasants. This was “*largely irrelevant, since the peasantry had expected, and in some cases already controlled, all of it. To them, the government was taking away their land, and not seizing it from the landlords, then keeping some of it and handing the rest over to its rightful owners.*” [Malet, **Op. Cit.**, p. 134] Thus the land was to be expropriated by the state, **not** by the peasants. The result of this policy soon became clear:

“The Bolsheviks expropriation policy was countervailed by the peas-

ants' resistance based upon their assumption that 'the land belongs to nobody ... it can be used only by those who care about it, who cultivate it.' Thus the peasants maintained that all the property of the former landlords was now by right their own. This attitude was shared not only by the rich and middle peasants but also the poor and landless, for they all wished to be independent farmers. The poorer the areas, the more dissatisfied were the peasants with the Bolshevik decrees.

"Thus Communist agricultural policy and terrorism brought about a strong reaction against the new Bolshevik regime. By the middle of 1919, all peasants, rich and poor, distrusted the Bolsheviks." [Palij, **Op. Cit.**, p. 156]

The Bolshevik inspired Poor Peasant Committees were *"associated with this disastrous policy, were discredited, and their reintroduction would need the aid of troops."* [Malet, **Op. Cit.**, p. 135] The Makhnovists, in contrast, did not impose themselves onto the villages, nor did they attempt to tell the peasants what to do and how to divide the land. Rather they advocated the formation of Free Soviets through which these decisions could be made. This, along with their support for land reform, helped win them mass support.

After evacuating the Ukraine in mid-1919 due to the success of Denikin's counter-revolution, the Ukrainian Communists took time to mull over what had happened. The Central Committee's November 1919 resolution on the Ukraine *"gave top priority to the middle peasant — so often and so conveniently lumped in together with the kulak and dealt with accordingly — the transfer of landlord land to the poor peasants with only minimum exceptions for state farms."* These points were the basis of the new Ukrainian land law of 5th of February, 1920. [Malet, **Op. Cit.**, p. 135] This new law reflected long standing Makhnovist theory **and** practice. Therefore, the changing nature of Bolshevik land policy in the Ukraine indicates that Trotsky's claims are false. The very fact that the Bolsheviks had to adjust their policies in line with Makhnovist theory indicates that the later appealed to the middle and poor peasants.

Equally, it seems strange that the *"kulaks"* who apparently dominated the movement should have let themselves be led by poor peasants and workers. Voline presents a list of some of the participants of the movement and the vast majority are either peasants or workers. [**Op. Cit.**, pp. 688–91] As historian Michael Palij notes, *"[a]lmost to a man, they [the Makhnovist leadership] were of poor peasant origin, with little formal education."* [**Op. Cit.**, p. 254] Exceptions to the general rule were usually workers. Most were Anarchists or Socialist-Revolutionaries. [Palij, **Op. Cit.**, pp. 254–62]

Of course, it can be argued that the leadership of a movement need not come from the class which it claims to lead. The leadership of the Bolsheviks, for example, had very few actual proletarians within it. However, it seems unlikely that a class would select as its leaders members of the population it oppressed! Equally, it seems as unlikely that poor peasants and workers would let themselves lead a movement of kulaks, whose aims would be alien to theirs. After all, poor peasants would seek land reform while kulaks would view this as a threat to their social position. As can be seen from the Makhnovist land policy, they argued for (and implemented) radical land reform, placing the land into

the hands of peasants who worked the land without hiring labour (see section 7)

As regards Trotsky's argument that the Makhnovists had to be kulaks because they originally formed a cavalry unit, it is easy to refute. Makhno himself was the son of poor peasants, an agricultural labourer and a worker in a factory. He was able to ride a horse, so why could other poor peasants not do so? Ultimately, it simply shows that Trotsky knew very little of Ukrainian peasant life and society.

Given that the Bolshevik government was meant to be a "worker-peasant" power, it seems strange that Trotsky dismisses the concerns of the peasantry so. He should have remembered that peasant uprisings against the Bolshevik government occurred constantly under the Bolsheviks, forcing them (eventually) to, first, recognise the false nature of their peasant policies in 1919 and, second, to introduce the NEP in 1921. As such, it seems somewhat ironic for Trotsky to attack the Makhnovists for not following flawed Bolshevik ideology as regards the peasantry!

The Bolsheviks, as Marxists, saw the peasants as "petit bourgeoisie" and uninterested in the revolution except as a means to grab their own plot of land. Their idea of land collectivisation was limited to state ownership. The initial Bolshevik land strategy can be summed up as mobilising the poor peasantry against the rest on the one hand and mobilising the city worker against the peasants (through forced grain confiscation on the other). The lack of knowledge of peasant life was the basis of this policy, which was abandoned in 1919 when it was soon proven to be totally wrong. Rather than see wealth extremes rise, the 1917 revolution saw a general levelling.

As regards the peasantry, here as elsewhere the Bolsheviks claimed their strategy was the objectively necessary (only possible) one in the circumstances. And here again the Makhnovists demonstrate this to be false, as the Bolsheviks themselves acknowledged in practice by changing their agricultural policies and bringing them closer to the Makhnovist position.

Clearly, both factually and logically, Trotsky's arguments are false. Ultimately, like most Bolsheviks, Trotsky uses the term "*kulak*" as a meaningless term of abuse, with no relation to the actual class structure of peasant life. It simply means a peasant opposed to the Bolsheviks rather than an actual social strata. Essentially, he is using the standard Leninist technique of specifying a person's class (or ideas) based on whether they subscribe to (or simply follow without question) Leninist ideology (see section H.2.12 for further discussion of this). This explains why the Makhnovists went from being heroic revolutionaries to kulak bandits (and back again!) depending on whether their activity coincided with the needs of Bolshevik power or not. Expediency is not a sound base to build a critique, particularly one based simply on assertions like Trotsky's.

9 Were the Makhnovists anti-Semitic and pogromists?

No, they were not. Anyone who claims that the Makhnovist movement was anti-Semitic or conducted pogroms against Jews simply shows ignorance or a desire to deceive. As we will show, the Makhnovists were both theoretically and practically opposed to anti-Semitism and pogroms.

Unsurprisingly, many Leninists slander the Makhnovists on this score. Trot-

sky, for example, asserted in 1937 that Makhno's followers expressed "*a militant anti-Semitism.*" [Lenin and Trotsky, **Kronstadt**, p. 80] Needless to say, the Trotskyist editors of the book in question did not indicate that Trotsky was wrong in the accusation. In this way a slander goes unchecked and becomes "accepted" as being true. As the charge of "*militant anti-Semitism*" is a serious one, so it is essential that we (unlike Trotsky) provide evidence to refute it.

To do so we will present a chronological overview of the evidence against it. This will, to some degree, result in some duplication as well as lengthy quotations, however it is unavoidable. We are sorry to labour this point, but this allegation is sadly commonplace and it is essential to refute it fully.

Unsurprisingly, Arshinov's 1923 account of the movement takes on the allegations that the Makhnovists were anti-Semitic. He presents extensive evidence to show that the Makhnovists opposed anti-Semitism and pogroms. It is worth quoting him at length:

"In the Russian press as well as abroad, the Makhnovshchina was often pictured as a very restricted guerrilla movement, foreign to ideas of brotherhood and international solidarity, and even tainted with anti-Semitism. Nothing could be more criminal than such slanders. In order to shed light on this question, we will cite here certain documented facts which relate to this subject.

"An important role was played in the Makhnovist army by revolutionaries of Jewish origin, many of whom had been sentenced to forced labour for participation in the 1905 revolution, or else had been obliged to emigrate to Western Europe or America. Among others, we can mention:

*"**Kogan** — vice-president of the central organ of the movement, the Regional Revolutionary Military Council of Hulyai Pole. Kogan was a worker who, for reasons of principle, had left his factory well before the revolution of 1917, and had gone to do agricultural work in a poor Jewish agricultural colony. Wounded at the battle of Peregonovka, near Uman, against the Denikinists, he was seized by them at the hospital at Uman where he was being treated, and, according to witnesses, the Denikinists killed him with sabres.*

*"**L. Zin'kovsky (Zadov)** — head of the army's counter espionage section, and later commander of a special cavalry regiment. A worker who before the 1917 revolution was condemned to ten years of forced labour for political activities. One of the most active militants of the revolutionary insurrection.*

*"**Elena Keller** — secretary of the army's cultural and educational section. A worker who took part in the syndicalist movement in America. One of the organisers of the 'Nabat' Confederation.*

*"**Iosif Emigrant (Gotman)** — Member of the army's cultural and educational section. A worker who took an active part in the Ukrainian anarchist movement. One of the organisers of the 'Nabat' Confederation, and later a member of its secretariat.*

*"**Ya. Alyi (Sukhovol'sky)** — worker, and member of the army's cultural and educational section. In the Tsarist period he was con-*

demned to forced labor for political activity. One of the organisers of the 'Nabat' Confederation and a member of its secretariat.

"We could add many more names to the long list of Jewish revolutionaries who took part in different areas of the Makhnovist movement, but we will not do this, because it would endanger their security.

"At the heart of the revolutionary insurrection, the Jewish working population was among brothers. The Jewish agricultural colonies scattered throughout the districts of Mariupol, Berdyansk, Aleksandrovsk and elsewhere, actively participated in the regional assemblies of peasants, workers and insurgents; they sent delegates there, and also to the regional Revolutionary Military Council.

"Following certain anti-Semitic incidents which occurred in the region in February, 1919, Makhno proposed to all the Jewish colonies that they organise their self-defence and he furnished the necessary guns and ammunition to all these colonies. At the same time Makhno organised a series of meetings in the region where he appealed to the masses to struggle against anti-Semitism.

"The Jewish working population, in turn, expressed profound solidarity and revolutionary brotherhood toward the revolutionary insurrection. In answer to the call made by the Revolutionary Military Council to furnish voluntary combatants to the Makhnovist insurgent army, the Jewish colonies sent from their midst a large number of volunteers.

"In the army of the Makhnovist insurgents there was an exclusively Jewish artillery battery which was covered by an infantry detachment, also made up of Jews. This battery, commanded by the Jewish insurgent Shneider, heroically defended Hulyai Pole from Denikin's troops in June, 1919, and the entire battery perished there, down to the last man and the last shell.

"In the extremely rapid succession of events after the uprising of 1918-19, there were obviously individuals who were hostile to Jews, but these individuals were not the products of the insurrection; they were products of Russian life. These individuals did not have any importance in the movement as a whole. If people of this type took part in acts directed against Jews, they were quickly and severely punished by the revolutionary insurgents.

"We described earlier the speed and determination with which the Makhnovists executed Hryhoriyiv and his staff, and we mentioned that one of the main reasons for this execution was their participation in pogroms of Jews.

"We can mention other events of this nature with which we are familiar.

"On May 12, 1919, several Jewish families — 20 people in all — were killed in the Jewish agricultural colony of Gor'kaya, near Aleksandrovsk. The Makhnovist staff immediately set up a special commission to investigate this event. This commission discovered that

the murders had been committed by seven peasants of the neighbouring village of Uspenovka. These peasants were not part of the insurrectionary army. However, the Makhnovists felt it was impossible to leave this crime unpunished, and they shot the murderers. It was later established that this event and other attempts of this nature had been carried out at the instigation of Denikin's agents, who had managed to infiltrate the region and had sought by these means to prepare an atmosphere favourable for the entry of Denikin's troops into the Ukraine.

“On May 4th or 5th, 1919, Makhno and a few commanders hurriedly left the front and went to Hulyai Pole, where they were awaited by the Extraordinary Plenipotentiary of the Republic, L. Kamenev, who had arrived from Khar'kov with other representatives of the Soviet government. At the Verkhni Tokmak station, Makhno saw a poster with the words: ‘Death to Jews, Save the Revolution, Long Live Batko Makhno.’

“‘Who put up that poster?’ Makhno asked.

“He learned that the poster had been put up by an insurgent whom Makhno knew personally, a soldier who had taken part in the battle against Denikin's troops, a person who was in general decent. He presented himself immediately and was shot on the spot.

“Makhno continued the journey to Hulyai Pole. During the rest of the day and during his negotiations with the Plenipotentiary of the Republic, he could not free himself from the influence of this event. He realised that the insurgent had been cruelly dealt with, but he also knew that in conditions of war and in view of Denikin's advance, such posters could represent an enormous danger for the Jewish population and for the entire revolution if one did not oppose them quickly and resolutely.

“When the insurrectionary army retreated toward Uman in the summer of 1919, there were several cases when insurgents plundered Jewish homes. When the insurrectionary army examined these cases, it was learned that one group of four or five men was involved in all these incidents — men who had earlier belonged to Hryhoriyiv's detachments and who had been incorporated into the Makhnovist army after Hryhoriyiv was shot. This group was disarmed and discharged immediately. Following this, all the combatants who had served under Hryhoriyiv were discharged from the Makhnovist army as an unreliable element whose re-education was not possible in view of the unfavorable conditions and the lack of time. Thus we see how the Makhnovists viewed anti-Semitism. Outbursts of anti-Semitism in various parts of the Ukraine had no relation to the Makhnovshchina.

“Wherever the Jewish population was in contact with the Makhnovists, it found in them its best protectors against anti-Semitic incidents. The Jewish population of Hulyai Pole, Aleksandrovsk, Berdyansk, Mariupol, as well as all the Jewish agricultural colonies scattered throughout the Donets region, can themselves corroborate the fact that they always found the Makhnovists to be true revolutionary

friends, and that due to the severe and decisive measures of the Makhno visits, the anti-Semitic leanings of the counter-revolutionary forces in this region were promptly squashed.

*“Anti-Semitism exists in Russia as well as in many other countries. In Russia, and to some extent in the Ukraine, it is not a result of the revolutionary epoch or of the insurrectionary movement, but is on the contrary a vestige of the past. The Makhnovists always fought it resolutely in words as well as deeds. During the entire period of the movement, they issued numerous publications calling on the masses to struggle against this evil. It can firmly be stated that in the struggle against anti-Semitism in the Ukraine and beyond its borders, their accomplishment was enormous.” [Arshinov, **Op. Cit.**, pp. 211–215]*

Arshinov then goes on to quote an appeal published by Makhnovists together with anarchists referring to an anti-Semitic incident which took place in the spring of 1919. It is called **WORKERS, PEASANTS AND INSURGENTS FOR THE OPPRESSED, AGAINST THE OPPRESSORS — ALWAYS!**:

“During the painful days of reaction, when the situation of the Ukrainian peasants was especially difficult and seemed hopeless, you were the first to rise as fearless and unconquerable fighters for the great cause of the liberation of the working masses. . . This was the most beautiful and joyful moment in the history of our revolution. You marched against the enemy with weapons in your hands as conscious revolutionaries, guided by the great idea of freedom and equality. . . But harmful and criminal elements succeeded in insinuating themselves into your ranks. And the revolutionary songs, songs of brotherhood and of the approaching liberation of the workers, began to be disrupted by the harrowing cries of poor Jews who were being tormented to death. . . On the clear and splendid foundation of the revolution appeared indelible dark blots caused by the parched blood of poor Jewish martyrs who now, as before, continue to be innocent victims of the criminal reaction, of the class struggle . . . Shameful acts are being carried out. Anti-Semitic pogroms are taking place.

“Peasants, workers and insurgents! You know that the workers of all nationalities — Russians, Jews, Poles, Germans, Armenians, etc. — are equally imprisoned in the abyss of poverty. You know that thousands of Jewish girls, daughters of the people, are sold and dishonoured by capital, the same as women of other nationalities. You know how many honest and valiant revolutionary Jewish fighters have given their lives for freedom in Russia during our whole liberation movement. . . The revolution and the honour of workers obliges all of us to declare as loudly as possible that we make war on the same enemies: on capital and authority, which oppress all workers equally, whether they be Russian, Polish, Jewish, etc. We must proclaim everywhere that our enemies are exploiters and oppressors of various nationalities: the Russian manufacturer, the German iron magnate, the Jewish banker, the Polish aristocrat . . . The bourgeoisie of all countries and all nationalities is united in a bitter struggle against

the revolution, against the labouring masses of the whole world and of all nationalities.

“Peasants, workers and insurgents! At this moment when the international enemy — the bourgeoisie of all countries — hurries to the Russian revolution to create nationalist hatred among the mass of workers in order to distort the revolution and to shake the very foundation of our class struggle — the solidarity and unity of all workers — you must move against conscious and unconscious counter-revolutionaries who endanger the emancipation of the working people from capital and authority. Your revolutionary duty is to stifle all nationalist persecution by dealing ruthlessly with all instigators of anti-Semitic pogroms.

“The path toward the emancipation of the workers can be reached by the union of all the workers of the world.” [quoted by Arshinov, **Op. Cit.**, 215–7]

Arshinov also quotes an order issued by Makhno to “*all revolutionary insurgents without exception*” which states, in part, that the “*goal of our revolutionary army, and of every insurgent participating in it, is an honourable struggle for the full liberation of the Ukrainian workers from all oppression.*” This was “*why every insurgent should constantly keep in mind that there is no place among us for those who, under the cover of the revolutionary insurrection, seek to satisfy their desires for personal profit, violence and plunder at the expense of the peaceful Jewish population.*” [quoted by Arshinov, **Op. Cit.**, pp. 217–8]

Unsurprisingly, as an anarchist, Makhno presents a class analysis of the problem of racism, arguing as follows:

“Every revolutionary insurgent should remember that his personal enemies as well as the enemies of all the people are the rich bourgeoisie, regardless of whether they be Russian, or Jewish, or Ukrainian. The enemies of the working people are also those who protect the unjust bourgeois regime, i.e., the Soviet Commissars, the members of repressive expeditionary corps, the Extraordinary Commissions which go through the cities and villages torturing the working people who refuse to submit to their arbitrary dictatorship. Every insurgent should arrest and send to the army staff all representatives of such expeditionary corps, Extraordinary Commissions and other institutions which oppress and subjugate the people; if they resist, they should be shot on the spot. As for any violence done to peaceful workers of whatever nationality — such acts are unworthy of any revolutionary insurgent, and the perpetrator of such acts will be punished by death.” [quoted by Arshinov, **Op. Cit.**, p. 218]

It should also be noted that the chairmen of three Makhnovist regional congresses were Jewish. The first and second congresses had a Jewish chairman [Palij, **Op. Cit.**, p. 293], while Voline was the chair for the fourth one held at Aleksandrovsk. Similarly, one of the heads of the army’s counter-espionage section was Jewish. [Arshinov, **Op. Cit.**, p. 212] Little wonder both Arshinov and Voline stress that an important role was played by Jews within the movement.

The Jewish American anarchists Alexander Berkman and Emma Goldman were also in Russia and the Ukraine during the revolution. Between 1920 and 1921, they were in contact with anarchists involved with the Makhnovists and were concerned to verify what they had heard about the movement from Bolshevik and other sources. Berkman recounts meeting the Jewish anarchist Yossif the Emigrant (shot by the Bolsheviks in late 1920). Yossif stated that “*Nestor is merciless toward those guilty of Jew-baiting. Most of you have read his numerous proclamations against pogroms, and you know how severely he punishes such things.*” He stressed that any stories of atrocities and pogroms committed by the Makhnovists were “*lies wilfully spread by the Bolsheviks*” who “*hate Nestor worse than they do Wrangel.*” For Yossif, “*Makhno represents the real spirit of October.*” [quoted by Berkman, **Op. Cit.**, pp. 187–9] He also notes that Gallina Makhno, Nestor’s wife, would “*slightly raise her voice in indignation when reports of Jew-baiting by **povstantsi** [partisans] were mentioned. These stories were deliberately spread by the Bolsheviks, she averred. No-one could be more severe in punishing such excesses than Nestor. Some of his best comrades are Jews; there are a number of them in the Revolutionary Soviet and in other branches of the army. Few men are so loved and respected by the **povstantsi** as Yossif the Emigrant, who is a Jew, and Makhno’s best friend.*” [Berkman, **Op. Cit.**, pp. 238–9] Both Goldman and Berkman became friends with Makhno during his exile in Paris.

After his exile, Makhno himself spent time refuting allegations of anti-Semitism. Two articles on this subject are contained in **The Struggle Against the State and other Essays**, a collection of Makhno’s exile writings. In the article “*The Makhnovshchina and Anti-Semitism*” he recounts various examples of the “*uncompromising line on the anti-Semitism of pogromists*” which the Makhnovists took “*throughout its entire existence.*” This was “*because it was a genuinely revolutionary toilers’ movement in the Ukraine.*” He stressed that “[a]t no time did the movement make it its business to carry out pogroms against Jews nor did it ever encourage any.” [**The Struggle Against the State and Other Essays**, p. 38 and p. 34] He wrote another article (called “*To the Jews of All Countries*”):

“*In my first ‘Appeal to Jews, published in the French libertarian newspaper, **Le Liberaire**, I asked Jews in general, which is to say the bourgeois and the socialist ones as well as the ‘anarchist’ ones like Yanovsky, who have all spoken of me as a pogromist against Jews and labelled as anti-Semitic the liberation movement of the Ukrainian peasants and workers of which I was the leader, to detail to me the specific facts instead of blathering vacuously away: just where and just when did I or the aforementioned movement perpetrate such acts? . . . Thus far, no such evidence advanced by Jews has come to my attention. The only thing that has appeared thus far in the press generally, certain Jewish anarchist organs included, regarding myself and the insurgent movement I led, has been the product of the most shameless lies and of the vulgarity of certain political mavericks and their hirelings.*” [**Op. Cit.**, p. 28]

It should be noted that Yanovsky, editor of the Yiddish language anarchist paper **Freie Arbeiter Stimme** later admitted that Makhno was right.

Yanovsky originally believed the charges of anti-Semitism made against Makhno, going so far as ignoring Makhno's appeal to him out of hand. However, by the time of Makhno's death in 1934, Yanovsky had learned the truth:

“So strongly biased was I against him [Makhno] at that time I did not think it necessary to find out whether my serious accusation was founded on any real facts during the period of his great fight for real freedom in Russia. Now I know that my accusations of anti-Semitism against Makhno were built entirely on the lies of the Bolsheviks and to the rest of their crimes must be added this great crime of killing his greatness and the purity of this fighter for freedom.”

Due to this, he could not forgive himself for *“so misjudg[ing] a man merely on the basis of calumny by his bitter enemies who more than once shamefully betrayed him, and against whom he fought so heroically.”* He also notes that it had *“become known to me that a great many Jewish comrades were heart and soul with Makhno and the whole Makhno movement. Amongst them was one whom I knew well personally, Joseph Zutman of Detroit, and I know that he would not have had anything to do with persons, or a movement, which possessed the slightest leaning towards anti-Semitism.”* [“appendix,” **My Visit to the Kremlin**, pp. 36–7]

However, by far the best source to refute claims of anti-Semitism the work of the Jewish anarchist Voline. He summarises the extensive evidence against such claims:

“We could cover dozens of pages with extensive and irrefutable proofs of the falseness of these assertions. We could mention articles and proclamations by Makhno and the Council of Revolutionary Insurgents denouncing anti-Semitism. We could tell of spontaneous acts by Makhno himself and other insurgents against the slightest manifestation of the anti-Semitic spirit on the part of a few isolated and misguided unfortunates in the army and the population. . . One of the reasons for the execution of Grigoriev by the Makhnovists was his anti-Semitism and the immense pogrom he organised at Elizabetgrad . . .

“We could cite a whole series of similar facts, but we do not find it necessary . . . and will content ourselves with mentioning briefly the following essential facts:

“1. A fairly important part in the Makhnovist movement was played by revolutionists of Jewish origin.

“2. Several members of the Education and Propaganda Commission were Jewish.

“3. Besides many Jewish combatants in various units of the army, there was a battery composed entirely of Jewish artillery men and a Jewish infantry unit.

“4. Jewish colonies in the Ukraine furnished many volunteers to the Insurrectionary Army.

“5. In general the Jewish population, which was very numerous in the Ukraine, took an active part in all the activities of the movement.

The Jewish agricultural colonies which were scattered throughout the districts of Mariupol, Berdiansk, Alexandrovsk, etc., participated in the regional assemblies of workers, peasants and partisans; they sent their delegates to the regional Revolutionary Military Council.

“6. Rich and reactionary Jews certainly had to suffer from the Makhnovist army, not as Jews, but just in the same way as non-Jewish counter-revolutionaries.” [The Unknown Revolution, pp. 967–8]

However, it could be claimed that these accounts are from anarchists and so are biased. Ignoring the question of why so many Jewish anarchists should defend Makhno if he was, in fact, a pogromist or anti-Semite, we can turn to non-anarchist sources for confirmation of the fact that Makhno and the Makhnovist movement were not anti-Semites.

First, we turn to Voline, who quotes the eminent Jewish writer and historian M. Tcherikover about the question of the Makhnovists and anti-Semitism. Tcherikover had, for a number of years, had specialised in research on the persecutions of the Jews in Russia. The Jewish historian states *“with certainty that, on the whole, the behaviour of Makhno’s army cannot be compared with that of the other armies which were operating in Russian during the events 1917–21. Two facts I can certify absolutely explicitly.*

*“1. It is undeniable that, of all these armies, including the Red Army, the Makhnovists behaved best with regard the civil population in general and the Jewish population in particular. I have numerous testimonies to this. The proportion of **justified** complaints against the Makhnovist army, in comparison with the others, is negligible.*

*“2. Do not speak of pogroms alleged to have been organised by Makhno himself. That is a slander or an error. Nothing of the sort occurred. As for the Makhnovist Army, I have had hints and precise denunciations on this subject. But, up to the present, every time I have tried to check the facts, I have been obliged to declare that on the day in question no Makhnovist unit could have been at the place indicated, the whole army being far away from there. Upon examining the evidence closely, I established this fact, every time, with absolute certainty, at the place and on the date of the pogrom, no **Makhnovist** unit was operating or even located in the vicinity. **Not once** have I been able to prove the existence of a Makhnovist unit at the place a pogrom against the Jews took place. Consequently, the pogroms in question could not have been the work of the Makhnovists.” [quoted by Voline, **Op. Cit.**, p. 699]*

This conclusion is confirmed by later historians. Paul Avrich notes that *“[c]harges of Jew-baiting and of anti-Jewish pogroms have come from every quarter, left, right, and centre. Without exception, however, they are based on hearsay, rumour, or intentional slander, and remain undocumented and unproved.”* He adds that the *“Soviet propaganda machine was at particular pains to malign Makhno as a bandit and pogromist.”* Wishing to verify the conclusions of Tcherikover proved by Voline, Avrich examined several hundred photographs in the Tcherikover Collection, housed in the YIVO Library in New York and depicting anti-Jewish atrocities in the Ukraine during the Civil War. He found that *“only one [was] labelled as being the work of the Makhnovists, though even here neither Makhno himself nor any of his recognisable subordinates are to be seen, nor is there any indication that Makhno had authorised the raid or, indeed,*

that the band involved was in fact affiliated with his Insurgent Army.” Avrich then states that “there is evidence that Makhno did all in his power to counteract anti-Semitic tendencies among his followers” and that “a considerable number of Jews took part in the Makhnovist movement.” He also points out that the Jewish anarchists Alexander Berkman, Emma Goldman, Sholem Schwartzbard, Voline, Senya Fleshin, and Mollie Steimer did not criticise Makhno as an anti-Semite, they also “defended him against the campaign of slander that persisted from all sides.” [**Anarchist Portraits**, pp. 122–3] It should be noted that Schwartzbard assassinated the Nationalist leader Petliura in 1926 because he considered him responsible for pogroms conducted by Nationalist troops during the civil war. He shot Petliura the day after he, Makhno and Berkman had seen him at a Russian restaurant in Paris. [Malet, **Op. Cit.**, p. 189]

Michael Malet, in his account of the Makhnovists, states that “there is overwhelming evidence that Makhno himself was not anti-Semitic.” [**Op. Cit.**, p. 168] He indicates that in the period January to September 1919, the Central Committee of Zionist Organisations in Russia listed the Nationalists as creating 15,000 victims of pogroms, then the Denikinists with 9,500 followed by Hryhoriyiv, Sokolovsky, Struk, Yatsenko and Soviet troops (500 victims). Makhno is not mentioned. Of the pogroms listed, almost all took place on the western Ukraine, where the local otamany (warlords) and the Nationalists were strong. Very few took place where Makhno’s influence predominated, the nearest being in Katerinoslav town and Kherson province; none in the provinces of Katerinoslav or Tavria. It should also be noted that the period of January to June of that year was one of stability within the Makhnovist region, so allowing them the space to apply their ideas. Malet summarises:

“Even granted the lower level of Jewish involvement in left-bank trade, the almost total lack of anti-Semitic manifestations would show that Makhno’s appeals, at a time when anti-Semitism was fast becoming fashionable, did not go unheeded by the population. There were a number of Jewish colonies in the south-east Ukraine.” [**Op. Cit.**, p. 169]

Unsurprisingly, Malet notes that apart from certain personal considerations (such as his friendship with a number of Jews, including Voline and Yossif the Emigrant), “the basis of Makhno’s hostility to anti-Semitism was his anarchism. Anarchism has always been an international creed, explicitly condemning all forms of racial hatred as incompatible with the freedom of individuals and the society of equals.” And like other serious historians, he points to “the continual participation in the movement of both intellectual Jews from outside, and Jews from the local colonies” as “further proof . . . of the low level of anti-Semitism within the Makhnovshchina.” [**Op. Cit.**, p. 171 and pp. 171–2]

Anarchist Serge Cipko summarises the literature by stating that the “scholarly literature that discusses Makhno’s relationships with the Jewish population is of the same opinion [that the Makhnovists were not anti-Semitic] and concur that unlike the Whites, Bolsheviks and other competing groups in Ukraine during the Revolution, the Makhnovists did not engage in pogroms.” [“Nestor Makhno: A Mini-Historiography of the Anarchist Revolution in Ukraine, 1917–1921,” pp. 57–75, **The Raven**, no. 13, p. 62]

Historian Christopher Reed concurs, noting that “Makhno actively opposed anti-Semitism . . . Not surprisingly, many Jews held prominent positions in the

Insurgent movement and Jewish farmers and villagers staunchly supported Makhno in the face of the unrestrained anti-Semitism of Ukrainian nationalists like Grigoriev and of the Great Russian chauvinists like the Whites.” [Op. Cit., pp. 263–4] Arthur E. Adams states that “*Makhno protected Jews and in fact had many serving on his own staff.*” [Bolsheviks in the Ukraine, p. 402]

We apologise again for labouring this point, but the lie that Makhno and the Makhnovists were anti-Semitic is relatively commonplace and needs to be refuted. As noted, Trotskyists repeat Trotsky’s false assertions without correction. Other repeat the lie from other sources. It was essential, therefore, to spend time making the facts available and to nail the lie of Makhnovist anti-Semitism once and for all!

10 Did the Makhnovists hate the city and city workers?

For some reason the Makhnovists have been portrayed as being against the city and even history as such. This assertion is false, although sometimes made. For example, historian Bruce Lincoln states that Makhno “*had studied the anarchist writings of Bakunin, whose condemnation of cities and large-scale industries fit so well with the anti-urban, anti-industrial feelings of the Ukrainian peasants, and his program was precisely the sort that struck responsive chords in peasant hearts.*” [Red Victory, p. 325] Lincoln fails to present any evidence for this claim. This is unsurprising as it is doubtful that Makhno read such condemnations in Bakunin as they do not, in fact, exist. Similarly, the Makhnovist “*program*” (like anarchism in general) was not “*anti-urban*” or “*anti-industrial.*”

However, Lincoln’s inventions are mild compared to Trotsky’s. According to Trotsky, “*the followers of Makhno*” were marked by “*hatred for the city and the city worker.*” He later gives some more concrete examples of this “*hostility to the city*” which, as with the general peasant revolt, also “*nourished the movement of Makhno, who seized and looted trains marked for the factories, the plants, and the Red Army; tore up railway tracks, shot Communists, etc.*” [Lenin and Trotsky, Kronstadt, p. 80 and p. 89]

Unsurprisingly, Trotsky simply shows his ignorance of the Makhno movement by these statements. To refute Trotsky’s claim we can simply point to how the Makhnovists acted once they occupied a city. As we discuss in section 7, the first thing the Makhnovists did was to call a conference of workers and urge them to organise their own affairs directly, using their own class organs of self-management (soviets, unions, etc.). Hardly the activity of a group of people who allegedly “*hated*” city workers!

We can also point to the fact that the Makhnovists arranged direct exchanges of goods between the towns and country. In early 1918, for example, corn was shipped directly to a Moscow factory in return for textiles (without state interference). In 1919, 1500 tons of grain (and a small amount of coal) was sent by train to Petrograd and Moscow where the commander of the train was to exchange it again for textiles. The initiative in both cases came from the Hulyai Pole peasants. Again, hardly the work of city-hating peasants.

Peter Arshinov indicates the underlying theory behind the Makhnovists as regards the relations between city and country:

“The Makhnovshchina . . . understands that the victory and consolidation of the revolution . . . cannot be realised without a close alliance between the working classes of the cities and those of the countryside. The peasants understand that without urban workers and powerful industrial enterprises they will be deprived of most of the benefits which the social revolution makes possible. Furthermore, they consider the urban workers to be their brothers, members of the same family of workers.

“There can be no doubt that, at the moment of the victory of the social revolution, the peasants will give their entire support to the workers. This will be voluntary and truly revolutionary support given directly to the urban proletariat. In the present-day situation [under the Bolsheviks], the bread taken by force from the peasants nourishes mainly the enormous governmental machine. The peasants see and understand perfectly that this expensive bureaucratic machine is not in any way needed by them or by the workers, and that in relation to the workers it plays the same role as that of a prison administration toward the inmates. This is why the peasants do not have the slightest desire to give their bread voluntarily to the State. This is why they are so hostile in their relations with the contemporary tax collectors — the commissars and the various supply organs of the State.

*“But the peasants always try to enter into **direct** relations with the urban workers. The question was raised more than once at peasant congresses, and the peasants always resolved it in a revolutionary and positive manner.” [Op. Cit., p. 258]*

Simply put, Trotsky misinterprets hostility to the repressive policies of the Bolshevik dictatorship with hostility to the city.

Moreover, ignoring the **actual** relationships of the Makhnovists with the city workers, we can fault Trotsky’s arguments without recourse to such minor things as facts. This is because every one of his “examples” of “*hatred for the city and the city worker*” can be explained by more common sense arguments.

As regards the destruction of trains and railway tracks, a far simpler and more plausible explanation can be found than Trotsky’s “*hostility to the city*.” This is the fact that a civil war was taking place. Both the Reds and Whites used armoured trains to move troops and as bases of operations. To destroy the means by which your enemy attacks you is common sense! Equally, in the chaotic times of the war, resources were often in low supply and in order to survive the Makhnovists had to “*loot*” trains (needless to say, Trotsky does not explain how the Makhnovists knew the trains were “*marked for the factories*.”). It should be noted that the Bolsheviks “*looted*” the countryside, can we surmise that the Bolsheviks simply expressed “*hostility to the village*”?

As regards the shooting of Communists, a far simpler and more plausible explanation also exists. Rather than show “*hostility to the city*,” it shows “*hostility*” to the Communist Party, its policies and its authoritarian ideas. Given that the Bolsheviks had betrayed the Makhnovists on **three** occasions (see section 13) and attacked them, “*hostility*” to Communists seems a sensible position to take! Equally, the first Bolshevik attack on the Makhnovists occurred in mid-1919, when the Bolsheviks began justifying their party dictatorship as essential

for the success of the revolution. The other two occurred in 1920, when the Bolsheviks were announcing to the whole world at the Communist International (to quote Zinoviev) that “*the dictatorship of the proletariat is at the same time the dictatorship of the Communist Party.*” [**Proceedings and Documents of the Second Congress 1920**, vol. 1, p. 152] Given this, perhaps the fact that the Makhnovists shot Communists can be explained in terms of defence against Bolshevik betrayal and opposition to the dictatorship of the Communist Party rather than “*hostility to the city.*” Needless to say, the Communists shot Makhnovists and anarchists. What does that suggest a “*hostility*” to by the Bolsheviks? Working-class autonomy and freedom?

Clearly, Trotsky was clutching at straws in his smearing of the Makhnovist movement as haters of the city worker. The “*hostility*” Trotsky speaks of can be far more easily explained in terms of the necessities imposed upon the Makhnovists by the civil war and the betrayals of the Bolsheviks. As such, it would be fairer to state that the Makhnovists showed “*hostility*” or “*hatred*” to the city or city workers only if you equate both with the Bolshevik party dictatorship. In other words, the Makhnovists showed “*hostility*” to the new ruling class of the Communist Party hierarchy.

All this does not mean that there were not misunderstandings between the Makhno movement, a predominantly rural movement, and the workers in the cities. Far from it. Equally, it can be said that the Makhnovists did not understand the workings of an urban economy and society as well as they understood their own. However, they made no attempt to **impose** their world-view on the city workers (unlike the Bolsheviks, who did so on both urban and rural workers). However, ignorance of the city and its resulting misunderstandings do not constitute “*hostility*” or “*hatred.*”

Moreover, where these misunderstandings developed show that the claims that the Makhnovists hated the city workers are simply false. Simply put, the misunderstanding occurred when the Makhnovists had liberated cities from the Whites. As we discussed in section 7, the first thing the Makhnovists did was to call a conference of workers’ delegates to discuss the current situation and to urge them to form soviets, unions and co-operatives in order to manage their own affairs. This hardly shows “*hatred*” of the city worker. In contrast, the first thing the Bolsheviks did in taking a city was to form a “*revolutionary committee*” to govern the town and implement Bolshevik policy.

This, needless to say, shows a distinct “*hostility*” to the city workers on the part of the Bolsheviks. Equally, the Bolshevik advocacy of party dictatorship to overcome the “*wavering*” of the working class. In the words of Trotsky himself (in 1921):

“The Workers’ Opposition has come out with dangerous slogans, making a fetish of democratic principles! They place the workers’ right to elect representatives above the Party, as if the party were not entitled to assert its dictatorship even if that dictatorship temporarily clashed with the passing moods of the workers’ democracy. It is necessary to create amongst us the awareness of the revolutionary birthright of the party, which is obliged to maintain its dictatorship, regardless of temporary wavering even in the working classes. This awareness is for us the indispensable element. The dictatorship does not base itself at every given moment on the formal principle of a

workers' democracy." [quoted by Samuel Farber, **Before Stalinism**, p. 209]

Opposing workers' democracy because working people could make decisions that the party thought were wrong shows a deep "*hostility*" to the **real** city workers and their liberty and equality. Equally, Bolshevik repression of workers' strikes, freedom of speech, assembly, organisation and self-determination shows far more "*hostility*" to the city worker than a few Makhnovist misunderstandings!

All in all, any claim that the Makhnovists "*hated*" city workers is simply false. While some Makhnovists may not have liked the city nor really understood the complexities of an urban economy, they did recognise the importance of encouraging working-class autonomy and self-organisation within them and building links between the rural and urban toilers. While the lack of a large-scale anarcho-syndicalist movement hindered any positive construction, the Makhnovists at least tried to promote urban self-management. Given Bolshevik authoritarianism and its various rationalisations, it would be fairer to say that it was the Bolsheviks who expressed "*hostility*" to the city workers by imposing their dictatorship upon them rather than supporting working-class self-management as the Makhnovists did!

11 Were the Makhnovists nationalists?

Some books on the Makhnovist movement try to present the Makhnovists as being Ukrainian nationalists. A few discuss the matter in order, perhaps, to increase the respectability of the Makhnovist movement by associating it with a more "*serious*" and "*respectable*" political theory than anarchism, namely "*Nationalism.*" Those who seriously investigate the issue come to the same conclusion, namely that neither Makhno nor the Makhnovist movement was nationalist (see, for example, Frank Sysyn's essay **Nestor Makhno and the Ukrainian Revolution** which discusses this issue).

Therefore, any claims that the Makhnovists were nationalists are incorrect. The Makhnovist movement was first and foremost an internationalist movement of working people. This is to be expected as anarchists have long argued that nationalism is a cross-class movement which aims to maintain the existing class system but without foreign domination (see section D.6 for details). As such, the Makhnovists were well aware that nationalism could not solve the social question and would simply replace a Russian ruling class and state with a Ukrainian one.

This meant that the aims of the Makhnovists went further than simply national liberation or self-determination. Anarchists, rather, aim for working-class self-liberation and self-determination, both as individuals and as groups, as well as politically, economically and socially. To quote Makhno's wire to Lenin in December 1918, the Makhnovist "*aims are known and clear to all. They are fighting against the authority of all political governments and for liberty and independence of the working people.*" [quoted by Palij, **Op. Cit.**, p. 80]

From this class and anti-hierarchical perspective, it is not unsurprising that the Makhnovists were not nationalists. They did not seek Ukrainian independence but rather working-class autonomy. This, of necessity, meant they opposed all those who aimed to govern and/or exploit the working class. Hence Arshinov:

“Composed of the poorest peasants, who were united by the fact that they all worked with their own hands, the Makhnovist movement was founded on the deep feeling of fraternity which characterises only the most oppressed. During its entire history it did not for an instant appeal to national sentiments. The whole struggle of the Makhnovists against the Bolsheviks was conducted solely in the name of the rights and interests of the workers. Denikin’s troops, the Austro-Germans, Petliura, the French troops in Berdyansk, Wrangel — were all treated by the Makhnovists as enemies of the workers. Each one of these invasions represented for them essentially a threat to the workers, and the Makhnovists had no interest in the national flag under which they marched.” [Op. Cit., p. 210]

He stressed that *“national prejudices had no place in the Makhnovshchina. There was also no place in the movement for religious prejudices . . . Among modern social movements, the Makhnovshchina was one of the few in which an individual had absolutely no interest in his own or his neighbour’s religion or nationality, in which he respected only the labour and the freedom of the worker.”* [Op. Cit., p. 211]

The Makhnovists made their position on nationalism clear in the ‘Declaration’ published by the Revolutionary Military Council of the army in October, 1919:

“When speaking of Ukrainian independence, we do not mean national independence in Petliura’s sense but the social independence of workers and peasants. We declare that Ukrainian, and all other, working people have the right to self-determination not as an ‘independent nation’ but as ‘independent workers’” [quoted by Arshinov, Op. Cit., p. 210]

In other words, the Makhnovists *“declared, that in their option **Petlurovitchina** [the Petliura movement, Petliura being the leader of the Nationalists] was a bourgeois nationalist movement whose road was entirely different from that of the revolutionary peasants, that the Ukraine should be organised on a basis of free labour and the independence of the peasants and the workers . . . and that nothing but struggle was possible between the **Makhnovitchina** , the movement of the workers, and the **Petlurovitchina** , the movement of the bourgeoisie.”* [Voline, Op. Cit., p. 572]

This does not mean that anarchists are indifferent to cultural and national domination and oppression. Far from it! As we discussed in sections D.6 and D.7, anarchists are against foreign domination and cultural imperialism, believing that every community or national group has the right to be itself and develop as it sees fit. This means that anarchists seek to transform national liberation struggles into **human** liberation struggles, turning any struggle against foreign oppression and domination into a struggle against **all** forms of oppression and domination.

This means that the Makhnovists, like anarchists in general, seek to encourage local culture and language while opposed nationalism. As Frank Sysyn argues, it *“would be a mistake . . . to label the Makhnivtsi as ‘anti-Ukrainian.’ Although they opposed the political goals of most ‘svidomi ukraintsi’ (nationally conscious Ukrainians), they accepted the existence of a Ukrainian nation*

and used the terms 'Ukraine' and 'Ukrainian.'" [Nestor Makhno and the Ukrainian Revolution, p. 288] It should be noted that opponents of Ukrainian independence generally called it the "south of Russia" or "Little Russia."

Thus an opposition to nationalism did not imply a rejection or blindness to foreign domination and free cultural expression. On the question of the language to be taught in schools, the Cultural-Educational Section of the Makhnovist Insurgent Army wrote the following in October, 1919:

"The cultural-educational section of the Makhnovist army constantly receives questions from school teachers asking about the language in which instruction should be given in the schools, now that Denikin's troops have been expelled.

"The revolutionary insurgents, holding to the principles of true socialism, cannot in any field or by any measure do violence to the natural desires and needs of the Ukrainian people. This is why the question of the language to be taught in the schools cannot be solved by our army, but can only be decided by the people themselves, by parents, teachers and students

"It goes without saying that all the orders of Denikin's so-called 'Special Bureau' as well as General Mai-Maevsky's order No. 22, which forbids the use of the mother tongue in the schools, are null and void, having been forcibly imposed on the schools.

"In the interest of the greatest intellectual development of the people, the language of instruction should be that toward which the local population naturally tends, and this is why the population, the students, the teachers and the parents, and not authorities or the army, should freely and independently resolve this question." [quoted by Arshinov, **Op. Cit.**, pp. 210–1]

They also printed a Ukrainian version of their paper (*"The Road to Freedom"*).

Clearly their opposition to Ukrainian nationalism did not mean that the Makhnovists were indifferent to imperialism and foreign political or cultural domination. This explains why Makhno criticised his enemies for anti-Ukrainian actions and language. Michael Malet summarises, for the Makhnovists *"Ukrainian culture was welcome, but political nationalism was highly suspect."* [**Op. Cit.**, p. 143]

Given anarchist support for federal organisation from below upwards, working-class self-determination and autonomy, plus a healthy respect for local culture, it is easy to see why some historians have fostered a nationalist perspective onto the Makhnovists where none existed. This means that when they agitated with the slogan *"All to whom freedom and independence are dear should stay in the Ukraine and fight the Denikinists,"* it should be noted that *"[n]owhere . . . nationalism openly advocated, and the line of argument put forward can more easily be interpreted as libertarian and, above all, anti-White."* [Malet, **Op. Cit.**, p. 146]

In 1928, Makhno wrote a rebuttal to a Soviet historian's claim that Makhno became a Ukrainian Nationalist during the 1920–21 period. He *"totally dismissed the charges"* and argued that the historian *"distorted anarchism's espousal of local autonomy so as to create trumped-up charges of nationalism."*

As Sysyn argues, while Makhno “*never became a nationalist, he did to a degree become a Ukrainian anarchist.*” [Op. Cit., p. 292 and p. 303]

Thus while neither Makhno nor the movement were nationalists, they were not blind to national and cultural oppression. They considered nationalism as too narrow a goal to satisfy the **social** aspirations of the working classes. As Makhno argued in exile, the Ukrainian toilers had “*asserted their rights to use their own language and their entitlement to their own culture, which had been regarded before the revolution as anathema. They also asserted their right to conform in their lives to their own way of life and specific customs.*” However, “[i]n the aim of building an independent Ukrainian State, certain statist gentlemen would dearly love to arrogate to themselves all natural manifestations of Ukrainian reality.” Yet the “*healthy instincts of the Ukrainian toilers and their baleful life under the Bolshevik yoke has not made them oblivious of the State danger in general*” and so they “*shun the chauvinist trend and do not mix it up with their social aspirations, rather seeking their own road to emancipation.*” [The Struggle Against the State and Other Essays, pp. 24–5]

In summary, the Makhnovists were opposed to nationalism but supported culture diversity and self-determination within a free federation of toilers communes and councils. They did not limit their aims to national liberation, but rather sought the self-liberation of the working classes from every oppression — foreign or domestic, economic or political, cultural or social.

12 Did the Makhnovists support the Whites?

No, they did not. However, black propaganda by the Bolsheviks stated they did. Victor Serge wrote about the “*strenuous calumnies put out by the Communist Party*” against him “*which went so far as to accuse him of signing pacts with the Whites at the very moment when he was engaged in a life-and-death struggle against them.*” [Memoirs of a Revolutionary, p. 122]

According to Arshinov, “*Soviet newspapers spread the false news of an alliance between Makhno and Wrangel*” and in the summer of 1920, a representative of the Kharkov government “*declared at the Plenary Session of the Ekaterinoslav Soviet, that Soviet authorities had written proof of the alliance between Makhno and Wrangel. This was obviously an intentional lie.*” Wrangel, perhaps believing these lies had some basis, sent a messenger to Makhno in July, 1920. “*Wrangel’s messenger was immediately executed*” and the “*entire incident was reported in the Makhnovist press. All this was perfectly clear to the Bolsheviks. They nevertheless continued to trumpet the alliance between Makhno and Wrangel. It was only after a military-political agreement had been concluded between the Makhnovists and the Soviet power that the Soviet Commissariat of War announced that there had never been an alliance between Makhno and Wrangel, that earlier Soviet assertions to this effect were an error.*” [Op. Cit., pp. 173–5]

Needless to say, while the Bolsheviks spread the rumour to discredit Makhno, the Whites spread it to win the confidence of the peasants. Thus when Trotsky stated that Wrangel had “*united with the Ukrainian partisan Makhno,*” he was aiding the efforts of Wrangel to learn from previous White mistakes and build some kind of popular base. [quoted by Paliy, Op. Cit., p. 220] By October, Trotsky had retracted this statement:

“Wrangel really tried to come into direct contact with Makhno’s men and dispatched to Makhno’s headquarters two representatives for negotiations . . . [However] Makhno’s men not only did not enter into negotiations with the representatives of Wrangel, but publicly hanged them as soon as they arrived at the headquarters.” [quoted by Palij, **Ibid.**]

Trotsky, of course, still tried to blacken the Makhnovists. In the same article he argued that “[u]ndoubtedly Makhno actually co-operated with Wrangel, and also with the Polish *szlachta*, as he fought with them against the Red Army. However, there was no formal alliance between them. All the documents mentioning a formal alliance were fabricated by Wrangel . . . All this fabrication was made to deceive the protectors of Makhno, the French, and other imperialists.” [quoted by Palij, **Op. Cit.**, p. 225]

It is hard to know where to start in this amazing piece of political storytelling. As we discuss in more detail in section 13, the Makhnovists were fighting the Red Army from January to September 1920 because the Bolsheviks had engineered their outlawing! As historian David Footman points out, the attempt by the Bolsheviks to transfer Makhno to Polish front was done for political reasons:

*“it is admitted on the Soviet side that this order was primarily ‘dictated by the necessity’ of liquidating **Makhnovshchina** as an independent movement. Only when he was far removed from his home country would it be possible to counteract his influence”* [**Op. Cit.**, p. 291]

Indeed, it could be argued that by attacking Makhno in January helped the Whites to regroup under Wrangel and return later in the year. Equally, it seems like a bad joke for Trotsky to blame the victim of Bolshevik intrigues for defending themselves. And the idea that Makhno had “*protectors*” in any imperialist nation is a joke, which deserves only laughter as a response!

It should be noted that it is “*agreed that the initiative for joint action against Wrangel came from the Makhnovites.*” This was ignored by the Bolsheviks until after “*Wrangel started his big offensive*” in September 1920 [Footman, **Op. Cit.**, p. 294 and p. 295]

So while the Bolsheviks claimed that the Makhnovists had made a pact with General Wrangel, the facts are that Makhnovists fought the Whites with all their energy. Indeed, they considered the Whites so great a threat to the revolution they even agreed to pursue a pact with the Bolsheviks, who had betrayed them twice already and had subjected both them and the peasantry to repression. As such, it could be argued that the Bolsheviks were the only counter-revolutionaries the Makhnovists can be accurately accused of collaborating with.

Every historian who has studied the movement has refuted claims that the Makhnovist movement made any alliance with the counter-revolutionary White forces. For example, Michael Palij notes that Denikin “*was the main enemy that Makhno fought, stubbornly and uncompromising, from the end of 1918 to the end of 1919. Its social and anti-Ukrainian policies greatly antagonised all segments of Ukrainian society. The result of this was an increased resistance*

to the Volunteer Army and its regime and a substantial strengthening of the Makhno movement.” He also notes that after several months of “hard fighting” Denikin’s troops “came to regard Makhno’s army as their most formidable enemy.” Makhno’s conflict with Wrangel was equally as fierce and “[a]lthough Makhno had fought both the Bolsheviks and Wrangel, his contribution to the final defeat of the latter was essential, as is proved by the efforts of both sides to have him as an ally.” [Op. Cit., p. 177, p. 202 and p. 228] According to Footman, Makhno “remained to the end the implacable enemy of the Whites.” [Op. Cit., p. 295] Malet just states the obvious: “The Makhnovists were totally opposed to the Whites.” [Op. Cit., p. 140]

We will leave the last word to the considered judgement of the White General Denikin who, in exile, stated that the Makhno movement was “the most antagonistic to the idea of the White movement.” [quoted by Malet, Op. Cit., p. 140]

In summary, the Makhnovists fought the White counter-revolution with all their might, playing a key role in the struggle and defeat of both Denikin and Wrangel. Anyone who claims that they worked with the Whites is either ignorant or a liar.

13 What was the relationship of the Bolsheviks to the movement?

The Makhnovists worked with the Bolsheviks in three periods. The first (and longest) was against Denikin after the Red Army had entered the Ukraine after the withdrawal of the Austro-Germans. The second was an informal agreement for a short period after Denikin had been defeated. The third was a formal political and military agreement between October and November 1920 in the struggle against Wrangel. Each period of co-operation ended with Bolshevik betrayal and conflict between the two forces.

As such, the relationship of the Bolsheviks to the Makhnovists was one of, at best, hostile co-operation against a common enemy. Usually, it was one of conflict. This was due, fundamentally, to two different concepts of social revolution. While the Makhnovists, as anarchists, believed in working-class self-management and autonomy, the Bolsheviks believed that only a centralised state structure (headed by themselves) could ensure the success of the revolution. By equating working-class power with Bolshevik party government (and from 1919 onwards, with the dictatorship of the Bolshevik party), they could not help viewing the Makhnovist movement as a threat to their power (see section 14 for a discussion of the political differences and the evolving nature of the Bolshevik’s conception of party rule).

Such a perspective ensured that they could only co-operate during periods when the White threat seemed most dangerous. As soon as the threat was defeated or they felt strong enough, the Bolsheviks turned on their former allies instantly. This section discusses each of the Bolshevik betrayals and the subsequent conflicts. As such, it is naturally broken up into three parts, reflecting each of the betrayals and their aftermath.

Michael Malet sums up the usual Bolshevik-Makhnovist relationship by arguing that it “will be apparent that the aim of the Soviet government from the

spring of 1919 onwards was to destroy the Makhnovists as an independent force, preferably killing Makhno himself in the process . . . Given the disastrous nature of Bolshevik land policy . . . this was not only unsurprisingly, it was inevitable.” He also adds that the “*fact that Makhno had a socio-political philosophy to back up his arguments only made the Bolsheviks more determined to break his hold over the south-east Ukraine, as soon as they realised that Nestor would not surrender that hold voluntarily.*” [Op. Cit., p. 128 and p. 129]

The first betrayal occurred in June 1919. The Makhnovists had been integrated with the Red Army in late January 1919, retaining their internal organisation (including the election of commanders) and their black flags. With the Red Army they fought against Denikin’s Volunteer Army. Before the arrival of Red forces in their region and the subsequent pact, the Makhnovists had organised a successful regional insurgent, peasant and worker congress which had agreed to call a second for February 12th. This second congress set up a Revolutionary Military Soviet to implement the decisions of this and following congresses. This congress (see section 7) passed an anti-Bolshevik resolution, which urged “*the peasants and workers to watch vigilantly the actions of the Bolshevik regime that cause a real danger to the worker-peasant revolution.*” Such actions included the monopolisation of the revolution, centralising power and overriding local soviets, repressing anarchists and Left Socialist Revolutionaries and “*stifling any manifestation of revolutionary expression.*” [quoted by Palij, Op. Cit., p. 154]

This change from the recent welcome was simply the behaviour of the Bolsheviks since their arrival. The (unelected) Ukrainian Bolshevik government had tried to apply the same tactics as its Russian equivalent, particularly as regards the peasants. In addition, the Bolshevik land policy (as indicated in section 8) was a complete disaster, alien to the ideas and needs of the peasants and, combined with grain requisitioning, alienating them.

The third congress was held on the 10th of April. By this time, Communist agricultural policy and terrorism had alienated all the peasantry, who “*rich and poor alike*” were “*united in their opposition*” to the Bolsheviks. [Footman, Op. Cit., p. 269] Indeed, the “*poorer the areas, the more dissatisfied were the peasants with the Bolshevik decrees.*” [Palij, Op. Cit., p. 156] As we indicated in section 7, the third congress was informed that it was “*counter-revolutionary*” and banned by the Bolshevik commander Dybenko, provoking a famous reply which stressed the right of a revolutionary people to apply the gains of that revolution when they see fit. It is worth re-quoting the relevant section:

“Can there exist laws made by a few people who call themselves revolutionaries which permit them to outlaw a whole people who are more revolutionary than they are themselves? . . .

“Is it permissible, is it admissible, that they should come to the country to establish laws of violence, to subjugate a people who have just overthrown all lawmakers and all laws?

“Does there exist a law according to which a revolutionary has the right to apply the most severe penalties to a revolutionary mass, of which he calls himself the defender, simply because this mass has taken the good things which the revolution promised them, freedom and equality, without his permission?

“Should the mass of revolutionary people perhaps be silent when such a revolutionary takes away the freedom which they have just conquered?”

“Do the laws of the revolution order the shooting of a delegate because he believes he ought to carry out the mandate given him by the revolutionary mass which elected him?”

“Whose interests should the revolutionary defend; those of the Party or those of the people who set the revolution in motion with their blood?” [quoted by Arshinov, **Op. Cit.**, p. 103]

After the 3rd congress, the Bolsheviks started to turn against Makhno:

“It was now that favourable mention of Makhno ceased to appear in the Soviet Press; an increasingly critical note became apparent. Supplies failed to get through to Makhnovite units and areas.” [Footman, **Op. Cit.**, p. 271]

Lenin himself advised local Bolshevik leaders on Makhno, stating in early May that *“temporarily, while Rostov is not yet captured, it is necessary to be diplomatic.”* [quoted by Arthur E. Adams, **Bolsheviks in the Ukraine**, pp. 352–3] Thus, as long as the Bolsheviks needed cannon fodder, Makhno was to be tolerated. Things changed when Trotsky arrived. On May 17th he promised a *“radical and merciless liquidation of partisanshchina [the partisan movement], independence, hooliganism, and leftism.”* [quoted by Adams, **Op. Cit.**, p. 360] According to one historian, Trotsky *“favoured a thorough-going annihilation of the partisan’s ideological leaders as well as men like Hryhoriyov who wielded political power.”* [Adams, **Op. Cit.**, p. 360] Unsurprisingly, given Trotsky’s stated mission, Bolshevik hostility towards the Makhnovists became more than mere words. It took the form of both direct and indirect aggression. *“In the latter part of May,”* states Footman, *“the Cheka sent over two agents to assassinate Makhno.”* Around the same time, the Red *“hold-back of supplies for the Insurgents developed into a blockade of the area. Makhnovite units at the front ran short of ammunition.”* [**Op. Cit.**, p. 271 and p. 272] This, obviously, had a negative impact the Makhnovists’ ability to fight the Whites.

Due to the gravity of the military and political situations both at and behind the front, the Makhnovist Revolutionary Military Soviet decided to call an extraordinary congress of peasants, workers, insurgents and Red soldiers. This congress was to determine the immediate tasks and the practical measures to be taken by the workers to remedy the mortal danger represented by the Whites. On May 31st, a call was sent out which stated, in part, *“that only the working masses themselves can find a solution [to the current problem], and not individuals or parties.”* The congress would be based as follows: *“elections of delegates of peasants and workers will take place at general assemblies of villages, towns, factories and workshops.”* [quoted by Arshinov, **Op. Cit.**, p. 121]

The Bolshevik reply came quickly, with Trotsky issuing his infamous Order no. 1824 on June 4th:

“This Congress is directed squarely against the Soviet Power in the Ukraine and against the organisation of the southern front, where Makhno’s brigade is stationed. This congress can have no other result than to excite some new disgraceful revolt like that of Grigor’ev,

and to open the front to the Whites, before whom Makhno's brigade can only retreat incessantly on account of the incompetence, criminal designs and treason of its commanders.

"1. By the present order this congress is forbidden, and will in no circumstances be allowed to take place.

"2. All the peasant and working class population shall be warned orally and in writing, that participation in the said congress will be considered an act of high treason against the Soviet Republic and the Soviet front.

"3. All delegates to the said Congress shall be arrested immediately and brought before the Revolutionary Military Tribunal of the 14th, formerly 2nd, Army of the Ukraine.

"4. The persons spreading the call of Makhno and the Hulyai Pole Executive Committee to the Congress shall likewise be arrested.

"5. The present order shall have the force of law as soon as it is telegraphed. It should be widely distributed, displayed in all public places, and sent to the representatives of the executive committees of towns and villages, as well as to all the representatives of Soviet authority, and to commanders and commissars of military units."
[quoted by Arshinov, **Op. Cit.**, pp. 122-3]

Arshinov argues that this "*document is truly classic*" and "*[w]hoever studies the Russian revolution should learn it by heart.*" He compares Trotsky's order to the reply the Makhnovists had sent to the Bolsheviks' attempt to ban the third congress. Clearly, Order No. 1824 shows that laws did exist "*made by a few people who call themselves revolutionaries which permit them to outlaw a whole people who are more revolutionary than they are themselves*"! Equally, the order shows that "*a revolutionary has the right to apply the most severe penalties to a revolutionary mass . . . simply because this mass has taken the good things which the revolution has promised them, freedom and equality, without his permission*"! Little wonder Arshinov states that this order meant that the "*entire peasant and labouring population are declared guilty of high treason if they dare to participate in their own free congress.*" [**Op. Cit.**, p. 123]

According to Voline, in Alexandrovsk "*all workers meetings planned for the purpose of discussing the call of the Council and the agenda of the Congress were forbidden under pain of death. Those which were organised in ignorance of the order were dispersed by armed force. In other cities and towns, the Bolsheviks acted in the same way. As for the peasants in the villages, they were treated with still less ceremony; in many places militants and even peasants 'suspected of acting in favour of the insurgents and the Congress' were seized and executed after a semblance of a trial. Many peasants carrying the call were arrested, 'tried' and shot, before they could even find out about Order No. 1824.*" [**Op. Cit.**, pp. 599-600]

As Arshinov summarises:

"This entire document represents such a crying usurpation of the rights of the workers that it is pointless to comment further on it."
[**Op. Cit.**, p. 124]

Trotsky continued his usurpation of the rights of the workers in a later order on the congress. In this, Trotsky called this openly announced workers, peasant and insurgent congress a “*conspiracy against Soviet power*” and a “*congress of Anarchist-kulaks delegates for struggle against the Red Army and the Soviet power*” (which explains why the congress organisers had asked that hotbed of kulakism, the Red Army troops, to send delegates!). Trotsky indicated the fate of those workers and peasants who dared participate in their own revolution: “*There can be only one penalty for these individuals: shooting.*” [How the Revolution Armed, vol. II, p. 293]

Trotsky also ordered the arrest of Makhno, who escaped but who ordered his troops to remain under Bolshevik command to ensure that the front against Denikin was maintained. However, five members of his staff were shot for having distributed literature concerning the banned fourth congress. This order was the first step in the Bolshevik attempt to “*liquidate the Makhnovist movement.*” This campaign saw Bolshevik regiments invade the insurgent area, shooting militants on the spot and destroying the free communes and other Makhnovist organisations. [Arshinov, **Op. Cit.**, p. 121] It should be noted that during the Spanish Revolution, the Stalinists acted in the same way, attacking rural collectives while the anarchist troops fought against Franco at the front.

Thus the participating event for the break between the Makhnovists and Bolsheviks was Trotsky’s banning of the fourth regional congress. However, this was preceded by an intense press campaign against the Makhnovists as well as holding back of essential supplies from the frontline troops. Clearly the Bolsheviks considered that the soviet system was threatened if soviet conferences were called and that the “dictatorship of the proletariat” was undermined if the proletariat took part in the revolutionary process!

With the Makhnovist front weakened, they could not hold against Denikin’s attacks, particularly when Red Army troops retreated on their flank. Thus, the front which the Makhnovists themselves had formed and held for more than six months was finally broken. [Arshinov, **Op. Cit.**, p. 124] The Red Army was split into three and the Whites entered the Ukraine, which the Bolsheviks promptly abandoned to its fate. The Makhnovists, drawing stray Red Army and other forces to it, continued to fight the Whites, ultimately inflicting a decisive defeat on them at Peregonovka, subsequently destroying their supply lines and ensuring Denikin’s defeat (see section 4).

The Red Army re-entered the Ukraine at the end of 1919. Bolshevik plans with regard to the Makhnovists had already been decided in a secret order written by Trotsky on December 11th. Red Army troops had to “*be protected against infection by guerrilla-ism and Makhnovism*” by various means, including “*extensive agitation*” which used “*examples from the past to show the treacherous role played by the Makhnovites.*” A “*considerable number of agents*” would be sent “*ahead*” of the main forces to “*join the guerrilla detachments*” and would agitate against “*guerrilla-ism.*” Once partisan forces meet with Red Army troops, the former “*ceases to be a military unit after it has appeared on our side of the line . . . From that moment it becomes merely material for processing, and for that purpose is to be sent to our rear.*” To “*secure complete subordination of the detachments,*” the Red forces “*must make use of the agents previously set to these detachments.*” The aim, simply put, was to ensure that the partisans became “*fully subordinate to our command.*” If the partisans who had been fighting for revolution and against the Whites opposed becoming “*material for*

processing" (i.e cannon fodder), "refuses to submit to orders, displays unruliness and self-will," then it "must be subjected to ruthless punishment." Recognising the organic links the partisans had with the peasants, Trotsky argues that "in the Ukraine, guerrilla detachments appear and disappear with ease, dissolving themselves into the mass of the armed peasant population" and so "a fundamental condition for the success against guerrilla-ism is **unconditional disarmament of the rural population, without exception.**" [Trotsky, **How the Revolution Armed**, vol. II, pp. 440–2] As events would show, the Bolsheviks implemented Trotsky's order to the letter.

On December 24th, Makhno's troops met with the Bolshevik 14th army and its commander "admitted Makhno's service in defeating Denikin." However, while "the Bolsheviks fraternised with the Makhno troops . . . they distrusted Makhno, fearing the popularity he had gained as a result of his successful fighting against Denikin." The Bolsheviks had "no intention of tolerating Makhno's independent policy, but hoped first to destroy his army by removing it from its own base. With this in mind, on January 8th, 1920, the Revolutionary Military Council of the Fourteenth Army ordered Makhno to move to the Polish Front . . . The author of the order realised that there was no real war between the Poles and the Bolsheviks at the time and he also knew that Makhno would not abandon his region. . . Ubovich [the author] explained that 'an appropriate reaction by Makhno to this order would give us the chance to have accurate grounds for our next steps' . . . [He] concluded: 'The order is a certain political manoeuvre and, at the very least, we expect positive results from Makhno's realisation of this.'" [Palij, **Op. Cit.**, p. 209 and p. 210] As can be seen, these actions fit perfectly with Trotsky's secret order and with Bolshevik desire for a monopoly of power for itself (see next section).

As expected, the Makhnovists refused to leave their territory. They realised the political motivations behind the order. As Arshinov notes, "[s]ending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this." [**Op. Cit.**, p. 163] As well as political objections, the Makhnovists listed practical reasons for not going. Firstly, "the Insurrectionary Army was subordinate neither to the 14th Corps nor to any other unit of the Red Army. The Red commander had no authority to give orders to the Insurrectionary Army." Secondly, "it was materially impossible to carry it out, since half the men, as well as nearly all the commanders and staff, and Makhno himself, were sick [with typhus]." Thirdly, "the fighting qualities and revolutionary usefulness of the Insurrectionary Army were certainly much greater on their own ground." [Voline, **Op. Cit.**, pp. 650–1]

The Bolsheviks refused to discuss the issue and on the 14th of January, they declared the Makhnovists outlawed. They then "made a great effort to destroy" Makhno. [Palij, **Op. Cit.**, p. 210] In summary, the Bolsheviks **started** the conflict in order to eliminate opposition to their power. This led to nine months of bitter fighting between the Red Army and the Makhnovists. To prevent fraternisation, the Bolsheviks did not use local troops and instead imported Latvian, Estonian and Chinese troops. They also used other "new tactics," and "attacked not only Makhno's partisans, but also the villages and towns in which the population was sympathetic toward Makhno. They shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their properties

and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved.” They also set up “Committees of the Poor” as part of the Bolshevik administrative apparatus, which acted as “informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans.” [Palij, **Op. Cit.**, pp. 212–3]

This conflict undoubtedly gave time for the Whites to reorganise themselves and encouraged the Poles to invade the Ukraine, so prolonging the Civil War. The Makhnovists were threatened by both the Bolsheviks **and** Wrangel. By mid-1920, Wrangel appeared to be gaining the upper hand and the Makhnovists “could not remain indifferent to Wrangel’s advance . . . Everything done to destroy him would in the last analysis benefit the revolution.” This led the Makhnovists to consider allying with the Bolsheviks as “the difference between the Communists and Wrangel was that the Communists had the support of the masses with faith in the revolution. It is true that these masses were cynically misled by the Communists, who exploited the revolutionary enthusiasm of the workers in the interests of Bolshevik power.” With this in mind, the Makhnovists agreed at a mass assembly to make an alliance with the Bolsheviks against Wrangel as this would eliminate the White threat and end the civil war. [Arshinov, **Op. Cit.**, p. 176]

The Bolsheviks ignored the Makhnovist offer using mid-September, when “Wrangel’s success caused the Bolsheviks leaders to reconsider.” [Palij, **Op. Cit.**, p. 223] Sometime between the 10th and 15th of October the final agreement was signed:

“Part I — Political Agreement.

“1. Immediate release of all Makhnovists and anarchists imprisoned or in exile in the territories of the Soviet Republic; cessation of all persecutions of Makhnovists or anarchists, except those who carry on armed conflict against the Soviet Government.

“2. Complete freedom in all forms of public expression and propaganda for all Makhnovists and anarchists, for their principles and ideas, in speech and the press, with the exception of anything that might call for the violent overthrow of the Soviet Government, and on condition that the requirements of military censorship be respected. For all kinds of publications, the Makhnovists and anarchists, as revolutionary organisations recognised by the Soviet Government may make use of the technical apparatus of the Soviet State, while naturally submitting to the technical rules for publication.

“3. Free participation in elections to the Soviets; and the right of Makhnovists and anarchists to be elected thereto. Free participation in the organisation of the forthcoming Fifth Pan-Ukrainian Congress of Soviets . . .

“Part II — Military Agreement.

“1. The Ukrainian Revolutionary Insurrectionary Army (Makhnovist) will join the armed forces of the Republic as a partisan army, subordinate, in regard to operations, to the supreme command of the

Red Army; it will retain its established internal structure, and does not have to adopt the bases and principles of the regular Red Army.

“2. When crossing Soviet territory at the front, or going between fronts, the Insurrectionary Army will not accept into its ranks neither any detachments of, nor deserters from, the Red Army . . .

“3. For the purpose of destroying the common enemy — the White Army — the Ukrainian Revolutionary Insurrectionary Army (Makhnovists) will inform the working masses that collaborate with it the agreement that has been concluded; it will call upon the people to cease all military actions hostile to the Soviet power; and for its part, the Soviet power will immediately publish the clauses of the agreement.

“4. The families of combatants of the Makhnovist Revolutionary Insurrectionary Army living in the territory of the Soviet Republic shall enjoy the same rights as those of soldiers of the Red Army . . .”
[quoted by Arshinov, **Op. Cit.**, p. 178]

This agreement was agreed by both sides, although the Bolsheviks immediately broke it by publishing the military agreement first, followed by the political agreement a week later, so obscuring the real meaning of the pact. As it stands, the political clause simply gave anarchists and Makhnovists the rights they should have already had, according to the constitution of the Soviet state. This shows how far the Bolsheviks had applied that constitution.

The agreement is highly significant as in itself it disproves many of the Bolsheviks slanders about the Makhnovists and it proves the suppression of the anarchist press to have been on political grounds.

However, the Makhnovists desired to add a fourth clause to the Political Agreement:

“Since one of the essential principles of the Makhnovist movement is the struggle for the self-management of the workers, the Insurrectionary Army (Makhnovist) believes it should insist on the following fourth point of the political agreement: in the region where the Makhnovist Army is operating, the population of workers and peasants will create its own institutions of economic and political self-management; these institutions will be autonomous and joined in federation, by means of agreement, with the government organs of the Soviet Republic,” [quoted by Arshinov, **Op. Cit.**, pp. 179–80]

Unsurprisingly, the Bolsheviks refused to ratify this clause. As one Bolshevik historian pointed out, the *“fourth point was fundamental to both sides, it meant the system of free Soviets, which was in total opposition to the idea of the dictatorship of the proletariat.”* [quoted by Malet, **Op. Cit.**, p. 108] As we discuss in the next section, the Bolsheviks had equated the *“dictatorship of the proletariat”* with the dictatorship of their party and so working-class self-management could not be allowed. It should be noted that this fourth clause was the cause of Lenin and Trotsky’s toying with the idea of allowing the Makhnovists south-eastern Ukraine as an anarchist experiment (as mentioned by both Victor Serge and Trotsky in later years).

Once Wrangel had been defeated by Makhnovist and Red Army units, the Bolsheviks turned on the movement. Makhno had “*assumed that the coming conflict with the Bolsheviks could be limited to the realm of ideas, feeling that the strong revolutionary ideas and feelings of the peasants, together with their distrust of the foreign invaders, were the best guarantees for the movement’s territory. Moreover, Makhno believed that the Bolsheviks would not attack his movement immediately. A respite of some three months would have allowed him to consolidate his power [sic!] and to win over much of the Bolshevik rank and file.*” [Palij, **Op. Cit.**, p. 231] From the wording of the second clause of the military agreement (namely, to refuse Red Army deserters or units), it is clear that the Bolsheviks were aware of the appeal of Makhnovist politics on the Red Army soldiers. As soon as Wrangel was defeated, the Red Army attacked. Makhnovist commanders were invited to meetings, arrested and then shot. The Red Army surrounded Makhnovist units and attacked them. At the same time, anarchists were arrested all across the Ukraine. Hulyai Pole itself was attacked (Makhno, despite overwhelming odds, broke out). [Malet, **Op. Cit.**, pp. 71–2]

In the words of Makhno:

“In this difficult and responsible revolutionary position the Makhno movement made one great mistake: alliance with the Bolsheviks against a common enemy, Wrangel and the Entente. In the period of this alliance that was morally right and of practical value for the revolution, the Makhno movement mistook Bolshevik revolutionism and failed to secure itself in advance against betrayal. The Bolsheviks and their experts treacherously circumvented it.” [quoted by Palij, **Op. Cit.**, p. 234]

While the Bolsheviks continuously proclaimed the final defeat of the Makhnovists, they held out for nearly a year before being forced to leave the Ukraine in August 1921. Indeed, by the end of 1920 his troops number ten to fifteen thousand men and the “*growing strength of the Makhno army and its successes caused serious concern in the Bolshevik regime.*” More Red troops were deployed, “*stationing whole regiments, primarily cavalry, in the occupied villages to terrorise the peasants and prevent them from supporting Makhno. . . Cheka punitive units were constantly trailing the partisans, executing Makhno’s sympathisers and the partisans’ families.*” [Palij, **Op. Cit.**, p. 237 and p. 238] Combined with this state terrorism, economic conditions in the villages got worse. The countryside was exhausted and 1921 was a famine year. With his rural base itself barely surviving, the Makhnovists could not survive long.

It should be noted that during the periods after the Bolsheviks had turned on the Makhnovists, the latter appealed to rank-and-file Red Army troops not to attack them. As one of their leaflets put it: “*Down with fratricidal war among the working people!*” They urged the Red Army troops (with some success) to rebel against the commissars and appointed officers and join with the Makhnovists, who would “*greet [them] as our own brothers and together we will create a free and just life for workers and peasants and will struggle against all tyrants and oppressors of the working people.*” [contained in Arshinov, **Op. Cit.**, p. 276 and p. 283]

Even after the defeat of the Makhnovists, the Bolsheviks did not stop their campaign of lies. For example, Trotsky reported to the Ninth Congress of Soviets on December 26th, 1921, that the Makhnovists were “*in Romania,*” where

Makhno had “received a friendly welcome” and was “liv[ing] comfortably in Bucharest.” The Makhnovists had picked Romania because it was, like Poland, “a country where they ... felt secure” due to the way they treated “Russian counter-revolutionary bands.” [How the Revolution Armed, vol. IV, p. 404] In reality, the “Romanian authorities put Makhno, his wife, and his followers in an internment camp.” The Bolsheviks were not unaware of this, as they “sent a series of sharp diplomatic notes demanding Makhno’s extradition.” They expelled Makhno and his wife to Poland on April 11, 1922. The Poles also interned them and, again, the Bolsheviks demanded Makhno’s extradition “on the ground that he was a criminal and not entitled to political asylum.” [Palij, Op. Cit., p. 242] Trotsky’s lies come as no surprise, given his and his party’s track record on slandering anarchists.

As can be seen, the relationship of the Makhnovists to the Bolsheviks was one of constant betrayal of the former by the latter. Moreover, the Bolsheviks took every opportunity to slander the Makhnovists, with Trotsky going so far as to report Makhno was living well while he was rotting in a capitalist prison. This is to be expected, as the aims of the two groups were at such odds. As we discuss in the next section, while the Makhnovists did whatever they could to encourage working-class self-management and freedom, the Bolsheviks had evolved from advocating the government of their party as the expression of “the dictatorship of the proletariat” to stating that only the dictatorship of their party could ensure the success of a social revolution and so **was** “the dictatorship of the proletariat.” As the Makhnovist movement shows, if need be, the party would happily exercise its dictatorship **over** the proletariat (and peasantry) if that was needed to retain its power.

14 How did the Makhnovists and Bolsheviks differ?

Like chalk and cheese.

Whereas the Bolsheviks talked about soviet democracy while exercising a party dictatorship, the Makhnovists not only talked about “free soviets,” they also encouraged them with all their ability. Similarly, while Lenin stated that free speech was “a bourgeois notion” and that there could be “no free speech in a revolutionary period,” the Makhnovists proclaimed free speech for working people. [Lenin quoted by Goldman, **My Disillusionment in Russia**, p. 33] While the Bolsheviks ended up arguing for the necessity of party dictatorship during a revolution, the Makhnovists introduced free soviets and organised peasant, worker and insurgent congresses to conduct the revolution.

We have discussed the Makhnovist ideas in both theory and practice in sections 5, 6 and 7. In spite of the chaos and difficulties imposed upon the movement by having to fight the counter-revolution, the Makhnovists applied their ideals constantly. The Makhnovists were a mass movement and its constructive efforts showed that there was an alternative route the Russian revolution could have followed other than the authoritarian dictatorship that Leninists, then and now, claimed was inevitable if the revolution was to be saved.

To see why, we must compare Bolshevik ideology and practice to that of the Makhnovists in three key areas. Firstly, on how a revolution should be defended.

Secondly, on the role of the soviets and party in the revolution. Thirdly, on the question of working-class freedom.

Early in 1918, after the signing of the Brest-Litovsk Treaty the Bolsheviks re-introduced Tsarist officers into the army alongside bourgeois military discipline. As Maurice Brinton correctly summarises:

“Trotsky, appointed Commissar of Military Affairs after Brest-Litovsk, had rapidly been reorganising the Red Army. The death penalty for disobedience under fire had been restored. So, more gradually, had saluting, special forms of address, separate living quarters and other privileges for officers. Democratic forms of organisation, including the election of officers, had been quickly dispensed with.”
[**The Bolsheviks and Workers’ Control**, p. 37]

Officers were appointed rather than elected. They argued this had to be done to win the war. The *“principle of election,”* stated Trotsky, *“is politically purposeless and technically inexpedient and has been, in practice, abolished by decree.”* Thus the election of officers and the creation of soldiers’ committees was abolished from the top, replaced by appointed officers. Trotsky’s rationale for this was simply that *“political power is in the hands of the same working class from whose ranks the Army is recruited.”* In other words, the Bolshevik Party held power as power was actually held by it, **not** the working class. Trotsky tried to answer the obvious objection:

*“Once we have established the Soviet regime, that is a system under which the government is headed by persons who have been directly elected by the Soviets of Workers’, Peasants’ and Soldiers’ Deputies, there can be no antagonism between the government and the mass of the workers, just as there is no antagonism between the administration of the union and the general assembly of its members, and, therefore, there cannot be any grounds for fearing the **appointment** of members of the commanding staff by the organs of the Soviet Power.”* [**Work, Discipline, Order**]

He repeated this argument in his 1919 diatribe against the Makhnovists:

“The Makhnovites shout raucously: ‘Down with appointed commanders!’ This they do only so as to delude the ignorant element among their own soldiers. One can speak of ‘appointed’ persons only under the bourgeois order, when Tsarist officials or bourgeois ministers appointed at their own discretion commanders who kept the soldier masses subject to the bourgeois classes. Today there is no authority in Russia but that which is elected by the whole working class and working peasantry. It follows that commanders appointed by the central Soviet Government are installed in their positions by the will of the working millions. But the Makhnovite commanders reflect the interests of a minute group of Anarchists who rely on the kulaks and the ignorant.” [**The Makhno Movement**]

Of course, most workers are well aware that the administration of a trade union usually works against them during periods of struggle. Indeed, so are most

Trotskyists as they often denounce the betrayals by that administration. Thus Trotsky's own analogy indicates the fallacy of his argument. Equally, it was not "*the will of the working millions*" which appointed anyone, it was a handful of leaders of the Bolshevik party (which had manipulated the soviets to remain in power). Needless to say, this was a vast change from Lenin's comments in **State and Revolution** opposing appointment and calling for election of **all** officials!

Moreover, the explanation that "*the ignorant*" were to blame for Makhnovist opposition to appointed officers had a long legacy with Trotsky. In April 1918, when justifying Bolshevik introduction of appointed officers, he had argued that the "*Soviet government is the same as the committee of a trade union. It is elected by the workers and peasants and you can at the All-Russian Congress of Soviets, at any moment you like, dismiss that government and appoint another. But once you have appointed it, you must give it the right to choose the technical specialists.*" He stressed that this applied "*in military affairs, in particular.*" Using the trade union analogy, he argued that the workers had "*entrusted us [the Bolshevik leaders] with the direction of the union*" and this meant that the Bolshevik leaders, not the workers, should decide things as "*we are better able to judge in the matter*" than them! The workers role was stated clearly: "*if our way of conducting the business is bad, then throw us out and elect another committee!*" [**Leon Trotsky Speaks**, p. 113] In other words, like any bureaucrat, for Trotsky working-class participation in the affairs of the revolution was seen as irrelevant: the masses had voted and their role was now that of obeying those who "*are better able to judge.*"

Using an argument the Tsar could have been proud of, Trotsky defended the elimination of soldier democracy:

"How could soldiers who have just entered the army choose the chiefs! Have they any vote to go by? They have none. And therefore elections are impossible." [**Ibid.**]

Equally, how could workers and peasants who have just entered political or economic struggle in 1917 choose the chiefs? Had they any vote to go by? They had none. And therefore political and workplace elections are impossible. Unsurprisingly, Trotsky soon ended up applying this logic to politics as well, defending (like all the leaders of Bolshevism) the dictatorship of the party **over** working class. How could the "*ignorant*" workers be expected to elect the best "*chiefs*" never mind manage their own affairs!

Ironically, in 1936 the Stalinist Communist Party in Spain was to make very similar arguments about the need for a regular army and army discipline to win the war. As Aileen O'Carroll in her essay "*Freedom and Revolution*" argues:

"The conventional army structure evolved when feudal kings or capitalist governments required the working class to fight its wars for them. These had to be authoritarian institutions, because although propaganda and jingoism can play a part initially in encouraging enlistment, the horrors of war soon expose the futility of nationalism. A large part of military organisation is aimed at ensuring that soldiers remain fighting for causes they do not necessarily believe in. Military discipline attempts to create an unthinking, unquestioning

body of soldiers, as fearful of their own side as of the other." [Red & Black Revolution, no. 1]

In short in both Russia and Spain the Bolsheviks wanted an army that would obey them regardless of whether the individual soldiers felt they were doing the correct thing, indeed who would obey through fear of their officers even when they knew what they were doing was wrong. Such a body would be essential for enforcing minority rule over the wishes of the workers. Would a self-managed army be inclined to repress workers' and peasants' strikes and protests? Of course not.

The Makhnovists show that another kind of revolutionary army was possible in the Russian Revolution and that the "*ignorant*" masses could choose their own officers. In other words, the latter-day justifications of the followers of Bolshevism are wrong when they assert that the creation of the top-down, hierarchical Red Army was a result of the "*contradiction between the political consciousness and circumstantial coercion*" and "*a retreat*" because "*officers were appointed and not elected,*" it was a conscript army and "*severe military discipline.*" [John Rees, "*In Defence of October*", **International Socialism**, no. 52, pp. 3–82, p. 46] As can be seen, Trotsky did not consider it as a "*retreat*" or caused by "*circumstances.*" Equally, the Makhnovists managed to organise themselves relatively democratically in the circumstances created by the same civil war.

As such, the differences between the Makhnovists and the Bolsheviks as regards the internal organisation of a revolutionary army are clear. The Bolsheviks applied top-down, bourgeois methods of internal organisation and discipline. The Makhnovists applied democratic internal organisation and discipline as far as possible.

From our discussion of the Bolshevik justifications for its system of appointed officers in the Red Army, it will come as no surprise that as regards the relationship of the soviets to the revolutionary organisation (party) the Makhnovists and Bolsheviks were (again) miles apart. While we discuss this in greater detail in section 14 of the appendix "What happened during the Russian Revolution?", we will give a flavour of Bolshevik ideology on this subject here.

From the start, Lenin identified soviet (or working class) power with the power of their own party. In October 1917, Lenin was equating party and class: "*the power of the Bolsheviks — that is, the power of the proletariat.*" [**Will the Bolsheviks Maintain Power?**, p. 102] After the October Revolution, the Bolsheviks were clear that the soviets would not have "*all power.*" Rather, the first act of soviet sovereignty was to alienate it into the hands of a Bolshevik government. In response to a few leading Bolsheviks who called for a coalition government, the Bolshevik Central Committee stated that it was "*impossible to refuse a purely Bolshevik government without treason to the slogan of the power of the Soviets, since a majority at the Second All-Russian Congress of Soviets ... handed power over to this government.*" [quoted by Robery V. Daniels, **A Documentary History of Communism**, vol. 1, pp. 127–8] How can the "*power of the Soviets*" exist when said soviets immediately "*handed power*" over to another body? Thus the only "*power*" the soviets had was simply the "*power*" to determine who actually held political power.

The question of who held power, the soviets or the party, came into focus when the soviet elections resulted in non-Bolshevik majorities being elected.

After the initial honeymoon period, soviet elections started to go badly for the Bolsheviks. Ever since taking power in 1917, the Bolsheviks had become increasingly alienated from the working class. The spring and summer of 1918 saw “*great Bolshevik losses in the soviet elections*” in all provincial city elections that data is available for. The Mensheviks were the main beneficiaries of these election swings (Socialist Revolutionaries also gained) The Bolsheviks forcibly disbanded such soviets. They continually postponed elections and “*pack[ed] local soviets once they could no longer count on an electoral majority*” by giving representation to the organisations they dominated which made workplace elections meaningless. [Samuel Farber, **Before Stalinism**, pp. 22–4 and p. 33] In Petrograd, such packing swamped the actual number of workplace delegates, transforming the soviets and making elections irrelevant. Of the 700-plus deputies to the “new” soviet, over half were elected by Bolshevik dominated organisations so ensuring a solid Bolshevik majority even before the factory voting began.

Thus, the regime remained “soviet” in name only. Faced with a defeat in the soviets, the Bolsheviks simply abolished them or changed them to ensure their position. This process, it should be noted, started **before** the outbreak of Civil War in late May 1918, implying that Bolshevik authoritarianism cannot be explained as reactions to difficult objective circumstances.

Unsurprisingly, Bolshevik ideology started to adjust to the position the party found itself in. As Samuel Farber argues, in the “*period of March to June 1918, Lenin began to make frequent distinctions **within** the working class, singling out workers who could still be trusted, denouncing workers whom he accused of abandoning the working class and deserting to the side of the bourgeoisie, and complaining about how the working class had become ‘infected with the disease of petty-bourgeois disintegration.’*” [Op. Cit., p. 25] Combined with the vision of “working-class” or “soviet” power expressed by the power of his party, this laid the foundations for what came next. In 1919 Lenin fully and explicitly argued that the “dictatorship of the proletariat” was, in fact, the dictatorship of the Bolshevik party:

“we are reproached with having established a dictatorship of one party . . . we say, ‘Yes, it is a dictatorship of one party! This is what we stand for and we shall not shift from that position . . .’”
[**Collected Works**, vol. 29, p. 535]

This quickly become Bolshevik orthodoxy. Trotsky argued in his infamous work **Terrorism and Communism** that there was “*no substitution at all*” when “*the power of the party*” replaces “*the power of the working class.*” Zinoviev argued this point at the Second Congress of the Communist International. As he put it:

“Today, people like Kautsky come along and say that in Russia you do not have the dictatorship of the working class but the dictatorship of the party. They think this is a reproach against us. Not in the least! We have a dictatorship of the working class and that is precisely why we also have a dictatorship of the Communist Party. The dictatorship of the Communist Party is only a function, an attribute, an expression of the dictatorship of the working class . . . [T]he dictatorship of the proletariat is at the same time the dictatorship of

the Communist Party.” [Proceedings and Documents of the Second Congress, 1920, vol. 1, pp. 151–2]

Neither Lenin nor Trotsky disagreed. By the end of the civil war, Lenin was arguing that “*the dictatorship of the proletariat cannot be exercised through an organisation embracing the whole of the class, because in all capitalist countries (and not only over here, in one of the most backward) the proletariat is still so divided, so degraded, and so corrupted in parts . . . that an organisation taking in the whole proletariat cannot directly exercise proletarian dictatorship. It can be exercised only by a vanguard . . . the dictatorship of the proletariat cannot be exercised by a mass proletarian organisation.*” [Collected Works, vol. 32, p. 21]

This places the Bolshevik betrayals of the Makhnovists in 1919 and 1920 into **political** context. It also explains the Bolshevik opposition to the proposed fourth clause of the 1920 political and military agreement (see last section). Simply put, at the time (and long afterwards) the Bolsheviks equated the revolution with their own power. As such, Makhnovist calls for soviet self-management threatened the “dictatorship of the proletariat” (i.e. dictatorship of the party) by encouraging working people to participate in the revolution and giving the radically false idea that working-class power could be exercised by working people and their own class organisations.

Lenin, Trotsky and Zinoviev held this position until their deaths. Trotsky, for example, was arguing in 1923 that “[i]f there is one question which basically not only does not require revision but does not so much as admit the thought of revision, it is the question of the dictatorship of the Party, and its leadership in all spheres of our work.” [Leon Trotsky Speaks, p. 158] Even after the rise of Stalinism, he was still arguing for the “*objective necessity*” of the “*revolutionary dictatorship of a proletarian party*” in 1937. He stressed that the “*revolutionary party (vanguard) which renounces its own dictatorship surrenders the masses to the counter-revolution . . . Abstractly speaking, it would be very well if the party dictatorship could be replaced by the ‘dictatorship’ of the whole toiling people without any party, but this presupposes such a high level of political development among the masses that it can never be achieved under capitalist conditions.*” [Trotsky, Writings 1936–37, pp. 513–4]

This suggests that the later Trotskyist argument that the Bolsheviks were forced by “*objective factors*” to replace the dictatorship of the proletariat by that of the party is false. At the time, and afterwards, the Bolsheviks did not argue in these terms. The end of soviet democracy was not considered a problem or a retreat for the revolution. The opposite was the case, with the elimination of democracy being raised to an ideological truism to be applied everywhere. Equally, the fact that the Makhnovists did all they could to promote soviet self-management and actually called regional congresses of workers, peasants and insurgents suggests that “*objective factors*” simply cannot explain Bolshevik actions. Simply put, like the Bolshevik betrayals of the Makhnovists, the Bolshevik elimination of soviet democracy by party dictatorship can only be fully understood by looking at Bolshevik ideology.

Little wonder the Makhnovists argued as followed:

“Since the arrival of the Bolsheviks the dictatorship of their party has been established here. As a party of statist, the Bolshevik Party

everywhere has set up state organs for the purpose of governing the revolutionary people. Everything has to be submitted to their authority and take place under their vigilant eye. All opposition, protest, or even independent initiative has been stifled by their Extraordinary Commissions [the secret police, the Cheka]. Furthermore, all these institutions are composed of people who are removed from labour and from revolution. In other words, what has been created is a situation in which the labouring and revolutionary people have fallen under the surveillance and rule of people who are alien to the working classes, people who are inclined to exercise arbitrariness and violence over the workers. Such is the dictatorship of the Bolshevik-Communist Party . . .

“We again remind the working people that they will liberate themselves from oppression, misery and violence only through their own efforts. No change in power will help them in this. Only by means of their own free worker-peasant organisations can the workers reach the summit of the social revolution — complete freedom and real equality.” [quoted by Arshinov, **Op. Cit.** pp. 116–7]

Which brings us to the next issue, namely working-class freedom. For anarchists, the key point of a revolution is to increase working-class freedom. It means the end of hierarchy and the direct participation in the revolution by the working classes themselves. As Bakunin put it, *“revolution is only sincere, honest and real in the hands of the masses, and that when it is concentrated in those of a few ruling individuals it inevitably and immediately becomes reaction.”* [Michael Bakunin: **Selected Writings**, p. 237] For this reason, the Makhnovists (like Bakunin) argued for a revolutionary society based on free federations of worker and peasant organisations (free soviets).

This means that actions which consolidated rule by a few cannot be revolutionary, even if the few are made up of the most revolutionary of the revolutionaries. Thus working class power cannot be equated to the power of a political party, no matter how *“socialist”* or *“revolutionary”* its ideas or rhetoric. This means that Bolshevik restrictions on working class freedom (of speech, assembly, press, organisation) struck at the heart of the revolution. It did not signify the defence of the revolution, but rather its defeat. Ultimately, as Emma Goldman quickly recognised, what the Bolsheviks called *“defence of the Revolution”* was *“really only the defence of [the] party in power.”* [My **Disillusionment in Russia**, p. 57]

Anarchists had long argued that, to quote Goldman again, there is *“no greater fallacy than the belief that aims and purposes are one thing, while methods and tactics are another. This conception is a potent menace to social regeneration. All human experience teaches that methods and means cannot be separated from the ultimate aim. The means employed become, through individual practice, part and parcel of the final purpose; they influence it, modify it, and presently the aims and means become identical.”* [Op. Cit., p. 260] The evolution of Bolshevik practice and theory reinforces this argument. The means used had an impact on the course of events, which in turn shaped the next set of means and the ideology used to justify it.

This explains the Makhnovist and Bolshevik differences in relationship to working-class freedom. For anarchists, only freedom or the struggle for freedom

can teach people to be free (and so is genuinely revolutionary). This explains why the Makhnovists not only proclaimed freedom of election, speech, press, assembly and organisation for working people, which was an essential revolutionary position, they also implemented it (see section 7). The Bolsheviks did the reverse, clamping down on the opposition at every occasion (including workers' strikes and protests). For the Makhnovists, working-class freedom was the key gain of the revolution, and so had to be introduced, practised and defended. Hence Makhno:

"I consider it an inviolable right of the workers and peasants, a right won by the revolution, to call congresses on their own account, to discuss their affairs. That is why the prohibitions of such congresses, and the declaration proclaiming them illegal . . . , represent a direct and insolent violation of the rights of the workers." [quoted by Arshinov, **Op. Cit.**, p. 129]

For the Bolsheviks, working-class freedom was something to fear. Back in 1903, Lenin laid the groundwork for this by arguing that the "*spontaneous development of the labour movement leads to it being subordinated to bourgeois ideology.*" He stressed that "*the working class, exclusively by their own effort, is able to develop only trade union consciousness . . . the theoretical doctrine of Social-Democracy arose quite independently of the spontaneous growth of the labour movement; it arose as a natural and inevitable outcome of ideas among the revolutionary socialist intelligentsia.*" This meant that "*Social Democratic [i.e. socialist] consciousness . . . could only be brought to them from without.*" [**Essential Works of Lenin**, p. 82 and pp. 74–5] Clearly, if the workers turned against the party, then the workers were "*being subordinated to bourgeois ideology.*" It was in their own interests, therefore, for the party to subordinate the workers and so soviet democracy became not an expression of working-class power but rather something which undermined it!

This perspective can be seen when the Makhnovists liberated cities. In Alexandrovsk and Katerinoslav, the Bolsheviks proposed to the Makhnovists spheres of action — their **Revkom** (Revolutionary Committee) would handle political affairs and the Makhnovists military ones. Makhno advised them "*to go and take up some honest trade instead of seeking to impose their will on the workers.*" Instead, the Makhnovists called upon "*the working population to participate in a general conference . . . and it was proposed that the workers organise the life of the city and the functioning of the factories with their own forced and their organisations.*" [Arshinov **Op. Cit.**, p. 154 and p. 149] The differences between the Bolsheviks and Makhnovists could not be clearer.

Lastly, we should note that while Lenin and the leading Bolsheviks wholeheartedly opposed working-class economic self-management by factory committees and instead urged "efficient" top-down one-man management, the Makhnovists supported working-class self-management of production. Under the Bolsheviks, as Arshinov argued, the "*nationalisation of industry, [while] removing the workers from the hands of individual capitalists, delivered them to the yet more rapacious hands of a single, ever-present capitalist boss, the State. The relations between the workers and this new boss are the same as earlier relations between labour and capital, with the sole difference that the Communist boss, the State, not only exploits the workers, but also punishes them himself*

... *Wage labour has remained what it was before, except that it has taken on the character of an obligation to the State ... It is clear that in all this we are dealing with a simple substitution of State capitalism for private capitalism.*" [Op. Cit., p. 71] The Makhnovist propaganda, in contrast, stressed the need for workers to socialise the means of production and place it under their direct management by their own class organs. In other words, the abolition of wage slavery by workers' self-management of production.

Unsurprisingly, the Makhnovists supported the Kronstadt rebellion (see the appendix "What was the Kronstadt uprising?" for more on Kronstadt). Indeed, there is significant overlap between the Kronstadt demands and the ideas of the Makhnovist movement. For example, the Makhnovist idea of free soviets is almost identical to the first three points of the Kronstadt programme and their land policy the same as point 11 of the Kronstadt demands. The Kronstadt rebels also raised the idea of "free soviets" and the "third revolution," common Makhnovist slogans (see section 3 of the appendix "What was the Kronstadt uprising?" for details). As one Bolshevik writer notes, it is "characteristic that the anarchist-Makhnovists in the Ukraine reprinted the appeal of the Kronstadters, and in general did not hide their sympathy for them." [quoted by Malet, Op. Cit., p. 108] Voline also noted that the "ideas and activities of the Makhnovist peasants were similar in all respects to those of the Kronstadt rebels in 1921." [Op. Cit., p. 575]

In summary, the major difference between the Makhnovists and the Bolsheviks is that the former stuck by and introduced their stated aims of "soviet power" and working-class freedom while the latter rejected them once they clashed with Bolshevik party policies.

15 How do the modern followers of Bolshevism slander the Makhnovists?

Many modern-day supporters of Bolshevism, on the rare occasions when they do mention the Makhnovist movement, simply repeat the old Bolshevik (and Stalinist) slanders against them.

For example, this is what Joseph Seymour of the U.S. **Spartacus League** did. Their newspaper **Workers Vanguard** ran a series entitled "*Marxism vs. Anarchism*" and in part 7, during his discussion of the Russian Revolution, Seymour claimed:

"The most significant counter-revolutionary force under the banner of anarchism was the Ukrainian peasant-based army of Nestor Makhno, which carried out pogroms against Jewish communities and collaborated with White armies against the Bolsheviks." [**Workers Vanguard**, 8/30/1996, p. 7]

Seymour, needless to say, made these accusations without providing any documentation, and with good reason, for outside of Stalinist hagiographies, no evidence exists to support his claims. As we indicated in section 9, the Makhnovists opposed anti-Semitism and did **not** conduct pogroms. Equally, section 12 proves that the Makhnovists did **not** collaborate with the Whites in any way (although this did not stop the Bolshevik press deliberately spreading the lie that they had).

More recently, the UK Leninist **Revolutionary Communist Group** asserted in their paper that the Makhnovists “*joined with counter-revolutionary White and imperialist armies against socialist Russia. This band of brigands also carried out pogroms against Jewish communities in the Ukraine.*” [**Fight Racism! Fight Imperialism!**, issue no. 174, p. 12] No evidence for such a claim was presented in the original review article. When an anarchist pointed out their assertion was “*falling back on a long tradition of Stalinist lies*” and asked for “*any historical references*” to support it, the paper replied by stating that while there were “*several*” references, it would give two: “*E.H. Carr refers to it in his history of the civil war. Also the anarchist historian Paul Avrich mentions it in his work **The anarchists in the Russian Revolution.***” [**Op. Cit.**, no. 175, p. 15]

In reality, neither work says any such thing. Looking at the first (unnamed) one, assuming it is E.H. Carr’s **The Bolshevik Revolution** there is no reference to pogroms carried out by the Makhnovists (looking in the index for “Makhno”). Which, perhaps, explains why the paper refused to provide a book title and page number. As far as the second reference goes, Avrich made no such claim in **The Anarchists in the Russian Revolution**. He **did** address the issue in his **Anarchist Portraits**, concluding such charges are false.

And the name of the original article? Ironically, it was entitled “*The anarchist school of falsification!*”

However, more sophisticated slanders, lies and distortions have been levelled at the Makhnovists by the supporters of Bolshevism. This is to be expected, as the experience of the Makhnovists effectively refute the claim that the Bolsheviks had no choice but to act as they did. It is hard to maintain a position that “*objective conditions*” made the Bolsheviks act as they did when another mass revolutionary army, operating in the same environment, did not act in the same way. This means that the Makhnovists are strong evidence that Bolshevik politics played a key role in the degeneration of the Russian Revolution. Clearly such a conclusion is dangerous to Bolshevism and so the Makhnovist movement must be attacked, regardless of the facts.

A recent example of this is John Rees’ essay “*In Defence of October*” (**International Socialism**, no. 52, pp. 3–82). Rees, a member of the UK Socialist Workers’ Party (SWP) is at pains to downplay the role of Bolshevik ideology in the degeneration of the Russian Revolution. He argues that “*objective factors*” ensured that the Bolsheviks acted as they did. The “*subjective factor*” was simply a choice between defeat and defence against the Whites: “*Within these limits Bolshevik policy was decisive.*” [**Op. Cit.**, p. 30] This explains his attack on the Makhnovist movement. Faced with the same “*objective factors*” as the Bolsheviks, the Makhnovists did not act in the same way. As such, the “*subjective factor*” amounts to more than Rees’ stark choice and so objective conditions cannot explain everything.

Clearly, then, the Makhnovists undermine his basic thesis. As such, we would expect a less than honest account of the movement and Rees does not disappoint. He talks about the “*muddled anarchism*” of Makhno, dismissing the whole movement as offering no alternative to Bolshevism and being without “*an articulated political programme.*” Ultimately, for Rees, Makhno’s “*anarchism was a thin veneer on peasant rebellion*” and while “*on paper*” the Makhnovists “*appeared to have a more democratic programme*” there were “*frauds.*” [p. 57, p. 58, p. 61 and p. 70]

The reality of the situation is totally different. Ignoring the obvious contradiction (i.e. how can the Makhnovists have the appearance of a “*democratic programme*” and, simultaneously, not articulate it?) we shall analyse his account of the Makhnovist movement in order to show exactly how low the supporters of Bolshevism will go to distort the historical record for their own aims (see the appendix “What was the Kronstadt uprising?” for Rees’s distortions about the Kronstadt revolt). Once the selective and edited quotations provided by Rees are corrected, the picture that clearly emerges is that rather than the Makhnovists being “*frauds*,” it is Rees’ account which is the fraud (along with the political tradition which inspired it).

Rees presents two aspects of his critique of the Makhnovists. The first is a history of the movement and its relationships (or lack of them) with the Bolsheviks. The second is a discussion of the ideas which the Makhnovists tried to put into practice. Both aspects of his critique are extremely flawed. Indeed, the errors in his history of the movement are so fundamental (and, indeed, so at odds with his references) that it suggests that ideology overcame objectivity (to be polite). The best that can be said of his account is that at least he does not raise the totally discredited accusation that the Makhnovists were anti-Semitic or “*kulaks*.” However, he more than makes up for this by distorting the facts and references he uses (it would be no exaggeration to argue that the only information Rees gets correct about his sources is the page number).

Rees starts by setting the tone, stating that the “*methods used by Makhno and Antonov [a leader of the “Greens” in Tambov] in their fight against the Red Army often mirrored those used by the Whites.*” [Op. Cit., p. 57] Strangely enough, while he lists some for Antonov, he fails to specify any against Makhno. However, the scene is set. His strongest piece of evidence as regards Makhno’s “*methods*” against the Red Army come from mid-1920 after, it should be noted, the Bolsheviks had engineered the outlawing of the Makhnovist movement and needlessly started the very conflict Rees uses as evidence against Makhno. In other words, he is attacking the Makhnovists for defending themselves against Bolshevik aggression!

He quotes reports from the Ukrainian Front to blacken the Makhnovists, using them to confirm the picture he extracts from “*the diary of Makhno’s wife.*” These entries, from early 1920, he claims “*betray the nature of the movement*” (i.e. after, as we shall see, the Bolsheviks had engineered the outlawing of the Makhnovists). [Op. Cit., p. 58] The major problem for Rees’ case is the fact that this diary is a fake and has been known to be a fake since Arshinov wrote his classic account of the Makhnovists in 1923:

“After 1920, the Bolsheviks wrote a great deal about the personal defects of Makhno, basing their information on the diary of his so-called wife, a certain Fedora Gaenko . . . But Makhno’s wife is Galina Andreevna Kuz’menko. She has lived with him since 1918. She never kept, and therefore never lost, a diary. Thus the documentation of the Soviet authorities is based on a fabrication, and the picture these authorities draw from such a diary is an ordinary lie.”
[Arshinov, **History of the Makhnovist Movement**, p. 226f]

Ironically enough, Rees implicitly acknowledges this by lamely admitting (in an end note) that “*Makhno seems to have had two ‘wives’*” [Op. Cit., p. 78]

And we should note that the source Rees uses for the fake diary entries (W.H. Chamberlin's **The Russian Revolution**) uses as **his** source the very Bolshevik documentation that Arshinov quite correctly denounced over 70 years before Rees put pen to paper. Little wonder Michael Palij, in his detailed account of the movement (**The Anarchism of Nestor Makhno, 1918–1921**), fails to use it. So, in summary, a major part of his account is based on falsehoods, falsehoods exposed as such decades ago. This indicates well the quality of his case against the Makhnovist movement.

As regards the “evidence” he extracts from this fake diary and Red Army reports, it simply shows that Bolsheviks were shot by Makhno’s troops and Red Army troops died in combat. This went both ways, of course. In *“military operations the Bolsheviks shot all prisoners. The Makhnovists shot all captured officers unless the Red rank and file strongly interceded for them. The rank and file were usually sent home, though a number volunteered for service with the Insurgents.”* Equally, *“[o]n the occupation of a village by the Red Army the Cheka would hunt out and hang all active Makhnovite supporters; an amenable Soviet would be set up; officials would be appointed or imported to organise the poor peasants . . . and three or four Red militia men left as armed support for the new village bosses.”* [David Footman, **Op. Cit.**, pp. 292–3] As such, Rees’ account of Makhnovist “terror” against the Bolsheviks seems somewhat hypocritical. We can equally surmise that the methods used by the Bolsheviks against the Makhnovists also *“often mirrored those used by the Whites”!* And Rees lambastes socialist Samuel Farber for mentioning the *“Red Terror, but not the Green Terror”* in Farber’s discussion of the Tambov revolt! All in all, pretty pathetic.

Rees’ concern for the truth can be seen from the fact that he asserts that Makhno’s *“rebellion”* was *“smaller”* than the Tambov uprising and distinguished from it *“only by the muddled anarchism of its leader.”* [**Op. Cit.**, p. 58] In fact, the Makhnovist movement was the bigger of the two. As Michael Malet notes:

“The differences between them explain why the Makhnovshchina lasted over four years, the Antonovshchina less than one year. The initial area of the Makhno movement was larger, and later expanded, whereas the Antonov region was restricted to the southern half of one province throughout its existence. The Makhno movement became established earlier, and was well-known before its break with the soviet regime. A crucial factor was the period of peace between the Bolsheviks and Makhno during the first half of 1919, something Antonov never had. It allowed for political and social development as well as military build-up. It followed from this that Makhno attracted much more support, which was increased and deepened by the positive ideology of Makhno and the anarchists who came to help him. This was not a matter of being anti-State and anti-town — all the Greens, including Antonov, shared this view in a less sophisticated form — but a positive land policy and a realisation of the need to link up with the towns on a federal basis in the post-revolutionary society.” [**Op. Cit.**, p. 155]

Even in terms of troops, the Makhno movement was larger. The Antonov rebellion had *“a peak of around 20,000”* troops. [Read, **Op. Cit.**, p. 268]

Makhno, in comparison, had a peak of about 40,000 in late 1919 [Palij, **Op. Cit.**, p. 112] (Read states a peak of around 30,000 [**Op. Cit.**, p. 264]). Even by the end of 1920, a few months into the Tambov rebellion (it started in August of that year), the Makhnovists still had 10 to 15 thousand troops. [Palij, **Op. Cit.**, p. 237]

In summary, the movement which lasted longer, covered a larger area and involved more troops is classed by Rees as the smaller of the two! Incredible — but it does give a flavour of the scholarship involved in his essay. Perhaps by “*smaller*” Rees simply meant that Makhno was physically shorter than Antonov?

After getting such minor details as size wrong, Rees turns to the actual history of the movement. He looks at the relations between the Makhnovists and the Bolsheviks, accurately stating that they “*were chequered.*” However, he is wrong when he tries to explain what happened by stating they “*reflect[ed] the fast changing military situation in the Ukraine throughout the civil war.*” [**Op. Cit.**, p. 58] In fact, as we will prove, the relationships between the two forces reflected the military situation refracted through the ideology and needs of Bolshevik power. To ignore the ideological factor in the Makhnovist-Bolshevik relationships cannot be justified as the military situation does **not** fully explain what happened.

The Makhnovists co-operated with the Red Army three times. Only two of these periods were formal alliances (the first and last). Discussing the first two pacts, Rees alleges that the Makhnovists broke with the Bolsheviks. The truth is the opposite — the Bolsheviks turned on the Makhnovists and betrayed them in order to consolidate their power. These facts are hardly unknown to Rees as they are contained in the very books he quotes from as evidence for his rewritten history.

The first pact between the Makhnovists and the Red Army ended June 1918. According to Rees, “[*c*]o-operation continued until June 1919 when the Insurgent Army broke from the Red Army” and quotes Michael Palij’s book **The Anarchism of Nestor Makhno** as follows: “*as soon as Makhno left the front he and his associates began to organise new partisan detachments in the Bolsheviks’ rear, which subsequently attacked strongholds, troops, police, trains and food collectors.*” [**Op. Cit.**, p. 58] Rees is clearly implying that Makhno attacked the Bolsheviks, apparently for no reason. The truth is totally different. It is easy to show this — all we need to do is look at the book he uses as evidence.

Rees quotes Palij on page 177. This page is from chapter 16, which is called “*The Bolsheviks Break with Makhno.*” As this was not enough of a clue, Palij presents some necessary background for this Bolshevik break. He notes that before the break, “*the Bolsheviks renewed their anti-Makhno propaganda. Trotsky, in particular, led a violent campaign against the Makhno movement.*” He also mentions that “[*a*]t the same time, the supplies of arms and other war materials to Makhno were stopped, thus weakening the Makhno forces vis-a-vis the Denikin troops.” In this context, the Makhnovists Revolutionary Military Council “*decided to call a fourth congress of peasants, workers, and partisans*” for June 15th, 1919, which Trotsky promptly banned, warning the population that “*participation in the Congress shall be considered an act of state treason against the Soviet Republic and the front.*” [**Op. Cit.**, p. 175 and p. 176]

The Bolsheviks had, of course, tried to ban the third congress in April but had been ignored. This time, they made sure that they were not. Makhno and

his staff were not informed of Trotsky's dictatorial order and learned of it three days later. On June 9th, Makhno sent a telegram informing the Bolsheviks that he was leaving his post as leader of the Makhnovists. He "*handed over his command and left the front with a few of his close associates and a cavalry detachment*" while calling upon the partisans to "*remain at the front to hold off Denikin's forces.*" Trotsky ordered his arrest, but Makhno was warned in advance and escaped. On June 15–16th, members of Makhno's staff "*were captured and executed the next day.*" Now Palij recounts how "*[a]s soon as Makhno left the front he and his associates began to organise new partisan detachments in the Bolsheviks' rear, which subsequently attacked strongholds, troops, police, trains and food collectors.*" [Op. Cit., p. 177]

Palij "*subsequently*" refers to Makhno after Denikin's breakthrough and his occupation of the Ukraine. "*The oppressive policy of the Denikin regime,*" he notes, "*convinced the population that it was as bad as the Bolshevik regime, and brought a strong reaction that led able young men . . . to leave their homes and join Makhno and other partisan groups.*" [Op. Cit., p. 190] As Makhno put it, "*[w]hen the Red Army in south Ukraine began to retreat . . . as if to straighten the front line, but in reality to evacuate Ukraine . . . only then did my staff and I decide to act.*" [quoted by Palij, Op. Cit., p. 190] After trying to fight Denikin's troops, Makhno retreated and called upon his troops to leave the Red Army and rejoin the fight against Denikin. He "*sent agents amongst the Red troops*" to carry out propaganda urging them to stay and fight Denikin with the Makhnovists, which they did in large numbers. This propaganda was "*combined with sabotage.*" Between these two events, Makhno had entered the territory of pogromist warlord Hryhoryiv (which did **not** contain Red troops as they were in conflict) and assassinated him. [Op. Cit., p. 191 and p. 173]

It should also be noted that Palij states that it was the Whites who "*were the main enemy that Makhno fought, stubbornly and uncompromisingly, from the end of 1918 to the end of 1919.*" [Op. Cit., p. 177]

Clearly, Rees's summary leaves a lot to be desired! Rather than Makhno attacking the Bolsheviks, it was they who broke with him — as Palij, Rees's source, makes clear. Indeed, Makhno made no attempt to undermine the Red Army's campaign against Denikin (after all, that would have placed his troops and region in danger). Rather, he waited until the Bolsheviks showed that they would not defend the Ukraine against the Whites before he acted. As such, Rees misuses his source material and used Palij as evidence for a viewpoint which is the exact opposite of the one he recounts. The dishonesty is obvious. But, then again, it is understandable, as Trotsky banning a worker, peasant and partisan congress would hardly fit into Rees' attempt to portray the Bolsheviks as democratic socialists overcome by objective circumstances! Given that the Makhnovists had successfully held three such congresses to discuss the war against reaction, how could objective circumstances be blamed for the dictatorial actions of Trotsky and other leading Red Army officers in the Ukraine? Better not to mention this and instead rewrite history by making Makhno break with the Bolsheviks and attack them for no reason!

Rees moves onto the period of co-operation between the insurgents and the Bolsheviks. His version of what happened is that "*Denikin's advance against Makhno's territory in autumn 1919 quickly forced a renewal of the treaty with the Bolsheviks. Makhno harassed Denikin's troops from the rear, making their advance more difficult.*" [Op. Cit., p. 58]

A more accurate account of what happened would be that Makhno reorganised his troops after the Bolsheviks had retreated and evacuated the Ukraine. These troops included those that had been left in the Red Army in June, who now left to rejoin him (and brought a few Red Army units along too). After conducting quick and demoralising raids against Denikin's forces, the Makhnovists were forced to retreat to the West (followed by White forces). In late September, near Peregonovka, Makhno inflicted a major defeat against the following Whites and allowed the Makhnovists to attack across Denikin's supply lines (which stopped his attack on Moscow thus, ironically, saving the Bolshevik regime). Makhno's swift attack on the rear of the Whites ensured their defeat. As the correspondent of **Le Temps** observed:

"There is no doubt that Denikin's defeat is explained more by the uprising of the peasants who brandished Makhno's black flag, then by the success of Trotsky's regular army. The partisan bands of 'Batko' tipped the scales in favour of the Reds." [quoted by Palij, **Op. Cit.**, p. 208]

Palij argues that it was the "*rapidly changing military situation [which] soon caused a change in the Bolsheviks' attitude toward Makhno.*" The two forces meet up on December 24th, 1919. However, "*[a]lthough the Bolsheviks fraternised with the Makhno troops and the commander even offered co-operation, they distrusted Makhno, fearing the popularity he had gained as a result of his successful fight against Denikin.*" [**Op. Cit.**, p. 209] It should also be stressed that **no** formal treaty was signed.

Clearly, Rees' summary leaves a lot to be desired!

This is not the end of it. Rees even attempts to blame the Makhnovists for the attack of General Wrangel. He argues that "*by the end of 1919 the immediate White threat was removed. Makhno refused to move his troops to the Polish front to meet the imminent invasion and hostilities with the Red Army began again on an even more widespread scale.*" [**Op. Cit.**, p. 58]

This, needless to say, is a total distortion of the facts. Firstly, it should be noted that the "*imminent*" invasion by Poland Rees mentions did not, in fact, occur until "*the end of April*" (the 26th, to be precise). The break with Makhno occurred as a result of an order issued in early January (the 8th, to be precise). [Michael Palij, **Op. Cit.**, p. 219 and p. 210] Clearly, the excuse of "*imminent*" invasion was a cover, as recognised by a source Rees himself uses, namely Palij's work:

"The author of the order realised at that time there was no real war between the Poles and the Bolsheviks at that time and he also knew that Makhno would not abandon his region . . . Uborevich [the author] explained that 'an appropriate reaction by Makhno to this order would give us the chance to have accurate grounds for our next steps' . . . [He] concluded: 'The order is a certain political manoeuvre and, at the very least, we expect positive results from Makhno's realisation of this.'" [Palij, **Op. Cit.**, p. 210]

This is confirmed by Rees' other references. David Footman, whom Rees also uses for evidence against the Makhnovist movement, notes that while it was "*true there were military reasons for reinforcing*" the Polish frontier (although

he also notes the significant fact that the war “*was not to break out for another four months*”), it was “*admitted on the Soviet side that this order was primarily ‘dictated by the necessity’ of liquidating Makhnovshchina as an independent movement. Only when he was far removed from his home country would it be possible to counteract his influence, and to split up and integrate his partisans into various Red Army formations.*” He notes that there were “*other occasions (notably in Siberia) of the Soviet authorities solving the problem of difficult partisan leaders by sending them off to fight on distant fronts*” and, of course, that “*Makhno and his staff . . . were perfectly aware of the underlying Soviet motives.*” Footman recounts how the Makhnovist staff sent a “*reasoned reply*” to the Bolsheviks, that there “*was no immediate response*” from them and in “*mid-January the Central Committee of the Ukrainian Communist Party declared Makhno and his force to be outside the law, and the Red Army attacked.*” [**The Russian Civil War**, pp. 290–1]

In other words, according to the sources Rees himself selects, the Bolsheviks **started** the conflict in order to eliminate opposition to their power!

Needless to say, the Makhnovists **did** realise the political motivations behind the order. As Arshinov notes, “[*s]ending the insurrectionary army to the Polish front meant removing from the Ukraine the main nerve centre of the revolutionary insurrection. This was precisely what the Bolsheviks wanted: they would then be absolute masters of the rebellious region, and the Makhnovists were perfectly aware of this.*” In addition, “*neither the 14th Corps nor any other unit of the Red Army had any ties with the Makhnovist army; least of all were they in a position to give orders to the insurrectionary army.*” Nor does Rees mention that the Makhnovists considered the move “*physically impossible*” as “*half the men, the entire staff and the commander himself were in hospital with typhus.*” [**Op. Cit.**, p. 163]

Consider what Rees is (distortedly) accounting. The beginning of 1920 was a time of peace. The Civil War looked like it was over. The White Generals had been defeated. Now the Bolsheviks turn on their allies after issuing an ultimatum which they knew would never be obeyed. Under the circumstances, a stupider decision cannot be easily found! Moreover, the very logic of the order was a joke. Would be it wise to leave the Ukraine undefended? Of course not and if Red Army units were to stay to defend the region, why not the Makhnovists who actually came from the area in question? Why provoke a conflict when it was possible to transfer Red Army units to the Polish front? Simply put, Rees presents a distorted picture of what was happening in the Ukraine at the time simply so he can whitewash the Bolshevik regime and blacken the Makhnovists. As he himself later notes, the Bolshevik-Makhnovist conflict gave the White General Wrangel the space required to restart the Civil War. Thus the Bolshevik decision to attack the Makhnovists helped prolong the Civil War — the very factor Rees blames the degeneration of the Russian Revolution and Bolshevik ideology and practice on!

It is **now** that Rees presents his evidence of Makhnovist violence against the Bolsheviks (the Red Army reports and entries from the fake diary of Makhno’s wife). Arguing that the entries from the fake diary “*betray the nature of the movement in this period,*” he tries to link them with Makhnovist theory. “*These actions,*” he argues, “*were consistent with an earlier resolution of the Insurgent Army which declared that it was ‘the actions of the Bolshevik regime which cause a real danger to the worker-peasant revolution.’*” [**Op. Cit.**, p. 59]

Firstly, given a true account of the second break between the Makhnovists and Bolsheviks, it would be fair to conclude that the resolution was, in fact, correct! However, such facts are not mentioned by Rees, so the reader is left in ignorance.

Secondly, to correct another of Rees' causal mistakes, it should be noted that this resolution was **not** passed by the Insurgent Army. Rather it was passed at the Second Regional Congress of Peasants, Workers and Insurgents held at Hulyai Pole on February 12th, 1919. This congress had 245 delegates, representing 350 districts and was one of four organised by the Makhnovists. Unsurprisingly, these regional congresses are not even mentioned by Rees in his account. This is for obvious reasons — if the Makhnovists could organise congresses of workers, peasants and insurgents to discuss the progress of the revolution, then why could the Bolsheviks not manage it? Equally, to mention them would also mean mentioning that the Bolsheviks tried to ban one and succeeded in banning another.

Thirdly, the tone of the congress was anti-Bolshevik simply because the Ukraine had had a taste of Bolshevik rule. As Rees himself acknowledges in a roundabout way, the Bolsheviks had managed to alienate the peasantry by their agricultural policies.

Fourthly, the Bolsheviks had engineered the outlawing of the Makhnovists. Thus the actions of the Makhnovists were **not** “consistent” with the earlier resolution. They were, in fact, “consistent” with self-defence against a repressive state which had attacked them first!

Looking at the congress where the resolution was passed, we find that the list of “real dangers” was, quite simply, sensible and, in fact, in line with Leninist rhetoric. The resolution acknowledged the fact that the Bolshevik party was “demanding a monopoly of the Revolution.” As we discussed in section 14, it was during this period that the Bolsheviks explicitly started to argue that the “dictatorship of the party” **was** the “dictatorship of the proletariat.” The resolution also stated:

“With deep regret the Congress must also declare that apart from external enemies a perhaps even greater danger, arising from its internal shortcomings, threatens the Revolution of the Russian and Ukrainian peasants and workers. The Soviet Governments of Russia and of the Ukraine, by their orders and decrees, are making efforts to deprive local soviets of peasants and workers’ deputies of their freedom and autonomy.” [quoted by Footman, **Op. Cit.**, p. 267]

It also stated:

“the political commissars are watching each step of the local soviets and dealing ruthlessly with those friends of peasants and workers who act in defence of peoples’ freedom from the agency of the central government . . . The Bolshevik regime arrested left Socialist Revolutionaries and anarchists, closing their newspapers, stifling any manifestation of revolutionary expression.”

Delegates also complained that the Bolshevik government had not been elected, that it was “imposing upon us its party dictatorship” and “attempting to introduce its Bolshevik monopoly over the soviets.” [quoted by Palij, **Op. Cit.**, p. 154]

The resolution noted that the current situation was “characterised by the seizure of power by the political party of Communists-Bolsheviks who do not balk at anything in order to preserve and consolidate their political power by armed force acting from the centre. The party is conducting a criminal policy in regard to the social revolution and in regard to the labouring masses.” To top it off, point number three read:

“We protest against the reactionary habits of Bolshevik rulers, commissars, and agents of the Cheka, who are shooting workers, peasants, and rebels, inventing all kinds of excuses . . . The Cheka which were supposed to struggle with counterrevolution . . . have turned in the Bolsheviks’ hands into an instrument for the suppression of the will of the people. They have grown in some cases into detachments of several hundred armed men with a variety of arms. We demand that all these forces be dispatched to the front.” [quoted by Vladimir N. Brovkin, **Behind the Front Lines of the Civil War**, pp. 109–10]

We should also point out that Rees selectively quotes the resolution to distort its meaning. The resolution, in fact, “urges the peasants and workers to watch vigilantly the actions of the Bolshevik regime that cause a real danger to the worker-peasant revolution.” [quoted by Palić, **Op. Cit.**, p. 154] We have listed some of the actions of the Bolsheviks that the congress considered as a “real danger.” Considering the truth of these complaints, only someone blinded by Bolshevik ideology would consider it strange that worker and peasant delegates should agree to “watch vigilantly” those actions of the Bolsheviks which were a “real danger” to their revolution!

Lenin (before taking power, of course) had argued that elections and recall to soviets were essential to ensure that the workers control the “workers’ state” and that socialism required the elimination of “special bodies of armed men” by an armed population. To this day, his followers parrot his claims (while, simultaneously, justifying the exact opposite in Lenin’s Russia). Now, is Rees **really** arguing that the Bolshevik monopoly of power, the creation of a secret police and the clamping down on working people’s freedom were **not** dangers to the Russian Revolution and should not be watched “vigilantly”? If so, then his conception of revolution includes the strange notion that dictatorship by a party does not threaten a revolution! Then again, neither did the Bolsheviks (indeed, they thought calling worker, peasant and partisan congresses to discuss the development of the revolution as the real danger to it!). If not, then he cannot fault the regional congress resolution for pointing out the obvious. As such, Rees’ misquoting of the resolution backfires on him.

Significantly, Rees fails to mention that during this period (the first half of 1920), the Bolsheviks “shot ordinary soldiers as well as their commanders, destroying their houses, confiscating their properties, and persecuting their families. Moreover the Bolsheviks conducted mass arrests of innocent peasants who were suspected of collaborating in some way with the partisans. It is impossible to determine the casualties involved.” The hypocrisy is clear. While Rees presents information (some of it, we stress, from a fake source) on Makhnovist attacks against the Bolshevik dictatorship, he remains silent on the Bolshevik tactics, violence and state terrorism. Given that the Bolsheviks had attacked the

Makhnovists, it seems strange that that Rees ignores the “*merciless methods*” of the Bolsheviks (to use Palij’s phrase) and concentrates instead on the acts of self-defence forced onto the Makhnovists. Perhaps this is because it would provide too strong a “*flavour*” of the Bolshevik regime? [Op. Cit., pp. 212–3 and p. 213]

Rees makes great play of the fact that White forces took advantage of the conflict between the Makhnovists and the Bolsheviks, as would be expected. However, it seems like an act of ideological faith to blame the victims of this conflict for it! In his attempts to demonise the Makhnovists, he argues that “[i]n fact it was Makhno’s actions against the Red Army which made ‘a brief return of the Whites possible.’” In defence of his claims, Rees quotes from W. Bruce Lincoln’s **Red Victory**. However, looking at Lincoln’s work we discover that Lincoln is well aware who is to blame for the return of the Whites. Unsurprisingly, it is **not** the Makhnovists:

“Once Trotsky’s Red Army had crushed Iudenich and Kolchak and driven Deniken’s forces back upon their bases in the Crimea and the Kuban, it turned upon Makhno’s partisan forces with a vengeance . . . [I]n mid-January 1920, after a typhus epidemic had decimated his forces, a re-established Central Committee of the Ukrainian Communist Party declared Makhno an outlaw. Yet the Bolsheviks could not free themselves from Makhno’s grasp so easily, and it became one of the supreme ironies of the Russian Civil War that his attacks against the rear of the Red Army made it possible for the resurrected White armies . . . to return briefly to the southern Ukraine in 1920.” [Red Victory, p. 327]

Ignoring the fact that Rees does not bother to give the correct quote (a problem that re-occurs frequently in his essay), it can be seen that he does paraphrase the last sentence of Lincoln’s work correctly. Strange, then, that he ignores the rest of his account which clearly indicates that the Bolsheviks “*turned upon*” the Makhnovists and “*declared Makhno an outlaw.*” Obviously such trivial facts as the initial Bolshevik attacks against the Makhnovists are unimportant to understanding what actually happened in this period. Informing his readers that it was the Bolsheviks’ betrayal of the Makhnovists which provoked the resistance that “*made it possible for . . . the White armies . . . to return briefly*” would confuse them with facts and so it goes unmentioned.

Lincoln, it must be stressed, concurs with Rees’s other main sources (Palij and Footman) on the fact that the Bolsheviks betrayed the Makhnovists! Clearly, Rees has rewritten history and distorted **all** of his main references on the Makhnovist movement. After reading the same fact in three different sources, you would think that the Bolshevik betrayal of the Makhnovists which provoked their resistance against them would warrant **some** mention, but no! In true Stalinist fashion, Rees managed to turn a Bolshevik betrayal of the Makhnovists into a stick with which to beat them with! Truly amazing.

Simply put, if the Bolsheviks had not wanted to impose their rule over the Ukraine, then the conflict with the Makhnovists need not have taken place and Wrangel would not have been in a position to invade the Ukraine. Why did the Bolsheviks act in this way? There was no “*objective factor*” for this action and so we must turn to Bolshevik ideology.

As we proved in section 14, Bolshevik ideology by this time identified Bolshevik party dictatorship as the only expression of “the dictatorship of the proletariat.” Does Rees **really** believe that such perspectives had no impact on how the Bolsheviks acted during the Revolution? The betrayal of the Makhnovists can only be understood in terms of the “*subjective factor*” Rees seeks to ignore. If you think, as the Bolsheviks clearly did, that the dictatorship of the proletariat equalled the dictatorship of the party (and vice versa) then anything which threatened the rule of the party had to be destroyed. Whether this was soviet democracy or the Makhnovists did not matter. The Makhnovist idea of worker and peasant self-management, like soviet democracy, could not be reconciled with the Bolshevik ideology. As such, Bolshevik policy explains the betrayals of the Makhnovists.

Not satisfied with distorting his source material to present the Makhnovists as the guilty party in the return of Wrangel, he decides to blame the initial success of Wrangel on them as well. He quotes Michael Palij as follows: “*As Wrangel advanced . . . Makhno retreated north . . . leaving behind small partisan units in the villages and towns to carry out covert destruction of the Bolshevik administrative apparatus and supply bases.*” [Op. Cit., p. 59] He again sources Palij’s work on the “*effective*” nature of these groups, stating that White Colonel Noga reported to headquarters that Makhno was critical to Wrangel’s advance.

As regards the claims that Makhno was “*critical*” to Wrangel’s advance, Colonel Noga actually states that it was “*peasant uprisings under Makhno and many other partisan detachments*” which gave “*the Reds no rest.*” [quoted by Palij, Op. Cit., p. 214] However, what Rees fails to mention is that Palij argues that it was the Bolshevik “*policy of terror and exploitation*” which had “*turned almost all segments of Ukrainian society against the Bolsheviks, substantially strengthened the Makhno movement, and consequently facilitated the advance of the reorganised anti-Bolshevik force of General Wrangel from the Crimea into South Ukraine, the Makhno region.*” [Palij, Op. Cit., p. 214] Again, Makhno is blamed for the inevitable results of Bolshevik policies and actions!

It should also be reported that Noga’s comments are dated 25th March 1920, while Palij’s summary of Makhno’s activities retreating from Wrangel was about June 1920 — 2 months later! As regards this advance by Wrangel, Palij argues that it was the “*outbreak of the Polish-Bolshevik war at the end of April*” which “*benefited Wrangel*” and “*enabled him to launch an offensive against the Bolsheviks in Tavriia on June 6th.*” Indeed, it was after a “*series of battles*” that Wrangel “*penetrated north, forcing a general Bolshevik retreat.*” Now, “[*a*]s Wrangel advanced deeper into the Left Bank, Makhno retreated north to the Kharkiv region, leaving behind small partisan units in the villages and towns to carry on covert destruction of the Bolshevik administrative apparatus and supply bases.” [Op. Cit., p. 219] Again, Rees’ account has little bearing to reality or the source material he uses.

Rees continues to re-write history by arguing that “*Makhno did not fight with the Reds again until October 1920 when Wrangel advanced on Makhno’s base.*” [Op. Cit., p. 59] In fact, it was the **Makhnovists** who contacted the Bolsheviks in July and August in 1920 with a view to suspending hostilities and co-operating in the fight against Wrangel. This decision was made at a mass assembly of insurgents. Sadly, the Bolsheviks made no response. Only in September, after Wrangel had occupied many towns, did the Bolsheviks enter into negotiations. [Arshinov, Op. Cit., pp. 176–7] This is confirmed by Foot-

man, who states that it is “*agreed that the initiative for joint action against Wrangel came from the Makhnovists*” [Op. Cit., p. 294], as well as by Palij, who notes that “*Makhno was compelled to seek an understanding with the Bolsheviks*” but “*no reply was received.*” It was “*Wrangel’s success [which] caused the Bolshevik leaders to reconsider Makhno’s earlier proposal.*” [Op. Cit., pp. 222–3] Obviously indicating that the Makhnovists placed the struggle against the White counter-revolution above their own politics would place the Bolsheviks in a bad light, and so Rees fails to give the details behind the agreement of joint action against Wrangel.

As regards this third and final break, Rees states that it was (“*unsurprisingly*”) a “*treaty of convenience on the part of both sides and as soon as Wrangel was defeated at the end of the year the Red Army fought Makhno until he gave up the struggle.*” [Op. Cit., p. 59] Which, as far as it goes, is true. Makhno, however, “*assumed [that] the forthcoming conflict with the Bolsheviks could be limited to the realm of ideas*” and that they “*would not attack his movement immediately.*” [Palij, Op. Cit., p. 231] He was wrong. Instead the Bolsheviks attacked the Makhnovists without warning and, unlike the other breaks, without pretext (although leaflets handed out to the Red Army stated that **Makhno** had “*violat[ed] the agreement*”! [Palij, Op. Cit., p. 236]).

It would be a good idea to reproduce the agreement which the Bolsheviks ripped up. There were two parts, a military and a political one. The military one is pretty straight forward (although the clause on the Makhnovists refusing to accept Red Army detachments or deserters suggests that the Makhnovists’ democratic army was seen by many Red Army soldiers as a better alternative to Trotsky’s autocratic structure). The political agreement was as follows:

“1. *Immediate release, and an end to the persecution of all Makhno men and anarchists in the territories of the Soviet Republics, except those who carry on armed resistance against Soviet authorities.*

“2. *Makhno men and anarchists were to have complete freedom of expression of their ideas and principles, by speech and the press, provided that nothing was expressed that tended to a violent overthrow of Soviet government, and on condition that military censorship be respected. . .*

“3. *Makhno men and anarchists were to enjoy full rights of participation in elections to the soviets, including the right to be elected, and free participation in the organisation of the forthcoming Fifth All-Ukrainian Congress of Soviets . . .*” [cited by Palij, Op. Cit., p. 224]

Needless to say, the Bolsheviks delayed the publication of the political agreement several until several days after the military one was published — “*thus blurring its real meaning.*” [Palij, Op. Cit., p. 225] Clearly, as it stands, the agreement just gave the Makhnovists and anarchists the rights they should have had according to the Soviet Constitution! Little wonder the Bolsheviks ignored it — they also ignored their own constitution. However, it is the fourth point of the political agreement which gives the best insight into the nature of Bolshevism. This last point was never ratified by the Bolsheviks as it was “*absolutely unacceptable to the dictatorship of the proletariat.*” [quoted by Palij, **Ibid.**] This clause was:

“One of the basic principles of the Makhno movement being the struggle for the self-administration of the toilers, the Partisan Army brings up a fourth point: in the region of the Makhno movement, the worker and peasant population is to organise and maintain its own free institutions for economic and political self-administration; this region is subsequently federated with Soviet republics by means of agreements freely negotiated with the appropriate Soviet governmental organ.” [quoted by Palij, **Op. Cit.**, p. 224]

Clearly, this idea of worker and peasant self-management, like soviet democracy, could not be reconciled with the Bolshevik support for party dictatorship as the expression of *“the dictatorship of the proletariat”* which had become a Bolshevik ideological truism by that time. Little wonder the Bolsheviks failed to ratify the fourth clause and violated the other agreements. Simply put, a libertarian alternative to Bolshevism would give the Russian and Ukrainian working masses hope of freedom and make them harder to control. It is unsurprising that Rees fails to discuss the treaty — it would, yet again, undermine his case that the Bolsheviks were forced by objective circumstances to be dictatorial.

And, of course, let us not forget the circumstances in which this betrayal took place. The country was, as Rees reminds us, in a state of economic disruption and collapse. Indeed, Rees blames the anti-working class and dictatorial actions and policies of the Bolsheviks on the chaos caused by the civil war. Yet here are the Bolsheviks prolonging this very Civil War by turning (yet again!) on their allies. After the defeat of the Whites, the Bolsheviks preferred to attack the Makhnovists rather than allow them the freedom they had been fighting for. Resources which could have been used to aid the economic rebuilding of Russia and the Ukraine were used to attack their former allies. The talents and energy of the Makhnovists were either killed or wasted in a pointless conflict. Should we be surprised? After all, the Bolsheviks had preferred to compound their foes during the Civil War (and, indirectly, aid the very Whites they were fighting) by betraying their Makhnovist allies on two previous occasions (once, because the Makhnovists had dared call a conference of working people to discuss the civil war being fought in their name). Clearly, Bolshevik politics and ideology played a key role in all these decisions. They were **not** driven by terrible objective circumstances (indeed, they made them worse).

Rees obviously distorted the truth about the first two agreements between the Makhnovists and the Bolsheviks. He portrayed the Makhnovists as the guilty party, “breaking” with the Bolsheviks when in fact it was (in both cases) the Bolsheviks who broke with and betrayed the Makhnovists. That explains why he fails to present any information on **why** the first break happened and why he distorts the events of the second. It cannot be said that he was unaware of these facts — they are in the very books he himself references! As such, we have a clear and intended desire to deceive the reader. As regards the third agreement, while he makes no pretence that the Makhnovists were the guilty party however, he implies that the Bolsheviks had to act as they did before the Makhnovists turned on them. Little wonder, then, that he does not provide the details of the agreement made between the Bolsheviks and Makhnovists — to do so would have been to expose the authoritarianism of the Bolsheviks. Simply put, Rees’ distortions of the source material he uses comes as no surprise. It undermines his basic argument and so cannot be used in its original form.

Hence the cherry-picking of quotations to support his case.

After distorting Makhnovist relations with the Bolsheviks, Rees moves on to distorting the socio-political ideas and practice of the Makhnovists. As would be expected from his hatchet-job on the military history of the movement, his account of its social ideas leaves much to be desired. However, both aspects of his critique have much in common. His account of its theoretical ideas and its attempts to apply them again abuse the source material in disgraceful ways.

For example, Rees states that under the Makhnovists “[p]apers could be published, but the Bolshevik and Left Socialist Revolutionary press were not allowed to call for revolution” and references Michael Palij’s book. [Op. Cit., p. 60] Looking at the page in question, we discover a somewhat different account. According to Palij’s work, what the Makhnovists **actually** “prohibited” was that these parties should “propagate armed uprisings against the Makhnovist movement.” A clear rewriting of the source material and an indication of how low Leninists will sink. Significantly, Palij also notes that this “freedom of speech, press, assembly and association” was implemented “[i]n contrast to the Bolshevik regime” and its policy of crushing such liberties. [Op. Cit. pp. 152–3] Ironically, the military-political agreement of late 1920 between the Reds and Makhnovists included a similar clause, banning expression that “tended to a violent overthrow of the Soviet government.” [quoted by Palij, Op. Cit., p. 224] Which means, to use Rees’ distorted terminology, that the Bolsheviks banned calls for revolution!

However, this distortion of the source material **does** give us an insight into the mentality of Leninism. After all, according to Palij, when the Makhnovists entered a city or town they “immediately announced to the population that the army did not intend to exercise political authority.” The workers and peasants were to set up soviets “that would carry out the will and orders of their constituents” as well as “organis[e] their own self-defence force against counter-revolution and banditry.” These political changes were matched in the economic sphere as well, as the “holdings of the landlords, the monasteries and the state, including all livestock and goods, were to be transferred to the peasants” and “all factories, plants, mines, and other means of production were to become property of all the workers under control of their professional unions.” [Op. Cit., p. 151]

In such an environment, a call for “revolution” (or, more correctly, “armed uprisings against the Makhno movement”) could only mean a Bolshevik coup to install a Bolshevik party dictatorship. As the Makhnovists were clearly defending working-class and peasant self-government, then a Bolshevik call for “armed uprisings” against them also meant the end of such free soviets and their replacement with party dictatorship. Little wonder Rees distorts his source! Arshinov makes the situation clear:

*“The only restriction that the Makhnovists considered necessary to impose on the Bolsheviks, the left Socialist Revolutionaries and other statists was a prohibition on the formation of those ‘revolutionary committees’ which sought to impose a dictatorship over the people. In Aleksandrovsk and Ekaterinoslav, right after the occupation of these cities by the Makhnovists, the Bolsheviks hastened to organise **Revkoms (Revolutionary Committees)** seeking to organise their political power and govern the population ... Makhno advised*

them to go and take up some honest trade instead of seeking to impose their will on the workers ... In this context the Makhnovists' attitude was completely justified and consistent. To protect the full freedom of speech, press, and organisation, they had to take measures against formations which sought to stifle this freedom, to suppress other organisations, and to impose their will and dictatorial authority on the workers." [Op. Cit., p. 154]

Little wonder Rees distorts the issues and transforms a policy to defend the **real** revolution into one which banned a "call for revolution"! We should be grateful that he distorted the Makhnovist message for it allows us to indicate the dictatorial nature of the regime and politics Rees is defending.

All of which disproves Rees' assertion that "*the movement never had any real support from the working class. Neither was it particularly interested in developing a programme which would appeal to the workers.*" [Op. Cit., p. 59] Now, Rees had obviously read Palij's summary of Makhnovist ideas. Is he claiming that workers' self-management and the socialisation of the means of production do not "*appeal*" to workers? After all, most Leninists pay lip-service to these ideas. Is Rees arguing that the Bolshevik policies of the time (namely one-man management and the militarisation of labour) "*appealed*" to the workers more than workers' self-management of production? Equally, the Makhnovists argued that the workers should form their own free soviets which would "*carry out the will and orders of their constituents.*" [Palij, Op. Cit., p. 151] Is Rees **really** arguing that the Bolshevik policy of party dictatorship "*appealed*" to the workers more than soviet democracy? If so, then heaven help us if the SWP ever get into power!

Luckily, as Jonathan Aves' book **Workers Against Lenin** proves, this was not the case. Working-class resistance to Bolshevik policies was extremely widespread and was expressed by strikes. It should be noted that the wave of strikes all across Russia which preceded the Kronstadt revolt also raised the demand for soviet democracy. The call for "*free soviets*" was raised by the Kronstadt revolt itself and during the "mini-Kronstadt" in Katerinoslav in June 1921 where the demands of the workers "*were very similar in content with the resolutions of the Kronstadt rebels*" and telegraph operators sent "*messages throughout the Soviet Republic calling for 'free soviets.'*" [Jonathan Aves, **Workers Against Lenin**, p. 172 and p. 173]

Clearly, the Makhnovists **did** create a "*programme that would appeal to the workers.*" However, it is true that the Makhnovists did fail win over more than a minority of workers. This may have been due to the fact that the Makhnovists only freed two cities, both for short periods of time. As Paul Avrich notes, "*he found little time to implement his economic programs.*" [**Anarchist Portraits**, p. 121] Given how Rees bends over backwards to justify Bolshevik policies in terms of "*objective factors*," it is significant that in his discussion of the Makhnovists such "*objective factors*" as time fail to get a mention!

Thus Rees's attempt to paint the Makhnovists as anti-working class fails. While this is the core of his dismissal of them as a possible "*libertarian alternative to the Bolsheviks*," the facts do not support his assertions. He gives the example of Makhno's advice to railway workers in Aleksandrovsk "*who had not been paid for many weeks*" that they should "*simply charge passengers a fair price and so generate their own wages.*" He states that this "*advice aimed at*

reproducing the petit-bourgeois patterns of the countryside.” [Op. Cit., p. 59] Two points can be raised to this argument.

Firstly, we should highlight the Bolshevik (and so, presumably, “*proletarian*”) patterns imposed on the railway workers. Trotsky simply “*plac[ed] the railwaymen and the personnel of the repair workshops under martial law*” and “*summarily ousted*” the leaders of the railwaymen’s trade union when they objected. The Central Administrative Body of Railways (Tsektran) he created was run by him “*along strictly military and bureaucratic lines.*” In other words, he applied his ideas on the “*militarisation of labour*” in full. [M. Brinton, **The Bolsheviks and Workers’ Control**, p. 67] Compared to the Bolshevik pattern, only an ideologue could suggest that Makhno’s advice (and it was advice, not a decree imposed from above, as was Trotsky’s) can be considered worse. Indeed, by being based on workers’ self-management it was infinitely more socialist than the militarised Bolshevik state capitalist system.

Secondly, Rees fails to understand the nature of anarchism. Anarchism argues that it is up to working class people to organise their own activities. This meant that, ultimately, it was up to the railway workers **themselves** (in association with other workers) to organise their own work and industry. Rather than being imposed by a few leaders, **real** socialism can only come from below, built by working people, through their own efforts and own class organisations. Anarchists can suggest ideas and solutions, but ultimately it’s up to workers (and peasants) to organise their own affairs. Thus, rather than being a source of condemnation, Makhno’s comments should be considered as praiseworthy as they were made in a spirit of equality and were based on encouraging workers’ self-management.

Ultimately, the best reply to Rees is simply the fact that after holding a “*general conference of the workers of the city*” at which it was “*proposed that the workers organise the life of the city and the functioning of the factories with their own forces and their own organisations*” based on “*the principles of self-management,*” the “[*r*]ailroad workers took the first step in this direction” by “*form[ing] a committee charged with organising the railway network of the region.*” [Arshinov, **Op. Cit.**, p. 149]

Even more amazing (if that is possible) is Rees’ account of the revolution in the countryside. Rees argues that the “*real basis of Makhno’s support was not his anarchism, but his opposition to grain requisitioning and his determination not to disturb the peasant economy*” [Op. Cit., p. 59] and quotes Palij as follows:

“Makhno had not put an end to the agricultural inequalities. His aim was to avoid conflicts with the villages and to maintain a sort of united front of the entire peasantry.” [M. Palij, **Op. Cit.**, p. 214]

However, here is the actual context of the (corrected) quote:

“Peasants’ economic conditions in the region of the Makhno movement were greatly improved at the expense of the estates of the landlords, the church, monasteries, and the richest peasants, but Makhno had not put an end to the agricultural inequalities. His aim was to avoid conflicts within the villages and to maintain a sort of united front of the entire peasantry.” [M. Palij, **Op. Cit.**, p. 214]

Clearly, Rees has distorted the source material, conveniently missing out the information that Makhno had most definitely “*disturbed*” the peasant economy at the expense of the rich! And, we are sure that Rees would have a fit if it were suggested that the real basis of Bolshevik support was not their socialism, but their opposition to the war and the Whites!

Amazingly, Rees also somehow manages to forget to mention the peasant revolution which had started in 1917 in his attack against Makhno:

“Makhno and his associates brought socio-political issues into the daily life of the people, who in turn supported the expropriation of large estates . . . On the eve of open conflict [in late 1917], Makhno assembled all the landowners and rich peasants (kulaks) of the area and took from them all official documents relating to their land, livestock, and equipment. Subsequently an inventory of this property was taken and reported to the people at the session of the local soviet, and then at the regional meeting, It was decided to allow the landlords to share the land, livestock, and tools equally with the peasants.” [Palij, **Op. Cit.**, p. 71]

Obviously, Rees considers the expropriating of the landlords and kulaks as an act which “*did not disturb the age-old class structure of the countryside*”!

Let us not forget that the official Makhnovist position was that the “*holdings of the landlords, the monasteries, and the state, including all livestock and goods, were to be transferred to the peasants.*” [Palij, **Op. Cit.**, p. 151] At the second congress of workers, peasants and insurgents held in February, 1919, it was resolved that “*all land be transferred to the hands of toiling peasants . . . according to the norm of equal distribution.*” [quoted by Palij, **Op. Cit.**, p. 155] This meant that every peasant family had as much land as they could cultivate without the use of hired labour. The Makhnovists argued with regards to the kulaks:

“We are sure that . . . the kulak elements of the village will be pushed to one side by the very course of events. The toiling peasantry will itself turn effortlessly on the kulaks, first by adopting the kulak’s surplus land for general use, then naturally drawing the kulak elements into the social organisation.” [cited by Michael Malet, **Op. Cit.**, pp. 118–9]

Thus, just to stress the point, the Makhnovists **did** “*disturb*” the “*age-old class structure of the countryside.*”

Clearly, Rees is simply taking nonsense. When he states that Makhnovist land policies “*did not disturb the age-old class structure of the countryside,*” he is simply showing his utter and total disregard for the truth. As the Bolsheviks themselves found out, no mass movement could possibly exist among the peasants without having a positive and levelling land policy. The Makhnovists were no exception.

Rees then states that “*[i]n 1919 the local Bolshevik authorities made mistakes which played into Makhno’s hands.*” Unsurprisingly enough, he argues that this was because they “*tried to carry through the socialisation of the land, rather than handing it over to the peasants.*” [**Op. Cit.**, p. 60] In fact, the Bolsheviks did **not** try to implement the “*socialisation*” of land. Rather, they tried

to **nationalise** the land and place it under state control — a radically different concept. Indeed, it was the Makhnovists who argued that the “*land, the factories, the workshops, the mines, the railroads and the other wealth of the people must belong to the working people themselves, to those who work in them, that is to say, they must be socialised.*” [contained in Arshinov, **Op. Cit.**, p. 273] The Bolsheviks, in contrast, initially “*decreed that all lands formerly belonging to the landlords should be expropriated and transformed into state farms.*” [Palij, **Op. Cit.**, p. 156] The peasants quite rightly thought that this just replaced one set of landlords with another, stealing the land which rightfully belonged to them.

After distorting the source material by selective quoting, Rees does it again when he argues that “*by the spring of 1920 they [the Bolsheviks] had reversed the policy towards the peasants and instituted Committees of Poor Peasants, these ‘hurt Makhno . . . his heart hardened and he sometimes ordered executions.’ This policy helped the Bolshevik ascendancy.*” [**Op. Cit.**, p. 60]

Rees quotes Palij as evidence. To refute his argument we need simply quote the same pages:

*“Although they [the Bolsheviks] modified their agricultural policy by introducing on February 5, 1920, a new land law, distributing the former landlords’, state and church lands among the peasants, they did not succeed in placating them because of the requisitions, which the peasants considered outright robbery . . . Subsequently the Bolsheviks decided to introduce class warfare into the villages. A decree was issued on May 19, 1920, establishing ‘Committees of the Poor’ . . . Authority in the villages was delegated to the committees, which assisted the Bolsheviks in seizing the surplus grain . . . The establishment of Committees of the Poor was painful to Makhno because they became not only part of the Bolshevik administrative apparatus the peasants opposed, but also informers helping the Bolshevik secret police in its persecution of the partisans, their families and supporters, even to the extent of hunting down and executing wounded partisans . . . Consequently, Makhno’s ‘heart hardened and he sometimes ordered executions where some generosity would have bestowed more credit upon him and his movement. That the Bolsheviks preceded him with the bad example was no excuse. For he claimed to be fighting for a better cause.’ Although the committees in time gave the Bolsheviks a hold on every village, their abuse of power disorganised and slowed down agricultural life . . . This policy of terror and exploitation turned almost all segments of Ukrainian society against the Bolsheviks, substantially strengthened the Makhno movement, and consequently facilitated the advance of the reorganised anti-Bolshevik force of General Wrangel from the Crimea into South Ukraine, the Makhno region.” [M. Palij, **Op. Cit.**, pp. 213–4]*

Amazing what a “. . .” can hide, is it not! Rees turns an account which clearly shows the Bolshevik policy was based on informers, secret police and the murder of rebels as well as being a total disaster into a victory. Moreover, he also transforms it so that the victims are portrayed as the villains. Words cannot do this re-writing of history justice. Yes, indeed, an organisation of informers to the secret police in every village can aid the “*ascendancy*” of a

one-party dictatorship (aided, of course, by overwhelming military force), but it cannot aid the ascendancy of freedom, equality and socialism.

Given the actual record of the Bolsheviks' attempts to break up what they considered the "age-old class structure" of the villages with the "Committees of the Poor," it is clear why Rees distorts his source.

It does seem ironic that Rees attacks the Makhnovists for not pursuing Bolshevik peasant policies. Considering the absolute **failure** of those policies, the fact that Makhno did not follow them is hardly cause for condemnation! Indeed, given the numerous anti-Bolshevik uprisings and large-scale state repression they provoked, attacking the Makhnovists for not pursuing such insane policies is equally insane. After all, who, in the middle of a Civil War, makes matters worse for themselves by creating more enemies? Only the insane — or the Bolsheviks!

That Makhnovist land policy was correct and the Bolshevik one wrong can be seen from the fact that the latter changed their policies and brought them into line with the Makhnovist ones. As Palij notes, the Bolsheviks "modified their agricultural policy by introducing on February 5, 1920, a new land law, distributing the formers landlords', state, and church lands among the peasants." This, of course, was a vindication of Makhnovist policy (which dated from 1917!). Makhno "initiated the peasants' movement, confiscating and distributing landlords' land and goods" (and, unlike the Bolsheviks, "encouraging the workers to take over factories and workshops"). As regards the Bolsheviks attempts to break up what they considered the "age-old class structure" of the villages with the "Committees of the Poor," it was, as noted above, a complete disaster and counter-productive. [Op. Cit., p. 213 and p. 250] All in all, the Makhnovist policies were clearly the most successful as regards the peasantry. They broke up the class system in the countryside by expropriating the ruling class and did not create new conflicts by artificially imposing themselves onto the villages.

Lastly, we must also wonder just how sensible it is to "disturb" the economy that produces the food you eat. Given that Rees, in part, blames Bolshevik tyranny on the disruption of the economy, it seems incredible that he faults Makhno for not adding to the chaos by failing to "disrupt the peasant economy"! However, why let logic get in the way of a good rant!

As well as ignoring the wealth of information on Makhnovist land policy, Rees turns to their attempts to form free agrarian communes. He argues that Makhno's attempts "to go beyond the traditional peasant economy were doomed" and quotes Makhno's memoirs which state "the mass of the people did not go over" to his peasant communes, which only involved a few hundred families. [Op. Cit., p. 59]

Looking at Makhno's memoirs a somewhat different picture appears. Firstly, Makhno states that there were "four such agricultural communes within a three- or four-mile radius of Hulyai-Pole," but in the whole district "there were many" in 1918 (the period being discussed in his memoirs). Makhno recounts how each "commune consisted of ten families of peasants and workers, totalling a hundred, two hundred or three hundred members" and the "management of each commune was conducted by a general meeting of all its members." He does state that "the mass of people did not go over to it" but, significantly, he argues that this was because of "the advance of the German and Austrian armies, their own lack of organisation, and their inability to defend this order against the new 'revolutionary' and counter-revolutionary authorities. For this reason the toiling

population of the district limited their real revolutionary activity to supporting in every way those bold spirits among them who had settled on the old estates [of the landlords] and organised their personal and economic life on free communal lines.” [quoted by Paul Avrich, **The Anarchists in the Russian Revolution**, pp. 130–2]

Of course, failing to mention the time period Makhno was recounting does distort the success of the communes. The Bolsheviks were evacuating the Ukraine as part of their treaty with German and Austrian Imperialism when the communes were being set up. This left them in a dangerous position, needless to say. By July, 1918, the area was occupied by Austrian troops and it was early 1919 before the situation was stable enough to allow their reintroduction. One commune was named “*Rosa Luxemburg*” (after the Marxist revolutionary martyr) and was mostly destroyed by the Bolsheviks in June 1919 and completely destroyed by the Whites a few days later. In such circumstances, can it be surprising that only a minority of peasants got involved in them? Rather than praise the Makhnovists for positive social experimentation in difficult circumstances, Rees shows his ignorance of the objective conditions facing the revolution. Perhaps if the peasants did not have to worry about the Bolsheviks as well as the Whites, they would have had more members?

All in all, Rees account of Makhnovist ideas on the peasant economy are, to put it mildly, incorrect. They paint a radically different picture of the reality of both Makhnovist ideas and practice as regards the peasantry. Ironically, the soundness of Makhnovist policy in this area can be seen from the fact that the Bolsheviks changed their land policy to bring it into line with it. Not, of course, that you would know that from Rees’ account. Nor would you know what the facts of the Bolsheviks’ land policy were either. Indeed, Rees uses Michael Palij’s book to create a picture of events which is the exact opposite of that contained in it! Very impressive!

Intent on driving the final nail into the coffin, he tries to apply “class analysis” to the Makhnovists. Rees actually states that “*given this social base [i.e. the Makhnovists’ peasant base] . . . much of Makhno’s libertarianism amounted to little more than paper decrees.*” [Op. Cit., p. 60]

Ironically enough, the list of “*paper decrees*” Rees presents (when not false or distorted) are also failings associated with the Bolsheviks (and taken to even more extreme measures by the Bolsheviks)! As such, his lambasting of the Makhnovists seems deeply hypocritical. Moreover, his attempt to ground the few deviations that exist between Makhnovist practice and Makhnovist theory in the peasant base of the army seems an abuse of class analysis. After all, these deviations were also shared by the Bolsheviks. As such, how can Rees justify the Bolshevik deviations from socialist theory in terms of “*objective factors*” yet blame Makhnovist ones on their “*social base*”? Do “*objective factors*” only afflict Leninists?

Take for example his first “*paper*” decree, namely the election of commanders. He states that “*in practice the most senior commanders were appointed by Makhno.*” In other words, the Makhnovists applied this principle extensively but not completely. The Bolsheviks abolished it by decree (and did not blame it on “*exceptional circumstances*” nor consider it as a “*retreat*”, as Rees asserts). Now, if Rees’ “class analysis” of the limitations of the Makhnovists were true, does this mean that an army of a regime with a proletarian base (as he considers the Bolshevik regime) cannot have elected commanders? This is the logical

conclusion of his argument.

Equally, his attempt to “*give a flavour of the movement*” by quoting one of the resolutions adopted by a mass meeting of partisans also backfires (namely, “*to obey the orders of the commanders if the commanders are sober enough to give them*”). Firstly, it should be noted that this was, originally, from a Red Army source. Secondly, drunkenness was a big problem during the civil war (as in any war). It was one of the easiest ways of forgetting reality at a time when life was often unpleasant and sometimes short. As such, the “*objective factor*” of civil war explains this resolution rather than the social base of the movement! Thirdly, Rees himself quotes a Central Committee member’s comment to the Eighth Party Congress that there were so many “*horrifying facts about drunkenness, debauchery, corruption, robbery and irresponsible behaviour of many party members that one’s hair stands on end.*” [Op. Cit., p. 66] The Eighth Congress was in 1919. Does this comment give a “*flavour*” of the Bolshevik regime under Lenin? Obviously not, as Rees defends it and blames this list of horrors on the objective factors facing the Bolsheviks. Why does the drunkenness of the Makhnovists come from their “*social base*” while that of the Bolsheviks from “*objective factors*”? Simply put, Rees is insulting the intelligence of his readers.

The Makhnovist resolution was passed by a mass assembly of partisans, suggesting a fundamentally democratic organisation. Rees argues that the civil war resulted in the Bolshevik vices becoming institutionalised in the power of the bureaucracy. However, as can be seen, the Makhnovists practised democracy during the civil war, suggesting that the objective factors Rees tries to blame for the Bolshevik vices simply cannot explain everything. As such, his own example (yet again) backfires on his argument.

Rees claims that “*Makhno held elections, but no parties were allowed to participate in them.*” [Op. Cit., p. 60] This is probably derived from Palij’s comment that the free soviets would “*carry out the will and orders of their constituents*” and “[*o*]nly working people, not representatives of political parties, might join the soviets.” [Op. Cit., p. 151] This, in turn, derives from a Makhnovist proclamation from January 1920 which stated:

“Only labourers who are contributing work necessary to the social economy should participate in the soviets. Representatives of political organisations have no place in worker-peasant soviets, since their participation in a workers’ soviet will transform the latter into deputies of the party and can lead to the downfall of the soviet system.” [contained in Peter Arshinov’s **History of the Makhnovist Movement**, p. 266]

Rees’ comments indicate that he is not familiar with the make-up of the Russian Soviets of 1917. Unlike the soviets from the 1905 revolution, those in 1917 allowed “*various parties and other organisations to acquire voting representation in the soviet executive committees.*” Indeed, this was “*often how high party leaders became voting delegates to*” such bodies. It should “*be underlined that these party delegates were selected by the leadership of each political organisation, and not by the soviet assembly itself. In other words, these executive committee members were not directly elected by the representatives of the producers*” (never mind by the producers themselves). [Samuel Farber, **Before Stalinism**, p. 31]

In addition, Russian Anarchists had often attacked the use of “party lists” in soviet elections, which turned the soviets from working-class organs into talking-shops. [Paul Avrich, **The Russian Anarchists**, p. 190] This use of party lists meant that soviet delegates could be anyone. For example, the leading left-wing Menshevik Martov recounts that in early 1920 a chemical factory “put up Lenin against me as a candidate [to the Moscow soviet]. I received seventy-six votes he-eight (in an open vote).” [quoted by Israel Getzler, **Martov**, p. 202] How would either of these two intellectuals actually know and reflect the concerns and interests of the workers they would be “delegates” of? If the soviets were meant to be the delegates of working people, then why should non-working class members of political parties be elected to a soviet?

Given that the people elected to the free soviets would be **delegates** and **not** representatives, this would mean that they would reflect the wishes of their workmates rather than the decisions of the party’s central committee. As such, if a worker who was a member of a political party could convince their workmates of their ideas, the delegate would reflect the decisions of the mass assembly. As such, the input of political parties would not be undermined in any way (although their domination would be!).

As such, the Makhnovist ideas on soviets did not, in fact, mean that workers and peasants could **not** elect or send delegates who were members of political parties. They had no problems as such with delegates who happened to be working-class party members. They did have problems with delegates representing only political parties, delegates who were not workers and soviets being mere ciphers covering party rule.

That this was the case can be seen from a few facts. Firstly, the February 1919 congress resolution “was written by the anarchists, left Socialist Revolutionaries, and the chairman.” [Palij, **Op. Cit.**, p. 155] Similarly, the Makhnovist Revolutionary Military Soviet created at the Aleksandrovska congress in late 1919 had three Communists elected to it. There were 18 delegates from workers at that congress, six were Mensheviks and the remaining 12 included Communists [Malet, **Op. Cit.**, p. 111, p. 124] Clearly, members of political parties were elected to both the congresses and the Revolutionary Military Soviet. As such, the idea that free soviets excluded members of political parties is false — they simply were not dominated by them (for example, having executives made up of members of a single party or delegating their power to a government as per the national soviet in Russia). This could, of course, change. In the words of the Makhnovist reply to Bolshevik attempts to ban one of their congresses:

“The Revolutionary Military Council . . . holds itself above the pressure and influence of all parties and only recognises the people who elected it. Its duty is to accomplish what the people have instructed it to do, and to create no obstacles to any left socialist party in the propagation of ideas. Consequently, if one day the Bolshevik idea succeeds among the workers, the Revolutionary Military Council . . . will necessarily be replaced by another organisation, ‘more revolutionary’ and more Bolshevik.” [quoted by Arshinov, **Op. Cit.**, pp. 103–4]

As such, the Makhnovists supported the right of working-class self-determination, as expressed by one delegate to Hulyai Pole conference in February 1919:

“No party has a right to usurp governmental power into its hands

... We want life, all problems, to be decided locally, not by order from any authority above; and all peasants and workers should decide their own fate, while those elected should only carry out the toilers' wish." [quoted by Palij, **Op. Cit.**, p. 154]

Thus, Rees fails to present an accurate account of Makhnovist theory and practice as regards "*free soviets*." Rather than oppose party participation within their soviets and congresses, the Makhnovists opposed the domination of soviets and congresses by political parties, a radically different concept. Like the Kronstadt rebels, they argued for all power to the soviets and not to parties.

Lastly, Rees attacks the Makhnovists for having two security forces, the Cheka-like **razvedka** and the Punitive Commission. How this is an expression of the Makhnovist "*social base*" is hard to explain, as both the Bolsheviks and Whites also had their security forces and counter-intelligence agencies.

While Rees quotes Footman's statement that "*we can safely assume [!] these services were responsible for frequent injustices and atrocities,*" he fails to mention that Footman does not provide any examples (hence his comment that we can "*assume*" they occurred!). Footman himself notes that "[*o*ff the Makhnovite security services ... we know very little." [David Footman, **Op. Cit.**, p. 288] Rees himself only lists one, namely the summary shooting of a Bolshevik cell discovered in the Army. Given the bloody record of the Bolshevik Cheka (which, again, Rees defends as necessary to defend against the Whites!), this suggests that the crimes of the Makhnovist counter-intelligence pale in comparison.

Rees also quotes the historian Chamberlin that "*Makhno's private Cheka ... quickly disposed of anyone who was suspected of plotting against his life.*" [**Op. Cit.**, 60] Strangely enough, Rees fails to mention the Bolshevik attempts to assassinate Makhno, including the one in the latter part of May 1919 when, it should be noted, the Makhnovists and Bolsheviks were meant to be in alliance. Nor does he mention that the Cheka "*would hunt out and hang all active Makhnovites.*" [David Footman, **Civil War in Russia**, p. 271 and p. 293]

As regards the last conflict with the Red Army, it should be noted that while "*generalised accusations of Makhnovist atrocities are common*" the facts are it was "*the Makhnovists who stood to gain by liberating prisoners, the Bolsheviks by shooting them.*" This was because "*the Red Army soldiers had been conscripted from elsewhere to do work they neither liked nor understood*" and the "*insurgents had their own homes to defend.*" [Malet, **Op. Cit.**, p. 130] Thus, while Rees quotes Footman's opinion that "*Makhno's later campaigns [were] among the most bloody and vindictive,*" these facts suggest that we **cannot** "*safely assume that these [security] services were responsible for frequent injustices and atrocities.*" Clearly, if the Makhnovists were releasing Red Army prisoners (and many of whom were joining Makhno), the picture of an atrocity inflicting army can hardly be a valid picture.

And it should be stressed that Bolshevik terror and violence against the Makhnovists is strangely absent from Rees's account.

Rees presents just **one** concrete example of Makhnovist "*Cheka-like*" violence, namely, the execution of a Bolshevik cell in December, 1919. It should be noted that the Bolsheviks had been explicitly arguing for Party dictatorship for some time by then. The reason why the Bolsheviks had been "*denied an open trial*" was because they had already been shot. Unfortunately, Makhno

gave two contradictory reasons why the Bolsheviks had been killed. This led to the Makhnovist Revolutionary Military Soviet setting up a commission of three to investigate the issue. Perhaps unsurprisingly, the commission exonerated Makhno although Voline, out of the members, seemed to have been genuinely embarrassed by the affair. [Malet, **Op. Cit.**, pp. 51–2] Needless to say, Rees fails to comment on the Bolshevik summary killing of Makhnovist staff in June 1919 or, indeed, any other summary executions conducted by the Bolsheviks against the Makhnovists (including the shooting of prisoners).

Given the summary justice handed out by the Bolshevik Cheka, it seems strange that Rees dismisses the Makhnovist movement on assumptions and one event, yet he does. Obviously, the large-scale and continuous Bolshevik killings of political enemies (including Makhnovists) is irrelevant compared to this one event.

All in all, Rees' attempts to blame the few deviations the Makhnovists had from anarchist theory on the "*social base*" of the movement are a joke. While justifying the far more extreme deviations of Bolshevik theory and practice in terms of "*objective factors*," he refuses to consider this possibility for the Makhnovists. The hypocrisy is clear, if not unexpected.

One last point. Taking Rees' "class analysis" of the Makhnovists seriously, the logical conclusion of his argument is clear. For Rees, a movement which compromises slightly with its principles in the face of extreme "*objective factors*" is "*petty bourgeois*." However, a movement which compromises totally (indeed introduces and justifies the exact opposite of its original claims) in face of the same "*objective factors*" is "*proletarian*." As such, his pathetic attempt at "class analysis" of the Makhnovists simply shows up the dictatorial nature of the Bolsheviks. If trying to live up to libertarian/democratic ideals but not totally succeeding signifies being "*petty-bourgeois*" while dismissing those ideals totally in favour of top-down, autocratic hierarchies is "*proletarian*" then sane people would happily be labelled "*petty-bourgeois*"!

And Rees states that "[n]either Makhno's social programme nor his political regime could provide an alternative to the Bolsheviks"! [**Op. Cit.**, p. 60] Little wonder he distorts that social programme and political regime — an honest account of both would see that Rees is wrong. The Makhnovist movement clearly shows that not only did Bolshevik policies have a decisive impact on the development of the Russian Revolution, there was a clear alternative to Bolshevik authoritarianism and party dictatorship.

In summary, Rees' attack on the Makhnovists fails. It can be faulted on both factual and logical grounds. His article is so riddled with errors, selective quoting and downright lies that it is factually unreliable. Similarly, his attempt to attack the Makhnovist political theory and practice is equally factually incorrect. His attempt to explain the deviations of Makhnovist practice from its theory in terms of the "*social base*" is simply an insult to the intelligence of the reader and an abuse of class analysis.

A far more compelling analysis would recognise that the Makhnovists were not a perfect social movement but that the deviations of its practice from its theory can be explained by the objective factors it faced. Equally, the example of the Makhnovists shows the weakness of Rees' main argument, namely that the objective factors that Bolshevism faced can solely explain its authoritarian politics. That the Makhnovists, facing the same objective factors, did not act in the same manner as the Bolsheviks shows that Bolshevik ideology played a

key role in the failure of the revolution. This explains Rees' clumsy attempts to rewrite the history and theory of the Makhnovshchina.

16 What lessons can be learned from the Makhnovists?

The Makhnovist movement was one of the most important events of the Russian Revolution. It was a mass movement of working people who tried and succeeded to implement libertarian ideas in extremely difficult circumstances.

As such, the most important lesson gained from the experience of the Makhno movement is simply that “*objective factors*” cannot and do not explain the degeneration of the Russian Revolution or Bolshevik authoritarianism. Here was a movement which faced the same terrible circumstances as the Bolsheviks faced (White counter-revolution, economic disruption, and so on) and yet did not act in the same manner as the Bolsheviks. Where the Bolsheviks completely abolished army democracy, the Makhnovists extensively applied it. Where the Bolsheviks implemented party dictatorship **over** the soviets, the Makhnovists encouraged and practised soviet self-management. While the Bolsheviks eliminated freedom of speech, press, assembly, the Makhnovists defended and implemented them. The list is endless (see section 14).

This means that one of the key defences of the Bolshevik Myth, namely that the Bolsheviks had no choice but to act as they did due to “*objective factors*” or “*circumstances*” is totally undermined. As such, it points to the obvious conclusion: Bolshevik ideology influenced the practice of the party, as did their position within the “*workers' state*,” and so influenced the outcome of the Revolution. This means that to play down Bolshevik ideology or practice in favour of “*objective factors*”, one fails to understand that the actions and ideas generated during the revolution were not “objectively” determined but were **themselves** important and sometimes decisive factors in the outcome.

Take, for example, the Bolshevik decision to betray the Makhnovists in 1920. Neither betrayal was “objectively determined” beforehand. However, it did make perfect sense from a perspective which equated the revolution with the “*dictatorship of the party*.” That the first betrayal undoubtedly extended the length of the Civil War by allowing the Whites the space to reorganise under Wrangel also had its impact on Bolshevik theory and practice as well as the “*objective factors*” it had to face.

As such, the Makhnovists give a counter-example to the common pro-Bolshevik argument that the horrors of the Civil War were responsible for the degeneration of the Bolshevik Party and the revolution. In the words of one historian:

“[The] Insurgent Army . . . was organised on a voluntary basis and respected the principle of election of commanders and staff. The regulations governing conduct were drawn up by commissions of soldiers and approved by general meetings of the units concerned. In other words, it embodied the principles of the soldiers' movement of 1917, principles rejected by the Bolsheviks when they set up the Red Army, supposedly because of their harmful effects on fighting efficiency, a characteristic of them discovered by the Bolsheviks only after they had come to power on the basis of promoting them. But

the Insurgent Army, given its size and equipment, was very effective. Some have even credited it with greater responsibility than the Red Army for the defeat of Denikin. It took enormous efforts by the Bolsheviks, including the arrest or shooting of thousands of people, in order to pacify the region . . . even after the Insurgent Army was militarily broken, it took six months to mop up the remnants. . . Within its area of operations, which consisted of only two to three per cent of the total population of European Russia, the Insurgent Army was undoubtedly highly effective. While one can never know how history might have turned out had things been different, the Insurgent Army gives plenty of grounds for thinking that a people's revolutionary war of the kind it represented might have been at least as effective on a national scale with nationwide resources at its disposal as Trotsky and the Red Army's ruthless centralisation. It would not, however, have been compatible with the imposition from above of the Bolshevik leadership's vision of revolution. When the Insurgent Army drove the enemy out of an area they encouraged the local population to solve their own problems. Where the Red Army took over, the Cheka quickly followed. The Bolsheviks themselves were energetically snuffing out the ideals of 1917.

*"Given such considerations it may be, though it cannot be logically proven one way or the other, that the Bolsheviks' deeply rooted authoritarianism rather than the civil war itself led to the construction of a highly centralised system that aimed at 'complete control' over political and many other aspects of social life. It could even be argued, though it is equally unprovable, that the tendency to authoritarianism, far from ensuring victory, nearly led to catastrophe. For one thing, it helped alienate many workers who felt cheated by the outcome of the revolution, and support for the regime was . . . far from even in this core group . . . [It] may, indeed, have been becoming more alienated as a result of Bolshevik measures depriving it of the means of expression of its growing catalogue of grievances. . . Far from being 'necessary' or even functional, the Bolshevik leadership's obsession with externally imposed discipline and authority might even have made the task of victory in the war more difficult and more costly. If the counter-example of Makhno is anything to go by then it certainly did." [Christopher Read, **From Tsar to Soviets**, pp. 264–5]*

As such, another key lesson to be learned from the Makhno movement is the importance of practising during a revolution the ideas you preach before it. Means and ends are linked, with the means shaping the ends and the ends inspiring the means. As such, if you argue for working-class power and freedom, you cannot dump these aims during a revolution without ensuring that they are never applied after it. As the Makhnovist movement showed, even the most difficult situations need not hinder the application of revolutionary ideas.

The importance of encouraging working-class autonomy also shines through the Makhnovist experience. The problems facing a social revolution are many, as are the problems involved in constructing a new society. The solutions to these problems cannot be found without the active and full participation of the working class. As the Makhnovist congresses and soviets show, free debate

and meaningful meetings are the only means, firstly, to ensure that working-class people are “*the masters of their own lives*,” that “*they themselves are making the revolution*,” that they “*have gained freedom*.” “*Take that faith away*,” stressed Alexander Berkman, “*deprive the people of power by setting up some authority over them, be it a political party or military organisation, and you have dealt a fatal blow to the revolution. You will have robbed it of its main source of strength, the masses*.” [ABC of Anarchism, p. 82]

Secondly, it allows the participation of all in solving the problems of the revolution and of constructing the new society. Without this input, **real** socialism cannot be created and, at best, some form of oppressive state capitalist regime would be created (as Bolshevism shows). A new society needs the freedom of experimentation, to adapt freely to the problems it faces, to adjust to the needs and hopes of those making it. Without working-class freedom and autonomy, public life becomes impoverished, miserable and rigid as the affairs of all are handed over to a few leaders at the top of a social hierarchy, who cannot possibly understand, let alone solve, the problems affecting society. Freedom allows the working class to take an active part in the revolution. Restricting working-class freedom means the bureaucratisation of the revolution as a few party leaders cannot hope to direct and rule the lives of millions without a strong state apparatus. Simply put, the emancipation of the working class is the task of the working class itself. Either working class people create socialism (and that needs workers’ autonomy and freedom as its basis), or some clique will and the result will not be a socialist society.

As the experience of the Makhnovist movement shows, working-class freedom can be applied during a revolution and when it is faced with the danger of counter-revolution.

Another key lesson from the Makhnovist movement is that of the need for effective anarchist organisation. The Makhnovists did not become anarchist-influenced by chance. The hard effort by the local anarchists in Hulyai Pole before and during 1917 paid off in terms of political influence afterwards. Therefore, anarchists need to take a leading role in the struggles of working people (as we indicated in section I.8.2, this was how the Spanish anarchists gained influence as well). As Voline noted, one of the advantages the Makhnovist movement had was “*the activity of . . . libertarian elements in the region . . . [and the] rapidity with which the peasant masses and the insurgents, despite unfavourable circumstances, became acquainted with libertarian ideas and sought to apply them*.” [Op. Cit., p. 570]

Arshinov expands on this issue in a chapter of his history (“*The Makhnovshchina and Anarchism*”), arguing that many Russian anarchists “*suffered from the disease of disorganisation*,” which led to “*impoverished ideas and futile practice*.” Moreover, most did not join the Makhnovist movement, “*remained in their circles and **slept through** a mass movement of paramount importance*.” [Op. Cit., p. 244 and p. 242]

Indeed, it was only in May 1919 that the “*Nabat*” Ukrainian anarchist confederation was organised. This federation worked closely with the Makhnovists and gained influence in the villages, towns and cities within and around the Makhnovist region. In such circumstances, the anarchists were at a disadvantage compared to the Bolsheviks, Mensheviks and Socialist-Revolutionaries, who had been organised far longer and so had more influence within the urban workers.

While many anarchists did participate effectively and organisationally within many areas of Russia and the Ukraine (gaining influence in Moscow and Petrograd, for example), they were much weaker than the Bolsheviks. This meant that the Bolshevik idea of revolution gained influence (by, it should be noted, appropriating anarchist slogans and tactics). Once in power, the Bolsheviks turned against their rivals, using state repression to effectively destroy the anarchist movement in Russia in April 1918 (see section 24 of the appendix “What happened during the Russian Revolution?” for details). This, incidentally, led to many anarchists coming to the Ukraine to escape repression and many joined the Makhnovists. As Arshinov notes, the Bolsheviks “*knew perfectly well that . . . anarchism in Russia, lacking any contact with a mass movement as important as the Makhnovshchina, did not have a base and could not threaten nor endanger them.*” [Op. Cit., p. 248] Waiting till **after** a revolution starts to build such a base is a dangerous tactic, as the experience of the Russian anarchists shows. As the experience of the Moscow anarchists active in the bakers’ union shows, organised working-class support can be an effective deterrent to state repression (the Moscow bakers’ union continued to have anarchists active in it until 1921).

It should be noted that this lesson was recognised by the main anarchists associated with the Makhnovists. In exile, Voline argued for the need to build a “*synthesis*” anarchist federation (see section J.3.2) while Arshinov and Makhno both associated themselves with the Platform (see section J.3.3).

Another key lesson is the need to combine rural and urban organisation. As Voline argued, the “*absence of a vigorous organised workers’ movement which could support that of the peasant insurgents*” was a major disadvantage for the Makhno movement. [Voline, Op. Cit., p. 571] If there had been a workers’ movement influenced by anarchist or syndicalist ideas within the Ukrainian towns during the Russian Revolution, the possibilities of constructive work would have been increased immensely. Take the example of when the Makhnovists liberated Aleksandrovsk and organised two workers’ conferences. It was only at the insurgents’ insistence that the unions agreed to send delegates, but for information only. This was undoubtedly due to the fact that Mensheviks had some influence in the unions and Bolshevik influence was increasing. Both parties may have preferred the Makhnovists to the Whites, but neither accepted anarchist ideas of workers’ self-management and so constructive work was limited to the railway workers. In contrast, when Katerinoslav was liberated, the bakers set themselves to preparing the socialisation of their industry and drawing up plans to feed both the army and the civilian population. Unsurprisingly, the bakers had long been under anarcho-syndicalist influence. [Malet, Op. Cit., p. 123 and p. 124]

As the Makhnovists themselves realised, their movement had to be complemented by urban working-class self-activity and self-organisations. While they did all they could to encourage it, they lacked a base within the workers’ movement and so their ideas had to overcome the twin barriers of workers’ unfamiliarity with both them and their ideas and Marxist influence. With a strong working-class movement influenced by anarchist ideas, the possibilities for constructive work between city and village would have been helped immensely (this can be seen from the example of the Spanish Revolution of 1936, where rural and urban collectives and unions made direct links with each other).

Lastly, there is the lesson to be gained from Makhnovist co-operation with

the Bolsheviks. Simply put, the experience shows the importance of being wary towards Bolshevism. As Voline put it, another disadvantage of the Makhnovists was a “*certain casualness, a lack of necessary distrust, towards the Communists.*” [Op. Cit., p. 571] The Makhnovists were betrayed three times by the Bolsheviks, who continually placed maintaining their own power above the needs of the revolution. The anarchists were simply used as cannon fodder against the Whites and once their utility had ended, the Bolsheviks turned their guns on them.

Thus a lesson to be learned is that co-operation between anarchists and Bolsheviks is fraught with danger. As many activists are aware, modern-day supporters of Bolshevism constantly urge everyone to unite “*against the common enemy*” and not to be “*sectarian*” (although, somehow this appeal to non-sectarianism does not stop them printing lying accounts of anarchism!). The Makhnovists took them at their word in early 1919 and soon found out that “*unity*” meant “*follow our orders.*” When the Makhnovists continued to apply their ideas of working-class self-management, the Bolsheviks turned on them. Similarly, in early 1920 the Bolsheviks outlawed the Makhnovists in order to break their influence in the Ukraine. The Makhnovist contribution to the defeat of Denikin (the common enemy) was ignored. Lastly, in mid-1920 the Makhnovists placed the need of the revolution first and suggested an alliance to defeat the common enemy of Wrangel. Once Wrangel had been defeated, the Bolsheviks ripped up the agreement they had signed and, yet again, turned on the Makhnovists. Simply put, the Bolsheviks continually placed their own interests before that of the revolution and their allies. This is to be expected from an ideology based on vanguardism (see section H.5 for further discussion).

This does not mean that anarchists and Leninists should not work together. In some circumstances and in some social movements, this may be essential. However, it would be wise to learn from history and not ignore it and, as such, modern activists should be wary when conducting such co-operation. Ultimately, for Leninists, social movements are simply a means to their end (the seizing of state power by them on behalf of the working class) and anarchists should never forget it.

Thus the lessons of the Makhnovist movement are exceedingly rich. Simply put, the Makhnovshchina show that anarchism is a viable form of revolutionary ideas and can be applied successfully in extremely difficult circumstances. They show that social revolutions need not consist of changing one set of bosses for another. The Makhnovist movement clearly shows that libertarian ideas can be successfully applied in a revolutionary situation.

Bibliography for FAQ

This bibliography lists all the books quoted in the FAQ. However, details for some of these books is missing. This information will also be added to over time. Some books are listed in more than one edition. This is due to the process of revising the FAQ for publication and using the most recent versions of books quoted. Once the revision is complete, the old details will be removed.

The bibliography is split into four sections: Anthologies of Anarchist authors; books by anarchists and other libertarians; books about anarchism, anarchists and anarchist history by non-libertarians; and books by non-anarchists/libertarians.

Anarchist Anthologies

- Brook, Frank H. (Ed.), **The Individualist Anarchists: An Anthology of Liberty (1881–1908)**, Transaction Publishers, New Brunswick, 1994.
- Dark Star (Ed.), **Quiet Rumours: An Anarcha-Feminist Reader**, AK Press/Dark Star, Edinburgh/San Francisco, 2002.
 - **Beneath the Paving Stones: Situationists and the beach, May 1968**, AK Press/Dark Star, Edinburgh/San Francisco, 2001.
- Ehrlich, Howard J, Carol Ehrlich, David De Leon, Glenda Morris (eds.), **Reinventing Anarchy: What are Anarchists thinking these days?**, Routledge & Kegan Paul, London, 1979.
- Ehrlich, Howard J. (Ed.), **Reinventing Anarchy, Again**, AK Press, Edinburgh/San Francisco, 1996.
- Glassgold, Peter (Ed.), **Anarchy! An Anthology of Emma Goldman's Mother Earth**, Counterpoint, Washington D.C., 2001.
- Graham, M. (Ed.), **Man! An Anthology of Anarchist Ideas, Essays, Poetry and Commentaries**, Cienfuegos Press, London, 1974.
- Graham, Robert (Ed.), **Anarchism: A Documentary History of Libertarian Ideas — Volume 1: From Anarchy to Anarchism (300CE to 1939)**, Black Rose Books, Montreal/New York/London, 2005.
- Guerin, Daniel (Ed.), **No Gods, No Masters: An Anthology of Anarchism** (in two volumes), AK Press, Edinburgh/San Francisco, 1998.
- Krimerman, Leonard I. and Perry, Lewis, **Patterns of Anarchy: A Collection of Writings on the Anarchist Tradition**, Anchor Books, New York, 1966.
- Woodcock, George (Ed.), **The Anarchist Reader**, Fontana, Glasgow, 1987.

Anarchist and Libertarian Works

- ACF, **Marxism and Its Failures**, ACE Editions, London, 1990.
- Ackelsberg, Martha A., **Free Women of Spain: anarchism and the struggle for the emancipation of women**, AK Press, Oakland/Edinburgh, 2005.
 - **Free Women of Spain: anarchism and the struggle for the emancipation of women**, Indiana University Press, Bloomington, 1991.
- Anderson, Andy, **Hungary '56**, Phoenix Press, London, date unknown.
- Anonymous, “*Community Organising in Southern Italy*”, **Black Flag**, no. 210, pp. 16–19.
- Anonymous, **Fighting the Revolution** (2 volumes), Freedom Press, London, 1985.
- Anonymous, **Red Years Black Years: Anarchist Resistance to Fascism in Italy**, ASP, London, 1989.
- Anonymous, “*Trotskyism, Lies and Anarchism*”, **Black Flag**, no. 211, pp. 24–5.
- Anger, Max, “*The Spartacist School of Falsification*”, **Anarchy: A Journal of Desire Armed**, no, 43, Spring/Summer 1997, pp. 50–2.
- Arshinov, Peter, **The History of the Makhnovist Movement**, Freedom Press, London, 1987.
 - **The Two Octobers** available at: http://flag.blackenEd.net/revolt/russia/arshinov_2_oct.html
- Avrich, Paul (Ed.), **The Anarchists in the Russian Revolution**, Thames and Hudson Ltd, London, 1973.
- Avrich, Paul, **An American Anarchist: The Life of Voltairine de Cleyre**, Princeton University Press, Princeton, 1978.
 - **Kronstadt 1921**, W.W. Norton and Company Inc., New York, 1970.

- **The Russian Anarchists**, W.W. Norton & Company, New York, 1978.
 - **Anarchist Portraits**, Princeton University Press, Princeton, 1988.
 - **The Haymarket Tragedy**, Princeton University Press, Princeton, 1984.
 - “*Bolshevik Opposition To Lenin: G. Miasnikov and the Workers Group*”, pp. 1–29, **Russian Review**, vol. 43, no. 1
 - **Bolshevik Opposition To Lenin: G. Miasnikov and the Workers Group**, available at: <http://www.geocities.com/CapitolHill/Lobby/2379/mias.htm>
- Bakunin, Micheal, **The Basic Bakunin**, Robert M. Cutler (trans. and Ed.), Prometheus Books, Buffalo, N.Y., 1994.
 - **Bakunin on Anarchism**, 2nd Edition, Sam Dolgoff (Ed.), Black Rose Books, Montreal, 1980.
 - **The Political Philosophy of Bakunin**, G.P. Maximov (Ed.), The Free Press, New York, 1953.
 - **Michael Bakunin: Selected Writings**, Arthur Lehning (Ed.), Jonathan Cape, London, 1973.
 - **Statism and Anarchy**, Cambridge University Press, Cambridge, 1990.
 - **God and the State**, Dover, New York, 1970.
 - **Marxism, Freedom and the State**, K.J. Kenafick (Ed.), Freedom Press, London, 1984.
 - Barclay, Harold, **The State**, Freedom Press, London, 2003.
 - Barrett, George, “*The Anarchist Revolution*” contained in **The Last War**, Pirate Press, Sheffield, 1990.
 - “*Objections to Anarchism*”, **The Raven: Anarchist Quarterly**, no. 12 (Vol. 3, No. 4), Oct-Dec 1990, Freedom Press, pp. 339–364.
 - **Objections to Anarchism** available at <http://www.spunk.org/library/intro/sp000146.txt>
 - Bennello, George, “*The Challenge of Mondragon*” in **Reinventing Anarchy, Again**, Howard Ehrlich (Ed.), AK Press, Edinburgh/San Francisco, 1996.
 - Bennello, George C., **From the Ground Up**, Black Rose Books, Montreal, 1992.

An Anarchist FAQ after ten years

It is now ten years since “An Anarchist FAQ” (AFAQ) was officially released. A lot has happened over that time, unfortunately finishing it has not been one of them!

Over that decade, AFAQ has changed considerably. It was initially conceived as a energy-saving device to stop anarchists having to continually make the same points against claims that “anarcho”-capitalism was a form of anarchism. As would be expected, the quality of the initial versions and sections were pretty mixed. Most of it was extremely good (even if we do say so ourselves!) and has required little change over the decade (mostly we have built upon and expanded the original material). A few bits were less good and have been researched more and rewritten. We have also, of course, made mistakes and corrected them when we have been informed about them or have discovered them ourselves. In general, though, our initial work has stood up well and while we were occasionally wrong on a few details, the general thrust of even these areas has been proven correct. Overall, our aim to produce an FAQ which reflected the majority of anarchist thought, both currently and historically from an international perspective, has been a success as shown by the number of mirrors, links and translations AFAQ has seen (being published by AK Press confirms this).

Since the official release, AFAQ has changed. When we released it back in 1996, we had already decided to make it a FAQ about anarchism rather than an FAQ on why anarchism is anti-capitalist. However, the first versions still bore the marks of its origins. We realised that this limited it somewhat and we have slowly revised the AFAQ so that it has become a resource about anarchism (indeed, if it were to be started again the section on “anarcho”-capitalism would be placed into an appendix, where it belongs). This means that the aim of AFAQ has changed. I would say that it has two related goals:

1. To present the case for anarchism, to convince people they should become anarchists.
2. To be a resource for existing anarchists, to use to bolster their activism and activities by presenting facts and arguments to allow them to defend anarchism against those opposed to it (Marxists, capitalists, etc.).

The second goal explains why, for example, we spend a lot of time refuting capitalist economics and Marxism/Leninism (partly, because many of the facts and arguments are in academic books which are unavailable to the general public). We hope that AFAQ has proved useful to our comrades as much as we hope we have convinced non-anarchists, at best, to become anarchists, or, at worse, to take our ideas seriously. Hopefully, the two aims are mutually complementary.

Not only has AFAQ changed over the last ten years, so has the anarchist and general political landscape on the internet. When AFAQ was being initially created, the number of anarchists on-line was small. There were not that many anarchist webpages and, relatively speaking, right-wing “libertarians” were unopposed in arguing that “anarcho”-capitalism was a form of anarchism (the only FAQ was Caplan’s biased and inaccurate “Anarchist Theory FAQ”). As a non-American, I was surprised that this oxymoron even existed (I still am, as are all the anarchists I mention it to). Anarchism has always been a **socialist** theory and the concept of an “anarchism” which supported the economic system

anarchism was born opposing is nonsense. Arguing with its supporters and reading up on it convinced me that the only real link it has with anarchism is simply its attempted appropriation of the name.¹ Hence the pressing need for a **real** anarchist FAQ, a need AFAQ successfully met.

Luckily, over the 1990s things changed. More anarchists went online, anarchist organisations created a web presence and the balance of forces changed to reflect reality (i.e. there are far more anarchists than “anarcho”-capitalists). The anti-capitalist movement helped, putting anarchists back in the news (the BBC even linked to AFAQ for those interested in finding out what anarchists wanted!) Even in the USA, things got better and after Seattle genuine anarchism could no longer be ignored. This produced some articles by “anarcho”-capitalists, explaining how there are two forms of anarchism and that the two have nothing or little in common (if that is the case, why call your ideology anarchism?). Anarchist organisations and activism increased and the awareness that anarchism was anti-hierarchy, anti-state **and** anti-capitalist increased. As an added bonus, some genuine individualist anarchists appeared, refuting the claim that “anarcho”-capitalism was merely a form of “updated” individualist anarchism. All these developments were welcomed, as were the words of praise and encouragement we received for our work on AFAQ from many anarchists (including, it must be stressed, individualist ones). Today, genuine anarchism in all its forms has a much greater profile, as is anarchist opposition to “anarcho”-capitalism and its claims. We hope AFAQ played a role, however small, in that process.

Of course, the battle is not over. On Wikipedia, for example, right-“libertarians” are busy trying to rewrite the history of anarchism. Some anarchists have tried to counteract this attempt, and have meant with differing degrees of success. We urge you to get involved, if you have the time and energy as numbers, sadly, do seem to count. This is because we anarchists are up against people who, apparently, do not have a life and so can wage a war of attrition against those who try and include relevant facts to the entries (such as the obvious anti-capitalism of “traditional” anarchism, that anarchism is **not** compatible with government or hierarchy — hence an-**archy!** — or that calling yourself an anarchist does not necessarily make it so). It is a shame that such a promising project has been derailed by ideologues whose ignorance of the subject matter is matched only by their hatred of AFAQ which they deny is a “credible” or valid reference on anarchism.

I am not surprised that AFAQ is hated by the “libertarian” right (nor will I be surprised if it is equally hated by the authoritarian left). After all, it presents the case for genuine anarchism, exposes the claims of a capitalist “anarchism” for the nonsense they are and shows how deeply authoritarian right-wing “libertarianism” actually is. That the FAQ can be called “biased” by these people goes without saying (it is, after all, a FAQ about anarchism written by anarchists). What seems funny is that they just do not comprehend that anarchists take offence to their pretensions of labelling their ideology “anarchism,” that we would seek to refute such claims and that their notion that “anarcho”-capitalism is anarchist is far more biased. Let us hope that more academics will pay at-

¹While “anarcho”-capitalism has some overlap with individualist anarchism, it lacks the radical and socialist sensibility and aims of the likes of Tucker which makes the latter anarchist, albeit a flawed and inconsistent form. Unlike the former, individualist anarchism **can** become consistent anarchism by simply applying its own principles in a logical manner.

tention to this and the obvious fact that there is a very long list of anarchists, famous and not-so-famous, who consider the whole concept an oxymoron.

Equally unsurprising is the attempt to deny that AFAQ is a valid reference on Wikipedia. This boils down to the claim that the authors are “nobodies.” Given that Kropotkin always stressed that anarchism was born from the people, I take that intended insult as a badge of pride. I have always taken the position that it is not who says something that counts, but what they say. In other words, I would far sooner quote a “nobody” who knows what they are talking about than a “somebody” who does not. As AFAQ indicates with its many refutations of straw man arguments against anarchism, there are plenty of the latter. Ultimately, the logical conclusion of such an argument is that anarchists are not qualified to discuss anarchism, an inherently silly position but useful if you are seeking to turn anarchism into something it is not.

Given that even such an usually reliable expert as the late, great, Paul Avrich made mistakes, this position is by far the most sensible. Between what a suitably qualified “expert” writes and what actual anarchists say and do, I always go for the latter. Any serious scientist would do so, but sadly many do not — instead, we get ideology. A classic example is Eric Hobsbawm’s thesis on **“Primitive Rebels”** which he decided to illustrate, in part, with the example of Spanish anarchism. As we recount as part of our appendix on “Marxism and Spanish Anarchism” while being undoubtedly a “somebody” and immensely qualified to write on the subject, his account was utter nonsense. This was proven beyond doubt when an anthologist interviewed the survivors of the Casas Viejas massacre. Their account of the event had only appeared previously in anarchist papers at the time and both, needless to say, refuted Hobsbawm.

So, to be called a “nobody” is quite a complement, given how many of the “somebodies” have not stopped being ignorant of anarchism from putting pen to paper and exposing that ignorance to the world (the worse recent example of this, outside of Marxism, must be George Monbiot’s terrible comments in his **“Age of Consent”**). So, when it comes to saying what anarchism is, I turn to anarchists. This is what the “experts” should be doing anyway if they were doing their job.

Are we “qualified” to write about anarchism? Well, the the collective has always been made up of anarchists, so we have an anarchist FAQ written by anarchists. It has always been a popular site, given the number of mirrors, translations and links it has been given (one mirror called it “world famous”). It is being published by AK Press, one of the leading anarchist publishers in the world.

I am the main editor and contributor to AFAQ. While one contributor to Wikipedia claimed I as an American academic, this is not the case. I have a “real” job and work on AFAQ in my spare time (I do despair when people, particularly leftists, assume that wage slaves are incapable of producing works like AFAQ). I have been always been an anarchist since becoming politically aware which means I have been an anarchist activist for approximately 20 years (time flies when you are having fun!). I have been a member of numerous anarchist groups and have contributed to many anarchist publications and websites. As can be seen from my personal webpage,² I regularly con-

²Under my pseudonym “Anarcho” (given what’s on it, I’m surprised I bother using “An-

tribute articles to **Freedom** (the leading English-language anarchist newspaper). Rarely does an issue come out without something by me in it. Moreover, some of the longer articles have appeared in **Black Flag** (before and after I joined its editorial committee). My works have also been published in **Scottish Anarchist**, **Anarcho-Syndicalist Review** and **Free Voices** and some have been translated into other languages. I am also an invited columnist for the <http://www.infoshop.org> and <http://www.anarkismo.net> webpages (neither of which I am otherwise involved with). In addition, I have been invited to speak at anarchist conferences in Scotland and Ireland, as well as by Marxist parties to debate the merits of anarchism. Due to family commitments, my specifically anarchist activities are pretty much limited to writing these days, but I remain a reasonably active trade unionist.

I will leave it up to the reader to decide whether we are “qualified” to write about anarchism or not!

But as I said, I always consider what is said more important than who says it. The fact that AFAQ is so popular with anarchists is what counts and I hope that we continue to be. We are always looking for help and suggestions, so if you want to get involved or want something added or changed, please contact us — we consider AFAQ as a resource for anarchists and we want it to reflect what anarchists think and do.³ However, if you do want something changed or added be prepared to do some or all of the work yourself as we have our own plans on future developments and may not be able to provide the time or energy for other changes. Also, if you spot a mistake or a typo, please inform us as no matter how often we check errors do creep in. We take our task seriously and correct all errors when informed of them (differences in interpretation or terminology are not, of course, errors).⁴

Speaking personally, I have enjoyed being part of this project. I have learned a lot and have gained a better understanding of many anarchist thinkers and historical events. For example, I can now understand why Daniel Guerin was so interested in Proudhon and why it has been a crying shame that Voltairine de Cleyre’s works have been unavailable for 8 decades. As such, my understanding and appreciation of anarchism has been enriched by working on AFAQ and I hope that others have had a similar experience reading it. On the negative side, I’ve had to read some terrible books and articles but very few, if any, of those were anarchist. But this is minor. The work has been worth it and while it has taken longer than any of us had imagined at the start, I’m glad that we are still working on it ten years later as AFAQ is much improved for all that time and energy. If nothing else, this work has reinforced my belief in the positive ideas and ideals of anarchism and confirmed why I became an anarchist so long ago.

archo” these days as it is obvious who writes the articles). It is available here: <http://anarchism.ws/writers/anarcho.html>

³Apologies for those who sent emails over the years and never received a reply — some were lost and, given how much busy we are, emails are always the first to suffer.

⁴For a discussion of one early incident, mentioned in the Wikipedia entry on AFAQ, see my article (“*An Anarchist FAQ, David Friedman and Medieval Iceland*” on my webpage). Suffice to say, once we became aware of his new criticism this year (Friedman did not bother to inform us directly), we sped up our planned revision and expansion of that section and corrected the few mistakes that had remained. In summary, it can be said our original critique remained valid in spite of some serious errors in details caused by a failure to check sources in a rush to officially release it. We learned our lesson and try not to make the same mistake again (and have not, as far as I am aware).

And, let me be honest, I would not do it unless I enjoyed it!

What of the future? Obviously, we know that AFAQ is not the final word on anarchism (we have always stressed that this is **An** Anarchist FAQ and not “The Anarchist FAQ,” although some do call it that). The immediate aim is to revise the existing main sections of AFAQ for publication, which we are slowly doing. In the process some previous work is being added to and, in some cases, totally revised. After ten years, our knowledge of many subjects has expanded considerably. We have also asked a couple of individualist anarchist comrades to have a look over section G and hopefully their input will flesh out that section when it comes to be revised (for all its flaws, individualist anarchism deserves far more than to be appropriated by the right and social anarchists should be helping its modern supporters attempts to reclaim their radical tradition).⁵ Once the revision of the main body of AFAQ is complete, the appendix on the Russian Revolution will be finished and then all the appendices will be revised.

After that, AFAQ will be added to once new information becomes available and new anarchist social movements and ideas develop. We have not covered everything nor does AFAQ discussed all developments within anarchism in all countries. If you think we have missed something, then contact us and we can arrange to include the subject and issues missing. As noted above, though, do **not** expect us to do all the work for you. This is a resource for the movement and, as such, we expect fellow anarchists to help out beyond merely suggesting things they expect **others** to do!

Hopefully, after summarising 19th and 20th century anarchism, the anarchists of the 21st century will use that to build and develop new ideas and movements and create both viable anarchist alternatives under statism and capitalism and, eventually, a free society. Whether we do so or not is, ultimately, up to us. Let us hope we can rise to the challenge! I do hope that anarchists can rise above the often silly arguments that we often inflict on each other and concentrate on the 90%+ that unites us rather than the often insignificant differences some consider so important. One thing is sure, if we do not then the worse will happen.

Finally, another personal note. On the way to work, I go past a little park. This little oasis of green in the city is a joy to behold, more so since someone has added this piece of graffiti to one of its walls:

*“Resistance is **never** futile! Have a nice day, y’all. Love Friday, XXX”*

With that in mind, we dedicate the ten year anniversary release of “An Anarchist FAQ” to all those “nobodies,” all those anarchists who are not famous or have the appropriate “qualifications”, but whose activity, thoughts, ideas, ideals, dreams and hopes give the “somebodies” something to write about (even if they fail to get some, or even all of it, right).

Iain McKay

⁵A few people have said that AFAQ does not give equal billing to individualist anarchism. However, in terms of numbers and influence it has always been very much a minority trend in anarchism outside of America. By the 1880s, this was probably the case in America as well and by the turn of the 20th century it was definitely the case (as noted by, among others, Paul Avrich). As such, it is hardly a flaw that AFAQ has presented the majority position on anarchism (social anarchism), particularly as this is the position of the people involved.
